SEVENTH-DAY, EIGHTH MONTH 23, 1873.

NO. 1.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

William Leddra.

We have not much information respecting this faithful man and martyr for the Truth, before his appearance in New England in the year 1658. It appears that he was an inhabitant of the Island of Barbadoes, and was convinced of the principles of Truth as held by Friends. In the year mentioned he went to New England in obedience, as he believed, to the call of his divine Master, where he was soon arrested, and with his companion William Brend, taken to Salem, in Massachusetts.

The magistrates of this place asked them if they were Quakers; and being told they were so called in scorn, they charged them with denying that Christ who died at Jerusalem, and also the Holy Scriptures. These false accusations they boldly contradicted, declaring they owned no other Lord Jesus Christ but he who suffered at Jerusalem, and that they owned the Holy Scriptures. They were, however, sent to the House of Correction, and at length removed to Boston and again imprisoned, with orders that they should work. Being unwilling to comply with this unrighteous demand, they were kept five days without food, and then whipped with a three-headed lash.

After the infliction of this barbarous punishment, William Leddra was banished from Boston on pain of death; but believing it his duty to return thither, he was thrust into an open jail, where he was kept during an extremely cold winter, chained to a log of wood. Here his hardships and sufferings were so great, that it seemed as if his persecutors designed to destroy him; but he was supported through them all, and on the 9th of First mo. 1660-1, was brought before the Court of Assistants, with his chain and log at his feet. On being told that he had incurred the penalty of death, he meekly asked what evil he had done? He was answered that he owned the Quakers who had been hung, and refused to put off his hat in court, and said "thee" and "thou."

Finding that his persecutors were resolved possible to take his life, he appealed to the laws of England for his trial, saying, that if found guilty by those laws, he refused not to die. But the court overruled his appeal, and

endeavored to persuade him to renounce his religion and embrace that established by law. He, on the contrary, felt conscientiously bound to testify against a religion which would countenance men in cruelly persecuting and putting persons to death, because they dare not embrace it; and looking upon those who were thus seeking his life, he exclaimed, "What! join with such murderers as you are? Then let every man that meets me, say, 'Lo this is the man that hath forsaken the God of his salvation.'" Sentence of death was passed upon him, and the 14th of the same month fixed for its execution.

During the interval which elapsed before the wicked sentence was carried into effect, this devoted Christian was cheered and sustained by living faith, and filled with a holy magnanimity which raised him above the fear of death. The heavenly state of mind with which he was favored is shown in the following extracts from a letter to Friends, written the day before his execution. It is addressed as follows, viz:

"To, the Society of the little flock of Christ, grace and peace be multiplied."

"Most dear and inwardly beloved,—The sweet influences of the Morning Star, like a flood, distilling into my innocent habitation, have so filled me with the joy of the Lord in the beauty of holiness, that my spirit is as if it did not inhabit a tabernacle of clay, but is wholly swallowed up in the bosom of eternity, from whence it had its being.

"Alas, alas, what can the wrath and spirit of man, that lusteth to envy, aggravated by the heat and strength of the king of the locusts, which came out of the pit, do unto one who is hid in the secret places of the Almighty, or unto them that are gathered under the healing wings of the Prince of Peace? Under his armor of light they shall be able to stand in the day of trial, having on the breastplate of righteousness, and the sword of the spirit, which is their weapon of war against spiritual wickedness, principalities and powers, and the rulers of the darkness of this world, both within and without.

"Oh, my beloved! I have waited as a dove at the window of the ark, and have stood still in that watch, which the Master, without whom I could do nothing, did, at his coming, reward with fulness of his love, wherein my heart did rejoice, that I might in the love and life of God, speak a few words to you, sealed with the spirit of promise, that the taste thereof might be a savor of life to your life, and a testimony in you of my innocent death. And if I had been altogether silent, and the Lord had not opened my mouth unto you, yet he would have opened your hearts, and there have sealed my innocency with the streams of life, by which we are all baptized into that body which is in God, in whom and in whose presence there is life; in which, as you abide, you stand upon the pillar and ground of truth: for, the life being the truth and the way, go

not one step without it, lest you should compass a mountain in the wilderness; for unto every thing there is a season.

"As the flowing of the ocean doth fill every creek and branch thereof, and then retires again towards its own being and fulness, and leaves a savor behind it, so doth the life and virtue of God flow into every one of your hearts, whom he hath made partakers of his own divine nature. And when it withdraws but a little, it leaves a sweet savor behind it, so that many can say, they are made clean through the word that he hath spoken to them: in which innocent condition you may see what you are in the presence of God, and what you are without him.

"Therefore, my dear hearts, let the enjoyment of life alone be your hope, your joy and consolation; and let the man of God flee those things that would lead the mind out of the cross, for then the savor of life will be buried. And although some may speak of things that they received in the life, as experiences, yet the life being veiled, and the savor that is left behind washed away by the fresh floods of temptation, the condition that they did enjoy in the life, though boasted of by the airy spirit, will be like the manna that was gathered yesterday, without any good scent or savor. For it was well with the man only while he was in the life of innocency; but being driven from the presence of the Lord into the earth, what can he boast of?"

In this remarkable address, W. L. gives further christian counsel, and exhorts his beloved friends to patience and steadfastness, saying, "hunger and thirst patiently, be not weary, neither doubt; stand still and cease from thy own working, and in due time thou shalt enter into the rest, and thy eyes shall behold his salvation, whose testimonies are sure and righteous altogether."

On the morning when this servant of the Lord Jesus sealed his testimony with his blood, the governor came to the prison with a military guard; William Leddra's irons were knocked off, and taking a solemn leave of his fellow prisoners, he went forth cheerfully to meet death. The guard surrounded him in order to prevent any of his friends from speaking to him; and when they reached the appointed place, he took an affectionate leave of his friend Edward Wharton, saying, "All that will be Christ's disciples must take up his cross." Then taking his stand where the guard directed him, he addressed the people thus: "For bearing my testimony to the Lord against the deceivers and deceived, am I brought here to suffer." When the executioner was putting the halter about his neck, he calmly said, "I commend my righteous cause unto thee, O God;" and as he was turned off, he cried out, "Lord Jesus receive my spirit!"

Thus did this innocent martyr lay down his life cheerfully, and patiently suffer for the name and testimony of his Lord and Saviour.

## A Thrilling Narrative.

Writing from Stockholm on July 17th, the correspondent of the London *Standard* says:

The sad news of the death of the seventeen Norwegian whalers, frozen in at Spitzberg Islands, has now been confirmed beyond a doubt. On the 16th of September last year six Norwegian ships, with their crews of together fifty-seven men, were frozen in on the northeastern coast of the Spitzbergs, at Gray Hook and Welcome Point, eighteen and twenty-four English miles respectively, from the winter quarters of the Swedish polar expedition, at Mosel Bay. Their provisions being calculated to last only up to the first of December, they applied to Professor Norden-skjold for assistance, and were allowed by him to dispose of the house and stores accumulated at Isfjord. Consequently seventeen men, with two small open boats, left Gray Hook on the 7th of October, crossing thence westward, until they found open water, and finally reached Isfjord in their boats, on the 14th of October. The remaining forty-one men prepared themselves to pass the winter either in their own ships at Gray Hook or with the Swedish expedition at Mosel Bay, when happily, in the first days of November, a heavy storm broke thence, and made their escape possible. Thirty-nine men were thus able to reach the Norwegian port of Tromsøe. Only two, the old captain, Mattilas, and his cook, would not abandon their ship, which was not insured, and have now been found dead in a boat, probably on their way to Mosel Bay. The ship was totally crushed by the ice.

The entries of the journal found at Isfjord begin with the 7th of October, 1872, and are regularly continued every day until the 3d of March, this year. No kind of occupation nor any undertaking on the part of the men is reported, except a few hunting parties, by whom two bears, two foxes and a few reindeers were brought home. Darkness, however, soon prevented all further hunting expeditions, and on the 7th of November the journal reports: "Hunting totally abandoned, by cause of the darkness."

No mention is made of sickness or disease before the 9th of December, when it is said: "One of the crew sick since eight days," but from this day the same complaint repeats itself with sad monotony: "No improvement in the state of the sick." On the 19th it is said: "Two men constantly in bed; nearly all suffer of the disease." Though no indication is given what kind of illness here is meant, there is no doubt that it was scorbutic. The first death is recorded on the 19th of January, in the following words: "Tonnes Penderson, who was taken ill 6th of this month, was called to the Lord this morning at 3.30, after a painful illness; this afternoon died also Hendrik Hendrickson, who was taken ill on the 19th December. The 3d of February only three men were in good health, and the journal repeats every day, "No improvement."

The 20th of February we read: "To-day we have seen the sun for the first time in the year 1873." A new death is recorded the following day: "To-day the Lord again called to heaven one of our comrades, Niles Largson, after an illness of eighty-two days." Two days later the entries are made by another hand, who writes on the 25th: "I have now only one man in good health to look after the whole house. O Lord, help us in our great distress!" And on the 28th he continues:

"This evening another of our men died; the Lord called him home from this place, so rich in suffering." From this day the journal contains nothing but annotations of death until the 19th of April, when the last regular entry is made thus: "Martin Hansen died the 19th April, at 6 A. M." Then begins another hand, who writes: "Peter Andreas Nilson, of Batsfjord, a red bonnet. Har. T. Mitterhuk." What these words, which have apparently been written under the influence of delirium, are meant to express will never be known, and the horrible fate of the poor sufferer who traced them can only be guessed. Did he struggle hours, days or weeks among the sixteen corpses of his comrades, or did the deliverer come as he dropped his pen? Nobody knows, nor will ever know.—*N. American.*

For "The Friend."

## The Necessity of Bearing the Cross.

On this subject Thomas A' Kempis remarks: "If any way but bearing the cross and dying to his own will could have redeemed man from that fallen life of self in flesh and blood, which is his alienation from, and enmity to God, Christ would have taught it by his words, and established it by his example. But of all universally that desire to follow him, he has required the bearing of the cross; and without exception he has said to all, 'If any man will come after me, let him deny himself, take up his cross, and follow me.'

"In the cross is life, in the cross is health, in the cross is protection from every enemy; from the cross are derived heavenly meekness, true fortitude, the joys of the Spirit, the conquest of self, the perfection of holiness. There is no redemption, no foundation for the hope of the divine life, but in the cross. Take up thy cross therefore, and follow Jesus, in the path that leads to everlasting peace. He has gone before, bearing the cross upon which he died for thee, that thou mightest follow, patiently bearing thy own cross, and upon that die to thyself for him; and if we die with him, we shall also live with him; 'if we are partakers of his sufferings, we shall be partakers also of his glory.'

"If thou bearest the cross willingly, it will soon bear thee and lead thee beyond the reach of suffering, where 'God shall take away all sorrow from thy heart.' But if thou bearest it with reluctance, it will be a burden to thee inexpressibly painful, which yet thou must still feel; and by every impatient effort to throw it from thee, thou wilt only render thyself less and less able to sustain its weight, till, at length, it crush thee.'

"The regenerate man, as he becomes more spiritualized, has a quicker discernment of the cross wherever it meets him; and his sense of the evils of his exile, as the punishment of his fallen life, increases in proportion to his love of God, and desire of re-union with him. But this man, thus sensible of misery, derives hope even from his sufferings; for while he sustains them with meek and humble submission, their weight is continually diminishing; and what to carnal minds is the object of terror, is to him a pledge of heavenly comfort. He feels that the strength, the life and peace of the new man, rise from the troubles, the decay, and death of the old; and from his desire of conformity to his crucified Saviour, he derives so much strength and comfort under the severest tribulations, that he wishes not to live a moment without them. Of the truth

of this, the blessed Paul is an illustrious instance; who says of himself, 'I take pleasure in infirmities, in reproaches, in necessities, in persecutions, in distress for Christ's sake; for when I am weak, then am I strong.'

"This desire of suffering, however, and this meek and patient submission under it, is not the effect of any power which is inherent in man, and which he can boast of as his own; but is the pure fruit of the grace of Christ, operating so powerfully in the fallen soul, as to make it love and embrace that, which it would naturally abhor and shun." \* \* \* "If thou dependest upon thy own will and strength to do and to suffer all this, thou wilt find thyself as unable to accomplish it as to create another world; but if thou turnest to the Divine power within thee, and trustest only to that as the doer and sufferer of all, the strength of Omnipotence will be imparted to thee, and the world and the flesh shall be put under thy feet."

The pious and earnest writer from whom the foregoing extracts have been taken, shows that the way to the everlasting kingdom of rest and peace is not smooth and easy to the natural man, but it would be a great mistake to conclude that it was also sad and gloomy to sincere, humble, devoted Christians. Or the contrary, we have every reason to believe that these enjoy much more peace and substantial happiness than those do who look merely to worldly enjoyments as their chief good. There is abundant evidence that those who have been most eminent for piety and dedication to the cause of their Divine Master, have been also happy men and women, receiving the "hundred fold," even here, while their spirits have been cheered and animated with the gracious promise that they should inherit everlasting life when the trials and warfare of this state of probation were ended.

The invitation of our Holy Redeemer is: "Come unto me all ye that labor and are heavy laden, and I will give you rest. Take my yoke upon you and learn of me; for I am meek and lowly in heart; and ye shall find rest unto your souls. For my yoke is easy, and my burden is light." Again when about to leave his sorrowing disciples he said: "These things have I spoken unto you, being yet present with you. But the Comforter, which is the Holy Ghost, whom the Father will send in my name, shall teach you all things, and bring all things to your remembrance whatsoever I have said unto you. *Peace* I leave unto you, *my peace* I give unto you: not as the world giveth give I unto you. Let not your heart be troubled, neither let it be afraid."

We may also rest assured it is the Lord's will that his servants and followers should show by their countenances and entire deportment, that they do not serve a hard master. Inward conflicts and trials must at times be endured, as well as the sorrows and afflictions which fall to all, but the Christian should endeavor to keep the former as much as possible between his own soul and Him who seeth in secret. This is the lesson taught by the command: "But thou when thou fastest, anoint thine head and wash thy face; that thou appear not unto men to fast, but unto thy Father, which is in secret, and thy Father which seeth in secret, shall reward thee openly. These will be richly rewarded by the life-giving presence of their dear Saviour, and cheered and animated by the holy con-

dence and glorious hopes which He alone can give.

For "The Friend."

Some of the readers of *The Friend* may have known, that during the present season a chief of the Wichita Indians (now in charge of our friend Jonathan Richards) was wantonly killed whilst hunting buffalo, by a party of Osages, who are in charge of our friend Isaac T. Gibson. When the account of the murder reached the Wichitas it produced great excitement among his tribe, who immediately resorted to measures of retaliation, by inviting the neighboring bands to assist them in avenging the death of their chief. Through the instrumentality of Agent Gibson, a messenger was dispatched to the Wichita agency, with an acknowledgment of the murder, and an offer to do all in their power to make satisfaction. Upon this, a delegation of the Wichitas was sent to the Osages, and the following shows the happy result of a council held for the purpose of adjusting the difficulty, and the value of having men of peace and principle among them. In addition to the two efficient agents above named, Enoch Hoag the superintendent, and Cyrus Beede, chief clerk, were useful as members of the council, and in arresting an Indian war which, for a time, threatened the peace of the territory.

During the unsettlement, an incident occurred which had some effect in promoting the restoration of peace. Whilst the injured tribe were smoking the war pipe, and offering it to others for that purpose, they presented it to the Pen-e-teh-ka Comanchees, and as they were passing it round among themselves, without any shock, the pipe broke, when the medicine was pronounced *bad*, and the war abandoned.

W.

Speech of Joseph Paw-ne-no-pa-she, Governor of the Osages, to the Wichitas, on the payment of the indemnity demanded by the latter tribe for the murder of Is-sad-a-wa, their principal chief.

"My Brothers,—I desire to say a few words to you upon our present difficulties. Our forefathers had a road, and that road from one nation to the other, has always, to the present time, been kept very clean. Those forefathers, in making that road, looked to the benefit of us, their children. It was for our benefit that this road was made, and it is for our benefit that this road was made, and it is for our benefit to keep it open and clean; heretofore, both the Wichitas and Osages, have travelled this road, have met on the road on terms of equality, and eaten our victuals in friendship with one spoon. But lo! many years have passed, our forefathers are dead, and we the Osages have violated our faith with the Wichitas, by the murder of your chief; we have been the aggressors, we acknowledge it.

After finding out that my people had done this, I called together my chiefs and headmen; we apprehended the danger that might arise from this rash, unprovoked act of ours, and determined to make clean again the road of our forefathers, now stained with the blood of Issadawa, killed by my people. My brothers, we the chiefs, and all the braves, desire this road made clean, and we hope you are willing it should be so, for this reason I invited you here to settle with you. It is not the chiefs and head men that commit these depredations, it is our boys that do all this mischief, they

bring upon us all this trouble. One of our best friends, the Wichita chief, has been murdered by my people, and I am very sorry for it, and *want to make peace and cover it all up*. When this sad affair is once settled, we must prevent difficulties of the kind in future, and for this purpose we propose a law for the punishment of offences against either nation by the other, hereafter; this proposition will be left to your reflection, you will have to consider it; if it meets with your approval you will sign it.

My brothers, we have promised you some money, to indemnify you for the loss of your chief, and I am ready to pay it; in making up this money, it has been our desire to provide for the family of the deceased; it is my wish, and it is my desire, that you give to them their full share; if you give them \$400 out of the \$1000 you receive, it will help them very much, they are at your mercy, here is the \$1000—you have the blankets, the ponies, the shrouding, calico, guns, &c."

The reply of "Dave," speaker for the Wichitas:

"To the Osages. My brothers,—My heart is glad to-day, to know that the difficulty between us has been settled. In coming up here I thought different, but my friend Joe, and all the Osages, being anxious to settle, have induced me to consent, and I think all my brothers, on the plains, will be glad it is settled without blood. I think you (the Osages), have come to a wise conclusion to fix it up as you have: the other course would have led to war. Now your women and children and ours, can sleep in peace, we have cleaned the road of this blood, and all the Indians will be glad. But this law you have given us to sign, we will take home with us to our people, if they approve it, our principal chief will sign first; I like it, but will let them decide. That is all."

For "The Friend."

#### Voices by the Sea.

Listen where the mighty ocean sends forth its treasures,—ever "drifting, drifting on the shifting current of the restless main." Listen to the voices of the dark blue waves, with their white caps chasing each other hither and yon, murmuring and hurrying onward to give the alarm of the great breakers ahead. Hark! do ye hear those tremendous breakers roaring and dashing, as though they said, "we will go on, and on, until we overleap the edge of this grand basin, to fall resistless upon its sand-bound shore," leaving no trace save the feathery foam with its seaweed drapery, for they hear the voice of Him who said, "thus far shalt thou go and no farther," and here shall thy proud waves be staid.

Listen, close under the shadow of the towering lighthouse, which says:

"Sail on, sail on ye stately ships!

And with your floating bridge the ocean span,  
Be mine to guard this light from all eclipse,  
Be yours to bring man nearer unto man."

And again, listen to the voices which tell of the wonderful forms hid away in the depths of this immense reservoir—the animal, mineral and vegetable kingdoms—some of surpassing size, and some of exquisite, delicate beauty, with all the tints of the rainbow. The great leviathan and sea-horse, the sardine and tiny nautilus, all safe in their own paths, the little ones as the great monsters of the deep. These all know their bounds, and the place of their habitation. The massive reefs of coral,

the shining pearl, the great helmet, with the beautiful sea-weed in its lace-like tapestry and feathery forms, all shaped and moulded by the hand of Him who spake and it was done, who commanded and it stood fast.

Then let us listen to Him, whose voice is mightier than the noise of many waters; yea, than the mighty waves of the sea, for He alone can measure the waters in the hollow of His hand and bring man nearer unto man.

Hear the raging of that sea when His storm-cloud rests upon it, and those mighty waves are like a steed rushing on to battle. Oh, listen to Him whose voice alone the elements obey, and when he speaks peace to the troubled waters, they must be still, and know that he is God.

W. A.

*Curious Canine Traits.*—The *Quarterly Review* says: A dog feels anger precisely as we do, and after provocation is sometimes vindictive and sometimes placable, according to his individual character. He is so execrably jealous that his life becomes a burden in the presence of a favored rival. His envy continually leads him to eat what he does not want, lest another animal should take it, and to illustrate the fable of the dog in the manger. Gluttony holds out to him temptations under which even his honesty sometimes succumbs; but, on the other hand, from drunkenness he is nobly emancipated. A dog mentioned by the Rev. Thomas Jefferson ("Our Dumb Companions"), having been once made so drunk with malt liquor that he was unable to walk up stairs, ever after declined to taste the pernicious beverage, and growled and snarled at the sight of a pewter pot. Again, as to maternal affection, the mother dog feels it with heroic passion, starving herself to death rather than forsake her offspring.

Gratitude may be almost said to be a dog's leading principle, supplying first the spring of allegiance to his master, and ever after reconciling him with true magnanimity, to take evil from the hand from which he has accepted good. Regret and grief he feels so deeply that they often break his heart. Fear is a passion which dogs exhibit with singular variation, some individuals being very timorous, and others perfect models of courage, the latter characteristics and fortitude seeming to be more characteristically canine. A greyhound has been known, after breaking his thigh, to run on till the course was concluded. As to hope, no one can observe the dog watching for his master's step, as in Landseer's picture of "Expectation," without admitting that he knows the sentiment as well as we. Pride in a successful chase may be witnessed in every dog, and even in the quickened heartbeats of a greyhound when caressed and praised.

That dogs have personal vanity appears from the fact that they are so manifestly dejected and demoralized when dirty and ragged by long exposure, and recover their self-respect immediately on being washed and combed. Chivalry and magnanimity may nearly always be calculated upon in dogs. The stories are endless of big dogs generously overlooking the insults of small curs, or taking them into water and giving them a good ducking as a punishment for their impertinence, and then helping them mercifully back to land. Sense of property, bifurcating into both covetousness and avarice, is common to

all dogs. The kennel rug, collar, water basin, or bone once devoted to his use, no dog can see transferred to another without indignation. Frequently he "covets his neighbor's house," and attempts to ensconce himself in it surreptitiously, and almost universally he covets his neighbor's bone, and purloins it, if he dare.

Even from avarice he cannot be wholly exonerated, observing his propensity to bury his treasures. Shame, after transgressing any of the arbitrary rules imposed on him, a dog displays with ludicrous simplicity; but of the deeper sense of violated modesty which in human beings accompanies the commission of sin, the dog evidently knows nothing whatever. Humor, so far as it can proceed without language, the dog catches readily from a humorous master, and also the enjoyment of such games as he can understand. As a baby crows with glee at "bo-peep," so a dog barks with delight at "go-fetch." Make-believe runs and false starts, romps and tickling, throwing a ball for him to catch on the grass, or a stick to fish out of a lake, all supply him with pleasure analogous in their nature to that which boys and men find in blind-man's buff, and prisoner's base, lordly cricket and lady-like croquet. Lastly, faith in a beloved superior is perhaps the most beautiful and affecting of all the attributes of a dog.

For "The Friend."

"Thou wilt keep him in perfect peace, whose mind is staid on Thee because he trusteth in Thee."

What is there in this fleeting, transitory life, to be compared with the enjoyment of this perfect peace. In times of trial or danger, to know the mind staid upon that which cannot be shaken, is more to be desired than all the treasures of Egypt. Every day's experience shows the fallacy of centering our affections upon aught below. Every day's experience shows that no effort of ours can bring prosperity without the Divine blessing; shows that though we may plant and water, yet God must "give the increase," either temporally or spiritually. And what abundant evidence have we, day by day, of our utter helplessness and entire dependence upon the Great Disposer of events, who can bless a little, or blast a great deal. And even when to us, our rich harvests seem almost gathered, He sometimes sees meet to lay our bright prospects in the dust, doubtless for some wise end. Sunshine and shade are wisely blended.

"Enough has Heaven indulged of joy below,  
To tempt our tarrance in this loved retreat;  
Enough has Heaven ordained of useful woe  
To make us languish for a happier seat."

Ohio, 8th mo. 8th, 1873.

*Lead Pencils.*—The first, and still the most widely extended use of plumbago, is for marking crayons or pencils. The original method of manufacture was very simple. The lumps of mineral were cut into the required shape and used in the natural state. At a later date it was sawed into the shape now used, and covered with wood, making the well-known lead pencil; but the Borrowdale mine in England, the best known, finally ceased to produce the mineral pure enough for the purpose, and that method was reluctantly abandoned. The refuse about the mine was then utilized by purifying and pressing into blocks, and these in turn were sawed into

"pencil leads." But the leads made in this way were weak and unreliable, and even had they been useful the march of civilization required pencils of different grades, some soft and others harder, while the sawed leads were all alike. The present method consists in selecting the best granulated plumbago (found till recently only in Germany), pulverizing it finely, and floating it in water through a series of vats, the coarser particles settling to the bottom of the first vat, the finer in the next, and so on till after passing through several, that which settles in the last is considered fine enough for the purpose. A suitable clay is found, as yet only in Germany, and this is treated to the floating process, the finest only being fit for use. The plumbago and clay are then mixed together with water to the consistency of cream, and ground together like grinding paint. When this operation is completed, the mass is plastic, water enough having evaporated to leave it in that state. It is then put in a press and forced through an opening of the size desired for the pencil leads, and the leads are cut to a suitable length, straightened and dried. When they are dry enough to handle, they are placed in a crucible, the air is excluded, and they are subjected to a high heat, which bakes them, and brings them out ready to be placed in the cedar for pencils. The different grades are produced by the different mixtures of clay and plumbago; the more clay the harder the grade produced.—*Late Paper.*

For "The Friend."

#### The Early Ministers Among Friends.

In the perusal of some of Isaac Pennington's writings, the subjoined remarks respecting those who were commissioned to go forth as heralds of the gospel in the youthful days of the Society, and the spiritual state of those among whom they preached, has seemed interesting.

"3rd. The precious breaking forth of the Lord, in some hidden vessels whom he had kept waiting upon him, and whom he had preserved fresh in the sense of him; to whom his appearance was very glorious, to whom he opened the state of the earth, and the state of his people, giving them the everlasting gospel to preach to the inhabitants of the earth, and promising them that his Spirit and power should go along with them, bidding them to go forth to till and dress the earth, and to gather his people into his fold. And who can utter what the glory of this light was in its shining and breaking forth in their hearts! How welcome to their weary souls, how pleasant to the eye of their spirits, how demonstrative and satisfactory to their hearts! Oh the joy of that day (surely it can never be forgotten by them), wherein they sensibly felt the pouring down of the Spirit of life upon them, and their hearts gathered into the bosom of eternal rest, and their souls and bodies sanctified, and set apart for the Lord, and his service.

4th. The contemptible means God put into their hands to work this work by; which was not by preaching any new thing, but by directing to a principle which God had already hid in the earth of every man's heart, and which was to be known by its divine nature and light, turning against and reproving sin; testifying that this was the way the Lord of heaven and earth had chosen, to bring his sons and daughters into the power and glory

of his life. Oh! what heart can receive this, what eye can see any beauty in this, but that which the Lord toucheth and openeth! I testify (in the sense of life) that the wisdom of man, yea, the wisdom of Israel corrupted, cannot but despise and turn from this. Is not this the lowest of all dispensations? Is not this common to all mankind? Doth not this fall short of the dispensation of the law of Moses to the Jews, much more of the dispensation by Christ and his apostles? Who would have looked for the Lord here? And yet this hath the Lord chosen to gather his people by, and to appear to the world in; and hath gathered the life, virtue and substance of all former dispensations into it, as those who are gathered thereby, and have waited upon him therein, and felt the nature and power of his life, (and seen things past, present and to come,) are bearing witness of, against all the gainsayings, thoughts, and reasonings of flesh and blood.

5th. The contemptibleness of the vessels which the Lord chose to fill with this treasure, and to let forth this dispensation of his life through. They were for the most part mean as to the outward; country youths of no deep understanding, or ready expression, but very fit to be despised every where by the wisdom of man, and only to be owned in the power of that life wherein they came forth. How ridiculous was their manner of coming forth and appearance to the eye of man! About what poor, trivial circumstances, habits, gestures, and things did they seem to lay great weight, and make great matters of moment! How far did they seem from being acquainted with the mysteries and depths of religion! But their chief preaching was repentance, and about a light within, and of turning to that, and proclaiming the great and terrible day of the Lord to be at hand; wherein, I confess, my heart exceedingly despised them, and cannot wonder that any wise man or sort of professors did or do yet despise them. Yea, they themselves were very sensible of their own weakness and unfitness for that great work and service wherewith the Lord had honored them, and of their inability to reason with man; and so (in the fear and in the watch of their spirits) kept close to their testimony; and to the movings of his power, not mattering to answer or satisfy the reasoning part of man, but singly minding the reaching to, and raising of, that to which their testimony was.

6th. The blessing that God gave to this, his dispensation of life in their hands. Oh, how did the Lord prosper them in gathering his scattered, wandering sheep into his fold of rest! How did their words drop down like dew, and refresh the hungry, thirsty souls! How did they reach to the life in those to whom they ministered; raising up that which lay dead in the grave, to give a living testimony to the living voice of God in them! How did they batter the wisdom and reasonings of man, making the loftiness thereof stoop and bow to the weak and foolish babe of the begettings of life! Eye hath not seen, ear hath not heard, nor hath it entered into the heart of man to conceive what the power of life hath wrought through them, in the hearts and consciences of those who have longed after and waited for the Lord. Oh, the breathings and meltings of soul, the sense of the living presence of God, the subjecting of the heart unto the Lord, the

awakening of and giving strength unto his witness, the falling down and awakening of the powers of darkness, the clear shining of the light of life in the heart, and the sweet running of the pure streams thereof into the enlivened souls, which hath often been known and sealed to from the powerful appearance of God in their ministry.

Indeed, when I have considered these and such like things in my heart, and narrowly marked them in my converse with them, I have been often forced to cry out concerning them, Truly here is man very weak and contemptible; but God very glorious and powerful. And, indeed, when at any time I looked on the man, I was hardly able to forbear disdaining them; but, on the other hand, when the eye of my spirit beheld the power and glory of the Lord in them, I could hardly forbear over-esteeming and exalting them."

Selected.

THERE IS NONE LIKE UNTO THEE.

In the dark winter of affliction's hour,  
When summer friends and pleasures haste away,  
And the wreck'd heart perceives how frail each power  
It made a refuge, and believed a stay,  
When man all wild and weak is seen to be,—  
There's none like thee, O Lord! there's none like thee!

When the world's sorrow—working only death,  
And the world's comfort—caustic to the wound,  
Make the wrong spirit loathe life's daily breath,  
As jarring music from a harp untuned;  
While yet it dare not from the discord flee,—  
There's none like thee, O Lord! there's none like thee!

When the toss'd mind surveys its hidden world,  
And feels in every faculty a foe,  
United but in strife, waves urged and hurled  
By passion and by conscience, winds of woe,  
Till the whole being is a storm-swept sea,—  
There's none like thee, O Lord! there's none like thee!

Thou in adversity canst be a sun;  
Thou art a healing balm, a sheltering tower,  
The peace, the truth, the life, the love of One,  
Nor wound, nor grief, nor storm can overpower:  
Gifts of a king, gifts frequent and yet free:  
There's none like thee, O Lord, none, none like thee!

I WONDER WHY.

I wonder why this world's good things  
Should fall in such unequal shares;  
Why some should taste of all the joys,  
And others only feel the cares!  
I wonder why the sunshine bright  
Should fall in paths some people tread,  
While others shiver in the shade  
Of clouds that gather overhead!

I wonder why the trees that hang  
So full of luscious fruit should grow  
Only where some may reach and eat,  
While others faint and thirsty go!  
Why should sweet flowers bloom for some,  
For others only thorns be found?  
And some grow rich on fruitful earth,  
While others till but barren ground?

I wonder why the hearts of some  
O'erflow with joy and happiness,  
While others go their lonely way  
Unblessed with aught of tenderness!  
I wonder why the eyes of some  
Should ne'er be moistened with a tear,  
While others weep from morn till night,  
Their hearts so crushed with sorrow here:

Ah! well; we may not know indeed  
The whys, the wherefores of each life!  
But this we know—there's One who sees  
And watches us through joy or strife.  
Each life its mission here fulfils,  
And only He may know the end,  
And loving Him, we may be strong,  
Tho' storm or sunshine He may send.

Review of the Weather for Seventh month, 1873.

The weather during the past month, with few exceptions, has been remarkably fine. The range of the thermometer, was from 63° on the 22d, to 90° on the third. The average temperature was 74.8°. The relative humidity was 78.6. The mean height of the Barometer was 29.63 inches. Rain fell to the depth of 7.47 inches.

For "The Friend"

John Heald.

(Continued from page 410, vol. xlv.)

4th mo. 2d, 1815. At Cowneck, many attended besides Friends. After sitting for a considerable time under a weight of exercise, J. H. arose and said: "I shall acknowledge that I believe that acceptable prayer is and may be performed in silence, and also vocally; but I believe it is much the oftenest in silence that some breathed a desire, a prayer as in the closet, and even as it were for every breath they breathed for a prayer for preservation, and for what they stood in need of; thus watching and praying lest they should enter into temptation; that the first beginnings of good began with a desire for it; and as we avoid evil and choose good we are preserved from the evil; that it was a mercy to be thus armed with watchfulness and prayer for our defence.

9th. Purchase Meeting was large, and I was engaged to enforce the use of gospel ministry. Great abilities may be widely extended, and the minds of the people weightily impressed, but if it only serves to gratify a natural inclination, if they only admire the display, but do not attend thereto to their own profit [it will be of little use], it being designed to stir up people to do their own work, not to do it for them."

Under date of 15th he writes: "We are now in the State of Rhode Island. I have for some time past felt my mind depressed and discouraged. 16th. Being First-day, we attended Foster Meeting. The number of Friends being small, the meeting was mostly made up of gay people. After I sat down in that assembly, the depression was much lessened, and after a considerable time of silence, I said, Seek the Lord while He may be found, and call upon Him while He is near. In the course of the communication I recommended living faith, trust and confidence in God, not

faith without works, nor works without faith, they being alike dead.

17th. We were at Cranston Meeting. This, like the last, was made up considerably of other people, but not so gay. I engaged in ministering to them, and for some time felt but little guided, but after several statements the power of truth prevailed, and it became a very solemn time; and the humble, sincere travellers were encouraged, and the careless warned that danger awaited them.

18th. At a meeting called Cumberland. This, as well as the other meetings we have attended, was as much or more made up of such as are not members. A weighty exercise accompanied my mind; and way opening, I was engaged in lengthy communications to several states; that though most desired to be saved, yet too generally there is too little attention given [to religion]; and even among such as do give some attention to it, there is often too much forgetfulness, and neglect. Sometime after I sat down, apprehending myself clear, I moved for the meeting to conclude; but the people sat almost motionless, and after I had put on my coat, I walked quietly down the passage, and went out first, and the people followed in a solemn manner.

20th. At Providence, I was under a great weight of exercise, as I travelled on the way, but it declined considerably before I came to the meeting. After we had sat awhile, I began with saying; we shall find clearly enough that not the hearers of the law but the doers of the law are justified before God. We are the descendants or successors of a people that lived in the possession and practice of what they and we profess; and if we profess and do not possess, shall we be justified, or are we not in danger of being cast off? After speaking awhile in a pretty close way, I spoke a few words by way of encouragement to the sincere ones, and I felt released from heavy exercise, with a short communication.

21st. At an appointed meeting at Scituate,

The members are few. Many of their neighbors came in and sat quietly. I began the testimony with saying; what good thing must I do to inherit eternal life? I believe many at the present day are desiring something like this; but "not every one that sayeth unto me, Lord, Lord, shall enter into the kingdom of heaven, but they that do the will of my father, who is in heaven." I was largely opened and the humble ones were encouraged. When the motion was made to conclude the meeting, they sat still and quiet, and passed out slowly at first. On a review of what I delivered, I do not find that I made any wrong statement in a long testimony, and I am easy.

26th. We attended an appointed meeting at Hopkinton. I was much enlarged in testimony, being nearly an hour and a half engaged in showing the necessity of preparing for a dying hour, and the danger of delaying to prepare; and I believe some were convinced. There was a Baptist preacher at this meeting, and he put himself in my way, as I passed along, and spoke to me in a very friendly manner, saying, I wish you to be encouraged, you have preached the truth to-day. Several others very solidly wished me success. Just before the meeting ended I desired the people to give the praise to the Author of all good, that man should have none of the honor, which is alone due to the Giver of every good and perfect gift."

The meeting next day at South Kingston was "exercising, because of so strong a desire in the minds of the people to hear words to gratify their carnal minds or desires. I sat long before I felt the way open to speak, and expected to say but little then, but keeping to the opening I was enlarged, and solemnity ensued, until the minds of many were humbled, and it ended comfortably; blessed be the Giver of every good and perfect gift. We dined at Wm. Peckham's, then went to Lower South Kingston. There were a variety of people, and it was a very trying meeting. I labored long, under much depression, and truth was borne down in the minds of the people, and did not come into dominion to reign triumphantly. Afterwards, I felt much tried and was fearful I had missed my way; but centering down to the witness, I felt that I had endeavored to keep my place and do my duty, and I felt easy; but still my mind was low. It may be for some good purpose to myself. I hope the good hand will not depart from me. I wish I may be humble enough; and may the Divine will be done."

On the 29th, at a meeting on the island of Conanicut, J. H. said: "'To what shall I liken the men of this generation. It is like children, sitting in the market place, calling to their fellows, saying we have piped to you, and ye have not danced, we have mourned to you, and you have not lamented.' Thus the important concern is treated in a trifling manner, like children's diversion instead of giving a due attention to it."

Of the Quarterly Meeting held at Greenwich, Fifth mon. 4th, J. H. says: "I delivered a short testimony pointing to some of the beauties and excellencies that would be produced by a devoted attention to known duty; which I endeavored to illustrate by a recital of part of what the Queen of Sheba saw in the waiting of the ministers and attendants of Solomon, each moving in time and order, not going too soon, nor unnecessarily delaying.

At Accoakset, on the 9th, counsel flowed

clearly and freely to the people. I stated that if we became qualified to worship acceptably, we could hardly obtain a more suitable [state of mind] than when our own willings, cravings and desires were brought into such a state of subjection that we could say; not my will but thine be done, O God. At a certain time, when the Divine Master was personally on earth, and when he was informed that 'he whom thou lovest is sick,' they thought there was need of something being done; but he abode several days still in the same place. He knew what would be to the glory of God. The meeting held long, and when a motion was made to break it up, the people sat still for some time and seemed unwilling to separate. There was something solemn attending, and we parted lovingly, and my mind rejoiced in the favor received, and humbly blessed the Giver.

10th. Attended Centre Meeting. I was soon loaded with exercise, and stood up with a good degree of clearness, but I found much embarrassment, yet I did not feel clear to sit down. Sometimes I seemed to gain strength; then again I seemed to be tried with a sense of weakness, and so I labored long, and when I felt released I was easy though depressed. If no profit arises from it, I have desired to be content, and to leave all to the Lord. Though I suffer, it is likely the true seed lay under suffering too.

12th. We had a very precious meeting. Many not of our Society attended. I began with, Be ye also ready, for ye know neither the day nor hour in which the Son of Man cometh. I have cause to marvel at the extent of the labor into which I have been led. I have been enlarged this day, and the minds of the people were solemnized, and many reached and tendered. I hope they, or many of them will be induced to faithfulness, and thereby be profited themselves, and become a blessing to others. We went home with James Tucker and wife Sarah to dine, and went this evening to New Bedford to lodge."

---

## THE FRIEND.

---

EIGHTH MONTH 23, 1873.

---

We believe it is Dr. Johnson who says, "Wealth heaped on wealth, nor truth nor safety buys, The dangers gather, as the treasures rise."

Such has been the deteriorating effects of the fall on man's moral nature, that the truth contained in these lines has been exemplified in all time, and almost all states of Society. The lust for wealth grows stronger with its gratification, and the temptations to evil attendant upon it, increase and acquire more force as the means for indulgence multiply. Solomon has left it upon record that "He that loveth silver shall not be satisfied with silver, nor he that loveth abundance, with increase: this is also vanity." It does not require a very deep inspection of society to be convinced that, in this respect, there is but little improvement manifested in this day, and that the further declaration of the same wise king is yet true, "There is a sore evil which I have seen under the sun, namely, riches kept for the owners thereof to their hurt."

If we believe the many precepts and commands relating to this subject, recorded in Holy Scripture, we can hardly escape the con-

clusion that, coming from Him who knoweth what is in man, they imply duties which cannot be properly performed while the love of gold is harbored in our hearts, or the time that is meted out to us, and the abilities conferred upon us, are mainly devoted to the accumulation of riches. The whole scope and spirit of the religion of Christ are manifestly opposed to the laying up or loving the treasures of earth, and its divine transforming power, in operating on the heart, is so directed as to extirpate the natural propensity to covetousness, and where riches are already possessed, to wean the affections from them, and establish the conviction that they are held only in trust. The command "Lay not up for yourselves treasures upon earth," is consonant with the liability of the human mind to become engrossed with the objects primarily desired, and that unless the heart is thoroughly changed from a state of nature to a state of grace, we are continually in danger of being absorbed in pursuit of the means to gratify our carnal appetites, and to forget the supreme design of our creation; thus evidencing the truth of the solemn declaration, "Where your treasure is there will your hearts be also."

The early Friends, coming forth as witnesses for the strictness and supreme authority of pure christianity, found themselves obliged, in order to live in accordance with the principles they professed, to turn their backs upon much which the world esteemed allowable or commendable; to give up many of the trades thought to be lawful, and many of the modes commonly resorted to to attract or increase business, and to be willing to live in great simplicity and moderation, rather than to devote their time and their talents to the acquisition of money. As self-denying followers of Him who had not where to lay his head, they bore testimony against not only the manners and maxims of the world, but also against striving to heap up its treasures or secure its honors. They were a plain, humble, and unpretending people, keeping the work of their soul's salvation, and the honor of their Divine Master uppermost in their every-day life; and as Wm. Penn testifies, though "they went forth weeping, and sowed in tears, bearing testimony to the precious Seed, the seed of the kingdom, which stands not in words,—the finest and the highest that man's wit can use, but in power, the power of Christ Jesus," so He employed them to turn many, by their ministry, "from darkness to the Light, and out of the broad into the narrow way; bringing people to a *weighty, serious and godly conversation; the practice of that doctrine which they taught.*"

But the members of our religious Society have partaken largely, in common with others, of the bounties of divine Providence. Thrift and economy have combined to increase riches, which in many instances have been transmitted from father to son, and by this means, as well as by successful trade, much wealth has been lodged in the hands of those who retain the government of themselves and their possessions on their own shoulders; and thus, as riches have increased among us, we too have learned to indulge improperly in the luxury of the age, and the abounding pride of life. The inevitable result among such members, as among others, has been, to illustrate the declaration of our Saviour, "Ye cannot serve God and mammon." How many who have disregarded the advice of the prophet, "Seekest

thou great things for thyself; seek them not," have lost that simplicity and lowly-mindedness which characterized the primitive Friends, and with them that Divine unction and power which are indispensable to preach the gospel of Christ and spread his kingdom in the earth.

Clarkson observes: "There is no greater calamity than leaving children an affluent independence. The worst examples in the Society of Friends, are generally among the children of the rich." There is nothing intrinsically bad in riches, and where the possessor is redeemed from the spirit of the world and lives under the government of Divine Grace, he may make unto himself friends of the mammon of unrighteousness, acting as a good steward of the manifold gifts bestowed. But there are few having wealth at command who in the application of it seem to feel the necessity, or are willing, to have their wants and indulgences circumscribed by the limitations of Truth, and to use what is not requisite for the comfortable accommodation of themselves and families, for promoting the cause of social and religious improvement, or administering to the welfare of their poorer fellow creatures: hence the frequent applicability of that startling declaration of Christ, "Verily I say unto you, that a rich man shall hardly enter into the kingdom of Heaven."

If then these things are truths which cannot be controverted, if "The care of this world and the deceitfulness of riches choke the word," it is not only the part of wisdom but also a duty imperative upon us, to guard with vigilant solicitude against having our attention engrossed with and our time devoted to the acquisition of that which is so likely to obstruct our advancement in the strait and narrow way that alone leadeth to life, and thus endanger our final attainment of the joys of heaven. Many instances might be cited of servants and handmaids, who have proved the value of the injunction, and the truth of the promise, "Seek ye first the kingdom of God and his righteousness, and all these things [food and raiment] shall be added unto you;" and it is these who are the most devoted and efficient laborers in the militant church. Continued observation will also show, that those who contribute most freely to objects of benevolence, and to the moral and intellectual improvement of mankind, are generally in what is termed "moderate circumstances;" and it is they who are most active in carrying on the institutions which adorn christian communities, while they afford the worthiest examples of intellectual culture and religious activity. Well may we then strive to be able to adopt, in sincerity and humility, the prayer of Agur: "Remove far from me vanities and lies; give me neither poverty nor riches; feed me with food convenient for me; lest I be full and deny thee, and say, who is the Lord? or lest I be poor and steal, and take the name of my God in vain."

The entrance on the forty-seventh volume of "The Friend," forcibly impresses us with the rapidity with which years pass away, and that our Journal now speaks to a generation far advanced in the journey of life, which had not entered on its scenes of trial or enjoyment when it first addressed the members of our religious Society. The changes that have taken place in the men and in the condition of the Society, since that day, we need not here refer to, further than to say that our

hearts are clothed with sorrow as we look back and recall the losses that have been sustained in both, and the ground given to fear there is little probability of these being adequately made up in the near future. But the principles of truth, and the distinction between right and wrong remain unchanged, and as the advocacy of the one, and the exposure of the other, together with the introduction into the families of our readers of interesting and instructive literature, were the objects had in view when "The Friend" first solicited the patronage of members and others, so they continue to be our sole aim in incurring the labor and expense of conducting our weekly sheet. We are encouraged in our course by the increased approbation of it expressed by a more extended subscription list, and the assurances of unity and sympathy given us by Friends in different parts of the Society. We invite the co-operation of all who are willing to lend a helping hand to maintain and spread the doctrines and testimonies of the gospel as held by Friends, and will be glad to receive contributions from any willing to comply with our regulations.

Our subscribers are reminded, that the terms of subscription vary according to the time of payment. Those who wish to receive the volume for two dollars are expected to pay within the time of issuing the first six numbers, unless they are new subscribers.

## LIST OF AGENTS.

We append herewith a list of Agents to whom applications may be made, and who are authorized to receive payment for "The Friend."

## PENNSYLVANIA.

Benjamin W. Passmore, Concordville, Delaware County.  
Joseph Scattergood, Jr., (in place of Wm. P. Townsend), West Chester.

## SUMMARY OF EVENTS.

FOREIGN.—The Carlists appear to be still making progress in the North of Spain. According to a Bayonne dispatch, the town of Berga has been captured by them. Vergara, twenty miles from Tolosa, has also been taken by them.

The British steamer Deerhound, on the 13th inst., landed at Fontarabia a party of Carlists with 2000 rifles and a quantity of ammunition. The Deerhound was subsequently captured by a Spanish man-of-war, and towed into the harbor of San Sebastian.

The Cartagena insurgents seem to be preparing for a long struggle. The streets are almost deserted and the shops closed. All males above sixteen years of age have been enrolled. The insurgents are issuing paper money, and they have released and armed 1800 convicts.

A Vienna dispatch says, a squadron of Austrian war vessels has been ordered to the coast of Spain.

A Cartagena dispatch of the 16th says, that city is besieged by an army of six thousand soldiers, with two batteries and twelve mortars. The Spanish frigates which were seized by the insurgents, are lying in this port guarded by the British fleet.

A Madrid dispatch of the 18th denies the reported capture of Berga by the Carlists. They attacked the place but were repulsed.

The Cartagena insurgents have ordered all non-combatants and the women and children to leave the city during the impending struggle.

It is stated that the Count de Chambord, the representative of the elder branch of the Bourbons, has announced his resolution to accept a Constitution for France, prepared by the members of the Right of the assembly and himself. He proposes to come to France and take up his residence there in a short time.

The town hall, Leeds, England, has been destroyed by fire.

Upon the declination of the office of Master of the Rolls by Sir John Duke Coleridge, it was offered to Sir George Jessel, who has concluded to accept the position.

The weather recently throughout England has been wet, and unfavorable to the growing crops. It also continues very warm.

Many coal-pits in Leicestershire have been closed, several thousand dissatisfied miners having struck.

Several failures in the Liverpool cotton trade were announced on the 16th inst.

London, 8th mo. 18th.—U. S. sixes, 1865, 95; new fives, 91½.

Liverpool.—Uplands cotton, 8½d.; Orleans, 9½d. California white wheat, 12s. 3d. a 12s. 5d. per 100 lbs. Red winter wheat, 12s. 3d.; Spring wheat, 11s. 4d. a 12s.

Dispatches from various places in Germany, where the cholera prevails, state that the disease is increasing in virulence.

A treaty of peace between Paraguay, Brazil and the Argentine Republic has been signed.

Christianople, a maritime town of Surden, has been entirely destroyed by fire.

The Shah of Persia sailed from Brindise on the 13th inst. for Constantinople.

A Gastein dispatch of the 16th, says: The Emperor William of Germany, who is now sojourning here, gave an audience yesterday to Dr. Schöff, bearer to the Emperor of the cordial greetings of the New York General Conference of the Methodist Episcopal Church. In his remarks in reply, the Emperor dwelt upon the necessity of Christians working together, in order to combat infidelity and superstition.

A Vienna dispatch says, that in the machinery department of the Exhibition, the United States exhibitors have received a large portion of the diplomas of honor, medals, and certificates of excellence.

The fiscal year of the Canadian government closed the 30th of Sixth month last, and the total revenue for the year was found to be \$20,139,578; of which almost twelve and three-quarter millions were from customs, four and a half millions from internal revenue duties,

and one and a quarter millions from the public works. The expenditures of the year are not given.

The Cuban insurgents have shown more activity recently. On the 12th inst. they attacked a force of Spanish cavalry near Puerto Principe, killed thirty-one of the soldiers and captured nineteen horses. On the 17th they made an attack on the village of Yegreas, but were repulsed after a sharp engagement.

A dispatch of the 18th to the New York Herald states, that the French government has taken the initiatory step toward recognizing the Carlists as belligerents, having issued orders permitting the transit of arms and munitions of war, between the two custom-house lines in the south of France.

The French government has suppressed or forbidden the sale of twenty Republican papers in the provinces. The leaders of the Left intend to publish a protest against these suppressions.

A Lima (Peru) letter states, the commission which explored the Isthmus for a canal route, returned and reported the route they explored impracticable; but favored that surveyed by Americans, under Capt. Selfridge. A party of American engineers raised the U. States flag on the highest peak of the Andes, on the 4th of Seventh month, in snow knee deep.

**UNITED STATES.—Miscellaneous.**—The interments in Philadelphia last week numbered 366, including 191 children under two years. There were 60 deaths of cholera infantum, 29 consumption, 19 debility, 40 marasmus, 14 inflammation of the brain, and 13 old age.

During a north-east storm which prevailed over a large area of country on the 13th and 14th instants, an unusual amount of rain fell in this city and vicinity, ranging from seven to eight inches, according to locality.

The burning of the steamer Wawasset, on the Potomac, was attended with much greater loss of life than was at first reported. It is now known that at least 72 and probably 80 persons perished in the flames or by drowning.

The total debt of the State of Vermont is only \$195,649, while the treasury contains a much larger sum.

The returns of the Agricultural Department up to the first instant, indicate an improvement in the condition and promise of the cotton crop since the first of Seventh month. The crop is, however, still considered below average in condition.

The assessed valuation of the real estate of New York city for the present year is \$836,693,380, and of the personal estate, \$292,447,643. This is an increase compared with last year's valuation, of \$39,544,715 in real estate, and a decrease of \$14,471,779 in personal.

On the 16th inst. a collision occurred on the Chicago and Alton Railroad, about 20 miles from Chicago, by which eleven men were killed and thirty-seven scalded or wounded. Many of the wounded were so badly burned that it was thought they would die. Seven others died before the 18th inst.

The United States Secretary of the Treasury has called in for redemption fifteen millions of dollars of matured five-twenty gold bonds. This reduction of the national debt is probably to be made with the proceeds of the Alabama indemnity.

There were 3683 immigrants landed in New York last week.

The deaths in New York for the week ending on the 16th inst. numbered 688.

The foreign imports of last week are valued at \$6,970,442.

A Chicago paper states, that from five to seven refrigerator cars, loaded with western butter are shipped east every day from that point. Much of this is taken by New York and Boston dealers. The freight charges from Chicago to New York are \$1.25 per hundred pounds, and to Boston, \$1.35.

**The Markets, &c.**—The following were the quotations on the 18th inst. *New York.*—American gold, 115½. U. S. sixes, 1881, 119¼; ditto, 1867, 119¼; ditto, 10-40 5 per cents, 115½; new fives, 114½. Superfine flour, \$5.15 a \$5.50; State extra, \$6.40 a \$6.70; finer brands, \$7 a \$10. White Michigan wheat, \$1 78; red western, \$1.55 a \$1.60; No. 2 Chicago spring, \$1.51 a \$1.52; No. 3 do., \$1.44 a \$1.47. Oats, 41 a 52 cts. Western white corn, 74 a 76 cts.; yellow, 61 a 62 cts. Carolina rice, 8 a 9 cts. *Philadelphia.*—Midling uplands and New Orleans cotton, 19½ a 20½ cts. Timothy seed \$3.50. Flaxseed, \$2 a \$2.05. Superfine flour, \$3.50 a \$4.25; finer brands, \$4.50 a \$10. White wheat, \$1.65 a \$1.85; prime red, \$1.65. Rye, 80 a 85 cts. Yellow corn, 60 a 61 cts.; white, 69 a 70 cts. Oats, 39 a 47 cts. Sales of about 3800 beef cattle at the Avenue Drive-yard. Choice and extra at 6½ a 7½ cts. per lb. gross; fair to good, 5½ a 6 cts., and common, 4 a 5 cts. Sheep sold at 5 a 6 cts. per lb. gross. Receipts 14,000 head. Hogs, \$7.50 per 100 lb. net for corn fed. Receipts 5,500 head.

*Chicago.*—No. 2 spring wheat, \$1.21½ a \$1.22; No. 3, \$1.15. No. 2 corn, 40 cts. No. 2 oats, 27 a 27½ cts. Rye, 67 cts. Barley, \$1.05. Lard, 7½ a 8 c.s. *Cincinnati.*—Family flour, \$6.40 a \$6.60. Wheat, \$1.28 a \$1.30. Lard, 8 a 8½ cts. *Detroit.*—Extra white wheat, \$1.72; No. 1 white wheat, \$1.54½; amber, \$1.41. Corn, 48 cts. Oats, 31 cts. *St. Louis.*—No. 2 winter red wheat, \$1.45; No. 3 fall red, \$1.30. No. 2 corn, 37½ cts. No. 2 oats, 29 a 30 cts. Spring barley, 90 cts.; winter, \$1.10. *Baltimore.*—Choice wheat, \$1.80; fair to prime do., \$1.60 a \$1.75; western red, \$1.55 a \$1.60. Yellow corn, 60 cts.; white, 68 a 70 cts. Oats, 44 a 47 cts.

#### RECEIPTS.

Received from Charles W. Satterthwait, O., \$2, to No. 19, vol. 48; from Henry Knowles, Agent, N. Y., for Benjamin Boss, Robert Knowles, John J. Peckham, John P. Carpenter, and Margaret P. Knowles, \$2 each, vol. 47; from Alfred King, Agent, N. Y., \$2, vol. 47, and for Francis Armistead, Gilbert Weaver, Samuel Simkin, Abiel Gardner, Susan King, Earl Hallock, and Mary Ann Simkin, \$2 each, vol. 47; from Henry R. Post, L. I., \$2, vol. 47; from Margaretta T. Webb, Pa., per Mary E. Elliott, \$2, vol. 47; from William Blackburn, O., \$2, vol. 47, and for Amos Cope, Esther Cadwalader, Mifflin Cadwalader, Benjamin Harrison, Levi Bolton, Nathan M. Blackburn, Jonathan Blackburn, Linton Hall, Phebe Ellyson, Samuel Shaw, Daniel Blackburn, and Thomas Blackburn, O., \$2 each, vol. 47, and for Francis Bartley, Mich., \$2, to No. 22, vol. 48; from Ann Kaighn, N. J., per Rebecca Kaighn, \$2, vol. 47; from Morris Cope, Pa., \$2, vol. 47; from S. H. Hedley, Pa., \$5, to No. 52, vol. 48; from Benjamin Gilbert, Agent, Pa., \$2, vol. 47, and for Joshua Cope, Isaac Price, S. M. Brinton, and James Mears, \$2 each, vol. 47; from Henry Clark, O., \$2, vol. 47; from Charles L. Willits, N. J., \$2, vol. 47; from Richard C. Shoemaker, Pa., \$2, vol. 47; from James Hilyard, N. J., \$2, vol. 47; from Annabella Wynne, Ind., per Benjamin Lowry, \$2, vol. 47; from Richard Elias Ely, Pa., \$2, vol. 47; from Deborah Woolman, City, \$2, vol. 47; from John A. Potter, Agent, N. Y., \$2, vol. 47, and for Deborah Wooden and Freelove Owen, \$2 each, vol. 47; from Valentine Meader, Mass., \$2, vol. 47, and for Pelatiah Hussey, Me., \$2, vol. 47; from Dr. Joseph Warrington, N. J., \$2, vol. 47; from Samuel P. Leeds, N. J., \$2, vol. 47; from Seneca Lincoln, Mass., \$2, vol. 47; from Catharine Whitacre, Pa., \$2, vol. 47; from Elizabeth M. Cope, Pa., \$2, vol. 47; from Ruth P. Johnson, Pa., \$2, vol. 47; from Dr. Samuel Whitall, N. Y., \$2, vol. 47; from Charles Lippincott, N. J., \$2, vol. 47.

*Remittances received after Fourth-day morning will not appear in the Receipts until the following week.*

The receipt is also acknowledged of the following amounts: from Alfred King and Susan King, N. Y., \$5 each, for the Freedmen; from Richard Elias Ely, Pa., \$25, for the Bible Association of Friends.

#### EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of Tenth month.

Application may be made to

Elton R. Gifford, 28 North Third St.

Ephraim Smith, 1013 Pine St.

James Bromley, 641 Franklin St.

Richard J. Allen, 472 North Third St.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A Friend and his wife are wanted to take charge of this Institution, and to manage the farm connected with it. A teacher of the school will also be wanted at the commencement of the Fall term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

*Near Frankford, (Twenty-third Ward,) Philadelphia.*

Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

#### FRIENDS' SELECT SCHOOLS.

These schools, under the care of the three Monthly Meetings of Friends in this city, will re-open on Second-day, Ninth mo. 1st, 1873. The Boys' School, on Cherry St., above Eighth St., is under the care of Zebedee Haines, as Principal. The Girls' School, on Seventh St., below Race St., is under the care of Margaret Lightfoot. There are also two Primary Schools for the instruction of those children who are too young to attend the higher schools; one of which is held in the Meeting-house at the corner of Sixth and Noble streets, the other in the Boys' School building on Cherry street.

The attention of Friends residing in this city and its neighborhood is particularly invited to these schools. The terms are moderate, and by provisions recently made for that purpose, Friends belonging to Philadelphia Yearly Meeting, sending children to these schools, (also members) who may find the charges burdensome, can be fully relieved. In the principal schools opportunities are afforded of obtaining a liberal education in useful branches of Study, and in the Latin and Greek languages. Facilities for illustration are afforded by a valuable collection of philosophical apparatus, minerals, and Auzoux's models of parts of the human system, &c. French is also taught in the Girls' school. In the primary schools the children are well grounded in studies of a more elementary character.

It is desirable that applications for admission of children should be made early, and that parents returning children to the schools should send them at the beginning of the term.

Further information may be obtained upon application to the Treasurer of the Committee,

JAMES SMEDLEY, No. 415 Market street.

#### WANTED

A suitable Friend to serve as Matron in Haverford College. Apply soon to Samuel J. Gummere, Pres't, Haverford College P. O., Montgomery Co., Pa.

**MARRIED,** at Friends' Meeting-house, Middleton, Columbiana Co., Ohio, on the 22d of Fifth month, 1873, DANIEL, youngest son of William and Anne Blackburn, to MATILDA E., daughter of Benjamin and Mary Harrison, all of the above place.

**DIED,** suddenly, on the evening of the 21st of 7th mo., at the residence of her son-in-law, Joseph Penrose, RUTH KIRBY, in the 66th year of her age, a member of Pennsville Monthly and Particular Meeting of Friends, Ohio. From some expressions it appears she thought the time of her departure was near, and although her sickness was short, her friends and relatives have a well-grounded hope that her end was peace. The sudden removal of this dear Friend speaks loudly to survivors to prepare for a like change.

—, suddenly, at his residence in Wilmington, Delaware, on the evening of the 4th of 8th month, SAMUEL HILLES, in the 85th year of his age, a beloved elder of Wilmington Monthly Meeting of Friends. His memory is precious to those who knew him, and amongst whom he had walked uprightly and carefully during a long life. His family and friends feel that they have much to be thankful for, in the remembrance of such a life, and especially in the ripening and mellowing of his character in his later years. He had early, as it is believed, given his heart to the Lord, and been made sensible of His favor. On the day before he died, he had a conversation with a friend, in which he seemed constrained to relate his own experience in a way very unlike his usual reticent habit. In this interview he spoke of some of these early visitations, and in particular of a spot among the woods at Westtown, to which he used to retire, "to prostrate himself in the presence of his Heavenly Father," and where His presence had been especially manifested to him. And in his later life, in the silent meetings of the Society of Friends, he had the same experience renewed, the sense of the love of his Heavenly Father so overpowering him at times, that he was fain to ask that the tide might be stayed. He spoke of having supplicated that he "might have that faith, that true faith, that only real faith, of which it is said, 'He that believeth in me shall have eternal life.'" Such a prayer, offered in humility and child-like simplicity, it is believed was answered. His last days were emphatically his best days. The trials through which he passed were blessed to him; and although he had lived a long and comparatively blameless life, yet none disclaimed more promptly than he, any disposition to boast, or to rely upon his own obedience. "He confessed that he was a poor creature, that all was of the goodness of the Lord." His end was sudden, and almost painless.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, EIGHTH MONTH 30, 1873.

NO. 2.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

*Memorial of Bradford Monthly Meeting, concerning SAMUEL COPE, a Minister, deceased.*

"The memory of the just is blessed;" and believing that a record of their experiences and exercises, produced by the operation of that Divine Power, which made them what they were, has often proved as a brook by the way side, to many a weary traveller Zionward, we feel that it may be right to put forth a short testimony concerning our late beloved friend, Samuel Cope.

He was the son of Abiah and Jane Cope, and was born at their residence in East Bradford township, Chester county, Pennsylvania, the 28th of the 2nd month, 1789. His parents were valuable members of this Monthly Meeting; his mother being an acceptable minister over fifty years, and his father faithfully filling the station of elder, and both careful to restrain their offspring, and bring them up in the nurture and admonition of the Lord. Their faithful labors in this respect, were evidently blessed in a remarkable manner.

In early life he manifested a strong and resolute disposition, but submitting his neck to the yoke of Christ, he grew in grace as he grew in years, and became a useful and exemplary member of our Monthly Meeting.

At the age of thirty-nine, his friends thought it right to place him in the important station of elder, which position he filled to their satisfaction. After passing through many conflicts and baptisms, he apprehended himself called upon to speak in our religious meetings as a minister; and in the year 1835, was duly acknowledged as such.

In reference to this period of his life, he remarked in a letter to a friend, "I was ready to conclude I never should overcome my spiritual enemies; but I resolved not to leave off imploring help of Him, who I believed was able to help me. I had a little faith to believe, that His Grace would give me the victory if I took heed to it; but I could not dispel the darkness and doubts, which at times made me feel very sad, as I saw that it was not by works of righteousness which I had done or could do in my own will and strength, that the cloud and want of clearness of spiritual sight could be removed, but that if I was delivered out of this condition it must be of His mercy, by the washing of regeneration and

the renewing of His Holy Spirit. I felt very desirous I might do nothing against the Truth, but my mind was sometimes much impressed in our Meetings for Discipline to speak in Truth's defence; and as I gave up to do what I believed was my duty, I felt peace of mind. Some time after, I felt much pressed in spirit to speak a few words in our meetings for worship, but tried to reason it away, thinking myself very unfit for that service, and then occupying the station of elder. But I became convinced, that nothing but obedience would keep me from condemnation, and I expressed a few words in one of our meetings for worship, after which my mind was calm and peaceful."

He was firmly attached from heartfelt experience and conviction, to the Christian doctrines and testimonies of our religious Society, as held and promulgated by its primitive members; and was often brought under deep religious exercise on account of attempts made to modify them. He believed them to be the doctrines of the Gospel as set forth in the Holy Scriptures, and was concerned that no departure from them should be sanctioned by the body.

On a recent occasion, he publicly declared that, "The principles and testimonies of the religious Society of Friends, had been the religion of his education when young, that as his years and strength ripened to maturity, they became the religion of his judgment; and that he could now, when the evening curtain of life was fast closing around him, bear his testimony that they emanated from that inexhaustible Fountain of Truth, which our Holy Redeemer declared would lead and guide its dedicated followers into all truth."

He several times, with minutes expressive of the approbation and unity of his friends, visited the Yearly Meeting of Ohio; and on one of these occasions, nearly all the meetings composing it. He also visited, with minutes, three other Yearly meetings on this continent; all the meetings in our Yearly Meeting,—many of them several times,—and as an evening sacrifice, he paid a last and memorable visit to the members and attenders of the several branches of this Monthly Meeting. To some among whom he labored on that occasion, it is believed to have been a season of renewed Divine visitation. After this visit was accomplished, he expressed that he felt much peace and comfort in having performed it.

This last service in the cause in which he had so long and faithfully labored, was accomplished a short time previous to his death.

In his worldly affairs he set a good example of moderation; he was concerned to live within the bounds of his circumstances, and careful not to permit business engagements to interfere with the discharge of his religious obligations.

He was remarkable for uprightness and integrity; singleness of purpose and total

absence of duplicity in demeanor and expression were distinguishing traits in his character. He possessed a good memory, was kind, generous, and social in his feelings, and being gifted with a mind of large capacity, his society was attractive. It may be truly said of him, that his house and heart were always open for the entertainment of his friends, and particularly such as were travelling in the service of Truth.

His public ministrations, especially towards the close of his life, were often of a very searching character: "Not with the enticing words of man's wisdom, but in demonstration of the Spirit and of power." He was often drawn forth in affectionate concern for the youth, exhorting them to yield themselves in the morning of their day to the restraints of the cross of Christ, and thus become helpers in promoting the cause of Truth; frequently reminding them, as well as others, that their faith should not stand in the wisdom of man, but in the power of God.

Our object is not to extol the creature, but to magnify that Divine Grace, through faithful obedience to which he was enabled to serve the Lord in his generation, and finally, we reverently trust, to receive the crown immortal, which fadeth not away.

He was very diligent in attending his religious meetings, often under circumstances which would have deterred many from making the attempt.

Although of a strong constitution and usually favored with good health, about ten years before his death, he became almost blind, so as to be unable to go about (except on his own premises) without an attendant; or to read or write; privileges which he had greatly enjoyed. Notwithstanding this was a severe affliction, he did not complain, but bore it with Christian submission and cheerfulness. His general health being good, he did not let his dimness of vision deter him from performing such services as he felt required of him, or from attending his religious meetings and visiting his friends. It was after this affliction occurred, that he attended Ohio Yearly Meeting the last time, and visited the meetings composing it.

In the Third month, 1871, he had an attack of sickness accompanied by a partial paralysis, from the effects of which he became unable to articulate clearly, and his bodily powers were greatly prostrated. Upon being asked respecting his prospect of recovery, after a solemn pause he replied; "I feel that I am an old man, almost worn out, and nearly done with this world, and I think I would be willing, if consistent with the Divine will, to close my blind eyes, never again to be opened in mutability; but I desire to be resigned." And when asked what his feelings were in view of the awful change which seemed approaching, he replied, "I find nothing in my way, as I believe my sins have all gone beforehand to judgment, and been forgiven me

through the mercy of God in Christ Jesus our Lord; and I feel that I can honestly adopt the language, 'I am now ready to be offered, and the time of my departure is at hand. I have fought a good fight; I have finished my course, I have kept the faith; henceforth there is laid up for me also a crown of righteousness, which the Lord, the righteous Judge, will give me at that day; and not to me only but to all them also that love his appearing.'"

And on another occasion, he said to a friend who sat by his bedside; "I can say as my mother did on her death-bed, 'The Lord is my shepherd I shall not want; He maketh me to lie down in green pastures; He leadeth me beside the still waters. He restoreth my soul; He leadeth me in the paths of righteousness for his name sake. Yea, though I walk through the valley of the shadow of death, I will fear no evil, for Thou art with me; thy rod and thy staff, they comfort me.'"

For some time his recovery from this attack appeared doubtful; but he gradually improved in health, and became able to go out again; his interest and concern for the cause of Truth remaining unabated.

He so far recovered as to attend religious meetings; and not long after he became able to leave his residence he entered upon the religious service of visiting the families of our members and others, to which allusion has been made.

He attended religious meetings on the three days immediately preceding his last attack of illness, in all of which he was engaged in the ministry. In the Monthly Meeting which occurred the 8th of Eleventh month, 1871, he encouraged those who felt called upon to labor in the Lord's vineyard, to be faithful, though they should not see the fruits of their labor; quoting the passage, "Be ye steadfast, immovable; always abounding in the work of the Lord, inasmuch as ye know, that your labor shall not be in vain in the Lord."

The last meeting he attended was a neighboring Monthly Meeting, which occurred the 9th of the month, wherein, after a season of very solemn quiet, he arose with the words of the Psalmist; "Before I was afflicted, I went astray, but now have I kept thy word;" acknowledging it had been good for him that he had been afflicted, saying, "in faithfulness hath He afflicted me;" and in great brokenness and tenderness of feeling, he dwelt on the usefulness of afflictions, if rightly received, in softening the feelings of the natural man, and bringing his will into subjection to the Divine will.

After meeting, he appeared in a very peaceful state of mind, expressing great thankfulness for the kind attentions of his friends, who manifested much concern for him on account of his bodily infirmities. His sweet, patient and happy state of contentment, seemed to evince a preparation for being unclothed of mortality, and receiving the wedding garment. On the afternoon of that day he was attacked with paralysis, and after a few hours of acute suffering sank into a state of apparent unconsciousness, which continued until the afternoon of the 11th of Eleventh month, 1871, when he was quietly released from this state of probation, and we are comforted in believing, his redeemed spirit was gathered to the fold of rest and peace; aged nearly 83 years, a minister about 36 years.

The luxury of luxuries is that of doing good,

### Some Facts About Rain.

No one who has travelled in the "lake district" of England, will need to be informed that it is a rainy region. If the tourist is able to devote two or three weeks to it, he may not unreasonably hope to be favored with occasional fair weather; but if he can spend only three or four days among its wild and lovely scenery, let him congratulate himself if they do not all prove to be rainy ones. Wordsworth could never have seen and sung the charms of the district as he did, had he not made it his home for years.

We have just seen in an English paper an abstract of meteorological observations made by Isaac Fletcher, M. P., among these Cumberland mountains. For nearly thirty years he has kept rain gauges at various stations, and the record of some of them for the year 1872 is astounding. The rainfall at different points ranges from about 91 inches up to almost 244 inches. At four stations it was about 175 inches. The highest result was obtained at a place known as "The Stye," at an elevation of 1077 feet, in one of the wildest passes of the region, between the lakes of Derwent and Westwater. Fletcher remarks, "The amount registered on the Stye—nearly 244 inches—is marvellous, and is greatly in excess of any previous record. In 1866, 224.56 inches were recorded. So far as has yet been ascertained, the Stye is the wettest spot in Europe, and, except in tropical countries, the quantities I have quoted, represent the two greatest annual falls of rain that have ever been recorded."

But we presume that to many of our readers these figures convey no definite idea of the actual amount of rain that falls at this "wettest spot in Europe." A few other facts will serve as a basis of comparison, and also to show what a capricious phenomenon rain is—the most capricious, in fact, of all meteorological phenomena, both in respect to its frequency and the amount that falls in a given time. There are regions where it never rains—as on the coast of Peru, in the African Sahara, and the desert of Cobi in Asia—and there are others, as in Patagonia, where it rains almost every day. At most places in our latitude, if an inch falls in a day, it is a pretty heavy rain; but among the Highlands of Scotland and in the English "lake district," of which we have been speaking, from five to seven inches not infrequently fall in a day. On the Isle of Skye, in December, 1863, 12.5 inches fell in thirteen hours. At Joyeuse, in France, 31.17 inches fell in twenty-four hours. At Geneva, 30 inches in twenty-four hours; at Gibraltar, 33 inches in twenty-six hours.

As regards the annual rainfall the most remarkable is on the Khasia hills, in India, where it averages 600 inches, about 500 of which fall in seven months of the year. We do not know of any other place where the average rises even to 300 inches, though at two points on the Ghauts Mountains, in India, it is 254 and 263 inches. At Madras it is 45 inches; at Bombay 75 inches.

It will be seen that the rainfall on the Stye, in Cumberland, approximates to that in the wettest tropical districts. The average in the west of Great Britain and Ireland, in the vicinity of high hills, is from 80 to 150 inches, while away from the hills it is only from 30 to 45 inches, and in the east of England not more than 20 to 28 inches. In France it averages 30 inches; in the level parts of Germany 20

inches; while in some parts of Russia it falls as low as 15 inches. In this country it averages in the Southern States from 50 to 65 inches, though at some points, as at Athens, Ga., it is only 36 inches. In the Northern States, it ranges from about 27 to 45 inches. On the Pacific coast it is 22 inches at San Francisco, but increases as we go northward, being 47 inches at Fort Vancouver, and 90 inches at Sitka, in Alaska.

Though the subject cannot be called a dry one, we should hardly venture to indulge to such an extent in statistics if the variation in the figures were not so striking. To those of our readers who have not made a special study of the subject, we believe they will be interesting; and it cannot be denied that they fully sustain our assertion that rain is the most capricious of all the phenomena with which the meteorologist has to deal. Is it possible that he can make any orderly arrangement of such a medley of seeming incongruous facts, and bring them into harmony with natural laws? Can he explain why within the limits of a little territory like England, about three hundred and fifty miles long and less than two hundred in average breadth, there should be a range in the yearly rainfall from about twenty inches up to more than ten fold that amount? Are such problems within the grasp of "Old Probabilities," and his fellow workers? That these questions are to be answered in the affirmative is all that we will now say: at some future time we may devote another familiar article to the rain and certain related phenomena, and endeavor to elucidate the great laws by which they are controlled.—*Journal of Chemistry.*

### Thomas Upshur.

The following brief notice of this Friend has been condensed from the memoir respecting him published in Friends' Library.

Thomas Upshur was born in the Sixth month, 1672, in the county of Essex, England. He was educated in the Presbyterian profession and was seriously inclined from his youth, often seeking the Lord for the good of his soul, and diligently reading the Holy Scriptures. When about 15 years of age, he left the Presbyterians and joined the people called general Baptists, among whom he was held in much esteem, and became a preacher among them. But being favored with a renewed visitation of divine Grace, he came to see the emptiness of his profession of religion without the saving knowledge of God and our Lord Jesus Christ, which is only attained through the revelation of his Spirit.

He was about twenty years of age when he was convinced of the blessed Truth as held by Friends, and embracing it in the love thereof, he became a diligent attender of their meetings for the worship of Almighty God, waiting upon Him in retirement of spirit and true silence, for his teaching and counsel. It pleased the Lord to bestow on him a gift in the ministry of the gospel, which he received in great humility, speaking a few words amongst his brethren, in much fear and tenderness, to the comfort and refreshment of many. God, in tender mercy, increased his gift, so that he became an able and experienced minister of the gospel, turning many from darkness to the light of Christ; in which service he travelled extensively.

In the time of health he was concerned to remember death, and when taken sick re-

arked, "I do not expect to live long in this world; I have been preparing for a better. I do not desire to live on my own account—I long more and more to be at home with my God; yet I would not be of those who desire the reward before the work is done. There is nothing here which invites my stay, but if God has any further service for me in this world, I am given up to his will."

Several Friends being with him, he spoke of them by his death, and desired they might bear him witness, saying: "My dependence, hope and trust are in the Lord Jesus Christ alone,—I do not value myself upon any qualification or endowment received, but lay all down as at the feet of Jesus, and am as nothing before him."

To a Friend who came to visit him, he said, "In all likelihood, I am now about to take my last leave of you all, and I pray God from my heart to bless you." At another time, he said, "My tongue is not able to express what I feel of the love and goodness of God, now when I have most need of it; the saying is very true, that Life is better than words. There is one thing I cannot find out, why the Lord should so abound in his love and mercy to me, whom am so unworthy of the least of his mercies."

Several Friends being in his chamber, he desired they might wait upon the Lord together, and the Lord was pleased to open his mouth to praise and magnify his holy name. He spoke of the blessed estate of the faithful, at the sight of which, he was filled with heavenly joy, praising the Lord to the comfort of those present, and saying, "O that I might declare of the wonders of the Lord, which I have seen in the deeps—but I am resigned to his will."

Speaking of his pains and exercises, he said they were very great; but added, "The Lord is very good to me, and bears up my spirit in the midst of them all." Taking leave of some friends who visited him, he exhorted them so to live that he and they might meet in the mansions of eternal rest—and desired his dear love to Friends every where, saying, "They are near to my life—I have true unity with them in spirit." At a meeting in his chamber about two weeks before his death, the state of the church and many precious gospel truths were opened to him; and in a heavenly frame of spirit he spoke of the wonderful wisdom, love and goodness of God, exhorting Friends to be more faithful and diligent in His blessed cause and service.

A few days before his close, feeling himself a little revived, he went to meeting and there was engaged in fervent prayer, praising the Lord in a true sense of his goodness and mercy. His distemper returning with increased severity, he felt his end drawing near, and remarked, "I desire to die in great humiliation and to commit my spirit into the hands of the Lord Jesus Christ." When death approached he was in a heavenly frame of mind, and said, "The Lord, in the riches of his mercy, will keep all them that trust in him under all their trials." He peacefully departed this life the 10th of the Eighth month 1704, aged 32 years.

The salt mines discovered in the Teche country, Louisiana, during the late war, are now being worked, while the surface is covered with growing sugar cane. The bed, estimated to contain ninety million tons of pure solid rock salt, is located on an island of 300,000

acres, rising 185 feet above a salt marsh. Access is obtained to this island by a steamboat line running between Brashear City and New Iberia. The soil is composed of sand, loam, gravel and clay, and the surface is partially covered with magnolia, live oak, cypress, maple, locust, gum, walnut and fruit-bearing trees. The vegetation resembles that of a rich prairie, and the scenery is varied and beautiful. Access to the interior of the salt mines is obtained by an elevator, running up and down a forty-foot shaft, cut through the solid material. The width of the vein is 120 feet, and the visitor is surrounded on all sides by rock salt as dry as powder. The absence of moisture is one of the most striking peculiarities, and the iron and steel implements used are quite bright. Two large chambers have been cut out of the vein.—*N. American.*

For "The Friend"

John Heald.

(Continued from page 5.)

5th mo. 16th, 1815. Attended a meeting at Long Plain. After long silence I began to speak with a prospect of only a little in charge; but when one thing was delivered another presented, until the testimony was long. In the course of it, I urged that faith without works is dead, and works without faith are dead also. It is not by works of righteousness we have done, but of His mercy he saveth us. As we are required to work out our soul's salvation with fear and trembling, it is evident there is something required to be done; and that must not be done in our own will, for our natural will is of our fallen nature, and neither the will nor the wrath of man can work the righteousness of God. Some had deeply repented when it was too late, or when they apprehended it to be so, that they had not improved the time with which they had been blessed, and admonished those present to take care that they did not let the time pass unimproved. We went to Obadiah Davis' lodge. He and his wife Ruth are both approved ministers. They said they were glad of the testimony, and that it was well adapted to the state of the assembly; that many of the people, their neighbors, rather despise works as not being necessary to man's salvation, though Abraham showed his faith by his works, and the apostle James said, I will show thee my faith by my works.

17th. We travelled near 30 miles to Pembroke. We put up at a Friend's who said his house was the first built in these parts, about 180 or 190 years ago. We felt ourselves rather tried, though they were kind, yet I concluded there was something wrong. None of this family were members of our Society but himself, his wife a goodly woman. I was afraid that strong drink had hurt him.

18th. Attended Pembroke Meeting. It was not large. I sat silent till near the close, when I delivered a close, moving testimony, tending to stir up the worldly-minded, and encourage the sincere-hearted. It was their Preparative Meeting, where it was stated, that the Friend before mentioned, required Friends' care in regard to his intemperance, which gave relief to my mind. We dined at Benjamin Percival's, and went to John Bailey's. I was glad and felt comforted the little time we spent here.

26th. About one o'clock p. m. we left the wharf at Falmouth, in the packet-boat. The wind dying away, the captain turned back,

saying the tide was against us; but after some time the wind sprang up fair, he turned and stood for Nantucket again, and about ten at night, we landed safe and walked up to Jethro Mitchell's and were kindly received."

At that time two meetings were held on the island of Nantucket. J. H. attended the North Meeting on the morning of First-day, and the other in the afternoon. In this he told the people, that some ministers had come from far and passed through much suffering, and yet when they came to a meeting, the best they could do was to sit in silence. He thought there was great need for watchfulness on such occasions, for when a stranger comes, the minds of the people are too apt to be placed on him, instead of being centered where they ought to be. Thus they are looking to one as impotent as themselves. He then proceeded to warn those who saw the way in which they should go, but were from various causes prevented from entering into it; and to encourage such as were striving to do their duty faithfully, to keep to their exercise. 29th. I had a desire to see the ministers and elders. At 10 o'clock the select meeting came together. I desired them to attend to their duty, and feed the flock, over which the Holy Ghost had made them overseers, in due season.

Soon after, I felt a concern to have the overseers together. Of these there were ten of each sex. I endeavored to encourage them to faithfulness, as much of the welfare of Society depended on their faithful discharge of duty, and neglect introduced weakness into society in general, and in particulars also. This meeting was at 4 o'clock, and at six we had a meeting for the youth. Several hundreds of them assembled. It was a low trying time in the beginning, but as I endeavored to keep close to my guide, life increased, and it proved a solid, good meeting in the end.

31st. The packet master called about half after four in the morning, but we were not ready, though the wind and tide he said suited. We staid and attended the North Meeting. In it I had a remarkably close time, in which I compared the present state of society to Nebuchadnezzar's image, which was high, his head of gold, his breast and arms of silver, his other parts of inferior metals, and his lower parts of iron and miry clay; the head representing the true worshippers; the lower classes grovelling in the mire with the strength and stiffness of iron, and so rising in grades of elevation. Encouragement was held out to the honest-hearted."

6th mo. 1st. He attended the South Meeting, and in his memoranda preserves the following notice of it: "Simon, son of Jonas, lovest thou me? If we loved the Divine Master we would love one another; parents would love and watch over their children, and children, under the influence of that love, would be obedient and affectionately kind to their parents; it would spread yet further to connexions and neighbors, and would reach over sea and land, breathing peace on earth and good will to men; and at times the heart would flow with gratitude. The meeting concluded with supplication."

6th mo. 2d. "This morning we went down to the vessel we expected to go back in, but the wind blew so strong that the captain was not willing to go, though the wind and tide were in favor. So we staid and went to see the ocean which was an awful sight. The

great waves came rolling one after another, and falling over against the shore in great white foam, and roaring loud." Being thus detained over another First-day, he attended the meetings in course, and in the afternoon endeavored to encourage those present to a due attendance of religious meetings. In the course of his communication, he mentioned some of his own trials in early life, from the example of some who took an active part in Society, and yet could stay at home attending to their business, on meeting-days, if it was somewhat urgent. This had made him much difficulty, but he had found no way to obtain peace of mind, but by faithfully following in the path of duty.

It is a frequent remark that example speaks louder than words. Where those, who, from their age and position in the church, ought to be as way-marks to the younger and more inexperienced members, swerve in any manner from the right way, their influence for good is greatly lessened; and those who are inclined to take greater liberties than are consistent with their real welfare, will strengthen themselves in the neglect of duty, and the practice of evil, by their example. In one sense, and that a very practical one, each one of us is our brother's keeper; for we all exert an influence over each other, and are responsible for it.

After leaving Nantucket, J. II. attended the Yearly Meeting of New England, held at Newport. He mentions that when the state of society was being considered, "an increasing solemnity prevailed, in an especial manner when the subject of ardent spirits was before the meeting, the discouragement of the use of that article was owned under humbling, impressive and powerful influence. A more precious time on a like occasion, I have not lately known."

(To be continued.)

*Damascus.*—Damascus is the oldest city in the world. Tyre and Sidon have crumbled on the shore; Baalbec is a ruin; Palmyra lies buried in the sands of the desert; Ninevah and Babylon have disappeared from the shores of the Tigris and Euphrates; Damascus remains what it was before the days of Abraham—a centre of trade and travel, an island of verdure in a desert, "a predestinated capital," with martial and sacred associations extending beyond thirty centuries. It was "near Damascus" that Saul of Tarsus saw the "light from heaven above the brightness of the sun;" the street which is called Strait, in which it was said "he prayeth," still runs through the city. The caravan comes and goes as it did a thousand years ago; there is still the sheikh, the ass, and the waterwheel; the merchants of the Euphrates and the Mediterranean still "occupy" these "with the multitude of their waiters." The city which Mahomet surveyed from a neighboring height, and was afraid to enter "because it is given to man to have but one paradise, and for his part he was resolved not to have it in this world," is to this day what Julian called "the eye of the East," as it was in the time of Isaiah "the head of Syria." From Damascus came the damson, our blue plums, and the delicious apricot of Portugal called damasco; damask, our beautiful fabric of cotton and silk, with vines and flowers raised upon a smooth bright ground; the damask rose, introduced into England in the time of Henry VIII.; the Damascus blade

so famous the world over for its keen edge and wonderful elasticity, the secret of the manufacture of which was lost when Tamerlane carried off the artists into Persia; and that beautiful art of inlaying wood and steel with silver and gold—a kind of mosaic engraving and sculpture united called damaskeening, with which boxes and bureaus, and swords and guns are ornamented. It is still a city of flowers and bright waters; the streams from Lebanon, the "rivers of Damascus," the "river of gold," still murmur and sparkle in the wilderness of "*Lyriah gardoue.*"

#### RESIGNATION.

Meek Lamb of God, on Thee  
In sorrow I repose,  
But for thy tenderness and grace,  
How hopeless were our woes!

Though bitter is my cup,  
Yet how can I repine?  
It stills my every restless thought  
To think that cup was Thine.

Since Thou hast hallowed woe,  
I would not shun the rod,  
But bless the chastening hand that seeks  
To bring me to my God.

Distress and pain I hail.  
If these conform to Thee;  
Be but Thy peace, Thy patience mine,  
And 'tis enough for me.

*Hugh Stowell.*

#### THE INVITATION.

Come, while the blossoms of thy years are brightest,  
Thou youthful wanderer in a flowery maze,  
Come, while the restless heart is bounding lightest,  
And joy's pure sunbeams tremble in thy ways;  
Come, while sweet thoughts, like summer buds unfolding,  
Waken rich feelings in the careless breast,  
While yet thy hand the ephemeral wreath is holding,  
Come,—and secure interminable rest!

Soon will the freshness of thy days be over,  
And thy free buoyancy of soul be flown;  
Pleasure will fold her wing; and friend and lover  
Will to the embraces of the worm have gone;  
Those who now love thee will have passed forever,  
Their looks of kindness will be lost to thee;  
Thou wilt need balm to heal thy spirit's fever,  
As thy sick heart broods over years to be.

Come, while the morning of thy life is glowing,  
Ere the dim phantoms thou art chasing die;  
Ere the gay spell which earth is round thee throwing  
Fades, like the crimson from a sunset sky;  
Life hath but shadows, save a promise given,  
Which lights the future with a fadeless ray:  
Oh, touch the sceptre! win a hope in heaven!  
Come, turn thy spirit from the world away.

*Willis Gaylord Clark.*

*A Valuable Load of Bricks.*—An important shipment of silver bars was made by the Swansea silver smelting and refining company yesterday from the banking office of Adam Smith & Son. The shipment consisted of one hundred and forty-nine silver bricks, which contained forty-seven thousand three hundred and forty-two ounces of pure silver and five thousand ounces of gold, and was valued at \$76,000. The metal was the product of seven days' smelting at the works, which are now turning out \$10,000 worth of gold and silver every day. A shipment equalling in value is made each Saturday to the United States assay office in New York, where the bricks are again smelted, and whatever gold they contain extracted. The bricks are sent through in the care of the American Express Company, and are not encased or protected in any way. In looking at them one would be easily de-

ceived as to their weight and value. The one hundred and forty-nine bricks shipped yesterday made a load which two large horses hauled with difficulty.—*Chicago Tribune.*

Honolulu, 26th of 3d month, 1836.

By a newspaper brought out by one of the vessels just arrived from America, we are furnished with the Epistle of the Yearly Meeting held in London in 1835, of which a present has been made to us in great kindness; it was a treat no less welcome for not having been anticipated, and to myself particularly consoling, being replete with explanation of the principles and views of our religious Society, as held by our worthy predecessors when they first came forth; and declaring them to remain unalterably the same at this day. I trust the pure mind will be stirred up in many of our members to a serious consideration, whether we are endeavoring to uphold them, in their original purity and simplicity, to the eyes of the world, and in faithfulness and gratitude to Him, who called and separated those ancient worthies from the many "lo heres" and "lo theres" of their day and generation, to be a people to His praise.—*From Memoirs of Daniel Wheeler.*

For "The Friend."

#### Japan.

We extract from Professor Pumpelly some of his observations on Japan, made during a residence of some months while he was occupied principally in an examination of the mines and mining resources of the country, by authority of the government. The closer relations and increasing trade between the United States and Japan, is already having a marked effect on the inhabitants of the latter, and seems likely in time to work important changes in some of their habits and institutions.

The Japanese empire forms the chief part of the long barrier chain of islands which, stretching along the eastern coast of Asia, separate the great ocean from the great continent. This chain or mountain range partially submerged, rising above the surface of the ocean in the island of Formosa, trends northeast, through the Linkin group, Kiusiu, Nippon, and Jesso, and forking in the latter, sends off due north, a geologically distinct branch in the island of Saghalien or Krafto, while the main range continues in its northeasterly course, through the long line of the Kurilos and the continental mountains of Kamtschatka, to Behring's Straits.

This outlying chain is the easternmost member of an extensive system of parallel ranges, which, reaching from Burmah to the Arctic ocean, determines nearly all the details in the configuration of eastern Asia, in the same manner as the Appalachian system determines the outlines and details of eastern North America.

Excepting Formosa, all the large islands of this chain belong to Japan. The greatest breadth across the middle of Nippon, is about 200 miles, and the average width of the empire is less than 100 miles. But its narrowness is compensated for by its length, the principal islands ranging from north lat. 31 deg., to about 50 deg. in the island of Saghalien, a length, following the axis, of over 1600 miles.

Its back bone of older granite and metamorphic rocks is overlaid by younger forma-

tions, among which are at least coal-bearing deposits of one age, and tertiary and post-tertiary beds, while strata of the cretaceous age exist on Jesso and Saghalien. Throughout its whole length this range is pierced by countless volcanic vents, and the lavas and tufas ejected from these sources, and in great part deposited originally under the sea, now form terraces and plains around the islands, and cover much of the interior. It is essentially a mountainous country; and though the height of the interior is not known, it seems improbable that the mountains, excepting some volcanic peaks, rise to a greater elevation than 4000 to 6000 feet, while even on Nippon the crest line probably averages less than 3000 feet. The volcano Fuziyama is said to be over 12,000 feet high, and other peaks of similar character may rise above 10,000 feet.

The rivers although very short, being merely coast streams, are often deep and navigable for small craft; they are, however, frequently broken by falls and rapids. The bold and rock-bound coast is indented with bays and countless fiords, forming many harbors where whole fleets could ride in safety.

With such a wide extent in latitude, there of course exists a corresponding change in climate. In Hakodadi, according to the observations of Dr. Albrecht, the mean annual temperature, from an average of four years (1859 to 1862), is 48.22 deg., the minimum being in January, 10 deg. Fah., and the maximum in August, 87.3 deg. The fall of rain in 1862 was 47 inches; the maximum fall in one month being ten inches in July.

Notwithstanding its insular position, the mean annual temperature of Japan, in common with that of all eastern Asia, is below that of corresponding points on the eastern coast of America, which is at least partially explained by the fact that the prevailing winter winds are from the west, blowing from the cold steppes of Tartary.

A marked difference is said by the Japanese to exist between the climates of the eastern and western coasts of Nippon, the latter being much colder and receiving a greater fall of snow than the former. The eastern coast, as far as the northern part of Nippon, is washed by the Kurosiwo, which, branching off from the equatorial current in the tropics, flows as a broad belt of warm water to the northeast, the counterpart in the Pacific ocean of the Atlantic gulf-stream. On the other hand, in the Japan Sea, there seems to be a cold current, setting south from the Sea of Ochotsk. A branch from this reaches eastward, through the Straits of Tsungaru, passing Hakodadi with a velocity of four or five miles per hour. On a voyage in the steamer Bogartyn, from Hakodadi to Nagasaki, through the Japan sea, it was found that the current set us every day thirty to forty miles south of the position indicated by dead reckoning.

At the change in the monsoons, especially in September, the coast is visited by fearful hurricanes, called typhoons, carrying destruction in their track. Although these cyclones are felt in the waters of Jesso, their centres follow the curve of the warm Kurusiwo, which does not wash the shores of that island.

Abounding in forests from the extreme south to the northernmost islands, Japan is exceedingly rich in the variety of its trees. The moisture of an insular climate, together with the fertility of soils formed by the decay of volcanic rocks, produce an exuberant vege-

tation in every latitude of the empire. On the highlands of Nippon the prevailing forms are European. The valleys of southern Nippon, and the forests of Kiusiu, contain many tropical plants, while the investigations, especially of Gray and Maximowitch, have shown that the flora of Jesso is generically almost identical with that of the northeastern United States.

The animal kingdom does not seem to be so well represented as one might expect, when we consider that the islands must have communicated with the continent at some period since the appearance in Asia of the animals now living wild in the Japanese mountains. The list of wild quadrupeds known to naturalists, seems to be confined to a species of hare, a deer, an antelope, a bear, a wild hog, fox, red and black badger, otter, marten and squirrel.

The animals of Japan have a strong analogy with those of Europe; many are identical or slightly varied, as the badger, otter, mole, common fox, marten and squirrel. On the other hand, a large species of bear in the island of Jesso resembles the grizzly bear in the Rocky Mountains of North America. A chamois in other parts of Japan is nearly allied to the antelope montana of the same mountains; and other animals, natives of Japan, are the same with those of Sumatra; so that its fauna is a combination of those of very distant regions.

The list of domesticated animals is very small, and confined to the oxen necessary in agriculture, horses, two kinds of dogs, the small pug-nosed variety like the King Charles, and the wolfish Tartar variety, with erect ears and bristling hair. Besides the common house cat, with a long tail, there is a variety having by nature either no tail, or one an inch or two long, and ending with a knot. The sheep, goat, and ass, seem to be unknown throughout the group.

The number of islands composing the Japanese empire is variously estimated at from 1,000 to 3,800, and the aggregate area at 170,000 square miles; Nippon, 900 miles long by about 100 miles broad, containing about 95,000 square miles; Kiusiu about 16,000; Sikok about 10,000, and Jesso about 30,000.

The population of Japan is generally placed at between thirty and forty millions. All estimates for the present must be merely arbitrary, as, although the population is probably known to the government, it has never been ascertained by foreigners; and we are yet too ignorant of the extent of cultivable land on Nippon and Kiusiu, and, indeed of all the other data necessary to form a rough estimate. The Japanese, not being a meat eating people, are able to cultivate land which with us would be devoted to pasture. In no other country does so large a portion of the population support itself and supply the interior with the products of the sea. These, ranging from sea-weed to marine mammals, contribute perhaps as largely to the subsistence of the nation as do the products of the land. Both these facts form important elements in estimating the ability of the country to support life; they might seem to favor the supposition, other things being equal, of a larger population to the square mile than we find in Europe. But the feudal state of the empire, together with the mountainous character of the islands, both of them conditions opposed to expansion; the laws requiring the maintenance of a fixed

forest area (with some social and moral influences) act against increase, and seem to weigh against the arguments for an overflowing population.

There is strong reason for believing that the population of Nippon and Kiusiu is far below the maximum which those countries and their coasts can support. This is found in the fact that Jesso, separated from Nippon by only a strait fourteen miles broad, and having an area of 30,000 square miles, and a climate like that of Illinois and New England, with a more fertile soil than the latter, has no population beyond fishing villages on the coast, and a few scattered aborigines in the interior.

Japanese literature, so far as known to us, gives no clue to the origin of the people. The native chronologies and histories represent the inhabitants of the islands as sprung from a race of gods through demi-gods, who, during more than a million years occupied Japan. The authentic dates of their history begin about 670 B. C., and the apparent absence of traditions relating to a foreign origin would seem to indicate that the time of their arrival was very remote indeed.

At present the empire is inhabited by two distinct races, the Japanese and the Aino. The latter people, exclusively hunters and fishermen, and now found only in parts of Jesso, Saghalien and the Kurile islands, as late as the sixth century occupied a large part of northern Nippon, whence they were dislodged. After a long series of bloody wars in Jesso they were brought to complete subjection in the twelfth century. The Ainos probably inhabited a large part if not all the present empire before the arrival of the Japanese. It is impossible to suppose that the Ainos, with their dark skins, heavy flowing beards, and hairy bodies, should be the parent stock of the Japanese, who differ from them as much as they do from the Caucasian.

By some writers the Japanese have been derived from the Mongol family, while others see in them proof of a Malay origin. Grammatical analogies in language, and some points of resemblance physically, point to a relationship with the Mongol family. It is not impossible that the wide-spread Malay and Mongol races may have met in southern Japan, and in their union produced the present population, in the character of which many of the distinguishing features of both are combined.

*The Qualifications for Gospel Ministry.*—They only are true pastors and ministers who are of Christ's giving; and many such he has given, and will give in this gospel day, according as was testified by a preacher, both of Christ as come in the flesh, and of the mystery of Christ as come in spirit. "Even the mystery which hath been hid from ages and generations, but now is made manifest to his saints, to whom God would make known what is the riches of the glory of this mystery among the Gentiles, which is Christ in you, the hope of glory, whom we preach, warning every man, and teaching every man in all wisdom, that we may present every man perfect in Christ Jesus; whereunto I also labor, striving according to his working, which worketh in me mightily."

According to a real belief and persuasion that God would reveal this mystery of Christ in us, I was made tenderly concerned to wait

for the same, that I might experience, witness and feel the power and coming of Christ inwardly in spirit, both to sanctify my heart, and give me understanding to do his will. And when he called me to bear testimony for his name and power, and also for his inward and spiritual work in man, I was engaged in spirit to wait for his power and spirit to move and work in me; and that I might labor in his service according to his working in me thereby, and not otherwise to run or to strive in my own will, wisdom or strength, as knowing that without Christ, his power and presence, help and counsel, I could of myself do nothing. And when my ability was but small, and I was in much weakness, fear and trembling many times, the Lord helped me, and increased strength and ability in my labors beyond expectation; this care still resting upon me, even in my early travels to minister only according to the ability and gift given to me of my heavenly Father, so to keep within compass of my own gift and ability; and when the Spirit of the Lord opened, and moved but in a few words, I must not exceed, but sit down in silence when that ceased. Many times in waiting upon the Lord, and secretly breathing to him in silence, the spring of life would arise, and open counsel afresh to the refreshment and consolation of myself and others. Often hath my soul been brought low, and the Lord helped me, and renewed my strength, to persevere in his service; being sensible the more low I was in myself, and the more in fear toward God, though but weak and simple of myself, the more he would manifest his power, and bless my endeavors and service. Let Him have the praise of all, who is forever worthy.—*George Whitehead.*

*The Wheat Fields of the Future.*—As soils constantly sown to wheat will in time lose the elements favorable to its successful production unless they are restored by expensive fertilizers, it has become a question of some interest whether lands on which wheat will naturally grow are likely to be found within the area of civilization in years to come. It is well known that virgin soils, if rich and favored with proper climatic influences, almost always produce good crops of wheat, but in a few years the constant drain of the constituent elements of the grain from the soil, exhausts its productiveness so far as this crop is concerned, and to restore its fertility resort must be had to manures, rotation of crops, or other means familiar to agriculturists. The principal production of wheat in the early days of the country was from the alluvial lands along the Connecticut, Hudson, Delaware and Susquehanna rivers and their tributaries. Then Ohio, Michigan and Indiana became in their turn the great producing States, and as the wheat culture there declined in importance, it increased in districts further west.

During the period embraced between the years 1865 and 1872, Ohio, Indiana, Illinois, Michigan, Wisconsin and Missouri, although growing immensely in population and general productiveness, fell off in their relative yield of wheat, while Minnesota increased its production from 3,000,000 to 15,000,000 bushels; Iowa from 13,700,000 to 20,600,000; Kansas from 200,000 to 2,000,000, and Nebraska from 166,000 to 2,500,000. And still the boundaries of the wheat region are extending toward the west.

No finer wheat can be grown anywhere than in that section east of the Rocky Mountains which can be utilized by irrigation. Should the experiment of artesian wells succeed generally, as it has in a few cases along the line of the Union Pacific Railway, the entire six or seven hundred miles between the Missouri river and the Rocky Mountains—once called in our school geographies the "Great American Desert"—may in the next half century become one vast wheat field. Northern Minnesota and the central sections along the line of the Northern Pacific Railway will produce the finest wheat in abundance. Manitoba gives excellent promise as a wheat producing region, while in the Saskatchewan valley, extending from Lake Winnipeg to the Rocky Mountains, and the country directly east of the mountains as far south as New Mexico, there is an area suitable for the production of wheat which bids fair to afford an ample supply of this great staple for centuries to come.—*Ohio Farmer.*

For "The Friend."

#### Samuel Hilles.

The recent removal of this dear Friend, has awakened a lively remembrance of the thoughtful kindness which he manifested nearly forty years ago, to one then a school-boy under his care; and which led to a friendship which subsisted through life. Great is the power of that christian courtesy, of which he was a shining example, when it is connected with unaffected love to the brethren, and flows from a heart in which the love of our Heavenly Father is felt and cherished. Such we believe was the case with our departed friend. It was very instructive to notice, especially in the latter years of his life, his earnest concern to be found in unity with his brethren, and his willingness to waive his own inclination, if he found it not to accord with the judgment of those with whom he was associated. Yet this humility and deference to the feelings of others, did not lead him to give up his attachment to the doctrines and testimonies of the Society of Friends, when brought into contact with those who had imbibed views inconsistent therewith. The writer well remembers a visit to his pleasant home, in the latter part of his life, in which S. H. spoke of one who had recently been under his roof, and who, though brought up within the pale of the Society, had become an enthusiastic convert to a form of doctrine not in accordance with that of his education. Samuel said, he made little reply to the arguments of his visitor, not thinking that much good would result from discussion in his present state of mind; but added, that he could not make the doctrines he advanced agree with his own experience.

It would be well for many in the present day, if, like this good man, they were concerned to know their religious opinions to be the result of submission to the grace of God, and produced by its effectual working in the heart. From this foundation they could not easily be moved by any wind of doctrine, or subtle argument addressed to the intellect. Retaining their faith in the efficacy of that Divine Power whose operations they had long witnessed in themselves, they would patiently wait the unfolding of the heavenly mysteries, in accordance with the promise of the Scriptures: he that doeth the will shall know of the doctrine. How sweet and encouraging

to such is the exhortation of a deeply experienced servant in the early days of this Society: "What though thou art weak and little; though thou meet with those who are wise and knowing; and almost every way able to reason thee down; what though thou hast not wherewith to answer; yet thou knowest and hast the feeling of God's pure Truth and Spirit, with a desire to have the life of it brought forth in thee, and so to witness the change and renewings which are by his power. O, dear heart! herein thou art accepted of the Lord, and here his tender love and care will be over thee, and his mercy will daily reach to thee; and thou shalt have true satisfaction in thy heart, and hold the Truth there, where all the reasonings of men, and all the devices of the enemy of thy soul, shall not be able to reach. Therefore look not out at men, or at the words and wisdom of men; but keep where thou hast felt the Lord visit thee, that he may visit thee yet again and again, every day, and be teaching thee further and further the way to his dwelling place, and be drawing thee thither, where is righteousness, life, rest and peace, forever."

*On the Top of Mount Shasta.*—After six hours' weary climbing—during the last hour of which the inclination was about forty-five degrees—we reach the crater summit. The mountain here is rounded in shape, and the line of vision, therefore, only a few feet distant. Nothing intervened between it and Shasta Valley, 13,000 feet below. This created the belief that by going a few feet to one side a sheer precipice of this depth would be found. Though the mind knows this to be an illusion, the eye was constantly returning to the view that created it—that which we dread having in such cases so unnatural an attraction. This fact did not by any means tend to restore calmness to nerves wrought almost to their utmost tension by the fatigue and excitement of the journey. In addition to the weakness resulting from want of sleep and appetite, I confess to having experienced the squeamish sensation incident to sea-sickness—a feeling to which, after the arduous journey, even those in possession of a full measure of strength are subjected.

In the ascent to the summit overlooking the great crater we passed over an ice-field which by the continued action of frost, had become as hard as flint glass and exceedingly slippery. It possessed the peculiar tinge of blue found in the ice of which glaciers are composed, and like them had been formed by the melting of snow. A sharp thrust with the spike of an alpenstock hardly made an impression in this ice, upon which it was almost impossible to walk.

After crossing the ice field we reached the crater rim of the once great but now extinct volcano. The crater is now filled with volcanic debris covered by layers of snow and ice. The present bottom of the crater is apparently 800 or 1000 feet below the rim, which has a circumference of nearly three miles, and it is irregularly broken on all sides except the east. The desolation and silence of the region are made more forbidding by the absence of every vestige of plant life, and by the sombre colors of the mountain sides to the south.

The view from the summit when the sun has dispelled the clouds extends from Pitt river on the northeast to Mount Tamalpais near the bay of San Francisco, on the south

west, a distance of some 500 miles. The great boundary wall of the Sierra Nevadas lies to the east, and the sinuous outline of the Coast Range to the west, beyond which, and visible over it, the broad Pacific shelves away to the horizon. Between these ranges lies the vast garden of the Sacramento. There is no feature which rugged, towering mountains, beautiful, fertile valleys, rich, variegated foliage, wood and water, clouds and clearings can bring as factors of the grand in nature, that is not found somewhere in the sweep of the vision along this marvellous panorama.

On the summit of Shasta a number of hot springs are found which emit a disagreeable odor and have the power of brazing any metallic article which is thrown into them. The chief constituents of the water are sulphur, arsenic, soda and iron, and the springs are faintly suggestive vents of the region of subterranean fire, which once threw molten lava and debris over the whole of the surrounding country.—*Scribner's Magazine*.

### The Plain Language.

George Fox says, "All Friends that believe in the right, as Christ hath commanded you, and are become children of light, keep to the proper speech; that is *thee* and *thou* to a single person, and *you* to many. You may see throughout the Scriptures, it was the language of God and Christ, his prophets and apostles, and all good men; though it is the practice of others to say you, when they should say *thou*. Therefore, take you heed of flattering or please men, and of letting the world's spirit over you."

That this was no light matter in George Fox's view, is shown by his advice that Monthly Meetings should make inquiry, "whether any that profess truth, use not of the pure language *thou* to every one; whether they keep up God's and Christ's language, that the holy prophets and apostles used, over all the flattering words of the world."

In one of the conferences which George Whitehead and Gilbert Laty had with Charles I., the king remarked, "But you will say *thee* and *Thou*; what is your reason for that?" To which Gilbert Laty made answer, "The same reason as the apostle Paul, when speaking to king Agrippa, he says, 'I think myself happy, king Agrippa, that I shall answer for myself before *thee*, especially because I know *thou* art expert in all customs, &c. Also, 'king Agrippa, believest *thou* the prophets?' And 'would to God not only *thou*, but also all that hear me this day, were both almost and altogether such as I am, except these bonds.'"

In reference to the practice which unhappily, has become too common among Friends in many places, to omit the word *thou* and employ *thee* in its place, that valuable minister, William Savery, makes this observation in his journal: "My two travelling companions George Miller and William Farrer, made some remarks on Americans using the word *thee* instead of *thou*, when the latter would be most proper; they were of the mind that it was a departure from our testimony, and had crept in from a desire of pleasing others by a soft, accommodating form of speech, and was inconsistent with the practice of our ancient Friends. I never thought it proceeded from a desire to evade our testimony, but through custom, had prevailed in many from ignorance of grammar rules:—we are, how-

ever, recommended by an apostle to hold fast the form of sound words."

When men and women in a discursive spirit take upon them to declare the Truth, when the Lord neither calls them nor speaketh by them, the children born of the royal seed are burdened; for such have turned against the Truth, and the children born of it, whom the Lord will ease in the day determined, when all mouths shall be closed in silence, but those which are opened by him, and not any voice be heard, but his own spirit speaking in and through his own children, born of him, who alone seek his glory, and not anything for themselves, which must be denied.—*Epistle of Wm. Dewsbury*.

The highest mountain on the North American continent is Mount St. Elias, in Alaska, whose elevation is 17,900 feet. Next to it come the volcano of Popocatepetl, in Mexico, 17,884 feet, and Orizaba, also in Mexico, 17,373 feet. If the newly discovered peak of the Holy Cross, in the Yellow Stone region, found by the Hayden exploring party, be really 17,000 feet high, as they estimate, it will be the fourth peak in elevation on the continent of North America, and the highest mountain in the United States, excluding Alaska. Heretofore the highest peak in this country was supposed to be Big Horn mountain, which is elevated 15,000 feet.—*Late Paper*.

## THE FRIEND.

EIGHTH MONTH 30, 1873.

The writer of an article which appeared in our Journal some weeks ago, under the caption of "Revision of the Bible," complains—and we think justly—that great part of it appeared in the 8th month number of "The British Friend" as an extract from "The Christian Union;" giving the impression to those who have observed the essay in both journals, that while claiming to be an original article, prepared for "The Friend," it was really a copy from the "Christian Union." We have no doubt the editor of "The British Friend" credits the article to the source whence he took it. Other journals are welcome to what may appear in our columns, but it is no more than right that when making such extracts, they should state where they are taken from.

### SUMMARY OF EVENTS.

FOREIGN.—A Madrid dispatch of the 22d says: The Republican army, under the command of General Bregua, numbering twelve thousand men, has entered Bilbao. The Carlist forces occupying the city withdrew without offering battle.

On the 16th inst. an unsuccessful attempt was made upon the life of Don Alphonso, the brother of Don Carlos. The would be assassin was taken and executed.

The total strength of the Carlist force operating in the North of Spain, is estimated in Madrid at 28,000 men.

The Spanish Minister of War has received dispatches announcing that in a recent battle near Berga, the Carlists were defeated after a desperate conflict in which ninety of their soldiers were killed and 300 wounded. The siege of Berga has been raised and the Carlists were in full retreat.

The Cortes have authorized the prosecution by the tribunals of justice of nine Deputies who have been arrested for participating in the Communist and Cantonal insurrections. The prisoners taken by the government forces in encounters with the Cantonal and Communist insurgents are to be sent to reinforce the Spanish army in Cuba.

The Spanish fleet, under command of Admiral Lobos, commenced the bombardment of Cartagena on the 22d inst. Advices from that city state that the civil and military authorities of the Communist administration had quarrelled, and their respective partisans were engaged in actual conflict. The private soldiers, it was believed, were in favor of surrendering to the government forces.

A Bayonne dispatch of the 23d says: Advices from Carlist sources state that Berga has been again invested by the Carlist army. Both sides claim to have gained the victory in the recent battle before that town.

The Carlists say they are organizing for a movement on Madrid, and will be ready to march within two months.

The Carlists, at the instigation of the priests, burn all the records of civil marriages that they can capture.

The work of laying a cable from Lisbon to Rio de Janeiro has commenced. A steamer left Lisbon on the 21st with the wire on board.

Bombay dispatches report that destructive floods have afflicted the province of Agra. There had been some loss of life, and 3,500 houses of the natives had been swept away by the waters.

On the 19th inst., Duke Charles Frederick William, of Brunswick, died at Geneva, of apoplexy. He left by will the whole of his great landed and personal estate to the city of Geneva.

South American advices state that a disastrous fire had occurred in Valparaiso, causing a loss of \$500,000. Several towns in Chili have been greatly damaged by earthquakes. About sixty miles from Lima an immense body of earth fell from a mountain side into a valley, severely injuring a number of persons and damming up a river which had risen more than one hundred feet above its usual height. Further damage was expected whenever the water burst through the barrier of rock and earth.

The revenue of the East Indian government for the year ending 3d mo. 31st, 1873, was \$249,570,000, and the expenditures \$242,110,000. There was a cash balance in the Treasury of \$95,000,000.

A Paris dispatch of the 22nd says: At a meeting of the members of the Left to-day, it was decided to seek the support of the Left Centre, to prevent the success of the plans of the Fusionists and Legitimists for the establishment of a Bourbon monarchy.

Prince Napoleon has been elected president of the Council General of Corsica. In accepting the position he delivered an address to the Council, recommending that the proceedings be confined to matters of departmental interest.

The Prussian Minister of Public Instruction and Ecclesiastical Affairs, has ordered the Roman Catholic Seminary at Posen to be closed.

The rate of discount at the Bank of England has been reduced to three per cent.

A steamer from Singapore and Shanghai, for London, has been wrecked in the Red Sea, near the eastern entrance. The captain, officers, and part of the crew, were lost. Thirty-six men succeeded in gaining the land, but fell into the hands of Arabs, by whom they are held as prisoners.

A dispatch of the 23d from Alexandria says: Sir Samuel Baker and wife, with the party which went with them up the Nile, have arrived at Suez, and will proceed to Cairo to-morrow.

By a collision on the Great Northern Railway, near Nottingham, on the 23d inst., four persons were killed and fifteen others badly injured, some of them fatally.

London, 8th mo. 23d.—Consols 92½. U. S. 10-40 five per cents, 90.

Liverpool.—Middlings cotton, 8½d. Sales 12,000 bales.

It is stated that Victor Emanuel, King of Italy, will visit Vienna and Berlin about the middle of next month.

It is announced that the Pope has intimated his desire for reconciliation with Germany, on the condition of Germany not interfering in the Italian complications.

UNITED STATES.—*Miscellaneous*.—The interments in Philadelphia last week numbered 333, including 157 under two years. There were 51 deaths of cholera infantum, 38 consumption, 23 marasmus, 22 debility.

There were 615 interments in New York last week.

The *North American* of the 22d inst. says: There is now at this port the bark True Love, Capt. Thomas Wetherill, recently arrived from Greenland with a cargo of kryolite. The vessel was built in 1764, in this city, and is consequently 109 years old. It is still in excellent condition and during its long existence has received scarcely any repairs.

The number of distilleries in the United States in operation on the first inst., is stated by the Internal

Revenue Department at 208, with a capacity for producing 181,729 gallons of spirits daily.

President Grant has approved the sentences passed by a military commission on some of the captive Modocs, and ordered that they be carried into execution on the 3d day of Tenth month next. The commission sentenced Captain Jack and five other prisoners to death by hanging.

On the 23d inst. an explosion occurred in the steamer George Wolfe, on the Mississippi river, near Memphis, by which a large number of persons were killed or injured.

On the 24th an accident occurred on the Baltimore and Ohio Railroad, by which four German immigrants were fatally injured, and about twenty wounded. The accident was caused by the spreading of the track, which threw all the cars off the track and one down an embankment, bottom upward, with 70 or 80 men, women and children in it.

A very destructive fire occurred in Belfast, Maine, on the 24th inst., by which more than 125 buildings were destroyed, and at least 130 families rendered homeless. Loss about \$500,000.

Notwithstanding the great loss by the fire of Eleventh month last, the valuation of real and personal property in Boston this year shows an increase of \$8,000,000. The rate of taxation will be about thirteen dollars per thousand.

**The Markets, &c.**—The following were the quotations on the 23d inst. *New York*.—American gold, 115½. U. S. sixes, 1881, 119½; ditto, 1868, 118; ditto, new fives, 114½. Superfine flour, \$5.10 a \$5.40; State extra, \$6.40 a \$6.75; finer brands, \$7 a \$10. Red western wheat, \$1.64; No. 2 Chicago spring, \$1.49; No. 3 do., \$1.40. Oats, 40 a 50 cts. Western yellow corn, 62 a 63 cts.

*Philadelphia*.—Middling uplands and New Orleans cotton, 19½ a 20½ cts. Superfine flour, \$3.50 a \$4.25; extra, \$4.50 a \$5.50; finer brands, \$6 a \$10. Old white wheat, \$1.65 a \$1.85; amber, \$1.65; western red, \$1.60 a \$1.65; No. 2 spring, \$1.42. Rye, 80 a 82 cts. Yellow corn, 62 cts. Oats, 39 a 46½ cts. *Baltimore*.—White corn, 70 a 72 cts.; western mixed, 59 cts. Oats, 44 a 48 cts. *Chicago*.—No. 1 spring wheat, \$1.24; No. 2 do., \$1.19½; No. 3, \$1.10½. Corn, 39½ a 40 cts. No. 2 oats, 27½ cts. Rye, 65 cts. Lard, 7½ a 8 cts. *St. Louis*.—No. 2 amber red wheat, \$1.45; No. 3 red, \$1.30. Corn, 37 a 38 cts. Oats, 29 a 29½ cts. Lard, 7½ cts. *Cincinnati*.—Family flour, \$6.60 a \$6.75. Wheat, \$1.30. Corn, 46 a 49 cts. Lard, 8 a 8½ cts.

#### FRIENDS' SELECT SCHOOLS.

These schools, under the care of the three Monthly Meetings of Friends in this city, will re-open on Second-day, Ninth mo. 1st, 1873. The Boys' School, on Cherry St., above Eighth St., is under the care of Zebedee Haines, as Principal. The Girls' School, on Seventh St., below Race St., is under the care of Margaret Lightfoot. There are also two Primary Schools for the instruction of those children who are too young to attend the higher schools; one of which is held in the Meeting-house at the corner of Sixth and Noble streets, the other in the Boys' School building on Cherry street.

The attention of Friends residing in this city and its neighborhood is particularly invited to these schools. The terms are moderate, and by provisions recently made for that purpose, Friends belonging to Philadelphia Yearly Meeting, sending children to these schools, (also members) who may find the charges burdensome, can be fully relieved. In the principal schools opportunities are afforded of obtaining a liberal education in useful branches of study, and in the Latin and Greek languages. Facilities for illustration are afforded by a valuable collection of philosophical apparatus, minerals, and Auzoux's models of parts of the human system, &c. French is also taught in the Girls' school. In the primary schools the children are well grounded in studies of a more elementary character.

It is desirable that applications for admission of children should be made early, and that parents returning children to the schools should send them at the beginning of the term.

Further information may be obtained upon application to the Treasurer of the Committee,

JAMES SMEDLEY, No. 415 Market street.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

#### RECEIPTS.

Received from Charles W. Roberts, Pa., per M. C. R., \$2, vol. 47; from Isaac P. Wilbur, Mass., \$2, vol. 47; from Cornelia G. Graham, O., \$2, vol. 47; from Jane DeCou, N. J., \$2, vol. 47; from Daniel Smith, O., \$2, vol. 47; from Joel Harlan, Pa., \$2, vol. 47; from John D. Harrison, Pa., \$2, vol. 47; from Stephen Hobson, Agent, O., \$2, vol. 47, and for John S. Fowler, Edwin Hollingsworth, James Bowman, and Daniel M. Mott, \$2 each, vol. 47; from Thomas H. Whitson, Pa., \$2, vol. 47; from Deborah L. Walton, Pa., \$2, vol. 47; from D. J. Scott, Pa., \$2, vol. 47, and for Ann Scott, \$2, vol. 47; from William Bettles, Ill., \$2, vol. 47; from Daniel Satterthwaite, N. J., \$2, vol. 47, and for William Satterthwaite and Samuel Satterthwaite, Mich., Daniel Satterthwaite, N. Y., and Reuben Satterthwaite, Del., \$2 each, vol. 47; from Isaac Hall, Pa., \$2, vol. 47, and for Esther A. Ellis, City, \$2, vol. 47; from Thomas Conard, Agent, Pa., \$2, vol. 47, and for Sarah C. Satterthwaite and William Wickersham, \$2 each, vol. 47; from Henry W. Wills and Joshua S. Wills, N. J., \$2 each, vol. 47; from Lydia Ann Hendrickson, N. J., \$2, vol. 47; from C. I. Hayes, O., \$2, vol. 47, and for Anos Fawcett, \$2, vol. 47; from Hannah Stevenson, Ill., \$2, vol. 47; from Isaac Child, Io., \$2, vol. 47; from Nicholas D. Tripp, N. Y., \$2, vol. 47; from Joshua Haight, Agent, N. Y., \$2, vol. 47, and for David Haight, Humphrey S. Haight, Levi H. Atwater, Hibbard Fuller and William Breckon, \$2 each, vol. 47; from J. B. Foster, R. I., \$2, vol. 47; from Joseph Hall, Agent, Io., for John Thomas, Israel Heald, Jonathan Bundy, Isaac Walker, Aaron Roberts, John Hirst, John Oliphant, Joseph Armstrong, Lindley Heald, Abraham Cowgill, and Thomas Heald, \$2 each, vol. 47, for Samuel S. Cowgill, \$4.50, vols. 46 and 47, and for Joseph Wilson, Ill., \$2, vol. 47; from Caleb Hoopes, Pa., \$2, vol. 47; from Nathan B. Willits, N. J., \$2, vol. 47; from Jacob Edge, Pa., \$2, vol. 47; from Mary A. Chambers, Pa., \$2, vol. 47; from Charles Cooper, Pa., \$2, vol. 47; from Naome Gibbons, Pa., \$2, vol. 47; from Martha Sankey, Pa., \$2, vol. 47; from Jonathan Chace, R. I., \$2, vol. 47; from George Foster, L. I., \$2, vol. 47, and for James Willeits, \$2, vol. 47, and H. V. Duryea, \$2, to No. 32, vol. 47; from Joseph Scattergood, Jr., Agent, Pa., for Ann Sheppard, Philena S. Yarnall, Mary Ann Newlin, Elizabeth S. Thomas, Morris S. Cope, and Jane B. Davis, \$2 each, vol. 47, and for Susanna S. Thomas, \$2, to No. 31, vol. 48; from Zebedee Haines, N. J., \$2, vol. 47, and for Joshua L. Harmer, \$2, vol. 47; from Abram P. Rudolph, N. J., \$2, vol. 47, and for Eunice Mickle and Hannah G. Leeds, \$2 each, vol. 47; from Benjamin D. Stratton, Agent, O., \$2, vol. 47, and for Hannah Gilbert, Lindley M. Shaw, Uriah Price, Edward Y. Cope, Nathan B. Whinery, Josiah Cameron, Rachel Harris, Christiana Kirk, Zachaeus Test, Albert M. Cope, Joshua Coppock, Cyrus Brantingham, Lewis B. Walker, Joshua Gilbert, Sarah S. Lupton, Christopher Allen, Preston Beck, Ann Stanley, and Alfred M. Brantingham, \$2 each, vol. 47; from James Smedley, City, \$2, vol. 47, and for Sarah Haines, N. J., Thomas Yaroall, and Thomas Smedley, Pa., \$2 each, vol. 47, and William Webster, Pa., \$2, to No. 11, vol. 48; from Robert Miller, O., \$2, vol. 47, and for Oliver Miller, \$2, vol. 47; from Friends' Boarding School, Mt. Pleasant, O., per Barclay Stratton, \$2, vol. 47; from Richard W. Bacon, City, \$2, vol. 47, and for Mary W. Bacon, N. J., \$2, vol. 47; from David F. Knowles, Vt., per Robert Knowles, \$2, to No. 42, vol. 47; from Stephen H. Foster, Ill., \$2, vol. 47; from Gilbert Cope, Pa., \$2, vol. 47, and for Lucy Cope, \$2, vol. 47; from Joseph W. Hibbs, Pa., \$2, vol. 47; from Jno. M. Saunders, N. J., \$2, vol. 47.

*Remittances received after Fourth-day morning will not appear in the Receipts until the following week.*

**ERRATUM.**—The Receipt in last week's issue from Annabella Wynne, Ind., should be Annabella Lynde, Ind.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A Friend and his wife are wanted to take charge of this Institution, and to manage the farm connected with it. A teacher of the school will also be wanted at the commencement of the Fall term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of Tenth month.

Application may be made to

Elton B. Gifford, 28 North Third St.

Ephraim Smith, 1013 Pine St.

James Bromley, 641 Franklin St.

Richard J. Allen, 472 North Third St.

#### HAVERFORD COLLEGE.

The Winter Term will commence 9th mo. 3rd, 1873.

Applications for admission may be made to

SAMUEL J. GUMMERE, Pres't.

Haverford College P. O., Montgomery Co., Pa.

DIED, on the 10th of Third month, 1873, at West-town Boarding School, SARAH W. MOORE, widow of Calvin C. Moore, in the 57th year of her age. This dear Friend had from early life been almost constantly employed in the care and instruction of youth; and for nearly seven years past she was usefully and acceptably engaged at the Institution where she died, first as a teacher, and afterwards in the important station of Governess. She was an earnest and efficient teacher, and felt a true interest in those under her care, endeavoring by precept and example to guard them from the evil that abounds in the world. Her last illness was of about two weeks continuance, soon assuming an alarming character. Her bodily suffering was at times extreme, and she also experienced much conflict of spirit, having to labor, as she expressed it, for her own soul and that of her precious child. The prospect of leaving him was a deep trial to her, but being enabled to impart to him much valuable counsel, she was favored to experience resignation to the Divine will. She was frequently engaged in supplication, and repeatedly said that if she found acceptance at last "it would be all through mercy, unmerited mercy." On the night of the 4th she several times appeared to be near her end; but next morning, contrary to expectation, she revived and was remarkably strengthened to speak to those about her, having something to say to each of the teachers and to other members of the family. She also sent messages of love to the girls (her pupils) and to many of her friends. "Tell the girls," she said, "that I hope they will try to do what they know to be right for they will all have to do what I am doing, leave this world." She added, "It is an awful thing to die." To the teachers she said, "There is no hiding anything in corners at such a time as this: every thing is brought to light. I part with you in much love, much kindness, much tenderness; and if I have done anything to hinder the growth of the good seed in any, I trust I may be forgiven." After these interviews her mind seemed like that of a little child, humble and redeemed from earth. At one time she said, "I hope no one will hold me; I have no dread of death; the sting of death is taken away." Some encouraging passages of Scripture being repeated to her, she said, "How precious those words of comfort." She bore all her suffering with much patience and Christian fortitude. During the last few days her strength continued steadily to decline, and she lay quiet and composed, patiently awaiting the solemn change. She quietly breathed her last on the afternoon of the 10th of Third month. "Blessed are the dead which die in the Lord, from henceforth yea, saith the Spirit, that they may rest from their labors; and their works do follow them." May the labors of this dear Friend be blessed to many of the young persons on whom they were bestowed.

—, at Moorestown, N. J., on the 23d of Fifth month 1873, SARAH B. EASTBURN, formerly of Buckingham Bucks Co., Pa., in the 64th year of her age, a member of Chester Monthly Meeting, N. J.

—, at his residence, Parkersville, Chester Co., Pa. on the 15th of Seventh month, 1873, WILLIAM HOUSE in the 81st year of his age, an esteemed member an overseer of Kennet Monthly Meeting.

—, on Fifth-day, Seventh mo. 31st, at his residence in Johnstown, Pa., JOHN ELDRIDGE, aged 77 years, member of Concord Monthly Meeting.

—, Third-day, Eighth mo. 12th, at his residence East Goshen, ISAAC G. HOOPES, aged 75 years, a member of Goshen Monthly Meeting.

—, at the residence of her son-in-law, John M. Saunders, Woodbury, N. J., Eighth month 15th, 187 BEULAH SNOWDON, widow of the late Miles Snowdon of Philadelphia, deceased, in the 80th year of her age a member of Woodbury Monthly Meeting.

—, on the 25th inst., at his residence in New Garden township, Chester Co., Pa., PASCHALL COPE, in the 47th year of his age, a member of New Garden Monthly and Particular Meeting.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, NINTH MONTH 6, 1873.

NO. 3.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

## Amusements.

Under the above caption, Jonathan Dymond, in his "Essays on Morality," thus lays the axe at the root of one of the most evil and corrupting trees of our day—theatrical representations and amusements. An evil which being too much countenanced if not greatly sanctioned by their elders, tends to lead the young and inexperienced into the dreadful snare of vice and wickedness, almost before they are aware.

Would that ministers throughout the length and breadth of the land, with the good of every denomination, might see the deplorable fruits of this Bohun Upas tree, particularly upon the susceptible minds of young persons; and turn the whole force of their influence against an evil, the tendency of which so wholly is to vitiate and corrupt. Drawing little by little, more and more into destruction's wide and widening ways. Reminding, in its insidious workings, of the verse:—

"Vice is a monster of such hideous mien,  
That to be hated needs but to be seen;  
But seen too oft, familiar with her face,  
We first endure, then pity, then embrace."

Jonathan Dymond thus writes:—"It is a remarkable circumstance, that in almost all christian countries many of the public and popular amusements have been regarded as objectionable by the more sober and conscientious part of the community. This opinion could scarcely have been just: yet *why* should a people prefer amusements of which good men feel themselves compelled to disapprove? Is it because no public recreation can be devised of which the evil is not greater than the good? or because the inclinations of most men are such, that if it were devised, they would not enjoy it? It may be feared that the desires which are seeking for gratification are not themselves pure; and pure pleasures are not congenial to impure minds. The real cause of the objectionable nature of many popular diversions is to be sought in the want of virtue in the people.

Amusement is confessedly a subordinate concern in life. It is neither the principal nor amongst the principal objects of proper

solicitude. No reasonable man sacrifices the more important thing to the less, and that a man's religious and moral condition is of incomparably greater importance than his diversion, is sufficiently plain. In estimating the propriety or rather the lawfulness of a given amusement, it may safely be laid down, that none is lawful of which the aggregate consequences are injurious to morals; nor, if its effects upon the immediate agents are, in general, morally bad: nor if it occasions needless pain and misery to men or to animals: nor, lastly, if it occupies much time or is attended with much expense. Respecting all amusements, the question is not whether in their simple or theoretical character, they are defensible, but whether they are defensible in their actually existing state.

The Drama.—So that if a person, by way of showing the propriety of theatrical exhibitions, should ask whether there was any harm in a man's representing a composition before others and accompanying it with appropriate gestures—he would ask a very foolish question: because he would ask a question that possesses little or no relevancy to the subject. What are the ordinary effects of the stage upon those who act on it? One and one only answer can be given—that whatever happy exceptions there may be, the effect is bad;—that the moral and religious character of actors is lower than that of persons in other professions. 'It is an undeniable fact,' says Wilberforce in his Practical View, 'for the truth of which we may safely appeal to every age and nation, that the situation of performers, particularly of those of the female sex, is remarkably unfavorable to the maintenance and growth of the religious and moral principle, and of course highly dangerous to their eternal interests.'

Therefore, if I take my seat in the theatre, I have paid three or five shillings as an inducement to a number of persons to subject their principles to extreme danger; and the defence which I make is, that I am amused by it. Now, we affirm that this defence is invalid; that it is a defence which reason pronounces to be absurd, and morality to be vicious. Yet I have no other to make; it is the sum total of my justification.

But this, which is sufficient to decide the morality of the question, is not the only nor the chief part of the evil. The evil which is suffered by performers may be more intense, but upon spectators and others it is more extended. The night of a play is the harvest time of iniquity, where the profligate and the sensual put in their sickles and reap. It is to no purpose to say that a man may go to a theatre, or parade a saloon without taking part in the surrounding licentiousness. *All who are there* promote the licentiousness, for if none were there, there would be no licentiousness; that is to say, if none purchased tickets there would be neither actors to be depraved nor dramas to vitiate, nor saloons

to degrade and corrupt, and shock us. The whole question of the lawfulness of the dramatic amusements, as they are ordinarily conducted, is resolved into a very simple thing:—After the doors on any given night are closed, have the *virtuous* or the *vicious* dispositions of the attenders been in the greater degree promoted? Every one knows that the balance is on the side of vice, and this conclusively decides the question—'Is it lawful to attend?'

The same question is to be asked, and the same answer I believe will be returned, respecting various other assemblies for the purposes of amusement. They do more harm than good. They please, but they injure us; and what makes the case still stronger is, that the pleasure is frequently such as ought not to be enjoyed. A tippler enjoys pleasure in becoming drunk, but he is not to allege the gratification as a set-off against the immorality. And so it is with no small portion of the pleasures of an assembly. Dispositions are gratified which it were wiser to thwart; and, to speak the truth, if the dispositions of the mind were such as they ought to be, many of these modes of diversion would be neither relished nor resorted to. Some persons try to persuade themselves that *charity* forms a part of their motive in attending such places; as when the profits of the night are given to a benevolent institution. They hope, I suppose, that though it would not be quite right to go if benevolence were not a gainer, yet that the end warrants the means. But if these persons are charitable, let them give their guinea without deducting half for purposes of questionable propriety. Religious amusements, such as oratorios and the like, form one of those artifices of chicanery by which people cheat, or try to cheat, themselves. The music, say they, is sacred, is devotional; and we go to hear it as we go to church: it excites and animates our religious sensibilities. This, in spite of the solemnity of the association, is really ludicrous. These scenes subserve religion no more than they subserve chemistry. They do not increase its power any more than the power of the steam-engine. As it respects Christianity, it is all imposition and fiction; and it is unfortunate that some of the most solemn topics of our religion are brought into such unworthy and debasing alliance."

There are in Europe at the present time 1507 theatres. Italy, with a population of 26,000,000, supports 348; France, with 26,000,000 inhabitants, has 337, and Spain, with 16,000,000, has 160. On the other hand, the Empire of Germany, which now reckons 41,000,000 subjects, has but 191 theatres, and the Empire of Austria 152, for a population of 36,000,000; finally, Great Britain supports only 150 theatres, and Russia 44, although its population amounts to 70,000,000. These figures show a remarkable preponderance of the dramatic instinct in the Latin races.

### The Sand Wasps on the Amazon.

Whilst resting in the shade during the great heat of the early hours of afternoon, I used to find amusement in watching the proceedings of the sand-wasps. A small pale green kind of *Bembex* (*Bembex ciliata*), was plentiful near the bay of Mapiiri. When they are at work, a number of little jets of sand are seen shooting over the surface of the sloping bank. The little miners excavate with their fore feet, which are strongly built and furnished with a fringe of stiff bristles; they work with wonderful rapidity, and the sand thrown out beneath their bodies issues in continuous streams. They are solitary wasps, each female working on her own account. After making a gallery two or three inches in length in a slanting direction from the surface, the owner backs out and takes a few turns round the orifice apparently to see whether it is well made, but in reality, I believe, to take note of the locality, that she may find it again. This done, the busy workwoman flies away; but returns, after an absence varying in different cases from a few minutes to an hour or more, with a fly in her grasp, with which she re-enters her mine. On again emerging, the entrance is carefully closed with sand. During this interval she has laid an egg on the body of the fly which she had previously benumbed with her sting, and which is to serve as food for the soft, footless grub soon to be hatched from the egg. From what I could make out, the *Bembex* makes a fresh excavation for every egg to be deposited; at least in two or three of the galleries which I opened there was only one fly enclosed.

I have said that the *Bembex* on leaving her mine took note of the locality: this seemed to be the explanation of the short delay previous to her taking flight; on rising in the air also the insects generally flew round over the place before making straight off. Another nearly allied but much larger species, the *Monedula signata*, whose habits I observed on the banks of the Upper Amazons, sometimes excavates its mine solitarily on sand-banks recently laid bare in the middle of the river, and closes the orifice before going in search of prey. In these cases the insect has to make a journey of at least half a mile to procure the kind of fly, the *Motúca* (*Iladaüs lepidotus*), with which it provisions its cell. I often noticed it to take a few turns in the air round the place before starting; on its return it made without hesitation straight for the closed mouth of the mine. I was convinced that the insects noted the bearings of their nests and the direction they took in flying from them. The proceeding in this and similar cases (I have read of something analogous having been noticed in hive bees) seems to be a mental act of the same nature as that which takes place in ourselves when recognising a locality. The senses, however, must be immeasurably more keen and the mental operation much more certain in them than it is in man; for to my eye there was absolutely no land-mark on the even surface of sand which could serve as guide, and the borders of the forest were not nearer than half a mile. The action of the wasp would be said to be instinctive; but it seems plain that the instinct is no mysterious and unintelligible agent, but a mental process in each individual, differing from the same in man only by its unerring certainty. The mind of the insect appears to be so constituted that the impression of external objects or the

want felt, causes it to act with a precision which seems to us like that of a machine constructed to move in a certain given way. I have noticed in Indian boys a sense of locality almost as keen as that possessed by the sand-wasp. An old Portuguese and myself, accompanied by a young lad about ten years of age, were once lost in the forest in a most solitary place on the banks of the main river. Our case seemed hopeless, and it did not, for some time occur to us to consult our little companion, who had been playing with his bow and arrow all the way whilst we were hunting, apparently taking no note of the route. When asked, however, he pointed out, in a moment, the right direction of our canoe. He could not explain how he knew; I believe he had noted the course we had taken almost unconsciously: the sense of locality in his case seemed instinctive.

The *Monedula signata* is a good friend to travellers in those parts of the Amazons which are infested with the blood-thirsty *Motúca*. I first noticed its habit of preying on this fly one day when we landed to make our fire and dine on the borders of the forest adjoining a sand-bank. The insect is as large as a hornet, and has a most waspish appearance. I was rather startled when one out of the flock which was hovering about us flew straight at my face: it had espied a *Motúca* on my neck and was thus pouncing upon it. It seizes the fly not with its mandibles but with its fore and middle feet, and carries it off tightly held to its breast. Wherever the traveller lands on the Upper Amazons in the neighborhood of a sand-bank he is sure to be attended by one or more of these useful vermin-killers.—*Bates' Amazon.*

### Funerals.

For "The Friend."

When our friends and relatives have been removed from our midst, and we feel that the places which have known them shall know them no more, the circumstance is calculated to awaken serious feelings in our minds. The necessity imposed upon us by the natural laws impressed on all inanimate matter, compels us to remove from sight the form from which the vital principle has departed, and place it where it may be restored to its original elements, and be "a brother to the insensate clod, which the rude swain turns with his share, and treads upon," without shocking the sensibilities, and injuring the health of the living, by the inevitable accompaniments of decay.

In doing this, various customs have been practised and still exist among different nations and people, such as burning, embalming and exposure to the elements, but much the most prevalent and rational one is that which obtains in all civilized countries—of burying the lifeless body. The ceremonies attendant upon this are often accompanied by an unreasonable amount of expense and show, which are prompted by the affection of survivors, or by ostentation and other inferior motives. To my mind, the simple and solemn custom of the Society of Friends, is peculiarly appropriate and impressive. Many such occasions rise up to mental view, and especially one of a funeral in a country neighborhood. As the hour for assembling drew near, the carriages might be seen coming by the different roads that led to the late residence of the deceased friend. The members of his own meeting,

the relatives and family connexions, and the many friends who loved and esteemed him in life, and who were desirous of showing this last token of respect, formed a numerous assemblage. To accommodate these, the various rooms in the house were well provided with chairs and seats; and as the weather was pleasant, boards placed on baskets or other supports in the open air, under the shade of the surrounding trees, furnished a resting place for those whom the house could not contain. As I entered the room in which the coffin was placed, in which lay all that remained of one whom I had long known and valued, I found it already nearly filled by earlier comers who were quietly seated. I gazed upon the placid features, from which had faded away all traces of the struggles and suffering pertaining to the last conflict of expiring nature; remembered the honest zeal with which our departed friend maintained the doctrines and testimonies of the Society to which he belonged, and to which the experience and convictions of a long life had confirmed his attachment; called to mind his care to watch over the flock for good, and to strengthen by words of counsel and cheer, the drooping spirits of those on whom rested the burthen of preaching the gospel to others; and partook of that solemnity which is naturally produced by being thus brought into contact, as it were, with death; and shared also in the consoling belief that he who was about to be removed from our sight had died the death of the righteous. Group after group enter the house. Those in attendance, with noiseless step and quiet whisper, direct them to the room in which is placed the lifeless form, and then find them seats as best they can. All seem desirous not to break the sacred quiet, or disturb the solemnity which rests on the gathered assembly. If one inadvertently speaks in an ordinary tone of conversation, it jars on the ears of all, as irreverent or out of season.

Thus sitting in silence, the presence of God is felt to be near, and we realize the truth of the language uttered by a dear friend now gathered to his heavenly home: "How solemn, how awful is the feeling when Divine goodness is pleased to spread the canopy of His love over us." Mingled with this solemnity is a feeling of comfort and satisfaction on our own account. We rejoice in humble thankfulness that we are permitted once more to partake of this evidence of Heavenly regard, and to know that we are mercifully remembered by our common Father.

As the hour passes on, the silence is broken by the voice of one who in affectionate language bears testimony to the virtues of the deceased, to his upright defence of the Truth, and to his tender and judicious encouragement of all that was good, as he was enabled by that Divine power, through submission to which he was qualified to become a useful servant in the church. Those still remaining in this state of preparation are tenderly encouraged and exhorted so to live that when the final summons comes to them, they may be prepared to join that company whose sins have gone beforehand to judgment, and who have been washed and purified, and prepared for admission into the enjoyments of Heaven.

In some parts of the country, it is a frequent practice, after the coffin has been lowered into the grave, for the company to retire into the adjoining meeting-house, and there endeavor

o feel together. It is much to be desired that his good custom should continue. It affords an opportunity for the relief of the minds of those who may be loaded with a concern for the spiritual benefit of the company about them, which they could not otherwise satisfactorily obtain. The arrangements of dwelling-houses are generally such, that a vocal exercise of the kind can only be heard by a portion of those for whom the concern is felt,—and in the grave-yard, the voice, unless unusually loud, becomes inaudible to those at a little distance; and the fatigue caused by standing long, and the exposure to those in delicate health, prevent the service from being as satisfactory as it otherwise might.

In the memorial preserved of Thomas Camm, who was one of the early worthies in our Society, and finished his earthly course in the year 1707, there is this notice of his funeral:

“The corpse being interred, all, or most that were there, drew into the meeting-house, and had a precious, edifying season together, the powerful living presence of the Lord, in an eminent manner overshadowing the assembly, to the tendering and affecting many hearts. Divers testimonies were then borne, to the sufficiency of that universal principle of divine light and grace, which is given to be a teacher and a leader to all mankind, and is become the teacher and leader of all those who are willing to be taught and led by it. But it is, and will be, the condemnation of all those who are disobedient to, and rebel against it, while they continue in that state. Also divers testimonies were borne concerning this our dear friend, deceased, as to his faithfulness, care and labor of love in serving God’s heritage; as also with respect to the many trials, travels and deep exercises that he had faithfully gone through in his day and time, upon truth’s account; all which he was enabled to perform and go through by the power and assistance of that divine grace and Holy Spirit of God, which he still accounted his buckler and his shield, his bow and his battle-axe, and by and through which he was what he was, and to which alone and not to him as man, the praise and glory of all was attributed.

So Friends having cleared themselves of what was on their minds, the meeting broke up, and Friends parted, with hearts deeply affected, and filled with the love and goodness of God, which had been plentifully shed abroad amongst them that day; praises, honor and glory over all, be given unto God, and to the Lamb, who sits with Him upon the throne, who is worthy for ever, and for evermore.”

Has it not sometimes been the case, that exercised servants, who have felt the pressure of concern, have gone home with burthened minds, because they did not rise above the feeling of discouragement, and in the exercise of that faith which can remove mountains, take the necessary steps for the holding of such meetings?

And truly, the reason why we may not call the Scriptures the Word of God, (to speak properly is) that people may be directed to the inward living Word; for by their being so much called the word of God, they have been put in Christ’s stead, and have been set up as an idol, instead of that from whence they came; so that, to avoid this hazard, we have put them in their due place.—*Barclay.*

From the “Philadelphia Evening Bulletin.”  
Colorado.—The American Alps.

Colorado Springs, July 29th, 1873.

Editor of the Evening Bulletin:—We have been here three weeks, and propose to pass a few more in this interesting region. We are five and a half miles from the Springs proper, which are situated at Manitou, at the foot of Pike’s Peak. Our situation is a very pleasant one, in a large room, with four windows to receive every breeze that blows, two of these windows opening to the floor, with their aspect Pike’s Peakward, so that as we sit at our writing table or lounge away the pleasant hours, this mighty stone pile is always in view, always challenging our admiration. As to elevation, we are ourselves 5,975 feet above the level of the sea, the general level of the mountain range which bounds our view to the west is 12,000 feet, while Pike’s, the loftiest summit in sight, rises, according to accepted admeasurements, to the height of 14,336 feet, or within a few hundred of that of Mt. Blanc. We have gazed upon upwards of 200 miles of this stupendous mountain wall, have seen the grandest portion of it in every aspect the summer permits, in calm and in storm; glowing under the intense rays of the burning sun; flecked with cloud-shadows; robed in drapery of snowy cumulus, and shrouded in the gloom of the tempest, and anon illuminated by the glare of the summer lightning. Its morning purple and rose tints, its noonday brilliance, and its evening blue and dun are all pleasing, but with its grandeur and beauty of coloring, the scene does not satisfy, as did the aspect of Mont Blanc. In the vale of Chamounix I stood nearly three thousand feet lower, and looked upon a summit robed in perpetual snow, and upon the mountain slope adorned by glaciers that seemed like rivers of snow coursing down its sides. The mighty black aiguilles, those stupendous granite columns rising fourteen thousand feet and upwards, and piercing the heavens, are absent from this western scene, and I have not been impressed as I was in Europe when, in my youth and more callow and sensitive, I wandered among scenes that must continue to bear the palm among the accessible high places of the earth.

Pike’s Peak is not difficult of ascent by good climbers, but we do not propose to attempt it. The cold by night is intense upon the summit or within 3 hour’s climb (2 miles), and parties have reported 40 degrees below zero. The ascent is made in the afternoon, and the night is passed 2 miles from the summit. The climb to the top is made before sunrise, when one of the grandest spectacles is presented, as the sun’s rays illumine peak after peak for hundreds of miles, away and away! We have been as much impressed by the majesty of the Cheyenne Cañon as by any other scene. The entrance is about five miles from Colorado Springs, and is by a magnificent portal, whose bright red sides tower hundreds of feet above us, chiseled by the untiring hand of time into rugged beauty, and constantly changing in appearance with the varying lights and shades. On one side is the whole bulk of the great Cheyenne Mountain itself, which presents the appearance on the east of a monstrous sleeping buffalo cow, 15 miles or more in length and a mile and upwards in height. The head, the nostril, the ears, the neck, abdomen and hip are all plainly presented to those who can readily catch resemblances and are endowed with an active imagination. The cañon soon

presents a vast amphitheatre bounded by rocky walls between one and two thousand feet in height, of bare red masses broken into columns or spires and domes, presenting a scene of extraordinary beauty and often terribly sublime. A brawling stream flows and dashes among the boulders, and is crossed about twenty times before we reach the cascade which bounds the passage to ordinary visitors. This cascade, of 50 or 60 feet in all, pours adown the face of the nearly perpendicular rock by three distinct leaps in rapid succession alternately in opposite directions, the last in a horizontal sheet which strikes the wall and is scattered in all directions and falls into the pool below. One of the most interesting sections of this cañon is at the “Pillars of Hercules,” where the creek runs between two enormous precipices, estimated to be more than 2,000 feet in height, yet scarcely a stone’s throw apart.

Among the scenes most interesting and amusing, apart from mountains, is the Monumental Park and its strange groups of statues and obelisks, where one might readily imagine one’s self in some vast cemetery filled with monuments of a departed race. Distributed principally upon the sand-stone bluffs enclosing the park, these mimic sepulchral sculptures stand up amongst the sombre pines in almost every conceivable variety of form. Truncated columns, shafts, cones, pedestaled statues, plain horizontal tablets, and royal sarcophagi are among these strange imitations of human handiwork. Many of these columns and statuesque forms are almost as regular as if turned in a lathe; some appear to have a spiral line running around them from base to capital. These monuments are composed of a rather coarse conglomerate of quartz, ore, pebbles, gneiss, &c., loosely cemented by a matrix of clay and red oxide of iron. Nearly all of them are surmounted by a projecting capital of darker color and harder texture and richer in iron. To this wide capital, which forms what may be taken for busts, covering many of the statues, much of the oddity of the resemblances to the human form must be ascribed. But the most interesting aspect of these monuments is that which ascribes their formation to the sand-blast. The hard capping of iron stone once doubtless extended over the entire area, has been cracked over its surface, and the softer material below, thus exposed to the action of the weather, has become broken into separate masses. After this began the symmetrical shaping, which it is inconceivable could have been formed by any other process than that of a chisel, in the hands of that skilful and impetuous turner, the *Wind*. The most delicate lines are curved around in curves in a manner that no agency but that of a cutting edge of silex could effect. The spiral lines above referred to do not, I think, extend entirely around the column, but have received their direction from the slope of the surface of the earth on which they stand, which rapidly rises upwards to their very base on the windward side. The process of cutting can sometimes be seen, and a hole several feet deep, and of sufficient diameter to admit one’s arm, has been bored in a few seconds by a spiral current which rose on a comparatively calm day, and that into the face of a Colorado sand bluff. Parties stopping at a settler’s cabin during the rage of one of the mountain whirlwinds were surprised to find that the window panes were, after a few

minutes' revolution of the storm of sand, left as perfectly opaque and as uniformly ground as a piece of ground glass could be made by their manufacturer! Undoubtedly the sand blast has been the agent in rounding and ornamenting these strange objects, which must continue to be the admiration and wonder of scientific and non-scientific observers. One of the most singular and grotesque groups among hundreds that occur is what has, by a photographer here, been termed the "Dutch Wedding," a pretty good view of which I send thee.

I have said nothing of Glen Eyrie and its wonderful masses of towering white rocks, cathedral-like, and hills of gypsum, or the low, flat-topped mesas which line the foot of the mountain range, and composed of gravel worn from its side, are undoubtedly the remains or *débris* left at the foot of the melting glaciers which once plowed these mighty mountain slopes. I have not said a word of Manitou and its wonderful cluster of springs, some boiling or appearing to boil, with escaping carbonic acid gas and rich in salts; others quiet, chalybeate and tonic. A very large hotel at Manitou is fully occupied by guests at \$28 per week, many of whom are swilling the waters until, a sarcastic wit remarks, their back teeth are continually afloat! Many are benefitted by drinking the cold and bathing in the water warmed artificially. Among others is Senator Morton, with whom we became acquainted on our way hither, and who is, or was, greatly paralyzed in his lower limbs, but has been enabled to walk without his cane after two weeks bathing, &c., as above. The soda springs present a draft of soda-water almost rivaling that of the druggist, without the syrup and cream. There are hereabout numerous objects of interest yet unexplored by us or by others. We ride now almost daily over roads that cannot be surpassed for smoothness or hardness, and yet perfectly natural highways over the plains. We are reveling in the color of the mountains, in the delightful breezes and the perfect roads. But enough, it is an endless theme! I think I am improving in health. Professor Cope is prospecting for fossils with good success in Northern Colorado, and will soon come nearer to us, when perhaps I may join him. I.

#### GATHERED.

Original.

"Thou shalt come to thy grave in a full age, like a shock of corn cometh in its season." Job v. xxvi.

As a shock of corn comes in its season,  
Fully ripe, so was he gathered. He fill'd  
The measure of his days on earth, and now  
Has entered on that endless day,—the day  
That fades not out; but, ever bright and fair  
Shines on the ransomed, and on the redeemed.  
Weep not for him: for sorrow is not his!  
His work was done, and like the truly wise  
Has gone to rest. The church will feel his loss.  
On Zion's walls a watchman; and the first  
To sound the enemy's approach:—the last  
To leave the work. Zealous he was for truth—  
Bold to proclaim it; but the life he led  
Spoke louder than his words, and, was indeed  
Most beautiful.

"The fathers where are they,  
And do the prophets ever live?" All ye  
In whom this Query may arise, so live  
As they have lived, and their footsteps follow:  
Following on to know the Lord; and He  
Will lead you in that narrow way in which  
Eternal life alone is found; and peace  
And endless joy.

Haddonfield, N. J., 8th mo. 18th, 1873.

#### WAYFARERS.

Selected.

The way is long, my daughter,  
The road is rough and steep,  
And fast across the evening sky  
I see the shadows sweep.  
But oh! my love, my darling,  
No ill to us can come,  
No terror turn us from the path,  
For we are going home.

Thy feet are tired, my daughter—  
So tired, thy tender feet;  
But think, when we are there at last,  
How sweet the rest! how sweet!  
For lo! the lamps are lighted,  
And yonder gleaming dome,  
Before us, shining like a star,  
Shall guide our footsteps home.

We've lost the flowers we gathered  
So early in the morn,  
And on we go, with empty hands  
And garments soiled and worn.  
But oh! the dear All-Father  
Will out to meet us come,  
And fairer flowers and whiter robes  
There wait for us at home!

Thou art cold, my love, and famished!  
Thou art faint and sore athirst!  
Be patient yet a little while,  
And joyous as at first;  
For oh! the sun sets never  
Within that land of bloom,  
And thou shalt eat the bread of life  
And drink life's wine at home.

The wind blows cold, my daughter,  
Adown the mountain steep,  
And thick across the evening sky  
The darkening shadows creep;  
But oh! my love, press onward,  
Whatever trials come,  
For in the way the Father set,  
We two are going home.

*The Heat of the Moon.*—The Earl of Rosse has shown by experiments that the moon not only reflects heat to the earth (which, of course, must be the case), but that she gives out heat by which she has been herself warmed. The distinction may not perhaps appear clear at first sight to every reader, but it may easily be explained and illustrated. If on a bright summer's day we take a piece of smooth, but not too well polished metal, and by means of it reflect the sun's light upon the face, a sensation of heat will be experienced; this is reflected sun heat; but if we wait while so holding the metal until the plate has become quite hot under the solar rays we shall recognize a sensation of heat from the near proximity of the plate to the face, even when the plate is so held as not to reflect sun-heat. We can in succession try, first, reflected heat alone, before the metal has grown hot; next, the heat which the metal gives out of itself when warmed by the sun's rays; and lastly, the two kinds of heat together, when the metal is caused to reflect sun-heat, and also (being held near the face) to give out a sensible quantity of its own warmth. What Lord Rosse has done has been to show that the full moon sends earthwards both kinds of heat; she reflects solar heat just as she reflects solar light, and she also gives out the heat by which her own surface has been warmed.

It may perhaps occur to the reader, to inquire how much heat we actually obtain from the full moon. There is a simple way of viewing the matter. If the full moon were exactly as hot as boiling water, we should receive from her just as much heat (leaving the effect of our atmosphere out of account) as we should receive from a small globe as hot as boiling

water, and at such a distance as to look just as large as the moon does. Or a disk of metal would serve equally well. Now, the experiment may be easily tried. A bronze half-penny is exactly one inch in diameter, and as the moon's average distance is about 111 times her own diameter, a halfpenny at a distance of 111 inches, or three yards and three inches, looks just as large as the moon. Now let a halfpenny be put in boiling water for a while, so that it becomes as hot as the water; then that coin taken quickly and set three yards from the observer will give out, for the few moments that its heat remains appreciably that of boiling water, as much heat to the observer as he receives from the full moon, supposed to be as hot as boiling water. Or a globe of thin metal, an inch in diameter and full of water at boiling heat, would serve as a more constant artificial moon in respect of heat supply. It need not be thought remarkable, then, if the heat given out by the full moon is not easily measured, or even recognized. Imagine how little the cold of a winter's day would be relieved by the presence, in a room not otherwise warmed, of a one inch globe of boiling water, three yards away! And, by the way, we are here reminded of an estimate by Prof. C. P. Smyth, resulting from observations made on the moon's heat during his Teneriffe experiments. He found the heat equal to that emitted by the hand at a distance of three feet.—*The Spectator.*

I honestly believe, that one chief reason for the fewness of conversions to Christ is, that there is so little preaching for Christ in the daily lives of his professed disciples, and such a fearful amount of direct preaching against him. Actions speak louder than words. The bad sermons of the life, are an over-match for the best sermons from the lips. The most faithful and eloquent preaching in the pulpit fails to win those who are disgusted and repelled by the unworthy, inconsistent conduct of those who claim to be Christ's representatives. Who supposes that if all the gospel proclaimed on the Sabbath was re-enforced by the eloquence of beautiful and exemplary, and useful, and holy lives, so few souls would be converted in our congregations?

The simple fact is, that every professor of christianity, every church member, is a preacher, whether he knows it or not. Every life is a sermon. Some church-members find their texts in the shop or the stock-market; and they preach (by their practice) that the chief end of life is to make money. They make more converts to mammon than to Christ. Others preach the gospel of fashion and self-indulgence. What matters it that the eighth commandment is solemnly enforced from the pulpit, if those who represent Christ to the world, are over-reaching their unconverted neighbors in business during the week? What Christians do when outside of the sanctuary, influences more characters and moulds more eternal destinies than what any one Christian can say when inside of the sanctuary, even though he were a Paul in eloquence.

Remember, my brother preacher, that a Christ-like life, is the mightiest human influence to attract souls to God. The most unanswerable argument against the subtle skepticism of the day, is the living Christian. To-day this world's sorest want is, more Christ-like men and women. The preaching it needs

not only the precept but the practice of a pure, heaven-born piety. A worldly, fashioning, covetous, cowardly church will never save men. But a church of living disciples, whose hearts have been cleansed by atoning blood, and whose lives are made beautiful by outward conflict and secret prayer, and made eloquent by noble, holy deeds—these are the preachers who shall win this wicked world to Jesus. Their voice is a trumpet. Their influence is a salt. Their example is a light. Let us be such preachers of Christ, we all need the ordination and the baptism of the Holy Spirit.—*T. L. Cuyler.*

For "The Friend"

John Heald.

(Continued from page 12.)

"6th mo. 18th, 1815. The First-day of the week. We were at a meeting at Taunton. It was large, and but few Friends. It was not long until I engaged in testimony, stating how satisfied good old Simeon was when he came into the temple and saw the Divine Master. He said, "Now lettest thou thy servant depart in peace, for my eyes have seen thy salvation, which thou hast prepared before the face of all people." I believed that many in the present day were seeking for an acquaintance with that which would satisfy, and are saying in effect, "who shall show us any good"—a humble enquiry made with earnest solicitude to obtain the craving desire of the soul. Many discouragements are thrown in the way of these poor tried ones, whose welfare and prosperity I craved. I was much encouraged and favored, as I believe, to spread encouragement among them; and hope I was thankful for the mercies conferred.

Not feeling clear without having a meeting at Foxborough, and notice having been given, a considerable meeting was had, and I was engaged in lengthy testimony, holding out the universality of the love of God to the children of men, and the necessity of Divine aid to do the great and momentous work, for we are not merely to sit still and not do anything. In this situation we should not comply with the apostle's direction, to give all diligence to make our calling and election sure.

25th. Being First-day we attended the meeting at Melford. Notice being given, many came in (the members of Society being few) and nearly filled the house. They had to me the appearance of little religion among them, but considerably dressy. I felt shut up for a considerable time, but at length I believed I might say, how should a faithful servant demean himself? I believe we shall find that a faithful servant must not go and do what he himself may desire. It is necessary that the master should direct what shall be done, and that the servant attend to the master's direction; but if he should go to doing what he himself might desire, how likely is he to do something that the master did not design should be done! I passed on from one thing to another, until I had said much. It was a solemn time.

27th. We were at Oblong Meeting, which was large, and many of the people I apprehended settled into an easy state, and waiting for a testimony from me. I at length said, it may be that I do not know the state of this meeting, but I think I know the exercise of my own mind; and I believe that at such times many lose precious time, and do not improve as they might.

29th. We were at Apoquage. It was exceedingly trying for some time, but I found way open, and said, the horse-leech has two daughters, crying give, give. There is a disposition that desires to have more and more of the bounties of Heaven, even desiring that Heaven's bountiful hand should be opened wide to supply all wants as they occur. But do suitable returns take place? Are we desirous of receiving bounties, without feeling gratitude for the same? The pious mind cannot but glow with gratitude for favors received. The meeting I thought ended comfortably. Accompanied by Daniel Quimby we went to Enoch Dorlan's and lodged near to a meeting called Beekman.

30th. Attended the same. My mind was led to consider or view a situation where it would be suitable to put a good building, but there was a building on the spot, and there was no other place to put a good one, and the one already there was insufficient, so it must be removed out of the way in the first place. I soon began with stating that in scientific knowledge there is a great difference between theory and practice, and so there is in religion a wide difference between opinion and practice. After I had said considerable, Daniel took the subject, and was favored to set it close home, and concluded the meeting in supplication."

The distinction here referred to between theoretical and practical religion, is one to which frequent reference is made in the records that have been preserved of the Christian experiences of our early Friends, and of other truly enlightened minds. We may by reading and study, build up for ourselves an apparently goodly edifice of religious doctrine, and may even indulge our self-esteem by thinking we can expound the Scriptures of Truth, and sit in the seat of judgment deciding upon the correctness or error of the views of others; and yet we may have had but little experimental knowledge in ourselves. But when through humble obedience to the light of Christ, we come to have the true force and meaning of religious truth impressed on the heart, we find that our fancied knowledge was very superficial and inadequate. William Penn, speaking of many professing Christians in his day, says: "Though they held the notions of Truth, it was not in the precious experimental sense of the holy virtue and life of it. For the Lord's coming in spirit, without sin, to the salvation of the soul, is to be waited for; that people may truly know Him and His work, and from thence speak forth His praise to others; rather than profess the enjoyments of other saints, which have been obtained through great tribulations, while they have never known this in themselves, and so, can have no true sense of an acceptable sacrifice of God's preparing."

William Penn bears this testimony to his father-in-law, Isaac Pennington. "Though he was advanced above many in his knowledge of scripture, and had formerly received many heavenly openings of Truth's mysteries; yet, did the Lord's way of appearance disappoint his expectation. And when the light broke forth in his heart, which his sincerity longed for, he found in himself a great mixture; and that he had much to lose and part with, before he could become that blessed little child, that new and heavenly birth, which inherits the kingdom of God. With an humble and broken spirit, he fell before this

holy appearance of Jesus,—that true light of men, whose power and life he felt revealed within him, to the saving of his soul; and boldly confessed this spiritual coming of the great Messiah, who was able to teach him all things; to His name his knee truly bowed, and with Nathaniel he could cry, 'Thou art the Son of God, thou art the King of Israel.' Now he saw clearly between the precious and the vile in himself, between that which was truly of God in his former exercises, and that which was merely of man: he was not stiff nor stout in defence of his own building, and former apprehensions; no, but sold all for 'the pearl of great price,' and became willingly 'poor in spirit,' that he might enter 'the Kingdom of God.' Thus, parting with all he had not received of God, he received a new stock from heaven, wherein the Lord prospered him; the dew of heaven rested on his branch and root, he grew rich and fruitful in all heavenly treasure; full of love, faith, mercy, patience and long-suffering: diligent in the work of the Lord, and his duty to God and man."

John Heald, after mentioning the attendance of Westbranch Meeting, Seventh month 1st, where the discouraged were called upon to make one more effort, and to ask for help in humble prayer, makes these remarks on his own state of mind. "I have felt much resigned to my lot for a considerable time, and much love in my mind to reach to many places where we have not been, nor expect to go, and yet I believe I could cheerfully go and spend considerable time more before I return home, if it were required of me; but at present I feel no such necessity. Love, though good, is not a sufficient inducement, without a sense of duty, to lengthen labor. The time draws on towards a close of labor here at present."

(To be continued.)

For "The Friend."

As a further evidence of declension amongst us, and a tendency to return to the weak and beggarly elements from which our early Friends were led by the guiding hand of Truth, some may have noticed at various times in one or more of our leading periodicals, advertisements similar in character to the one now selected, "A young Friend requires a re-engagement as Governess, teaches English, French, German, Music\* and Drawing." The word music is of course what attracted the attention of the writer as obviously at variance with one of our long established testimonies against a vain and useless practice of the world. How any one in membership with us could so far deviate as to consider this either a recommendation or accomplishment, seems incomprehensible, and certainly betrays a weakness and lack of principle most sorrowfully apparent. How periodicals, edited and published by Friends, are made the medium of conveying such intelligence, is also a matter of surprise that should arouse enquiry on both sides the Atlantic, as one of serious concern, touching the well-being and preservation of our Society on its original basis; or is it of so little importance as to be lightly passed over by those whose duty it should be to see that our members, either privately or publicly, are kept within the proper limitations of ancient recognised Gospel order?

It has become quite common of late for some of our younger members, in different

\* Italics are ours.

places, to indulge in what is termed "devotional music" in "family worship," at a few of our meetings in the West occasionally, and at other times, and meeting with the approbation and encouragement of some older members, the practice is growing and extending; others making a high profession or holding important positions in Society, have their children taught singing, &c., and keep musical instruments in their houses, thus helping to develop a taste productive of evil, and causing a wide spread departure from the simplicity, spirituality and purity of public and private worship, and bringing reproach on our former profession. One after another of our testimonies are being trampled upon, until we are gradually assimilating to the maxims and customs of the world, so that many who long for the restoration of our Zion, have to go mourning on their way. Various are the devices of an unwearied enemy, to captivate and lead astray from the paths of rectitude and safety; and not the least are those which please the outward eye and ear. As our thoughts are turned inward and our minds preserved in watchfulness and in a state of preparation to receive the Heavenly Visitor, there will be no craving to indulge in anything unlawful. Whenever we feel constrained to ascribe praise, or use the sacred name of our God in public, words of solemn import and suited to the occasion will be given us, which will have access and ascend to the Divine Presence as incense, and when the servants of the Most High are wont to make melody, their songs will be those which proceed from the inner sanctuary of the heart, too deep, pure and holy, for human utterance.

J. B.

Richmond, Ind., 8th mo. 17th, 1873.

*Vegetable Instinct.*—If a pan of water be placed within six inches of either side of the stem of a pumpkin or vegetable marrow, it will in the course of the night approach it, and will be found in the morning with one of the leaves on the water.

This experiment may be continued nightly until the plant begins to fruit. If a prop be placed within six inches of a young convolvulus, or scarlet runner, it will find it, although the prop may be shifted daily. If, after it has twined some distance up the prop, it be unwound, and twined in the opposite direction, it will return to its original position or die in the attempt; yet, notwithstanding, if two of these plants grow near each other, and have no stake around which they can entwine, one of them will alter the direction of the spiral and they will twine around each other.

Duhamel placed some kidney beans in a cylinder of moist earth; after a short time they commenced to germinate, of course sending the plume upward to the light, and the root down into the soil. After a few days the cylinder was turned one-fourth around, and again and again this was repeated, until an entire revolution of the cylinder was completed. The beans were then taken out of the earth, and it was found that both the plume and the radicle had bent to accommodate themselves to every revolution, and the one in its efforts to ascend perpendicularly, and the other to descend, they had formed a perfect spiral. But although the natural tendency of the roots is downwards, if the soil beneath be dry, and any damp substance be

above, the roots will ascend to reach it.—*Late Paper.*

Selected.

There are many publications, in this day, that have a tendency to corrupt the mind; if we read the Scriptures they will draw us nearer to God than any other volume. In the records of our dear Saviour's life and death, we shall perceive where the Master's feet have trod; and in reading his sufferings with attention, the youthful mind is often moved and tendered, and in great humility brought nearer to his pure spirit in the heart.—*Mary Hagger.*

A new and important fact in silk-culture has been developed by the Acclimation Society, France, namely, that silk of varied color can be produced by feeding the silkworm on different leaves. Worms fed on vine leaves produce a silk of a magnificent red color. Lettuce has been found to produce an emerald-green colored silk.—*Late Paper.*

Strive against a fretful, complaining disposition.

## THE FRIEND.

NINTH MONTH 6, 1873.

What a blessing is health! how essential to our enjoyment of all it was originally intended that life should bestow!

In its true signification, health implies perfection of organization, fulness of animal life, and harmony in the performance of the functions of the several organs in our "fearfully and wonderfully made" bodies. To make it complete in man there must be corresponding intellectual energy, and the presence of sound and well-applied moral principles; "a sound mind in a sound body." Where the whole system is in a healthy condition, and the senses awake, vitality, and nervous excitement seek to manifest themselves in action more or less forcible and continuous; producing, especially in children, a pleasurable mobility, changed into distressing restlessness, when the effort is made to suppress it long, by the action of the will. In the lower animals where there is a state of health, it is a condition of enjoyment, the sense of existence being a pleasure. It is reasonable to suppose that health was originally designed to be the abiding state of every organized being, as we see it exemplified in the lower orders living in a state of nature. With them it is the almost universal rule, and disease the exception. But when they are domesticated, and the accidents of life—food, shelter, &c.,—are changed, they too suffer from sickness, and often do not live out the allotted period of their existence.

The body of man is made up of the same elements, and is subject to very much the same laws as those of other animals, and there does not appear any sufficient reason to doubt that if he had lived in accordance with what are called the laws of nature, and with the requirements of christian civilization, he too would have enjoyed an equal exemption from disease as that of other members of the animal kingdom. But the general and continued violation of these requirements in successive

generations, has, in very many, permanently deranged the original healthful condition of some one or more of the organs, interrupting the proper performance of their functions, and often transmitting from parents to child a physical system that precludes the enjoyment of that harmonious action in all its parts which is necessary to health. Every practical disregard of the laws established by the great Creator for the government of his creatures is followed by its appropriate punishment, and hence it is that such disregard of those regulating the healthful operation of the various organs constituting the human body, has inflicted on so many the languishing of disease; and thus also the sin of the parents is at times visited on the children, to the third and fourth generation.

If we believe that life is a boon bestowed by our Father in heaven, designed to confer happiness here, and to afford the opportunity to secure it hereafter, it certainly assumes the character of an imperative duty to do what we can to preserve and cherish it, by guarding against whatever may tend towards its impairment or loss, or to defeat the object for which it was conferred. Hence to endanger health by neglecting the means by which it may be promoted, to destroy it by bad habits or vicious indulgences, or to disregard the means by which it may be restored when lost, is to go counter to the will of Divine Providence, and to be in measure accessory to our own premature death. It is our reasonable duty not to thwart the design of the Almighty in our creation; there are also manifold relative and social duties due to our families, our friends and to society, and we ought to feel ourselves restrained from every thing that we have a good reason to believe must prevent or diminish the value of the service we are called on to render; and few things are more likely to do this than the presence of disease. But though these are generally admitted truths, yet, we think, there must be few who observe the manners and customs attendant on the present modes of life, in what claims to be enlightened and refined society, but who must be sensible how many things are not only tolerated, but persistently adhered to, which both science and experience teach us are injurious to health, and often productive of serious disease.

Without attempting to dilate on a subject, the exposition of which might extend to a volume, we may briefly refer to two or three prolific causes of disease, which are very common and yet easily preventable; with the hope it may induce our readers to reflect upon them, and perhaps stimulate some of them to apply a remedy.

We know that air is essential to the continuance of life, at least to independent life. It is indispensable that the oxygen it contains should be brought into contact with the blood, in order to change it from venous to arterial, and this is done by breathing. Health depends largely upon the purity and amount of the air we inhale. Where the atmosphere around us is pure, we naturally inflate the lungs fully by deep inspiration; where it is vitiated by too large a portion of carbonic acid, thrown off at every exhalation, or by noxious emanations from other sources, we as naturally breathe less frequently and deeply, from an instinctive sense that poison of some kind is being introduced into the system. And yet how deficient are the means generally resorted

to supply our dwellings with fresh, pure air, and to remove that which has been used and vitiated; or even to rid our places of common resort—meeting houses, school houses and lecture rooms—from the poisonous and fetid atmosphere produced by large assemblies. An individual cannot, with impunity, breathe over and over again, the air which he has contaminated with the exhalations from his own lungs; how much greater must be the damage incurred by respiring air loaded with the exhalations from the lungs of hundreds, shut up in a closed apartment without free ventilation. However small the rooms in our houses may be, they are as healthful as large ones if care is successfully taken to have them well supplied with fresh air.

The wearing of a veil close over the face is productive of the same bad effect, of drawing back into the lungs the carbonic acid and other impurities that have just been expelled. Food is as indispensable to life and health as air, though we can go much longer without the former than the latter. The body is constantly changing. A new creation is going on from day to day, similar to that which built up the system from its primordial cell, and the effete or worn out debris is carried away. A sufficient supply of food is therefore necessary to renew the matter required to repair the waste in the different tissues. Our natural food is furnished from the vegetable kingdom, either direct, or after it has already been converted into flesh by the living principle, through the chemistry carried on in the body of another animal. There can be little doubt that generally too much of it is taken in the latter concentrated form, and that many of the modes of preparing it, and the condiments used, which while they stimulate the appetite often induce overfeeding, are inimical to the enjoyment of good health. Bread is very generally deprived of its saccharine matter in the grain, and of other nourishing properties, the flour being too closely bolted, and too long subjected to the fungoid growth springing from the yeast mixed in it. Alcoholic stimulants should never be resorted to, unless required to assist nature in throwing off disease, and when they should be prescribed with the same care and precision as other medicines. Tobacco or other narcotics weaken the action of the heart, and prey upon the whole nervous system: they are directly poisonous.

The light of the sun is an important element of life and health, essential to nearly all animals as well as plants on the surface of the earth. Our houses are now constructed much better than formerly, for availing of this powerful agent in producing and maintaining health. But how many allow custom or fashion to exclude the golden sunlight, and darken the apartments they live in by large and thick curtains or blinds; not thinking, at least, not regarding the well ascertained fact, that the deep shade, with its accompanying gloom, soon lessen vitality, and if long continued, produce enfeebled circulation of the blood and palor, consequently loss of elasticity and vigor; dear payments for retaining the color of carpets, or for the general effect given sumptuously furnished rooms.

As regards clothing we need hardly say more than that the unreasoning tyranny of fashion exacts in this professedly christian community of ours, from thousands, the use of some kinds of garments, with their adorn-

ments, and the disuse of others, which almost insure prolonged wretchedness from resulting disease, and often death; especially among the tenderer sex, and the children of the rich and those who ape their follies.

As the various organs of our complicated system require the stimulus of action, it is indispensable to full health there should be daily exercise of brain, nerves and muscles. Hence idleness and sluggishness predispose to disease, and honest labor of both body and mind is needful for the full enjoyment of health in every one. Excessive labor, whether as regards exertion or time, especially if performed in a close impure atmosphere, exhausts the vital force below the point of easy or speedy recuperation, and thus induces disease. This is more especially the case in brain-work, and hence it is we so often see merchants and other business men who devote themselves unremittingly and absorbingly to their occupations, in a state of chronic indisposition. Their daily anxiety and care demand an exhaustive expenditure of nervous power, and affect all the vital functions: disordering the digestion, contaminating the blood, and if not resulting in sudden death from paralysis, or some disease of the heart, oftentimes rendering life burdensome by general weariness and distress, sometimes with failure of intellectual powers.

It is commonly admitted that vice and crime entail misery and disease; but there is much in the accompaniments of our present imperfect civilization which does not come under either of these heads, as they are commonly understood, that materially interferes with the natural processes of that mysterious entity which we call life, and insidiously but surely undermines health and shortens the number of our days. Man was not created to pine with sickness and prematurely die; but to employ all his faculties with vigor, and live out the full period of his probation. Did Christianity reign supreme throughout the different ranks of society, did each one love his neighbor as himself, and we all acted up to the obligation of whether we eat, or whether we drink, or whatsoever we do, to do all to the glory of God, most of the sources of disease would be removed, and, in time, we cannot doubt, that health and happiness would be the lot of all.

#### SUMMARY OF EVENTS.

FOREIGN.—On the night of First-day the 24th ult., a terrific storm swept over Nova Scotia. Halifax dispatches report the destruction of life and property on land and sea as very great. On the land barns were blown down, crops destroyed and cattle killed, and there was reason to believe that many vessels were lost at sea with all on board. The fishermen on the eastern coast of the province have suffered severely, all having lost their boats, fishing tackle, &c., from Greysboro to Cape Canso. At Cape Canso sixty-two buildings were blown down, twenty-three vessels were ashore in the strait of Canso, and many on other parts of the coast. A large number of vessels are ashore on the north side of Prince Edward's Island, and probably there have been many wrecked with serious loss of life. The total loss of property on land and at sea would probably reach several millions of dollars.

The expedition which is laying the cable between Lisbon and Rio Janeiro, after having proceeded 383 knots, was stopped by the discovery of a fault in the cable. Tests show that the fault is near the land. The expedition will pay out to Madeira, whence the cable steamer will probably return to repair the fault.

A special dispatch to the London Telegraph says, the cholera is raging in Hungary, and that one half of the cases prove fatal.

A Bayonne dispatch says: Don Carlos has issued a stringent order against interference by his forces with

railroad communication, and the penalty of death is decreed for violation of this order. The Carlists are repairing the telegraph lines in the north of Spain.

Cartagena is completely invested on the land side by the Republican army. The republican fleet is in the offing under Admiral Lobos, but it is reported that a mutinous spirit prevails in the squadron. The insurgents are resolute, and use every effort to make the place impregnable. They liberated all the Carlist prisoners in that city. The Carlists in turn liberate all the Communist prisoners who fall into their hands.

A severe engagement is reported near the town of Estella, between five thousand government troops and three thousand Carlists, in which the latter were defeated. The village of Tortella has been entirely destroyed by the Carlists. Fraga in Aragon has been taken by the Carlists, and a Bayonne dispatch says they have resumed the siege of Bilbao. A part of the government forces in the north of Spain have mutined. The Cortes has rejected a proposition to grant immunity to the Communist insurgents by a vote of 119 against 42. The government has presented a bill in the Cortes calling into the army all males between the ages of twenty and thirty-five years.

The London Times of the 29th ult., has an editorial on the iron question, the burden of which is that the trade in iron, long so valuable to England, is being gradually closed to her. The United States now compete successfully for the control of the iron traffic with Canada, South America, and the West Indies. The Times thinks much of the blame for this state of things should fall upon the strikers and trades unions.

The British government has decided to send an expedition from Cape Coast Castle against the Ashantees, in order to drive them home during the next cool season.

Sir Samuel Baker and party have reached Cairo on their return from the expedition into the interior of Africa.

The trial of the Bank of England forgers was concluded on the 26th ult. George Bidwell, Austin Bidwell, George MacDonnell and Edwin Noyes, were found guilty, and severally sentenced to penal servitude for life.

The report of the British Registrar-General, together with the census returns, establish the fact that the average duration of life in England is nearly forty-one years. Since the commencement of the century there has been a marked increase in the average length of life.

London, 9th mo. 1st.—Consols 92½. Liverpool.—Uplands cotton, 8½d.; Orleans, 9½d. Sales 12,000 bales. Breadstuffs firmer.

A dispatch has been received at Toronto, from the Magdalen Islands, stating that fifty vessels, British and American, were wrecked in the gale of the 21st ult.

The French Minister of the Interior has sent a circular to the Prefects of the Departments of France, directing them to prohibit demonstrations on the 4th inst., the anniversary of the proclamation of the Republic.

A special session of the Cabinet Council has been held to consider what measure the government may take to allay the discontent caused by the high price of bread.

The old custom of making pilgrimages to holy places has been revived among the Catholic inhabitants of France. During the past three months the railroad companies have sold 360,000 tickets to religious pilgrims.

A Berlin dispatch says, the Roman Catholic Bishop Koltz, has been sentenced to pay a fine of 400 thalers for infraction of the ecclesiastical laws, in appointing clergymen without obtaining the sanction of the State authorities.

A Vienna dispatch says: "There is great dissatisfaction with the results of the Exposition. It is alleged that those who know how the prizes were secured will attach no value to the medals awarded. An English firm has refused to accept the offered medal. About 30,000 medals were awarded to exhibitors, of which 400 go to Americans."

An Antwerp dispatch of the 26th ult. says, a great conflagration was occasioned here last night by a stroke of lightning which set fire to one of the largest warehouses in the city, and this, with the surrounding buildings, was destroyed. Loss about \$400,000.

The Cuban insurgents prolong the struggle. In an engagement near St. Jago de Cuba, sixty of the Spanish troops were killed.

Paris dispatches of the 30th ult. says: It is reported that the government will pay to Germany the last instalment of the war indemnity on the 14th of Tenth month.

The trial of Marshal Bazaine, which will be held at Trianon, will commence on the 6th of Tenth month.

The *Journal des Debates* has a significant article from the pen of Lemoine, in which the writer expresses the opinion that a Republic is impossible, and France must have a liberal monarchy. The Count de Chambord must give a constitutional charter, or a monarchy under him would be as impossible as a Republic.

The British fleet in Cartagena has taken possession of the Spanish iron-clads Alamanza and Vittoria, which had been seized by the insurgents. The British Vice-Admiral Yelverton proposed removing these vessels for safe keeping to Gibraltar, but on notice being given to the insurgent Junta of his intentions, he was informed that the forts would open fire upon the British vessels if the attempt was made. It was however expected that the insurgent Junta would propose a compromise, by which they should consent to the removal of the iron-clads on condition that they be held at Gibraltar, and not surrendered to the Madrid government until the differences with the insurgents at Cartagena are settled.

**UNITED STATES.**—During the year ending 6th mo. 30th, 1873, the net receipts from customs were \$188,089,522.70; from internal revenue, \$113,729,314.14; from sales of public lands, \$2,882,312.38; from miscellaneous sources, \$29,037,055.45. Total receipts \$333,738,204.67.

In the same time the expenditures were as follows:  
 For premium on purchase of bonds, . . . \$5,105,919 99  
 For civil and miscellaneous purposes, . . . 73,328,110 06  
 For War Department, . . . 46,323,138\*31  
 For Indians and pensions, . . . 37,311,131 74  
 For Navy Department, . . . 23,526,236 79  
 For interest on the public debt, . . . 104,750,688 44

Total expenditures, . . . \$290,345,245 33  
 The net reduction of the public debt during the fiscal year was \$43,667,630.05.

In New York last week there were 613 interments, in Philadelphia 310, and in St. Louis 204. Of the deaths in Philadelphia 131 were under two years of age, 31 cholera infantum, 32 consumption, and 11 old age.

During the Eighth month the quantity of rain which fell in Philadelphia measured 12.29 inches; the average rainfall of that month during the past thirty-six years having been 5.07 inches. Thus far during the year the rainfall has measured 41.58 inches; as the mean annual rainfall at Philadelphia is 46.07 inches, the present year will probably largely exceed the average of the past.

On the first inst. the total debt of the United States, less cash in the Treasury, was \$2,140,695,365, having been reduced \$6,752,820 during the Eighth month.

**The Markets, &c.**—The following were the quotations on the first inst. *New York*.—American gold, 115½. U. S. sixes, 1881, 119½; ditto, 1868, 118; ditto, 10-40 5 per cents, 113½. Superfine flour, \$5.10 a \$5.70; State extra, \$6.30 a \$6.80; finer brands, \$7 a \$10. White Michigan wheat, \$1.77; red western, \$1.67; No. 2 Milwaukee spring, \$1.50; No. 2 Chicago, \$1.48. Oats, 43 a 47½ cts. Yellow corn, 62 cts. *Philadelphia*.—Middleling cotton, 19½ a 20½ cts. for uplands and New Orleans. Superfine flour, \$3.50 a \$4.50; finer brands, \$5 a \$10. Western red wheat, \$1.60 a \$1.63. Rye, 80 a 85 cts. Yellow corn, 62 cts. Oats, 39 a 45 cts. Lard, 8½ a 9 cts. Clover-seed, 9½ a 10 cts. The market for beef cattle dull. Receipts 3,261 head. Choice and extra sold at 6½ a 7½ cts. per lb. gross; fair to good, 5 a 6 cts., and common, 3½ a 4½ cts. Sheep sold at 4½ a 5½ cts. per lb. gross. Receipts 17,000 head. Corn fed hogs, \$6.75 a \$7.25 per 100 lb. net. Receipts 6,000 head. *Chicago*.—No. 1 spring wheat, \$1.18½; No. 2 do., \$1.14; No. 3 do., \$1.10½. No. 2 mixed corn, 40½ cts. No. 2 oats, 27½ cts. Rye, 68 cts. No. 2 fall barley, \$1.20. *St. Louis*.—No. 2 winter red wheat, \$1.50; No. 3 fall red, \$1.33. *Cincinnati*.—Family flour, \$6.85 a \$7. Wheat, \$1.35. Corn, 52 a 53 cts. Rye, 76 cts. Oats, 33 a 40 cts. Lard, 8½ cts. *Milwaukee*.—No. 1 spring wheat, \$1.21½; No. 2 do., \$1.18. No. 2 oats, 27½ cts. No. 2 mixed corn, 40½ cts. *Detroit*.—Extra white wheat, \$1.65; No. 1 white, \$1.56½; amber, \$1.46. No. 2 corn, 47½ cts. White oats, 33 cts.

#### WANTED

A teacher in the classical department on the boys' side at Westtown School.

Application may be made to

Thomas Conard, West Grove, Chester Co.  
 Joseph Walton, Philadelphia.  
 William Evans,  
 Charles Evans,

#### RECEIPTS.

Received from Elwood E. Haines, N. J., \$2, vol. 47; from James Heald, O., \$2, vol. 47; from S. E. Haines, Pa., \$2, vol. 47; from Samuel F. Troth, City, \$2, vol. 47; from Abraham Gibbons, Pa., \$2, vol. 47; from Mary J. Cresson, Pa., \$2, vol. 47; from Jane Ann Passmore, Pa., \$2, vol. 47; from George Pandridge, Pa., \$2, vol. 47; from Levi B. Stokes, City, \$2, vol. 47; from David Darnell, N. J., \$2, vol. 47; from Jeremiah Foster, R. I., \$2, vol. 47; from Deborah D. Horney, Ind., \$2, vol. 47; from Charles Stokes, Agent, N. J., for Mark Haines and Rachel E. Haines, \$2 each, vol. 47; from Phebe C. Parker, Pa., \$2, vol. 47; from George Haines, N. J., \$2, vol. 47; from Henry Knowles, Agent, N. Y., for David Peckham, Alonzo Knowles, and Chester A. Weaver, \$2 each, vol. 47, and for Levi Youmans, \$2, to No. 4, vol. 48, and Joseph Collins, \$3, to No. 27, vol. 48; from William R. Taber, N. Y., per Nicholas D. Tripp, \$2, vol. 47; from William D. Stephen, O., \$5, to No. 27, vol. 48; from Dr. George Thomas, Pa., \$2, to No. 24, vol. 48, and for J. Preston Thomas, \$2, to No. 23, vol. 48, and Richard M. Thomas, Jonah Ogilsbe, and Enos Morris, \$2 each, vol. 47; from Joshua Embree, Pa., \$2, vol. 47; from Mary Thistlethwaite, N. Y., \$2, vol. 47; from Sarah Heald, Io., \$2, vol. 47; from Jonathan Fawcett, O., \$2, vol. 47; from Benjamin W. Passmore, Agent, Pa., \$2, vol. 47, and for Nathan Pennell, Rebecca Larkin, Sarah Larkin, Caleb E. Thomas, Caleb Webster, Rebecca Trimble, Rachel Hill, and Harvey Thomas, Pa., and Amanda Gallimore, O., \$2 each, vol. 47; from Richard B. Bailey, Pa., \$2, vol. 47; from Aaron Sharpless, Pa., \$2, vol. 47, and for Sidney Sharpless and Thomas Sharpless, \$2 each, vol. 47; from Harriet J. Smedley, City, and Joseph W. Jones, Pa., per Edward C. Jones, \$2 each, vol. 47; from Thomas Wistar, City, \$2, vol. 47; from Pemberton Moore, Pa., \$2, vol. 47; from William H. Walter, Pa., \$2, vol. 47; from William Neal, City, \$2, vol. 47; from Jane H. Pickering, N. J., \$2, vol. 47; from Lydia T. King, Pa., \$2, vol. 47, and for Joseph E. Mickle, \$2, vol. 47; from John R. Tatum, Del., \$2, vol. 47; from William P. Smedley, Pa., \$2, vol. 47; from Phebe McBride, Io., \$2, vol. 47; from Sarah L. Passmore, Pa., \$2, vol. 47; from James W. McGrew, Agent, O., \$2, vol. 47, and for Mark Willits, John Hoyle, Amasa Negus and James Edgerton, \$2 each, vol. 47; from Parker Hall, Agent, O., \$2, vol. 47, and for Nathan Hall, William Hall, Jr., James McGrail, John W. Smith, Lewis Taber, Lindley Hall, Jonathan Binns, Robert Smith, and Josiah Hall, \$2 each, vol. 47, and for David Thomas, \$2, to No. 27, vol. 47; from Philip P. Dunn, N. J., \$2, vol. 47, and for Thomas A. Bell, Pa., \$2, vol. 47; from Reuben Battin, Agent, Pa., \$2, to No. 10, vol. 48, and for Sarah Minard, \$2, to No. 11, vol. 48, George Schill, Theodore Hess, Henry Brackman, and Abel McCarty, \$2 each, vol. 47, Aaron McCarty, \$2, to No. 43, vol. 47, Joseph McCarty, \$2, to No. 44, vol. 47, and Jesse McCarty, \$2, to No. 12, vol. 48; from Samuel Shaw, O., for Jehu Allman, Barak Ashton, Jason Tullos, Job Huestis, John Lipsey, and James A. Cope, \$2 each, vol. 47, and for Eliza Stock, \$2, to No. 19, vol. 48; from Jordan Ballard, O., \$2, vol. 47, and for Elijah Haworth and John A. Oren, \$2 each, vol. 47; from Phebe Jacobs, Pa., \$2, vol. 47; from Edward Stratton, Agent, O., 50 cents, to No. 52, vol. 47, and for Sarah Taylor, \$2.50, to No. 16, vol. 46, and Abel H. Blackburn, Mary S. Barber, Joseph Taylor, William H. Blackburn, Merab Hall, and Wilson Hall, \$2 each, vol. 47; from Josiah Bacon, City, per Samuel H. Roberts, \$2, vol. 47; from Andrew Moore, Pa., \$2, vol. 47; from Charles Burton, Pa., \$2, vol. 47; from Elizabeth D. Meredith, Pa., \$2, vol. 47; from George Brinton, Pa., \$2, vol. 47; from Henry R. Woodward, N. J., \$2, vol. 47; from Joshua Jefferis, Pa., \$2, vol. 47; from James Embree, Pa., \$2, vol. 47; from Stoddell Stokes, Pa., \$2, vol. 47; from Samuel Trimble, M. D., \$2, vol. 47; from Edward Michener, Pa., \$2, vol. 47; from Lydia G. Allen and Nathan Garrett, Pa., \$2 each, vol. 47; from Joel Wilson, Agent, N. J., \$2, vol. 47, and for Mary Thorn, \$2, vol. 47; from Joseph Matlack, Pa., \$2, vol. 47; from Thomas Conard, Agent, Pa., for Thomas Passmore, Samuel Hoopes, and Amos E. Whitson, \$2 each, vol. 47; from Micajah M. Morlan, Agent, O., for Benjamin Antrim and Mary J. French, \$2 each, vol. 47, and for Anna Macey, \$4, to No. 52, vol. 47; from John Brantingham, O., \$2, vol. 47, and for Isaac Cope and John A. Cope, \$2 each, vol. 47; from Hannah Roberts, Pa., \$2, vol. 47; from John Forsythe, Pa., \$2, vol. 47; from Daniel Williams, Agent, O., for Pusey Wood, Isaac Mitchell, Jacob Holloway, Asa Branson, Mary Chandler, Julianna H. Branson, Mary Ann Holloway, Sarah Purviance, Joseph Bailey, Joseph H. Branson, Joseph Walker, Ephraim W. Holloway, Stephen Hobson, and John C. Hoge, \$2 each, vol. 47;

from Daniel Williams and Stephen Hobson, Agent O., \$2 each for Rachel Arnold, to No. 52, vol. 47; for Thomas Bundy, O., per Stephen Hobson, Agent, \$2, vol. 47; from Ezra Engle, N. J., \$2, vol. 47; from J. W. South, M. D., N. J., \$2, vol. 47; from Marsha Fell, Pa., \$2, vol. 47; from Isaac Cowgill, O., \$2, vol. 47, and for Joseph Cowgill, \$2, vol. 47; from Amc Lee, Pa., per Jesse Hall, \$2, vol. 47; from Phebe J. Haines, N. J., \$2, to No. 11, vol. 48, and for Caleb J. Haines, and Juliana Powell, \$2 each, vol. 47.

*Remittances received after Fourth-day morning will not appear in the Receipts until the following week.*

#### WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to CHARLES J. ALLEN, Street Road P. O., Chester Co. Pa. Applications may also be left with JACOB SMEDLEY 304 Arch St., Philadelphia.

#### WESTTOWN.

A Special meeting of the Committee on Instruction will be held on Fourth-day, the 10th inst., at 2 o'clock P. M., in the Committee-room on Arch St. General and punctual attendance is requested.

#### WANTED

A teacher for a small Monthly Meeting School, Fallsington, to commence immediately and teach three months. Compensation \$22 per month and board. Apply to JAMES H. MOON, Fallsington, Bucks Co. Penna.

#### EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of Tenth month.

Application may be made to

Elton B. Gifford, 28 North Third St.  
 Ephraim Smith, 1013 Pine St.  
 James Bromley, 641 Franklin St.  
 Richard J. Allen, 472 North Third St.

#### FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNESASSA, NEW YORK.

A Friend and his wife are wanted to take charge of this Institution, and to manage the farm connected with it. A teacher of the school will also be wanted at the commencement of the Fall term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.  
 Joseph Scattergood, 413 Spruce St., Philada.  
 Aaron Sharpless, Street Road P. O., Chest Co., Pa.  
 Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

*Near Frankford, (Twenty-third Ward,) Philadelphia* Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 9th of Eighth month, 1873, at his residence, near Marlborough, Stark Co., Ohio, SAMUEL CARR, in the 86th year of his age, a member of Upp Springfield Monthly and Marlborough Particular Meeting. He bore a short but painful illness with remarkable patience and resignation, often expressing his belief that his time was come; also his willingness to depart this life. He passed quietly away, leaving his relatives and friends the comfortable assurance that his end was peace. Of this dear Friend it might be said his light shone more and more unto the perfect day, evinced by his increased care over his conduct and conversation. "Be ye also ready, for in such an hour ye think not, the Son of man cometh."

—, on the morning of the 15th ult., at his residence in Chester Co., Pa., of a protracted illness BENJAMIN MAULE, in the eightieth year of his age highly esteemed elder and member of London Gro Monthly and Particular Meeting. His soundness of principle and consistency of practice endeared him to his family and very many friends. "Blessed are they which die in the Lord, from henceforth; ye saith the Spirit, that they may rest from their labors and their works do follow them."

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, NINTH MONTH 13, 1873.

NO. 4.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Single copy, when paid quarterly in advance, five cents.

For "The Friend"

John Heald.

(Continued from page 21.)

"7th mo. 2d, 1815. At Oswego Meeting, we were divinely favored together; a time to be remembered. I began with: How do you think our hearts and minds should be disposed, when we present ourselves before the most high God, to make an offering to Him? I went on with a pressing invitation to the path to close in with the heavenly call, and enlarged on what the Queen of Sheba admired so much. When she saw the waiting of Solomon's servants, and the attendance of his ministers, there was no more strength left for her. [I expressed the desire] that others should be induced to see what I believed was signified by the waiting of the servants, each in his or her place; and the attendance of the ministers, each in his or her own service; the attention such are giving, drawn forth in gospel love. Could individuals but witness how these part with their connections, as husbands with their wives, and wives with their husbands, and these with dear and tender children, desirous to meet again, if the will of God be such, but if not, that the survivors may be enabled to say, thy will be done, O Father; and when these come and attend faithfully to their duty, laboring in the ability received, would they suppose all] this to be for the entertainment of an assembly for an hour, affording delight, and then [for the impression] to pass away like an early dew or a morning cloud, and leave scarcely a trace in the minds of many?"

5th. Attended the meeting at Peekskill. It was dull for some time and trying. I said: I suppose we almost all believe that religious meetings are designed and intended to worship the Lord our maker; but are they answering the end for which they were instituted. This I believe it becomes us to consider. The Divine Master has left the clearest testimony on this subject I ever met with in my reading. He said the hour cometh and now is, that the true worshippers shall worship the Father in spirit and in truth. He moreover added, for such the Father seeketh to worship Him. I believe it is very possible for form to take place so that nothing of the substance remains. Thus I believe preaching,

praying, and singing, as well as sitting in silence, may be all formally done, but what will the profit be? Is it not like people coming together to do a piece of business, and pretending at it and doing nothing, no more it may be than to talk about it and go away, having only the outside appearance? Can we suppose that such an offering will be acceptable to a God who sees the very secrets of the heart, and knows whether there is sincerity there or not? It was a close, searching time, and formality was examined in divers ways, and the meeting ended solemnly.

6th. We attended the meeting at Croton. It was not large, and mostly of others than Friends. My exercise was lengthy. I began with, He that loveth me, I will love, but he that despiseth me shall be lightly esteemed. It is commanded, Thou shalt love the Lord thy God with all thy heart and with all thy soul, mind and strength. So it is evident, that we must love Him more than any worldly enjoyment, for the Divine Master said, He that loveth father or mother more than me is not worthy of me, and he that loveth wife or children more than me is not worthy of me. So we must love Him supremely above all earthly things, if we would obtain His love and favor. In order to worship Him acceptably, we must have our treasure in heaven, for where our treasure is, there our hearts will be also; where our treasure is, there will our adoration be paid, there our hearts and minds will go; thus to be true worshippers, we must love Him above all.

7th. Attended Salem Meeting. Death reigned, as I believe. A poorer meeting I scarcely ever sat in, for a long time; but at length I felt way to open to state several ideas, among which was, that I believed it was as impossible for a mere man to preach the gospel, as it would be for him to make a world. This I suppose we all agree is impossible, and so I believe in regard to preaching the gospel; for the gospel of Christ is the power of God unto salvation. Afterwards I held out encouragement to a tried, discouraged state, and advised to faithfulness. The meeting ended with solemnity.

8th. A rainy morning, and we are six miles from the meeting. I was somewhat unwell with a headache and cold. The Friend [with whom we lodged] had pressed us hard to go home with him, which I was not quite free to do, but we submitted to his importunity. We rode through the rain, and got well there. The meeting collected, but not large. We sat down in silence, and continued so until near the close, when I made some remarks relative to silent worship, in which I stated, that I believed I had improved more in silent meetings than from preaching; that I thought both silence and preaching were proper, each in their proper place. After meeting we dined at Daniel Sutton's, and I was informed that there had been four appointed meetings at this place in two weeks, and much counsel

given. In the meeting I had a sense that the favors bestowed had not been attended to as should have been.

10th. We had a meeting consisting of many people at North Castle, where my mind was remarkably impressed with a sense of the glitter of the world filling the mental view, and the danger attending. I said: The voice said, 'Cry, what shall I cry? All flesh is grass, and all the goodliness of man is as the flower of the field, the grass withereth and the flower thereof fadeth, but the Word of God endureth forever.' A lengthy and impressive testimony I was enabled to bear at that time.

13th. The Monthly Meeting at Purchase, which we attended. I endeavored to call the attention of the dear young people to the remembrance of the many favors conferred on them, such who have often had the visitations of Divine love renewed on their minds. I mentioned the attachment of David to Jonathan, who said, very pleasant hast thou been to me, thy love exceeding great. How he bewailed his beloved Jonathan! who followed a tall leader to the towering heights of Mount Gilboa, where was neither dew nor rain, nor fields of offering. Here he fell and many more, who followed a leader that God had left and answered no more. It was a solemn, searching time.

14th. We were at an appointed meeting at Mamaroneck. It was to me a very precious meeting. I labored to raise and encourage a diffident, tried and depressed state; and to discourage a too forward and active one. It was a much-favored meeting, and comfortably owned by Israel's Shepherd."

At Stonybrook, New Jersey, having mentioned his prospect of having a meeting, the Friend at whose house he was, he says, "enquired for my certificate, and carped at several things. I answered all his enquiries, and showed him my certificate, and withal let him know he was more exact and nice than any I had met with before; his enquiries were to me, too much like peevishness and unfriendliness. However he sent some notice about, and we staid and were kindly treated afterward." The meeting was a small one. In it J. H. spoke of worship, and in his memoranda makes this comment: "I have often had to call the attention of people to this subject, and to endeavor to impress it on their minds as closely as I could. O how much it is neglected!"

20th. At East Branch, way opened to set an inheritance in the Truth above all the splendid wealth and glittering show this world can afford. A bare subsistence with it, is to be preferred to the enjoyment of great possessions and much pomp and show without it. For if we compare one in the midst of great wealth, but in deep bodily distress, and just ready to depart out of this world, with no hope of comfort in the next; and one with little earthly riches, on the point of expiring,

and having a glorious immortality in view, how much the latter is to be preferred.

In the afternoon, at Upper Freehold, ability was given to encourage the youth in the paths of virtue, and they were told that closing in with offered mercy was the safest way to shun the paths of infidelity, which some had fallen into because they had first wilfully gone wrong."

From this place he proceeded to Philadelphia, visiting some meetings on the way, and having purchased a carriage and harness for \$45, he and his companion continued their journey home, where he arrived on the 12th of 8th mo. 1815, after an absence of ten months and fifteen days. He says: "We found all well, and had enjoyed good health during the time we were away. For these and many other favors and blessings, I feel thankful to the Preserver of men."

#### National Observatory—Description of the King of Clocks.

A Washington correspondent furnishes the following description of the great clock at the national observatory: And now about this wonderful king of clocks, which is to control such a number of subordinates in so important a matter. Suppose, after everything has been arranged and is working charmingly, that clock should suddenly stop! Would all the other clocks connected with it stop at the precise moment, or would they run on their own account and perform all manner of tricks? Who can estimate the consequences that might ensue? Well, the probability is that no great disarrangement of things and matters could follow; but such an event is not at all likely to occur. Since 1845 this clock has been in constant use, and is only stopped every tenth year to be cleaned. It is a large pendulum clock, of the kind known as "astronomical," with a silver dial and self-regulating mercury pendulum. It is inclosed in a dark mahogany case, with glass windows in the front exhibiting the dial and pendulum, while the works are covered in a sealed case to prevent dust from getting in. The clock, which, with the case and pendulum, is about five feet in height, does not stand upon the floor, but is attached by means of clamps, to a solid square granite pillar, weighing some fifty or sixty tons, which passes through the floor without touching it, and through the cellar and earth below until it reaches the solid rock. This is done to prevent any movement in the building, such as people walking on the floors and stair-cases, from jarring the clock, which is as motionless as the rock upon which it rests. It is placed in a corner of the "chronometer room," in the east wing of the building, where it is in the shade, and the stone pier to which it is attached is surrounded by a substantial railing or balustrade, to prevent contact with the clock. Nothing short of an earthquake could cause this distinguished member of the clock family to lose his equilibrium; "tick, tick, tick, tick," it has told off the seconds and the hours in times of war and times of peace, and will do so, doubtless, for many years to come. It may sound curious for me to say so, but it was really with a strange feeling of awe that I stood before this clock, which, while it shows the ingenuity of man, yet shows how vain would be his efforts to stop the hands of time. Every tick you hear is a second lost and gone—and brings

you so much nearer the grave. It knows no mercy, no delay. And the seconds make up the minutes, the minutes the hours, and hours the days, and the days make years, of which we mortals have but a scant allowance compared with time. Days go and years go, and we are no more; but the sun goes on its course, and the clock ticks on, "tick, tick, tick," for new generations; and so on, until—?

This mechanical wonder was made by the celebrated firm of Parkinson & Frodsham, of Change alley, London. It is wound up every eight days by the officer in charge of the chronometer room, and is each time wound up at precisely the same hour, minute and second. There is another clock, used in making certain astronomical observations, and held in reserve if any accident should befall the Frodsham. This was made by Bond, in Boston, and is very nearly as accurate as the celebrated English clock which gives us the American standard of time.

To furnish the exact time is not the only important task which devolves upon this clock, as we shall presently see. There are in the same room with it a number of heavy, closed boxes, arranged in rows and hollow squares, all securely locked. These contain the chronometers of the navy, used on our men-of-war when in commission, and there are in these cases about two hundred of them, every one of which is regularly wound up and kept going. Not all of these, however, are the property of the navy; some are here on trial and belong to the manufacturers, as the law demands that every chronometer shall be tested for a certain length of time before it is purchased. There are here chronometers of all kinds, of almost every famous make, and from every country. There are some very old and historical chronometers that saw service on Lake Erie and participated in Perry's victory; and quite a number have been through our late war. They are all kept constantly going and regulated by means of the standard clock in the corner; and a careful record is kept of each, showing precisely how much it gains or loses in a given period. To facilitate the regulation of these chronometers a very simple but clever contrivance is brought into play. By touching a spring on the standard clock, the vibrations of the pendulum are audibly recorded by the taps of an electromagnet, at regular intervals of one second. It would, of course, be impossible for the observer to have his eyes on the second dial of the standard clock, and on that of the chronometer he is about to compare with it at the same time; but by this arrangement he is enabled to follow with his eyes the motions of the second hand of the chronometer, while his ear tells him if these motions correspond with those of the pendulum and second hand of the large clock. In this manner he sees, every day, through all the chronometers, comparing each with the standard clock, and making up their record. When a ship of the navy goes to sea a requisition is sent for its chronometers to this place; and only such are issued as have been thoroughly tested. A statement is furnished with each, which gives the amount of time gained or lost in a given period, so that, in making observations and deductions, the deviation in the chronometer may be rectified. As the safety of a ship to a great extent depends on its chronometer, the importance of having them as near absolutely correct and exact as possible will, of course, be

seen; and that explains the great care taken of them and the reason why their record must be kept with such unfailing accuracy. To Commander James H. Gillis is at present intrusted the care of these delicate instruments and of the "standard of time," and no one else is permitted to touch the clock and chronometers, or the telegraphic apparatus in connection therewith.

Selected for "The Friend."

Extract from a sermon delivered at Stockport, Eng., by Samuel Fothergill, on the 20th of the Eleventh month, 1768.

"I confess with respect to an instantaneous work, 'I have not so learned Christ.' Far be it from me to judge another man's servant, but I have not so learned Christ, as to know it to be an instantaneous, but a gradual work. Some think there is a sudden death to sin, and a new birth to righteousness, in a moment. I have not traced the conduct of people professing the Christian religion, with an uncharitable eye; but I have often observed that instantaneous work to be of short lived continuance: I have seen some recur back again to their sins, and their latter end has been worse than their beginning. When God said, Let there be light, there was light, a succession of days and nights, the beauties of the creation were gradually brought forth, till man was made in God's image.

"I have not been destitute of some degree of religious experience; the praise I dedicate to God, the fruits to your service. Religion has worn this aspect with me, it has been a gradual work, a gradual advancement from faith to faith; but when people are enriched with unfelt truths, they call a strong persuasion of the mind, faith, when it is only an opinion. The faith that works by love, subverts the strongholds of Satan, restores people to a state of acceptance with God, impressing the features of the king of heaven upon all their actions; but this opinion, this mistaken opinion, would pass by redemption from all iniquity, the heaven of the kingdom, would lead to a variety of actions, abundance of words and professions, and set the mind afloat above that sacred heaven, that unspeakable gift, which cannot be fully uttered. The Lord preserve us from this dangerous mistake.

\* \* \* "This unspeakable gift, the religion of Jesus, works secretly, powerfully and effectually: sometimes it draws to expressions, oftentimes otherwise: the occasion of praise ceased not when there was silence in heaven for half an hour. May we so hide the word in our hearts, as to witness its progress there. I have feared the multitude of conversation has betrayed the minds of the people; been afraid of people talking away religion by frequent use, familiarizing their minds to treat the things of God not with that feeling reverence, flowing from this unspeakable gift. Far be it from me to enfeeble any mind bent after things of the greatest moment. I know I regret with you, the too general conversation of the world goes upon other subjects; and things appertaining to life and godliness, are rather objects of contempt and derision, than of that humble, reverential awe that becometh us. This is too much the case; yet there is a possibility of talking away religion, by a multiplicity of conversation, passing beyond our own light. I would rather endeavor to know what the Holy Ghost meant by that silencing in heaven for half an hour, than make religion

so cheap by conversation;—keep it in the heart; too much discourse carries off the essence of religion; keep the mind as a garden enclosed; a proper attention to this unspeakable gift, will tend more to comfort and strengthen than a profession of words which carries away the proper sensibility of our taste and condition. I know the matter requires distinction; I want not to discourage anything of an heavenly birth; but fear some have been carried out of their depth, the divine spirit of religion has been evaporated, greatly to their loss. Let not those who care for none of these things, run into discourse subversive of religion. Wisdom leads in the middle paths of judgment; and though the gift unspeakable, yet we have a right understanding of the effects upon our own minds. We know there is a sun in the firmament, we feel its warmth, it extends its light and warmth through the globe, but the utmost intent of its nature is inexplicable: the division of its rays, the source of its heat, after what manner placed in the planetary world, or how formed: these things are inexplicable. So it is with the Sun of Righteousness; but though the properties of the sun be unspeakable, we know, we rejoice in its effect; we have innumerable proofs of its existence. So the unspeakable gift, the Sun of Righteousness; to enlighten men, to guide them in wisdom, to replenish their affections, and set them on things above, though an unspeakable gift, yet intelligible, reaches the minds of men, affects them, quickens them, raises them from death and dead works, to a contemplation of those things which are of infinite importance."

#### Mason Wasps and Bees of Brazil.

In the lower part of the Mahicá woods, towards the river, there is a bed of stiff white clay, which supplies the people of Santarem with material for the manufacture of coarse pottery and cooking utensils: all the kettles, saucepans, mandioca ovens, coffee-pots, washing-vessels, and so forth, of the poorer classes throughout the country, are made of this same plastic clay, which occurs at short intervals over the whole surface of the Amazons valley, from the neighborhood of Pará to within the Peruvian borders, and forms part of the great Tabatinga marl deposit. To enable the vessels to stand the fire, the bark of a certain tree, called Caraipé, is burnt and mixed with the clay, which gives tenacity to the ware. Caraipé is an article of commerce, being sold, packed in baskets, at the shops in most of the towns. The shallow pits, excavated in the marly soil at Mahicá, were very attractive to many kinds of mason bees and wasps, who make use of the clay to build their nests with. I spent many an hour, watching their proceedings: a short account of the habits of some of these busy creatures may be interesting.

The most conspicuous was a large yellow and black wasp, with a remarkably long and narrow waist, the *Pelopæus fistularis*. It collected the clay in little round pellets, which it carried off, after rolling them into a convenient shape in its mandibles. It came straight to the pit with a loud hum, and, on alighting, lost not a moment in beginning to work; finishing the kneading of its little load in two or three minutes. The nest of this species is shaped like a pouch, two inches in length, and is attached to a branch or other projecting object. One of these restless arti-

ficers once began to build on the handle of a chest in the cabin of my canoe, when we were stationary at a place for several days. It was so intent on its work that it allowed me to inspect the movements of its mouth with a lens whilst it was laying on the mortar. Every fresh pellet was brought in with a triumphant song, which changed to a cheerful busy hum when it alighted and began to work. The little ball of moist clay was laid on the edge of the cell, and then spread out around the circular rim by means of the lower lip guided by the mandibles. The insect placed itself astride over the rim to work, and, on finishing each addition to the structure, took a turn round, patting the sides with its feet inside and out before flying off to gather a fresh pellet. It worked only in sunny weather, and the previous layer was sometimes not quite dry when the new coating was added. The whole structure takes about a week to complete. I left the place before the gay little builder had quite finished her task: she did not accompany the canoe, although we moved along the bank of the river very slowly. On opening closed nests of this species, which are common in the neighborhood of Mahicá, I always found them to be stocked with small spiders of the genus *Gastracantha*, in the usual half-dead state to which the mother wasps reduce the insects which are to serve as food for their progeny.

Besides the *Pelopæus* there were three or four kinds of *Trypoxylon*, a genus also found in Europe, and which some naturalists have supposed to be parasitic, because the legs are not furnished with the usual row of strong bristles for digging, characteristic of the family to which it belongs. The species of *Trypoxylon*, however, are all building wasps; two of them which I observed (*T. albitarse* and an undescribed species) provision their nests with spiders, a third (*T. aurifrons*) with small caterpillars. Their habits are similar to those of the *Pelopæus*; namely, they carry off the clay in their mandibles, and have a different song when they hasten away with the burthen, to that which they sing whilst at work. *Trypoxylon albitarse*, which is a large black kind, three-quarters of an inch in length, makes a tremendous fuss whilst building its cell. It often chooses the walls or doors of chambers for this purpose, and when two or three are at work in the same place, their loud humming keeps the house in an uproar. The cell is a tubular structure about three inches in length. *T. aurifrons*, a much smaller species, makes a neat little nest shaped like a carafe; building rows of them together in the corners of verandahs.

But the most numerous and interesting of the clay artificers are the workers of a species of social bee, the *Melipona fasciculata*. The *Meliponæ* in tropical America take the place of the true *Apis*, to which the European hive-bee belongs, and which are here unknown; they are generally much smaller insects than the hive-bees and have no sting. The *M. fasciculata* is about a third shorter than the *Apis mellifica*: its colonies are composed of an immense number of individuals; the workers are generally seen collecting pollen in the same way as other bees, but great numbers are employed gathering clay. The rapidity and precision of their movements whilst thus engaged are wonderful. They first scrape the clay with their mandibles; the small portions gathered are then cleared by the anterior

paws and passed to the second pair of feet, which, in their turn, convey them to the large foliated expansions of the hind shanks which are adapted normally in bees, as every one knows, for the collection of pollen. The middle feet pat the growing pellets of mortar on the hind legs to keep them in a compact shape as the particles are successively added. The little hods-men soon have as much as they can carry, and they then fly off. I was for some time puzzled to know what the bees did with the clay; but I had afterwards plenty of opportunity for ascertaining. They construct their combs in any suitable crevice in trunks of trees or perpendicular banks, and the clay is required to build up a wall so as to close the gap, with the exception of a small orifice for their own entrance and exit. Most kinds of *Meliponæ* are in this way masons as well as workers in wax and pollen-gatherers. One little species (undescribed) not more than two lines long, builds a neat tubular gallery of clay, kneaded with some viscid substance outside the entrance to its hive, besides blocking up the crevice in the tree within which it is situated. The mouth of the tube is trumpet-shaped, and at the entrance a number of the pigmy bees are always stationed apparently acting as sentinels.

A hive of the *Melipona fasciculata*, which I saw opened, contained about two quarts of pleasantly-tasted liquid honey. The bees, as already remarked, have no sting, but they bite furiously when their colonies are disturbed. The Indian who plundered the hive was completely covered by them; they took a particular fancy to the hair of his head, and fastened on it by hundreds. I found forty-five species of these bees in different parts of the country; the largest was half an inch in length; the smallest were extremely minute, some kinds being not more than one-twelfth of an inch in size. These tiny fellows are often very troublesome in the woods, on account of their familiarity; they settle on one's face and hands; and, in crawling about, get into the eyes and mouth, or up the nostrils.

Whilst on the subject of bees, I may mention that the neighborhoods of Santarem and Villa Nova yielded me about 140 species. The genera are for the most part different from those inhabiting Europe. A very large number make their cells in hollow twigs and branches. As in our own country, the industrious nest-building kinds are attended by other species which do not work or store up food for their progeny, but deposit their ova in the cells of their comrades. Some of these, it is well known, counterfeit the dress and general figure of their victims. To all appearance this similarity of shape and colors between the parasite and its victim is given for the purpose of deceiving the poor hard-working bee, which would otherwise revenge itself by slaying its plunderers. Some parasitic bees, however, have no resemblance to the species they impose upon; probably they live together on more friendly terms, or have some other means of disarming suspicion.—*Bates' Amazon.*

When the Lord called Samuel in Shiloh, the pious youth supposed the call was outward and ran to Eli, saying "thou calledst me;" but it seems the voice had struck his spiritual ear only, otherwise the high priest, who was within hearing would have heard it as well as the young prophet.—*Fletcher.*

## Obedience.

For "The Friend."

An ancient prophet of the Most High said: "Hath the Lord as great delight in burnt-offerings and sacrifices, as in obeying the voice of the Lord? Behold, to obey is better than sacrifice, and to hearken than the fat of rams." In accordance with this testimony our Holy Redeemer declared, "Not every one that saith unto me Lord, Lord, shall enter the kingdom of heaven; but he that doeth the will of my Father which is in heaven;" and again on another occasion: "Why call ye me Lord, Lord, and do not the things which I say?"

It is then clear that nothing will secure a substitute for unreserved obedience and submission to the Lord's manifested will. We may also learn from our blessed Saviour's words, John vii.: "My doctrine is not mine, but His that sent me. If any man will do His will, he shall know of the doctrine, whether it be of God,"—that thus doing the divine will is the appointed means by which poor, lost, blind man may be instructed in heavenly things, and made wise unto salvation. Our blessed Saviour has promised that the Comforter, the Holy Ghost, the Spirit of truth, shall abide with his children forever; shall dwell with them, shall be in them, shall lead them into all truth, shall teach them all things and bring all things to their remembrance. What rich and ample provision is thus made for all our spiritual needs: nothing is lacking on the Lord's part, but on ours unhappily there is too often a shrinking from the cross to our natural inclinations which would attend simple obedience to his teaching. May those who thus hesitate remember that if we stumble and fall here, there is an end of any progress in our heavenward journey, for no divided offering will be accepted, the whole heart is called for, and entire dedication and obedience are required by Him who has done so much for us.

The path of simple submission and obedience leads to true peace, and is the only one on which the divine blessing rests. The inspired prophet says, "If ye be willing and obedient ye shall eat the good of the land;" and those who take Christ's yoke upon them and endeavor to obey the gentle leadings of the Spirit and follow Him faithfully, will surely find in the end that "godliness is profitable for all things, having promise of the life that now is, and of that which is to come."

In the tender mercy and compassion of our dear Redeemer he visits his children in their early days, and invites them to give their hearts to him, and perhaps at the same time, points out some little sacrifice which he requires as a test of their love and obedience. When this is the case may none suffer the cruel enemy of their souls to deceive them with the false idea that Christ's yoke is heavy, and his cross grievous to be borne. If cheerful obedience is yielded, our Saviour's declaration will be found true, that his "yoke is easy and his burden light." More grace will be given together with a little of his sweet peace, so that such will increasingly desire that He may rule and reign supreme in their hearts, and lead them safely through the dangers, and trials and temptations of this life, and finally receive them with all his ransomed and redeemed ones into that kingdom of peace, joy and holiness which will endure forever.

X.

## "WATCHING AND WAITING."

Selected.

Watching! waiting! Lord, for thee,  
Watching for thy presence here,  
Waiting for thy coming near;  
Ope our eyes and bid us see  
That our life is hid in thee.

When our life is dark and drear,  
Watching—still at thy command,  
Waiting for a brighter land.  
Let the dayspring soon appear  
Omen of thy presence near.

When our life is bright and cheer,  
Watching, lest the Master come,  
Waiting, 'till our work be done;  
All with joy, and not with fear,  
Welcome! then thy presence near.

Welcome! Will the summons wait,  
Watching, thro' the valley's shade,  
Waiting, Thou our guide and aid,  
At early dawn or evening late,  
Ope for us the pearly gate.

Bid us freely enter in,  
Watching, then's forever past!  
Waiting—Heaven is gained at last;  
White our robes, and free from sin,  
Saviour, Lord, we'll enter in.

## LIVE TO DO GOOD.

Selected.

Live to do good; but not with thought to win  
From man return of any kindness done;  
Remember Him who died on cross for sin,  
The merciful, the meek, rejected One:  
When He was slain for crime of doing good,  
Canst thou expect return of gratitude?

Do good to all; but while thou servest best,  
And at thy greatest cost, nerve thee to bear,  
When thine own heart with anguish is oppress,  
The cruel taunt, the cold averted air,  
From lips which thou hast taught in hope to pray,  
And eyes whose sorrows thou hast wiped away.

Still do thou good; but for His holy sake  
Who died for thine; fixing thy purpose ever  
High as His throne no wrath of man can shake;  
So shall He own thy generous endeavor,  
And take thee to His conqueror's glory up,  
When thou hast shared the Saviour's bitter cup.

Do naught but good; for such the noble strife  
Of virtue is, 'gainst wrong to venture love,  
And for thy foe devote a brother's life,  
Content to wait the recompense above;  
Brave for the truth, to fiercest insult meek,  
In mercy strong, in vengeance only weak.

G. W. Bethune.

*Doctors and Medicines.*—The following authentic story of a Chicago doctor will blend amusement with instruction: We are often told that doctors never take medicine of their own or any one else's recommending. I was reminded of this a few months ago. I went into the office of one of Chicago's most celebrated physicians to obtain a prescription for a cold and hoarseness. While he was writing it out he casually mentioned that, having been out in the terrible storm of the previous day, a severe cold had resulted, and that in the morning he could scarcely speak aloud. As I folded the prescription—which was Egyptian to me, but seems to be the mother tongue of druggists—I ventured to inquire what he had taken for his hoarseness? "Loaf sugar and lemons," was the placid reply. Well, that remedy of drugs was never used, for I found "loaf sugar and lemons" excellent.

By ignorance is pride increased;  
Those most assume who know the least:  
Their own self-balance gives them weight,  
But every other finds them light.

## English Colliers.

A coal-pit viewed from the earth's surface has not a very imposing appearance. It is simply a round hole, about twice the size of an ordinary table, and straddling over it is a sort of gallows, a wire rope, as thick as one's wrist, hanging down over a wheel and lost in the depths below.

By and by the action is reversed, a clinking is heard in the adjoining engine-shed, and up comes the "tub" (a square box holding 2200 weight), filled with coal. I viewed the coarse, strong tub with approbation, making sure that as soon as it was emptied we should all get into it; but in this I was disappointed. It was not in the tub, but standing on the grating on which the tub had stood, that we had to descend; on the naked grating, with nothing to "hold on to" but a cross chain overhead. But the pit was only 600 feet deep, and the coal smoke that arose from the enormous mine furnace below was not unbearable by the time it had benumbed one's senses a bit.

Six hundred feet down, and a half a mile this way or that, under low arched roofs, from which depended frequent fleeces of fungus, snow white, and looking like lamb's wool, and making the black walls, lit by feeble tallow dips, stuck there in dabs of clay, blacker than ever. We all carried tallow dips, stuck in balls of clay, and in Indian file followed the "buttoxy" and his foreman through the turnings and windings that led to the "chambers" from which the coal was being hewn.

Chambers are as wide as an ordinary street, and as high as the three-storied houses, and on every side, whenever the dingy light of the red-nosed dip was shifted, was revealed a human creature, naked to the waist and blacker than any sweep, and with a weapon in his hand that, in the uncertain light, looked like a tomahawk, grinning at you, making a dash with his weapon apparently in the direction of your visage, but which alights harmlessly on the face of the coal wall. Heavers, packers, tubbers, fillers—these are all men, and hard as the work is, they earn good wages. They don't dislike the labor, and they are jolly enough—all except the boys, that so perpetually haunted me after I returned from Staffordshire. It is villanously cruel to serve the poor little chaps so.

The matter stands this way. The hewer is the man whose business it is to "break in" at the foot of a coal wall. He lies on his side or on his stomach, and he breaks in with a pick right along for a length say twenty feet, a gap that is two feet or less in height. He pecks his way into the rock until he has burrowed sixteen or eighteen feet. Naturally, in the process of pecking, he makes a great deal of "slack," or small coal, and the boy in question is called the "slack boy." Regarded as a boy, as a human creature, he is slack indeed. He is more like a large sized monkey. All fours is his perpetual posture, and he wears a leather girdle about his waist, from which an iron chain depends, the other end of it being attached to an iron cart. The slack boy has an iron shovel as well, and the business of his wretched life is to crawl in at the hole the hewer makes, to fill his cart with chips and dust, and then crawl out again with the load, always on his hands and knees, with his poor limbs hung about with a few rags of which nakedness might be ashamed.—*London Society.*

## London General Epistle, 1835.

Dear Friends,—We consider it to be a cause for humble thankfulness that we have been again permitted to assemble as a religious body, and to conduct the concerns of the Society in brotherly love. In the flowing of this love we again address you, and tenderly salute you all in the name of our Lord Jesus Christ.

Epistles have been received, as in former years, from our friends in Ireland and North America, which have been very acceptable to this meeting; and we have felt satisfaction in maintaining a friendly intercourse with our beloved distant brethren.

The sense which we have now been permitted to enjoy of the overshadowing wing of divine goodness, has afforded a renewed evidence that we are, as a church, built on that foundation than which none other can be laid, which is Jesus Christ.

Our forefathers in the truth were, as we believe, remarkably visited with the day-spring from on high; and under the fresh and powerful influences of the Holy Ghost, were enabled to proclaim among men the purity and spirituality of the gospel of our Redeemer.

They professed to be instructed in no new truths; they had nothing to add to the faith once delivered to the saints; they cordially acknowledged the divine authority of the Holy Scriptures; they were deeply versed in the contents of the sacred volume; and they openly confessed that whatsoever doctrine or practice is contrary to its declarations must be "accounted and reckoned a delusion of the devil." But it was evidently their especial duty, in the Christian church, to call away their fellow men from a dependence upon outward forms, to invite their attention to the witness for God in their own bosoms, and to set forth the immediate and perceptible operations of the Holy Spirit.

It was given them to testify that this divine influence was to be experienced not only in connection with the outward means of religious instruction, but in the striving of the Spirit with a dark and unregenerate world; and in those gracious visitations to the mind of man which are independent of every external circumstance.

Nothing could be more clear than the testimony which they bore to the eternal divinity of the Son of God, to his coming in the flesh, and to his propitiatory offering, on the cross, for the sins of the whole world; and they rejoiced in the benefits of the Christian revelation, by which these precious truths are made known to mankind. They went forth to preach the gospel, under a firm conviction that in consequence of this sacrifice for sin, all men are placed in a capacity of salvation. And they called on their hearers to mind the light of the Spirit of Christ, that they might be thereby convinced of their transgressions, and led to a living faith in that precious blood through which alone we can receive the forgiveness of our sins, and be made partakers of the blessed hope of life everlasting.

We wish to assure our dear friends, everywhere, that we still retain the same unalterable principles, and desire to be enabled, under every variety of circumstances, steadily to uphold them.

While we are anxious that all our members should exercise a daily diligence in the perusal of the sacred volume, we would earnestly invite them to wait and pray for that divine immediate teaching, which can alone effectu-

ally illuminate its pages, and unfold their contents to the eye of the soul. "For what man knoweth the things of a man, save the spirit of man which is in him? even so the things of God knoweth no man, but the Spirit of God." (1 Cor. ii. 11.) As this is our humble endeavor, the various features of divine truth will be gradually unfolded to the seeking mind. We beseech you, dear friends, carefully to avoid all partial and exclusive views of religion, for these have ever been found to be the nurse of error. The truth as it is in Jesus forms a perfect whole; its parts are not to be contrasted, much less opposed to each other. They all consist in beautiful harmony; they must be gratefully accepted in their true completeness, and applied with all diligence to their practical purpose. That purpose is the renovation of our fallen nature, and the salvation of our never-dying souls.

How precious is it to remember that in the prosecution of this great object the humble christian is strengthened, by the indwelling of the Holy Ghost, for his race of righteousness, and is furnished with an infallible inward guide to true holiness. The pride of his heart is broken down by a power beyond his own; his dispositions are rectified; and now he can listen to that still small voice of Israel's Shepherd in the soul, which guides to the practice of every virtue. We beseech you, dear friends, not to rest satisfied with a mere notion of this blessed doctrine, but to apply it with all watchfulness and diligence to your daily life and conversation. Thus alone can we escape from the spirit of the world, with all its covetousness and vanity, maintain the true simplicity and integrity of the christian character, and finally perfect "holiness in the fear of God." (2 Cor. vii. 1.)

The restraints made on our members during the last year for tithes and other ecclesiastical demands, amount to upwards of twelve thousand eight hundred pounds; and one Friend is now suffering imprisonment in the jail at Carlow, in Ireland, in consequence of his conscientious refusal to pay tithes. In communicating this information, we wish to remind you, that one important result of the immediate influence of the Spirit, is the distribution of gifts in the church for the edification of the body. The testimony which, as a Society, we have long borne to the freedom and spirituality of the christian ministry, is, we trust, increasingly understood in the world, and never was the steadfast maintenance of it more necessary than at present. Let us never forget that there can be no right appointment to the sacred office, except by the call of our Lord Jesus Christ, nor any true qualification for the exercise of the gift, except by the direct and renewed influence of the Holy Spirit. Let us not fail to bear in mind that these influences are not at our command, and that unless they are distinctly bestowed for the purpose, no offerings, either in preaching or prayer, can ever be rightly made in our assemblies for divine worship.

We entreat our dear friends not to be weary or ashamed of their public silent waiting upon God. It is a noble testimony to the spirituality of true worship—to our sense of the weakness and ignorance of man, and of the goodness and power of the Almighty. May our dependence, on these occasions, be placed on that gracious Saviour, who promised to be with his disciples when gathered together in his name. (Matt. xxiii. 20.) May we be found

reverently sitting at his feet; and in the silence of all flesh, may we yet know Him, to teach us, who teacheth as never man taught.

In order to experience this great blessing it is absolutely necessary that we should guard against a careless and indolent state of mind, and should maintain that patient and diligent exercise of soul before the Lord, without which our meetings cannot be held in the life and power of truth.

We would remind our young friends who have received a guarded religious education amongst us, that they can never be living members of the church of Christ, without baptism. And what is the baptism which can thus unite them in fellowship with the body? "not the putting away of the filth of the flesh," (1 Pet. iii. 21,) or the performance of any external rite; it is "the washing of regeneration and renewing of the Holy Ghost." (Titus iii. 5.) Never forget, we beseech you, that vain will be the advantages which you have derived from the teachings of your fellow men, unless you are truly born of the Spirit, and become new creatures in Christ Jesus.

While we confess our continued conviction that all the ceremonies of the Jewish law were fulfilled and finished by the death of Christ, and that no shadows, in the worship of God, were instituted by our Lord or have any place in the Christian dispensation; we feel an earnest desire that we may all be partakers of the true supper of the Lord. (Rev. iii. 20.) Let us ever hold in solemn and thankful remembrance the one great sacrifice for sin. Let us seek for that living faith, by which we may be enabled to eat the flesh of the Son of man and drink his blood. For, said our blessed Lord, "Except ye eat the flesh of the Son of man and drink his blood, ye have no life in you." (John vi. 53.) Thus will our souls be replenished and satisfied, and our strength renewed in the Lord.

We are solicitous that friends every where, may be encouraged to cultivate a greater depth of religious experience; that they may avoid all evil surmisings, all party spirit, all unholy zeal; that they may be clothed in the meekness and gentleness of Christ, and be abundantly endued with that precious charity which is the bond of perfectness.

The unity which as a society, we have long enjoyed, is indeed attended with many advantages, both civil and religious. It is a means of strength, and a source of much happiness; and we would exhort all our members to watch unto prayer, that they may be enabled, by the grace of our Holy Head, to preserve it inviolate.

May "the God of all grace who hath called us unto his eternal glory by Christ Jesus, after that ye have suffered awhile, make you perfect, stablish, strengthen, settle you. To him be glory and dominion for ever and ever. Amen." (1 Pet. v. 10, 11.)

[This is the epistle referred to in the extract from D. Wheeler, in "The Friend," 8th mo. 30th, 1873.]

Various indeed are the dispensations through which the Lord sees it needful to bring His chosen servants, preparatory to the production of acceptable fruits unto Him; yet He is never wanting to sustain and help those who put their trust and confidence in Him, and who give up the will to Him, excluding self, and watching and warring against it, in all its varied appearances.

### Dr. Livingstone on the East African Slave Trade.

The following letter to Sir Roderick Murchison, dated Poonah, 18th of 5th mo. 1864, from Dr. Livingstone, in which he refers to the subject ever in his thoughts as an African traveller, will be read with new interest now that the mission of Sir Bartle Frere has been successful at Zanzibar:—"We arrived at Bombay on the 13th instant, after a passage of forty-four days from Zanzibar. From Zanzibar we crept along the African coast in order to profit by a current of at least one hundred miles a day. If Solomon's ships went as far south as Sofala, as some suppose, they could not have done it during the southwest monsoon against such a current. We went along beautifully till we got past the line; we then fell in with calm, which continued altogether 24½ days. The sea was as smooth as glass; and as we had but one stoker, we could not steam more than ten hours at a time. By patience and perseverance we have at length accomplished our voyage of 2,500 miles, but now I feel at as great a loss as ever. I came here to sell my steamer, but with this comes the idea of abandoning Africa before accomplishing something against the slave trade; *the thought of it makes me feel as though I could not lie at peace in my grave, with all the evils I know so well going on unchecked.* What makes it doubly galling is, that while the policy of our government has, to a very gratifying extent, been successful on the west coast, all efforts on the east coast have been rendered ineffectual by a scanty Portuguese convict population. The same measures have been in operation on the east coast, the same expense, and the same dangers, the same heroic services have been performed by her Majesty's cruisers, and yet all in vain. The Zanzibar country is to be now more closely shut up than ever, and unless we have an English settlement somewhere on the main land, beyond the so-called dominion of the Portuguese, all repressive measures will continue fruitless."—*Journal of the Royal Geographical Society.*

*The Advantages of Educating Children in the Knowledge of the Holy Scriptures.*—Our honorable Friend George Whitehead, says: "I always had a love to the Bible, and to reading therein, from my childhood, yet did not truly understand, nor experience those doctrines essential to salvation, nor the new covenant dispensation, until my mind was turned to the light of Christ, the living eternal Word, the entrance whereof giveth light and understanding to the simple. Yet I do confess, it was some advantage to me frequently to read the Holy Scriptures, when I was ignorant, and did not understand the great and essential things therein testified of. For when the Lord had livingly in some measure opened my understanding in the holy Scriptures, by my often reading the same before, having the better remembrance thereof, it was a help and advantage to my secret meditations, when a lively sense and comfort of the Scriptures was in measure given me by the Spirit, and thereby I was the more induced to the serious reading and consideration of what I read in the holy Scriptures, and the comfort thereof made known by the holy Spirit enlightening the understanding. It is through faith which is in Christ, that the holy Scriptures are said to make the man of God, 'Wise unto salvation,

and profitable to him, for doctrine, reproof, admonition and instruction in righteousness, that he may be perfect and thoroughly furnished in every good word and work.' Doubtless, Paul esteemed Timothy's knowing the holy Scriptures from a child to be some advantage and help to him, but it was principally through faith, which is in Christ Jesus.

These things considered, I would not have Christian parents remiss in educating, and causing their children to read the holy Scriptures, but to induce them both to learn and frequently to read therein. It may be of real advantage and profitable to them, when they come to have their understandings enlightened, and to know the Truth as it is in Christ Jesus. I have sometimes observed children in reading the Bible, have been affected with the good things they have read, from a secret belief of them, which hath had such impression, that they have been induced to a more serious consideration thereof, when the Lord has opened their understandings in some measure, by the light of his grace in them.

By what I have here declared in commendation of holy Scripture, and the advantage thereof, I would not be understood to limit the gift of the Spirit of God, or ministry thereof, or any of his divine graces, from the illiterate, the unlearned, or from persons of little education,—as ploughmen, herdsmen, shepherds, fishermen, &c. For God hath given of his good Spirit, and spiritual gifts to such, and hath promised 'to pour out of his Spirit upon all flesh; and that sons and daughters should prophesy.' And Moses said, 'Would God that all the Lord's people were prophets, and that he would put his Spirit upon them.' Among whom both men and women, learned and unlearned, are included."

For "The Friend."

The following account of the severity of the winter of 1715 and '16 in England, is taken from the Stamford Mercury, of First month 14th, 1716, said to be the second paper published in England, and then only having reached its seventh volume. This winter is said to have been, with the single exception of that of 1708 9, the most rigorous ever known in these islands.

"The Thames has now become one solid rock of ice; coaches, carriers with their horses and their wagons, have passed like a public road; booths, for the sale of brandy, wine, ale and other liquors, have been fixed there for some time. But now it is made in a manner like a town, thousands and thousands of people cross it, and with wonder view the mountainous heaps of water that now lie congealed into ice, notwithstanding the resistance given to the cold by the movement of the tide. On Thursday a pretty large cook's shop was erected there, and people went as regularly to the ordinary, as they do in the city. Over against Westminster Hall, Whitehall and White Fryars, printing presses are kept upon the ice, where thousands of people have their names printed off, to transmit the wonders of the season to their children. It has not much longer to continue to equal, or even to out-do the great frost (1709) which is now made, as it were, an era of time." Again, on the 19th: "The booths on the Thames increase daily, where all manner of goods are sold; and this day three whole oxen were roasted upon it, viz., one near Lambeth, the second near St. Paul's wharf, and the third near Rotherhith,

below London bridge, where people walk on the ice, as it is said, beyond Gravesend."

So severe was the frost, that even when a strong spring-tide came on the 21st, and overflowed Palace Yard, raising the ice "many feet perpendicular," it caused no interruption to the diversions on the Thames.

Following the iron frost came a magnificent aurora borealis, which attracted much attention, and is described at full; and a formidable phenomenon was observed at Elstone, near Newark, which is thus described by a minister, an eye-witness: "On Tuesday last, the 6th of March, when coming home from my house in Newark, I observed in the southwest a long and broad stream of light issuing out of a darkish cloud (betwixt twenty and twenty-five degrees of the horizon as near as I can guess) like to the beams of the sun setting in a drizzling evening, the stream pointing directly towards the zenith. I was somewhat amazed at it, considering the sun had been more than an hour set, and the moon's rising not being till morning. Presently after some other streams issued out of another cloud near to the former with a very unusual light, and with a variety of colors, black, blue, flame-color, yellow, &c., and so more and more till all that part of the heavens was overspread. During this whole time, never were seen such contentions (as it were) as betwixt these meteors—being all in confusion, and darting one against another, with an incredible force and swiftness, for about an hour and a half. Through all that region of air, where this confusion and strife (for I can term it nothing else) was, the stars appeared clear as through a thin, bright smoke, or as the sun sometimes through a thin bright cloud. The other part of the heaven, towards the north, east and the south-east was very clear, the stars bright and twinkling, as in a winter's night, when there is no moon. About nine at night, these meteors (if I may so call them) in a great measure disappeared, but not quite; some faint sort of contentions (as it were) were still perceived: and about ten of the clock they broke out again with a fresh violence in the same manner as before, and so continued till about half-past eleven. About twelve, a bright globular body appeared, as big as, and like the sun at his rising, but not quite so clear. Indeed it was the most astounding sight I ever yet beheld. During this time the light was such that I myself, (though now almost sixty years of age,) and another minister did read several titles of the books in the Bible, without any use of art. The night was calm, not so much as a breath of wind was perceived. It began, according to my opinion, in the north-west, and so drew round to the south-east. It was observed by a thousand people, not without the greatest wonder, and with strange apprehensions; some looking for the day of judgment, others as the presages of future events and calamities."

Jonathan Burnyeat.

In the early days of our religious Society, there were several remarkable instances of persons quite young in life giving themselves up unreservedly to serve and follow the Lord; and who, after experiencing the renewing, transforming power of Divine Grace, were called into the ministry, and made able preachers of the Gospel of life and salvation. Among these was Jonathan Burnyeat, of whom "that worthy Elder and faithful ser-

vant of Jesus Christ," James Dickinson speaks as follows: "In the forepart of the year 1699, I had drawings in my mind to visit Friends in Scotland, and proceeded on that service in company with Jonathan Burnyeat (son of John Burnyeat), who had the like concern. As he was very young, and had not travelled in Truth's service before, a concern fell upon me for his preservation every way. The Lord was kind to us, and bore up our spirits in all our exercises. My companion was deeply opened into the mysteries of God's kingdom; and grew in his gift, so as to give counsel to young and old; he was very zealous against deceit and wickedness, both in professor and profane; and often reprov'd such. We travelled together through the south and west parts of Scotland, to Douglas, Hamilton and Glasgow, and had many meetings among the people; laboring to turn their minds to the Lord Jesus Christ, who is the light of the world; warning all who professed the light to be their way, to be careful to walk therein, that they might know their communion to increase with the Lord, their fellowship one with another, and the blood of Christ to cleanse them from all unrighteousness. Then we travelled down into the north, and had many precious meetings. From thence we returned to the Yearly Meeting in Edinburg, where we met with many brethren. Abundance of people came to the meeting, who were very rude and wicked, and labored to disturb us; but the testimony of truth coming over all, some among them were troubled and rained down by the power of God. We were deeply bound under a sense of the Lord's love to us; yet under great sorrow to see the wickedness of the people. A concern came upon Jonathan Burnyeat to write a warning to the inhabitants of that place, which was afterwards put in print to answer his service. Then we travelled to Kelso, and visited Friends there; so to Berwick-upon-Weed; from thence to Northumberland, and had meetings at several places; many hearts were reached by the power of Truth. Being near we returned home, and witnessed peace flow in our souls."

From a note in the 12th volume Friends' library, page 398, it appears that Jonathan Burnyeat was born on the 4th of the Eleventh month, 1686, and died on the 5th of the Third month, 1709, in the twenty-third year of his age. When he accompanied James Dickinson in the gospel service referred to in the preceding extract, he was consequently only a little more than twelve years of age. He died Graythwaits in Cumberland, and the dates of his birth and decease, are copied from the registers of Pardshaw Monthly Meeting.

**Poisonous Woolen Goods.**—Dr. Hagar states at a number of cases have occurred in Berlin, where colored woolen garments, worn next the skin, have produced a peculiar kind of poisoning. Violet-gray woolen stockings, after having been worn less than six hours, caused redness of the skin, and permanent pustules, in connection with feverish symptoms, and constipation. The same results followed after violet stockings had been treated with boiling water. Similar symptoms were produced by gray woolen shirts, next the skin, and by the red binding of others. He considers aniline colors as a rule poisonous in their action upon the skin, as has been established in regard to merrilline, in spite of all denials; the excep-

tional character of a few in this respect being difficult to establish. He recommends, therefore, that woolen garments colored with aniline colors should not be worn next the skin, and suggests as a test for these colors, that a portion of the wool be heated to boiling, in a test-tube, with 90 per cent. alcohol, and if the latter acquire a red, violet, or violet blue tint the coloring matter is suspicious.—*Late Paper.*

## THE FRIEND.

NINTH MONTH 13, 1873.

### CANADA YEARLY MEETING.

We have received a printed copy of the proceedings of the above-named meeting during its session of 1873; from which it appears, that epistles were read from other Yearly Meetings, and one general epistle sent to them all in reply. At the request of one of the Quarterly Meetings, the conclusion of the Yearly Meeting last year to proceed in the building of a house to accommodate a Boarding School was reconsidered, and the whole subject deferred until another year. Adam Spencer was appointed Clerk and Levi Varney Assistant. After reading and answering the Queries and replies thereto, a minute of advice was adopted and directed to be read in the Quarterly Meetings and at the close of First-day meetings; from which we take the following:

"For God so loved the world that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life,' is a truth we renewedly feel to be precious. We are also reminded that He who caused the dry bones to live, will enable us to live before Him, by the influence of His spirit in us. The Spirit of Truth is come, and will lead us into all truth and out of all error. If we adhere to his teachings we shall be directed aright and in harmony. He does not lead one person one way, and another in an opposite direction. The mind of Truth is the same now as it ever was. It is the same to us as it was to our fathers; its teachings the same. The promptings to diversity of thought and action are of the natural man, and are evidences of remaining infirmity. The effect of the leaven of the kingdom of heaven, is to leaven into one lump. The greater the attainment of perfection in Christ, the nearer we come into 'the unity of the Spirit in the bond of peace,' and the greater the power for good. 'The nearer this standard is arrived at, the less will be known of a judging Spirit, and more care will be exercised not to put a stumbling-block or an occasion to fall in a brother's way. The nearer the different members of the body are united to Christ Jesus the Head, the more will those members give evidence of complete redemption. The tree being made good the fruit will also be good—the fruit will show what the tree is. If we have been with Jesus, men will take knowledge of the blessed fact by our fruits: and this knowledge will promote our service in the truth. If we belong to the family of God and faithfully regard his teachings, He will not suffer us to wound the least of His children, by any harsh word or untoward act. If through unwatchfulness we should do so, our Father will require us to confess that fault to those we have offended. Such acknowledgments open the way to near access

to Him, and barriers to worship, especially in the household, are thus removed. We were encouraged to faithfulness in this engagement, to every manifested duty therein."

The Meeting of Ministers and Elders sent a minute to the Yearly Meeting, which was "recommended to the attention of Friends;" it concludes as follows:

"We were reminded of the declaration of our dear Saviour, 'without me ye can do nothing.' May we dwell near that unfailing source, so as to be qualified for usefulness in the Church, and to walk worthy of the vocation wherewith we are called with all lowliness and meekness. As each one is engaged to do his own part as a member of the body of Christ, acting under the influence of His spirit, we shall become as lively stones, fitted to fill the place designed for us in the spiritual temple, in the building up the superstructure, the sound of a hammer is not heard. Thus dwelling upon the watch-tower, and keeping the mind singly fixed upon the Great Captain, we shall see eye to eye; harmony and love will prevail, and we shall be enabled, as with one heart and one mouth, to glorify God, even the Father."

A communication was received and read from the Ontario and Quebec Temperance and Prohibitory Leagues, referred to a Committee and an answer returned by the meeting. A rule was adopted making it a disownable offence to import, manufacture, or vend intoxicating liquors, or to sell grain or other produce for their manufacture. A clause was also introduced that "No other than the strictly medicinal use of intoxicating drinks is to be allowed."

The reports show there are belonging to the Yearly Meeting, 21 Meetings, 230 families, 211 parts of families, 247 children of school age—nearly all are attending common schools—1,406 members, 17 deceased within the past year, nine received by certificate from other Meetings, 14 received into membership by conviction, two disowned, six removed out of the Yearly Meeting."

### SUMMARY OF EVENTS.

**FOREIGN.**—The French government has been notified from Berlin that, France having fulfilled all her engagements, the occupation of French territory by the German forces is legally ended. The evacuation of Verdun by the Germans has begun.

The American citizens, resident in Paris, proposed to display the United States flag on the 4th inst., in honor of the proclamation of the French Republic, but the Prefect strongly objected and they forebore doing so.

The Minister of the Interior has issued an order prohibiting the publication of the radical Republican journal *Le Peuple Souverain*, because of the appearance in its columns of articles inciting to disturbance, and contempt of the government.

The London police force numbers 9,761 men, who patrol, night and day, 6,612 miles of streets. The number of arrests in 1872 was 78,203. The arrests for drunkenness are increasing, but those for theft and other crimes are diminishing. The large supplies of tin now coming into the markets of Europe from Australia are affecting the shares in the mines of Cornwall. We learn from a recent return, that the value of gold and minerals raised in the colony of Victoria since the first discovery of the gold fields down to the end of 1872, was estimated at £165,566,033, which is made up principally from gold, silver, tin, copper and antimony, as follows: Gold, £168,149,305; silver, £5281; tin, £281,105; copper, £5810, and antimony, £77,237.

On the 5th inst. the Spanish Ministry resigned in a body. In the session of the Spanish Cortes, held the 6th inst., Castelar demanded as the conditions on which he would accept office, that he be empowered to increase the army, purchase 500,000 rifles, organize the

militia, and impose a forced loan or be furnished with adequate means to meet the expenses of the war against the Carlists and Communists. He also demanded authority to suspend the constitutional guarantees, &c., when in his judgment the measure became necessary. The Cortes unanimously voted to confer all the powers demanded. On the 7th the Cortes elected Castelar President.

The garrison of Berga, besieged by the Carlists, threaten to evacuate the town unless supplies arrive soon.

The Carlists have carried off from Vera a number of women, who were chosen by ballot in the province of Biscay, to make uniforms for the Carlist soldiers. The Spanish government forces at Bilbao, now invested by the Carlists, have sufficient provisions on hand to last through the winter. All commercial traffic between the city and the port has been prohibited, in order to allow full play for the guns of the Spanish war ships.

The iron-clads *Almanza* and *Vittoria*, have been sent by the British Vice-Admiral to Gibraltar. The insurgent leaders in Cartagena sent a written remonstrance against the removal of the vessels, but did not attempt opposition by force.

The Carlists claim that Spaniards in Cuba are contributing liberally to their cause. There are now about 40,000 Carlists under arms in Spain. They are making arrangements to re-establish a cannon foundry near the town of Fortosa.

The insurgent Junta in Cartagena is sending emissaries, who are plentifully provided with money, to Barcelona, to organize a movement in favor of a separate government for Catalonia. A Madrid dispatch of the 8th says: The new Ministry is announced to-day. It is constituted as follows: Castelar, President, without a portfolio; Carvajal, Minister of Foreign Affairs; Berges, Minister of Justice; Pedregal, Minister of Finance; Cervera, Minister of Public Works; Lieutenant General Sanchez Bregua, Minister of War; Oveiro, Minister of Marine; Maisonava, Minister of the Interior; Salor, Minister of Colonies. Castelar and his colleagues will make a powerful effort to crush both the Carlists and the insurgents of Cartagena and other cities.

A Bombay dispatch of the 2d says: A ferry boat on the Indus, while crossing the river near Kairah, capsized and sunk in deep water. She was crowded with passengers, of whom ninety are reported to be drowned.

On the night of the 7th inst., the square of buildings in Havana, known as the Plaza Vapor, was entirely destroyed by fire. About twenty lives were lost by the fire, and the estimated loss of property near one million of dollars.

London, 9th mo. 8th.—Consols 92½. U. S. 10-40, 5 per cents, 92½; new fives, 91½.

Liverpool.—Uplands cotton, 8½d. a 9d.; Orleans, 9½d. a 9½d. Sales 18,000 bales. Breadstuffs steady.

Europe has 171 cities each of which has more than 50,000 inhabitants. The six largest are London, Paris, Constantinople, Vienna, Berlin and St. Petersburg.

UNITED STATES.—*Miscellaneous*.—There were 616 deaths in New York last week. The interments in Philadelphia for the week ending 6th inst., numbered 299, including 28 deaths of cholera infantum, 31 consumption, 22 marasmus, and 12 old age. The mean temperature of the Eighth month, by the Pennsylvania Hospital record, was 75.95 deg., the highest during the month 93 deg., and the lowest 61 deg. The average of the mean temperature of the Eighth month for the past 85 years, is stated to be 73.36 deg.; the highest mean during that entire period was 81.64 deg., in 1872, the lowest was 66 deg. in 1816. The mean temperature of the three summer months of 1873 has been 76.50 deg., which is 3.59 deg. below that of the summer of 1872.

The total imports at New York last week were \$7,807,237, of which \$4,520,767 were general merchandise and \$3,286,470 dry goods.

The last instalment of the payment of the Geneva award was received by the U. S. Treasurer on the 5th inst.

The number of emigrants landed at Castle Garden, N. Y., between 1st mo. 1st and 8th mo. 31st last, was 201,497, which is 4874 less than in the corresponding months 1872.

The United States steamer *Tuscarora* has been ordered to survey a route for a submarine cable from the west coast of the United States to China and Japan. The survey will commence from some point in the vicinity of Puget Sound. It is not probable that much progress will be made in the survey this season, as the weather will soon be unfavorable for it.

The Markets, &c.—The following were the quotations on the 8th inst. *New York*.—American gold, 112. U. S. sixes, 1881, 118; ditto, 1868, 115; ditto, 10-40

5 per cents, 112. Superfine flour, \$5.50 a \$6.20; State extra, \$7.50 a \$7.30; finer brands, \$7.50 a \$10. White Michigan wheat, \$1.85; red western, \$1.69; No. 2 Chicago spring, \$1.64 a \$1.65; No. 3 do., \$1.62. Oats, 45 a 51 cts. Yellow corn, 66 a 67 cts.; white, 69 a 72 cts. Philadelphia.—Middling cotton, 20½ a 21½ cts. for uplands and New Orleans. Superfine flour, \$3.50 a \$4.50; finer brands, \$5 a \$10. White wheat, \$1.75 a \$1.85; amber, \$1.70; western red, \$1.62 a \$1.67. Mixed corn, 64 a 65 cts.; yellow, 66 cts. Oats, 40 a 48 cts. Smoked hams, 11 a 16 cts. Lard, 8½ a 9 cts. Cloverseed, 9½ a 10 cts. The receipts of beef cattle at the Avenue Drive-yard were about 4200 head. Choice and extra sold at 6½ a 7½ cts. per lb. gross; fair to good, 5 a 6 cts., and common, 3½ a 4½ cts. About 16,000 sheep sold at 4½ a 6½ cts. per lb. gross, and 6,000 hogs at \$7.25 a \$7.37½ per 100 lb. net for corn fed. Chicago.—Spring extra flour, \$5.50 a \$6.37. No. 1 spring wheat, \$1.20; No. 2 do., \$1.16. No. 2 corn, 41½ cts. No. 2 oats, 28½ cts. No. 2 barley, \$1.21; No. 3, 88 a 91 cts. Lard, 7½ cts. St. Louis.—Winter superfine flour, \$4 a \$4.50; extra, \$4.75 a \$6.50. No. 2 winter red wheat, \$1.55; No. 3 do., \$1.40. No. 2 corn, 47 cts. No. 2 oats, 33½ cts. Spring barley, \$1.27 a \$1.35. Rye, 73 a 75 cts. Lard, 8½ cts. Louisville.—Family flour, \$5.75 a \$7.75. Choice white wheat, \$1.50; red, \$1.30 a \$1.45. Corn, 60 a 63 cts. Oats, 42 a 44 cts. Cincinnati.—Family flour, \$7 a \$7.25. Wheat, \$1.40. Corn, 52 a 53 cts. Rye, 82 cts. Oats, 31 a 45 cts. Lard, 8 a 8½ cts.

#### WESTTOWN.

A Special meeting of the Committee on Instruction will be held on Fourth-day, the 10th inst., at 2 o'clock p. m., in the Committee-room on Arch St. General and punctual attendance is requested.

#### WANTED

A teacher for a small Monthly Meeting School at Fallsington, to commence immediately and teach three months. Compensation \$22 per month and board. Apply to JAMES H. MOON, Fallsington, Bucks Co., Penna.

#### WANTED

A suitable woman Friend to act as Governess at Westtown Boarding School. Apply to  
Rebecca S. Allen, Philadelphia.  
Sarah A. Richie, "  
Susan E. Comfort, Knox St., Germantown.  
Lydia L. Walton, Moorestown, N. J.

#### WANTED

A teacher in the classical department on the boys' side at Westtown School.

Application may be made to  
Thomas Conard, West Grove, Chester Co.  
Joseph Walton, Philadelphia.  
William Evans, "  
Charles Evans, "

#### WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to CHARLES J. ALLEN, Street Road P. O., Chester Co., Pa. Applications may also be left with JACOB SMEDLEY, 304 Arch St., Philadelphia.

#### EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of Tenth month.

Application may be made to  
Elton B. Gifford, 28 North Third St.  
Ephraim Smith, 1110 Pine St.  
James Bromley, 641 Franklin St.  
Richard J. Allen, 472 North Third St.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Fall term.

Application may be made to  
Ebenezer Worth, Marshall on, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philada.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philada.

#### RECEIPTS.

Received from William C. Ivins, N. J., \$2, vol. 47; from William Smedley, Pa., \$2, vol. 47; from Amy Middleton, N. J., per Josiah L. Haines, \$2, vol. 47; from Elizabeth T. Yarnall and Edward S. Yarnall, Pa., \$2 each, vol. 47; from Isaac Roberts, Pa., \$2, vol. 47; from Joel Wilson, Agent, N. J., for Ruth Anna Harned and Isaac C. Stokes, \$2 each, vol. 47; from Nancy B. Buffinton, Mass., \$2, vol. 47; from Joseph Waring, Canada, \$2.25, to No. 23, vol. 48 and Postage, and for Joseph Pollard, \$2.25, vol. 47 and Postage; from John M. Smith, Agent, O., \$2, vol. 47, and for Rachel Barber, Eliza Wilson, David Stephen and Henry Briggs, \$2 each, vol. 47; from Joseph Hall, Agent, Io., for Sarah A. Atkinson, Nathan Satterthwaite, and Charles Leech, \$2 each, vol. 47, and for Benjamin Ellyson, \$4.50, vols. 46 and 47; from Ephraim Smith, City, \$2, vol. 47, and for Abiah Cope and Elizabeth Hughes, Pa., \$2 each, vol. 47; from Martha Mickle, N. J., per Carlton, P. Stokes, \$2, vol. 47; from Thomas Kite, O., \$2, vol. 47; from Jacob Parvin, Pa., \$2, to No. 8, vol. 48; from Benjamin D. Stratton, Agent, O., for Joseph Winder, Joseph Stratton, Benjamin H. Coppock, William G. Coppuck, and Jonathan Deao, \$2 each, vol. 47; from Emeline E. Hilyard, N. J., \$2, vol. 47; from Jacob Parker, Pa., \$2, vol. 47; from Penelope Smith, N. J., \$2, vol. 47; from Ruth Foster, R. I., \$2, vol. 47; from Richard P. Gibbons, Del., \$2, vol. 47; from Rufus Churchill, N. S., \$2, vol. 47; from Jacob Reeder, Io., \$2, vol. 47; from Walter Edgerton, Ind., \$2, vol. 47; from Thomas Emmons, Io., \$2, vol. 47; from Sarah C. Winner, Pa., \$2, vol. 47; from Edward G. Smedley, Pa., \$2, vol. 47; from Samuel Pancoast, Pa., \$2, vol. 47; from Susannah Marriott, N. Y., \$2, vol. 47; from Phebe Bowerman, N. Y., \$2, vol. 47; from Susanna Chambers, Pa., \$2, vol. 47; from Sarah Hoopes, Pa., per Elizabeth Hoopes, \$2, vol. 47; from Ashton Richardson, Del., \$2, vol. 47; from William T. Fawcett, Ind., \$2, vol. 47; from George M. Eddy, Mass., \$2, vol. 47; from Thomas Y. Hutton, Pa., \$2, vol. 47; from James R. Kite, Agent, O., \$2, vol. 47, and for Ezra Llewellyn Jason Penrose, Richard Penrose, Joseph King, Aaron P. Dewees, Joseph Masters, Jesse Dewees, Thoma Llewellyn, Mary Wilson, Patience Gifford, Hannah M. Penrose, William Masters, David Masters, and Elwood Burgess, \$2 each, vol. 47; from Amos Evens and Joseph K. Evens, N. J., \$2 each, vol. 47; from Rache M. Thorp, William Thorp, and George W. Thorp, Pa., \$2 each, vol. 47; from James J. Lord, N. J., per Jno M. Saunders, \$2, vol. 47; from Josiah A. Roberts, Pa., \$2, vol. 47; from Edwin P. Hannum, Pa., \$2, vol. 47; from George Sharpless, Agent, Pa., \$2, vol. 47, and for Robert W. Lewis, \$2, vol. 47; from Truman Forsyth, Pa., \$2, vol. 47; from Mary M. Applegate, N. DIED, 8th mo. 30th, 1873, at her residence at Pennville, near Muncy, Pa., after a lingering illness, MARY R. MEYERS, aged 45 years, a member of Monthly Meeting.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, NINTH MONTH 20, 1873.

NO. 5.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend"

John Heald.

(Continued from page 26.)

After his return from his Eastern journey, a concern rested on the mind of John Heald to visit the churches in Virginia and North Carolina. He thus commences the account of this labor of love: "On the morning of the 3rd of 10th month, 1816, I parted solemnly with my dear wife and children, without being impressed with ideas to communicate to them. So I took my leave silently, only taking them by the hand, and bidding them farewell, with very little more, *but many tears dropped.* I went to Carmel Meeting. It was a tendering time. I passed on to the house of Joseph Young, who had given up to accompany me, without my previous knowledge. It had been a close trial to his wife as well as himself. They had been members of our Society but a short time."

Passing through Wheeling into Western Pennsylvania, he attended Westland Meeting, at which he says: "I was drawn into lengthy communication, in which I touched on the causes which conspire to a disbelief in a God, showing what I believe to be the cause, namely, unfaithfulness to the light within, and going contrary to light and knowledge, indulging in flesh-pleasing gratifications, going on from one mis-step to another, until at last they tried to shelter themselves under the notion that there was no God. An invitation to the dear youth was held out very feelingly, to the tendering of many minds, and to the encouragement of those of riper years.

At Sandy Hill, I labored to stir up to more diligence in regard to religious duty; and the minds of many were reached. I had been for some time apprehensive that it would be my place to have an appointed meeting at Uniontown, and here, according to previous agreement, notice was given at the close of the meeting; and now, while I write this is coming on, with no small exercise; but if the good cause is not hurt, I hope to be content. I rely on the Helper of Israel for support." He afterwards adds: "The meeting at length collected, though some of the people came scattering. It was trying and exercising. I spoke awhile, and I thought the minds of the people were somewhat solemnized, and I felt

released, though the Truth-reigning power did not come into dominion so fully as I wished.

21st. At Dillin's run. It is the most westerly meeting belonging to Fairfax (Quarter, among the mountains, on the waters of Big Capon. It was a rainy day, yet their meeting-house was nearly full. I had considerable to say, in which I mentioned the prodigal son, who arose and returned to his father's house, and acknowledged he was no more worthy to be called his son, 'make me as one of thy hired servants.' If a person is going into plans, which promise nothing better than to ruin his estate, and his friend advises him to refrain from such a course of conduct, but he will not reform, but goes on and ruins his estate and reputation, his friend may be sorry for him, but may not see how to help him. So with us, if we receive good counsel, but do not take it and apply it as we know we ought to, are we not in the way to ruin? We intend to reform after awhile, but are we in the way to be reduced to a state prepared to return to the injured Father? It may be that some do return of the many prodigals who are illuminated to see their undone condition.

25th. We had a meeting at Middle Creek, in which we were enabled to labor to a good degree of satisfaction. We have only the relics of valuable Friends to labor among, here and at most of the late meetings we have attended, and these appear to me to be too lifeless, satisfied with the form without the life and power, and many of them not even retaining the form itself. My labor has been to stir up to more constant application to watchfulness and prayer. In these parts have lived many valuable Friends, some of whom have been removed by death, others have gone to the State of Ohio and other places; and there are few left here, especially of such as are alive to the cause of truth.

At South Fork Meeting, London county, Virginia, notice being spread, it was attended by a considerable number, whom I addressed with, "Where much is given men require the more, but where little is given, little is required, so he that received five talents, by a diligent attention and application, gained other five, and so of him who had received two, it was well-pleasing to their lord; whereupon he pronounced the blessing, 'Well done good and faithful servant,' to each, 'Thou hast been faithful over a few things, I will make thee ruler over more, enter thou into the joy of thy lord.'" I was engaged to set forth the necessity for a faithful attention to manifested duty.

We went home with George Janney, and from thence to Fairfax Monthly Meeting. I soon felt an engagement of mind to inform them that they had not best expect much from us who were strangers, but to center down to the gift in themselves, to witness a renewed qualification for the service of the day, with an appeal to the youth to be prepared to stand

in their places; that some had found the devolving weight to rest upon them, before they were in readiness; for your fathers where are they, and the prophets, do they live for ever? The meeting became solemn.

The next day attended Goose Creek Monthly Meeting. T. Grisell went foremost, and I followed in testimony, stating that faith is the substance of things hoped for, the evidence of things not seen as yet; that faith is so indispensably necessary that the apostle saith, that without faith it is impossible to please God. And yet he said, if he had faith to remove mountains, and had not charity, it would be nothing, or as sounding brass or a tinkling cymbal. Charity and love representing the same thing, of how little account does our religion appear without it; and in this point of view, how indispensably necessary is it to have love, it being the fulfilling of the law, Thou shalt love the Lord thy God with all thy heart and all thy soul, &c.

11th mo. 1st. A thronged meeting at Goose Creek, in which my mind was deeply impressed with a sense of my own weakness. At length the passage revived, expressed by our dear Lord, 'while ye have the Light believe in the Light, that ye may be the children of the Light and of the day.' He who gave this admonition knew what was requisite to our happiness, and in order to impress a watchful care more deeply, he said, that strait is the gate and narrow is the way that leads to life, and few there be that find it. Am I not in danger of missing it? This should arouse us to great and close attention, lest it be not attained. The meeting ended satisfactorily, of which I was glad.

We parted yesterday with T. Grisell and companion, they going into Maryland. We do not expect to see them again in this journey. I feel very destitute, but hope it is for the best. The next day I went to see my father's sister, who is in her 96th year,\* not very well, but able to walk about."

7th. At Alexandria, J. H. revived the proverb; "Seest thou a man wise in his own conceit, there is more hopes of a fool than of him." If this is so, what hope is there of one who stifles conviction, and will not submit to Divine requireing, to manifested duty; will not yield obedience, but follows the way of his own devising? What can be more certain, but that such a course will end in utter ruin? It was a time of deep depression and hard labor for a long time, but at length the testimony of Truth was exalted over the powers of darkness, and the meeting ended with solemnity.

At Geneto. Here three families are indulged with a meeting. A number of friendly people attended with them. I addressed them with, 'There is a time to be born and

\* John Heald's brother William, who accompanied him in one of his religious visits to the eastward, recently died in Iowa in the 101st year of his age.

a time to die. We know we must die. We all agree in this, let our opinions be diversified in other respects as they may. As this is the case, we are led to enquire, what we shall do to be saved, or with the young man, who asked the Divine Master what he should do to inherit eternal life. He was referred to the commandments. These he had kept from his youth up, and he inquired, 'What lack I yet?' He seemed to be conscious there was more to be done, but when he understood what that was, he went away sorrowful. So it appears to be in our day. When people discover what is to be done, they turn away. Gospel ministers may labor to stir up the pure mind by way of remembrance. It is not their business to do the work. No man can redeem his brother, or give to God a ransom for his soul. Ministers labor to stir up the pure mind by way of remembrance sometimes, like the Divine Master did. He did not do the work; he informed the young man what to do. If Noah, Daniel or Job were here, they could save neither son nor daughter; so now, each one must do for themselves."

(To be continued.)

### The Ibex of the Alps.

The celebrated Alpine traveller, Edward Whymper, in his observations on this animal, says: 'The bouquetin, steinbock, or ibex, was formerly widely distributed throughout the Alps. It is now confined almost entirely or absolutely to a small district in the south of the valley of Aosta, and fears have been repeatedly expressed in late years that it will become extinct.'

It is not easy to take a census of them, for, although they have local habitations, it is extremely difficult to find them at home. But there is good reason to believe that there are at least six hundred still roaming over the mountains in the neighborhood of the valleys of Grisanehes, Rhêmes, Savaranche, and Cogno.

They appeal to the sympathies of all as the remnants of a diminishing race, and no mountaineer or athletic person could witness without sorrow, the extinction of an animal possessing such noble qualities; which, a few months after birth, can jump over a man's head at a bound, without taking a run; which passes its whole life in a constant fight for existence, and has such disregard of pain that it will stand for hours like a statue in the midst of the bitterest storm.

The destruction of the ibex, except occasionally by the King Victor Emmanuel in his hunting parties, is strictly prohibited, and forty-five keepers, selected from the most able chasseurs of the district, guard its haunts. Their task is not a light one, although they are naturally acquainted with those who are most likely to attempt poaching. If they were withdrawn, it would not be long before the ibex would be an extinct animal, so far as the alps are concerned. The passion for killing something, and the present value of the beast itself, would soon lead to its extermination. For as meat alone the ibex is valuable, the gross weight of one that is full grown amounting to from one hundred and sixty to two hundred pounds, while its skin and horns are worth ten pounds and upwards, according to condition and dimensions.

In spite of the keepers, and of the severe penalties which may be inflicted for killing a bouquetin, poaching occurs constantly. Know-

ing that this was the case, I inquired at Aosta upon my last visit, if any skins or horns were for sale, and in ten minutes was taken into a garret where the remains of a splendid beast were concealed, presumed to be more than twenty years old, as its massive horns had twenty-two more or less strongly-marked knobby rings. The extreme length of the skin, from the tip of the nose to the end of the tail, was five feet seven inches, and from the ground to the top of its back had been probably somewhere between three and four feet.

### Christian Council by Christopher Story.

Christopher Story's Epistle to Friends, in the year 1699, contains advice which may be profitably read even at this distant time. Some extracts from it are therefore offered for our Journal.

"Dear Friends,—Who are broken off from the wild olive, and grafted into the heavenly tree, unto you my love and life flow with an earnest travail upon my spirit, that as ye have known the watering showers of the Lord's heavenly rain to fall upon you, you may not only bud and blossom, but bring forth much fruit to the praise and glory of your heavenly Father; to whom be dominion and honor for ever and ever.

And now, dear Friends, who in measure have escaped the pollutions of this world, and in all your sojourning in the way to Zion, have a godly care upon your minds to cease doing evil, that ye may know a learning to do well; this is what I would remind you of; rest not satisfied in that ye are come by the teaching of God's grace to eschew evil, but also that ye may be found doing good; knowing that it is the fruitless trees that cumber the ground. It is high time for all to awake to righteousness; for many are called to awake from unrighteousness, which is well so far; but what will this avail, if fruits of righteousness be not brought forth? For as it is written, the axe is laid to the root of the tree; that the tree that brings not forth good fruit may be hewn down, and cast into the fire. Therefore it is greatly needful to abide in the vine into which ye are already grafted, that ye may be fruitful trees like Joseph of old, whose branches spread over the wall.

Let none sit down at ease in the way to Zion, like some of old, who began well, and ran well for a time, and sat down short of the true rest: or like the young man that came unto Christ, who had kept the commandments from his youth, yet wanted one thing; and not giving up to follow the Lord fully, sat down short of laying up heavenly treasure. Therefore let all follow the Lord fully, who is the Captain of our salvation, the great bishop and shepherd of the soul, who leads his sheep into green pastures, feeds his flocks as by the still waters, and gives unto his own eternal life.

Let every one's eye be single unto the Lord, that the whole body may be full of light. Such it is whose understandings the Lord doth open; they see their duty unto God, and their duty one unto another.

It is therefore time for all that profess the true and living faith that purifies the heart and works by love, to come forth and show themselves, and walk in the light of the new Jerusalem, where precedent is going before precept, example before doctrine, and actions and doings before words and testimonies; and

in this wise the Lord is greatly at work in the hearts of his people, to make them examples to others in the way to Zion where the saint's solemnity is met with.

Dear Friends, who have given yourselves up to follow the Lamb in the way of regeneration, and in some measure have known your garments washed; ye are to hold on your way, for the mark is before; such the Lord is drawing near unto, teaching them to lay up heavenly treasure. It is the Lord that teaches his people to profit, and such come to see in his light which makes manifest the will and mind of God to mankind, that it is 'not enough to glorify God in your bodies and spirits, which are the Lord's;' but we are to serve the Lord with what we may receive from his bountiful hand of his outward mercies, of which many are made large stewards. Remember the prayers and alms of Cornelius were accepted, and ascended up for a memorial before the Lord, to his great comfort and future happiness, and drew down a blessing upon his household. Seeing that to do good and to communicate, is such a needful duty, there is surely need to charge them who are rich in this world, not to trust in uncertain riches but to trust in the living God, who will call all men to an account of their stewardship one day; for what we enjoy is the Lord's; therefore all that would be clear in the day of their account, must wait for the Lord's ordering hand to be near them, who opened the heart of Lydia; and her service was to invite the Lord's people into her house; which being done in a right mind, brings a blessing; and such lose not their reward. And as the good reward attends the good work, it hath been much upon my mind of late, to remind the Lord's people to do good unto all, but more especially to the household of faith; and that all such who may have much of the outward mammon committed to their trust, be not short of feeding the hungry, clothing the naked, entertaining strangers, visiting the sick, and them that are in prison, which must be a necessary duty, seeing the Lord takes it as done unto himself. And that none of the Lord's people may be found wanting in the day of their account, let it be the care of all who expect a good reward from the hand of the Lord to sow plentifully that they may reap plentifully; for they that sow sparingly, saith the apostle, shall reap sparingly; and the time draweth near that every one must receive a reward according to his works. \* \*

Oh! therefore, that none may rest satisfied in feeding, clothing, and taking care of themselves in sickness, &c., supposing to lay up durable riches, and yet be unmindful of the poor, the widow, and the fatherless; such will do well to make a narrow search, and consider whether they are come to that religion which is pure and undefiled, that is, to visit the fatherless and the widow, in their affliction; and to keep unspotted of the world."

Let none after a desponding manner say, "Can any good come out of Nazareth?" The Lord is able of these stones to raise up children unto Abraham. Meanwhile, may we all endeavor to live by faith, and in that faith to trust in God, for in the Lord Jehovah is everlasting strength.

"Except the Lord build the house, they labor in vain that build it: except the Lord keep the city, the watchman waketh but in vain."

Review of the Weather for Eighth month, 1873.

The rainfall during the Eighth month amounted to 10.21 inches, which is 5.54 inches more than the general average for that month. The total amount for the summer is 19.20 inches. The range of the thermometer, was from 56° on the 24th, to 86° on the 2nd, or 30°. The mean temperature for the month was 70.36°. The average height of the barometer was 29.66 inches.

For "The Friend."

Believing that the following letter, written by John Newton in 1796, will interest many of the readers of "The Friend," I copy it for insertion. It is an account of one of "the poor of this world, rich in faith." He says to his correspondent:

"I believe your inquiries refer to an old woman who lived upon Wavertree Green, near Liverpool, and was known by the name of Dame Closs.

"Though very poor when I knew her, and I believe through her whole life, she was above the level of the common poor. She was a person of natural good sense and reflection, and had an agreeable address. Hers was a dignified and respectable poverty.

"Under the first impression of serious thoughts, she set out upon the laudable plan of aiming to please God. But she soon found that she could not even please herself. This startled her. She considered: 'I am certainly sufficiently partial in my own favor, and if I cannot please myself, how can I expect to please the holy and heart-searching God, who sees me as I really am, and doubtless notices much more evil in me than I am able to perceive.' This reflection threw her into great distress. But Hervey's 'Theron and Aspasio' came in her way, which afforded her a key to the Bible. During a week I had the honor of entertaining her in my house, before I was in the ministry, I was then obliged to use caution, lest she should be starved; for if at meal-time I occasionally spoke of the Lord Jesus, His love to sinners, His glory, or the like, she usually burst into tears, and could eat no more. She was a staunch church-woman; thought all sermons were good. They were so to her—for she would at least feed upon the text. I remember when this was my own case. But notwithstanding her prejudices, remaining ignorance, and want of discrimination in hearing; if humility, benevolence, sub-

mission to the will of God, strong faith, and a spiritual mind, are eminent parts of the christian character, she appeared to me one of the greatest and most exemplary christians I ever met with.

"A relation offered to settle ten pounds per annum upon her during his life. She said, if he could have settled it for her own life she would accept it; but such an addition for a time, would probably add to the number of her wants, and then if he died first, she would be worse off than before, upon this principle she refused his offer.

"She kept a little school. The parents of the children were mostly as poor as herself; and not being willing or able to pay longer, took the children away. She went round the neighborhood to them and said: 'I shall be glad if you can pay me, because I am poor; but whether you pay me or not, do let your children come to me; perhaps something I say may be useful to them when I am dead.'

"One morning I found her at breakfast upon dry bread and a little tea. I said to her: 'Dame, do you not like butter?' She answered: 'Yes, I like butter, but it is very dear, and I cannot afford it; but my Lord,' so she usually spoke of Him, 'takes care that I should have bread: it is very good, it is enough, and I thank him for it.' Once when I called, she had a good many fowls and chickens about her. I said, 'Dame, are these all yours?' 'Not one of them, sir, they belong to my neighbors. But they are accustomed to come to my door: I save all my crumbs and scraps for them. I love to feed them, for the sake of Him who made them.'

"When I asked her, 'Are you not uneasy at being alone, now you are so old?' (she was more than four score.) 'Suppose you should be taken ill in the night, you have nobody to help you.' She replied: 'Do you think my Lord does not know that I am an old woman, and live by myself? I am not uneasy—I be-

lieve He will take care of me.' She once said to me: 'I believe my Lord will not permit me to die for want of food; but if such should be His pleasure, I hope I am willing. Perhaps I should not find that so painful a death as many rich people feel, who live in great plenty. But I am in His hands, and He will do what is right,'—or to that purpose.

"There were several genteel families upon the Green; and as her general conduct was striking, and she had not been in the way of being marked with the stigma of Methodism, she was much respected. They often sent her a plate of viands from their tables. At last, two ladies called on her, and said, that they and some of their acquaintance had agreed to make her as easy as possible, for her few remaining days; and asked how much a year she would have? She said, 'I am old, and live quite by myself; but I believe I could get a room in a house not far off,' to which she pointed, 'if you will please to pay the rent of my room, and allow me five pounds a year, it will suffice. They offered to double it, but she declined, and said: 'Five pounds will be quite enough.' I knew both the ladies, and have no doubt that if she had asked thirty pounds per year, she might have had it.

"She did not live long after her removal into her new lodging. She went to bed one night in her usual health, and was found dead in the morning. She seemed to have died in her sleep, for there was no appearance of any struggle, nor any feature in her countenance ruffled. Thus she died alone at last. For though there were several people in the house, willing and ready to assist her, she needed no help from them! Such care did the great God, who humbles Himself to notice the worship of angels, take of a poor old woman, who was enabled to put her trust in Him, and to acquiesce in His dispensations."

J. Newton says: "I believe it is now forty years since she exchanged earth for heaven. I cannot pretend, at this distance of time, to perfect accuracy in recording all her expressions; though several of them affected me so much at the time, that they were deeply impressed upon my memory; and I believe you have them from me *verbatim*, as I had them from her own mouth. However, you may depend upon it, that the substance of what I have written is strictly true. Much more I could have added if my memory did not fail me."

*Locusts in Persia.*—All at once I was startled by a peculiar noise; at first it was like the sound of distant billows breaking on a rocky coast, but as each moment it came nearer and nearer, it resembled so much the roar of a rushing, mighty wind, that I fully expected we should soon be enveloped in one of those devastating hurricanes which Eastern travellers have described as rising, by magic as it were, and sweeping everything before them. Still the sky was of the clearest blue, and my tent-hangings hardly moved in the almost imperceptible breeze. With serious faces my audience listened attentively for a minute or two, and then, as the roar increased, sprang to their feet, uttering the ill-omened cry, "Malek, malek," "The locusts, the locusts!" From behind the hills about three miles off, a cloud appeared, casting a deep shadow over the plain, and advancing fast towards us; in a few seconds it was upon us, and then, as far as the eye could see, the at-

mosphere teemed with myriads of these fell destroyers; their serried ranks shut out the light of day and filled the Eeliant's hearts with fear and disquietude. On they went in compact swarms, beating the air with millions of wings, and apparently driven by some strong current; in half an hour they had vanished from view. All was still again; but hardly had my hosts had time to congratulate themselves on the departure of the scourge, when the peculiar noise was again heard. The cloud reappeared, returning towards us; the sun was again obscured; and now the locusts descended on the plain. By sunset they had all alighted; the green turf was so thickly covered with them, that strolling about in the evening one could not avoid crushing them by half dozens at each step, and a donkey's snort raised a cloud of them round his head; they penetrated into our tents, on to our beds and carpets; wherever we turned or looked there were locusts. Those I examined were of different colors, green, pink, yellow and drab; many of them were above three inches long. Their voracity is well known, but it is not only on vegetation that they commit ravages; they try their jaws on almost anything, leather, canvas, cloth, &c.; and my friend, the doctor, told me that a child was once brought to him at Baghdad with its eyelids and the skin of its nose completely eaten off by these gluttons.—*Mounsey's Caucasus of Persia.*

Selected.

Beloved be not disconsolate upon the view of any of your meetings being left bare of, or quite without instrumental ministers; though some branches be removed, the root remains. Oh! remember Christ's words a little before his departure from his disciples, as with respect to his humanity. "If ye love me keep my commandments, and I will pray the Father, and he shall give you another Comforter, that he may abide with you forever; even the Spirit of Truth; whom the world cannot receive, because it seeth him not, neither knoweth him; but ye know him, for he dwelleth with you, and shall be in you."

Again: "Where two or three," saith he, "are gathered in my name, there am I in the midst of them." If some eminent disciple or disciples be taken from you, the head Master remains, to whom you may have free access. If some small rivulets you have drunk of sometimes, be now discontinued, your way is open to the never-failing, inexhaustible spring-head. What reason have any then to be discouraged, or be cool in attending their meetings, for want of instrumental ministry? Would not this be like a slight upon the greatest and best Minister, who hath graciously promised his most excellent company, even at the least meetings, upon most reasonable terms? For the compassionate promises, as also this, "I will not leave you comfortless," are not only applicable to his then immediate followers, but to all his true disciples down to the latest posterity.

Let none, therefore, old or young, be ashamed of, or undervalue silent meetings; for they certainly are to all true worshippers of singular advantage, and dishonorable to none that rightly attend them, but quite the reverse. May all those who belong to meetings, wherein are no Friends in the ministry, seriously consider that their present situation is far better than if they were burdened with a

dead, dry, fruitless unacceptable ministry.—*David Hall.*

From the "Leisure Hour."

## The Persian Poet's Farewell.

The following poem is taken from a prose translation of the original, given in "Palgrave's Travels in Western Arabia." The sentiments are rather those of a Christian sage than of one unacquainted with the light of revelation, and it is difficult to understand how the writer could have attained such views of the character of God, and the immortality of the soul of man, without the aid of christian teaching. All that we are told of Ahmed el Ghazallah is that he was the most famous sage and poet of his day, and that he lived at Toos, in Persia, during the eleventh century. His farewell to his disciples is prefaced by an introduction to the following effect.

Ahmed el Ghazallah, the greatest of the sages of Persia, said to his disciples, "Fetch me white garments, for I must appear to-night in the presence of my king." His disciples hastened to fulfil his command, but great was their dismay when on returning with white garments they found their master dead. Lying on the ground beside him, they discovered a scroll, on which was written his farewell message.

"Tell thou to my friends, when weeping,  
They my words descry,  
Here you find my body sleeping,  
But it is not I!  
Now in life immortal hovering,  
Far away I roam,  
This was but my house, my covering,  
Tis no more my home.

"This was as the cage that bound me;  
I the bird, have flown;  
This was but the shell around me;  
I the pearl, am gone!  
Over me as o'er a treasure,  
Had a spell been cast,  
God has spoken at His pleasure,  
I am free at last!

Thanks and praise to Him be given  
Who hath set me free,  
Now forevermore in heaven  
Shall my dwelling be,  
There I stand His face beholding,  
With the saints in light,  
Present, future, past unfolding  
In this mirror bright.

"Toiling through the plain I leave you,  
I have journeyed on,  
From your tents why should it grieve you,  
Friends, to find me gone?  
Let the house forsaken perish!  
Let the shell decay!  
Break the cage, destroy the garment,  
I am far away!

"Call not this my death, I pray you,  
Tis my life of life!  
Goal of all my weary longings,  
End of all my strife.  
Think of God with love for ever;  
Know His name is love!  
Come to Him, distrust Him never;  
He rewards above.

"I behold each deathless spirit,  
All your ways I view:  
Lo, the portion I inherit  
Is reserved for you."

## SOLITUDE.

The silent heart which grief assails,  
Treads soft and lonesome o'er the vales,  
Sees daisies open, rivers run,  
And seeks (as I have vainly done)  
Amusing thought, but learns to know  
That solitude's the nurse of woe.

Selected.

We learn that we may be moral in our lives, orthodox in our opinions, plain in our appearance and our address, and even active in religious Society; yet unless we know the washing of regeneration, and the renewing of the Holy Ghost upon us, we are not true believers in Christ—branches grafted into Him and drawing all our life and strength from Him. Now, as we receive and obey Him, as He is revealed by his spirit to the soul, He commences, carries on and perfects, that regeneration without which we can never attain to holiness so as to see God. He shows us ourselves even as He sees us, sets our sins in order before us, gives unfeigned repentance of all our evil deeds and forgiveness of sins, sanctifies and justifies by faith in Him, through the baptism of the Holy Ghost and fire; and so makes us members of that church which has neither spot nor wrinkle or any such thing.

How total the change, how miraculous the new creature, truly all things are new and all things of God.

*Eating when Exhausted.*—When the strength or nerve power is already worn out or used up, the digestion of food only makes a fresh demand upon it, and if it be unable to meet the demand, the food is only a burden upon it, producing mischief. Our bodies have been compared to steam engines, the food being the fuel and the steam produced being the nerve power. The analogy holds good to a certain extent. If, when the steam is low, because the fire is low, you pitch in too fast a quantity of coal, you put out your fire, and if you have depended upon steam power to fan your fires, that is also extinguished. Beyond this the comparison fails. You may clean out your furnaces and begin again, but in the body the consequences of this overloading are dangerous and sometimes fatal. No cause of cholera is more common than eating freely when exhausted. The rule should be to rest for a time, and take some simple refreshment, a cup or a part of a cup of tea, a little broth, or even a piece of bread; anything simple and in small amount, just to stimulate the stomach slightly and begin to restore its power. After rest, a moderate quantity will be refreshing. Never eat a full meal when you are exhausted. Take first a small quantity of anything simple which may be handy, and rest. Then, after a time, proper food will be a blessing, not a burden. The fires will burn, the steam will be up, and you can go on your way safely. It is not amiss, in this connection, to say that children would avoid many a feverish night and many an attack of disease, if mothers would follow this rule.

Isaac Pennington says: "This I dare positively hold forth as a standing truth, which hath been sealed unto me by constant experience, that no man can fall in with, and obey the Light wherewith he is enlightened, but he must deny himself, and take up a cross to his own wisdom and will; which cross is the cross of Christ, which is the power of God to the salvation of the soul. And he that takes it up daily, and waits upon the Lord therein, shall witness the power of the Lord Jesus Christ, to the redemption of his soul; yea, then he shall be able in true understanding to say, this is light indeed, life indeed, power indeed! That powerful Arm which hath saved me

om sin, and breaks the snares, devices, and strength of the enemy before me, delivering me daily when none else can, and when my own strength and wisdom are as nothing, I cannot but call Christ, the living Power and Wisdom, God revealed in me, who will not give his glory to another. For he is the Lord God of pure life forevermore; and besides him there is no such Saviour. Yea, blessed be the name of the Lord forever, the days of mourning after salvation are over with many, and the days of reaping and enjoying salvation are come, which shall endure with the Israel of God forevermore! Amen!"

#### Debt and Thrift.

You may educate a man as highly as you please; you may give him the franchise, and all upon him to exercise it, as often as you think fit; you may provide the best newspaper in the world to tell him what is going on, and museums and galleries without end, to cultivate his taste; but no amount of political freedom, or of literary culture, or refinement, will carry with them the sense of independence or of self-respect, so long as he knows that he is in somebody else's power, that he has on his shoulders a burden of debt from which he cannot shake himself loose. Debt is a slavery almost as degrading, and I am afraid, almost as common, as the kindred slavery, drunkenness. And I may say, in passing, that if temperate habits are likely to keep a man from debt, as the advocates of temperance are always and very truly telling us, so, on the other hand, there is nothing more likely to create intemperate habits than the perpetual harassing worry and anxiety of pecuniary embarrassments, while nothing more effectually confirm in any man the resolution to keep sober than the desire to lay by, in youth and middle life, what may be a provision for sickness, for old age, for the widow whom he may leave, or for the children who may come after him. What we contend for, briefly, is this; that a very large part of the suffering which we all deplore is caused by want of habits of economy and forethought; that where people have been accustomed for many years to live from hand to mouth it is all but impossible, as a rule, to induce them to change their habits; that the habit of saving, so as to be beforehand with the world, if it is to be acquired at all, must be acquired early; but that it is not so acquired, as a rule, simply because in very few places as any serious attempt been made to teach it. It is not taught by precept at school; it is not taught by example at home. Again, we say that it is not enough to establish savings-banks and expect that people will go to them. We must bring the banks to the people. If we do not do that, the system is faulty, just in the same way that the system of drainage is faulty in some newly built places, where you have an excellent sewer running under the streets, but where nobody has taken care to see that the house-drains have any connexion with it. Those who are practically conversant with friendly societies, penny banks, and institutions of that kind, could give you various illustrations of the willingness of people to avail themselves of these things if they were brought literally home to their doors, and of their indifference and dislike to use them, if the using them involves going only a few hundred yards out of their way.—*Lord Derby at Provident Knowledge Society.*

For "The Friend."

The following lively Epistle received from a Friend in England, is offered for insertion in "The Friend." It is slightly condensed from the original.

#### An Epistle of Holm Monthly Meeting—1697.

The following Epistle is so descriptive of the lively zeal and exercise of our predecessors, and their solicitude that, in all things they should walk worthy of their high and holy calling, and by their daily walk and conversation among men, give proof of their fidelity by carrying into practice those religious principles they had adopted by conviction—that it is thought worthy of revival at this time.

The painful declension from primitive zeal and fidelity in bearing the Christian testimonies emanating from the principles of truth professed by us, is, as it was formerly, a palpable evidence of the want of submission to the Light of Christ and the operation of his Spirit in the heart, which if regarded and allowed to work therein, will effectually cleanse and purify the *inside*—the heart of man.

Would that each one among us might be induced to examine closely, and see how far, in our daily walk before men, we are upholding the pure standard of Truth, as lifted up by the earlier founders of our Society under the constraining influence of the Spirit of Christ; and, by Divine help, be increasingly faithful herein,—lest unhappily we should fill the fearful position of such as give occasion of stumbling to tender, inquiring minds, and thereby hinder the Lord's work from progressing in the earth.

The Epistle is addressed by Friends of Holm Monthly Meeting, Cumberland, to its own members, of whom there seems to have been in 1751, as recorded in the minutes, 106 families and 23 single individuals.

A portion of the area comprised in its limits borders on the Solway Firth, and accounts for the allusion to the practice of fishing on the first day of the week.

It is transcribed from the original, found among the ancient records of the meeting.

1st mo., 1873.

*From our Men's Meeting, held at Longnewton, the 13th of Sixth month, 1697.*

Dear Friends and Brethren,—From a deep sense and a holy zeal that entered our hearts for the name of the Lord God of our fathers, the advancement of His blessed truth, and the preservation of His people within the bounds and limits thereof, that so you may be the redeemed of the Lord, and sanctified throughout in body, soul, and spirit, and that having made the inside clean, the outside may be clean also.

These following particulars opened in our minds in the love of God and the unity of his Holy Spirit, to recommend to you by way of advice, fervently desiring that all Friends where this may come would let a concern enter their hearts, and be stirred up in love to the truth for the same, in practice in their respective meetings and places, as the wise-hearted men and women were of old, when the first tabernacle was a building.

Now, dear friends, first we entreat you for the glory of God and the everlasting benefit of your souls, to be diligent in keeping up the week-day meetings, according to former advices, and that notice be taken of the due observation thereof.

We tenderly advise that all Friends in their respective places, and in all their undertakings and commerce with the sons of men, keep to the form of sound words, plainness of speech, or truth's language, both in speaking and writing—naming the days and months according to Scripture, and not after the manner of the heathens, from the first day to the seventh day, and from the first month to the twelfth month; and that Friends in the fear of the Lord, stand in the authority and simplicity of the power of truth, not giving flattering titles to men or women, as in calling them Sir or Mr., Madam or Mrs., to ingratiate yourselves into their affections for to favor your cause, but keep out of the spirit of the world in all things, we entreat you, for the truth's sake, as in company or drinking, to forbear saying—here to thee,—or I'll pledge thee,—for the best way is to be (silent) when they drink to you.

It is with true love tenderly to advise and entreat all Friends to be very careful in their habits or garments from the head to the foot, not to make or wear anything which is superfluous or needless, as broad and fringed handkerchiefs, needless buttons, wide-skirted coats and great cuffs, fringed neckcloths, or any other vain fashion not becoming our holy profession, but that Friends make and also wear such necessary clothing as is really plain and decent, that so the glory of the world may be staid, and our glorying may be in the cross of our Lord Jesus Christ.

Beware of covetousness, overreaching, or many words in dealing, we beseech you for the truth's sake, and we further advise in bowels of unfeigned love that Friends would be very careful not to buy any sort of house-planting or furniture but what is really plain and in its place serviceable, and that no Friends adorn their dwelling-houses with painted vessels of diverse colors, painted hangings or curtains, carved wood of images; and that Friends when they have occasion would forbear to buy curiously wrought saddles or fine bridles with buckles and nails placed upon them only for an ornament yet no way needful, but that we still keep to plainness both in speech, habit and dealing, as we have often been advised in general terms, and now of late in the last Yearly Meeting's Epistle to Friends of the Monthly and Quarterly Meetings, which we have made some particular observations upon, and find it our Christian duty to take inspection unto some things relating to our holy profession and church discipline to that end all who profess the way of truth may stand clean in their testimony-bearing against the corruptions of the times and vain fashions of the world, which the youth of our age are too apt to learn like Israel of old, who suffered some of the (Canaanites) to dwell among them, that taught them the manner of the gods of the nations, which was the cause of drawing their hearts from the Lord, the Fountain of living Water, and hewing out unto themselves broken cisterns that would hold no water.

And, dear Friends, brethren and sisters, for the reverent esteem that we have for the name of the Lord and our holy profession, as also for the worship of God which upon the first day of the week we so frequently meet about, that no Friends for the time to come go to any sort of labor or public employment, or that which upon other days of the week is lawful and commendable, as binding of and

loading of corn, scaling of manure, going a fishing with lines and nets, riding with horses or carts to bring up nets and fish, or any other employment which the Truth will not justify us in, neither warrantable by the law of the nation; not that we would debar Friends of the liberty which Christ our Lord allowed in the dawning of the Gospel day in case of real necessity; but inasmuch as the primitive Christians did in the wisdom of God after Christ's resurrection set the first day of the week apart for the worship of God, which was the third after he suffered and the first of his said resurrection according to the Scriptures, that none of us, as we have said, go to any public labor on that day, for it is not only an evil example to people, but springs from the root of covetousness and a distrusting that secret hand which daily provides for us. Our heart is opened in true love a little on this wise with fervent desires to the Lord to awaken the spirits of such as be at ease in Zion, that so they may not seek their own profit but every one another's wealth, for here is the true wisdom which all her children are justified by (born) of the incorruptible Word which lives and abides forever, unto which we tenderly direct you for life and salvation—the which will be teacher, leader and director through this vale of misery; in the sense of which we tenderly salute you, desiring that the God of all our mercies may be truly worshipped, feared, honored and renowned, who is God over all, eternally blessed forever.

Signed on behalf of our said meeting.

*Jesuits Suppressed by Pope Ganganelli*—After the strictest examination of every argument which could be produced either against or in favor of the Jesuits, Clement XIV. at last named a commission, consisting of five cardinals, some prelates, and advocate, to assist him in the execution of his design. On the 21st of July, 1773, he signed the Brief which suppressed that famous order. On the 10th of August following, at nine o'clock in the evening, the commissioners appointed for the execution of the Brief, accompanied by a notary, and attended by a guard, went to the different houses of the Jesuits, and having assembled the brethren, read to them the brief of their extinction; at the same time, telling them that the Apostolical Chamber would furnish each of them with a secular habit, pay the travelling expenses of those who chose to quit Rome, their books and effects should be delivered to them, and pensions should be granted.

As the Jesuits had then a large share in the education of youth, the sudden shutting up of their schools might have been injurious, if Clement had not given a new proof of his prudence and genius. Having shut himself up for several days, admitting only some special advisers, he sketched a complete scheme of education; and having selected a number of priests and friars who by their talents and characters were suited for the posts, he immediately appointed them professors and teachers. To the surprise and delight of the Romans, there was no interregnum or break in the educational work, the schools being opened under the new masters, when many feared they must have been closed for a long period. Soon after this decided action, the health of the Pope gave way. It was said by some that the multiplicity of business had weakened his

strength, but as he was of robust constitution and temperate habits, there was every prospect of long life. The principal symptom was inflammation and pain of the bowels, which the physicians could neither explain nor relieve, and which carried him off, after a few months in his 70th year. It is generally believed that his death was the effect of poison, and that he fell a sacrifice to the revenge of the Jesuits.—*From Leisure Hour.*

For "The Friend."

It is not our desire to eulogize the dead in recording their names and virtues, but to stimulate the living that they may follow them as they followed Christ, and to "mark the perfect man and behold the upright, for the end of that man is peace."

Such was Joseph Snowdon. A man of clean hands and a pure heart; whose innocent life and conversation, marked with strict integrity and uprightness, exalted him above the great of this world. Choosing the Lord for his portion, he set his love upon him and honored him, as David testifies in his xci psalm, of those who trust in the Lord: "He that dwelleth in the secret place of the Most High, shall abide under the shadow of the Almighty," &c.

Bearing the yoke of Christ in his youth, and yielding to the manifestations of Divine Grace in his heart, he grew from one degree to another in the knowledge and fear of the Lord; exemplifying the doctrine of our Lord and Saviour, "if any man will be my disciple let him take up his cross daily and follow me."

Knowing first the enemies of his own household slain, he was enabled to preach to others in the expressive language of conduct, dealing justly, loving mercy, and walking humbly with his God.

During the course of his life, many trials and difficulties assailed our Society, on account of which his spirit was often bowed under the deep concern he felt that the truth might not suffer reproach, and in the meekness and gentleness of Christ, he bore a noble testimony against unbelief, and the innovations which still abound, seeking not the honor of man, but the glorious cause he had espoused. As an elder, he was discreet and tender—a loving father in whom we could confide,—dividing the word aright, yet careful not to cry peace when there is no peace.

Thus he became a pillar in the Church to go no more out; and when the final hour arrived, our beloved friend was found waiting for the coming of his Lord, and queried—can this be death? If it is, it has no sting! His work was done, and his end peace; having exchanged the covering of mortality for the white robe and diadem of everlasting life, and is now, we humbly trust, through the merits of his Redeemer, with that company John saw who surrounded the Throne with palms in their hands, singing praises to the Lord God and the Lamb.

*Keeping Faith.*—Sir William Napier was one day taking a long country walk, when he met a little girl about five years old sobbing over a broken bowl. She had dropped and broken it, in bringing it back from the field to which she had taken her father's dinner, and said she would be beaten on her return home for having broken it. As she said this, a sudden gleam of hope seemed to cheer her. She innocently looked up into Sir William's face and said: "But you can mend it, can't you?" He

explained that he could not mend the bowl but the trouble he could overcome by the gift of a sixpence to buy another. However, on opening his purse it was empty of silver, and he promised to meet his little friend on the same spot at the same hour next day, and to bring a sixpence with him; bidding her meanwhile tell her mother she had seen a gentleman who would bring her the money for her bowl next day. The child, entirely trusting him, went on her way comforted. On his return home he found an invitation awaiting him to dine in Bath the following evening, to meet some one whom he especially wished to see. He hesitated for some little time, trying to calculate the possibility of giving the meeting to his little friend of the broken bowl and still being in time for the dinner party in Bath, but finding that this could not be, he wrote to decline accepting the invitation, on the plea of "a previous engagement," saying "I cannot disappoint her; she trusted me."—*Late Paper.*

Selected.

At this time, while young, I was favored to receive much comfort in reading the Holy Scriptures, which I often took up when alone to my consolation and encouragement. The deeply did I lament, that any of my precious time had been spent in perusing publication of an unprofitable tendency; such as play and romances; and I was made sensible that nothing I had ever been in the practice of had so much alienated my mind from the love and fear of God, or led me so far from the simplicity of the pure Truth, as books of this kind. How often did I wish I could warn the whole world of their *pernicious effects*, and especially the young people in our Society. Pennine's remark, brings to my remembrance how in an instant I was entirely weaned from ever desiring again to look into a book of this description. It was by a few words expressed by a beloved friend when I was about reading to her one night after we got up stairs, and were retiring to bed. She queried with me and I believe under Divine influence, "Dear Mary, is such a subject likely to profit us upon our pillows?" The question so forcibly struck my mind, that I very willingly laid down the volume, and to the best of my remembrance I never more read a page in that, or anything of the like kind. I have often thought those few words were indeed, "Like apples of gold in pictures of silver."—*Mary Alexander.*

Keep in the littleness, O! the littleness—how beautiful and how safe.

## THE FRIEND.

NINTH MONTH 20, 1873.

"I will also leave in the midst of thee afflicted and poor people, and they shall trust in the name of the Lord."

Though this was spoken by the prophet, in the name of the Most High, to Israel of old when rebellion and corruption had brought their inseparable punishment, we apprehend it has been likewise experienced in every age of the christian church. The Lord's faithful, dedicated people, living and serving him in the midst of those who disregarded the law o

righteousness, and followed the devices of their own hearts, in every generation, have been poor in spirit under a humiliating sense of their own frailty and unworthiness, and oppressed with sorrow on account of the imputation of their fellow men, in pursuit of vanity and lies; endangering the loss of their immortal souls. In enduring this kind of suffering, his believing children are in sympathy with their immaculate Lord, who is described as a man of sorrow and acquainted with grief. He knew what was in man; and, as the judge of quick and dead, what would be the sentence of reward or punishment, when the awful assize that was hastening on, eternal recompense was to be awarded; and he told the unbelieving Jews, "If ye believe that I am He, ye shall die in your sins and whither I go ye cannot come." Having the tenderest feelings of a man, his heart was filled with love and pity for those He saw around him, sinning and hastening to destruction; and his whole conduct and conversation show that He was "oppressed and afflicted." The apostle enjoins upon the believers to follow in his footsteps; but as He had the Holy Spirit bodily, or without measure, and his was a work lying altogether beyond man reach, and He bore suffering for depths of guilt and sin which our mere finite nature could not sustain, in which, therefore, He is not imitable; so, following in his footsteps, his reference to things that belong to our humanity alone, and that the Spirit which governs our thoughts, words and actions could be the same, though in different measure, as He ever manifested.

There is as great a difference in the sorrows of the Lord's "afflicted and poor people" from those of the worldling as there is in their joys. Hearts unrenewed by Divine Grace know nothing of the "tribulations of the gospel," they lack any sense of divine support when affliction overtakes them, or the feelings of loneliness, desolation, and remorse force themselves into notice even in the hours of toil or rest. But those who abide in Christ, and declare plainly that they seek a better country, it is an heavenly, although they must take their share of the trials common to humanity, and be given up to endure the afflictions peculiar to the people of God, yet, through faith, they see Him who is invisible, and because they live they know that they live also, and are inheritors of that peace which Christ left all his faithful followers. They can count on all joy when they fall into divers temptations, knowing that the trial of their faith will quicken patience, and that *its* perfect work will make them perfect and entire, wanting nothing. Weeping may endure for a night, but sorrow cometh in the morning; and great indeed is the consolation of those to whom it is given not only to believe in Christ but to suffer on his behalf. Though they may at times experience what it is to be troubled on every side, yet not distressed; perplexed but not in despair; persecuted but not forsaken; cast down but not destroyed; yet having the sentence of death in themselves that they should not die in themselves, but in God who raiseth the dead, they can rightly appropriate the encouraging language of the Apostle where he says: "But rejoice, inasmuch as ye are partakers of Christ's sufferings; that when His glory is revealed, ye may be glad also in exceeding joy."

But we cannot realize this peace and joy

in believing and partaking of the sufferings to be filled up for the body's sake, if we submit to the discipline of the Spirit only as an occasional thing. The work of regeneration and sanctification which prepares the soul to stand in the unveiled presence of infinite Purity, is characterized by the severity of that Love, which not only gave Christ for a propitiatory sacrifice for the sins of the whole world, but which scourgeth every son whom He receiveth. The yoke of Christ must be borne regularly and habitually; and we have need to be aroused to close self-examination, if we find ourselves floating along in what seems like uninterrupted enjoyment, lest we be satisfying ourselves with a rest short of the true rest, and which partakes more or less of conformity to the world. Walking by faith and not by sight is the condition of christian life; but that faith must be of the operation of God, and will show its character by the works springing from it. Let it then not be forgotten, that "If ye endure chastening, God dealeth with you as sons, for what son is he whom the Father chasteneth not? But if ye be without chastisement, whereof all are partakers, then are ye bastards and not sons."

Oh, the blessedness of being of the number of the "afflicted and poor people," whom the Lord preserveth in the midst of a high minded and rebellious generation! may they continue to trust in his Name, and let their lights so shine that others seeing their good works may glorify their Father who is in heaven.

#### SUMMARY OF EVENTS.

FOREIGN.—Dispatches from British consuls in various sections of France, Russia, Italy and Germany, report that the cholera is on the increase in those countries.

Several more railway accidents have occurred in England. The alarming frequency of disasters of this character of late has been the subject of much comment. A number of the English papers call upon the government to interfere and compel the managers of roads to adopt more stringent measures for the prevention of similar occurrences.

It is expected that Queen Victoria will soon visit Homburg, a watering place near Frankfort.

The bark *Prospero*, which sailed from Liverpool for San Francisco, has been totally wrecked off Bahia, Brazil.

The Admiralty office has received a dispatch announcing the capture by the British steam sloop *Daphne*, of a slave ship in the Indian Ocean, near the Seychelle Islands. There had been terrible suffering in the slave ship from small pox, of which two hundred and fifty slaves had died out of three hundred taken on board. The remaining fifty were terribly emaciated from disease and want.

London, 9th mo. 15th.—Consols 92½. U. S. 10-40 bonds 90¾.

Liverpool.—Uplands cotton, 9d.; Orleans, 9½d.

There have been some deaths in Paris from cholera, but the disease does not yet prevail to any great extent.

A party of Mormon emigrants having arrived in Paris on their way to the United States, they were notified by the Prefect of Police that if they held their religious exercises in public they would be expelled from the city.

The evacuation of Verdun by the German forces was to be complete on the 13th inst., when a general illumination and rejoicing were to take place.

The vine-disease is making great havoc in Portugal. A Vienna dispatch says: Prince Charles Esterhazy, only son of the late Prince Esterhazy, the eminent Austrian statesman, has committed suicide.

The Emperor of Germany was expected at Vienna on a visit to the Emperor of Austria, about the middle of the present month.

A conference of European and American juriconsults has been held at Ghent, in which several topics of international law were discussed, viz: International arbitration; the three rules of the Washington treaty, and the codification and adoption by treaty of the regulations relative to private property in time of war.

The conference organized as a permanent institution, appointed a committee to draw up and issue a manifesto, and adjourned to meet in Geneva next year.

A Bombay dispatch of the 11th says: A serious riot broke out several days ago in the province of Madras. Troops were sent to the scene of the disturbance and restored order; not, however, before they had fired upon the rioters and killed eight of them.

Salmeron has been elected President of the Spanish Cortes. In his speech on taking the chair he urged the Deputies to give their undivided support to Castelar's administration.

The Carlist forces have captured Fort Vaccoolos. The resources of the northern provinces have been exhausted by the war and the exactions of the Carlists. Necessities of life even have become scarce, and thousands of families are reduced to indigence. An express train which left Vittoria for Madrid on the 12th, while going at full speed, ran off the track; the cars were wrecked, and seventeen persons killed and about seventy injured.

The government was making great exertions to get an adequate military force in the field.

A body of insurgent troops made a sortie from Cartagena on the 12th, but met with a repulse; in a second attempt they were more successful. They burned the fascines of the works of the government forces, and captured several pieces of artillery together with a number of mules.

A Paris dispatch of the 14th gives a report from the Spanish frontier to the effect that the Carlists have defeated General Loma, between Gayas and Vidarga. The Republicans, it is stated, suffered severely in this engagement, and their army is badly crippled by the reverse. The Carlists are investing Tolosa. Madrid dispatches of the 15th state that in this battle there were about 10,000 Republican troops engaged, and 14,000 Carlists, but deny that the government forces were defeated.

The leaders of the Cartagena insurrection are seeking to secure the co-operation of the Carlists in their efforts to raise the siege.

General Mariona has been appointed generalissimo of the armies of Spain.

A Havana dispatch says, the fire by which the Plaza Vapor was recently destroyed, was a very disastrous one. The total loss is estimated at \$3,000,000, and the insurance is only \$524,000, nearly all in English companies. Upwards of 2500 people who occupied the buildings are homeless, and nearly all have lost every thing. Owing to the rapidity with which the fire spread, very little property was saved.

The Pope has issued a brief, highly commending pilgrimages to "the Holy Land, the sacred shrines of Italy, and the various foreign sanctuaries." He grants indulgences to the pilgrims, and also to those who attend the sacraments, visit the churches, and pray for the extirpation of heresies, the conversion of sinners, and the triumph of the church. On the other hand pilgrimages in Italy have been forbidden by the government prefects.

A number of emigrants who left England for Brazil, have returned disappointed. They complain that the promises made them by agents of the Brazilian government in England were flagrantly broken.

UNITED STATES.—*Miscellaneous*.—The interments in Philadelphia last week numbered 290, including 122 children under two years. There were 47 deaths of consumption, 22 cholera infantum, 27 marasmus, 9 typhoid fever, and 10 old age.

The public schools of Philadelphia were attended in 1872 by 84,357 pupils, or, including the night schools for the instruction of apprentices and young men, the number was 92,974. There are 158,016 registered voters in this city.

The U. S. Secretary of the Navy has received a dispatch from St. Johns, N. F., stating that the camp where the crew of the *Polaris* spent last winter, was found by the steamer *Tigress* on the 14th ult. It was near Littleton Island, in lat. 78° 23' North. Six Esquimaux were living there, and from them and the manuscript record left behind by Captain Buddington, it appeared that the party numbering fourteen men, had left there the first of Seventh month, in two boats which they had made from the wreck. It was supposed they would endeavor to reach the coast of Greenland, about 250 miles distant, where they might hope to fall in with a whaling vessel. The *Polaris* remained afloat sometime after the departure of the boats, when she parted her moorings in a gale, drifted two miles, and sunk in the ice. Icebergs now cover the wreck.

Special Treasury Agent Bryant, who for some years past has been stationed in Alaska to look after the interests of the government in connection with the seal

business, has arrived in Washington and reports a prosperous condition of affairs on the Seal Islands, and that the natives are fast becoming Americanized.

There were 578 deaths in New York last week.

**The Markets, &c.**—The following were the quotations on the 15th inst. *New York*.—American gold, 111½. U. S. sixes, 1881, 116½; ditto, 1868, 116; ditto, new fives, 112½. Superfine flour, \$5.80 a \$6.25; State extra, \$7 a \$7.35; finer brands, \$7.50 a \$10.75. White Michigan wheat, \$1.84; amber western, \$1.69; red do., \$1.65 a \$1.67; No. 2 Chicago spring, \$1.53; No. 3 do., \$1.49. Oats, 46½ a 52 cts. Western mixed corn, 65 a 67 cts.; yellow, 69 cts.; white, 68 a 71 cts. *Philadelphia*.—Uplands and New Orleans cotton, 20½ a 21½ cts. for middling. Superfine flour, \$4 a \$4.50; finer brands, \$5 a \$10. White wheat, \$1.75 a \$1.85; amber, \$1.67 a \$1.70; red, \$1.60 a \$1.65; No. 2 spring, \$1.45. Yellow corn, 65 a 66 cts. Oats, 43 a 49 cts. Smoked hams, 14 a 16 cts. Lard, 8½ a 9 cts. Clover-seed, 9½ a 10 cts. The receipts of beef cattle at the Avenue Drove-yard were about 3000 head. Choice and extra sold at 7 a 7½ cts. per lb. gross; fair to good, 6 a 6½ cts., and common, 4½ a 5½ cts. Sheep sold at 5 a 6½ cts. per lb. gross. Receipts 14,000. Hogs sold at \$7.25 per 100 lb. net for corn fed. Receipts 7,000 head. *Chicago*.—Spring extra flour, \$5.50 a \$6.25. No. 1 spring wheat, \$1.16½; No. 2 do., \$1.10½; No. 3, \$1.07. No. 2 corn, 42½ cts. No. 2 oats, 30 cts. No. 2 rye, 68 cts. No. 2 barley, \$1.32 a \$1.35. Lard, 7½ cts. *St. Louis*.—No. 2 winter red wheat, \$1.62; No. 3 \$1.42. No. 2 mixed corn, 44 cts. Oats, 34 cts. Barley, \$1.45 a \$1.50. *Baltimore*.—Western and Penna. red wheat, \$1.50 a \$1.60. Southern white corn, 75 a 77 cts.; yellow, 64 cts.; western mixed, 63 cts. Oats, 42 a 46 cts. Sugar-cured hams, 14 a 16 cts. Lard, 8½ a 8½ cts.

#### WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to CHARLES J. ALLEN, Street Road P. O., Chester Co., Pa. Applications may also be left with JACOB SMEDLEY, 304 Arch St., Philadelphia.

#### WANTED

A teacher in the classical department on the boys' side at Westtown School.

Application may be made to

Thomas Conard, West Grove, Chester Co.  
Joseph Walton, Philadelphia.  
William Evans, "  
Charles Evans, "

#### WANTED

A suitable woman Friend to act as Governess at Westtown Boarding School. Apply to  
Rebecca S. Allen, Philadelphia.  
Sarah A. Richie, "  
Susan E. Comfort, Knox St., Germantown.  
Lydia L. Walton, Moorestown, N. J.

#### EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of Tenth month.

Application may be made to

Elton B. Gifford, 28 North Third St.  
Ephraim Smith, 1110 Pine St.  
James Bromley, 641 Franklin St.  
Richard J. Allen, 472 North Third St.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Fall term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philada.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

#### RECEIPTS.

Received from Joel Thompson, Jr., and Robert L. Walter, Pa., per Thomas Walter, \$2 each, vol. 47; from Joseph Rhoads, Pa., \$2, vol. 47; from Mary Jane Chambers, Pa., \$2, vol. 47; from Sarah E. Allen, City, \$2, vol. 47; from George L. Smedley, Pa., per Jacob Smedley, \$2, vol. 47; from Daniel Nichols, N. Y., \$2, to No. 18, vol. 47; from Letitia Reeve, N. J., per William Evans, \$2, vol. 47; from Levi Varney, Canada, \$2, vol. 47; from George D. Smith, O., \$2, vol. 47; from Samuel W. Stanley, Io., \$2, vol. 47; from Joseph Pusey, Pa., \$2, vol. 47; from Achsah Reeve, N. J., \$2, vol. 47; from Jehu L. Kite, Agent, O., \$2, vol. 47, and for Lindsey Cobb, Mary Warrington, Jane Woolman, Abner Woolman, Joseph Lynch, Robert Ellyson, Joseph Painter, Eliza Ann Fogg, James H. Crew, John H. Stanley, Thomas B. Woolman, Mary Crew, Rebecca Carr, and Edwin Fogg, \$2 each, vol. 47, for Ann Kailey, \$2, to No. 4, vol. 48, and for Lydia Warrington, \$2, to No. 18, vol. 48; for James Kitley, Canada, \$2, vol. 47; from Asa Garretson, Agent, O., \$2, vol. 47, and for Rachel Green, Dempsey Bundy, Robert Plummer, Jehu Bailey, John Hall, Joseph W. Doudna, Sarah Bailey, George Tatum, Tacy T. Starbuck, Catharine Wilson, John Bundy, Jesse Bailey, Barclay Smith, Asenath Crew, Jonathan T. Scofield, Aaron Frame, Eli Kennard, Dr. Ephraim Williams, Isaac Lightfoot, William Stanton, Esther Sears, Amelia Garretson, and Joseph Doudna, O., and Elisha Starbuck, and Homer Gibbons, Io., \$2 each, vol. 47, and for Francis Davis, O., \$1, to No. 52, vol. 47; from Harvey Chace, R. 1., \$2, vol. 47, and for Miller Chace and Oliver Chace, Mass., \$2 each, vol. 47; from Elisha Roberts, N. J., \$2, vol. 47, from Mary Ann Baldwin and John Erskine Baldwin, Pa., per Thos. P. Conard, \$2 each, vol. 47; from Edward Hedley, City, \$2, vol. 47; from Ann D. Sinnickson, N. J., \$2, vol. 47; from Mary B. Buffinton, Mass., \$2, vol. 47; from Joseph Scattergood, Jr., Agent, Pa., for B. Franklin Wickersham, Margaret W. Pyle, Edward H. Hall, Margareta E. Reed, Sarah Yarnall, Rebecca Conard, S. Emlen Sharpless, and Enos E. Thatcher, \$2 each, vol. 47; from Elwood Thomas, Pa., \$2, to No. 14, vol. 48; from Hannah Henrie, Pa., \$2.50, to No. 14, vol. 47; from David Heston, Pa., \$2, vol. 47; from Susanna Judkins, O., \$2, to No. 30, vol. 47; from Samuel Embree, Io., \$7, to No. 27, vol. 48; from Thomas Perry, R. 1., for Elizabeth Perry and George C. Foster, \$2 each, vol. 47, and for Charles Perry, \$2, to No. 11, vol. 48; from William Hill, Me., \$2, vol. 47; from William Hicks, City, \$2, vol. 47; from R. Raley, for Joseph P. Lupton, Joseph Raley, Asenath Raley, and Israel Steer, O., \$2 each, vol. 47, and for Israel Sidwell, O., to No. 18, vol. 47; from William F. Newbold, N. J., \$2, vol. 47; from Benjamin B. Leeds, N. J., \$2, to No. 17, vol. 48; from Abel J. Hopkins, Pa., \$2, vol. 47; from Job Young, Io., \$2, vol. 47; from Richard Mott, Agent, Io., for Eli Hodgkin, Thomas C. Battey, John Hodgkin, William P. Deweese, Benjamin V. Stanley, Joseph Battey, R. W. Hampton, Thomas Hoyle, Joseph Patterson, and Rebecca Askew, \$2 each, vol. 47; from John Boadle, N. J., \$2, vol. 47; from Sarah Bailey, Pa., \$2, vol. 47, and for Isaac B. Webb, \$2, vol. 47; from Nathan Woolman, City, \$2, vol. 47, and for Edward W. Woolman, \$2, vol. 47; from John Woolman, City, \$2, vol. 47; from Seth Warrington, N. J., \$2, vol. 47; from Sarah Ann Cooper, City, \$2, vol. 47; from Royal Woodward, N. Y., \$2, vol. 47; from Joseph E. Taylor, Pa., \$2, vol. 47; from William Wood, New York City, \$2, vol. 47; from William Pickett, O., \$2, vol. 47; from Micajah M. Moran, Agent, O., for Frederick Maerck and Aaron Stratton, \$2 each, vol. 47, also for the following friends, the acknowledgment of which has been delayed owing to a miscarriage of the letter of advice, viz., Mark Bonsall, Samuel Street, Stacy Cook, Sr., Sarah Ann Cope, George Blackburn, William Darlington, Daniel Boulton, Theophilus Moran, Hannah Bonsall, William Fisher, Richard B. Fawcett, and Elizabeth Hunt, \$2 each, vol. 47, and Edwin Holloway, \$7, to No. 52, vol. 47.

Remittances received after Fourth-day morning will not appear in the Receipts until the following week.

DIED, on the 18th of 5th mo. 1873, MARY PASSMORE, in the 83d year of her age, a beloved member and elder of Whiteland Particular and Goshen Monthly Meeting, Chester Co., Pa. She was firmly attached to the doctrines and testimonies of our religious Society, and during her long and useful life, a diligent attendant of meetings, and concerned to wait for the arisings of life therein, adorning the profession she made by a consistent life and conversation. Being liberal in dispensing according to her means, to the necessities of others,

she was a succorer of many; and in her capacity as an elder, was often enabled to speak a word in season to the weary, so that it is believed that to her the language was applicable "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me;" and "Come ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world."

—, at his residence, Parkersville, Chester Co., Pa. on the afternoon of 7th month 5th, 1873, ABRAHAM BAILY, in the 72d year of his age, an esteemed member of Kennett Monthly Meeting.

—, on the 15th of the 8th month, 1873, at his residence, near Haddonfield, N. Jersey, JOSEPH SNOWDEN in the 83d year of his age, a valuable and beloved elder of Haddonfield Monthly Meeting. This dear Friend having in early life yielded to the visitations of Divine Grace, became a diligent scholar in the school of Christ and was thereby prepared for usefulness in the church. Being endowed with gifts both intellectual and spiritual which qualified him for important stations in our religious Society, he filled a number of them, with much satisfaction to his friends and in promotion of the welfare of the cause of Truth. In common with others partook largely of the trials preceding and attending the separation from the Society in 1827; being one comparatively few in his Monthly Meeting, who remained with Friends when the others seceded.

—, in the year 1848, he and his wife, being drawn to the service under a sense of religious duty, were placed by the Committee in charge of Westtown Boarding School. They filled the stations of Superintendent and Matron for about twelve years, discharging the various duties connected therewith, with conscientious fidelity; being careful to keep constantly in view and to endeavor to carry into effect the primary object for which that important institution was established—the religiously-guarded education of the children of Friends. They they forwarded in many ways its interest; exercising over the pupils a care and influence, which we do not, has proved of lasting benefit to many. Being firmly attached to the doctrines of the gospel as held by Friends, from heart-felt conviction of their truth, he was much concerned for their maintenance and spread, as also for the support of the testimonies and practical growing out of them; and deeply did he deplore the departures therefrom by many in the Society; earnestly laboring to guard the flock from the hurtful influence of such unfaithfulness. Being careful to show forth his daily life and conversation, the efficacy of the religion he professed, and to maintain watchfulness and obedience to, the manifestations of the voice of Shepherd of the sheep, he was made quick of understanding in his holy fear, and enabled to discern between that which serveth God and that which serveth him not. The humble traveller Zionward, especially ministers of the gospel, found in him a sympathizing friend and counsellor; he being on the watch to courage and strengthen the hands of those who were faithfully occupying their gifts, and to speak a word in season to those who were weary. His final sickness was very brief, being not more than an hour. Evidence was however given both during its continuance, and as a few days previous, that he was looking for and prepared for the solemn event; and that the summons found him ready to give up a stewardship, which had been concerned from early life, to fill with a single eye to the guidance and honor of Him whom he loved and desired to serve. A few nights previous to his death, he remarked to one of his children, that eight years seemed a long time to live, but nothing in comparison to eternity; that he believed there was nothing in his way; but he felt that he had been an unprofitable servant, and that not through any works of righteousness that he had done, but, in great poverty of spirit he believed, through the mercy of God in Christ Jesus, he would be saved. On the afternoon of his death, before the close, he was heard to say in a faint voice, "Where is thy sting?" We reverently believe that the language has been found applicable to this dear Friend, "Well done good and faithful servant, thou hast been faithful in a few things, I will make thee ruler of many things; enter thou into the joy of thy Lord."

—, suddenly by drowning, whilst bathing on beach near Beesley's Point, New Jersey, on the 16th 8th mo. last, DAVIS LEEDS, son of Daniel and Hannah G. Leeds, in the 32d year of his age, a member of Chester Monthly Meeting, New Jersey.

—, at the same time and place, B. RUSH LEEDS, son of Isaac and Sarah D. Leeds, in the 21st year of age, a member of Chester Monthly Meeting, N. Jersey.

WILLIAM H. PILE, PRINTER.

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

John Heald.

(Continued from page 34.)

11th mo. 17th, 1816. "At Richmond, Virginia. The meeting was not large, the people ill-dressed, and I thought much ignorant of religion and worship. Though it was First-day, people were passing the meeting-house whistling, and others not far from the house were shooting. I suppose I heard twenty guns not far off, in the time of the meeting. An hour or more was spent in silence. I at length reminded them, that our Lord Jesus Christ, when among men, did not always express words to the people when they came together. The gracious words did not always proceed out of his mouth on such occasions. Going on from one thing to another, the people's minds were led into a state of solemnity, after which the meeting concluded.

20th. At Wainoak. I attended the Quarterly Meeting for ministers and elders. I met with Nathan Yarnall here. There were eight men beside us two, and one woman to make the meeting. Nathan addressed a short lively communication to them in an encouraging way. I stated, there is that scattereth abroad and yet increaseth, and there is that withholdeth more than is meet, and it tendeth to poverty."

After speaking of their labor in the Quarterly Meeting and a meeting for worship which succeeded it, J. H. thus refers to a meeting appointed by Nathan Yarnall the following day. "I attended much to my satisfaction. Though I had no public appearance at it, yet I had a fellow feeling and near unity with him in his exercises."

For several days after this, way seemed to open for religious service in most of the families, into which they entered in the course of their journey, and J. H. speaks of these occasions as being "precious," and "sweetly favored opportunities," and adds, "I thought had in these parts a compensation for all the pains and trouble I had gone through since I left home."

29th. "Rode through the rain to Petersburg, to the house of Ebenezer Thomas. I had been for some time under an apprehension that it would be my lot to have a meeting in that town, and no Friend except

Ebenezer lived in it. He and Jesse obtained the use of the Presbyterian meeting-house, and spread notice; but the evening being wet, and many being unwell, they did not turn out. About 100, chiefly men, came. After a time of silence I said: It has been no small exercise to me to appear in the capacity of an instructor or teacher, though this I experienced when among those of the Society, of which I am a member, but I think I never had a meeting out of the society that seemed to me so near like one of our own. My vocal labor was an hour or more, and I think the minds of the people were impressed with solemnity, and I felt thankful that I had been favored to acquit myself as well as I had done. It is worthy of remark, the great attention given to us, and to accommodate us and the meeting. I hope they will receive a good reward for it. Now my mind enjoys a peaceful quiet and encouragement, which increases my trust and confidence in Divine sufficiency. I have gone through deep trials on account of this meeting. I had to give up all and stand resigned to suffer in the deeps, to serve the Lord and answer His requirings. Though I much feared my weakness would hurt the good cause and be a reproach to myself and the Society, and thereby be a disadvantage; yet I feel this a day of thanksgiving and praise to the Most High."

The experience of John Heald in regard to this meeting, is in accordance with the declarations of scripture, and with the experience of many of the true followers of Christ. This previous preparation for service, by being dipped into religious exercise, and thus humbled and prepared to receive fresh ability from the inexhaustible Fountain of good, is one of the mysteries of the Kingdom which is revealed to the babes in Christ, though it may not be understood by those who are wise in their own eyes, and competent as they think to discharge every duty as it arises, in their own strength. This religious exercise is not confined to those who are especially called to preach the gospel, but it rests at times on the mind of every member of the church. For we all have duties to perform, and we all need the enabling power of Christ to perform them aright. How deeply has many a humble, inconspicuous one, felt the weight of a concern, which might be only to extend a word of caution or reproof to one who was in danger of being led into wrong! and what blessed fruits have often flowed from such simple obedience to the call of duty—the rich reward of peace and joy in the heart of the obedient servant, and the opening of the eyes to him who was going astray!

9th. "Attended Vicks' Meeting. It was thronged. After some time I said: 'The Kingdom of Heaven cometh not by observation.' I thought there was something stirring in the minds of many people now-a-days, inducing them to seek a place of repentance. In the days of John the Baptist there was a

stir also in the minds of the people, when the inhabitants of Judea and Jerusalem and all the region round about went; but there were some who were reprimanded with, 'O ye generation of vipers, who hath warned you to flee from the wrath to come.' In after times, in the days of the apostles, the stir in their minds caused them to cry out, 'Men and brethren, what shall we do to be saved?' And in a time of still later date, when many sought for a more certain knowledge of the ways of the Most High, and of His true worship (for they believed His ways were generally hid from mankind), and when they were disappointed in obtaining such knowledge to their satisfaction, they have been induced to seek retired and solitary places, and in the bitterness of their souls have poured out their tears and sorrows in supplication to the Most High, that He would show them the way that they should go to gain His favor. As they discovered what they should do, and what they should leave undone, to please Him, they were faithful to perform the same, and thus they obtained a peaceful close. This was a good meeting.

The following day we travelled to Johnson's Meeting, and attended it the next day. I thought it was divinely favored above many others. I stated the steadfast behavior of Ruth, the Moabitess, and how it tended to bring her into a comfortable situation. I then mentioned the case of Saul, the first anointed king of Israel, that by disobedience he lost the favor of Israel's God. He afterwards lamented that God had departed from him, and he suffered and died distressed. These represented the two states of obedience and disobedience. Enlarging in the way that opened, many were tendered, and I thought it as favored a time as any we had met with in this journey."

In the course of his communication at Summerton, where he attended meeting the next day, John Heald cautioned against criticising ministers of the gospel in a censorious spirit; he considered them rather as objects of commiseration and sympathy, exposed to errors on either hand. They might withhold more than was meet, and this would tend to their poverty; or they might be betrayed into undue activity, and bear the language, "Who required this at your hands?" It required care on their parts to steer their course between these extremes.

"The next day, at the Western Branch, early in the meeting, I felt loaded with exercise, but did not conceive that it would have been so trying as I afterwards found it to be. My exercise led me to believe there was a want of love among them. I treated largely on the necessity of maintaining a disposition to love one another, saying: 'How good and pleasant a thing it is for brethren to dwell together in unity, it is like the oil,' &c.; it is a most delightful and comfortable thing; but if hatred or malice get in, it disqualifies and un-

fits the mind for the solemn duty of worship. Where envy, hatred or malice rankle in the mind, we cannot be profited by meeting together; and yet we are enjoined not to neglect the assembling of ourselves together as the manner of some is. From this injunction I see not how any Christian professor (or indeed others) can free themselves, for will it do in the day of account to say, 'I did not pretend to serve thee, I made no profession of it, therefore, please to hold me excused?'"

(To be continued.)

For "The Friend."

### The Accumulation of Riches.

"Clear therefore from thy breast

This lust of treasure—folly at the best!

For why shouldst thou go wasted to the tomb,

To fatten with thy spoils thou know'st not whom!"

Couper.

There is but little doubt that the truthful Editorial contained in No. 1 of the present volume of "The Friend" on this fruitful subject, met with the approval of many minds; there are, perhaps, not a few within the borders of our Society at the present time, whose attention it is hoped may be arrested by the careful reading and consideration of the article alluded to: may it have its due weight. Whilst the duty of providing for old age, want or sickness, during a season of health and strength, is unquestioned, it is well to know when we have enough, and not to allow the commendable habits of thrift and industry to degenerate into those of avarice and greed.

Perhaps there is no sin that is unpunishable by law in this world, that more effectually hardens the heart to good impressions, than that of heaping up riches after we have acquired a competency. It is important, therefore, for our own sakes, to keep the heart open by giving frequently of our surplus income to meritorious objects.

"Avarice sheds a blasting influence over the finest affections and sweetest comforts of mankind."—*Buckminster*.

Our late valued friend, William Evans, remarked in substance in a Yearly Meeting, not many years prior to his death, that what he most feared for the Society at the present time, "was the great struggle that was going on for the acquirement of large estates, and the consequent introduction of habits of luxury and extravagance." How much more satisfactory it would be, if we could but bring our minds to act in measure as our own executors in charitable matters, and to be eye witness of the good our money was doing during our lives, rather than to leave it to an uncertain distribution by other hands; although to will a portion to benevolent objects is much more commendable than to leave large fortunes to descendants, thereby giving them wings wherewith to fly out of Society. Instances no doubt occur to the recollection of many, of persons who after persisting through a long life in declining to give of their *abundance* to charitable objects, finally, as years increase and bodily and mental powers begin to decline, become firmly impressed with the conviction that they are really poor, and the haunting fear takes possession of the mind, that their means will not afford them a living, and they will have to be supported by charity or suffer for the necessities of life. A striking example of the kind occurred in a neighboring city, within a few years past, of an individual prominent in his particular business,

and who for some time previous to his death, lived upon bread and water, alleging in answer to the remonstrances of his relatives, that his estate would not afford more than this meagre diet; and yet this rich but truly poor man, died possessed of a fortune of three millions of dollars.

"They call thee rich—I deem thee poor,  
Since if thou dar'st not use thy store,  
But sav'st it only for thine heirs,  
The treasure is not thine, but theirs."

Among the many objects which present themselves at the present time, on which we may with great propriety expend a portion of the means with which we may have been intrusted (and for the right disposal of which we shall undoubtedly have to render an account,) is the fund that was directed to be raised by our last Yearly Meeting for increasing the pay of the Teachers and Caretakers at Westtown. The subject of education is one that has always engaged the careful attention of the Society, and our forefathers contributed liberally toward its support in their day; but latterly, it is feared, we have lagged behind other religious societies in this particular.

Few perhaps within our border are aware of the sums of money that are being contributed in this way, and it may not be amiss to call attention to a few instances of the kind. Without more than a mere allusion to the older institutions of our country, such as Harvard and Yale, which are largely endowed, we may mention Cornell University, at Ithaca, New York, the endowment of which consists of Ezra Cornell's Founder's fund, \$500,000; College Land Scrip fund \$473,402.87, and the profits arising from sale of said land by E. Cornell, making in all \$1,102,009.48. The Theological Institution at Bethlehem, in this State, in the interest of Episcopalians, was endowed by Asa Packer in the sum of \$500,000, and latterly with an additional \$250,000 for a special benevolent purpose. Wesleyan University, at Middletown, Conn., has a total property of \$881,056.88, of which \$470,000 is real estate. The ordinary receipts last year were \$6,302.60, to which must be added \$8,520.48 from permanent funds, \$19,100 from professorship funds, and several thousand dollars in donations, making the total receipts of the year \$38,774.63. The expenditures amounted to \$37,597.71, of which \$24,580 was for salaries. The president receives \$3,000, the professors \$2,500, the librarian \$1,500 and the curator \$1,000. The friends of the Auburn (N. Y.) Theological Seminary have succeeded in raising \$225,000 for the increase of its endowment. The Baptist College, at Lewisburg, in this State, has a special professors fund of \$125,000; the income of which is divided among five persons, who have in addition a lot of ground on which they may erect a dwelling for themselves.

Many other instances might be presented, but perhaps the foregoing may be sufficient to call attention to a subject so important to the interests of our Society.

In all our cares about worldly treasures, let us steadily bear in mind that riches possessed by children who do not truly serve God, are likely to prove snares that may more grievously entangle them in that spirit of selfishness and exaltation which stands in opposition to real peace and happiness, and renders them enemies to the cross of Christ, who submit to the influence of it.

### Faith and Holiness.

"Without faith it is impossible to please God;" "Without holiness no man shall see the Lord," are the words of an inspired apostle. The trial of our faith is declared to be more precious than of gold that perisheth. An this with the profound heart repentance we are called to, the godly sorrow for sin, th putting off the old man with his deeds, th being renewed in the spirit of our minds th we may put on the new man which after Go is created in righteousness and true holines; cannot but lead into baptism, and suffering and self-denial. He who well knew the weakness of His little ones, plainly told the young man that queried of Him what good thing he lacked, and whom it is recorded Jesus loved, "Go and sell *all that thou hast*, and come and follow me." Must not such a requisition, involving a change of masters, and non-conformity with the world hitherto too much loved, be painful, even like separating between bone and sinew, or the joints and marrow. But this is the alone way to become partaker of that wisdom which is represented as *first tormenting* with her discipline; the only way to arrive at that peace which is the legitimate fruit of obedience to Divine grace; to which also the promise of mercy is attached: "Grace, mercy and peace, from God the Father and from the Lord Jesus Christ."

Deep self-abasement and renunciation, like to putting the mouth in the dust, are, notwithstanding all the superficial and self-satisfaction may assert to the contrary, indispensable to the Christian warfare and victory! Our heavenly Master weakens and humbles at His here, that He may exalt them hereafter. He tries and proves them by conflict and suffering now, that in the end He may establish, strengthen, settle them on Himself; the alone sure foundation forever. "Humble yourself therefore," saith the Apostle, "under the mighty hand of God, that *he may exalt you* in due time." "If ye suffer with Christ, ye shall also reign with him."

Though ours be a self-mortifying and self-reducing religion, it nevertheless gives abundantly more than it takes away; even th hundred-fold in this life, and in the world to come life everlasting. It was in view of th recompence of the reward that caused Moses to choose rather to suffer affliction with th people of God, than to enjoy the pleasure of sin for a season, &c. For, as is written, "he endured as seeing Him who is invisible." I was this also that made the Psalmist exclaim, "I had rather be a door-keeper in the house of my God, than dwell or reign in the tents of wickedness." It was this which supported Abraham in the called for sacrifice of his only and fondly cherished son. It was this, no doubt, which the Saviour had in view when he said, "If thy right eye offend thee (or *caus thee* to offend), pluck it out, and cast it from thee;" and "If thy right hand offend thee, cut it off, and cast it from thee: for it is profitable for thee that one of thy members should perish, and not that thy whole body should be cast into hell."

Then let us not mistake any smooth and easy path for that which calls for living sacrifices, and is ever straight and narrow; let us not get up any pattern of righteousness, but that shown in the Mount; let us not manufacture any artificial cross in place of the true which *must* crucify to the world, and where,

e world becomes crucified to us; let us not ek any by-path however much trodden, ound the fire, such as the sagacious Indian w, whereby the humiliating process of death to life shall be avoided; lastly let us not be duced to put on any mock humility as an- vering for that which lives in deep prostra- on of heart and contrition of soul before the ll-seeing unto His glorious kingdom—where ere is neither change, nor sin, nor sorrow; it where faith and hope and holiness are rever perfected.

### The Assyrian Explorations.

The proprietors of the Daily Telegraph have presented to the British Museum not only the tablets discovered by Mr. George Smith, but also the collection purchased by him in Assyria. The Telegraph, in a leading article on Mr. Smith's explorations, says:

"We are happy to be able to state that the boxes containing the more portable treasures of antiquity exhumed by Mr. George Smith in Assyria, have safely reached this country. They have passed through various adventures of field and flood while being brought down by their discoverer to Alexandretta, one package having been nearly lost in a stream, and another kicked open in mid-desert by a refractory mule. Arriving safely from all these perils at the coasts, they were detained by the Turkish officials, although Mr. Smith opened and repacked the tablets in their presence, to show that no gold or jewels of the Assyrian monarchs were being exported. Thanks, however, to the interposition of Sir Henry Elliot, her Majesty's Consul at Alexandretta was soon enabled to send the treasures forward, and we shall have the gratification this week of handing them over intact to Mr. Smith, to enrich the national collection of Assyrian relics.

We believe that the portion of the deluge tablet which our erudite commissioner hit upon so fortunately will be found to add the missing page to that very interesting part of the legend where the building of the ark was described. The narrative which excited so profound an interest last December, broke off after this point, but the new piece goes on to recite how the god Hea enjoined the constructor of the ark to put into it the various animals in their order. To light upon so precious a page of antique record, so absorbingly interesting at once to the naturalist and Biblical students, was indubitably lucky; and this was not the only instance of unusual good fortune. In the course of his excavations Mr. Smith came upon a broken signet cylinder, made of black and white banded agate, which he is convinced will prove to be the missing portion of an important seal of Sennacherib, the other moiety of which was already in our museum. Among other valuable items in those boxes will now come to hand the tablet of Assyrian law denouncing those who disobey the statutes and take bribes in the seats of judgment; the syllabary—a sort of dictionary throwing fresh light upon all cuneiform texts—and a bilingual inscription in Akkad and Assyrian of so much value for archaeologists. There will arrive a very curious fragment proving that the Sabbath was an institution of these ancient monarchies, prescribing the food to be eaten on the seventh day, and forbidding the king's chariot to be brought forth, with other remarkable enactments.

A cylinder of Sargon is among the relics, which illustrates in the most striking manner a passage in the Book of Isaiah; and there will be a new text of the reign of Assur-Bani-Pal, giving the history of the original conquest of Babylon, 2280 years before the Christian era. A brick inscription of Shalmanezar, and of his son, Tugultinip, the builder of the great temple, will be of interest to chronologists, and equally attractive to students of the religious history of mankind will be some tablets from Babylon bearing on rites and ceremonies. From Kalah Shergliat comes a tablet inscribed with the conquests of Assur-Balid, and from Hillah some contemporaneous inscriptions of Cyrus, along with other fragments, which may perhaps throw light upon the singular fact that Xerxes, although he reigned for twenty-one years, is not mentioned on any of these southern monuments hitherto discovered. There will be Seleucian and Parthian texts, too, amid the consignment of 'old oblivion,' which, albeit of a far later age than the Assyrian treasures trove, may have importance as bearing on historical dates and facts. It is needless to remark that Mr. Smith was far too busy in the superintendence of his excavation to exhaust the significance of these and many other items of his collection. With a hundred lazy Arabs to look after, and trenches open in several spots at once, he could do little more on the actual site than verify the character of each discovery. So rich, indeed, are these mounds in the records of vanquished empires that, to the last moment of his leave of absence, the energetic cuneologist kept finding precious fragments, and objects of high interest were actually unearthed and packed away on the morning of his departure."

For "The Friend."

### On Hating Reproof.

The following letter of Isaac Penington, on hating reproof, is commended to the serious consideration of the readers of "The Friend." Truly the kernel of things was reached by these sons of the morning; who, while they called for submission to the rebukes and chastenings of the Lord's Spirit, and to patience in the furnace of trial and suffering, of which they had largely to partake, and by which they became what they were, they also could at times rejoice themselves, and point others to the hope of the recompense of the reward; the fulness of heavenly fruition; the joy which no man could take from them.

"To Catharine Portage and another:

Friends,—Take heed of that spirit, which will be stirring up hard thoughts in you of God and his way, and the faithful testimony thereof, when, in the tender mercy of the Lord, it is given forth to you; for, that spirit is your soul's enemy. Wait, therefore, to know in yourselves that which is to stumble, and fall, and be snared, and broken, and taken; for it cannot receive God's Truth.

And take care of that spirit which hateth reproof; for, the reproofs of instruction are the ways of life, and whom the Lord loves, he rebukes and chastens. And truly, Friends, this is God's Truth in my heart to you both, this morning: the ministration of conviction and reproof, is that which ye are to come under; and it is your proper state to wait daily, not for comforts, not for refreshments, (that day is to come afterwards,) but for con-

victions and reproofs of that in you, which is contrary to God. And, if ye walk faithfully in this dispensation, ye shall in due time know another, when the work of this is over; for really, friends, ye must be emptied of that wherewith ye are now filled, before ye can be filled with that which is true and living. If I should say one word to you, could ye bear it? and yet this counsel is with me towards you: O! wait for, receive, embrace, be glad of that which reproves you, and be afraid of that which comforts you in your present state; for, ye are to come through the trouble, judgment, breaking down, plucking up, consuming, and burning of the contrary nature and spirit, which yet deceives you; and to witness all the knowledge, profession, practices, beliefs, hopes, that are founded there, and spring up there, confounded and destroyed, before ye can possibly come into the true ministration of life and power. Ye must die to your own wisdom, if ever ye will be born of, and walk in the wisdom of God. Yea, ye must die to that part, that is so active from and in that wisdom, and which would be laboring in the very fire for what is but vanity; if ye will receive the knowledge, which springs out of truth and life itself, which indeed flows over, and covers the earth of God's heritage, as the waters cover the sea, in this day of his great goodness and plenteous redemption.

When we were in desolation and great distress, indeed unutterable, we had none of these helps and instructions which abound towards you. O what a day of mercy have you met with! and how great will be your condemnation, if ye become as deaf adders to the Spirit of the Lord, and so miss of his salvation. And if ye will ever know the Spirit of the Lord, ye must meet with him, as a searcher and reprover in your own hearts; yea, the merciful God must ye meet with as a severe Judge, and unquenchable, consuming fire against that spirit, wisdom, knowledge and faith in you, which is but of a chaffy nature. Truly, Friends, it is far better to be stripped of it than to find any rest or pleasure in it.

O hear the voice of the living God! His word is nigh,—nigh you; and his word hath a voice that speaks. O that the ear that can hear, might be opened in you! and the ear stopped which will not, cannot hear the voice of the Shepherd! O wait for the Reprover! and turn the ear to him, letting in his reproofs, and turning from what he reproves for, without murmuring, without disputing; and the exercise of that ear will open it more and more: so that ye will come to know the voice more and more; which, though it prove very bitter to that which is of a contrary nature, and would not hear the voice, yet will be sweet, yea, sweeter and sweeter daily, to the true birth. And here ye will witness true death to that which is to die; and true life ministered by Him who lives forever, to that which is to live.

But while ye are striving to comprehend, and to begin obedience after that wisdom, ye will find the power, which opens to others, shutting you out of that which is true; and yourselves liable to be tempted, and persuaded to esteem and take up that which is false, instead of that which is true.

What spirit is that in you which prejudices your hearts inwardly against, and makes you so apt to cry out because of destroying? Is it not that spirit that would save alive what

is to be destroyed in you, that your souls might live in and to God? The Lord discover to you, how the enemy works in you, against the life and salvation of your souls; for he knows what will be the issue of this destroying work, if it have its thorough course and effect upon you; and that none of his kingdom will be left standing in you.

I. P.

7th of Seventh month, 1671.

### On Gospel Ministry.

"If any man speak, let him speak as the oracles of God; if any man minister, let him do it, as of the ability which God giveth; that God in all things may be glorified, through Jesus Christ."—1 Pet. iv. 11.

The call of a minister must be of God. No man can enter into this dignified work merely from his willing or running. He cannot preach the Gospel unless he be sent, and if Christ send not, of course he is not a messenger or minister of Christ. The ministers of the Gospel, to the present day, must be called by the same authority and clothed with the same Spirit, that the Apostles had, though it may not be in the same degree. *They*, by virtue of their call and qualification were messengers and ambassadors of Jesus Christ:—who then can assume these high titles, without having received a message to deliver, or a commission to fulfil, from Christ:—without these, the very essentials are wanting.

As it is the prerogative of the Great Head of the Church alone, to select and call the ministers of His Gospel, so both the gift, and the qualification to exercise it, must be derived from Him, and as in the primitive Church so now also, He confers them on women as well as on men. The apostle Paul, in speaking of his ministry, declares, "I neither received it of man, neither was I taught it, but by the revelation of Jesus Christ"—(Gal. i. 12); that the exercise of it was not in the words which man's wisdom teacheth, but which the Holy Spirit teacheth, and that his speech and his preaching "was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power;" that the faith of his hearers, might "not stand in the wisdom of men, but in the power of God."—(1 Cor. xi. 4, 5.)

The apostles and true ministers in the Church of Christ were, and are, so called and qualified; even those who had been the companions of Christ in the flesh, were commanded to tarry at Jerusalem, until they were "endued with power from on high," clearly proving that nothing but "power from on high" renewedly furnished, can enable men to preach the Gospel.

Prayer and thanksgiving are important parts of worship, and may be considered as belonging to the ministry. To address Almighty God on behalf of an assembly, expressing *their* wants and *their* feelings, cannot be done without the Spirit of Jesus Christ, through whom alone there is access, and by whom alone we can have that feeling sense of the states of others, which is necessary in this most solemn exercise. Our Lord, while personally on earth, adverted particularly to the subject of prayer; He admonished His disciples, not to be as some, who used vain repetitions, and thought they should be heard for their much speaking:—those who are favored with the nearest access to the Throne of Grace, will feel the most awfulness, reverence, and self-abasement, in these approaches. The lan-

guage should be solemn and concise, comporting with the dignity and solemnity of the occasion.—*Extracted from Works of the Society of Friends.*

Original.

### INFLUENCE OF A WORLDLY SPIRIT.

Years are stealing on apace;  
Man's speeding on his race,  
Closely, I his progress mark;  
Childhood's light grows dim and dark,  
Mists I cast before his eyes  
And deluding shades arise.

By my serpent folds entwined,  
Firmer, firmer, do I bind;  
Virtue is but fiction's theme,  
Love is but the poet's dream;  
Thirst for pelf, dress of the spirit,  
These from me he doth inherit.

Now the web is closely woven,  
Now the gulf is widely cleft;  
Aspirations cease to rise,  
Earthward now are fix'd the eyes,  
Earth holds the spirit in my pow'r;  
It commands my rightful dow'r.

There the treasures that I bring,  
As time speeds with silent wing;  
The pure dreams of early youth,  
Love of virtue and of truth  
Vanish, as my chains I bind  
Round those by my folds entwined.

Z. D.

Selected.

### SOWING AND REAPING.

Sow with a generous hand,  
Pause not for toil or pain,  
Weary not through the heat of summer,  
Weary not through the cold spring rain;  
But wait till the autumn comes  
For the sheaves of golden grain.

Scatter the seed, and fear not;  
A table will be spread;  
What matter if you are too weary  
To eat your hard-earned bread:  
Sow while the earth is broken,  
For the hungry must be fed.

Sow, while the seeds are lying  
In the warm earth's bosom deep,  
And your warm tears fall upon it,—  
They will stir in their quiet sleep,  
And the green blades rise the quicker,  
Perchance, for the tears you weep.

Then sow,—for the hours are fleeting,  
And the seed must fall to-day;  
And care not what hands shall reap it,  
Or if you shall have pass'd away  
Before the waving corn fields  
Shall gladden the sunny day.

Sow, and look onward, upward,  
Where the starry light appears,—  
Where, in spite of the coward's doubting,  
Or your own heart's trembling fears,  
You shall reap in joy the harvest  
You have sown to day in tears.

Household Words.

*Telegraph in Persia.*—The shah is a frequent visitor at the telegraph office, which is close to the palace, and exceedingly fond of conversing directly through the wires with the governors of the provinces through which they pass. As the day approaches for the payment of their annual tribute, the governors have an uneasy time of it; for then his majesty's visits are redoubled, and questions as to the amount of tribute and the time of its arrival become the burden of his messages.

The Persian language is naturally deficient in words descriptive of most of our late inventions, and it is consequently difficult to make even educated men understand the theory and working of the telegraph. Thus, on one occasion, much of the time of one of our officers

was occupied during several weeks in attempting to enlighten the mind of a provincial governor, who had got it into his head that the wires were hollow-tubes, and that messages were transmitted through them, as in the pneumatic post. In vain was the whole apparatus shown to his highness, in vain were all its parts explained and re-explained; he stuck to his idea; and it was only by the suggestion of the following simile that he was at last, induced to relinquish it and declare himself satisfied: "Imagine," said the officer "a dog whose tail is here at Teheran, and his muzzle in London; tread on his tail here, and he will bark there." Similar difficulties were experienced, it seems, in conveying to the mind of Ferrukh Khan a correct idea of the machinery of the steamer which was to convey him from Trebizonde on his mission to the courts of Paris and London; for when, on going on board, he was told that the machine was of 500 horse power, his face beamed with pleasure at the prospect of seeing so many horses, and he at once asked permission to visit the stables.—*Mounsey's Caucasus and Persia.*

For "The Friend."

### Some Other Way.

Such is the perverseness of man's nature in his fallen and unregenerate state, that he seems averse to walking in the strait and even path of Truth; that he is continually striving to find some other way. We find recorded in the Scriptures, that in the early ages of the world, soon after the flood, the descendants of Noah concluded to build a tower that should reach to heaven, but they were confounded and scattered before they had accomplished the object they had in view: and it seems after all that befel them, that there has been a great many Babel builders since their day, who have had about the same success that they had. The human mind is easily caught with the idea that there is a shorter, easier way to heaven, than the way cast up for the ransomed and redeemed to walk in; and so, in all ages of the world we find man using all his intellectual powers, to find out this other way—a way in which he could walk without self-denial and the daily cross to his fallen and corrupt nature—a way in which self need not be slain; so that he can take the world with him, with its false pleasures, its follies and its fashions. But our Saviour said when here upon earth, "I am the door, by me if any man enter in he shall be saved." It is only by and through Him, that we can ever expect to enter the true sheepfold; for it is said, "He that entereth not by the Door into the sheepfold, but climbeth up some other way, the same is a thief and a robber." We cannot expect to be heirs of two kingdoms; of this world with its sinful pleasures and its transitory enjoyments, and of that pure and spiritual kingdom above, where nothing impure can ever enter. We must choose one or the other, we cannot take them both, for they stand in opposition one to the other and will continue to be thus opposed until the kingdoms of this world become the kingdom of the Lord and of his Christ: for it is said expressly "ye cannot serve God and mammon;" that is, the god of this world.

There are many by-ways that are calculated to lead the unwary off the strait and narrow way, if there is not a strict watch kept: and

ome of these by-ways seem to take the same direction, and by some will be claimed to be quite an improvement on the good old way; but in the end, when it is too late, they will be found not to lead to the kingdom of heaven at all. Sometimes after we have made advances in the strait and narrow way, there is anger of our becoming weary therein; of our becoming tired of its straitness, and incline to turn back into Egypt: for we find that the children of Israel after they had been led through the Red sea from the house of bondage, with signs and wonders and with an outstretched arm; after being led by a pillar of cloud by day and a pillar of fire by night, and had eaten of the manna and drank of that rock that followed them, their hearts turned back to the house of bondage; they lusted after the flesh-pots of Egypt; they loathed the manna that had been given them, and desired the leeks, the onions and the garlic of Egypt instead. And so the Christian in his pilgrimage, is tempted to look back to that which should be left behind. It will be found that it is only the spiritual manna that can sustain the soul in its heavenward journey: but when we begin to look back, we are apt to begin to substitute something else for this spiritual food, and so put shadow for substance; a show of religion for religion itself; words for power; forms and ceremonies for regeneration; a form of words, for true, spiritual worship. For though our Saviour said expressly to the woman of Samaria, and it is so recorded in the Scriptures of truth, that "God is a spirit and they that worship Him must worship Him in spirit and in truth;" yet most professors of this same religion have a form, in order to worship Him: and there seems now a tendency to go back, more into forms and ceremonies by some, who in a measure seemed to be weaned from them; some who, in a measure, had begun in the spirit, now seem to seek to be made perfect by the flesh, or by human agency, or by forms and ceremonies, to which they desire again to be in bondage. And even in our own Society, which was gathered out of the forms and ceremonies that had been instituted in the time of the apostacy, into pure spiritual worship, to wait on the Lord in the silence of all flesh before Him, that we might be enabled through His divine assistance, to worship Him in spirit and in truth; but it seems now, that some under our name, seem to be weary of this spiritual worship, and are inclined to forsake for one more in accordance with that of their societies; like the Israelites of old, who wished to be like the nations round about them. Thus it may be asked of those who still remain faithful to that spiritual religion and worship instituted by Christ himself, as it was asked of the disciples formerly, when many turned back and walked no more with Him, the Saviour of the world: "Will ye also go away?" The reply should be as it was given: "To whom shall we go, thou hast the words of eternal life." Which cannot be said of man, with all his good words and fair speeches, nor all his forms and ceremonies which he has set up in his own will and wisdom. But let us come to that which entereth into that within the veil, where forms and ceremonies cease and are of no avail, to that which is beyond words, to the power of an endless life. Then we will not become weary of our silent waiting on the Lord in our solemn assemblies; we will then have no desire to

turn again to the weak and beggarly elements. I believe it might be properly said of every man in our religious Society as it was to the Galatians, by the Apostle formerly: "O foolish Galatians, who hath bewitched you that ye should not obey the truth? before whose eyes Jesus Christ hath been evidently set forth crucified among you." And I would say to those who have begun to walk in the good old way, and are not seeking for some other way, in the words of John Barclay: "The Lord God as he hath begun a good work will carry it on if we be but faithful to Him, over all that the enemy or his instruments can do to hinder it. Ob, that we may think nothing too dear to part with for Him, but that we may give up all freely for Him, if He please to make use of any of us as instruments in His hand; and that our eye may be unto Him, and so abide faithful unto the end, which will be of more value than all the perishing pleasures and transitory enjoyments of this world." Ohio, Ninth mo., 1873.

#### Physiology of a Sponge.

If we take a morsel of a toilet sponge and put it under a microscope of moderate power, we find that it is made up of a mass of complicated net-work. There is more or less regularity in the meshes, and these are found of various patterns in the different species. This heap or mass of net-work, commonly called a sponge, is really the skeleton of a sponge. When living it is covered with or literally embedded in a glairy, gelatinous or albuminous substance. But this is so unlike ordinary animal tissue, for it seems really tissueless, that it has received the technical name *sarcode*. This sarcode fills the meshes above mentioned, and is held in place by innumerable tiny spicules, mixed in so to speak like the hair in the mortar of the plasterer. So little consistency has this sarcode or sponge-flesh that, but for this natural felting, it would dissolve and flow away. Now, take an ordinary sponge into the hand. We observe several large apertures at or towards the top. These are called the *oscula*. They are the exhalant vents of the entire system. At these openings is expelled, with some force, the water that has been taken into the living mass, and deprived of its nourishment. But how is the water brought in through that glairy sarcode?

Besides the oscula, which are few and readily seen, even in the skeleton, there are innumerable tiny inlets known as pores. These are not visible in the skeleton, as they really belong to the sponge-flesh. These pores open into the meshes and enter directly certain little cavities, or chambers, that stand connected with circuitous passages, which finally lead to the outlets, or oscula. The pores are very small, and yet, compared with the cells, are very large. The little chamber into which the pore opens has its walls built up with these unciolated cells. Now if we could only peep into the privacy of that chamber, with its walls of living stones, without making any disturbance, we should find every cell lashing its cilium with great vigor, and all in such harmony of accord, that it would seem like

"Beating time, time, time,  
In a sort of Runic rhyme."

The beating of each lash is doubtless downwards, that is, inward; the effect of which is, a vacuum above into which the water presses

through the external pore. A second result of this downward beating of the cilia from a myriad of cells is, the impulsion of the passing water through the ramifications leading to the oscula. Thus the running of the waters is the sponge's ancient "Runic rhyme." Every sponge, then, has a very complete aquiferous system: its conduits at the entrance of and along which the busy one-lashed cells occupy themselves forcing the water along; and the oscula, which may be likened to the outlets of sewers. During this circulation of the fluid through the living mass, the sarcode obtains its nourishment, and the skeleton its growth by a sort of absorption, or what is known to the physiologist as endosmotic action of the cells.

We have then mentioned above three clearly specialized functions, as represented respectively by the inhalant pores, the exhalant oscula, and the unciolated cells. And it is certainly a matter of prime importance that each cell should have this single lash. Both the oscula and pores can be closed at the will of the animal; but the oscula are permanent apertures; whereas the pores are not constant, but can be formed afresh whenever and wherever required.—*Popular Science Monthly*.

#### Thomas Elwood's Account of that Eminent and Honorable Servant of the Lord, George Fox.

This holy man was raised up by God, in an extraordinary manner, for an extraordinary work, even to awaken the sleeping world, by proclaiming the mighty day of the Lord to the nations, and publishing again the everlasting Gospel to the inhabitants of the earth, after the long and dismal night of apostacy and darkness. For this work the Lord began to prepare him, by many and various trials and exercises from his very childhood; and having fitted and furnished him for it, he called him into it very young; and made him instrumental by the effectual working of the Holy Ghost, through his ministry to call many others into the same work, and to turn many thousands from darkness to the light of Christ, and from the power of Satan unto God.

I knew him not until the year 1660; from that time to the time of his death (1690), I knew him well, communed with him often, observed him much, loved him dearly, and honored him truly; and upon good experience can say, he was indeed a heavenly-minded man, zealous for the name of the Lord, and preferred the honor of God before all things.

He was valiant for the Truth, bold in asserting it, patient in suffering for it, unwearied in laboring in it, steady in his testimony to it, immovable as a rock. He was deep in divine knowledge, clear in opening heavenly mysteries, plain and powerful in preaching, fervent in prayer. He was richly endowed with heavenly wisdom, quick in discerning, sound in judgment, able and ready in giving, discreet in keeping, counsel; a lover of righteousness, an encourager of virtue, justice, temperance, meekness, purity, modesty, humility, charity and self-denial in all, both by word and example. He was graceful in countenance, manly in person, grave in gesture, courteous in conversation, weighty in communication, instructive in discourse, free from afflictation in speech or carriage. A severe reprover of hard and obstinate sinners, a mild and gentle admonisher of such as were tender, and sensible of their failings. Not apt to resent personal wrongs; easy to forgive injuries; but zeal-

ously earnest where the honor of God, the prosperity, truth and peace of the church, were concerned. He was very tender, compassionate and pitiful to all that were under any sort of affliction; full of brotherly love, full of fatherly care; for indeed the care of the churches of Christ was daily upon him, the prosperity and peace whereof he studiously sought.

Beloved he was of God; beloved of God's people; and, which was not the least part of his honor, the common butt of all apostates' envy; whose good, notwithstanding, he earnestly sought.

He lived to see the desire of his soul, the spreading of that blessed principle of divine light, through many of the European nations, and not a few of the American islands and provinces, and the gathering of many thousands into an establishment therein; of which the Lord vouchsafed him the honor to be the first effectual publisher, in this latter age of the world. And having fought a good fight, finished his course, kept the faith, his righteous soul, freed from the earthly tabernacle in which he had led an exemplary life of holiness, was translated into those heavenly mansions where Christ our Lord, went to prepare a place for his own; there to possess that glorious crown of righteousness which is laid up for, and shall be given by the Lord, the righteous judge, to all them that love his appearance. Ages to come, and people yet unborn, shall call him blessed; and bless the Lord for raising him up; and blessed also shall we be, if we so walk as we had him for an example; for whom this testimony lives in my heart: he lived and died the servant of the Lord.

*Revelation and Scepticism.*—The world in all ages has been the scene of disputes and errors, and we ought to think ourselves happy, amidst so many clouds of contradiction, to have an unerring light to lead us the right way, I mean the light of revealed truth, which, in spite of all the efforts of infidelity, will never be extinguished. Religion, like the firmament, sometimes may appear obscure to us, but at that very time is not less radiant. The passions and senses are vapors which spring from our corruption, and intercept the rays of heavenly light, but the man who reflects, without being astonished or alarmed, waits the return of a serene and cheerful sky. We have seen the fogs dispersed which were raised by Celsus, Porphyry, Spinoza, Collins, and others, and we may be assured that those of modern philosophy will share the same fate. In every age some singular men have appeared who, sometimes by violence, sometimes by fanaticism, seemed to threaten the annihilation of Christianity; but they have passed away like those tempests which only serve to show the face of heaven more bright and serene. It is for want of principles of solid knowledge that some men are dazzled by sophistry, and the most trivial objections appear unanswerable to the ignorant. This world is full of mysteries, of which there can be no solution, without revealed religion. It is revelation alone which can account to us for the immensity of that heaven of which the unbeliever cannot divine the use; for the miseries which we suffer, of which the mere philosopher cannot assign the cause; for the growing desires which agitate us, and which without religion we cannot calm.—Ganganelli's Letters. (The "Letters" of Ganganelli, when

first published, soon after his death, obtained so universal a popularity as to excite the jealousy of Voltaire, who denied their authenticity. Some of his reasons were very foolish and trivial, but his authority has led the majority of critics to consider the letters spurious. If it be so, and if they were written by Ganganelli's biographer, M. Caraccioli, they certainly express the opinions and character of Clement XIV., a man of learning, integrity and humility, and altogether one of the most liberal and respectable of the popes.)—*Leisure Hour.*

### The Lion and the Shark.

FOR THE CHILDREN.

Selected.

It is now many years since a Capt. Parker commanded a brig named the Sarah, and sailed from London for the coast of Africa, with a general cargo to barter for produce. In one of his business transactions, amongst other commodities, he got a young cub lion, and resolved to bring it home to London. Bob Jones, the cabin-boy, took charge of it, and there not being a dog on board, put it into the dog-kennel, and by his kindness to it, and his feeding it regularly, they became great friends.

The cub grew very fast, and Bob would play with it every chance he had, and even neglected his duty to gambol with his favorite. Still the captain would not see this, for he was as fond of the cub as the boy was, though he dared not make so free with it.

A great number of people used to go to the dock to see this creature, as it became so fond of the boy, and would play and roll about the deck with him on a fine day, to the great amusement of the lookers-on; in fact, they were more like two lion whelps, tumbling over each other and wrestling, than anything else; but no one except Bob dared touch the cub.

Then the Sarah was chartered, at so much per month, to go to Akyab to load rice, and was about eighteen months on the voyage round. When the vessel returned to London the lion had grown to be as large as a Newfoundland dog, and all the time the boy Jones had been his comrade and attendant, and could still take the same liberties with it, but no one else dared to do so, not even the captain, though he was very kind to it, and he would not allow any of the sailors to be otherwise. Once, half in jest, one of the men offered to take a rope's end to the cub, but its fury was so great that the jest was never repeated, and the same man was not safe on the deck afterwards. On the whole, however, all the sailors were fond of the creature, and would have liked to play with it, but none were permitted, or indeed safe to do so, except his first friend, Bob Jones. With him the whelp was always doele.

A singular circumstance occurred on the homeward passage. Three days after passing the Cape of Good Hope, the Sarah fell in with a number of sharks. It was a fine, calm day, and all on board set to work to try and catch one of these monsters. The officers tried to shoot one, and the sailors to harpoon one, but all in vain. At last the sailors got a long rope, in which they tied a sliding loop or noose, and with great difficulty they managed to throw this over the head of a shark which approached the vessel nearer than the rest; then they drew the rope tightly, and with

immense exertion the monster was got on board, after about six hours' labor. Once on the deck, the shark made such use of its tail that no one could venture to go near it. Presently the young lion, seeing a stranger on deck cutting such queer capers, seemed curious to have a nearer look at him, but his enterprise cost him dear, for the shark managed to get one of the lion's fore-paws in its mouth. He then became almost mad with rage and pain, for his foot could not be extracted until the upper and lower jaws of the monstrous shark were forced apart, while the roars of the lion were awfully hideous to hear. A new office now developed upon Bob Jones, for he alone could venture to go near the wounded whelp. He washed its injured paw and carefully bound it up, while the poor animal lay still and permitted him to do as he liked with it, and even seemed to be grateful for his attentions. These were constantly performed, and the noble animal evinced greater fondness than ever for his attendant, but the vessel nearly reached England before the lion's foot was quite well.

Capt. Parker was afraid to take the lion to sea again, although all on board, and especially Bob Jones, were sorry to part with it, but the risk was too great, so he sold his singular passenger to an American captain for £15. What became of it afterwards we never knew.

We have at times a mutual unutterable participation of Divine manna, when far absent in body, and if we are careful to maintain a holy meekness to be worthy communicants at the Lord's table, we shall eat the holy shewbread, void of every sort of corrupt leaven.—*S. Fothergill.*

## THE FRIEND.

NINTH MONTH 27, 1873.

"Are all our religious meetings for Worship and Discipline duly attended; is the hour observed; and are Friends clear of sleeping and all other unbecoming behavior therein?"

This Query, which is read in our Monthly and Quarterly Meetings three times in a year, is, as our readers we apprehend are well aware, as regularly answered with the confession of many deficiencies, both in respect to the attendance of a considerable number of the members, and the care to avoid the unbecoming behavior of not a few in sleeping, when assembled for the purpose of divine worship.

Among a people who profess, as Friends do, that life is a state of probation, and that the work of religion, on account of its immediate relation to a future state, is the proper business of every man, and in which no one can be too deeply engaged, such a confession ought to be humiliating, and the cause for it a subject of close self examination as to whether we are contributing thereto by our own remissness in attendance, or in endeavoring to persuade or encourage others who absent themselves to more faithfulness; as also whether we are concerned to maintain a right exercise, when assembled with our friends, to realize the object for which we meet.

If we really believe in an omnipotent, omniscient Creator, who takes cognizance of all our thoughts, our words and our actions; who

has brought us into existence for the purpose of his own glory, and our enjoyment of everlasting felicity in a world to come; that He has declared He will judge all men, and reward them according to the deeds done in the body; that He has commanded every one to work out his soul's salvation with fear and trembling, and has made gracious provision in the religion which He has instituted and offered to all, for redemption from sin, its guilt and punishment, by the manifestation of his Son in the flesh, in his atoning sacrifice for sin, and his purchased outpouring of the Holy Spirit upon all men, how is it possible we should neglect so great salvation, and show our indifference to Him and our eternal interest, by refusing to make public acknowledgment of our dependence on his providence, and to perform the duty of rendering him that homage and worship in spirit and in truth, which Christ declares He seeks.

However specious our profession may be, under the ordinary circumstances in which the members of our religious Society are placed, if they seriously reflect, we think they must see that their habitual neglect of attendance at meetings for Divine worship, is an evidence of practical unbelief; a mark of being either so engrossed with the choking cares and riches of time, so immersed in sensual indulgences, or so amused with trifles, as to disregard the duty of gratitude and obedience to him from whom they are receiving every blessing they enjoy; and that in reality they are living as though they deemed themselves unworthy of eternal life."

Nor do those who go to meetings, but when here, accustom themselves to giving way to sleep, afford much stronger proof of being utterly affected towards their eternal interest. Recognizing, as they appear to do, the obligation to make public acknowledgment of their dependence on and allegiance to their Creator, they yet give sorrowful evidence that a speculative acquaintance with the requirements of duty are compatible with a customary violation of its dictates, and that convictions of what is right may be habitually overpowered by a corrupt somnolent nature.

When we reflect that worship is an engagement of the soul, which requires the influence of the gift of Divine Grace—vouchsafed to every one who is not reprobate—for its performance in spirit and in truth, it requires but little knowledge of our own hearts, and of the corrupting example of the worldlings around us, to be aware how difficult it is to maintain day by day the spirit of devotion, and to keep alive the sacred fire on the altar of the heart, by walking in the Light of Christ; which none can preserve our convictions of duty from being dissipated by the pleasures of sense, or overpowered in the collisions of worldly interest. We can then, readily understand how great a privilege it is to have the opportunity, two or three times in the week, to retire from the cumbering and engrossing cares of the world, and in common with our fellow pilgrims towards a better country, to draw near in worship to Him who is invisible; to rediscipline, as it were, our intellectual energies, wearied and distracted by daily secular employments, and renew our spiritual strength, by fervent, devout application to the inexhaustible Fountain of all good, who has promised that He will replenish those who wait on him.

The views of Friends in relation to the

worship of the Almighty are simple and yet sublime, rational and yet in accordance with the spirituality of the gospel and the relations existing between the soul and its Creator and Redeemer. They believe that each individual, whether alone, or in an assembly, must perform this solemn act for him or herself; and that there can be no mediator between the soul and its God, but the heavenly man Christ Jesus. Hence that all rights and ceremonies therein are intrinsically valueless. The sacrifice or oblation whatever it may be, must be prepared by the operation of the Holy Spirit on the heart, and presented by the High Priest of our profession, who is "the Minister of the Sanctuary and of the true Tabernacle which God hath pitched and not man." Though He hath entered into the holy place within the veil, He is nevertheless present with the two or three gathered in his Name, and having once offered up himself "to bear the sins of many; unto them that look for him shall He appear the second time, without sin unto salvation."

Would that all the members of our religious Society could realize and rightly estimate this high and ennobling doctrine of divine worship! how would many have been restrained from wandering into the ways of other religious professors, and many meetings held under the character of Friends' meetings been preserved from bringing reproach on our profession. We take the following from the epistle of London Yearly Meeting issued in 1840.

"Dear Friends, of all ages and conditions, we have been again brought to feel the value of uniting in the worship of God 'in spirit and in truth.' It was under a sense of their need of that nourishment to the soul, which they found not in the forms and observances to which they had been habituated, that our early Friends were first led to separate from others, and to present themselves in small companies before the Lord. As the eye and the cry of the soul were unto Him, He did refresh and strengthen them together, and give them to feel the sufficiency of his power to qualify them to perform united and acceptable worship in *spirit*, unto Him, the living and true God. Truth and uprightness as inculcated both in the law and the gospel, were deeply rooted in their hearts, and hence, as honest towards God, they could not, with a good conscience, themselves uphold or countenance in others the forms of prayer and thanksgiving to which they had been accustomed. Whilst deeply sensible of the duty and the privilege of true prayer, they found that stated forms were not adapted to their condition; they felt that the use of them was not in the life and power of the gospel, and therefore that it did not accord with that worship which is to be performed in *truth*.

Our sense of the spiritual character of the reign of Christ, and of the inadequacy of these forms to satisfy the soul, remains the same; and we continue to feel ourselves conscientiously restrained from uniting in any of those modes of worship which others think it right to adopt. Whilst we desire to cherish, and to inculcate true Christian charity towards those from whom we differ, we would affectionately encourage all our members to confine themselves, in the public performance of this solemn duty, to a diligent attendance of our own meetings for worship. Under the renewed conviction of the soundness and importance of

this testimony to spiritual worship, we are quickened in desire that Friends may be kept alive to a right exercise of mind in our public assemblies. In the experience of past and present times it has been felt, and we believe, by the waiting soul it will continue to be felt in our meetings for Divine worship, whether in the times of silence, or under the exercise of ministry, or the vocal offering of prayer, thanksgiving, and praise, that the words of the apostle are applicable: we are of those who 'worship God in the Spirit, and rejoice in Christ Jesus, and have no confidence in the flesh.' He grants to his faithful followers at times to feel the force of his own blessed words: 'He that cometh to me shall never hunger; and he that believeth on me shall never thirst.'"

## SUMMARY OF EVENTS.

FOREIGN.—The session of the Spanish Cortes has been suspended until the 2nd of next First month, and in accordance with the authority recently granted, the government has issued a proclamation suspending the constitutional guarantees. It was believed in Madrid on the 21st inst., that the end of the insurrection in Cartagena is approaching. Dissensions have broken out among the insurgents. The government has offered terms which the leaders are willing to accept, but fear their followers. The Republican troops have entered Malaga, meeting with no opposition from the insurgents. The recent operations of the Carlists have been comparatively unimportant. Desertions from their ranks is said to be increasing and demoralization spreading. It is thought in Madrid that the Carlist cause is quite precarious. The British fleet in Spanish waters is collected in the harbor of Alicante, which city is threatened by the insurgent iron-clads.

The King of Italy has gone to Vienna on a visit to the Emperor of Austria. Many Ultramontanes belonging to the Imperial Court and leading members of society, left Vienna to avoid meeting Victor Emmanuel. One of the Vienna newspapers has been suspended, and its bureau seized by the police, because it published an attack on the King of Italy while he was the guest of the Emperor. On the 22d the King of Italy proceeded to Berlin, where he was received with cordiality.

It is officially reported that there have been 2755 cases of cholera in Vienna since the outbreak of the disease, and of this number 1110 were fatal. The disease is raging with great violence in Hungary.

A violent storm on the Black Sea, last week, proved very destructive to shipping. Seventy vessels were wrecked near the mouth of the Bosphorus, and nearly all on board perished. At one point on the coast two hundred and sixty-five bodies have been washed ashore.

The evacuation of French territory by the German army of occupation was not finally completed until the 16th inst.

A petition numerously signed by members of Protestant churches in France, has been sent to the Protestant Deputies in the Assembly, urging them to use all their influence and to vote against a monarchy. The fusion between the two branches of the Bourbons appears to be complete, and all will unite in the effort to place the Count de Chambord, the representative of the elder branch, upon the throne of France.

A Paris dispatch of the 17th says: "Starnes, the English traveller, has arrived here from Central Africa. He reports that he met Dr. Livingstone last June, and parted with him on the 1st of July, at which time Livingstone was in good health."

There were 121 deaths of cholera in Paris from the 9th to the 14th inst.

Paris has 115,000 paupers, a much larger number in proportion to its population than London.

Elections to fill vacant seats in the French Assembly have been ordered for the 12th of next month.

A declaration is expected shortly from the Count de Chambord, acknowledging the right of the people to share in the government of the nation, and consenting to the settlement of the future constitution of France by national representatives.

Frederick William, Elector of Hesse Cassel, has formally resigned, and consented to the annexation of his territory to Prussia, and has renounced his right of property in the revenues of the Electorate; in compensation for which the government of Prussia has granted him an annuity of 2,000,000 thalers.

A dispatch from Calcutta announces the loss at sea

of the ship Indus, coolie laden, and four hundred and eighteen coolies perished.

A dispatch from Teheran says the trouble between the Shah and the late Grand Vizier grows out of local matters entirely, and does not, as reported, relate to the Renter Commission. It is believed that the Vizier will soon be reinstated.

The Brazilian cable which was broken and lost east of Madeira, has been recovered and the shore end taken to Madeira.

The weather throughout England has been wet and unfavorable for the crops. The Mark Lane Express says the potato disease is spreading rapidly, and estimates that England must import 12,000,000 quarters of wheat this year.

The Great Eastern has arrived at Portland having failed to recover the cable of 1865. No further reduction of tolls is probable at present.

One hundred tons of American bar iron were sold at Liverpool on the 16th inst., at £11 10s. per ton, thus underselling English iron. Cains, the iron merchant, of Liverpool, in a letter to the press, admits that iron may be profitably purchased in New York for shipment to England, and says he is convinced American trade is lost to England.

The Spanish steamer Murillo, which ran down the emigrant ship Northfleet, having arrived at Dover, has been detained there by orders from the Admiralty.

It appears to be certain that the population of the empire of India, says the Pall Mall Gazette, is from one-fourth to one-third greater than it was supposed to be, or, in round numbers, it amounts to 240,000,000 souls. The census of Bengal, for which alone the details are yet before us, presents several very startling results. Before the census was taken the population of this region was estimated at about 42,000,000. It turns out to be 66,856,859, or more than half as much again as the received estimates. There has been another revelation made by the census as astonishing as the hitherto unsuspected populousness of the province. The Mohammedans number very nearly a third of the whole population.

London, 9th mo. 22d.—Consols 92½. U. S. 5 per cents 91½.

Liverpool.—Uplands cotton, 9d.; Orleans, 9½d. Breadstuffs quiet.

UNITED STATES.—A severe financial panic commenced in New York and Philadelphia, and extended from thence to other cities, on the 18th inst. It appears to have had its origin in the suspension of the eminent banking house of Jay Cooke & Co., with branches in New York and Washington, and was quickly followed by that of E. Clark & Co., Philada., Fisk & Hatch, E. D. Randolph & Co., and numerous other bankers and brokers in New York, and a considerable number in Philadelphia. Most of these houses are understood to hold assets much in excess of their liabilities, and will, it is expected, ultimately pay their debts in full. In consequence of the sudden shock given to credit by these failures, a run set in upon various banks and trust companies which held large sums on deposit. Most of these institutions met all demands promptly, but others were compelled to close their doors; this was the case with the Union Bank, Philada., and the Union Trust Company, the National Trust Company, the Bank of the Commonwealth and the Bank of North America, New York.

The market for stocks, &c., became unsettled, and railroad shares in some cases sunk greatly in value. At the end of four days the excitement had in measure subsided, and prices were generally higher. The U. S. Secretary of the Treasury, with the approval of the President, has directed the purchase of U. S. bonds to an unlimited amount, with a view of throwing more currency into circulation.

The failure of Jay Cooke & Co. came from large advances on North Pacific Railroad bonds and other securities not immediately marketable.

On the evening of the 22d it was believed that the crisis was past, and confidence returning. Throughout the panic there was no call upon the National Treasury for assistance except from New York, a light one from Philadelphia, and still less from Washington. The general business of the country is said to be prosperous.

The interments in Philadelphia last week numbered 283, including 110 children under two years of age. There were 18 deaths of cholera infantum, 41 consumption, 25 marasmus, and 10 old age.

In New York there were 598 deaths last week.

Commissioner Brunot has contracted with the Ute Indians for a cession of all the mountain portion of their reservation that is not fit for agricultural purposes to the United States.

Information has been received of the rescue of the

crew of the Polaris. The party wintered in Life-boat Cove, where they built a timber house, which they covered with sails. In the spring two boats were built of thin pine boards taken from the cabin of the Polaris. On these the whole party of fourteen embarked as soon as the ice opened, and sailed southward; and on the 22d of Sixth month they were picked up by the whaler Ravonseraig, off the coast of Greenland. From this vessel they were transferred to another which conveyed them to Dundee, Scotland; all were well notwithstanding their great hardships and privations. The entire party left Dundee on the 23d, in company with the U. States Vice Consul, for Liverpool, to take the steamer for New York.

*The Markets, &c.*—The following were the quotations on the 22d inst. *New York.*—No public sales of gold were made, it is rated at about 111¾. No reliable quotations can be given for government securities, which are temporarily depressed in value. Superfine flour, \$5.50 a \$6; State extra, \$6.75 a \$7.10; finer brands, \$7.50 a \$10.75. Amber western wheat, \$1.66; red western, \$1.62; No. 2 Milwaukee spring wheat, \$1.48. Oats, 49 a 54 cts. State rye, 92 cts. Western mixed corn, 63 a 64 cts.; yellow, 67 cts. *Philadelphia.*—Superfine flour, \$4 a \$4.50; extras, \$4.50 a \$5.50; finer brands, \$6 a \$10. White wheat, \$1.70 a \$1.85; amber, \$1.65 a \$1.70; red, \$1.55 a \$1.60. Yellow corn, 66 cts. The market for beef cattle was dull. Sales of about 3000 head at 7 a 7½ cts. per lb. gross for choice and extra, fair to good, 5½ a 6½ cts., and common, 4 a 4½ cts. Sheep sold at 4½ a 6 cts. per lb. gross, and hogs at \$7.25 per 100 lb. net.

#### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held in Philadelphia on Sixth-day, Tenth month 3d, at 1 p. m.

The Committees on Instruction and Admission will meet at 10 A. M., of the same day.

The Visiting Committee, appointed to attend the Examination at the School, meet there on Second-day evening, 9th mo. 29th. For the accommodation of this Committee, conveyances will be at the Street Road Station on the 29th inst., to meet the trains that leave Philadelphia at 2.30 and 4.45 P. M.

SAMUEL MORRIS,

Philada., 9th mo. 23d, 1873.

Clerk.

#### WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to CHARLES J. ALLEN, Street Road P. O., Chester Co., Pa. Applications may also be left with JACOB SMEDLEY, 304 Arch St., Philadelphia.

#### WANTED

A teacher in the classical department on the boys' side at Westtown School.

Application may be made to

Thomas Conard, West Grove, Chester Co.

Joseph Walton, Philadelphia.

William Evans, "

Charles Evans, "

#### EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of Tenth month.

Application may be made to

Elton B. Gifford, 28 North Third St.

Ephraim Smith, 1110 Pine St.

James Bromley, 641 Franklin St.

Richard J. Allen, 472 North Third St.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Fall term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### WANTED

A suitable woman Friend to act as Governess at Westtown Boarding School. Apply to

Rebecca S. Allen, Philadelphia.

Sarah A. Rielie, "

Susan E. Comfort, Knox St., Germantown.

Lydia L. Walton, Moorestown, N. J.

#### RECEIPTS.

Received from Daniel Packer, N. J., \$2, vol. 47 from Gideon C. Smith, R. I., \$2, to No. 28, vol. 48 from Stephen Hobson, Agent, O., for Thomas Hobson Achsah Mott, and John Naylor \$2 each, vol. 47; from Thomas Twining, N. Y., \$2, vol. 47; from Natha Warrington, Agent, Io., \$2, vol. 47, and for John Vail Evan Smith, John Hoge, Michael King, Elwood Spencer, Jonathan Briggs, George Briggs, William Briggs, Jr., Thomas Penrose and Asenath Edgerton \$2 each, vol. 47, and for John Q. Spencer, \$2, to No. 17 vol. 48; from Elijah Kester, Md., \$2, vol. 47; from George B. Allee, Pa., \$2, vol. 47; from William A. Robinson, R. I., \$2, vol. 47; from Ann Bacon, N. J. per Horatio C. Walker, Thomas Williamson, William Walker, Robert Bigland, Elizabeth Williams, William Adair, George M. Goundry, Nancy Ritson, Richard B. Brockbank Alice Altham, Martin Lidbetter, Joseph Hall, Josiah Hall, William Wigham, John Little, Josiah Thompson and Rachel Jackson, 10 shillings each, vol. 47, and for Sarah S. Moss and Thomas Jackson, 10 shillings each to No. 31, vol. 48.

*Remittances received after Fourth-day morning will not appear in the Receipts until the following week.*

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at her residence, near Medford, Burlington Co. N. J., on 4th day the 6th of 8th month last, ELIZABETH B., widow of Joshua Stokes, in the 59th year of her age —, at her residence in Medford, N. J., on 6th day the 8th of 8th month last, PRISCILLA W., widow of John N. Reeve, in the 74th year of her age.

—, at her son's residence, near Medford, N. J., on 4th day the 13th of 8th month last, ELIZABETH C. widow of Benjamin H. Wills, in the 69th year of her age.

—, at the residence of David Evans, near Marlton N. J., on 5th day, 9th mo. 4th, ELIZABETH EVES Senior, in the 92d year of her age.

The above mentioned four Friends were all beloved members of Upper Evesham Monthly Meeting Friends.

—, 8th month 28th, 1873, in Robeson Townshi Berks Co., EPHRAIM MORRIS, aged 81 years and months, a member of Robeson Particular Meeting.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, TENTH MONTH 4, 1873.

NO. 7.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Bank Note Engraving.

Few modern arts have made such steady and rapid progress as that of bank note engraving, whose masters have been constantly impelled to new devices by the fresh expedients of counterfeiters and their application of new discoveries in science. Both lithography and photography at one time threatened to leave legitimate currency no protection save the law, but the danger from these sources has been in a measure averted by further triumphs in this branch of engraving.

For obvious reasons, this art has reached its highest development in the United States, and is almost distinctively American. Paper money has formed a large part of our currency since the formation of the Union, the various issues, under the local systems of banking, being so numerous that it became impossible for men in different parts of the country to be familiar with the notes of every bank. To prevent the circulation of counterfeits under such circumstances was possible only by bringing the art of bank-note engraving to such a degree of perfection as to defy all attempts at imitation.

The increase in paper currency created by the war still further tended to produce this result, which is apparent upon comparing the American work with that produced in any country in Europe.

Although the process of bank note engraving has been frequently described, but few persons whom some special taste or business has not led to its study are familiar with the character of the work carried on by the American Bank Note Company, at the corner of Liberty street and Broadway. Its details are so numerous that a minute and elaborate description would be fitted only for a magazine or a book; but an outline of its principal features will afford information to the general reader.

The American Bank Note Company, which was formed in 1858 by the consolidation of all the private companies then scattered through the United States, employs in its various departments as many as five hundred persons, of whom a large number are women. Its numerous workrooms are fire-proof, and were specially designed for the use to which they are devoted.

The designs for the vignettes of bank notes, bonds, stock certificates, &c., are made by artists of the highest standing, and then etched on steel plates by the best engravers in various parts of the country. On the reception of the plates by the company they are taken to the transferring room, where the most important feature of bank note engraving may be witnessed. This distinctive characteristic is the power to endlessly repeat the costly designs, reproducing in a short time what was originally prepared by months of artistic labor.

The engraved steel plate is first "case-hardened," or exposed to intense heat and then suddenly cooled, which gives it an adamantine surface. It is then placed in the transferring machine, which is a combination of levers by which enormous pressure can be exerted. Above the plate is placed a cylinder of soft steel, and this is rolled upon it, under pressure, until the design etched upon the hard steel is completely transferred to the soft, on which it appears in relief. This operation consumes but a brief period. The cylinder, or die, is then case-hardened like the original plate, and is ready to continuously reproduce the design upon soft plates by a process just the reverse of that described.

Formerly it was thought impossible to transfer more than a small part of a design at once, and the work was performed by slow degrees. Now a whole bank note is pressed through the process as easily as a single vignette a few years ago.

The more variety there is in the engraving of a note, the more difficult it is to counterfeit, and the more certain is a spurious note to be detected by the practised eye, which discovers anything at variance with the general appearance of the genuine, even if the expert is unable to point out the precise nature of the deficiency. For this reason fine lathe work, which it is almost impossible to successfully counterfeit, is employed for what are technically known as the "counters," or those parts of the note on which the figures are placed.

This work is executed by a geometric lathe, constructed with marvellous ingenuity and at great cost. The combinations of which it is susceptible are absolutely innumerable, and are distinguished by cutting the steel with line over line in geometrical harmony. Before beginning a new design in this manner it is difficult to foretell its precise appearance, but after it has been executed once, it can at any time be reproduced if a record is kept of each movement of the machine.

The dies are, of course, constantly accumulating, and already the room where those not in use are kept contains about \$50,000 worth of steel alone, without taking into account the value of the work to which it has been subjected.

From the transferring room the plates are taken to the printing rooms, where large numbers of men and women are constantly at

work. The paper used to receive the impressions is of several different kinds, but all are made in some way of linen. Usually a mixture of old and new linen is used, the former giving softness and the latter tenacity of texture. The paper on which the United States currency is printed contains a great number of coarse fibres, occupying a specific part of the bill, and is made under a patent controlled by the government. It is said to be more difficult to counterfeit than many other kinds; but its advantage chiefly consists in the fact that no private person can have it in his possession without rendering himself liable to prosecution. The Bank Note Company is responsible for every sheet of this received by it; and, if a fragment of paper used for \$100 notes, equal in size to one of the notes, should be lost, would be obliged to pay \$100 to the government. So perfect, however, is the system of checks and balances in the establishment, that, although the company has printed about 10,000,000 sheets, from the ten cent paper upward, it has never been obliged to refund more than \$20 in all.

The steel plates, usually bearing four *fac-similes* of one design, each the size of a bank-note, are laid upon the press and the ink applied. The ink is then wiped with a cloth from everything except the engraved lines which it has filled, and the surface of the plate is polished with whiting. A sheet of paper having been laid over it, the pressure is applied and the design printed.

Where inks of several colors are used, a separate impression must of course be made for each color. Much improvement has been made of late in the process of combining colors, and printing one over another, in a manner which at the same time produces an agreeable effect on the eye and increases the difficulty experienced by the counterfeiter.

In printing revenue stamps and tinting the spaces for the writing in checks, drafts, &c., soluble inks are often used, rendering it very difficult to use the stamps after cancellation, or to "raise" the checks by the use of acids.

Ingeniously-made machines are used for numbering the notes and stamps, one woman being able to perform the work on a great number within a few minutes.

From the printing department the sheets are taken to the drying rooms, whence, after a sufficient time, they are removed to another room, and subjected to hydraulic pressure between pasteboards. Having been pressed perfectly smooth, they are then ready to be sent from the building.

In a room on a lower floor all additions necessary to be made after the transferring process, such as special names of banks or companies, are executed with graving tools by skilled workmen.

Near this is the paper room, where the paper used by each workman is received by him and charged to him personally. The records kept here and in the drying room

must exactly tally. Every time that the paper passes from one department to another it is carefully counted, so that the company can fasten on some person the responsibility for every missing sheet.

Of the United States currency the greater part, for the sake of safety, is printed in three establishments, the same notes going through a part of the process here and a part in the National Company, while the final work is performed in the government office at Washington.

A large part of the work of the American Company is done for foreign countries, including British provinces, the West India Islands, the empire of Brazil, all the South American republics and the government banks in Russia, Greece and Italy, together with private institutions in England, Switzerland and other parts of Europe.—*N. E. Post.*

For "The Friend."

### Our Watch, and Our Warfare.

"Take ye heed, watch and pray: for ye know not when the time is."—Mark xiii. 33.

"Watch ye therefore, and pray always, that ye may be accounted worthy to escape all these things that shall come to pass, and to stand before the Son of man."—Luke xxi. 36.

"But the end of all things is at hand: be ye therefore sober, and watch unto prayer."—1 Peter iv. 7.

"Watch ye, and pray, lest ye enter into temptation. The spirit truly is ready, but the flesh is weak."—Mark xiv. 38.

"Watch ye, stand fast in the faith, quit you like men, be strong."—1 Cor. xvi. 33.

"Put on the whole armor of God, that ye may be able to stand against the wiles of the devil.

— "having your loins girt about with truth, and having on the breastplate of righteousness;

"And your feet shod with the preparation of the gospel of peace;

"Above all, taking the shield of faith, wherewith ye shall be able to quench all the fiery darts of the wicked.

"And take the helmet of salvation, and the sword of the Spirit, which is the word of God:

"Praying always with all prayer and supplication in the Spirit, and watching thereunto with all perseverance."—Eph. vi. 11, 14-18.

"Continue in prayer, and watch in the same with thanksgiving."—Col. iv. 2.

Watch, and pray. The two go together. Watch, because the enemy assaults with various temptations, and you may be taken unawares; and when you see danger—when pride, or vanity, or selfishness, or sloth, or discontent, are gaining entrance, then pray. Many overlook this part, and try to fight their corruptions in their own strength. But we cannot conquer thus. We must first turn to the Stronghold—tell our ever-present Saviour that we are tempted and weak, place ourselves in His care and keeping, and ask Him to overcome for us; either to take away the temptation, or to give us His strength to stand against it. Putting on the whole armor of God is another form of expression for putting on Divine strength through faith. But first we are to have our loins girt about with truth: our eye must be single unto our Lord; with no reservation in favor of some pet corruption—no leaning upon our own strength. If we are His, then we may have for a helmet a strong hope of His salvation from whatever assails us. By faith in Christ, and wielding no carnal weapon of human reasoning or effort, but the sword of the Spirit—obeying the word or message of God to us individually, we shall be able to quench all the fiery darts of the wicked. But we cannot thus fight and conquer, unless Christ is our Cap-

tain; unless we have ceased to be the servants of sin, and become the servants of God.

For, "to whom ye *yield yourselves* servants to obey, his servants ye are to whom ye obey; whether of sin unto death, or of obedience unto righteousness."—Romans vi. 16. And "the wages of sin is death; but the *gift* of God is eternal life, through Jesus Christ our Lord." All, His gift; the salvation from condemnation and from corruption—the armor, the victory. All ours, if we give ourselves up to Him, to be His soldiers and servants—to let Him work in us, and for us, and through us, according to His good pleasure.

How dishonoring then must it be to the invincible King, to allow some enemies to lurk in the camp, under the idea that they have always been there, and cannot be cast out! And how many Christians do indulge fearfulness, or doubt, or gloom, or passion, or sensitiveness (which is generally a form of pride), or heedlessness, or discourtesy, or anxiety; saying in themselves, "This is my infirmity—it is constitutional, I cannot help it!"

Ah, my friend, hast thou kept on the watch for this, thy *besetting* sin? and hast thou gone forth against it in the whole armor of God, that thou may be able to stand against this wile of the devil?

And hast thou ever thought that to thee it may be given, like Paul, to *glory* in thy infirmities, that the power of Christ may rest upon thee? For if thou hast been a gloomy man, and through grace becomes a cheerful one—or anxious, and becomes of a quiet, trusting spirit—or passionate, and becomes gentle—or a touchy man, and becomes charitable and humble—or a blunt man, and becomes courteous, thou hast much more opportunity to show forth the praises of Him who hath called thee out of darkness into His marvelous light, than if no such *manifest* change had been needed; and others seeing, may be led to seek for themselves the same deliverance.

That was a wonderful utterance of the apostle James: "My brethren, count it all joy when ye fall into divers temptations." There must be a very strong faith in the ultimate victory of the Power that worketh in us, for us to count it *all joy* to find ourselves in the midst of divers new enemies. Let us try to realize it.

M.

For "The Friend."

Believing the following account of the first porpoise in the Brighton Aquarium will interest many of the readers of "The Friend," who have seen it rolling, tumbling, swimming, &c., in the mid-ocean, but not seen it on land. I copy it for insertion.

"A pair of porpoises are among the attractions of the Brighton Aquarium. — Lee thus described the first, before it had a companion:

"The porpoise at its arrival was 4 ft. 6 in. long. The tank in which it is placed is above 102 feet in length. I regret to say it was necessary to place an attendant on guard before the tank, to prevent people amusing themselves by frightening the poor thing by shaking parasols and sticks at it, as it passed them. It ate 60 live poutings and smelts the first day, but as it will now take dead fish, there will be less difficulty in providing food for it. Of this it has given to it 4 pounds a day, at four meals, as a first experiment of its necessities. If this is insufficient, it can help itself from a shoal of smelts and other small fish which have been put in the tank with it.

When it catches a fish it siezes it by the middle of the body, so that the head and tail project on each side of its mouth, holds it there for a second, as if pressing its teeth into it to partially divide it into pieces and make it flexible, and then swallows it at a gulp, apparently without any effort to turn it lengthwise, and bolt it head foremost.

"The pretty creature has a nice, good-natured face, in which I fancy I can often read an expression of pleasure and animation and is as full of fun and frolic as a Newfoundland pup, galloping along something like a dog after a stick thrown by its master, and tossing up its tail with a romping kick, as a skittish colt throws up its heels in play. It will be as docile as a seal; for the porpoise is a very intelligent animal. It has a large brain and acute sensibility."

Extract from the *Life of Thomas Shillitoe.*—

In the year 1790, he believed it was required of him to leave his family, and outward concerns, to travel in the work of the ministry. As the visit, if entered upon, would require him to be absent from home a considerable length of time, and he had no one to leave in charge of his business, he was much tried, and at first disposed to put it aside. He says: "I found the enemy began to be very busy, endeavoring to take advantage of me, and sap the foundation of my confidence in the never failing arm of Divine power. I was one day tempted to come to the conclusion, that let the consequences be what they might, I must give up all prospects of ever moving in this engagement; but He who knew the sincerity of my heart, did not leave me in this season of extremity, to become a prey to the adversary of souls, but in his unmerited mercy had compassion on me. One day when I was standing cutting out work for my men (shoemaking) my mind being under the weight of concern, these discouragements again presented themselves, if possible, with double force; but in adorable mercy, I was so brought under the influence of divine help, as I had not often, if ever before known. And as I became willing to yield to it, the power of the mighty God of Jacob was mercifully manifest, subduing the influence and power of the adversary; holding out for my acceptance this encouraging promise, which was addressed to my inward hearing, in a language as intelligible as ever I heard words spoken to my natural ear: 'I will be more than bolts and bars to thy outward habitation, more than a master to thy servants, for I can restrain their wandering minds. More than a husband to thy wife, and a parent to thy infant children.' At this the knife I was using fell out of my hands; and I no longer dared to hesitate, after such a confirmation." In a short time after this, he informed his friends of his religious concern to visit the families of the members of his own religious Society in Norwich, which he accomplished to the satisfaction of those visited, as well as himself. Upon returning to his residence he found his outward concerns in as good order as if he had taken the management of them the whole time. He remarks: "After such demonstrations of the superintending care of the Most High, what must be the sad consequences of unfaithfulness to Divine requirings, should it in a future day mark my footsteps."

"Speak fitly, or be silent wisely."

For "The Friend"

John Heald.

(Continued from page 42.)

12th mo. 17th, 1816. "We parted with our kind friends of Virginia, and about 2 o'clock crossed the line into North Carolina to Peggy Vindslow's, a widow. I was weary, and was indly entertained. In the morning went nine miles to Wells Meeting, it was their meeting in course. Here we met with two men, two women and a girl. I felt weak and tried, ut in this retired situation, I felt encouragement in the renewal of some expressions of our Lord: 'Many prophets and righteous men have desired to see the things that ye see, and have not seen them.' Some of these have in visions seen glorious things, for Isaiah speaking of things to come as if they then were, says: 'Unto us a son is born, unto us a child is given, and the government shall be on his shoulders. He shall be called, Wonderful, Counsellor, the mighty God, the everlasting Father, the Prince of Peace, and of the increase of His government and peace there shall be no end.' Another was grieved because the gold had become dim, and the most fine gold changed: 'The precious sons of Zion comparable to fine gold, how are they esteemed as earthen pitchers! Thus a difference is described between the faithful and the unfaithful.

"We rode this evening to Benjamin Albertson's, at Sutton's Creek. The next day we attended their meeting, I addressed it with some of Paul's expressions: 'Let supplication, intercession and prayer be made for all men; for kings and for all in authority, that we may lead quiet and peaceable lives, for this is good and acceptable in the sight of God our Saviour, who will have all men to be saved and come to the knowledge of the truth;' pressing the necessity of prayer not only for ourselves, but so one for another. Are there not too many who are neglecting to perform this duty? and this be neglected can such be concerned as they ought to be to pray for themselves. Those who are duly concerned for themselves will also be concerned for others, this will follow as naturally as one time does another. Many words were dropped to encourage to faithfulness, and to avoid a state of ease, which would hinder the enjoyment of much comfort.

20th. We attended the meeting at Little River, held by appointment. A considerable number of Friends and others attended. In addressing them, I began with: 'But Mary hath chosen that better part, that shall not be taken from her.' I proceeded but slowly, and could not get forward with readiness, and I went on as I could, endeavoring to attract an attention to obtain that good part which we are all desiring to have. When we are about to part with earthly enjoyments, then we shall want to obtain a possession in that inheritance that is undefiled and that fadeth not away. Seeing we desire such an inheritance, should we not attend very carefully to that which we see will be most to our advantage? Thus I labored, and many of them were tendered, and it was a good meeting, and I hope tended to profit. I felt much love for the people, and earnestly desired their welfare."

After visiting at several other places, J. H. Stus speaks of a meeting at Sutton's Creek. "My mind was soon introduced to a trying exercise [respecting] a state near to be forsaken by the Saviour of men, and though near

I believed there was yet hope, at least that such might return, repent and live. I stated the example of the vineyard: 'What could I have done more for my vineyard, that I have not done in it.' I instanced Manoah's fear of dying, because they had seen an angel of the Lord, but his wife encouraged him to hope, saying, 'if the Lord were minded to kill us he would not have received an offering at our hands.' I then mentioned the case of the prodigal, who had gone into a far country and wasted his substance, and when that was gone he joined himself to a citizen of that place, who sent him into the fields to feed swine, and he fain would have filled himself with the husks the swine did eat, and no man gave unto him, &c.

At Buck Spring Meeting, I supposed no way would open for labor, but at length a little presented and that simple. As I proceeded other matter opened, and I went on and was furnished with an easy flow of expression. In the last two meetings truth rose into dominion, the sincere were encouraged, and the negligent were warned and affectionately aroused. May I be preserved in humility, and return as Mordecai did to wait at the king's gate.

28th. Attended a meeting near Mary Lawrence's. I mentioned Joshua, the servant of the Lord, and his advice to Israel when he told them they knew in all their hearts and in all their souls, that not one of the good things had failed of all that had been promised to them. Thus he tried to engage them to serve the Lord. There are many blessings promised, such as 'Blessed are the pure in heart;' 'Blessed are the poor in spirit;' 'Blessed are ye when men shall revile you, and persecute you, and say all manner of evil falsely against you for my sake, rejoice and be exceeding glad, for great is your reward in heaven;' 'Blessed are the peace-makers, for they shall be called the children of God;' and not one of these blessings has failed to the faithful, to those who have been obedient to the divine requirements. 'If ye are willing and obedient, ye shall eat the good of the land.' 'Seek first the kingdom of heaven and the righteousness thereof, and all these things shall be added, for your Heavenly Father knoweth that ye need all these things.' None of these blessings have failed to the humble, devoted, dedicated ones.

1st mo. 1st, 1817. We again attended Rich Square Meeting. I introduced the command of our blessed Lord, of laboring for that bread which perisheth not, but that nourisheth up unto eternal life. I believed there would be more profit in searching deeply into the true meaning of this, than in going into the wide field of speculation, viewing or trying to view things afar off. Things near, I believed, were too often neglected in trying to investigate and comprehend incomprehensible things, and much loss sustained thereby. We should meditate and reflect, and thereby improve in silence. We should seek to know what the bread consisted of, which we are commanded to labor for. If ye love me, said our Lord, ye will keep my commandments. If we love Him, we would love one another. If we did not labor for that bread we should sustain a loss, for we might remember how it was with the first anointed king of Israel; until he disobeyed the voice of the Lord, he was helped in all his difficulties; but it was after he had been disobedient he complained that the Lord had forsaken him, and answered him no more; and after this, he

went to those heights where he fell on his own sword, and where David said, let there be neither dew, nor rain, nor fields of offering, for there the shield of the mighty is vilely cast away, and the beauty of Israel is slain on thy high places.

6th. We rode about twelve miles to the funeral of Lydia Newsom, wife of Willis Newsom, she died after about four days illness, leaving five children, one about six weeks old. They lived remote from Friends. Some counsel was given to be in readiness for death, and that the connections, after dropping the tear of sympathy, do not invite sorrow and delight to grieve; after which the corpse was borne to the grave in the orchard near the house.

8th. This morning my mind was brought under an exercise respecting the people of color under Friends' care, understanding that government considered the Society of Friends to be a body corporate and capable of holding property, and that manumission for a person of color would last no longer than the life of the person who gave it, and that the heirs of such assignee could reduce again to slavery such as had been manumitted, and sell them into perpetual servitude. I was at a Friend's house, where a woman of color lived, who said the Friend who had manumitted her was an old man, that his children had gone out of society, and had several times endeavored to get her away to sell to the speculators. The Yearly Meeting had concluded to have them conveyed by legal transfer from the original owners to the Yearly Meeting, as being the best means to secure their freedom, but somehow Friends here were not united to fall in with the direction of the Yearly Meeting. My mind is alarmed on account of the deplorable situation of this oppressed people, of whom there are abundance in the parts we have passed through and are now in."

(To be continued.)

*Curious Result of Misspelling.*—Errors in orthography are inelegant, but generally productive of no greater harm than a comical mistake or remediable misunderstanding. They may, however, have very serious consequences, and my Russian friends related to me an instance of this, which, although I must leave to them the responsibility for its historical accuracy, ought to be a warning to careless spellers. Two streams fall into the Black Sea, they said at a short distance to the east and west of Batoum, [near the eastern end of the Black Sea], and the names of these streams are, with the exception of one letter, identical. When the frontier line in this quarter of the world was being negotiated between Russia and Turkey, the former power was naturally anxious to include Batoum (the only good harbor on the eastern shore of the Euxine) within its territory, and in order to obtain this object, to extend its frontier to the most westerly of the two streams. In drawing up the treaty, however, that one little letter, which alone marked the difference in their names, was omitted, and the eastern stream became and has remained the division between the two countries.—*Mounsey's Persia.*

Sydney Smith once commenced a charity sermon, by saying: "Benevolence is a sentiment common to human nature, A never sees B in distress without asking C to relieve him."

## PILGRIM DISCOVERIES.

I've found a joy in sorrow,  
A secret balm for pain,  
A beautiful to-morrow  
Of sunshine after rain.  
I've found a branch of healing,  
Near every bitter spring;  
A whispered promise stealing  
O'er every broken string.

I've found a glad hosanna  
For every woe and wail,  
A handful of sweet manna,  
When grapes from Eschol fail.  
I've found a Rock of Ages,  
When desert wells were dry;  
And after weary stages,  
I've found an Elim nigh.

An Elim with its coolness,  
Its fountains and its shade!  
A blessing in its fulness,  
When buds of promise fade!  
O'er tears of soft contrition  
I've seen a rainbow light;  
A glory and fruition,  
So near!—yet out of sight.

My Saviour! Thee possessing,  
We have the joy, the balm,  
The healing and the blessing,  
The sunshine and the psalm;  
The promise for the fearful,  
The Elim for the faint,  
The rainbow for the tearful,  
The glory for the saint.

## STILL DAY IN AUTUMN.

I love to wander through the woodlands hoary  
In the soft gloom of an autumnal day,  
When Summer gathers up her robes of glory,  
And, like a dream of beauty, glides away.

How through each loved familiar path she lingers,  
Serenely smiling through the golden mist,  
Tinting the wild grape with her dewy fingers,  
Till the cool emerald turns to amethyst,—

Kindling the faint stars of the hazel, shining,  
To light the gloom of Autumn's mouldering halls,  
With hoary plumes the clematis entwining,  
Where o'er the rocks her withered garland falls.  
*Sarah H. Whitman.*

## The Natives of Australia.

The wild state in which the aborigines of Australia exist is the result of the poverty of their country, which affords no other source of sustenance than animals. True these abound there: kangaroos, squirrels, opossums, &c., and birds of various kinds being numerous. In this mild climate the natives can live without any shelter.

According to H. de Castella (in his recollections of a French Squatter in Australia) the Australian blacks are not so ugly as they have been represented. Among the men whom he examined, some were tall and well made. Their slow, lounging gait, was not devoid of dignity, and the solemnity of their step reminded one of the strut of a tragedian on the stage.

These people recognize family ties. None of them have more than one wife, but they do not marry within their own particular tribe. They live encamped in bands, and now that they are reduced to small numbers, in entire tribes. They do not build permanent huts, but protect themselves in summer from the sun and hot winds merely by a heap of gum-tree branches, piled up against some sticks thrust in the ground. When winter comes on, they strip from the trees large pieces of bark, eight or ten feet high, and as wide as the whole circumference of the trunk, forming with these pieces a screen, which

Selected.

they place at the side whence the rain is blowing, and alter if the wind happens to change. Squatted on the bare earth, in the kangaroo skin which serves the double purpose of bed and clothing, each of them is placed before a hearth of his own.

The Australian natives of the present day have guns, and employ little axes for chopping their wood and cutting bark, but it is not long since the only weapons they possessed were made of hard wood, and their hatchets consisted of sharp stones fastened to the end of sticks, like the flint instruments used by men before the deluge. There is in fact little or no difference between the people of the age of stone, and the negroes of Australia, and consequently an acquaintance with the wild manners and customs of these races has been of great advantage to naturalists in our day in throwing light upon the history of primitive man.

H. de Castella was greatly struck by the agility of the Australian blacks in climbing gum-trees whose straight stems are often devoid of branches for twenty or thirty feet from their base, and are besides too thick to be clasped. When by perfect prodigies of acrobaticism the native reached the opossums' nests, he seized the animals, and threw them to his wife.

This wife carried every thing; her last born in a reed basket hanging from her neck, the slaughtered game in one hand, and in the other a burning gum branch to light the fire when the family took up fresh quarters. The man walked in front, carrying nothing but his weapons; then came the wife, and after her the children according to height.

A party of Australian blacks is never, by any chance, to be met with walking abreast, even when in great numbers, and if a whole tribe is crossing the plains, only a long black file is to be seen moving above the high grass.

H. de Castella was a spectator of the curious sight which eel fishing affords among these natives. Holding a spear in each hand with which to rake up the bottom, they wade through the water up to their waists, balancing and regulating their movements to the even measure of one of their chants. When an eel is transfixed by a stroke of one lance, they pierce it in another part of the body with the second, and then, holding the two points apart throw the fish upon the bank, the number they take in this manner being very large. They dispense with sauce pans and cooking utensils of all kinds in the preparation of their meals, simply placing the game or fish on bright coals covered over with a little ashes.

Every one has heard of the skill with which savages navigate their rivers in bark canoes, but the people of whom we are now speaking render themselves remarkable above all others by their adroitness in guiding their little crafts over the rapids. Only two persons can sit in their boats, while a spear supplies the place of an oar, and is used with astonishing dexterity.

No one acquainted with this kind of barbarous life, will be surprised to hear that the blacks of Australia are diminishing at a wonderfully quick rate. Of the whole Varra tribe, formerly a numerous one, H. de Castella could find no more than seventeen individuals.

What most struck the author of an account of a journey from Sydney to Adelaide, which appeared in the "Tour de Monde," in 1860, was the small number of aborigines which he

met in a distance of more than two hundred and fifty miles. Sturt and Mitchell, in the middle of the present century, had visited tribes on the higher tributaries of the Murray river, which then consisted of several hundred persons, but Castella found them only represented by scattered groups of seven or eight famished individuals.—*Louis Figuier.*

## The Spread of the Knowledge of the Gospel.

As to the increased efforts to spread the knowledge of the gospel, but little fruit can be expected, *so long* as they continue to be blended with the inventions and contrivances of man. I verily believe this is one great means of preventing the people from coming to a knowledge of the true gospel, which remains to be "the power of God unto salvation." If the minds of the people were turned to an inward and vital knowledge of this work there would be some hope; provided the teachers themselves were really called to an qualified for the work; and not, as is to be feared too many of them are, strangers to the inward work themselves.

In my apprehension nothing short of a day of calamity will bring the people to their senses, and reduce them to a state of simplicity and humility; which in the end would prove an unspeakable blessing, if happily were the means of turning their attention to the true Teacher in their own hearts, who giveth life to those that hear and obey him and would cause them to "cease from man whose breath is in his nostrils," by whom they have so long been kept in darkness. That so those abominations which are set up and standing in the place of the true Christian religion, and which make the earth destitute of the presence of the Lord, may forever be swept away from its surface.

Should such a day be permitted, it will certainly try the members of our highly professed Society, and show *who* are on the foundation that standeth sure; these will be preserved as in the hollow of the Lord's hand from "the blast of the terrible ones;" but the chaff,—such as have nothing but an empty profession to stand upon, will assuredly be scattered before the storm.

DANIEL WHEELER.

## Collecting India-Rubber.

Henry Alexander Wickham, of England, has recently published some notes of a journey through the north-eastern portion of South America. He resided for some months on the banks of the Orinoco, and attempted to supply a deficiency in his finances by collecting India-rubber. His description of his operations may revive in the minds of some of the older settlers in our Western States, the sugarcamps, where the sap of the maple was collected and boiled into sugar.

As the sugar is obtained from the maple and the turpentine from the pine, so the India-rubber is procured by tapping a species of tree that is found in the South American forests, and collecting the milky sap that flows from it. This sap hardens and darkens by exposure, and forms the India-rubber. The tree is the *Siphonia elastica*, called by the residents in the country—the Ciringa.

After making some preliminary examinations, our author set out from San Fernando

with some men and boys, the whole party comprising seven persons, about the last of the Eleventh month, in two boats, to explore the forests of the Upper Orinoco for Ciringa. On the 27th he says: "We arrived at the mouth of a small river, called Caricia, or Pirari. As this was about the neighborhood purposed to work india-rubber during the fier weather, I camped; and after seeing amon properly attended to, I at once despatched the men into the forest, while I paddled the casco up the creek in order to take them in further up. In a short time they returned with their notched stieks, indicating fifty-seven trees seen in the small space of forest they had traversed. I felt satisfied with his intelligence, but next day went on as far as the next creek's mouth above. I discovered here that the Orinoco, instead of receiving, gave off water, which, after describing a semicircle, and blending with the water of two streams, Aguas Negras, fell into the main river by the mouth I had first entered, thus rendering the piece of land I had determined to work for rubber an island. I had noticed no ciringa trees on the Orinoco bank all the way. The forest on the two sides of this stream presented a marked contrast: the black water following one bank, and that of the Orinoco the other. The forest on the bank occupied by the white water, contained the ciringa or india-rubber trees, the manac palm, and other trees, in striking contrast with the opposite side, which had neither ciringa nor manac, but an abundance of the Chiquichiqui palm—the Piassava of the Rio Negro.

"December 1st.—I determined to put up my rancho for the season's work on a well-wooded bluff, which abutted above the very dark, clear water of the first and smallest of the two streams already mentioned. This ranch creek flowed out of some large lagoons way to the west. It was strange to see the manas, or river-porpoises, disporting themselves in this little creek in the very core of the continent.

"Having thus fixed on working quarters, I sent Rogers and two men in one of the canoes to the plantations of the Marquitaré on the Conuconumo, to negotiate for the necessary manioco. Here, in my little creek, I felt indeed shut out from the rest of the world after passing within the mouth, and taking a few turns, all trace was lost of nearness even to the unpeopled reaches of the Orinoco, so completely is this river enclosed by the forest."

"The constant irritation from the bite of the mosquitos at length caused my hands and feet to swell, and become inflamed, and, after a time, to break out into distressingly ulcerated patches on the knuckles and backs of the hands. My feet especially were so inflamed, that I was confined to my hammock for some days, whilst Ramon and the two boys were putting up the lodge. The last capping having been given to a substantial roof of palm leaves (those of the all-serviceable chiquichiqui), Ramon and I went to work for the first time on the india-rubber trees. My plan was to cut a path along the Orinoco coast, and another along the creek, and then to intersect the triangle of forest enclosed betwixt them. We found the forest dry and good for work; and, at the beginning of my task, on the very first day, I cleared sixteen trees with the assistance of the two boys, Ramon cutting the path with machete.

"On the 13th, Rogers returned with only

twenty mapiri of manioco. I continued cleaning the trees daily in the forest, and hoped to have 1,000 ready for tapping in the ensuing month. One of the chief features of the forest is the variety and immense number of bush-ropes, 'bejuacas,' forming a sort of natural cordage; they are of every size, and bind the top branches of the trees together, winding round the trunks, and coiling themselves on the ground in endless snake-like contortions. In some places they caused the men much trouble, in cutting the paths with their machetes connecting the ciringa trees. Amongst the species I noticed one kind, the section of which, when cut, tantalisingly resembled the roly-poly jam pudding of home days. Sometimes, during the time for rest, I would sit down and look up into the leafy arches above, and, as I gazed, become lost in the wonderful beauty of that upper system—a world of life complete within itself. This is the abode of strangely plumaged birds and elvish little *ti ti* monkeys, which never descend to the dark, damp soil throughout their lives, but sing and gambol in the aerial gardens of dainty ferns and sweet-smelling orchids, for every tree supports an infinite variety of plant life. All above overhead seemed the very exuberance of animal and vegetable existence, and below, its contrast—decay and darkness. Here and there was a mass of orchid, carried from above by the fall of some withered branch, sickening into pallor, thrust out from the vitalizing light and air.

"When the fruit of the ciringa (*Siphonia elastica*) approaches maturity, it is first visited by a flock of parrots, and then by the harshly screaming flocks of the yellow macaw. These birds are most wastful feeders, the ground beneath the trees becoming speedily strewn with untouched fruit as well as the shell of the nuts.

"There are many kinds of monkeys in the neighborhood, from the large red *originato*, which roars hoarsely (making a far more formidable noise than the tiger) at any change in the weather, to the pretty little *ti-ti*. A troop of the latter is one of the merriest sights imaginable, as they bound with wonderful agility from bough to bough, leaving no leaf within reach unsearched for its lurking insects: they are especially fond of the leaf-winged locust. The little creatures look truly elf-like as they peer down at you from behind a screen of foliage to get a clear view of so unwonted a presence, before they scamper off and away through the clustering branches overhead. The whistles of the monkeys, greatly resembling the notes of some bird, are heard from different parts of the forest, as they answer one another. The *arizualos*, unlike the deep brown and black monkey of Central America and the lower Amazon, are a rusty red species: they are equally surly, and give vent to their feelings in the same monstrous volume of roaring sound as the *originato*. Snakes were very numerous, and of great variety in form and color. Ramon had no names for many that we saw: they generally managed to glide quickly out of the path, and so escaped me. There was one pretty little reptile more impudent than his brethren, and less inclined to get out of the way. It was of a beautiful green; the Indians call it *loro* (parrot), and Ramon said it was very savage and venomous—"muy bravo."

"The orchideous vine-vanilla was common in the forest, but it seemed rarely to bear

fruit; and when it did so, the pungent luscious aroma was to be perceived from a distance. There were many tigers, as was evinced by the numberless tracks in the woods: the Indians were sometimes scared from their work by this terrible footprint, but I never personally encountered a tiger here. Occasionally I saw a freshly disgorged fish, in the path between the ciringa trees."

"Two days before Christmas I sent Ramon with Mateo to hunt up a wild hog or a deer for the festive occasion; however, they returned with nothing more than a panji, so the men had to fall back upon fish, which the waters of the creek rarely failed to yield in abundance. Christmas Day was spent in the rancho: in the morning the sand-flies seemed rather less troublesome than usual, but in the afternoon they appeared in swarms, and in the evening Rogers had one of his fever-chills.

"There was small chance here of over-sleeping the dawn, for with it came the mosquitos, and they do not desist from annoying until dark. My feet and hands again became very sore and inflamed, from the constant irritation of these plagues. Daily wishing for night is not a very satisfactory way of living. I did not suffer quite so much at this season, when working.

"Christmas day past, I despatched Ramon to gather a supply of the old nut-shells of the *curucito* palm, used in smoking the rubber. The day being fine, I commenced tapping with part of the people; the others continued to clean more trees to be in readiness.

"On the 2nd of January, 1870, the creek underwent a change in appearance. The current had long ceased to flow, and a sudden rise of the Orinoco had caused as sudden an influx of its white water. Latterly we had been much troubled by a large-headed worm appearing beneath the skin. The Indians said it was produced by the *Zancudos Colorado* (the red mosquito), which had become very numerous in the woods. I think the Indians right in considering these to be the larvae of a gnat. Those Ramon extracted from my back had precisely the shape of the wriggling things to be seen in most rain-water, enlarged, however, by the fostering heat of the flesh in which they were embedded. They also appear to breathe through their tails, as the head is buried, whilst the pointed tail-end approaches the surface of the skin. Their presence is not noticed except when they feed (at least I presume so, from my own sensations). The first time I felt them, I could not imagine what was the matter with me: it seemed as if some one was making a succession of thrusts into my side with a red-hot needle. The operation of extracting the insects is tedious and painful: they are first killed by the fresh milk from the india-rubber tree, or tobacco juice, applied to the red spot indicating their lodgings. This district is plagued by the mosquitos beyond any other spot I visited; added to these are biting ants, chivacoas, niguas, wasps, &c.

"8th.—I had tapped the first hundred trees, but the yield was very small, which disappointment I attributed to their being loaded with green fruit. On Sunday I often paid a visit to a friendly creole, called Merced Gil, who had followed me from San Fernando, and had established a rancho a few hours' paddle up the river, working the woods for ciringaro, near the Serra Caricia. He stated his willingness to supply me with a casco (a

large canoe with the extremities squared above the water), and complained of being on 'short commons,' having nothing in his rancho but the salted flesh of a wild cat, to obtain which delicacy he had loaded his French gun with ball, and had, in consequence, blown a hole in one of the barrels. I saw the skin of the beast hanging out to dry; it was of uniform grey, thereby differing from the usual forest cats of South America. I was better off for fare at my creek, with its fish and occasional fowl."

Oh! that the children of men would be wise and fear God, and call upon his name while the door of mercy is open, that their souls may live. For this I heartily pray, because I have been one that has tasted of the good word of God, and have known something of the power of the world to come: and having tasted of his mercy and judgment, I can no less than invite and entreat all to be faithful to the Lord, and to all His requirings; that, in the winding up of all things, God may have the praise, who is everlastingly worthy, and our poor souls find the joy and comfort that none else can give or take away.—*Alice Hayes.*

### The War Feeling.

A correspondent of the *National Baptist*, thus describes the feeling towards Germany, which he found among the French people:—"You will conclude from all this that France is in a bad way. Certainly, the immediate prospect is not good. But the French are a great people, a splendid and grand nation; and no misfortunes can keep them down, or hold them back from their destiny. Brilliant in science and speculation; reigning with an undisputed pre-eminence as the most tasteful and polished of all the peoples; as full of generous philanthropies as they are of cheerful gayety; with a profound faith in their own genius and destiny if in nothing else, they rise buoyant above all disaster and defeat. They speak lightly of the five milliards of ransom extorted from them by the triumphant German, and say they could have paid twice as much without difficulty. Attributing their late crushing defeats, and perhaps correctly, to the lack of good leaders, and to the criminal improvidence of the imperial government, they make no secret of their purposes of revenge. Said a French preacher to me, one day, as we were strolling through the garden of the Tuileries, thronged as of old, with gay crowds: 'We have three millions of soldiers in training for our revenge.' The number was perhaps an exaggeration; but the feeling was not. 'When our soldiers, who had been prisoners in Germany, returned,' he told me another day, 'they all said that they would go back some day, if it is not till they are eighty years old, and would lead all their generations with them, to fight it out with the Germans.' There is no doubt that Bismarck committed a blunder, if not a crime, in taking Alsace and Lorraine. He obeyed, doubtless an old popular feeling of the German heart, that these German-speaking provinces should constitute a part of the united Fatherland; but it seems now quite certain that he secured German unity at the risk of a fiercer war than Europe has seen for a century past, the issue of which may destroy that unity for another age. He is fully aware of his peril, and keeps Germany armed to the teeth, to

beat back the threatened attack. It has compelled a large increase of the German armies and war material, and a corresponding increase of taxes, which may make his government less popular some of these years when the crops fail, and the business prosperity declines. It is a pitiful sight—these two great peoples standing thus face to face, glowering upon each other with hate, exhausting their resources, and filling their children's hearts with the pernicious military spirit, to prepare for a battle which must bring so much of woe and desolation, and which when it shall be fought, will leave only another heritage of hatred and revenge to plague another generation of Frenchmen and Germans."

*The English Sparrow.*—A Californian, who has recently returned from a visit to New York, is anxious to have steps taken to introduce the English sparrow on this coast. He says the bird there has proved a great blessing, especially in the city. The trees in the parks are in a more flourishing condition in consequence. The sparrows live on insects (it delights in caterpillars); it searches after the early worm, and, when found, makes a meal of him. The result is a great improvement in the foliage within the city. Three years ago Trinity Church graveyard was a desolate looking place. Scarcely a leaf was to be seen on the trees; the worms held high carnival, and had it all their own way. They built nests in the trees, and dropped down on the necks of the ladies. They were especially partial to green things, but when the foliage gave out they crawled on the walks, into the church, up the shiny boots of the church-goers, in search of whatever they could devour. The sparrows came and gobbled them up; the leaves got a chance to grow; the trees took a fresh start, and now all is changed. The trees actually vie with their country cousins in beauty of foliage. The sparrows did it; they are the most wonderful insect destroyers of the feathered tribe. They are also one of the most tame birds in the world. They will run along the sidewalks a few feet in front of a person, as if delighting in human companionship. Boys forget to throw stones at them. Such confidence as they display in the kindness of man is not to be returned with cruelty. It is really amusing to see the little creatures come every morning about the door-steps and window-sills, to get crumbs of bread from the children. Many become so tame that they perch on the hands that feed them. The keepers of the Central Park say they have been of great benefit to every park in the city. They breed very fast, and will soon overrun a whole country when well started. In two years after their introduction in New York city they were observed at Niagara Falls. They followed up the Hudson and along the Erie Canal, scattering blessings as they went. They would be of much use in the Golden Gate Park. They seem specially adapted to city life, and to abodes in city parks and yards, where little fruit is raised. The fruit raisers of the interior might object to them, because they would occasionally pick at the cherries, but it is probable that even in gardens in the country they would be of more service than harm. Who can give information about their operations in the country? If any, let them send in their facts, favorable or unfavorable, no matter. San

Francisco does not want to be benefitted at the expense of the interior, not even in the matter of sparrows.—*San Francisco Bulletin.*

Selected.

True mourners in Zion weep, some for an absent God, as Mary, others for their sins, as Peter, and they will not be comforted, not by angels, but only by Him, who is nigh to all that call upon Him, and is health to those that are broken in heart. He that appeared first to weeping Mary, and next to sorrowing Peter, will shortly visit them with his salvation. He is already with them. He was with Mary, though they know it not, and He will soon be in them the sure and comfortable hope of glory.—*Fletcher.*

*Clothing on Fire.*—The frequent terrible deaths from clothes taking on fire should lead all persons to remember the following method of extinguishing such fires, as given by the *Scientific American*:

Three persons out of four would rush right up to the burning individual and begin to paw with their hands without any definite aim. It is useless to tell the victim to do this or that, or call for water. In fact, it is generally best not to say a word, but seize a blanket from the bed, or any woolen fabric—if none is at hand, take any woolen material—hold the corners as far apart as you can stretch out higher than your head, and running boldly to the person, making a motion of clasping in the arms, mostly about the shoulders. This instantly smothers the fire and saves the face. The next instant throw the person on the floor. This is an additional safety to the face and breath, and any remnant of flame can be put out more leisurely. The next instant immerse the burnt part in cold water, and all pain will cease with the rapidity of lightning. Next get some common flour, remove from the water, and cover the burnt parts with an inch thickness of flour; if possible, put the patient to bed, and do all that is possible to soothe until the physician arrives. Let the flour remain until it falls off of itself, when a beautiful new skin can be found. Unless the burns are deep, no other application is needed. The dry flour for burns is the most admirable remedy ever proposed, and the information ought to be imparted to all. The principle of its action is, that, like water, it causes instant and perfect relief from pain by totally excluding all the air from the injured parts.

## THE FRIEND.

TENTH MONTH 4, 1873.

We hear of there being in many places much speaking in the form of preaching, and great pouring out of words in the form of public prayer, and a strong desire is manifested on the part of many to have singing introduced into the meetings of Friends, under the plea of its being a desirable mode of praise and thanksgiving.

In the present condition of our religious Society, with the minds of so many impressed with the idea, that the life of religion in it is connected with the changes made from the original principles and practices of Friends, it is to be expected that the estimate of the character of these ministrations will be in

cordance with the views entertained by the arers, of the doctrines inculcated and the aetices advocated or countenanced. The opinions entertained of the qualification and authority for these public services, differ in the members according to their desire to adhere to the original faith of the Society, or to adopt that which has been substituted for it: and they no longer judge by the same standard. "Like priest like people," is an old adage, the truth of which is often manifested. It is an evidence of the long-suffering kindness and mercy of the Head of the Church, at a spring of living ministry is yet kept open among us as a people; making itself known, we doubt not, sometimes in places where it may be thought but little of; but wherever brought forth and administered "in the ability which God giveth," proving a savor of life unto life, and of death unto death. We need to be grateful for the blessing, to profit by it, and to be constantly on the watch, exercising a godly care to cherish the least evidences of a gift therein having been conferred, however small it may at first appear to be; while taking due heed lest we be deceived by that which is only a counterfeit. But is it not a subject of remark by many, that, in the present day, there are so few sprung up from among our young people, from the mantles of such ministers as were eminent in a former generation have fallen; and is not the query sometimes heard, Why is so? There can be no doubt that extraordinary gifts for the ministry and public prayer have been dispensed, ever since the rise of the Society, to men and women, who having submitted to the necessary baptisms of the Holy Ghost and fire, were fitted for the Master's service, and sent forth by Him to preach repentance and regeneration, and to declare the unsearchable riches of Christ. "The gifts and workings of God are without repentance," and He is as willing to confer them on dedicated men and women of this day as He was when He equipped and sent forth such ministers as Samuel Emlen, William Savery, Thomas Scatgood, Richard Jordan, William Jackson, Stephen Grellett and others, who when they gave the gospel trumpet gave no uncertain sound, and whose preaching was, truly in the demonstration of the Spirit and of power. We have some such still among us, but how many do they have not a greater number of successful members, male and female, who, taught in the School of Christ, have received the gift which He alone can confer, and under fresh anointing for the work, stand forth as his ambassadors declaring the word of reconciliation; workmen approved of God, that need not be ashamed, rightly dividing the word. Is it not because the work of regeneration is generally too superficial; that too many of us do not allow the transformations of the fine Grace to be deep and thorough enough! The vessels used at the altar in the Lord's Supper formerly, were to be of *beaten gold*; figurative of the humiliating crosses and deep baptisms to be undergone before the corrupt passions and appetites that war against the soul, are completely subjugated; the obstinacy and perverseness of the carnal will broken; pride plucked up by the roots, and the delusions set upon things not seen, treasure laid up in heaven, where Christ sitteth at the right hand of God. This is to be known by every one of the "peculiar people," called by the Father of men "out of darkness into his mar-

vellous light," to be a royal priesthood, a chosen nation; and the preparatory discipline is certainly necessary in all its strictness and severity before the spiritual gift is conferred to minister in the assemblies of the people.

Preaching the gospel is a very different thing from merely declaring the truths recorded in the New Testament, or drawing out discourses on the doctrines therein contained. Were the gospel of Christ nothing more than the outward glad tidings enunciated by Him and his Apostles, such might be the case, and men might become able ministers of the new Covenant by study of the Scriptures. But such is not the truth as it is in Jesus. No man can take this honor on himself; he must be called of God, as was Aaron; and when the gift is received it can be rightly exercised only when the recipient is afresh anointed with the holy oil for the service, and under the inspiration of Him who seeth in secret and knoweth the hearts of all men His present message is delivered to the hearers; whether it be denouncing judgment on the impenitent, striving to awaken the careless and lukewarm to convey light and direction to the ignorant, or to extend comfort and encouragement to the weary, struggling traveller heavenward. This, and this only is the preaching of the gospel which corresponds with the character given to the latter by the Apostle of being "the power of God unto salvation."

There have been instances among members of our religious Society, where individuals have been called to the work of the ministry early in their Christian life; where having surrendered unreservedly to the Divine will, they have given up in obedience to the drawings of the Father's love, and it has pleased Him to authorize them to speak in his Name, even before their spiritual faculties had become strong by reason of use. But such are exceptional cases. The history of those Friends who have been entrusted with large gifts, as well as others who have been called to stand before the people as ambassadors of Christ, shows how many deep provings and baptisms they had to undergo, in order that their hearts might be purified by faith, and their understandings enlarged and illuminated by emanations from the Fountain of light and love. Buried with Christ by baptism into death, as He was raised from the dead by the glory of the Father even so they also walked in newness of life. Thus they were changed men themselves before they were commissioned to labor to change others; their circumspect self-denying lives, adorning the doctrine they preached, by showing they had learned to wear the yoke of Christ and to refuse to be conformed to the manners, maxims or spirit of the world. It was thus they became scribes well instructed unto the kingdom of heaven; bringing forth out of the Lord's treasury things new and old, in performance of the duty laid upon them, whether it was in the way of reproof or correction, or of doctrine and instruction in righteousness.

The true Church on earth is a place of peace and safety, "a quiet habitation, a tabernacle that shall not be taken down; not one of the stakes thereof shall ever be removed, neither shall any of the cords thereof be broken." Militant as it is, it is the lower court of the Church triumphant in heaven. Christ is the door into it, and all who attempt to enter it by any other way are thieves and robbers.

Those who go in by Him are henceforth strangers and pilgrims in the scenes of this fallen world. They may be poor and despised, hated, and borne down with tribulation, but through the power of the Holy Spirit they are, as living stones, built up a spiritual temple, a glorious church, not having spot or wrinkle or any such thing; and are given to partake of that river "the streams whereof make glad the City of God, the holy place of the tabernacles of the Most High." It is a great mercy to be prepared to receive the gift, and a high honor to be commissioned by the glorified Head of this Church to preach his gospel; to invite in his Name the weary and heavy-laden, the sin-sick seeker or the rebellious worldling, to enter therein through the alone door and find a rest which elsewhere will be sought in vain: to be made an instrument by the Spirit of Him who came to seek and to save that which is lost, to call back the wandering prodigal to the Father's house, and to persuade those whose souls are perishing with a fatal malady, to touch the hem of the Saviour's garment, and be made whole.

Well may the query be repeated, why are not more prepared and called to this dignified mission? We are well aware that the inculcation by some in membership, of the opinion that Friends have always been mistaken in their views respecting the character of the inspiration necessary to preach the gospel, and that the source from which ministry of the word is to be drawn, is the Bible, has affectingly lowered in the Society the standard by which the qualification for its exercise is judged. This has not only deceived not a few, into supposing they might properly offer as ministry or prayer what they have acquired and practiced as teachers in First-day Schools and bible-classes, but there is reason to believe it has also spoiled some who were under the preparing hand for the work; but who have been thus induced to think further baptisms and purification were unnecessary, and without waiting to receive the priestly robes and the anointing oil, they have ventured to offer with strange fire, and so the work has been marred and they have become dwarfs.

But does not the root of the evil and loss that we are sustaining, derive its nourishment from so many among us substituting something else for childlike obedience to the manifestations of Divine Grace in the secret of the soul; choosing some supposed easier path than the strait and narrow way which alone leads to eternal life, and striving to compromise for not wearing Christ's yoke and taking up the daily cross, by loving the world but in part, and complying with its spirit but in part? We believe it does, and that if our members generally would be willing to hearken to Him who has called them with a high and holy calling, and *live up* to the profession Friends have ever made before the world, which would disentangle them from an evil covetousness after the things of this life, and lead them to seek the honor that cometh of God more than that which cometh from men. He would once more bestow more generally gifts for the ministry, and other spiritual gifts, and there would be again found in most of our meetings, "able ministers of the New Testament; not of the letter, but of the Spirit; for the letter killeth, but the Spirit giveth life."

## SUMMARY OF EVENTS.

**FOREIGN.**—The situation in Spain has not materially changed. A Bayonne dispatch of the 26th says, the Carlists are disheartened. They are unable to move for want of money, artillery and ammunition.

The city of Alicante has been bombarded by two of the insurgent iron-clad frigates. All the merchant shipping left the port and anchored outside. The British fleet was moored in the harbor on the right, and the French fleet on the west of the town, with eleven other foreign men-of-war, including Germans, occupying the east. Inside of these lines the rebel iron-clads Numancia and Mendez Nunez took up their position and prepared to bombard the place. The German commander at the last moment offered to stop the hostilities, but the English and French commanders refused to join him. About 500 projectiles, some filled with petroleum, were thrown into the city, causing considerable damage. The Spanish iron-clads Vittoria and Almanza, recently held by the British, have been released and will be sent to the relief of Alicante.

It is stated that the Bank of France has agreed to advance 100,000,000 francs to the Spanish government.

A dispatch of the 20th says that the insurgent frigates have left Alicante for Cartagena. The Carlists in the north have recently met with serious reverses, and discontent and demoralization are said to be increasing among them. The town of Berga, which was in danger of being captured by them, has been reinforced and supplied with provisions.

A Paris dispatch to the London Times says, Thiers on his return to that city, will assume the leadership of the party of the Left.

The members of the Right assert that the Assembly will declare in favor of the restoration of the monarchy before many weeks have passed. The Royalists have hopes of a division in the Bonapartist ranks. Some are disposed to act in conjunction with the Royalists, while MacMahon and his friends are opposed to a prolongation of the present provisional regime.

Gambetta intends to make another political tour through the southern and western departments. He will address the public at Bordeaux and other large cities.

The permanent committee of the Assembly had a meeting on the 25th ult. In reply to an inquiry, the Duke de Broglie stated that the government would not permit the armament of Carlists in France.

The Republican members of the Assembly, whose fears have been aroused by the movements of the monarchists, propose, when the Assembly meets, to introduce a declaration against infringement of popular sovereignty, and to resign their seats if it is not adopted.

The cholera is abating in Paris, the deaths from that disease the past week being only about twenty per day.

The harvest in Hungary has been so deficient the present year, that the government has determined to import Australian wheat and rye for sowing in the impoverished districts.

The King of Italy has left Berlin, after having a long private conference with Prince Bismarck. He subsequently took leave of the Emperor and Imperial family, and departed on his return home.

A dispatch from Teheran announces the return of the Shah of Persia to his capital. The whole population turned out to escort him to the palace. The Shah, in a brief speech, stated that he had visited Parliament and the principal institutions of Europe with the special object of introducing what he saw good in them into the administration of his government.

The ceremony of turning the first sod for the first railway in Persia took place recently at Reshd, in presence of leading Persian officials and foreign consuls.

Gold is being shipped in large sums from London to New York, in consequence of the financial troubles in the latter city. The Daily Telegraph, in an article on the American crisis, says it cannot be too strongly enforced that there is nothing radically unsound here or in the United States. The great mass of capitalists are not affected by the trouble.

The Daily News remarks, in the absence of a system of long credits the materials for panics among American trading houses do not exist. It believes the worst is over.

Two of the Bank of England forgers are confined in Pentonville prison, and the two others in Holloway prison. No visitors will be permitted to see them until the eve of their departure. Each one will be transported to a different penal colony.

Capt. Buddington and party have left for New York on the steamship City of Antwerp. Several steamship lines offered the party free passage.

The *Financier* says the business of the Atlantic cables has largely increased since the beginning of the panic

in New York, and the receipts are now estimated at \$27,000 daily.

The British Association, in session at Bradford, have adopted a resolution urging the government to send an exploring expedition to the Arctic regions.

It is reported that John Bright is opposed to the war against the Ashantees, and will resign his position in the Cabinet if it is further prosecuted.

The South Australian budget states that upward of £25,000 is now available for the promotion of immigration.

The Bank of England has advanced its rate of interest to 5 per cent.

The election for Lord Mayor of London took place on the 29th ult., and resulted in the choice of Andrew Lusk, a member of Parliament.

London, 9th mo. 29th.—Six hundred and thirty-eight thousand pounds sterling in gold, have been drawn from the Bank of England for shipment to America and Germany. The demand for discount is heavy at the advanced rate.

Liverpool.—Uplands cotton, 8½d. a 9d.; Orleans, 9½d. a 9¼d.

During the year 1872, the emigration from Great Britain consisted of 113,763 English and 73,763 Irish. In 1863 the proportion of Irish was much larger, viz: 116,381, against 61,243 English. It is stated that the condition of the peasantry in Ireland has greatly improved in the last few years.

**UNITED STATES.**—*The Money Troubles.*—During all last week the financial embarrassment growing out of the heavy failures of previous days continued, greatly depressing prices of stocks, bonds and securities generally, and making it difficult for many persons to provide the currency needed for the transaction of their ordinary business. The U. S. Secretary of the Treasury ceased buying U. S. bonds when fourteen millions of currency had been paid out for that purpose. President Grant in a recent communication says: The government is desirous of doing all in its power to relieve the present unsettled condition of business affairs which is holding back the immense resources of the country now awaiting transportation to the seaboard and a market. Confidence on the part of the people is the first thing needed to relieve this condition and to avert the threatened destruction of business, with its accompanying disasters to all classes of the people. To re-establish this feeling the government is willing to take all legal measures at its command, but it is evident that no government efforts will avail without the active co-operation of the banks and moneyed corporations of the country. With the \$14,000,000 already paid out in the purchase of the government indebtedness, and the withdrawal of their large deposits from the Treasury, the banks are now strong enough to adopt a liberal policy on their part, and, by a generous system of discounts, to sustain the business interests of the country. Should such a course be pursued the \$44,000,000 of reserve will be considered as money in the Treasury, to meet the demands of the public necessity as the circumstances of the country may require.

Jay Cooke & Co. have published a statement showing that their entire liabilities amount to scarcely eight million dollars, while they hold assets to about twice that amount. They expect eventually to pay in full and have a large surplus.

The mortality in Philadelphia last week numbered 257, including 95 children under two years of age. New York had 524 deaths last week.

There were 440 deaths of yellow fever at Shreveport, Louisiana, from 9th mo. 1st to 26th. The whole population was only about 3,000 when the fever broke out.

A dispatch from Portland, Oregon, dated the 27th ult. says, work on the Pacific division of the Northern Pacific Railroad progresses as usual. Contractors expect to complete the connection between the Columbia River and Puget Sound at Tacoma, within sixty days.

An emigration from Iceland to the United States is commencing. The Icelanders are said to resemble the Scotch in appearance, and are a healthy looking class of people.

*The Markets, &c.*—The following were the quotations on the 29th ult. *New York.*—American gold, 112½. U. S. securities no quotations. Superfine flour, \$5.40 a \$6; State extra, \$6.35 a \$6.80; finer brands, \$7 a \$10.75. red western wheat, \$1.66; No. 1 Chicago spring, \$1.44; No. 2 do., \$1.37 a \$1.40. Oats, 49 a 55½ cts. State rye, 98 cts. Western mixed corn, 64 a 66 cts.; yellow, 67½ a 68 cts. Carolina rice, 8½ a 9 cts.; East Indian, 6½ a 7½ cts. *Philadelphia.*—Cotton, 18 a 19 cts. for uplands and New Orleans. Crude petroleum, 11 cts.; standard white, 16 cts. Superfine flour, \$3.50 a \$4.50; extra, \$4.75 a \$5.75; finer brands, \$6 a \$10. White wheat, \$1.70 a \$1.80; amber, \$1.60 a \$1.65; red, \$1.50 a

\$1.58. Rye, 85 a 90 cts. Yellow corn, 67 cts. Oats, 47 a 50 cts. Smoked hams, 14 a 16 cts. Lard, 8½ a 9 cts. Clover-seed, 9½ a 10 cts. About 4000 beef calves arrived at the Avenue Drive-yard. Choice and extra sold at 6½ a 7 cts. per lb. gross; fair to good, 5½ a 6 cts., and common, 4 a 5 cts. Sales of 14,000 sheep at a 5½ cts. per lb. gross, and 7,000 hogs at \$7.25 per 1 lb. net for corn fed. *Chicago.*—No. 1 spring wheat, \$ No. 3, 83 cts. No. 2 mixed corn, 37 cts. Rye, 61 a cts. Barley, \$1.26. Lard, 7½ a 7¾ cts. *Cincinnati.* Family flour, \$6.90 a \$7.10. No. 2 winter red wheat, \$1.30. Corn, 55 cts. Rye, 79 a 80 cts. Oats, 36 a cts. Barley, \$1.35 a \$1.50. *St. Louis.*—No. 2 spring wheat, \$1.02; No. 2 winter red, \$1.52. No. 2 mixed corn, 41 cts. Oats, 33 cts. *Baltimore.*—Choice amber wheat, \$1.65 a \$1.70; good to prime red, \$1.50 a \$1.60. Southern white corn, 70 cts.; yellow, 62 cts. Oats, a 49 cts.

## RECEIPTS.

Received from James Thorp, Pa., \$2, vol. 47; from Hannah J. Roberts, City, \$2.20, vol. 47 and Postage and for Samuel Woolman, Del., \$2, vol. 47; from Samuel Chaddonrne, N. Y., \$2, vol. 47; from Josi Stratton, Io., \$2, vol. 47; from Edward Boone, Cana., \$2, vol. 47; from Louisa Warner, Pa., \$2, vol. 47; from William C. Taber, Mass., \$2, vol. 47; from James Kite, Agent, O., for Robert Milhous, David Ball, a William Harmer, \$2 each, vol. 47; from Asa Garretts, Agent, O., for Sarah Bundy, John Thomason, Jesse Livezey, Joel Bailey, Elizabeth Bailey, Matilda Park, Elisha Doudna, and Chalkley Dawson, \$2 each, vol. 47; from James Harkness, In., \$2, vol. 47, and for Russ Taber and Nathaniel McDonald, \$2 each, vol. 47; from Evan Cooper, Io., per Nathan Warrington, Agent, \$2, vol. 47; from Hannah H. Dilks, Ind., \$2, vol. 47; from Moses Brown, City, \$2, vol. 47; from Charles Darn, N. J., \$2, vol. 47; from Sarah Allesen, O., per Micaiah M. Morlan, Agent, \$2, vol. 47; from Isaac Hico, Pa., \$2, vol. 47, and for Daniel Rote, \$2, vol. 47; from Richard M. Acton, N. J., \$2, vol. 47, and for William C. Reeve, \$2, vol. 47; from Charles Ellis, Muncy, I., \$2, vol. 47.

A Stated Annual Meeting of the Haverford School Association will be held at the Committee-room Arch St. Meeting-house, in Philadelphia, on Tuesday, 10th mo. 13th, 1873, at 3 o'clock, P. M.

PHILIP C. GARRETT, Secretary.

## WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to AARON SHARPLESS, SUP'T, Street Road P. O., Chester Co., Pa., or to CHARLES J. ALLEN, Treasur., 304 Arch St., Philadelphia.

## WANTED

A teacher in the classical department on the board at Westtown School.

Application may be made to  
Thomas Conard, West Grove, Chester Co.  
Joseph Walton, Philadelphia.  
William Evans, "  
Charles Evans, "

## FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Fall term.

Application may be made to  
Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philada.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philada.

## WANTED

A suitable woman Friend to act as Governess at Westtown Boarding School. Apply to

Rebecca S. Allen, Philadelphia.  
Sarah A. Richie, "  
Susan E. Comfort, Knox St., Germantown.  
Lydia L. Walton, Moorestown, N. J.

## FRIENDS' ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, TENTH MONTH 11, 1873.

NO. 8.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend,"

Collecting India-Rubber.

(Continued from page 54.)

"We should have lived well here, but that my ammunition was fast giving out, so that we were unable to kill much game. There were also plenty of the *mono-chocote* (a monkey with long red hair and a short tail) to be shot on the shores of the succession of lagoons, or lakes of black water, opening out from the creek above. This kind of monkey is particularly esteemed by the Indians. It may be said that of all generally known meats monkey most resembles hare, being dark and stringy."

"As the weather became drier, another plague increased upon us, *niguas* (jiggers). My neighbor, Merced Gil, told me that in his eight years' experience of the Upper Orinoco, he never knew the waters so high as they were this season. There had been a slight subsidence, but now the water rose again. Every day and night we had heavy rain and an overcast sky. Turtle was generally plentiful, except at this time: we only caught a few of the small species, 'terekya,' and fish became scarcer. The flies were most troublesome,—we could hardly preserve anything from their contamination. Even if the men got a few small fish in the *curiaras*, in a very short while they would be completely lifted up by such masses of eggs as to resemble honey-comb. It would have seemed incredible had we not seen them. I was obliged to cover the troughs in which I put the liquid rubber, to prevent its becoming embellished with self-molated blue-bottles. The bite of the scorpion of the Orinoco is not so painful as I had anticipated, nor does it occasion any after bad effects. When I was stung, the smarting and accompanying feeling of numbness was not so great as that caused by the sting of the forest asp. Cockroaches, the irrepressible pest of some parts of Tropical America, are not so numerous here. A kind of kite was a great nuisance: besides the disagreeable squall of these birds, they often swooped down and helped themselves to the salted fish, as it hung out to dry, and sometimes succeeded in bearing off large pieces in their claws, in spite of stouts and sticks. I have seen them rising from the ground with a long snake dangling

from their talons. One day I discovered a new depredator in the shape of a magnificent *Sarcoramphus papa*, the king of the vultures; but he rose majestically, and soared away before I could get out my rifle. He was very large, and in beautiful plumage, but I was getting too hard up in ammunition to use my shot-gun to secure him. I consoled myself, however, by thinking of the pangs of thirst he would suffer after such a gorge of salt fish.

"Having looked up all the *ciringa* trees within the triangle of my paths, I continued to tap them daily, as the weather permitted, though the result was not very satisfactory.

"31st.—During the last week we had a visit from a party of Marquiritare, on their passage home to the *Conuconumo*. I thought this was a good opportunity of sending Rogers to procure more manioc; he was of no use to me here.

"These Marquiritare are the most numerous and important tribe at present on the Upper Orinoco. They live chiefly on the banks of the *Conuconumo*, *Paramo*, and other tributaries on the right bank, and are much fairer in complexion than the Indians of *Atabapo*, or the Lower Orinoco: their plantations of the *zaca* shrub are very extensive, and the women make large quantities of manioc from the root. Indians of this tribe frequently visit the British settlements on the *Demerara*, taking advantage of the proximity of the head streams of the *Venture*, *Caura*, and *Caroni*. Many of the Marquiritare, who stopped to see me as they passed, pronounced a few English words very distinctly. They bring English trade-guns with them from *Demerara*, for the Spanish creoles, who purchase them in preference to the trumpery *cocopetas* sold at the German stores at *Ciudad Bolivar*. The Marquiritare are also one of the famous tribes for the manufacture of the *urari* poison, and the beauty and quality of their blow-tubes. They preserve the plumage of beautiful birds for their feather-work, and hammock fringes.

"A young Spanish creole named *Roja*, with his two women, worked for me during February. I calculated a hundred trees for one man's tapping as the amount of his daily labor. A large herd of *barquiro* (wild hog) wandered about my water-enclosed piece of land. Sometimes they mischievously broke up the palm-leaf cups in which I caught the *ciringa* milk, and we occasionally secured a dinner from their ranks. With the addition of *Roja* and his women to my company, the roof of my rancho afforded scanty accommodation, although they always slept outside except the nights were rainy. Lately I had had the first touch of fever since leaving *San Fernando*; and about the 8th of February I began to suffer much from extreme nausea and vomiting, which preliminary attack came on in the forest, whilst going my round of tapping the *ciringa*. I was a long way from the *puerto* of the path where the canoe was

secured, and had great difficulty in getting there, as each time the fit of nausea returned, I became quite powerless, and had to drop down on the damp earth, and wait until the paroxysm was over. When I staggered to my feet, my machete would get betwixt my legs, and nearly capsize me again. Having at length reached the *curiara*, I endeavored to paddle up the little branch creek to my lodge; but the sun was too powerful for me, and I had to scramble on shore again before I could make the attempt to reach it. Fortunately, I was now not far from it, as I was reduced to crawling on my hands and knees, and the remainder of my strength fast failing. However, eventually, I did reach the bench made of split stems of the *manac* palm I used for a bed. I remember little of what passed during the four days that the constant nausea and vomiting lasted. It is singular what an impression the slightest mark of kindness and human sympathy makes on one in such an extremity. I recollect one afternoon, as I lay prostrate and incapable of moving, and part of my back bared to the swarms of sandflies which filled the air; at that time a woman of *Roja's* entered, and seeing my condition, she passed her cool soft hands gently over my burning brow and back, brushing away the plagues. Although unable to thank her, I think I never felt so grateful for anything. The Indians firmly believed my sudden seizure to have been caused by a sight of 'the little pale man of the forest,' whom they say is a little elfin sprite, appearing occasionally to people alone in the forest, rising from its abode among the roots of certain trees which it particularly affects. When visible, it is supposed to be the sure precursor of evil to the unlucky beholder, if not of his death. They all considered me at that time to be a doomed man. As I was unable to eat anything procurable here, my weakness increased. The want of breeze was also another drawback, for the currents of air that, from time to time, sweep down the broad Orinoco, do not reach the transverse bed of the tributary streams. *Roja* and the two women continued to tap the trees, bringing in a little rubber daily. As I became weaker, I felt that the only chance for me, and even that a small one, was to go and spend a few days up the river, on the more breezy shore of the main Orinoco, at the rancho of my neighbor, *Merced Gil*. He and his family were most kindly attentive, and I did get better. Strangely enough, the first thing that stopped the continuous sickness was a draught of *gaurapo*, made with the heated juice of sugar-cane. My host attributed my illness to my having drunk two kinds of water in the creek, *Agua Negra* and *Agua Blanca*. At parting he gave me some of his small store of the fine tobacco of the *Cassiquiare*.

"Rogers returned from *Conuconumo* in, apparently, a very weak state, and said he had been sick all the time he was away. He

brought with him a little manioc and tobacco, and more was to follow. It is when recovering from illness here that one regrets the absence of any beverage but water, and the accompaniment of unpalatable solids in the shape of crude flesh or fish, to be eaten with the coarsest description of breadstuff. I was compelled to abandon my rancho up the creek, it became so infested with niguas; and had another put up at the mouth, where a slab of rock slopes down into the water. In order to escape, in a measure, from the torment of mosquitos, I had this one constructed with the palm-thatch down to the ground all round, leaving only a small hole (over which I hung a blanket) for entrance. Here, in the dark, I could enjoy a little rest in my chinchora, when I came in tired from the forest.

"Roja caught a sloth one morning in the act of swimming across the creek. This was the first time I ever tasted the flesh of this curious animal, and although it was badly cooked, it was really good eating. Next day several fine wild hogs were shot, but we had great difficulty in jerking the meat during the rainy weather, for want of sun."

(To be concluded.)

For "The Friend."

#### Wanted—More Calebs.

The following is a selection from one of the chapters under the above caption, of a recent work entitled, "Heart Life: by T. L. Cuyler." It thus portrays in lively, forcible example the character of Caleb, that modest, meek, undaunted, and faithful man.

"Who is Caleb? I never heard of him. That is quite possible; for in the Bible gallery of characters, there are some modest people whose presence we only discover as blind men find out rose-bushes—by their fragrance. Dorcas probably made no sensation in Joppa; but when Dorcas' fingers grew quiet under the grave-clothes, Joppa found out what they had lost, and the poor women came in and preached her funeral sermon in warm tear-drops on her silent face. To this same class belong Ezra, the scribe; and Hannah, the praying mother; and Andrew, who believed in personal effort; and Onesiphorus, who was not ashamed of Paul's chain. Caleb stands in this catalogue—a type of thorough-going servants of God, who do a great deal with but little noise, who stand meekly and steadily at their posts of duty, who never shirk their share of toil and danger, who do not attract much attention until they are gone! Then how we miss them! How the families in the neighborhood suffer for the want of them! How hard it is to get along without them!

Caleb's whole biography is condensed into a few bright sentences. He was the chieftain of a clan in Israel, was selected as one of the deputation to go down and spy out the land of Canaan; he came back helping to carry the luscious load of Eshcol grapes, and made a strong report in favor of the immediate occupation of the land; and when the panic-stricken people clamored for retreat on account of 'the giants there,' Caleb came to the front and made a ringing speech, in the face of poltroons who stood with stones in their hands to batter him to the ground. God's verdict on the man's steadfastness was in these brief words: 'My servant Caleb will I bring into the land, who hath followed me faithfully.' In another passage it reads, 'He hath followed me wholly.' In still another it

is written, 'He hath followed me fully.' God was as good as his word. While the cowards and the rebels all perished in the wilderness, stout, steady old Caleb lived to own the beautiful acres on the hills of Hebron, and in full view of the verdant vale of Eshcol. When the long march and the bloody war was over, he tasted of the grapes of victory.

Caleb is the man most needed in our churches in these latter days. He is the type-man for thorough-going fidelity. He followed the Lord fully. What we want to make churches vigorous and successful is, not bustle, but business; not parade and puffery, but patience, prayer and persevering work. We want the full following of Christ with the whole heart, for the whole time, and for the whole life campaign. Christ started his church on the principle of entire consecration. On the doorway he wrote, 'Whosoever would follow me, let him leave all!' Again he said, 'Ye cannot serve God and mammon.' And again he said, 'He that is not for me is against me.' It was thorough-going discipleship or nothing. 'Sell all that thou hast and follow me,' frightened the poor selfish young ruler back to his farm and his fate. Christ would have no half-hearted disciples. He sifted his followers, and out of the whole number there remained eleven men and a few faithful women to lay the foundation of his church on the eve of Pentecost.

To follow Jesus requires a whole-hearted conversion at the start. Half-way converts make half-way Christians. Some men's boughs hang over the church side of the wall, but their roots are on the world's side. Such bear nothing but leaves. 'Many lay false and bastard foundations,' said quaint old Rutherford; 'and they get Christ for as good as half nothing, and never had a sick night of sorrow for sin. This maketh loose work.' True enough; and, unless the conversion is radical and thorough, unless the submission of the soul to Christ is without compromise and conditions, there will be half-heartedness and halting to the last. Caleb, we are told, 'had another spirit within him.'

Thorough going piety is the first requisite for the church officer. Thorough-going piety never commutes with the Master for half-fare, never whimpers, 'I pray thee, have me excused;' never interprets the Bible in the lax and latitudinarian sense; and when there is a doubt in any point, gives God and not himself the benefit of it. Such a Christian 'loves duty, even in all the wholesome severities of it.' If his religion has ever a necessary pain or a pinch in it, he bears it without flinching. He never imitates Peter Pindar's pilgrim, who, having been commanded to make a long journey with peas in his shoes, took the sly precaution to boil his peas before he started. Thousands are quite willing to go heavenward with us provided they have a choice seat in the cushioned car; but commend me to the Calebs who, discerning the land afar off by faith, are ready for a lifetime march to reach it, over rough roads and with stony pillows for a bivouac.

We have said enough to indicate who the Calebs are. They are the sinew of the church. Blessed is the pastor 'who hath his quiver full of them!' To those who inquire, 'How shall my church be developed?' we answer: Ask God for more Calebs, and use such Calebs as you have. Remember, too, that a hundred half-Christians do not make a single whole one. Every

addition made to the weight of our own personal Christianity adds to the weight and momentum of the church of Christ."

*Depth of the Atlantic Ocean.*—The main theatre of sounding operations has been the Atlantic Ocean, which, from its relation to the leading commercial nations, and for inter-continental telegraphic purposes, has been more carefully surveyed than any other great body of water. Open from pole to pole, participating in all conditions of climate, communicating freely with other seas, and covering 30,000,000 square miles, it is believed to represent general oceanic conditions, and to contain depths nearly, if not quite, as great as the other ocean basins of the world, although but little is known, it is true, in this respect of the Indian, Antarctic and Pacific seas. The general result of its soundings would indicate that the average depth of the Atlantic bed is not much more than 12,000 feet, and there seems to be few depressions deeper than 15,000 or 20,000 feet, a little more than the height of Mont Blanc. Dr. Thomson sums up the general results of the Atlantic soundings as follows: "In the Arctic Sea there is deep water reaching to 9000 feet to the west and southwest of Spitzbergen. Extending from the coast of Norway, and including Iceland the Faroe Islands, Shetland and Orkney Great Britain and Ireland, and the bed of the North Sea to the coast of France, there is a wide plateau, on which the depth rarely reaches 3000 feet; but to the west of Iceland and communicating doubtless with the deep water in the Spitzbergen Sea, a trough 500 miles wide, and, in some places, nearly 12,000 feet deep, curves along the east coast of Greenland. This is the path of one of the great Arctic currents. After sloping gradually to a depth of 3000 feet to the westward of the coast of Ireland, in latitude 52 degrees, the bottom suddenly dips 10,000 feet at the rate of 15 to 19 feet in the 100, and from this point to within about 200 miles of the coast of Newfoundland, when it begins to shoal again, there is a vast undulating submarine plain, averaging about 12,000 feet in depth below the surface—the "telegraphic plateau." A valley, about five hundred miles wide, and with mean depth of fifteen thousand feet, stretches from off the southwest coast of Ireland, along the coast of Europe, dipping into the Bay of Biscay, past the Strait of Gibraltar, and along the west coast of Africa. Opposite the Cape Verde Islands it seems to emerge into a slightly deeper trough, which occupies the axis of the south Atlantic, and passes into the Antarctic Sea. A nearly similar valley curves around the coast of North America, about 12,000 feet in depth, off Newfoundland and Labrador, and becoming considerably deeper to the southward, where it follows the outline of the coast of the States and the Bahama and Windward Islands, and finally joins the central trough of the South Atlantic off the coast of Brazil, with a depth of 15,000 feet.—*Popular Science Monthly.*

Shun delays, they breed remorse;  
Take thy time while time is lent thee;  
Creeping snails have weakest force;  
Fly their fault, lest thou repent thee.  
Good is best when soonest wrought,  
Lingering labors come to naught.

The Lord useth his flail of affliction  
to separate the chaff from the wheat.

For "The Friend"

## John Heald.

(Continued from page 51.)

1st mo. 8th, 1817. "We had a meeting to-day at Turner's Swamp, and more people than a small meeting-house would hold. My mind was under a weight of exercise, and in a while stood up and said a gracious invitation of our Lord had engaged my attention, where he said: 'Come unto me all ye that labor and are heavy laden and I will give you rest,' or ye shall find rest for your souls. A householder went out early in the morning to hire laborers into his vineyard. This may represent the time of youth. They are invited in love and tenderness to enter into the labor, but there is much excusing and putting off. This we may see to be dangerous, if we consider, that He who knows all things, has numbered the days of these, and that perhaps they are but few; and in mercy He has offered for their acceptance the gracious visitation, in order, that if they close in therewith they might be prepared to be everlastingly happy in mansions of bliss. Much pressing invitation was held out to the people, and I believe many were deeply impressed.

In the afternoon we travelled to Holly Spring, at the widow Pharaba Horn's. Widows and orphans are very numerous in the parts we have been in since we left Richmond, in Virginia, and continue so yet. We were told in one place that a dozen widows in a country place could be found within two miles.

9th. Were at the meeting. It was thin and in a small house, and all seemed to be closed up. Silence continued, and I thought was to be so to the end. At length it presented to my mind to say: if this meeting had ended in silence, it would not have been the first, by many, where notice had been given that I wanted to see the people in a certain neighborhood. I had no doubt but that if, in that situation, I were to go into activity, I should bring condemnation on myself, and not profit others. Going on from this subject to something else, I continued (though I thought in much weakness) endeavoring to attend to what opened. At length the power of Truth rose high into dominion, and the minds of the people as well as my own, I believe were humbled, and my soul thankfully blessed the Lord. The sincere were encouraged to faithfulness, and the negligent were stirred up, under a sense of the danger they were in, in continuing negligent. This meeting with its attending change of exercise, and the help experienced in time of need, is worthy to be commemorated.

11th. Attended the Monthly Meeting. In the silent part I rejoiced in secret that I was allowed to enjoy the common lot of all, the opportunity of improving in silence, and enjoying a comfortable, peaceful solemnity.

12th, being First-day, many others came and the meeting was large and crowded. I found it necessary to labor to a large extent in many words to stir up the careless who are satisfying or endeavoring to satisfy themselves with thinking they believe what good people believe in, and practise what they approve as to the outward, and are not engaged to live near to the fountain so as to partake of it; but live on the surface, and indulge in ease, and are not qualified to bear their share of the burthen of the day, and instead of helping to bear up the weight, they are adding to the burthen the travelling ones have to bear,

who are mourning in secret. I concluded with encouraging the true travelling seed to labor on to attain that situation wherein their souls could feelingly say: 'Thy will be done, O Father!' Then they would be in the act of acceptable worship.

Here the marriage of Aaron Overman and Mary Woodward was accomplished, the first I ever saw on First-day.

We went home with Thomas Edgerton who lived in the neighborhood of Naughbunty, where we had a meeting next day. In it I was deeply exercised in setting forth the manner, working and operation of the ministry, and the workings of the dark powers to induce people into an activity that arises from impressions on the imagination, and from the transformation of our common adversary into an angel of light. It is not so easy a way as some may have imagined to go in, but requires great attention lest we be deceived. In the conclusion I invited the dear youth to close in with offered mercy, as being the most likely way to escape danger, and many snares, temptations and delusions. We parted with love and good will one for another. This afternoon we crossed over Neuse river to Thomas Cox's.

14th. Attended Neuse Meeting. It was thronged. At the first I seemed to myself to be a blank, and without anything to do more than to wait patiently and to hope for what might be best. After some time I was introduced to much close labor, and when way opened, I began with saying, I desire to be of the number who quietly wait and patiently hope for the salvation of God, and who have no confidence in the flesh, but who walk in the spirit, and pray with the Spirit, for we know not what to pray for as we ought, but the spirit itself helpeth our infirmities. We have need to attend carefully thereto, and with all diligence to make our calling and election sure. God, who at sundry times and divers manners, spoke to the fathers by the prophets, hath in these last days spoken to us by His Son, whom He hath appointed heir of all things. We ought to attend to His instruction, for Moses said unto the fathers, a prophet shall the Lord, your God, raise up unto you of your brethren, like unto me. Him shall ye hear in all things, whatsoever He shall say unto you; and whosoever will not hear that prophet shall be cut off from among the people; and that prophet, which is Christ the Lord, declared, the hour cometh and now is when they who worship the Father must worship Him in spirit and in truth, for such the Father seeketh to worship Him. But we must serve Him faithfully, we must believe that He is, and that He is a rewarder of all them that diligently seek Him; we must have faith, for the apostle expressly saith, that without faith it is impossible to please God; but faith without works is dead, and works without faith are dead also. After much had been said, and the minds of the people were weightily impressed, they were referred to their own situation at that time; too negligent, too forgetful and inattentive. The meeting concluded solemnly, with an appeal to all to be faithful, both the professors of religion, and those who made no profession. For when these are called to an account, will they then say, 'Lord I did not pretend nor profess to serve thee; I intended to gratify myself and to indulge in those things which I thought would delight my inclination. I have made

no pretensions to religion?' What will these excuses do, when these know that they have felt remorse and condemnation in themselves for doing wrong, have felt the reproofs of instruction therefor? Can these believe that they will be acquitted? After recommending them to God, and the word of His grace, which is able to build them up, and to give them an inheritance among the sanctified, I bid them farewell."

Under date of the 19th, John Heald makes the following entry in his journal. "I think I shall feel best satisfied to observe respecting a custom I have met with a few times at meals, to sit silent from 15 minutes to an hour. Wherever I have met with this, it has uniformly appeared to me to be performed under the appearance of a sanctified show, and without any real religion in it—a mere pretension. I have seen no manner of use in these long silent opportunities at meals; but a pause, wherein we may feel thankful, grateful sensations to arise in our minds, is I think commendable and right; but to continue it to such a length is an excess which I wish to be done away. On sitting down to meals, an individual may feel a necessity to speak to encourage to faithfulness, or to supplicate for favor, or to praise the Giver of all good; but the practice before alluded to appears to me to be an empty, dry, formal performance without life."

Some weeks after this, John Heald describes a particular instance of the practice he reproaches, which may properly be inserted here, though out of the order of the time. He says: "In the course of the evening, a little past 7 o'clock, we were asked to supper. We went and sat down; and though after sitting awhile still and silent, I and my companion moved to show that we were ready and willing to go to eating, yet the man sat still. After sometime my companion signified that if any one had anything to say, it would be well to say it, and let the silence be discontinued; but still the sitting continued, until, about 20 minutes past 9, the clock standing in the room, my companion spoke again saying he wished to be excused from sitting any longer in that trying situation, and he thought it was so with some of the rest. I thereupon arose and said, I hoped I should be excused, and walked out of doors. I was by this time very cold, so I walked to the fire, and stood some time and warmed, and then sat down, and at length they, without one sentence of religious communication, prepared to eat. I was asked to go to the table, but I told them I wished to be excused. My companion went, and when they were done, I soon after asked to go to bed, and being not so well as common, and withal tired, I soon went to sleep."

(To be continued.)

*London Milk.*—Sixty-two samples of this article, which were obtained from as many dairies and milkshops in Marylebone district, had been carefully analyzed; and of these Dr. Whitmore found twenty-two to be genuine, fifteen deteriorated, and twenty-five adulterated. Of the genuine samples some were exceedingly rich in all nutritive constituents; others were not so, and these he termed "poor milk." Deteriorated milk was of that quality which had been deprived of its nutritive properties to some extent in one or two ways—either by allowing it to remain for some time in shallow vessels and then skimming off a

portion of its cream, or by drawing off what in the trade is called "toppings"—a process which is effected in the following manner:—Tall cans, holding from eight to ten gallons, are filled with milk as it comes from the cow, and these are allowed to remain undisturbed from two to three hours, or probably longer, during which time the cream and a portion of the curd are gradually rising to the surface, thus rendering the upper half much richer than the lower. This upper half is then drawn off by means of a tap fixed in the middle of the can, and sold to the public as "nursery milk" at an increased price, while the milk left in the can is vended as ordinary new milk, free from adulteration, no doubt, but fraudulently and most dishonestly deteriorated in quality. Of the adulterated samples examined by Dr. Whitmore, none contained such matter as chalk, anatto, tragacanth, or starch; the only thing employed was water, and this had been added in various quantities. In one or two of the worst cases, however, it was found that the water amounted to 75 per cent.—that is to every quart of milk, at least a pint and a half of water had been added.—*Leisure Hour.*

*Preferring Christ to Ornaments.*—In a letter from A. Judson, a christian missionary in Burmah, addressed to American females, is the following anecdote:

A Karen woman offered herself for baptism. After the usual examination, I inquired whether she could give up her ornaments for Christ. It was an unexpected blow. I explained the spirit of the gospel, and appealed to her own consciousness of vanity. I then read to her the apostle's prohibition. (1 Tim. ii. 9.) She looked again and again at her handsome necklace, and then, with an air of modest decision that would adorn beyond all ornaments any of my sisters whom I have the honor of addressing, she took it off, saying, "I love Christ more than this."

*Impurity of Drinking-Water.*—Set a pitcher of iced water in a room inhabited, says a writer in *To-day*, and in a few hours it will have absorbed nearly all the perspired gases of the room, the air of which will have become purer, but the water utterly filthy. This depends on the fact that water has the faculty of condensing and thereby absorbing nearly all the gases, which it does without increasing its own bulk. The colder the water is, the greater its capacity to contain these gases. At ordinary temperature, a pint of water will contain a pint of carbonic acid gas, and several pints of ammonia. The capacity is nearly doubled by reducing the temperature to that of ice. Hence water kept in the room awhile is always unfit for use, and should be often removed, whether it has become warm or not. And for the same reason water in a pump should all be pumped out in the morning before any is used. That which has stood in a pitcher over night is not fit for coffee water in the morning. Impure water is more injurious to health than impure air, and every person should provide the means of obtaining fresh and pure water for all domestic use.

Truth is truth though all men forsake it— it still remains unchanged the same, and its own excellence will recommend it, even though the conduct of its professors does not.

#### BE STILL IN GOD.

Be still in God! Who rests on Him  
Enduring peace shall know,  
And with a spirit fresh and free  
Through life shall cheerily go.

Be still in faith! Forbear to seek  
Where seeking naught avails,  
Unfold thy soul to that pure light  
From heaven, which never fails.

Be still in love! Be like the dew  
That, falling from the skies,  
On meadows green, in thousand cups,  
At morning twinkling lies!

Be still in conduct, striving not  
For honor, wealth, or might!  
Who in contentment breaks his bread  
Finds favor in God's sight.

Be still in sorrow! "As God wills!"  
Let that thy motto be.  
Submissive 'neath His strokes receive  
His image stamped on thee.

Be still in God! Who rests on Him  
Enduring peace shall know,  
And with a spirit glad and free  
Through night and grief shall go.

#### WASTED FOUNTAINS.

Though the transient springs have fail'd thee,  
Though the founts of youth are dried,  
Wilt thou among the mouldering stones  
In weariness abide?

Wilt thou sit among the ruins,  
With all words of cheer unspoken,  
Till the silver cord is loosen'd,  
And the golden bowl is broken?

Up and onward! Toward the east,  
Green oases thou shalt find,—  
Streams that rise from higher sources  
Than the pools thou leavest behind.

Life has import more inspiring  
Than the fancies of thy youth:  
It has hopes as high as heaven;  
It has labor, it has truth;

It has wrongs that may be righted,  
Noble deeds that may be done,  
Its great battles are unfought,  
Its great triumphs are unwon.

Anne C. Lynch.

For "The Friend."

#### Did They Enter the Promised Land?

The children of Israel were brought out of Egypt and from the dominion of Pharaoh and his cruel task-masters with a high hand and an stretched-out arm, and with great judgments—with many miracles and evidences of Omnipotent Power; but did they enter the promised land?

It is written for our instruction, that "God led the people about through the way of the wilderness of the Red Sea;" going "before them by day in a pillar of cloud," "and by night in a pillar of fire;" "he took not away the pillar of cloud by day, nor the pillar of fire by night from before the people:" But did they enter the promised land?

By commandment—perhaps to make His marvellous mercy more manifest—they encamped between Migdol and the sea, over against Baal Zephon. And when Pharaoh, whose hardened heart led him, with his host, to pursue after them, drew nigh, the children of Israel, being sore afraid, cried unto the Lord; who said unto them, "Fear ye not, stand still, and see the salvation of the Lord, which he will show you to-day: for the Egyptians whom ye have seen to-day, ye shall see them again no more forever. The Lord shall fight for

Selected.

you and ye shall hold your peace." But notwithstanding all this; did they get to the promised land?

"And the Lord said unto Moses," "speak unto the children of Israel, that they go forward: but lift thou up thy rod, and stretch out thy hand over the sea, and divide it," &c. And so it was that the children of Israel walked upon dry land in "the midst of the sea; and the waters were a wall unto them on their right hand and on their left:" but "the waters returned and covered the chariots, and the horsemen, and all the host of Pharaoh (for they pursued after them into the depths of the sea): there remained not so much as one of them." Thus the Lord in miraculous providence and with almighty power again rescued Israel! Who "saw that great work which the Lord did upon the Egyptians; and it is added, the people feared the Lord, and believed the Lord, and his servant Moses. Yet for all this they did not inherit the inheritance promised them if faithful.

After this is the record, "Then sang Moses and the children of Israel this song—not all given here—unto the Lord:" "I will sing unto the Lord, for he hath triumphed gloriously: the horse and his rider hath he thrown into the sea. The Lord is my strength and song, and he is become my salvation: he is my God, and I will prepare him an habitation; my father's God, and I will exalt him." "Thy right hand, O Lord, is become glorious in power." "Thou in thy mercy hast led forth the people which thou hast redeemed." "Thou shalt bring them in, and plant them in the mountain of thy inheritance, in the place, O Lord, which thou hast made for thee to dwell in; in the sanctuary, O Lord, which thy hands have established. The Lord shall reign forever and ever."

Surely after such marvellous displays of Heavenly condescension and mercy; after having been delivered from their cruel enemies, been brought up from the depths of the sea, and a new song put into their mouths this people might have some ground to hope and believe that their Lord's grace and help would not fail, but be continued to them unchanged to the end of the race! That

"He who had kept them hitherto,  
Would keep them all their journey through."

But the Lord's ways are not as our ways. Though merciful and gracious, long-suffering and abundant in goodness and truth; forgiving iniquity and transgression and sin, He will by no means clear the guilty; but demonstrating, in the case of this people, the apostolic scripture: "Whosoever shall keep the whole law, and yet offend in one point, he is guilty of all." May it never be forgotten that, now as then, it is "the willing and obedient" who shall eat of the good of the land; that it is those who take the Saviour's yoke upon them, and *learn of Him* meekness and lowliness of heart, that He will make His yoke easy to and His burden light; that it is not those who cry "Lord, Lord," but such as *do the will of His Father* who is in heaven, that shall enter and dwell there. "The carnal mind is *enmity* against God;" and such were those Israelites. The Psalmist thus describes them: "They lusted exceedingly in the wilderness, and tempted God in the desert." "They forgot God their Saviour, which had done great things in Egypt." "Wherefore," says He in the words of the apostle, "I was grieved with that generation, and said, They do always err in their

heart; and they have not known my ways. So I swear in my wrath, They shall not enter my rest."

After this the children of Israel cried unto the Lord, because they could not drink of the waters of Mara, for they were bitter. And the Lord showed Moses a tree, which when he had cast into the waters, they were made sweet. At which time their Heavenly Father proved them," and said, "If thou wilt diligently hearken to the voice of the Lord thy God, and wilt do that which is right in his sight, and wilt give ear to his commandments, and keep all his statutes, I will put none of those diseases upon thee, which I have brought upon the Egyptians: for I am the Lord that healeth thee." The next murmuring of this people was for want of bread; which was supplied by "the quails," and by "the dew." The Lord spake unto Moses, saying, I have heard the murmurings of the children of Israel: speak unto them, saying, At even ye shall eat flesh, and in the morning ye shall be filled with bread; and ye shall know that I am the Lord your God." This bread was the manna, which would not keep, but had to be daily gathered, which the children of Israel did eat forty years; and of which the Lord commanded a portion to be kept for succeeding generations; "that they may see the bread wherewith I have fed you in the wilderness, when I brought you forth from the land of Egypt." After this, at Rephidim, water was brought out of the rock, at the command of the Lord, for the people to drink. Here it was that Moses, the chosen leader of His people, did not duly magnify the Lord God of Israel; for which offence he was forbidden to enter Canaan, though in condescension, he had Pisgah view of that blessed temporal inheritance granted him. Next Amalek was overcome by Joshua, through the holding up of Moses' hands. But notwithstanding all these deliverances, miracles and mercies, which had never before been done to any people, Israel was not permitted to enter the rich land of promise.

Upon leaving Rephidim, the children of Israel next came into the desert of Sinai, and here camped before the mount. Here Moses was commanded of the Lord to speak thus unto them: "Ye have seen what I did unto the Egyptians, and how I bare you on eagles' wings, and brought you unto myself. Now, therefore, if ye will obey my voice indeed, and keep my covenant, then ye shall be a peculiar treasure unto me above all people: for all the earth is mine: and ye shall be unto me a kingdom of priests, and a holy nation." Here also the Lord God descended upon the mountain in fire, in the sight of all the people; and the whole mount quaked greatly. Here too, the ten commandments were given; and here was proclaimed, "In all places where I record my name, I will come unto thee, and I will bless thee. And if thou wilt make me an altar of stone, thou shalt not build it of hewn stone: for if thou lift up thy tool upon it, thou hast polluted it. Neither shalt thou go up by steps unto mine altar," &c. It was in Sinai likewise that these requisitions, promises and blessings were made: "The first of the first fruits of thy land thou shalt bring into the house of the Lord thy God." "Behold, I send an Angel before thee, to keep thee in the way, and to bring thee into the place which I have prepared. Beware of him, and obey his voice, provoke him not; for he will not pardon your

transgressions: for my name is in him. But if thou shalt indeed obey his voice, and do all that I speak; then will I be an enemy unto thy enemies, and an adversary unto thine adversaries." But despite Sinai's thunder and Sinai's proffered mercies, with the promise especially of the Angel of the Lord's presence to go before them, the children of Israel would not obey His voice, but made a golden calf and said, "These be thy gods, O Israel, which brought thee up out of the land of Egypt." They corrupted themselves, and were rebellious and stiff-necked, and made covenants with the original possessors of the land; and suffered the salt of the covenant of their God to be lacking in their offerings; so that the anger of the Lord was kindled against them. Hence, notwithstanding they were urged by the two faithful spies, Joshua and Caleb, to go up and possess the "exceeding good land," "a land which floweth with milk and honey," they were too obstinate and contumacious, and thence never entered therein.

After this Nadab and Abihu, the sons of Aaron, offered strange fire before the Lord, or which he commanded them not: and they for this died before the Lord. Which gave rise to the saying from Moses to Aaron, "This is that the Lord spake, saying, I will be sanctified in them that come nigh me, and before all the people I will be glorified." The command also followed from the Lord unto Moses, "Speak unto Aaron thy brother, that he come not at all times into the holy place within the veil, before the mercy-seat which is upon the ark, that he die not." And in offering his bullock of the sin-offering, Aaron was first to make an atonement for himself, and for his household, and then for all the congregation of Israel. Lastly, for time would fail to sum up all the striking points in the history of this interesting yet backsliding people, they were thus solemnly charged by Moses from the mouth of the Lord, suggestive as having application for all time:—"I am the Lord your God. After the doings of the land of Egypt, wherein ye dwelt, shall ye not do: and after the doings of the land of Canaan, whither I bring you, shall ye not do; neither shall ye walk in their ordinances. Ye shall do my judgments, and keep mine ordinances, to walk therein: I am the Lord your God. Ye shall therefore keep my statutes and my judgments; which, if a man do, he shall live in them: I am the Lord."

After all the warnings, the judgments, the promises, the deliverances, the loving-kindnesses of the I Am of this people to them, how sorrowful and solemn is the reflection that, save two, none of all those who came out of Egypt were permitted to enter the promised land. These were Joshua, the son of Nun, a young man, who departed not out of the tabernacle; and Caleb, the son of Jephunneh, of whom his Lord said, "My servant Caleb will I bring into the land, who hath followed me faithfully."

Well, does not this painful reminiscence contain a grave admonition to us and to our children to flee from the wrath to come; and to not be satisfied with saying with some formerly, "We have eaten and drunk in thy presence, and thou hast taught in our streets;" or presumptuously, "When saw we Thee an hungered, or athirst, or a stranger, &c., and did not minister unto Thee." Deep and earnest is the call to "Watch unto prayer with all perseverance;" to fear, lest by any means as

the serpent beguiled Eve through his subtlety, so our minds should be corrupted from the simplicity that is in Christ. He who has manifested himself to us by His light, called us by His grace, pleaded with us by His Spirit, is a God of justice as well as of mercy, and will by no means spare the guilty. After all that has been done for us—for whom the Saviour suffered and bled—let us take heed to have the lamps trimmed and the loins girded, lest through tardiness, unwatchfulness, or the want of whole-heartedness, we enter not the prepared and holy rest. "I verily believe," says one who joined this Society by conviction, "that if we attain true christianity, we must not relax from earnestly aspiring and striving after a far more holy state, than what is commonly accounted (even by high professors) a safe one." Israel had her time, her calls, her covenants, her privileges, her opportunities! So hast thou,—more and greater,—even line upon line and precept upon precept—instrumentally from those anointed and qualified, and immediately from the Living Fountain of exhaustless grace. Most of them fell short of the promised inheritance: see to it that thou miss not the prize of salvation. It is no light thing to perish. "I am the Lord that healeth thee."

#### Curiosities of Tree Planting.

A proverb of northwest India declares that three things make a man to be truly a man—to have a son born to him, to dig a well and to plant a tree. It is impossible for the untravelled Englishman to realize the misery of a treeless country. Europe has no natural deficiency of trees; hence bridge-building took the place of the old Aryan tree-planting as an act of piety to God and of duty to the future in the counsels of the early Christian teachers of the European nations. Both in the east and west trees were no doubt the first temples, and the planting of groves was the primitive form of church building. Abraham, we are told, planted a grove in Beersheba to commemorate his solemn covenant; but amongst his descendants it became in time the mark of a pious ruler to "cut down the groves," as the seats of pagan worship, the mark of a careless ruler to leave them untouched, and the mark of an impious ruler to plant and dedicate new groves. It is not hard to find reasons why the grove naturally became the first temple. Men were no doubt impressed with the hoary age of trees compared with the short life of man. A tree was often the centre around which each succeeding generation deposited its traditions—a visible bond uniting the departed with the living, and the living with the unborn. The cool, grateful shade of trees was a natural type of the graciousness the worshippers sought for from the power they worshipped, especially in Eastern lands, where shadow is so precious and so exceptional. The yearly new birth and death of their foliage was a national symbol of human life. The darkness and density of the grove we must add, hid the obscenities and cruelties which belonged to the darker developments of heathen worship.

When an Englishman who has been long absent from his fatherland again catches his first glimpse of its roadsides and fields through the windows of a railway carriage, perhaps nothing strikes him so forcibly as the picturesqueness and the sparseness of the trees. He has seen trees in level lands stretching for

miles like a thin diaphanous wall in dull uniformity; now he sees them merely dotted here and there upon the landscape, but each tree is more or less of a picture in itself. Or he has seen in mountain lands every spot of available earth seized upon to supply life to a cherry tree, a walnut tree, a pear tree; he has seen fruit trees everywhere lining the roads and fields, instead of hedges, and probably wondered if English lads could pass to and fro every day under luscious cherries or pears and leave them untasted; now he sees nothing but solitary trees or scattered groups, which look as if they had planted themselves out of whim or playfulness just where they pleased, not one of which can bring any money to its proprietor except by its destruction. Give a German or Swiss Bauer the tenancy of an English farm, and he would at once begin to arrange himself an orchard out of the mere unused corners and slices of land he would almost certainly find in its fields and along its boundary lines. I must leave it to adepts to determine whether he would show himself a good or a bad agriculturist by his activity.

Tree-planting has, in fact, retained in Germany longer than elsewhere something of its occult character, binding together religion, nation and family. In the Vosgesen the old German farmers were not allowed to marry until they had done something for the future good of the tribe by planting a certain number of walnut-trees. When the amiable and liberal Oberlin was pastor of Waldbach, in the Steinthal, he set forward this old custom of tree-planting as a Christian duty.

Tree-planting is as necessary a part in many German rejoicings as it has been of French rejoicings during each revolution epoch. The Trees of Liberty, however, were often planted to die—actually as well as metaphorically. I have seen trees of this kind, stripped of all but a crown of leaves, planted in German Switzerland to mark a local festival. The poor people of the village of Cleversulzback gathered together on the 10th of November, 1859, round the grave of Schiller's mother, and marked the birthday of her son by planting a lime-tree "in the soil that covers the heart that loved him best."—*Chambers' Journal*.

For "The Friend."

The following letter written by John Newton in 1796, to a friend then on a visit to Rome, will probably interest, as well as be instructive to some of the readers of "The Friend."

"The true Christian, in strict propriety of speech, has no home here; he is, and must be, a stranger and pilgrim upon earth: his citizenship, treasure, and real home are in a better world; and every step he takes, whether to the east or to the west, is a step nearer to his Father's house. On the other hand, when in the path of duty, he is always at home; for the whole earth is the Lord's; and as we see the same sun in England or Italy, in Europe or Asia; so wherever he is, he equally sets the Lord always before him; and finds himself equally near the Throne of Grace, at all times and in all places. God is everywhere; and, by faith in the great Mediator, he dwells in God, and God in him. To him, that line of Horace may be applied in the best sense:

*'Cælum, non animam mutant, qui transmare current.'*

"I trust, that you will carry out, and bring home with you, a determination similar to

that of the patriarch Jacob, who vowed a vow, saying: 'If God will be with me, and will keep me in the way that I go, and will give me bread to eat and raiment to put on, so that I come again to my father's house in peace, then shall the Lord be my God!' May the Lord himself write it on your heart!

"You are now at Rome, the centre of the fine arts; a place abounding with every thing to gratify a person of your taste. Athens had the pre-eminence in the apostle Paul's time, and I think it highly probable, from many passages in his writings, that he likewise had a taste capable of admiring and relishing the beauties of painting, sculpture, and architecture, which he could not but observe during his abode in that city; but then he had a higher, a spiritual, a divine taste, which was greatly shocked and grieved by the ignorance, idolatry, and wickedness which surrounded him, insomuch that he could attend to nothing else. This state, which cannot be acquired by any effort or study of ours, but is freely bestowed on all who sincerely ask it of the Lord, divests the vanities which the world admires of their glare; and enables us to judge of the most splendid and specious works of man who knew not God, according to the declaration of the prophet: 'They hatch cockatrice's eggs, and weave the spider's web.' Much ingenuity is displayed in the weaving of a cobweb: but, when finished, it is worthless and useless. Incubation requires close diligence and attention; if the hen be too long from her nest, the egg is spoiled; but why should she sit at all upon the egg and watch it, and warm it night and day, if it only produces a cockatrice at last?

"Thus vanity or mischief are the chief rulers of unsanctified genius: the artists spin webs; and the philosophers, by their learned speculations, hatch cockatrices, to poison themselves and their fellow-creatures: few of either sort have one serious thought of that awful eternity, upon the brink of which they stand for a while, and into the depth of which they successively fall.

"A part of the sentence denounced against the city which once stood upon seven hills, is so pointed and graphical, that I must transcribe it; '*And the voice of harpers, and musicians, and pipers, and trumpeters, shall be heard no more at all in thee; and no craftsman, of whatsoever craft he be, shall be found any more in thee: and the light of a candle shall no more be seen in thee.*' Now, I am informed, that, upon certain occasions, the whole eupola of St. Peter's is covered with lamps, and affords a very magnificent spectacle: if I saw it, it would remind me of that time when there will not be the shining of a single candle in the city; for the sentence must be executed, and the hour may be approaching—

*'Sic transit gloria mundi.'*

"You kindly inquire after my health; myself and family are, through the divine favor, perfectly well; yet healthy as I am, I labor under a growing disorder, for which there is no cure; I mean old age. I am not sorry it is a mortal disease, from which no one recovers; for who would live always in such a world as this, who has a scriptural hope of an inheritance in the world of light? I am now in my seventy-second year, and seemed to have lived long enough for myself. I have known something of the evil of life, and have had a large share of the good. I know

what the world *can* do, and what it *cannot* do: it can neither give nor take away that *peace of God which passeth all understanding*; it cannot soothe a wounded conscience, nor enable us to meet death with comfort. *Tha* you, my dear sir, may have an abiding an abounding experience that the Gospel is catholic, adapted to all our wants and all our feelings, and a suitable help when ever other help fails, is the sincere and ardent prayer of your affectionate friend,

"JOHN NEWTON."

For "The Friend."

### Circular of the Bible Association of Friends in America.

In again calling the attention of Auxiliaries to the Annual Queries to be answered previous to the general meeting of the Association on the 5th of Eleventh month, the Corresponding Committee would press upon Friends, who have been engaged in the distribution of the Holy Scriptures, the importance of furnishing full and accurate answer to *all* the Queries, and of forwarding their report *seasonably* to the Depository.

It may be recollected, that in making donations to Auxiliaries, the Board are guided in deciding what number of Bibles and Testaments shall be sent to each, by the information given in its report. Hence those Auxiliaries that do not report in time, are liable to be left out in the distribution.

Specific directions should be given in every case, how boxes should be marked and forwarded; *and their receipt should always be promptly acknowledged.*

Address John S. Stokes, No. 116 N. Fourth Street, Philadelphia.

SAMUEL BETTLE,

CHARLES RHODES,

ANTHONY M. KIMBER,

Committee of Correspondence.

Philada., Tenth mo. 1873.

QUERIES.

1. What number of families or individuals have been gratuitously furnished with the Holy Scriptures by the Auxiliary during the past year?
2. What number of Bibles and Testaments have been sold by the Auxiliary within the past year?
3. How many members, male and female, are then belonging to the Auxiliary?
4. What number of families of Friends reside within its limits?
5. Are there any families of Friends within your limits not supplied with a copy of the Holy Scriptures in good clear type, and on fair paper; if so, how many?
6. How many members of our Society, capable of reading the Bible, do not own such a copy of the Holy Scriptures?
7. How many Bibles and Testaments may probably be disposed of by sale within your limits?
8. Is the income of the Auxiliary sufficient to supply those within its limits who are not duly furnished with the Holy Scriptures?
9. What number of Bibles and Testaments would be necessary for the Bible Association to furnish gratuitously, to enable the Auxiliary to supply each family?
10. What number would be required in order to furnish each member of our religious Society, capable of reading, who is destitute of a copy, and unable to purchase it?
11. How many Bibles and Testaments are now on hand?

For "The Friend."

Extracts from a sermon preached at Grace Church St., London, 1687, on "Saving Faith" by Stephen Crisp:

"The faith that falls short of sanctification and redemption from sin, is such a faith: God never gave his people, it came some other way into the world, and it bath captivate

## THE FRIEND.

TENTH MONTH 11, 1873.

most of the sons and daughters of men; and they have expelled the true faith (as much as them lies), that saving faith that purifies and cleanses men from sin, and gives them victory over the world, and have got another (th in the room of it, and they live in their sins, and in their lusts and concupiscence, and under the bondage of their corruptions, and still remain in captivity.

"We know there is no eating of the tree of life until we do overcome, nor entering into God's kingdom until we be cleansed. Some find an impossibility in our way which made many to mourn. What, must we never be cleansed? Must this crooked heart and perverse will always remain? Must I be a sinner and a believer? A sinner and call myself a child of God? How can these things hang together?"

"Now that faith which belongs to a purified soul is called a shield, a believer keeps in the exercise of his faith, and considers his salvation is nearer than when he first believed; the people that believe are not presently saved, the work of salvation is to be wrought over they believe, for *without faith it is impossible to please God, nevertheless the foundation of God standeth sure*, it is founded upon the work of God: when a man believeth the work is begun. Although some foolish professors tell us the work is done, and will tell the day and month their conversion was wrought, but they know not what they say. A man may know about the time when God communicated with him, but he must know after he is a believer, then begins the work of salvation, the believer is to be saved from this or the other enemy, he is not presently saved from all, there must be a warfare, a *fighting the good fight of faith* before these enemies of salvation be overcome! the devil will not give over because I am a believer, and because Christ promised to break his head. The seed of the woman shall break the serpent's head. I am not now putting on my armor, the battle is not fought, I have not yet gone through the peril of the fight, I am now buckling on my armor. When the fight comes, if I have not my shield and my armor, I may be slain for all this; *some have made shipwreck of faith*, they have not held it, nor kept the faith, but given it away; but saith the apostle, I have fought the good fight, I have kept the faith, I have gotten the victory. So people, after they cease believing, must wait to have their faith strengthened by renewed manifestations of the same power on which it first stood, they must wait upon the Lord and he will renew the strength of their faith, zeal and courage, and as temptations are renewed, they have new courage, and strength and ability, all by his divine spiritual and christian exercise: they every day come to see the work they believed for, that which their faith tended to, see the work in some measure wrought, they see some enemies of their souls brought down and slain, and they see their souls brought into a little more dominion than they had before, therefore he waits on the Lord for the accomplishment of the work, to believe to the saving of his soul."

There is no alteration in the Christian life; it is a continual warfare, but with the spiritual weapons of burning and fuel of fire, which, if patiently submitted to, would purify and prepare us for an incorruptible and never-fading inheritance.—*Daniel Wheeler.*

"Are Friends careful to bring up those under their direction in plainness of speech, behavior and apparel," &c.

There are few, if any of the Queries put to the subordinate meetings, the answers to which, sent up year by year, indicate more weakness or more disregard for a christian testimony, among a large portion of the members, than the above; which constitutes part of the third. The love of the world and conformity to its manners and fashions have received great encouragement, and obtained much license for their gratification by the opinion inculcated of latter time and widely disseminated throughout the Society, that the plain dress worn by Friends has little or nothing to do with religion, and therefore that there is no obligation to retain its use among us. It is true that "the life is more than meat and the body than raiment," and it is also true, that abstractly there is no religion in dress, but, as is not uncommon, Satan has employed the sophistry built on these truths, as a most successful device to draw multitudes away from the strait and narrow way of a christian life, to do homage to him as the prince of the power of the air.

Probably there never was a time when the arbitrary commands of Fashion inflicted compliance with modes of dress more absurdly disfiguring, more immodest and health endangering, or more extravagantly expensive, than the present; and the plain, consistent dress heretofore known as that of a Friend, having been discarded by many who profess to be fitted to hold influential stations in the Society, and to advocate its principles, very many of the members—male and female—encouraged by their example to comply with their carnal inclination, act in accordance with the supposition that there is now no criterion for plainness of attire; and having thrown off the usual appearance of a Friend themselves, allow, if they do not encourage their children, or others under their direction, to run into the demoralizing folly of gaiety and fashion.

As one departure from the path of rectitude opens the way for another, and the disregard of one testimony of Truth betrays into unwillingness to support another nearly allied, so the language soon corresponds with the garb; self-denial becomes more and more irksome, and the door being thrown open, the temptations to mingle in the corrupting society and amusements of the world acquire increased force, and are affectingly successful.

When Friends were first brought out from among the various religious professors of that day by the blessed Head of the church, to stand as witnesses for the simplicity, the strictness and the spirituality of his religion, they found themselves required to strip all ornamentation from the garb they wore, and to bear an unflinching testimony against the changeable fashions of the world; varying from time to time in dress, as in other things ministering to the lust of the eye and the pride of life. They also saw in that light which could not deceive, that they were required to refrain from giving any flattering titles, and to keep to the scriptural language of *thou* and *thee*. As parents, or guardians who felt they were in large measure account-

able for the right training of the children entrusted to their nurture and care in the wilderness of this wicked world, and as delegated shepherds over the flock of their fellow believers, they found it their religious duty to clothe their own offspring in, and to enjoin upon all the professors of the same pure cross-bearing religion, to adhere to the same plainness of apparel and speech, that they had been called on to adopt; not to swerve from it in order to conform with what might be the prevailing fashion of the day, nor admit of compliance with the needless changes, which were more calculated to please a wanton mind than to promote comfort and usefulness.

Thus they almost at once became a peculiar people, distinguished from others as well by their attire and language, as by their other christian characteristics; and people soon learned to know a Quaker by his or her appearance and conversation. As they thus made it generally known that the understanding given them of the gospel of Christ, required them to bear testimony against the corrupt practices and manners in both the so called church and in the world at large, they soon experienced the truth of the declaration, that "all that will live godly in Christ Jesus shall suffer persecution," and they became the butt of the scorner, the oppressed victims of the hypocritical professor, and the hated opponents of the worldling; all of whom felt their pride and selfishness rebuked by the silent but standing testimony of the easily recognized Quaker. Thus the "plainness of speech, behavior and apparel," indicative of a Friend, was the result of faithfulness to the convictions of Divine Grace, that simplicity and truth in all of them, and the maintenance of a continued testimony against the changeable fashions of those around them, was a christian duty; and thus they became a badge, understood by all, as denoting the profession of a more strict and self-denying acceptance of the religion of Christ, than that adopted by other professors. R. Barclay, speaking of these peculiarities says: "And because the nature of these things is such, that they do upon the very sight distinguish us, and make us known, so that we cannot hide ourselves from any, without *proving ourselves unfaithful to our testimony*, our trials and exercises have here-through proved the more numerous and difficult."

It is true that irreligious men might use the garb of a Friend as a cloak, to deceive; thus practically paying a corrupt tribute to the value of the profession and the reputation it has won in the world, by integrity and uprightness; but the abuse of a good is no argument against the good itself, and where this may have been abused by one, it probably has proved a reminder and an assistance to many a weak member, exposed to the manifold temptations in the world around them, by the reflection that the dress and speech of a Friend would be recognized immediately as altogether incompatible with any place of impurity, or with any act that violated the well-known principles of the Society, and call forth the contempt and condemnation of those who witnessed it. "But," observes Barclay, "this they say is but in policy to commend our heresy. But such policy it is, say I, as Christ and his apostles made use of, and all good christians ought to do; yea, so far has truth prevailed by the purity of its followers, that if one that is called a Quaker do but that which is common among them, as to laugh

and be wanton, speak at large and not keep his word punctually, or be overtaken with hastiness and anger, they presently say, O! this is against your profession."

That the "plainness of speech, behavior and apparel" which has distinguished Friends from others, was not and is not a mere form, unnecessarily connected with the simplicity and purity of the religion they profess, is shown by the indisputable fact, that where members who have gone out into the fashions and manners of the world, have been brought to submit to the requirements of Divine Grace manifested in the heart, making them willing to become the followers of a crucified Saviour, they have found they could make little progress in the way of holiness without submitting to strictly observe them; and when they took up the cross and yielded compliance, their reward was peace. As an example, John Barclay after recording the many deep religious conflicts and clear illuminations he had undergone, says: "The dress from which my forefathers have, without good reason and from improper motives departed, to that dress I must return:—that simple appearance, now become singular, which occasioned and still continues to occasion the professor of the truth suffering and contempt, the same must I also take up and submit to the consequences thereof." And so has it been with hundreds of others similarly situated. When men and women educated entirely different from Friends, have, through obedience to the visitations of the Day Spring from on high, been convinced of and embraced the principles of Friends, they also have found themselves required by the same Spirit that led them out of error, to adopt the attire, the language and the manners which proclaimed to others that they had cast in their lot with the despised Quakers. Numerous instances are recorded in "Piety Promoted" and "Youthful Piety," of persons, favored with repentance and conversion on a dying bed, who, in that "honest hour," under "the reproofs of instruction" bemoaned having been derelict in these very particulars, confessed that it was because of being ashamed of the cross, and earnestly entreated that others might take warning by their example. Could these things so be were the "plainness of speech, behavior and apparel" queried after, a mere dead form, a useless appendage to our holy religion; which may be observed or disregarded as may suit the member's taste?

It has been reserved for our day of latitudinarian liberty, and for those who have introduced into the Society, and others who have adopted, principles and practices widely differing from those of our forefathers, to have this testimony disparaged, held up to contempt, and practically set at naught, even by members who occupy the position of ministers, elders and other leaders of the flock; and never was the truth of the proverb more strikingly exemplified, than is mournfully witnessed among us as a people, "Whoso breaketh a hedge, a serpent shall bite him." How are very many of the young people set afloat on the stream of fashion, and drifting into folly of various kinds; while many of those older, are using their influence to obliterate other distinctive characteristics of Friends. Other testimonies must succumb, and as is well known are succumbing in many places. For the same spirit that makes a shamed to be recognized by dress, speech and manners as a self-denying Quaker, will lead into

further assimilation with other religious professors, in their modes of worship, their manner of living, and their amusements; and thus the close approximation will ultimately destroy all distinction. And all this is being effected, in many places, under the sanction of a religion more superficial and sensational, than that which Friends believe is in accordance with the simplicity and spirituality of the gospel.

But we are glad to believe there are many yet preserved in the Society, who are willing to contend for these testimonies of Truth, and suffer reproach therefor even among their own fellow professors; and we also have faith that, in his own time, the Lord will raise up others, even though it may be as of the stones of the street, who will be prepared by his transforming power, to support the Ark of the Testimony with clean hands, and knowing the inside of the cup and platter made clean, will make the outside clean also, and He will "turn to the people a pure language, that they may all call upon the name of the Lord, to serve him with one consent."

#### SUMMARY OF EVENTS.

FOREIGN.—Matters appear to be approaching a crisis in France. The Monarchists it is supposed have their arrangements for the proclamation and inauguration of a monarchy nearly complete. A special dispatch from Paris to the London Observer says, that 350 deputies to the French Assembly have pledged themselves to support a motion for the restoration of the monarchy. The Republicans, headed by Thiers, are using every effort to defeat the scheme of the royalists for placing the Count de Chambord as Henry V, on the throne. It is expected that the Republicans and Imperialists will unite to ward off the threatened danger. The Count de Chambord, in a letter to his supporters in France, says his object is the union of parties in France and the restoration of her glory, greatness and prosperity. He repudiates any intention of introducing extreme reactive measures, or of attacking Italy. The Paris Journal, a monarchial newspaper, says a proposal for the restoration of the monarchy on the basis of the charter of 1814, in a modified form, will be presented in the Assembly on the opening day of the session. The trial of Marshal Bazaine for the surrender of Metz, commenced before a Court Martial at Versailles the 6th inst. Many witnesses are to be examined, and the trial will probably be a very long one.

The prospect in Spain is more favorable for the cause of the Republican government. Better discipline has been established in the army, and the Spanish forces opposed to the Carlist invasion in the north have been reinforced with 6000 men. Dissensions in the ranks of the Carlists are increasing, and many deserters are surrendering to the Republican troops with the hope of receiving amnesty. Cartagena is still held by the insurgents. Numerous desertions take place daily, and it is stated that a majority of the insurgents wish to surrender, but they are overawed by the liberated convicts and other desperate communists. A Madrid dispatch of the 2d says: Dispatches from all sections of the country represent that a much better feeling prevails. The re-establishment of discipline in the army has served to restore confidence in the ability of the government to suppress all insurrections.

The Spanish Minister of the Colonies will soon visit Cuba and Porto Rico. He has received special instructions for the settlement of the political difficulties in those islands.

General agencies to promote emigration have been prohibited by the German government on account of the great drain of population in many parts of Germany. In consequence of this prohibition and other repressive measures, the number of German emigrants is said to be diminishing.

It is reported that deficient crops have caused a famine in some parts of Hungary.

Late advices from Paraguay show that the privations of the English colonists continue, and there is great dissatisfaction.

A special to the Daily Telegraph from Balkan, central Asia, reports a severe defeat of the Afghans by the Persians. Two Europeans, named Picquet and Rivas, supposed to be Swiss travellers, have been murdered

by the natives in central Asia. There is reason to believe that the Afghans design the conquest and annexation of Bokhara. A rebellion has broken out in Kokan.

A dispute has arisen between the governments of Russia and Japan, on the question of proprietorship of a portion of Saghalien Island.

Advices from Africa announce the capture of a white man by the natives while proceeding westward on the Congo river. From the description of the man it is believed he is Dr. Livingstone, the African explorer.

The British Parliament has been again prorogued until the 16th of Twelfth month.

Many accidents on British railways have occurred recently, most of which have been attended with loss of life. A chimney 220 feet in height, in the village of Northfleet, fell on the 3d inst., killing and maiming number of persons.

London, 10th mo. 6th.—Consols 92½. U. S. Bond 1865, 95½; new fives, 91½. The bank rate of interest 5 per cent, but the discount for three months bills in the open market is below that of the Bank of England.

Liverpool.—Uplands cotton, 9d. a 9½d.; Orleans 9½d. a 9¾d. Sales of the day 25,000 bales. Breadstuf quiet.

UNITED STATES.—The Public Debt statement on the first inst., shows a reduction during the Ninth month of \$1,901,467. The total debt, less cash in the Treasury was \$2,138,793,989. The currency balance was \$3,280,032, and the coin balance \$80,246,757.

The interments in Philadelphia last week numbered 237, including 81 children under two years of age. There were 38 deaths of consumption, 16 marasms at 7 old age.

The mean temperature of the Ninth month, by the Pennsylvania Hospital record, was 68.67 deg., the highest during the month having been 90 deg., and the lowest 48 deg. The amount of rain during the month was 4.04 inches. The average of the mean temperature of the Ninth month for the past 84 years, is stated at 66.30 deg. The highest mean during that entire period was in 1865, 72.68 deg., and the lowest 60 deg., occurred in 1840. The rainfall in nine months the present year has amounted to 45.60 inches.

Mortality in New York last week 507. There were received at New York last week 2,953,122 bushels wheat.

Captain Biddington and his associates of the Polar crew, arrived at New York the 4th inst., and took passage for Washington in a United States vessel.

The Treasury Department is now paying persons who were employed in taking the United States census in the Southern States in 1860, just previous to the breaking out of the rebellion, and who were deprived of the money on that account.

The sugar crop of Louisiana this year will probably be an average yield. The rice crop is much the largest ever grown, amounting to about 17,000 tons.

The Markets, &c.—The following were the quotations on the 6th inst. New York.—American gold, 110 U. S. sixes, 1881, 114½; ditto, 5-20, 1862, 108½; ditto 10-40, 5 per cents, 109½. Superfine State flour, \$5.25 a \$6; State extra, \$6.60 a \$7; finer brands, \$7.50 a \$10.00. White Michigan wheat, \$1.75; amber wester \$1.65; red, \$1.55 a \$1.60; No. 1 Chicago spring, \$1.40 No. 2 do., \$1.39 a \$1.40. Western barley, \$1.45. Oat 48 a 59 cts. State rye, 98 cts. Western mixed corn 65 cts.; yellow, 66½ a 67½ cts. Philadelphia.—Upland and New Orleans cotton, 18½ a 19½ cts. Crude petroleum, 11 cts.; standard white, for export, 16 cts. Superfine flour, \$4 a \$4.75; extras, \$4.75 a \$6.25; finer brands, \$6.50 a \$10. White wheat, \$1.70 a \$1.80 amber, \$1.60 a \$1.68; red, \$1.50 a \$1.58. Yellow corn 68 a 70 cts.; mixed, 68 cts. Oats, 49 a 53 cts. Smoke hams, 14 a 16 cts. Lard, 8½ a 8¾ cts. About 3200 head of cattle sold at the Avenue Drove-yard, common at 4 5½ cts. per lb. gross, and fair to choice at 6 a 7½ cts. Sales of 9,000 sheep at 4 a 5 cts. per lb. gross, for fair prime. Hogs, \$7 a \$7.25 per 100 lb. net for corn feed. Receipts 5,000 head. Chicago.—Spring extra flour \$5.50 a \$6. No. 1 spring wheat, \$1.10; No. 2, \$1.08; No. 3 do., \$1.02. No. 2 mixed corn, 40½ cts. No. 1 oats, 33 cts. Rye, 65 cts. Barley, \$1.30. Lard, 7½ a 7¾ cts. Milwaukee.—No. 1 wheat, \$1.14; No. 2 do \$1.11. No. 2 corn, 44 cts. No. 2 oats, 31 cts. Rye 65 cts. Barley, \$1.30. St. Louis.—No. 2 winter wheat, \$1.50; No. 3 fall red, \$1.35. No. 2 mixed corn 44½ cts. No. 2 oats, 36 cts. Rye, 66 a 68 cts.

A Stated Annual Meeting of the Haverford School Association will be held at the Committee-room (Arch St. Meeting-house, in Philadelphia, on Second day, 10th mo. 13th, 1873, at 3 o'clock, p. m.

PHILIP C. GARRETT, Secretary.

John Heald.

(Continued from page 59.)

1st mo. 19th, 1817. "We attended Eno Meeting. It was small and the house open, the weather cold. I expressed some sentences, beginning with, what shall we eat and what shall we drink and wherewithal shall we be clothed. The Divine Master said, take no thought for these things, for after all these things do the Gentiles seek, but His followers were not to give up their minds to go after the world or to love it, for the apostle saith, if any man love the world or the things of the world, the love of the Father is not in him. I have felt, as I believed, my mind sweetly drawn to a tried, travelling seed, who are, I fear, discouraged from various causes; and perhaps not the least of these discouragements, the inconsistent conduct of professors of Christianity. Oh! I wish these to be encouraged to walk in the high and holy way cast up for the redeemed and ransomed to walk in. Thus as way opened I communicated, but the people became so cold that I believe it was not as favored a meeting as it could have been if the people had sat more comfortably—the body and mind being nearly connected, and when the body suffers the mind is generally unsettled. I think this meeting suffered loss on this account, and so of many more, for we have not seen a fire in any meeting house since we crossed James' River, nor any place to make a fire in, and nearly all of them very open.

20th. Set out for Spring Meeting. When we came to Haw River, it was frozen over, but we rode it at a ripple, where it was open, but very stony and rough. We got well over, and soon came to Nathaniel Newlin's, where we were received and entertained kindly. 21st. Attended the meeting, which was large and exceedingly trying. I felt much for the true but deeply tried seed, but no way opened for labor, until I supposed it was near time for the meeting to close, when I arose to remark, that I intended not to offer any thing as an excuse for not speaking in that meeting, only that I had not found a time that I believed I could have offered anything to that meeting without being in danger of having in the secret of my own mind the sentence: 'Who

bath required this at thy hand?' and I supposed none there would desire that I should come under condemnation in myself to please them; that I had not come to do my own will nor the will of other men, nor to gain their applause. After this I went on to hold out encouragement to the secretly tried ones; and said that such for whom the encouragement was designed might consider themselves unworthy, and those who were too forward and active might gather it up to strengthen themselves; but these might remember that they would not help the good cause but hinder it, and instead of advancing themselves, they would retard their own progress in a religious course. It was a Preparative Meeting, and the clerk when at the table said he was too cold to read, but the business was soon done. We went to John Newlin's and staid the night, and next morning went to South Fork Meeting. It was not large." J. H. here revived the declaration of the apostle: "Such as ye sow, such shall ye reap. If ye sow to the flesh, ye shall of the flesh reap corruption, and made these comments on it. Sowing to the flesh is to fulfil the lusts thereof. The delights, the amusements, the gratifications, and the vanities of the world are sowing to the flesh. We none of us want a crop of corruption, but the apostle adds: 'If ye sow to the spirit, ye shall reap life and peace. After saying much to the people in general, I appealed feelingly to the youth in particular, and concluded with: Be not overcome of evil, but overcome evil with good.

24th. At Rocky River. The meeting collected and became exercising. After sometime I said: Enter into my vineyard and labor, and whatsoever is right ye shall receive. Ye may pray the Father that he would send forth more laborers into his vineyard. There are some who are desirous that more laborers should be sent into the labor, but they hold themselves excused. They would have others to be engaged while they indulge in the delights of the world. These want gratifications and to live at ease. Is there not a danger of missing the much desired happiness of the righteous by indulging in ease? Will it then be a comfort that it was not lost for some gross crime or deed? Is not this state of ease the way to spend the time without labor, and shall we receive pay for doing nothing? Oh! this place of fatal security, how dangerous to the peace and happiness of mankind! The vocal exercise was lengthy, and ended with a recommendation to give due attention to the duty of worship, and to beware of letting the mind go after pleasant pictures, which divert and amuse the mind; for I believed there were some preparing to bear the glad tidings of the Gospel to the people, if they are engaged faithfully to labor in the vineyard.

25th. Attended a meeting near Nathan Dixon's. I had trying exercise and but little vocal labor. In the early part, in a few words,

I advised the people to labor for themselves, each one to enter into an examination of their concerns and of their own works. After this I sat nearly an hour and a half, when I again in a few words recommended their attention to individual labor as a profitable way to obtain instruction.

26th. Being First-day, we were at Holly Spring Meeting. It was large and favored. I began with: Work while it is day, for the night cometh wherein no man can work. I endeavored to impress on their minds the necessity of an early attention to that work which may be put off too long, and often has been to the sorrow of many when repentance has been sought with tears, and there is reason to fear some have not found it. I mentioned the case of Saul, the first anointed king of Israel; that he did not complain of the Lord's forsaking him, until he became disobedient, and then he had cause to lament, that the Lord no more answered him, either by prophets, or by vision, or by dream. So he lamented himself in the time of his distress, though before he could force himself to offer a sacrifice, which Samuel called foolish. Saul, before this, had been commanded to go and destroy Amalek together with the sheep and oxen; but when he saw the goodly sheep and oxen, he thought that these would make excellent burnt-offerings, therefore he would save that which he was commanded to destroy. This gave occasion to Samuel to say: obedience is better than sacrifice, and to hearken than the fat of rams. In the present day I believe that disobedience will also produce distress. Then I turned to the case of Jonab to show what distress was inflicted on him for disobedience, and referred to the awful situation of some of recent times who had neglected to yield obedience while they had time and opportunity."

28th. At a meeting near Samuel Hill's, John Heald endeavored to press on his audience the importance of a steady attention to Divine things, by an illustration drawn from the study of common literature. If the scholar devotes himself to the pursuit of learning, and perseveres in a continuous application to his studies, he usually makes rapid progress, but if he is being continually drawn away after other concerns or amusements, and his mind is much occupied with them, little improvement is witnessed, and frequently much that has been learned is lost. So it is in the school of Christ. Amusements and pleasures of a transitory nature often draw away the mind and heart of those who have begun to learn a little Heavenly Wisdom, so that they run after these things. After a time, when these are brought to reflection, they find that they have lost the little that they had before acquired, and that these indulgences have tended to their loss. He says: "It was a solid, good meeting, and I hope the labor will not be lost."

29th. "Attended Back Creek Meeting, which was large. Soon after sitting down my

mind was loaded with exercise, and the people seemed scarcely gathered, when the impression on my mind induced me to think it was time to stand up. I thought it was like being forward, but believing that the impression was right, I began to speak and several came in afterwards. I first said: Children, obey your parents in the Lord, for this is right. Parents provoke not your children to wrath, but bring them up in the nurture and admonition of the Lord. Great are the obligations of children to parents, and great is the responsibility of parents; but what can parents do to accomplish this work unless they come to experience it in themselves; or how will they instruct their dear children in the way they know not themselves. These have need to apply as Solomon did for wisdom. It was well-pleasing to the Lord that he asked for wisdom rather than riches or long life; and I do believe it would be acceptable to the Lord, and that He would be graciously pleased to answer the honest request of these. I treated largely on this subject, and it was a very humiliating labor to me, and attended with impressive weight. The meeting concluded in supplication for preservation in the way of allotted duty, and that He who is Almighty would be graciously pleased to remember in mercy the people the world over, to draw them with the cords of His love unto Himself, and in particular the dear youth.

(To be continued.)

For "The Friend."

### Collecting India-Rubber.

(Concluded from page 58.)

"February 27th.—The rains continued to increase in violence, and the river had risen greatly, notwithstanding that this was the dry season. For many days I was unable to tap the india-rubber trees, and Ramon was laid up with what is called 'a game leg,' and most of the other people were suffering more or less from calentura; consequently, I took very little ciringa.

"March 1st.—Heavy rains were incessant, chiefly at night: the Orinoco was very much swollen. Merced Gil was swamped out of his work at Caricia, his ciringa trees and rancho being under water. This week we killed three of the larger kind of wild hog called *barguiro*; they appeared to me identical with the javiti of Central America: an immense herd of them wandered about the exterior of the rancho, and Merced came down to join in the shooting. After we had secured several, we stowed them away in the canoe. Benacio and the boy Narciso did not appear with the one entrusted to them, though we could hear them whistling at no great distance, and called to them repeatedly. I suppose they were overelated at the prospect of their favorite meat for a feast; for though I summoned them several times, still they loitered. Merced Gil was sitting in the curiara, and the sand-flies were in clouds: I could stand it no longer; so vacating the stern of the canoe, I jumped on shore, and advanced along the path to meet the truants. I suppose I did not look amiable, for no sooner did Benacio see me, than he dropped the end of the pole on which they were carrying the pig, and bolted into the bush. In the evening, as he did not return, I considered he had absconded altogether, although, from intimations I received from time to time from Merced's wife, (who was

staying at my place during her husband's absence at the Conueonumo,) herself an Indian of the pueblo Maroa, I was certain that he was hanging about the place, and was receiving food from the others. I never succeeded in catching him, though several times I rose in the night and went by a circuitous route to the men's quarters; but he was always too quick for me. Ramon admitted he had been there, and was living somewhere in the forest. He afterwards induced away the stupid boy Narciso, and I saw no more of them. Roja completed his month of service, and left for Maypures, which defection nearly deprived me of hands, as Ramon was sick, and able to do very little, and Mateo was with Merced Gil. The peons of this district are hard to procure as workers. They are almost all deeply in debt to the principal creoles of the pueblo, and when they are secured, they are fit for little, as they have all the vices of a reduced and selfish race.

"As soon as Ramon was on his legs, we tapped the trees, with a little better yield. The water, after having risen to within a few feet of the door of my rancho, subsided as rapidly, and we had dry weather for a short time, just as we had begun to despair of it.

"19th.—I was again troubled with much fever at mid-day, but the attack was not sufficiently severe to prevent my getting through the tapping of my trees.

"26th.—During the past week the weather had been very fine; but, owing no doubt to the stagnant water-pools, the forest now swarmed with the zancudos mosquitos, and whilst at work we literally led a life of torment. These zancudos were of a reddish color, unfamiliar to me, and they bit dreadfully in the shade of the woods during the daytime, and came out in full vigor on moonlight nights.

"I now sent Rogers down to San Fernando to seek advice of the padre of the pueblo, who enjoyed a local celebrity for physic. He went with Merced Gil. He had not been able to do one day's work in the forest for some time, and was in a very weak condition.

"April 3d.—This was the third week of fine weather; but I found the position I occupied would not be tenable much longer, as I had no more ammunition for my gun, and had, therefore, to rely entirely upon the fish-hook. In the night Ramon sometimes took a small species of cayman, called *bavia*. I did not dislike the flesh. It is best salted, but it had an unpleasant odor and taste of musk about it,—resembling the flesh of some large fish more than that of an animal.

"When it was fine I used to sleep on a rock on the bed of the Orinoco below, in order to avoid the zancudos.

"In the afternoon, after tapping the trees, I used to set Ramon and Manuel to work with hook and line; in the mean time, I paced up and down upon the dry slab of rock at the water's edge, in front of my rancho. It may be imagined that the line was watched with sufficient interest, as thereon depended supper and breakfast for the morrow. I did not lose the best hours of the morning, as they were given to the tapping process. We caught some very large tembladors (electric eels) in the pools of standing water in the forest. We used to spear them with long lances of sharpened saplings, as they lay concealed under the rotten logs which darkened the water. These pools also contained small fish of curious shapes. I was delighted at discovering that

the sand-flies, those inveterate plagues of man in these regions, are not without their own enemies. My attention was at first attracted to a small fly thickly settling on the blanket that was suspended over the entrance to my dark rancho; and when I watched them more closely, I observed that each held a sand-fly spitted on its proboscis, which it had evidently secured on the wing from amongst the dancing myriads before the door, returning to the blanket to consume the captives at leisure. A diminutive but active yellow wasp also disported itself on the surface of the blanket, pouncing upon any of the sand-flies that became momentarily entangled in the hairs, speedily devouring them. It is a misfortune that these exterminators are not more proportionate to their prey! Most of the native fishing-lines, and the best, are those made from the fibre of the young, still-folded leaf of a palm called *cumare*. Other palms, such as *manriche*, *milite*, *macanilla*, &c., make good cord, but do not equal the *cumare* for strength and the endurance of water. Our strongest water cord is not to be compared to it. The finest chinchoras (or hammocks) are also made from this palm, though the other three varieties supply material for an inferior article; but these fine chinchoras are the "grass hammocks" mentioned by the coast travellers.

"The rock at my rancho was a favorite resort for numbers of butterflies of different species, as all the rocks were that contained little puddles, alternately covered and uncovered by the rise and fall of the river. They settle in closely packed clusters of color, and, when disturbed, mount cloud-like into the air, but soon re-settle on the margin of the pool.

"17th.—Easter Sunday.—The long course of Caribee fish was at last broken. We took a *cahara*, a large fish, with an immense head: the flesh is substantial, and makes good salt provision. I very soon tired of the tembladors, though they were not bad, but of too gelatinous and viscous a consistency when cooked to be eaten constantly.

"The rain now seemed fairly to have set in: the river, after having fallen somewhat lower than before, rose rapidly to within a few feet of the rancho door. Many different kinds of ranos (tree frogs) and ground toads (*zapos*) croaked loudly from the shore in as many different voices. The forest atmosphere was heavy with the fragrance of orchids, and other plants of the same nature, unfolding their flowers to the increasing moisture that hung in the branches of the trees. Owing to the turbid current of the rising river, fish became very difficult to procure, and the rains rendered it impossible to work in the forest with success; lagoons of standing water crossed all the paths. At the end of the month I evacuated my position as no longer tenable."

Who Can Best be Spared?—Young men, this is the first question your employers ask themselves when business becomes slack and when it is thought necessary to economize in the matter of salaries. This question is answered in an American journal to our satisfaction. I answer the question who can best be spared this way: The barnacles, the shirks, the make shifts, somebody's nephews, somebody's proteges, somebody's good-for-nothings. Young man, please remember that these are not the ones who are called for when responsible positions are to be filled. Would you like to gauge your own fitness for a position of prominence

Would you like to know the probabilities of your getting such a position? Inquire within! What are you doing to make yourself valuable in the position you now occupy? If you are doing with your might what your hands find to do, the chances are ten to one that you will soon become so valuable to that position that you cannot be spared from it; and then, singular to relate, will be the very time when you will be sought out by promotion for a better place. Be content to grade among the men who can be spared, and you may rest assured that nothing will "spare" you so certainly and so easily as promotion.—*Late Paper.*

For "The Friend."

To Children and to Parents.

The following extract from an epistle issued by London Yearly Meeting in the year 1800, is worthy the deep consideration both of children and their parents in this day. That both may be found walking in the way of Christ Jesus unto the fulfilment of their respective obligations and duties; and, as responsible stewards, serving their generation according to the will of God.

"Dear Friends, we believe there are many of you, and especially of the youth, who, in a good degree, have given up, and are giving up your hearts to serve the Lord. May you submit with patience to all the repeated baptisms necessary for your refinement. The gospel hath its tribulations; but they are not like the sorrow of the world, which worketh death. They are intended to disturb the polluted rests in mere worldly enjoyments; they unite you to the living members of Christ's body, in whom the same things have been accomplished; and if they be accepted as tokens of his love, and abode under the proper time without repining, they will completely unite you to him, the holy head.

Wherefore, ye dearly beloved youth, our treasure, in whom we sometimes dare to delight, and to hope that you will one day succeed to the places of those faithful laborers, who have passed, and are passing from works to rewards; we entreat you, dear children,—with tender solicitude we press it upon you, flee from every thing which tends to despoil you of your innocence; and to render your minds less receptive of that holy influence, which your enlightened judgment demonstrates to be truth.

And ye parents, be ye solicitous to discharge your important and awful duty, with scrupulous attention. It is often too late to warn the youthful mind of danger, when your own negligence or indulgence hath suffered your offspring to deviate from that path of simplicity, in which you have thought yourselves bound to walk, and in which you have found peace. If you fail to suppress the early beginnings of undue liberty, how can you expect a blessing on your endeavors, when further deviations at length arouse your attention; and how, having failed to rule your own house well, can you expect duly to 'take care of the church of God,' by performing that *too much neglected duty* of private admonition therein? There were of old those who brought children to Christ, in the days of his flesh; and now the religious parent can breathe no warmer aspirations for them, than when he commends his tender offspring to the protection of their Lord. But see, Friends, that you encourage no propensities in them which prevent a union with him. Restrain them,

we beseech you, from associating with those whose influence and example lead away from his law; and be especially careful that you introduce not among them, publications, which are either wholly, or in part, repugnant to the faith, as it is in Jesus. Let it be your own daily care to endeavor after closer communion with him, and to walk in meek submission to his commands: so may you gain over the minds of the youth providentially placed under your care, that ascendancy, which arises from the united effects of sound judgment, truest love, and a good example.

Finally, Friends of every age, of every rank, we commend you to the protection of him who died for us, and 'who ever liveth to make intercession for us, who is able to save them to the uttermost that come unto God by him.'

Statistics of Intemperance.

Intemperance, with its train of attendant evils, is likely to become an increasingly interesting subject for moralists; and no phase of the subject will command more attention than its effect on the duration of life. No one will question the fact of its influence in this respect. Unhappily, nearly every one can recall some individual corroboration of it, while in the broader field of a community or nation, it is more strikingly apparent. A celebrated French physician, D. Everat, has furnished statistics showing that the mortality from this cause is annually 50,000 in England, 40,000 in Germany, 15,000 in Russia, 4,000 in Belgium, 3,000 in Spain, and 15,000 in France. Notwithstanding the universality of this vice among nearly all classes of society, few persons are aware of how materially human life is abbreviated by habits of intemperance. F. G. P. Neison, an actuary of London, from a series of careful observations, has deduced some valuable statistics regarding this subject, which prove that the average duration of life, after the commencement of intemperate habits, is as follows: Among beer drinkers, 21.7 years; among spirit drinkers, 16.7 years; among those who drink spirits indiscriminately, 16.1 years. The death rate among different drinkers, Neison found to be: Among beer drinkers, 4.597 per cent. yearly; among spirit drinkers, 5.996 per cent. yearly; among mixed drinkers, 6.194 per cent. yearly.

The annexed table of Neison contrasts the expectation of life between temperate and intemperate persons.

Expectation of life for temperate and intemperate persons.

Ages.	Temperate.	Intemperate.	Loss of Life.	Duration of Life of Intemp. comp. with Temperate.
20	44.2 years.	15.5 years.	28.7 years.	35 per cent.
30	36.5 "	13.8 "	22.7 "	38 "
40	28.8 "	11.6 "	17.2 "	40 "
50	21.2 "	10.9 "	10.3 "	51 "
60	14.3 "	8.9 "	5.4 "	63 "

The expectation of intemperate persons—from the time of becoming intemperate—varies with the vocation.

Among mechanics, working and laboring men,	18 y'rs.
Among traders, dealers and merchants,	17 "
Among professional men and gentlemen,	15 "
Among females,	14 "

It will be noticed that professional men, addicted to drunkenness, are shorter-lived than drunkards of other pursuits. In any particular pursuit, where intemperance prevailed to a great extent, and where it shortened life more than in others, the effect, like

that of unhealthy localities, would be to reduce considerably the average longevity of that vocation.

For "The Friend."

A Letter of John Harelay to Thomas Evans.

Corydon, Sixth month, 1835.

No sooner were my eyes opened to see the excellency there is in the Truth, now just twenty years ago, than I began to appreciate the blessed experience recorded by these worthies, (our early Friends;) who in the same line of testimony were counted worthy, as it were, afresh to cast up the way and revive the ancient simplicity of the gospel. Since that time, poor and feeble as I feel myself, and unworthy to bear the precious name by which we are called, in the midst of blushing at my own dwarfishness and abundant occasion of humiliation and of exercise,—I may say, that this feeling and love to the pure cause of Truth, as professed by our poor Society, has never slackened. How animating it is, and comforting to believe,—as I have done at this time, in the reading of thy letter, and observing your exercises and efforts [in America] on account of this most precious cause,—that the Lord hath not forsaken those, who desire to cleave to him, with full surrender of themselves; that He is still near to help in the needful time, to limit the power of the enemy, and lift up a standard against him, and to overrule all for the good of those that fear Him. O! how little do we know of the designs of His wisdom and goodness to his church: His people are permitted to be bowed down, afflicted, oppressed; He chastens them, and minishes them; and then (as the history of the church sets forth,) He raises them up by his own arm of power, beyond all expectation; He even works by poor, little, feeble instruments, and in unlikely ways; till he has effected, through suffering, the enlargement, strengthening, and glorifying of the house of his glory. Isaiah lx. lxi., &c.

It is remarkable, that there is a numerous body of scattered and hidden seekers, who have tried all other ways, and retired from them more or less; and who are sincerely looking to the spirituality of religion, and to us as holding up this view. By these the most primitive productions are increasingly sought and prized.

With regard to cutting down some of our Journals, &c., I have always looked upon this as a delicate or difficult matter to do unobjectionably. We are too apt, unconsciously to ourselves, to choose that which in our present state and turn of mind we are impressed with, or that which the present tendencies and exigencies of the times seem to us to call for; and possibly (for often it has been so) to the unequal upholding of divine truth, or a partial exhibition of the character and line of testimony, which a Friend in his lifetime maintained. This doubtless, can be much guarded against by a judicious hand, and under best direction: but still I have been afraid of paraphrasing upon, or extracting the experience of others; we may so readily give an aspect or coloring different from the original document. There has been, in my opinion, ever since the creeping in of degeneracy, a correspondent endeavor to refine upon, to remodel, and soften down the rugged, plain truths delivered by these ancients; and I think I see this in many of the publications that have of late years issued from the press. The more pure days

of the church yield me much the most interesting and impressive experience. O! how is the simplicity overborne even in dedicated minds, now-a-days; how refined, how self-indulgent, and full of reasonings are we! At what a low ebb in many places is our ministry; even strangers noticing the change, and the approach to their pulpit eloquence; Scripture words indeed there are, yet often attended with but little of that authority, weight, savor and life, which tends to baptize and bow down the spirits of all, and to humble the creature under the mighty hand of Him, who worketh all in all. Surely, among many causes, our being so much mixed up with all sorts of people, sometimes for purposes very good in themselves, has contributed to this state of things: "Strangers" to the life of Christ inwardly revealed, have "devoured our strength." Hosea vii. 9. I must conclude with saying, may the Lord by his power interpose, and show us whence we have fallen, and preserve us from falling still more generally and utterly!

Farewell! I shall be pleased to hear from thee, whenever thou hast occasion or liberty to address me; and sometimes, at least, think of me as one that longs to endure to the end, to hold fast faith and patience, till the Lord say, it is enough.

I remain a poor and weak brother,

J. B.

*Colorado Parks.*—The park itself is 9842 feet above the sea-level, or half as high again as Mount Washington. The surrounding rim is some two thousand feet higher, while in the distance, north, south, and west, may be seen the snowy summits, fourteen thousand feet high, of Gray's Peak, Pike's Peak, Mount Lincoln, and

Other Titans, without name or name.

The South Park is sixty miles long and thirty wide, with a surface like a rolling prairie, and contains hills, groves, lakes, and streams in beautiful variety. It formerly abounded with buffalo and other game, and was a favorite winter hunting-ground of the Indians and the white trappers, but since the great influx of miners the buffalo have mostly disappeared. Such, however, is the excellence of the pasture that great herds of cattle are driven up here to feed during the summer. Several towns and villages have sprung up around the mines in this vicinity, such as Hamilton, Fairplay, and Tarryall, to which a stage-coach runs three times a week from Denver.

In our old atlases, forty years ago, we used to see the Rocky Mountains laid down as a great central chain or backbone of the continent; but they are rather a congeries of groups scattered over an area of six hundred miles in width and a thousand miles long; among them are hundreds of these parks, from a few acres in extent to the size of the State of Massachusetts. These mountains differ so entirely from those usually described by travellers, the Alps, the Scottish Highlands, and the White Mountains, that one can scarcely believe that this warm air and rich vegetation exist ten thousand feet above the sea. In climate the Colorado mountains approach more nearly to the Andes, where the snow-line varies from fourteen thousand to seventeen thousand feet. Here snow begins at twelve thousand feet, and increases in quantity to the extreme height of the tallest peaks,

about fourteen thousand two hundred and fifty feet, though even these are often bare in August. In these parks the cattle live without shelter in winter, and the timber is large and plentiful at eleven thousand feet elevation. Glaciers are wanting, but instead we have the rich vegetation, the wide range of mountains, the pure, dry, and balmy atmosphere, and a variety, a depth and a softness of color which can hardly be equalled on earth.—From "Colorado and the South Park," in *Lippincott's Magazine*.

Selected.  
LEAVE THE THINGS WHICH ARE BEHIND.

Leave behind earth's empty pleasure,  
Fleeting hope, and changeful love;  
Leave its soon-corroding treasure:  
There are better things above.

Leave, ah, leave thy fond aspirings,  
Bid thy restless heart be still;  
Cease, oh, cease thy vain desirings,  
Only seek thy Father's will.

Leave behind thy faithless sorrow  
And thy every anxious care:  
He who only knows the morrow  
Can for thee its burden bear.

Selected.  
HERE AND THERE.

Here 'mid death and danger mournfully we stay,  
Every thing around us yielding to decay,  
But in the better country sin's dark triumph o'er,  
All things are enduring—life for ever-more.

Here with weary footsteps, in a desert waste,  
Strangers in a strange land, we pass through in haste;  
There our rest awaits us, our hearts are gone before,  
In that land of brightness—rest for ever-more.

Here our courage faileth in the storms of life,  
Our hearts are sad and anxious, ruffled in the strife,  
There the tempest endeth, the billows cease to roar,—  
All is calm and tranquil, peace for ever-more.

Here amid our sadness, silence often reigns,  
Or our voices mingle in low and plaintive strains,  
There no chord of sadness shall wake an echo more,  
Heaven itself resoundeth—song for ever-more!

Here amid our sorrow sighs are often heard,  
Fondest hearts are parted, sick with hope deferred;  
There no tear-drop falleth, hearts are never sore,  
All is joy and gladness—joy for ever-more!

Here 'mid deep'ning shadows wearily we roam,  
Looking for the day-star, the bright light of home,  
There the clouds shall vanish, the night of weeping o'er  
Where the sun ariseth—light for ever-more!

Only a little longer have we to trust and wait,  
Ere we reach the portals; pass the pearly gate,  
Hear the shout of welcome from loved ones gone before,  
In our Father's mansions—home for ever-more.

Anonymous.

*The Old Partridge and Her Young Ones.*—

This story of the partridge was sent to us by a dear little lame girl who is a lover of the *Laws of Life*, and she induced her mother to write it out for us, on purpose that we might give it to the children, and she says, "Tell them it is all a true story, too."

Hiram, our farmer, was out in our maple orchard to-day, repairing the fences, when he frightened from her nest a partridge brooding her wee ones. The birdlings were very young, probably not more than a few hours out of the shell. The old bird seeing her chicks in danger, gave a peculiar note of alarm, when all but one, still encumbered with a large portion of a shell, ran away and putting their little heads beneath some old leaves, lay perfectly motionless. Hiram secured the half-hatched bird, thinking to gratify the little and perhaps the big children with a peep at a young partridge. The mother bird

heard the distressful cry of the prisoner, and evidently determined to effect its release by directing the attention of its captor to herself, as being bigger game and more worthy of his care, she immediately fluttered at his feet as if unable to get away, she walked a little way like a lame fowl, she humped up her back and tried in vain to fly, having lost, apparently, the use of her wings and legs, all the time uttering the same low, peculiar note of warning which kept her little brown birds nestled among the brown leaves so closely that they could not be distinguished from the leaves by any sign of life. Our kind-hearted Hiram had often witnessed similar exhibitions of motherly tact, and fully comprehended the ruse of the bird, so he allowed her to lead him far away from her little flock, he all the while seeming to make attempts to catch her. When they were quite a distance off, she spread her wings as well as any partridge, and in a circuitous course reached the scene of her disturbance, no longer a disabled bird, but perfectly well able to call her family together again, and care for them, as Hiram witnessed from behind a tree. Upon the little one which Hiram caught, and afterward released, she seemed to bestow the larger share of her attention, picking off its shell, and urging it to run with the others, and giving it a double share of food. She soon gathered her family together, consisting of fifteen or twenty brownies, and off she went with them into the denser forest.—*Laws of Life*.

Selected for "The Friend."

The Work of Regeneration.

Eleventh month 19th, 1845.—The Monthly Meeting of the Western District was held to-day, which I was drawn to visit. The company was unusually large; and after a time of silent waiting, the stirring of the Lord's power was felt, under which I was gradually enabled to preach the gospel of salvation, through our Lord Jesus Christ; showing that the work of regeneration had its beginning in the heart, through obedience to the manifestations of his Spirit, in little things. Our Saviour thanked the Father that He had hid the things of his kingdom from the wise and prudent, and revealed them unto babes. To be brought into this blessed experience, we must become babes in Christ; and the only way to experience the new birth and change of heart unto righteousness, is by faithfulness to the requisitions of the Divine will, made known in us. Many things were brought forth out of the treasury, by Him who alone has the key and command of it; and through Divine mercy and condescension the baptizing and solemnizing power of Christ, went forth over the assembly, to the comfort and strength of the hungry, weary and exercised ones. Oh! that I may be enabled in humility and abasement of soul, to offer the tribute of thanksgiving and praise to Him who hath all power in his hand; and to walk before Him with increasing fear and reverence, for all his great condescension and unmerited compassion towards me, a poor creature, and towards his church and people.—*William Evans' Journal*.

A good swarm of bees will consist of about thirty thousand, the queen laying from two to three thousand eggs a day, the worker hatching out in about twenty-one days; so it is easily understood why a colony keeps itself up and throws off swarms.

## Circular of the Bible Association of Friends in America.

In again calling the attention of Auxiliaries to the Annual Queries to be answered previous to the general meeting of the Association on the 5th of Eleventh month, the Corresponding Committee would press upon Friends, who have been engaged in the distribution of the Holy Scriptures, the importance of furnishing full and accurate answers to all the Queries, and of forwarding their report *seasonably* to the Depository.

It may be recollected, that in making donations to Auxiliaries, the Board are guided in deciding what number of Bibles and Testaments shall be sent to each, by the information given in its report. Hence those Auxiliaries that do not report in time, are liable to be left out in the distribution.

Specific directions should be given in every case, how boxes should be marked and forwarded; and their receipt should always be promptly acknowledged.

Address John S. Stokes, No. 116 N. Fourth Street, Philadelphia.

SAMUEL BETTLE,  
CHARLES RHODES,  
ANTHONY M. KIMBER,  
Committee of Correspondence.

Philada., Tenth mo. 1873.

## QUERIES.

1. What number of families or individuals have been gratuitously furnished with the Holy Scriptures by the Auxiliary during the past year?
2. What number of Bibles and Testaments have been sold by the Auxiliary within the past year?
3. How many members, male and female, are there belonging to the Auxiliary?
4. What number of families of Friends reside within its limits?
5. Are there any families of Friends within your limits not supplied with a copy of the Holy Scriptures in good clear type, and on fair paper; if so, how many?
6. How many members of our Society, capable of reading the Bible, do not own such a copy of the Holy Scriptures?
7. How many Bibles and Testaments may probably be disposed of by sale within your limits?
8. Is the income of the Auxiliary sufficient to supply those within its limits who are not duly furnished with the Holy Scriptures?
9. What number of Bibles and Testaments would it be necessary for the Bible Association to furnish gratuitously, to enable the Auxiliary to supply each family?
10. What number would be required in order to furnish each member of our religious Society, capable of reading, who is destitute of a copy, and unable to purchase it?
11. How many Bibles and Testaments are now on hand?

*The "Bad Lands" of Nebraska.*—On the right bank of the Missouri, and on the borders of the White River, in Nebraska, lies a dreary desert valley, some 80 feet deep, which the French expressively designate "Les Mauvaises Terres." It may be doubted whether the whole world offers a stranger or more impressive landscape. Here geology recognizes the vestiges of astonishing diluvian action, and it is difficult to proceed many steps without striking one's foot against the fossil remains of ancient animals.

It is a kind of world apart, says an American writer, a large valley which seems to have been excavated, in the first place, by an immense vertical out-throw, and then modelled by the prolonged and incessant action of denudating agents. With a mean breadth of 28 and a total length of 90 miles, it develops itself in a westerly direction, at the foot of

the sombre mountain chain, known as the *Black Hills*. On issuing from the immense, uniform and monotonous prairie, the traveller finds himself suddenly transported, after a descent of 100 to 200 feet, into a depression of the soil where rise a myriad of abrupt rocks, irregular or prismatic, or like columns dressed with enormous pyramids, and from 110 to 220 feet in height.

These natural towers are so multiplied over the surface of this extraordinary region, that the roads wind through them in narrow passages, and the labyrinth may be likened to the irregular streets and narrow alleys of some mediæval European city. Seen from afar, the interminable succession of rocks resembles the massive monuments of antiquity; nor are turrets wanting, nor flying buttresses, nor graceful arches, nor vaulted portals, groups of columns, façades, and taper spires. If at one place the eye lights upon the ruins of a feudal fortress, at another it surveys the graceful ensemble of a Saracenic mosque. Or you might almost say, in the distance, that it is a fantastic "city of the dead."—*Extract.*

## The Great Work of Transformation.

O! how great is the work to be done in the heart of every individual, before it is fit for the reception of the Heavenly Guest, who only dwelleth in the temple of an undefiled heart! How many baptisms have we to pass through, in order to purify and prepare us for the knowledge of the "only true God, and Jesus Christ whom He hath sent" once in a body of flesh on the earth,—but who now appears by the eternal Spirit, in the heart of every man. We have great instruction from the narrative in holy writ, of the preparation which Elijah had to pass through on Mount Horeb, before he was in a situation to discern the "still small voice." He had first to witness "a great and strong wind to break in pieces the rocks,"—as a figure of that power, which alone can subdue and soften the rocky and obdurate nature in the human heart; "but the Lord was not in the wind." "And after the wind, an earthquake,"—another needful dispensation for the reduction of the creature, and the shaking and separating of the earthly part, and every thing in man that cannot abide the day of the Lord's coming, or stand when he appeareth. "But the Lord was not in the earthquake; and after the earthquake a fire;"—that searching, consuming, baptizing element—the fire of the Lord, that consumes *not only* that which is light and chaffy, but also the dross and tin and reprobate silver; that *nothing may remain*, but what can endure and abide the trial, as pure gold. "But the Lord was not in the fire: and after the fire, a still small voice." This ordeal *we must all* pass through, according to our measure: it is the great work of regeneration; and in order to hear this "still small voice," we must ourselves be still, as with our faces wrapt in a mantle. The prince of this world must be cast out, and his strongholds pulled down; all our imaginations and every high thing that exalteth itself against the knowledge of God must be cast down, and brought into captivity unto obedience, before we can know Christ to be in us, "the hope of glory." The silence of all flesh must be attained: the creature must cease from its own willings and runnings and strivings: the holy command must be obeyed,—"be still, and know that I am God:

I will be exalted among the heathen: I will be exalted in the earth." Blessed and happy are they, who thus seek, and thus find; and having found, to them the glorious day is come, when whatsoever they shall ask the Father in the name of the Son, He will do it. Before this day, how vain have been our petitions, because not in the name, not in the power of the Spirit of the Lord Jesus, but in our own strength, time and will.—*Daniel Wheeler.*

*The Fight at the Wood-pile.*—One night at a late hour Dr. Bently, well known among the clergy of olden time, was disturbed at his studies by a rattling sound among some wood which, sawed and split for his study fire, had been left by the teamsters the afternoon previous, too late to be properly housed. He rose, went cautiously to the window, and saw a woman filling her apron with wood, which she hastily carried away. He resumed his seat and recommenced his study. Shortly after the same noise occurred, and looking out a second time he saw a similar operation—the woman filling her apron to its utmost capacity. When she had gone he returned to his book, with a tender pity in his heart for a destitution which sought relief in this lonely, dreary, not to say sinful manner. By and by he was startled by a crash of falling wood, and hurrying to the window, beheld the poor woman casting the very dust of the wood from her apron. He remained motionless, his gentle heart filled with commiseration.

She swiftly departed, and soon returned heavily laden with wood, which she threw on the pile as if it were indeed "the accursed thing." The doctor's compassion and curiosity were now intensely excited. He followed her retreating figure till he discovered her residence, and thus ascertained who she was. What she was, was no mystery to him. The last hour had shown him her virtue's lofty height. He called early the next morning on Mr. B., the wood-dealer, and directed him to send a half cord of his best wood, sawed and split, to Mrs. —, but by no means to let her know from whom it came, which was readily promised. Mr. B.'s teamster, who happened to be within ear-shot, though out of sight, was not so bound, and when he tipped the wood into the poor widow's yard, replied to her eager inquiry who sent it, by relating the conversation he had overheard.

The conscience-stricken woman, feeling that her sin and her repentance in the lonely darkness of the midnight hour were known and understood by another heart besides her own, hastened without delay to the house of the benevolent man to express her gratitude and her sorrow, and with deep humility and bitterness told him the temptation, to which her extreme poverty had reduced her, of breaking the eighth commandment. "Sir," she said, "though my house was dark and cold, though my heart was wrung with anguish at the sight of my poor shivering little one, I could not keep it! I could not keep it! My conscience would not let me!" "Say no more, my dear madam," said the good man, "I saw it all—I saw you conquer the devil in two fair fights."—*Salem Register.*

And they that know thy name will put their trust in thee, for thou, Lord, hast not forsaken them that seek thee.

For "The Friend."

## Individual Faithfulness.

The following instructive incident, recorded by Thomas Scattergood, during his journey in North Carolina in 1792, seems worthy of being revived at this time, as an encouragement to individual faithfulness.

"11th mo. 15th. After a good opportunity in the family, we set off before the sun was up, and rode to Spring Meeting. As our friend John Carter and I rode together, he informed me, that in his young years, being visited by the Day-spring from on high, he sought much to find a place of rest to his soul, and joined the Baptists. After a time he grew dissatisfied with their mode of worship, not feeling that peace which he was in pursuit of; and one day after seeking the Lord with great earnestness, and begging of him to show him whether that was the people he was to join himself to, he went to their meeting with a determination that if he felt an evidence of the owning love of God to attend his mind, he would submit to go into the water to be baptized, or anything for peace sake: but on that day the preacher held forth such doctrine, that it turned him away from them in his mind, and led him more and more into a lonely seeking state. At this time the little company of Friends in the neighborhood had grown so weak as to neglect their meeting, and had given consent for the Baptists to hold meetings in their meeting-house. For some time his mind was impressed with an apprehension that it was required of him to go and sit down by himself in the meeting-house; but he put it off, being ashamed. At length he went by a private way, and sat down alone and was greatly refreshed; but he could not do it privately long, feeling a necessity to travel the road openly, for his friends and neighbors used to wonder where he went in private. One day in going to meeting he met with one of them, who asked him where he was going, and he told him honestly, 'I am going to meeting.' 'Strange,' says the other, 'what will you go there for!' He left him, however, by the way, and had peace in the meeting. Next time he went, seven of his neighbors hearing of his going, joined him: and in process of time he was united to the Society of Friends: zeal and religion revived amongst them, and there is now a large meeting, called Spring Meeting, which we were at to-day; and this Friend is a valuable minister amongst them. We had a favored meeting."

*Bees as Architects.*—A centre comb burdened with honey was seen by Huber and others to have broken away from its place, and to be leaning against the next so as to prevent the passage of the bees. As it was in October, and the bees could get no fresh material, they immediately gnawed away wax from the older structure, with which they made two horizontal bridges to keep the comb in its place, and then fastened it above and at the sides, with all sorts of irregular pillars, joists, and buttresses; after which they removed so much of the lower cells and honey, which blocked the way, as to leave the necessary thoroughfares to different part of the hive, showing design, sagacity, and resource. Huber mentions how they will find out a mistake in their work and remedy it. Certain pieces of wood had been fastened by him inside a glass hive, to receive the foundation of combs. These had been placed too close to allow of the cus-

tomary passages. The bees at first built on, not perceiving the defect, but soon changed their lines so as to give the proper distance, though they were obliged to curve the combs out of all usual form. Huber then tried the experiment another way. He glazed the floor as well as the roof of the hive. The bees cannot make their work adhere to glass, and they began to build horizontally from side to side; he interposed other plates of glass in different directions, and they curved their combs into the strangest shapes, in order to make them reach the wooden supports. He says that this proceeding denoted more than instinct, as glass was not a substance against which bees could be warned by Nature, and that they changed the direction of the work before reaching the glass, at the distance precisely suitable for making the necessary turns—enlarging the cells on the outer side greatly, and on the inner side diminishing them proportionately. As different insects were working on the different sides, there must have been some means of communicating the proportion to be observed; while the bottom being common to both sets of cells, the difficulty of thus regularly varying their dimensions must have been great indeed. The diameter of the cells also varies according to the grubs to be bred in them. Those for males have the same six sides, with three lozenges at bottom, as those for workers, and the angles are the same; but the diameter of the first is  $3\frac{1}{2}$  lines—that for the workers only  $2\frac{3}{4}$ . When changing from one size to another, they will make several rows of cells intermediate in size, gradually increasing or diminishing, as required. When there is great abundance of honey, they will increase both the diameter and the depth of their cells, which are found sometimes as much as an inch and a half in depth.—*Good Words.*

*The Dove and the Raven.*—The dove is an emblem of a gracious soul, which, finding no rest for its foot, no solid peace or satisfaction in this world, this deluged, defiling world, returns to Christ as to its Ark, as to its Noah. The carnal heart, like the raven, takes up with the world, and feeds on the carrion it finds there; but *return thou to thy rest, O my soul, to thy Noah, so the word is, Ps. cxvi. 7. O that I had wings like a dove, to flee to Him! Ps. lv. 6.* And as Noah put forth his hand, and took the dove, and pulled her in to him, into the ark, so Christ will graciously preserve, and help, and welcome, those that fly to Him for rest. The olive-branch, which was an emblem of peace, was brought, not by the raven, a bird of prey, nor by a gay and proud peacock, but by a mild, patient, humble dove. It is a dove-like disposition that brings into the soul earnestness of rest and joy. Some make these things an allegory. The law was first sent forth like the raven, but brought no tidings of the assuaging of the waters of God's wrath, with which the world of mankind was deluged; therefore, in the fulness of time, God sent forth His Gospel, as the dove, in the likeness of which the Holy Spirit descended, and this presents us with an olive-branch, and brings in a better hope.—*Matthew Henry.*

*Touching Anecdote of a Spider.*—"A fine old English gentleman," (Mr. Moggridge,) with abundant leisure for studies in natural history, has written a very entertaining book on in-

sects, in one chapter of which (as a critic asserts) he "elevates the character of the spider." It is pleasant, at any rate, to know that he has found out enough about the creature's feelings to elevate science in the direction of mercy. The story is briefly as follows: "Mr. Moggridge had been in the habit of immersing for preservation his different specimens of spiders and ants in bottles of alcohol. He saw that they struggled for a few minutes; but he thought that sensation was soon extinguished, and that they were soon free from suffering. On one occasion he wished to preserve a large female spider and twenty-four of her young ones, that he had captured. He put the mother into a bottle of alcohol and saw that, after a few moments, she folded her legs upon her body and was at rest. He then put into the bottle the young ones, who, of course, manifested acute pain. What was his surprise to see the mother rouse herself from her lethargy, dart around to and gather her young ones to her bosom, fold her arms over them, and again relapse into insensibility, until at length death came to her relief, and the limbs, no longer controlled by this maternal instinct, released their grasp and became dead! The effect of the exhibition upon him is a lesson to our common humanity. He has applied chloroform before immersion."

Judging from the above, the spider is certainly superior to the human animal, in the fact that alcohol does not destroy her natural affection.—*Late Paper.*

For "The Friend."

Will the Editors of "The Friend" give this extract a place in their paper? hoping "a word in season" may have its effect with some of our young people.

In early life our ancient friend, Moses Brown, had been a member of the Free Masons Lodge, but left it soon after he was brought under serious convictions, and felt bound to walk consistently with the Gospel of Christ Jesus. He says: "About five years after I left the attendance of the lodge, I became a member of the Society of Friends, whose discipline was and is against the members of our religious Society joining in the meetings or public entertainments of those called Free Masons."

"It has long been known that Friends have been opposed to all oaths, secret combinations, and public parades—well knowing that the vanity and exaltation of the human heart are to be subdued and checked."

*What Railway Dust is Composed of.*—Joseph Sidebotham has made a microscopical examination of dust blown into a railway carriage near Birmingham (England). He says: "I spread a paper on the seat of the carriage, near the open window, and collected the dust that fell upon it. A rough examination of this, with a two-thirds power, showed a large portion of fragments of iron, and, on applying a soft iron needle, I found that many of them were highly magnetic. They were mostly long, thin and straight, the largest being about 1-150th of an inch, and, under the power used, had the appearance of a quantity of old nails. I then, with a magnet, separated the iron from the other particles.

"The weight altogether of the dust collected was 5.7 grains, and the proportion of those particles composed wholly, or in part,

of iron was 2.9 grains, or more than one half. The iron thus separated consisted chiefly of fused particles of dross or burned iron, like linkers; many were more or less spherical, like those brought to our notice by — Daner, from the flue of a furnace, but none so smooth; they were all more or less covered with spikes and excrescences, some having long tails, like the old 'Prince Rupert's drops;' there were also many small, angular particles like cast iron, having crystalline structure.

"The other portion of the dust consisted largely of cinders, some very bright angular fragments of glass or quartz, a few bits of yellow metal, opaque, white, and spherical bodies, grains of sand, a few bits of coal, &c.

"After the examination of this dust, I could easily understand why it had produced such irritation; the number of angular, pointed, and spiked pieces of iron, and the scorie, or linkers, being quite sufficient to account for the unpleasant effect.

"I think it probable that the magnetic strips of iron are laminae from the rails and tires of the wheels, and the other iron particles, portions of fused metal, either from the rail or from the furnace bars. The large proportion of iron found in the dust is probably owing to the metal being heavier than the ordinary dust, and accumulating in cuttings such as those between the two stations named. "If I had to travel much by railway through that district, I should like to wear magnetic railway spectacles, and a magnetic respirator dry weather."—*Late Paper.*

Selected.

#### Four Steps that Lead to Peace.

Be desirous to do the will of another, rather than thine own.

Choose always to have less rather than more.

Wish always and pray, that the will of God may be wholly fulfilled in thee.

Seek always the lowest place, and to be inferior to every one.

#### NATURE'S LESSONS.

There is a lesson in each flower,  
A story in each stream and bower;  
On every herb o'er which we tread  
Are written words which, rightly read,  
Will lead us from earth's fragrant sod,  
To hope and holiness and God.

## THE FRIEND.

TENTH MONTH 18, 1873.

#### OHIO YEARLY MEETING.

The following account of the proceedings of this body has been furnished by a Friend who was in attendance:

Ohio Yearly Meeting convened on Sunday, 9th mo. 29th: the first sitting of the Meeting of Ministers and Elders having been held on Seventh-day previous. The Representatives were all present except one, who was prevented from attending by indisposition.

Minutes transmitted by the Select Meeting on behalf of Clarkon Sheppard, a minister, his companion Joseph Scattergood, and Isaac Morgan, a minister, members of Philadelphia Yearly Meeting, were read, and these Friends were recorded as acceptably in attendance. A proposition was offered by a Friend to appoint a committee to consider the subject of correspondence with other bodies,

and if way should open for it, prepare essays of Epistles to be laid before the Yearly Meeting at a future sitting. In the remarks upon this subject, particular reference was made to Philadelphia Yearly Meeting, but upon solidly considering the subject way did not open to take any step therein at present.

A minute of the Meeting for Sufferings was read, stating that by reason of death and other causes, the Yearly Meeting's representation in that body had become considerably reduced. The subject was referred to the Representatives to propose a suitable number of Friends to be added thereto, to a future sitting.

A committee was named to examine and settle the Treasurer's account, consider of a sum to be raised for the use of the meeting, and propose a Friend to serve as Treasurer the ensuing year.

Third-day, 9th mo. 30th. The Meeting of Ministers and Elders again assembled at 8 o'clock. The General Yearly Meeting met at 11 o'clock. Report was made on behalf of the Representatives that they were united in proposing Wilson Hall as Clerk, and Joseph Branson as assistant, who were approved and appointed. The Queries and answers, as far as the eighth, inclusive, were proceeded with, in the course of which a lively exercise prevailed in reference to several of the important subjects thus brought into notice, and much pertinent and instructive counsel was imparted. A minute expressive of the exercise of the meeting was directed to be prepared and produced at a future sitting.

Fourth-day, 10th mo. 1st. The meeting for worship was held in the morning. In the afternoon the Report of the Boarding School Committee was read: during the winter session this school had been attended by about 58 scholars, and during the summer, 16. The financial statement for the year showed a balance in favor of the school. A proposition was made by the committee that its numbers should be increased by the addition of a few Friends from Iowa, which was referred to the Representatives, to report to a future sitting. A minister from a distance opened a concern to visit the women's meeting, which was accomplished at this sitting.

A report from the Book Committee was read, stating that \$393 had been expended in the purchase of over 700 volumes and about 150 pamphlets relating to the doctrines and testimonies of the Society, for circulation among the members of the Yearly Meeting and others. A number of these had been sold, some gratuitously disposed of, and others loaned. The Committee proposed that an addition of \$150 should be made to the funds in their hands, which was approved. The report was satisfactory, and the Committee was continued and encouraged to prosecute its labors in the dissemination of the approved writings of Friends.

A report from the committee to examine the Treasurer's account was read, proposing that \$400 should be raised for the use of the meeting, the ensuing year.

Fifth-day, 10th mo. 2d. A minute expressing the concern of the meeting on several of the subjects brought before it by the answers to the Queries was read, bringing feelings of tenderness over the meeting, and earnest desires that through the blessing of the Head of the church, the fervent exercise which had been felt on these accounts might extend to the removal of the deficiencies referred to,

and the comfort of their absent members. The minute was directed to be inserted in the extracts to be printed for distribution among the subordinate meetings.

Report was made that most of the Representatives had met, and were united in proposing the addition of several Friends from Iowa upon the Boarding School Committee, who were appointed.

Several Friends were also proposed by the Representatives as an addition to the meeting's representation in the Meeting for Sufferings, who were approved and appointed to that service. The visit of a woman Friend to the men's meeting was performed at this sitting.

Reports from each of the Quarterly Meetings upon the subject of education, were read, showing a total number of 850 children of a suitable age to attend school. Of these 302 had attended Friends' schools exclusively; 390 the district schools exclusively; 91 had attended mixed schools, and 67 had not gone to school the past year. Friends were encouraged to maintain a lively interest in the important subject of the education of the youth in schools under the care of Friends.

The records sent up by the respective Quarterly Meetings, of the members of the Select Meeting deceased during the year, were read. On the conclusion of the business of the men's and women's meetings respectively, the shutters dividing the apartments were raised at the request of a ministering Friend, and after a religious opportunity, the meeting solemnly concluded.

At times during the transaction of its business, and when gathered for the solemn purpose of Divine worship, the overshadowing of Ancient Goodness was felt in a peculiar manner to be near the assembly, contriving, we believe, many hearts into feelings of gratitude for the renewal of the Lord's mercies, and afresh animating them to faithfulness in the support of our christian doctrines and testimonies.

#### SUMMARY OF EVENTS.

FOREIGN.—The London Times says the population of the British possessions beyond the seas, according to official statements, was 202,343,872 in 1871. British India had 190,663,623 inhabitants; Australia, including New Zealand and Tasmania, 1,978,748; Cape of Good Hope and other African settlements, 1,333,564; the West India Islands, 1,062,077; British North America 3,748,857; Mauritius, Hong Kong, Malta, British Guiana and other colonies 3,557,003; total, exclusive of the home population in the British Islands, 202,343,872.

Sir Samuel Baker, the distinguished African explorer, has returned with his wife to England.

A Dublin dispatch says the Irish Agricultural Laborer's Union, in the event of the government failing to settle the question of waste lands in Ireland, have decided to emigrate to the United States en masse.

John Bright has issued an address to his constituents, at Rochdale, proposing himself for re-election. He says the post he has accepted in the government will put it in his power to serve the principles which he has constantly maintained, better than if he remained only a member of Parliament. When unable longer to advance these principles, or perform the duties of the office, he will retire.

An open air demonstration at Cork on the 12th inst., in favor of Fenian amnesty, home rule, and the rights of labor, was attended by 20,000 persons. The proceedings were accompanied with much disorder.

Large shipments of specie from London to New York continued during the week ending the 11th inst.

London, 10th mo. 13th.—Consols 92½ a 92½. On the 13th, three hundred and five thousand pounds sterling in bullion, was withdrawn from the Bank of England for shipment to the U. States.

Liverpool.—Uplands cotton, 9½d. a 9¼d.; Orleans, 9¾d. a 9½d.

Twenty-seven members of the Municipal Council of Paris have published an address in which they declare that the Assembly has no right to alienate the national sovereignty; affirm that a majority of the people reject the claim of the Count de Chambord to the throne of France, and request the deputies from the Department of the Seine to declare frankly how they propose to vote when the question of a change in the government is brought up in the Assembly.

A committee of the monarchical members of the Assembly would meet on the 17th, to receive and consider Count Chambord's final reply, and communicate the result of the deliberations to the bureau of the Assembly.

Elections to fill vacant seats in the Assembly took place the 12th inst. in four departments. Partial returns indicate the success of the Republican candidates. Grey, formerly President of the Assembly, has declared himself in favor of the Republic.

A Paris telegram to the Times states that Thiers intends to advocate the prolongation of the term of MacMahon as President, thus depriving the monarchists of the support of the Left Centre, and probably precipitating the dissolution of the monarchical coalition.

It is reported that when the Assembly is asked to vote in favor of the restoration of the monarchy and the elevation of the Count de Chambord to the throne as King Henry V, Rouher will propose as a substitute that the monarchical principle be established, but that it be left to the country to decide which monarchy is preferred.

Great interest is manifested in the trial of Marshal Bazaine, at Versailles. The accusation charges him with the responsibility for the surrender of Metz, and the loss of the army which was the only hope of the nation. It is alleged that he neglected to give proper information of the situation so that precautions against scarcity of provisions might have been taken, that he failed to destroy the material of war left at Metz, while he was careful to destroy all correspondence which might compromise himself; for receiving in person visits of German officers, and manifesting undue haste to capitulate, having entered into negotiations with Prince Frederick Charles before making an effort to break his lines, &c.

The Republican deputies to the Assembly, on the 13th, waited on Thiers and tendered their congratulations on the result of the recent elections. He expressed his gratification also because it would strengthen the hands of the opponents of the monarchical schemes. The *Journal de Paris*, on the other hand, declares that these elections demonstrate the necessity for the restoration of the monarchy to prevent impending anarchy.

The German Ministers of Commerce and the Interior, have issued instructions to the district authorities to expel all emigration agents who are domiciled in Germany.

The Emperor of Austria will visit the Emperor of Russia at St. Petersburg, near the close of the year.

Madrid dispatches announce the defeat of a large body of Carlists in the province of Navarre. A column of 2000 insurgents made a desperate sortie from Cartagena on the 7th inst., but was driven back with heavy loss in killed and wounded.

A battalion of Greeks having tendered their services in defence of the Republic, President Castelar has addressed them a letter thanking them for their offer, but refusing to accept it.

The insurgent fleet of four war vessels attacked the government squadron, near Cartagena, on the 11th inst. The insurgent vessels were considerably injured and were compelled to return to Cartagena harbor. The inhabitants of the city have been notified that a general bombardment by sea and land will soon take place.

The Mexican Congress has decided on a separation of Church and State; no laws shall be made establishing or prohibiting any religion. Matrimony is to be a civil contract. Religious institutions cannot hold property. A simple promise to speak the truth, with penalties in case of violation, is substituted for the religious oath. The laws do not recognize monastic orders, or permit their establishment under any pretence. The Jesuits have been ordered to leave Mexico at the first opportunity afforded by American, English or French packets. The new constitution, and the reforms proposed by it, are bitterly denounced by the Catholic priesthood, and excommunication is threatened to all persons who recognized the innovations. The President of Mexico has issued a call commanding all officers and employes of the Republic, to affirm, without any reservation, and to guard and cause to be guarded, the additions to the constitution. These things they are required to do, or they cannot continue in their several

charges or employments. These important additions to the constitution were proclaimed on the 25th ult.

The great storm of 8th mo. 24th and 25th, off the coasts of Newfoundland and Nova Scotia, and in the Gulf of St. Lawrence, destroyed 1122 vessels, 435 of which were small fishing schooners. The estimated number of lives lost at sea and on land by this terrible storm, is about six hundred. The New England fishing interests have suffered heavy losses.

UNITED STATES.—The interments in Philadelphia last week numbered 263. There were 39 deaths of consumption, 19 debility, 13 convulsions, 11 apoplexy, 10 marasmus.

New York had 452 deaths last week.

Shreveport, Louisiana, has been almost depopulated by yellow fever. The disease is also making terrible ravages in Memphis, Tennessee.

According to a recent official statement, the debt of the city and county of New York amounts to \$136,208,961, with a sinking fund of \$23,238,612.

The question of annexation was voted on in Boston and the adjacent towns of Charlestown, Brighton and West Roxbury, last week, and it was decided that these suburban towns should be added to Boston, thus giving it a population of over 300,000.

The manufacture of beet sugar promises to be successful in California. It is stated that the factory in Sacramento will make this year 8000 barrels of sugar, valued at over \$200,000.

The exports of produce from New York have been heavy for several weeks past. In the week ending the 10th inst. they amounted to \$8,378,130, and in the two previous weeks about \$13,000,000.

The petroleum trade of this year shows a large increase over 1872. During the nine months ending 9th mo. 30th, 97,535,987 gallons were exported. The daily production is estimated at from 26,000 to 27,000 barrels.

The business of the Pennsylvania railroad during the Ninth month was unprecedentedly large. The number of cars which arrived at the Philadelphia depot was 65,310, requiring 114 daily freight trains. Forty-two passenger trains also arrived and left the depot every day, giving an aggregate of 156 daily trains. In 1872 only 77 daily freight trains were required for its business.

The valuation of the taxable property of St. Louis for the current year consists of real estate \$166,963,230, and personal \$33,548,260. The taxes amount to \$4,977,803.

The Markets, &c.—The following were the quotations on the 13th inst. *New York*.—American gold, 108½. U. S. sixes, 1881, 114¼; ditto, 1865, 110; ditto, 1862, 106½; 10-40, 5 per cents, 106½. Superfine flour, \$5.40 a \$6; State extra, \$6.35 a \$6.70; finer brands, \$7 a \$10.50. Red western wheat, \$1.54; No. 1 Chicago spring, \$1.40; No. 2 do., \$1.32 a \$1.35; No. 3 do., \$1.30. West Canada barley, \$1.75. Oats, 48 a 54 cts. Western mixed corn, 59 a 60 cts.; yellow, 62 a 62½ cts. *Philadelphia*.—Middings cotton, 18 a 19½ cts. for uplands and New Orleans. Superfine flour, \$4 a \$4.75; extras, \$5 a \$6.25; finer brands, \$7 a \$10. White wheat, \$1.70 a \$1.80; amber, \$1.65; red, \$1.50 a \$1.55. Rye, 95 cts. Yellow corn, 65 cts. Oats, 49 a 54 cts. Hams, 14 a 16 cts. Lard, 8½ a 8½ cts. Cloverseed, 9½ a 10 cts. Beef cattle dull. About 3900 head were sold at 6¾ a 7¼ cts. per lb. gross for extra, 5½ a 6½ cts. for fair to good and 4 a 5 cts. per lb. for common. About 12,000 sheep sold at 5 a 6½ cts. per lb. gross, and 8,000 hogs at \$7 a \$7.25 per 100 lb. net. *Chicago*.—No. 1 spring wheat, \$1.06½ a \$1.07; No. 2 do., \$1.01 a \$1.02; No. 3 do., 95 cts. No. 2 mixed corn, 36½ cts. Oats, 32 cts. Lard, 7½ a 7½ cts. *St. Louis*.—No. 2 winter red wheat, \$1.55; No. 3 fall red, \$1.33; No. 2 spring, 98½ cts. No. 2 mixed corn, 44 cts. Oats, 35 cts.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

#### NOTICE.

The Annual Meeting of the Auxiliary Bible Association of Friends of Philadelphia Quarterly Meeting, will be held at No. 109 North Tenth Street, on Fourth-day evening, the 29th inst., at 7½ o'clock.

A. M. KIMBER,

Philada. 10th mo. 10th, 1873.

Secretary.

#### WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of the Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to AARON SHARPLESS, SUP'T, Street Road P. O. Chester Co., Pa., or to CHARLES J. ALLEN, Treasurer, 304 Arch St., Philadelphia.

DIED, at the Presbyterian Hospital in New York, on the 14th of 6th month, 1873, AMOS W. FOSTER, of Westerly R. I., son of Thomas and Phebe Foster, age 31 years. Having undergone a surgical operation for aneurism, which proved unsuccessful, it was found necessary to amputate his leg. Long continued suffering having prostrated his strength and secondary hemorrhage coming on, he did not long survive. He had manifested great integrity from early life, and had of times evinced deep religious feeling. After the first operation, feeling that his recovery was doubtful, he became deeply concerned for the salvation of his soul expressing his regret that he had not been more faithful to the requirements of the Saviour as revealed by his Spirit in the heart, saying it would be but just if he was cast off forever. The conviction that he had sometimes shunned the cross in regard to dress and address brought much distress and conflict, and he remarked, "If I recover I must wear the plainest of clothes and use the plainest of language, and perhaps bear the scot of men." On one occasion he said to his wife, "I struggled last night for two or three hours beseeching the Lord Jesus that He would once more have pity on me not for health or even life; but for his invincible arm of power to be round about me. And how earnestly did I crave that my will might be broken, and that might be just what He would have me to be." After this, his deeply penitent soul found forgiveness, and he patiently waited for the Lord to direct the event. Another time he said, "It seems to me if the earth ever needed shaking it is at the present time. I have thought since lying here, how many pursue with eagerness their business or pleasure, with scarcely a thought of their salvation, or of their awfully responsible duty to God and their fellow creatures." Again he repeated, with much feeling "Strait is the gate and narrow is the way which leadeth unto life, and few there be that find it." He sent messages of love to all his young friends at home, and expressed his concern for their spiritual welfare, but that he was fearful some of them would not bear the cross and despise the shame as becometh a christian. He was frequently engaged in prayer not only for himself but for his dear wife, encouraging her to frequent, fervent prayer for herself, and earnestly enjoying on her to bring up the son "strictly to fear the Lord," "begin early and teach him in a way that he will not think it is all outward make him feel that it is really inward, in his heart. He frequently spoke of his own dear home, and said he would have preferred to die there, but had no will of his own; adding, "if he felt an assurance of being accepted in the Beloved, it mattered not where or when. After the secondary hemorrhage commenced he ejaculated, "Lord Jesus receive my spirit." "I long to depart and be with Jesus." He passed away without struggle, and, as we reverently believe to the mansion of rest and peace.

—, near Gordonsville, Va., 8th mo. 19th, 1873, SAMUEL W. SMEDLEY, a member of the Monthly Meeting of Friends of Philadelphia for the Northern District, in the 43d year of his age. Having, in his early life, been drawn from the path of self-denial, he passed through much suffering and distress of mind on account thereof. He was humbled and contrited under a sense of his transgressions, and as the end drew near, was earnestly concerned to know the work of regeneration to be accomplished: saying that he could not be satisfied with the doctrine of some who say: "Only believe and the work is done for us." His friends have a comforting belief, that through the mercy of God Christ Jesus, his sins were washed away, and an admittance granted among the redeemed of all generations.

—, on the 29th of Ninth month, 1873, BENJAMIN LOWRY, in the 64th year of his age, a member of the Monthly Meeting of Friends of Philadelphia. "Blessed are those servants whom the Lord, when He cometh shall find watching."

Ask for the Old Paths, and Walk Therein.

The following are extracts from Annual Epistles of London Yearly Meeting, at a period when the good old principles and testimonies of the Society were precious, and inculcated with care. Alas, for the change after that day! It almost makes one's heart sick to retrospect the more recent past, in view of the refining upon, and the remodeling of the ancient practices and doctrines which has obtained there, and which, as woe exceeds woe, is still lamentably going on. Ever since the creeping in of degeneracy—the beginning of the revolutionary wave—with such determinateness of purpose have some sought to throw overboard one testimony after another, that we feel almost safe in saying, that fewer steps remain than those already taken, to bring our Society there back to the bondage which our early Friends came out from.

Amid all this, it is gratifying to see that some in that Yearly Meeting are brought under painful apprehensions, with sorrow and offering on these accounts. May such in that land, with an afflicted remnant in this, seek to dwell near to the unfailling Source of everlasting strength, and with earnest, prayerful application of soul, beseech Him, who is still among this people and is mighty to deliver, that He would yet spare and pity; that He would again turn our captivity; that He would restore judges as at the first, and counsellors as at the beginning; and more and more magnify his name and kingdom in the earth.

1715. "There still remains a weighty concern upon us, for the whole church to labor and travail in deep humility, self-denial, and fervent supplication to the God and Father of all our mercies, that we be at peace among ourselves, and follow those things which make for peace and concord in all the churches of Christ; whereby we may enjoy consolation in Him, and the comfort of true love. For this we should be very watchful against the contrary spirit and work of division, that there may not be any breach, schism, or discord amongst us. The Lord is one; and his name, power and spirit one; and he hath called us to be one, in unity, in principle, and in practice. Let us

all, therefore, diligently follow and pursue the same, according to the degrees of that divine grace, wisdom and understanding given us of God, through the dear Son of his love, Jesus Christ, our only Mediator. And let us all diligently receive into our hearts, to us the divine light and spirit, wherein Satan (the adversary, the devil, the murderer and divider) hath no place; that the power of Christ Jesus, in whom the prince of the world hath nothing, may reign over all forever; to whose name and power every knee must bow, and tongue confess. We pray God that Friends every where may truly reverence his name and power, and be mindful of his kingdom and government over all."

"The sufferings of Friends, brought in this year from England and Wales, amount to four thousand nine hundred pounds and upwards for tithes, and these called church rates, &c. But chiefly on account of the former.

"We understand also, that although since last Yearly Meeting nine Friends have been discharged from imprisonment, there yet remain nine other prisoners in divers parts of England, mostly on account of tithes; and one Friend hath died a prisoner.\*

"A tender concern being upon the spirits of many brethren, for the keeping up *our ancient testimonies in the truth* against pride, and the vain fashions and customs of the world; it is desired and advised, that Friends in all places (in the wisdom of God) endeavor to train up their children in the fear of the Lord, and be good examples to them, in keeping to the cross of Christ, both in plainness of habit and speech; and that none do countenance or connive at them, in going from *the ancient simplicity* of the Truth, in which we have appeared as a people called of God, to hear testimony to his name; nor *make light of those testimonies*, which by our ancient Friends (who trod the way before us) were borne through great perils and dangers, to the hazarding the lives and estates of many; the weight of whose exercises remains fresh upon the minds of a remnant, to the stirring up of a godly zeal in them against all false liberty, and sinful ease in the flesh, which is *too apt* to grow up among some professing the same Truth with us, in this our day, for want of *due watchfulness and obedience to the light of Christ, and keeping low and humble before the Lord*; by reason whereof, many evils got in amongst us; viz: Pride of apparel; making of mixed marriages with persons of contrary judgment; bowing, and giving flattering titles to men; the saying of ye or you, to a single person; and calling the days of the week, and the months, by heathen names, to the declining of Truth's testimony, and giving occasion of stumbling to such as are seeking after the knowledge of the same, as it is in Jesus. *These things* are cause of

\* It will be seen by this—and similar records are not infrequent—that Friends in the early day suffered for *this christian testimony* even unto death.

sorrow of heart and trouble to the Israel of God; yea, cause of great mourning; and call for *humiliation and amendment* in the camp of God; that every evil and hurtful thing being cast out, *we may stand vigilantly* against all snares and temptations; that the blessing of God, in which there is no sorrow, may rest upon and abound in the whole church of Christ.

"And that our children may be preserved from the wiles of Satan, as much as in us lies, let a godly care and concern be upon the minds of all parents to *watch over them, with supplications to the Lord*, that they be not drawn away from the innocency, simplicity and plainness of the way of Truth; and labor, *in a sense of Truth*, to reach the witness in them, that they may feel in their own spirits a degree of fear and reverence towards God; and instruct them to follow his counsel, and obey his voice; as the tribes of Israel were required of God to teach his precepts diligently unto their children. Deut. vi. 7. So be you concerned to acquaint them how the Lord led you from one degree of faithfulness to another, in a denial of the world's corrupt ways, language and customs; which while we (in disobedience to him) walked in, we could not enjoy true peace: but as we bore the cross, and bowed to his will, we had an evidence of acceptance with him. And be careful that none of you, by a neglect herein, become examples unto them to depart from the Scripture language, wherein is true propriety of speech."

1728. "At this time, as at several other times in former years, it hath been the concern of this meeting to advise upon particular occasions, and in particular cases; which occasions could not offer themselves in this manner, if all Friends, who make profession of the holy Truth with us, did *duly regard* the teachings of the grace of God in themselves, and obey the advice of that wonderful Counsellor; because it is most certain, that all those who do or shall attend to the teachings and counsel of the Holy Spirit of God, will find cause to say, with the Psalmist, "Thy commandment is exceeding broad;" for by it all may be sufficiently instructed, and prepared to every good work.

Finally, dear Friends, *our beginning was in the Spirit*, and our comfortable fellowship is under the holy influences of it; therefore let all be diligent in waiting on God for *the renewings thereof*, and watching in it, whereby the snares of the evil one may be seen and avoided, and we *continue a people*, to the praise of His name, who hath called us out of darkness into his marvellous light, and *therein* shine, as his children before the world. And we earnestly pray the Father of all our mercies may keep you blameless unto the day of the coming of his Son, our Lord Jesus Christ; in the fellowship of whose Spirit we salute you, and remain your friends and brethren."

For "The Friend."

## The Isles of Shoals.

This small group of barren islands, off the coast of New Hampshire, which for several years past has been a place of much resort during the summer months on account of its singularly equable and bracing climate, is the subject of an historical sketch by J. S. Jenness, lately published, some portions of which seem of more than local interest. These rocky islets, now nearly uninhabited, are shown to have been at one time of considerable importance during the early settlement of New England. The following passages are extracted: "The islands are not, in themselves, more New England coast. They are <sup>but</sup> stacks of bulging granite, weather-bleached, tossed over with boulders of all sizes, ragged and torn on the edges where they confront the ocean, and everywhere of a broken, irregular surface. No smooth ground is upon them, except a few acres of mowing land on Haley's, and a few vegetable gardens upon Star. They are wholly destitute of trees, and even of shrubs, except huckleberry and bayberry bushes, woodbines, wildroses, and such like, wherever in the crevices of the rocks the shallow roots have found a handful of soil. Moreover, this dearth of vegetable life is naturally accompanied by a scarcity of animal life. Land animals are rarely seen; singing birds find little here to attract their stay. The stillness of the islands, in calm weather, is profound; their barrenness absolute.

"The reason of the preference these bare Islets have acquired as a 'watering place,' is not, however, far to seek. It is to be found chiefly in their climate.

"The easterly winds that sweep landward over New England, are caught in the north by the long coast of Acadia and Maine, and emptied into Casco Bay; while, on the south, the projecting arms of Cape Cod and Cape Ann gather them up and pour them into the 'Bay of the Massachusetts.' Thence come the cheerless fogs, and mists, and soaking rains, which visit so frequently the region of Boston and Portland, while, at the same time, the shores of New Hampshire, at an equal distance between these cities, rejoice in clear skies and gentle breezes. Impressed with the importance of this circumstance, we have taken pains to collate such meteorological observations at those three points as were accessible. The result show a wider discrepancy than we had suspected.

"According to the careful observations taken by the officers of the Medical department of the army, at Fort Preble in Portland Harbor, Fort Constitution at Newcastle, and Fort Independence at Boston, during the period from 1831 to 1843, it turns out, that while there are during the year, on the average, fifty-eight rainy days at Portland, and nearly fifty-eight at Boston, there are but twenty-five at the Piscataqua. The mean annual rain-fall at Portland is thirty-seven inches, at Boston forty-two inches, and at Portsmouth but thirty inches. On the other hand, while the average temperature of the summer months is at Portland 66° Fahr., and at Boston 68°, that of Portsmouth is but 63°. The mean annual range of temperature at Fort Preble is 100.66° Fahr., at Fort Independence in Boston 96.75°, at Portsmouth 92.20°; the bleak easterly winds blow on the

average at Portland 86 days in the year, at Boston 118 days, at Portsmouth but 81 days.

"The Isles of Shoals thus depend very largely upon the exceptional beauty of their summer climate for their charm. Seated within dim view of the mainland, the summer winds from all quarters are tempered and refreshed by the wide expanse of ocean around them; the thermometer is singularly steady; sudden changes are rare; the skies are clear; the sea is blue and bright; pleasant breezes cool the blood and brace the nerves, and sleep is relaxed and soothed by the perpetual splash of a slumberous ocean. Sometimes, indeed, the tempest rises in its wrath and awakes old ocean from its repose, and then, for a space, this fierce mood is not the habitual temper of the place during the summer months.

"The Isles of Shoals played a more important part in the early history of New England, than the general reader would probably imagine. Long before the landing of the Pilgrim Fathers, these barren rocks were visited and described by the French and English navigators, and were the annual resort of fishermen from Virginia and maritime Europe. Indeed, when we consider that during the entire sixteenth century, fleets of fishing vessels yearly visited our eastern waters, we are justified in conjecturing, that for many lustres of years anterior to the settlement of New England, the commodiousness of the Isles of Shoals for the prosecution of the fisheries must have, summer after summer, attracted thither the Doggers and Pinckes of the English; the clumsy Busses of Holland and Zealand, the light Fly-Boats of Flanders, the Biskiner, and the Portingal, and many another of those odd high-peaked vessels, whose models seem so quaint, and whose rig is so incomprehensible to us of the present day."

In 1614 these islands were visited and named by Captain John Smith, of early Virginia history, who "came out in command of two London ships upon a fishing and trading voyage;" "ranged the whole New England coast as far as Cape Cod, and trucked successfully with the natives for peltries."

Shortly after his arrival in England, he published his interesting account of our coast, which, by the leave of Prince Charles, he named New England. "Among the remarkable Isles and mountains for landmarks," writes Capt. Smith in his description of New England, "are Smith's Isles, a heape together, none neare them, against Accominticus."

In 1623 the group was described by a Capt. Levett, as follows: "The first place I set my foot upon in New England was the Isles of Shoals, being islands in the sea, about two leagues from the main.

"Upon these islands I neither could see one good timber tree, nor so much ground as to make a garden.

"The place is found to be a good fishing place for six ships, but more cannot well be there, for want of convenient stage room, as this year's experience hath proved.

"The harbor is but indifferent good. Upon these islands are no savages at all."

"Captain Levett's brief description of the Shoals illustrates the importance of that station, even so early as 1623. When we consider, that each of the six fishing vessels at the Islands, while he was there, carried at least fifty men, as he informs us was the custom, and that the shores were inconveniently

crowded with fishing stages, we perceive that even before the first settlement of the mainland, our group of Islets was already the scene of a busier activity, than any other spot in New England, north of New Plymouth.

"It was the usual course of the fishery, in those days, for about one-third of each crew to live ashore, and attend to the drying and curing of the catch, while the remainder, in their pinnae and shallops, cruised about the neighboring ocean in quest of mackerel or cod. Shelter for the large number of shoremen of these six ships would, of course, be essential, and numerous cabins, however rude, must have already been built for their accommodation.

"The 'fishing stages,' which Capt. Levett speaks of, were floating platforms, projecting from the margin of the Islands into the water of the harbor, and the rocks at the shore end were roofed over by an open shed, used for the splitting and salting of the fish, which were afterwards dried upon the flakes in the rear. These structures which are still used in Newfoundland, were somewhat expensive and convenient stage-rooms for their erection upon the generally steep shores of the Islands was difficult to obtain. For many years, on this account, the stage-room and fishing stage formed the most valued part of the islander property. The circumstance that the harbor was inconveniently crowded with stages at the time of Captain Levett's visit, conveys a lively idea of the extent of business already transacted there.

"In addition to all these advantages for the fisheries, the Isles of Shoals enjoyed in the climate a very marked advantage over other parts of the New England coast, in the curing of their fish for the market. The dryness and salubrity of their atmosphere, to which we have referred, enabled the fishermen to prepare by a process of alternate drying and sweating, without salt, the famous *dun* or *dumb* fish, which could not be rivalled elsewhere. The market price of these fish was three or four times that of the Poor John at Haberdine, made at Newfoundland. With the present century, we find the Labrador cod selling in our market at \$2.40 per quintal, while the Shoals-cured *dun* fish brought \$8.00 per quintal."

"Among those who visited the Shoals in this early period must not be forgotten the great name of Richard Mather, the founder and progenitor of that '*decemvirate*' of Mathers, who exercised such an important influence over the early history of New England.

"Richard Mather writes, in the diary of his voyage to New England, under date of August 14, 1635:—

"This evening by moonlight, about ten o'clock, we came to anchor at the Isles of Shoals, which are seven or eight islands at other great rocks, and there slept sweetly this night, until break of day."

"In the morning, however, one of the most terrible easterly storms broke on the sea that has ever been known in New England. 'Whereby,' continues Richard, 'we were as much danger as I think ever people were. For we lost in that morning three great anchors, and cables; of which cables, one, being cost £50, never had been in any way before; two were broken by the violence of the waves, and the third cut by the seam in extremity and distress, to save the ship and their and our lives. And when our cables

nd anchors were all lost, we had no outward means of deliverance, but by loosing sail, if so we might get to the sea from amongst the islands and rocks where we anchored. But the Lord let us see that our sails could not save us neither; no more than our cables and anchors. For, by the force of the wind and rain, the sails were rent in sunder and split in pieces, as if they had been but rotten rags, so that of the foresail and spritsail there was scarce left so much as a hand breadth that was not rent in pieces and blown away into the sea. So that at this time, all hope that we should be saved, in regard of any outward appearance, was utterly taken away; and rather because we seemed to drive with full force of wind and rain directly upon a mighty rock, standing out in sight above the water; so that we did but continually wait, when we should hear and feel the doleful rushing and crashing of the ship upon the rock. In this extremity and appearance of death, as distress and destruction would suffer us, we cried unto the Lord, and he was pleased to have compassion and pity upon us; for by his overruling Providence and his own immediate good hand, he guided the ship past the rock, assuaged the violence of the sea and of the winds and the rain, and gave us a little respite to fit the ship with other sails and sent us a fresh gale of wind, by which we went on that day toward Cape Ann. It was a day much to be remembered, because on that day the Lord granted us as wonderful a deliverance, as I think ever people had, out of as apparent danger, as I think ever people felt. I am sure our seamen confessed they never knew the like. The Lord so imprint the memory of it on our hearts, that we may be better for it, and be more careful to please him, and to walk uprightly before him, as long as we live; and I hope we shall not forget the passages of that morning until our dying day.

"The mighty rock," past which the immediate good hand of Providence guided the James of Bristol on this fearful morning was probably White Island, the westernmost of the Isles of Shoals.

"The three great anchors, which Mather's ship then lost, still lie, no doubt, beneath the waters of the Shoals harbor; most interesting relics, could they be recovered, of the first generation of our Puritan Fathers, and particularly of one of the greatest families among them.

"The tempest in which she was caught was, perhaps, the most furious that ever visited these exposed Islands. Nearly all the contemporaneous writers of New England describe its violence with dismay. Says Morton, who witnessed it at New Plymouth: 'It was such a mighty storm of wind and rain, as none now living in these parts, either English or Indian, had seen the like, being like unto those hurricanes or tuffins that writers mention to be in the Indies. It began in the morning a little before day, and grew not by degrees, but came with great violence in the beginning, to the great amazement of many; it blew down sundry houses and uncovered divers others; many vessels were lost at sea in it, and many more in extreme danger. It caused the sea to swell in some places to the southward of Plymouth, as that it rose to twenty feet right up and down, and made many of the Indians to climb into trees for safety. It blew down many hundred thousands of trees, turning up the stronger by the

roots, and breaking the high pine trees and such like in the midst, and the tall young oak and walnut trees of good bigness were wound as withes by it, very strange and fearful to behold; the marks of it will remain this many years in those parts where it was forest. The moon suffered a great eclipse two nights after it.'

"Winthrop adds, that such was the violence of the tempest at sea, that in Boston harbor there were two flood tides within two hours of each other."

The golden age of the Isles of Shoals, was the middle of the seventeenth century. "Their population was at that time larger than at any other point in the Eastern provinces; trade and commerce were extensive; the fisheries were pursued with activity; the little harbor was filled with shallops and pinnaces; the neighboring sea was dotted with sails, sweeping in and out; the rocks now so silent and deserted, resounded with clamor and bustled with business,—everywhere boisterous hilarity, animal enjoyment, exuberant spirits, cheerful and varied activity.

"It was a motly population, with all the reckless and improvident habits of sailors and fishermen, and with all their hardihood, courage and spirit of adventure—a dauntless race, accustomed to contend against the most tremendous and appalling forces of Nature, when to quail or to tremble was to be lost. Their 'fearful trade' taught them such lifelong lessons of self-reliance, as almost to obliterate from their minds the very sense of Divine protection and aid."

"Neither was the shifting, heterogeneous character of the population conducive to sobriety or stability. These barren rocks were the resort of the Letter of Marque, and the pirate, who in early days infested the gulf of Maine; of the whaler and seal hunter, and of many a refugee and runagate from the old world. Cavaliers, on the downfall of the royal cause, may have here found convenient hiding; and perhaps some ship of Prince Rupert's fleet, scattered and broken in West India waters, may have here, among sympathizing friends, found refuge and means to refit.

"It must needs have been a picturesque spot in those early times. In the sunny summer days, when the wind failed, great hulking fishermen, in red Monmouth caps, leathern jerkins and clumsy boots, lolling listlessly about the rocks, smoking Brazil tobacco, and waiting patiently for a breeze—fishwives garrulously mending nets in the sun—ragged urchins at their boisterous games up and down the lanes of the hamlet—groups of idlers hanging around the ordinaries and ale houses—long flakes spread with drying fish—the harbor dotted with ketches and pinnaces at anchor—the smoking cottage chimneys—the glittering sea—the distant coast line dozing in a blue haze.

"By-and-by the blue catspaws are seen on the ocean, the breeze freshens, and within a half hour the whole scene changes. Away to the east and north the vessels scatter and disappear. Hardly an able bodied man is left on the Islands. The settlements are left in guard of women. Silence settles down on the rocks, broken only by shrill voices, or the occasional yelp of some village cur. The Islands await in silence the fishermen's return.

"As the twilight comes on, the fishing boats, one by one, come winging home. The

wind has hauled out to the eastward, a fog rolls in behind them, the weather looks threatening. And now many a Bylander, caught creeping along the neighboring coasts, shallops, pinnaces, ketches and fleets of fishing craft of every kind, scud into the harbor for a night's refuge; and it is not long before the silent rocks resound with revelry."

"But now nothing except the tumbled walls of a ruined and abandoned hamlet, so rare to see in New England, remain to attest the former existence upon these celebrated Islets, of the busy and boisterous settlement we have pictured. With the decline of the fisheries, the population have departed, and the seamews, after an absence of two centuries, have returned to their ancient haunts.

"'A heape of rocks' was the first English description of the Isles of Shoals—'a heap of crags,' strangely enough, is also the last. In the fine language of Lowell:—

"A heap of bare and splintery crags,  
Tumbled about by lightning and frost,  
With rifts, and chasms, and storm-bleached jags,  
That wait and growl for a ship to be lost.  
No island; but rather the skeleton  
Of a wrecked and vengeance-smitten one."

For "The Friend."

In one of John Newton's autumnal excursions, he paid a visit to Hannah More, at her cottage at Cowslip Green; and on her recovery from a severe attack of illness in 1799, he addressed her the following letter:

Pottswold Green, Sept. 1799.

"My Dear Madam:—I wrote a few lines when you were at Clapham, to tell you that I sympathized with you in your illness, and prayed for your recovery. Many prayers were doubtless offered for you, and the Lord heard and answered them. But before I knew whether you were so far recovered as to bear a visit from me, I heard that you had removed to Fulham. Thus I missed the pleasure of seeing you, and shall probably see you no more in this world. For though I thank the Lord, my health and spirits are still good, I entered my seventy-fifth year almost a month ago; and I feel that the shadows of the evening are coming over me. However, I would be thankful that I ever saw you; and especially that I had the privilege of seeing you at Cowslip Green: I number that among the happiest days of my life. The recollection of it will be pleasant, while I retain my memory; and ere long I hope we shall meet before the throne, and join in unceasing songs of praise to Him who loved us. There our joys will be unclouded, without interruption, abatement, or end! *Opranclarum diem!*

"If old age gives me a prospect of death—sickness, like telescope, often presents a clearer view; whilst it is, as I hope, with you, as yet at a distance. Perhaps when you were ill you could perceive the objects within the veil, beyond this visible diurnal sphere, more distinctly than at other times. I have known but little of sickness of late years. I attempt to look through the telescope of faith, which gives reality and substance to things not seen, but the glasses are cloudy, and my hands shake, so that I can obtain but very imperfect and transient glances; but a glance into the heavenly state is worth all that can be seen here below in the course of a long life.

"If the Lord be with us (as He has promised that He will) in the approaching transition, we may go forward without fear. Guilt and ignorance have personified death; they repre-

sent him with frowns on his brow, and darts in his hand. But what is death to a believer in Jesus? It is simply a ceasing to breathe. If we are personified we may welcome it as a messenger sent to tell us that the days of our mourning are ended and to open to us the gate into everlasting life. The harbingers of death,—sickness, pain and conflict,—are frequently formidable to the flesh, but death itself is nothing else than a deliverance from them all.

"The apostle calls the body a tabernacle or tent; when a tent is taken down, the removal of the boards or curtains will let in light quite new and different from what was seen before. Mr. Walker has borrowed this thought

'The soul's dark cottage, battered and decayed,  
Lets in new light through chinks that time has made.'

We are surrounded with a great cloud of witnesses, and though we cannot see them, I believe they see us. Before the moment of death, great discoveries are often made, and both the pious and the profane have strong intimations where they are going, and with what company they will soon mingle. I have seen many instances of this; my dear Eliza was a remarkable one. Her animated language and joyful expectations could not be the result of long experience, for she was a child, and I believe her knowledge of the Lord and His salvation was not a year old; yet while the tent was taking down, she appeared to see invisibles, and to hear unutterables. She certainly had ideas which she could find no words to express. How wonderful will the moment after death be! how we shall see without eyes, hear without ears, and praise without a tongue, we cannot at present conceive. We now use the word *intuition*—then we shall know the meaning of it. But we are assured that they who love and trust the Saviour shall see Him as He is, and be like Him and with Him. And He has promised us dying strength for the dying hour. Let this suffice—faithful is He that has promised, who also will do it.

"We left London on the 19th of July—were one week at Reading, and have been here since the 19th. Our retreat has been very pleasant, with Friends whom we dearly love, and I am an enthusiast for the country. I have not, indeed, dear Cowper's discriminating eye to contemplate the miniature beauties, but I am much affected with the *tout ensemble*. Here we have hills and dales, woods, lawns, and rivers; the music of the winds whistling in the trees, and the birds singing in the bushes. All is delightful. My post at St. Mary's, in the midst of noise and smoke, is very different; but still it is my post, and I would not change it for any spot in the habitable globe.

"I pray the Lord to afford you a comfortable measure of health, to crown all your labors of love in His service with increasing success, and to bless you in your soul with abounding grace and peace.

"I am your affectionate and much obliged  
"JOHN NEWTON."

Whatever bustlings and trouble, tumults and outrages, quarrels and strife arise in the world, keep out of them all; concern not yourselves with them; but keep in the Lord's power, and peaceable truth, that is over all such things; in which power ye seek the peace and good of all men.—*George Fox.*

*Indian Roads and Canals.*—The material development of India has gone forward with great rapidity within the last quarter of a century, more especially since it came directly under the control of the home government. One of the first enterprises undertaken was the construction of public roads. As the military and civil power of the English became more extended, it was found necessary to have better modes of transportation, and the old East India Company undertook the construction of carriage roads over the country. The work was vigorously prosecuted and at great expense. The Grand Trunk Road extends from Calcutta to Peshawur, on the borders of Afghanistan, a distance of 1400 miles. These roads are no insignificant works. They are laid out by the best engineering skill, and executed in the most substantial manner. For more than a thousand miles from Calcutta northward, no grading was required, excepting in very short distances, but further north the work was heavy. From Labon to Peshawur, a distance of a little more than 250 miles, the road passes over 103 large bridges and 459 smaller ones, through six mountainous chains, and over immense embankments on the marshy borders of rivers. There are branch roads over the Seaulic range of the Himalayas, in Bengal and the Punjab, some of which are admirable specimens of engineering and grading, the surface being as smooth as the roads of England or of France. The soil itself furnishes the material for their construction. Through a great part of the plains of India, small nodules of limestone, called *kunku*, are found in large quantities a foot or two below the surface. It looks, when taken from the ground, as if it might have been broken up for making a Macadam road. When packed with the soil, and watered, it forms a concrete, making a hard road-bed as smooth as it is durable. There are several thousand miles of these Macadam roads, frequently shaded with trees on either side to protect travellers from the rays of the sun.

A work of still greater importance to India has been the opening of extensive canals, designed not so much for transportation as irrigation. The rains are very unequally distributed over the country; they are not altogether equal in amount from year to year, in the same locality, and the seasons are so uniformly divided into rainy and dry, that the crops frequently suffer, and the people in consequence, for the want of natural irrigation. Under the old Mogul emperors extensive canals were dug for the purpose of watering the plains, but the East India Company had been long established before any systematic attempt was made to supply the deficiency. In the mean time great scarcity of rain, and floods in other seasons, had brought on destructive famines, which more than decimated the population in large districts. The distress and loss of life were fearful. This suffering stimulated the government, though but too tardily, to provide against such calamities by an extensive system of irrigation. The Ganges Canal, the chief work of this nature, reaching from Hurdwar, near the sources of the river, to Cawnpore, where it re-enters 810 miles in length including its main branches, was an immense undertaking, but it has been a great benefit to the country. The main canal is 150 feet wide, is the channel of a rapid stream, and in its course crosses the Solani River by what is said to be the most magnificent aque-

duct in the world. This structure alone cost a million and a half of dollars. The Bari Doab Canal, between the Sutlej and the Ravi, nearly 500 miles in extent, cost the government more than seven millions of dollars. The Ganges Canal alone irrigates a million and a half of acres, and is not only a great public benefit, but a source of large profit to the government.—*Prime.*

#### THE LOWEST PLACE.

Selected.

Not that I may be chiefest, Lord,  
But that I may obey  
More closely Thy most sweet commands,  
Teach me to serve, I pray.

Not that I may be honored more  
Who am indeed the least,  
I would the lowest place like one  
Grace bidden to the feast;

But that Thy smile, my blessed Lord,  
Might reach that lowest place,  
And show me, though the last and least,  
The fulness of that grace.

#### TWILIGHT.

Selected.

Pale Memory's favored child thou art,  
And many dreams are thine;  
With their existence all the past  
Returning seems to twine.

Thou bringest to the souls bereaved  
The look and tone they miss;  
Thou callest from another world  
The best beloved of this.

Thou comest like a veiled nun,  
With footsteps sad and slow;  
Thou summonest the solemn prayer  
From heart and lips to flow.

Jane Worthington.

#### IMPERISHABLE.

Selected.

The pure, the bright, the beautiful,  
That stir'd our hearts in youth,  
The impulse to a wordless prayer,  
The dreams of love and truth,  
The longings after something lost,  
The spirit's yearning cry,  
The strivings after better hopes,—  
These things can never die.

The timid hand stretch'd forth to aid  
A brother in his need,  
The kindly word in grief's dark hour  
That proves the friend indeed,  
The plea for mercy, softly breathed,  
When justice threatens nigh,  
The sorrow of a contrite heart,—  
These things shall never die.

All the Year Round..

At a Meeting of the Executive Board of the Friends' Freedmen's Association, held in Philadelphia, 10th mo. 14th, 1873, it appeared from the Treasurer's report that the funds of the Association were entirely exhausted, and money is needed at once for the support of the 17 schools under their care.

It was therefore resolved, that those interested in the welfare of the Freedmen be informed immediately of the state of our Treasury, and be earnestly invited to forward contributions to our Treasurer, RICHARD CADBURY, care Provident Life and Trust Co., 108 South Fourth St., Philadelphia.

On behalf of the Board,

MARMADUKE C. COPE,  
BENJAMIN COATES.

Attest Jno. B. Wood, *Secretary.*

As a wise child maketh a happy father, so  
a wise father maketh a happy child.

Review of the Weather for Ninth month, 1873.

We have just passed the first autumn month, and an unusually pleasant one it has been; the rainfall, which amounted to 5.36 inches, was distributed in such a way as to keep the humidity and temperature of the air comparatively regular. The mean height of the barometer was 29.683 inches. The average temperature was 64.7°.

Westtown Boarding School, Ninth mo. 8th, 1873.

Table with columns: DAY OF MONTH, THERMOMETER (7 A.M., 2 P.M., 7 P.M., MEAN), HYGROMETER (7 A.M., 2 P.M., 7 P.M., MEAN), BAROMETER (7 A.M., 2 P.M., 7 P.M., MEAN), Depth of rain, WIND, CIRCUMSTANCES OF WEATHER. Rows 1-30.

Three Meek Men.

"The meek will be guide in judgment, and the meek will he teach his way."—Psalm xxv. 9.

Within the compass of Concord Quarterly Meeting, Pa., and cotemporary with each other, there dwelt three disciples of the Lord Jesus, whose lives were each of them types of the religion they professed, and in a remarkable degree productive of those fruits of the spirit of Christ, designated by Paul as love, peace, long-suffering, gentleness, goodness, faith, meekness, temperance.

Joseph Rhoads, James Emlen, and Samuel Hilles, were all born near the close of the last century, and within what was then Chester Co., Penna. They occupied for many years the station of elder in the respective meetings to which they belonged, and were cordially united in christian labor and love in the Quarterly Meetings which brought them together our times in the year, as well as in the general assemblies of the church, or its representatives at other periods. Of the first named the writer had the most intimate means of testing his daily life and character; and truly it may be said that he attained to a christian experience and conduct but little short of that commanded Abraham in the language by the Almighty:—"Walk before me and be thou perfect." Those irritating incidents which rise to ruffle the current of most lives, and which so generally hurry the mind into a gust of ill temper or passion, were met by Joseph Rhoads with a spirit ready for the emergency, and potent to quench the barbed darts of envy or malice by the meekness of christian wisdom. An incident in his experience was once narrated to the writer by one engaged in the legal profession, which may serve to illustrate this feature of his mind.

He had invested a sum of money, as trustee for another, in a mortgage given by a man of notoriously tardy habits in paying interest. It finally became necessary to put this invest-

ment in process of collection by law. Through some accidental circumstances the usual delay of such proceedings was greatly protracted, so that months and years wore on before the consummation of the suit. This required many visits of inquiry to be made by J. R. to his counsel to learn the progress of the case, and, said the narrator in regard to his conduct in this connexion, "Such patience under provocation and disappointment as J. R. exhibited in this affair I never saw in any other man." He manufactured leather and scythe stones, and the sale of these commodities took him to Philadelphia mostly twice a week throughout the year, and brought him much into contact with merchants and business men. Here his conscientious style of dealing won for him a reputation and esteem for honesty that was quite peculiar. In packing a box of scythe stones for the market, he would trust no hand but his own, lest justice should not be done in the selection; and the top row was never suffered to excel the bottom in quality.

He was "not slothful in business, fervent in spirit, serving the Lord." No stress of weather or secular duties were allowed to interfere with the discharge of his religious engagements. Two days before his decease, and when at the age of 73, he set out, on a bleak winter day, to visit a member of his Monthly Meeting by its appointment. Pneumonia supervened that evening, and prostrated him very soon in its fatal embrace. His chastened spirit which dwelt so habitually in the secret place of the Most High, now abode quietly under the shadow of the Almighty; and in semi-audible accents supplicated from time to time for support through the dark valley: thus leaning on the arm of the Saviour, a few hours of bodily decline released his purified spirit from the shackles of mortality, which doubtless found admission through the pearl gates into the golden city.

James Emlen was a teacher at Westtown

School for several years, and the writer was one of his numerous pupils who can bear testimony to the unruffled serenity of his brow, even under the adverse air of a class of lively boys. They all recognized the reality of his Christianity. It was not put on at intervals for holyday wear, but was the constant clothing of his spirit. His patience and gentleness won their love and regard, whilst his dignified demeanor and impartial conduct secured the respect even of the unruly. It was considered rather a mean act, even among disorderly boys, to infringe the rules whilst in his room. There seemed an atmosphere of peace and holiness about him, that told forcibly of the influence which the sanctified disciple of Christ has upon those among whom he associates, and verified the saying that "one good man will shake the country for miles around him."

Samuel Hilles spent his earlier manhood as a teacher in the same Seminary, and subsequently established a boarding school of his own at Wilmington, Delaware. The writer of this had but little personal knowledge of him until a later period of his life, but enjoyed frequent opportunities of intercourse with him during the last few years. The readers of "The Friend," who have attended Philadelphia Yearly Meeting for the past twenty years, need no testimony to prove the gentleness and charity of Samuel Hilles. As assistant clerk of the Yearly Meeting, and a leading member of it during periods of divided councils and opposing sentiments, he won the blessing of a peacemaker, and rose above all partisan views in his efforts to harmonize and conciliate. The meekness and gentleness of christian love shone conspicuously in his daily walk, and endeared him to many of all classes. His humility and condescension towards others when engaged in committees or private society, was indeed instructive to his younger friends, and proved itself the fruit of a crucified will, under the power of Divine grace.

The object in these comments is not to glorify the men referred to, but by grouping their special Christian graces together, as pearls fairly set in one diadem, to illustrate what has appeared to the writer as a telling fact in support of the reality of the religion which these men professed. It was indeed no chimera or phantasm of distempered minds. No cunningly devised fable. They were practical working characters, who may be said in common parlance to have been the architects of their own fortunes. They all believed fully in the value of the testimonies and doctrines which characterize the Society of Friends, and practised them rigidly in their own conduct and conversation. Said J. R. to a young man who had been educated in the plain habits of the Society, but who was just about deserting them for the ways of the world; "for myself, I feel that there will be enough to account for in the end without burdening the mind with any doubtful change like this." They were lights in the world, and others seeing their good works have been led to glorify a compassionate heavenly Father therefor. It is such Christians as these that the world now stands sadly in need of. Men who have not only a name to live, but who show out of good conversation, their works with meekness and wisdom. If the young members of our Society, who have a birthright in it, would follow such examples as these, giving up their hearts un-

reservedly to the purifying operation of the grace of Christ, through living faith in Him, both as their justification and sanctification, we should stand in no need of new inventions to give an interest to our religious services, or stir up revivals in decaying congregations. No better type of practical Christian lives, except His who was without sin, can be found than they exhibited. For the mass of mankind, they set examples which the lowliest might imitate, the highest could scarcely excel, and all in following them, would cause the kingdoms of this world to become the kingdoms of our Lord and his Christ; righteousness would cover the earth as the waters cover the sea; wars would cease from the earth, and violence no more be heard in our land.

### Circular of the Bible Association of Friends in America.

In again calling the attention of Auxiliaries to the Annual Queries to be answered previous to the general meeting of the Association on the 5th of Eleventh month, the Corresponding Committee would press upon Friends, who have been engaged in the distribution of the Holy Scriptures, the importance of furnishing full and accurate answers to *all* the Queries, and of forwarding their report *seasonably* to the Depository.

It may be recollected, that in making donations to Auxiliaries, the Board are guided in deciding what number of Bibles and Testaments shall be sent to each, by the information given in its report. Hence those Auxiliaries that do not report in time, are liable to be left out in the distribution.

Specific directions should be given in every case, how boxes should be marked and forwarded; and their receipt should always be promptly acknowledged.

Address John S. Stokes, No. 116 N. Fourth Street, Philadelphia.

SAMUEL BETTLE,  
CHARLES RHODES,  
ANTHONY M. KIMBER,  
Committee of Correspondence.

Philada., Tenth mo. 1873.

### QUERIES.

1. What number of families or individuals have been gratuitously furnished with the Holy Scriptures by the Auxiliary during the past year?
2. What number of Bibles and Testaments have been sold by the Auxiliary within the past year?
3. How many members, male and female, are there belonging to the Auxiliary?
4. What number of families of Friends reside within its limits?
5. Are there any families of Friends within your limits not supplied with a copy of the Holy Scriptures in good clear type, and on fair paper; if so, how many?
6. How many members of our Society, capable of reading the Bible, do not own such a copy of the Holy Scriptures?
7. How many Bibles and Testaments may probably be disposed of by sale within your limits?
8. Is the income of the Auxiliary sufficient to supply those within its limits who are not duly furnished with the Holy Scriptures?
9. What number of Bibles and Testaments would it be necessary for the Bible Association to furnish gratuitously, to enable the Auxiliary to supply each family?
10. What number would be required in order to furnish each member of our religious Society, capable of reading, who is destitute of a copy, and unable to purchase it?
11. How many Bibles and Testaments are now on hand?

Watch ye, stand fast in the faith, quit you like men, be strong.

For "The Friend."

To THE EDITORS.—The following account of the last illness and death of William Thornton Comfort, a little boy of eleven years of age, in whom I had felt much interest for several years past, he being a child of remarkably sweet and gentle spirit, and who died in this city last Eighth month, was furnished me, at my request, by a near relative of the family; and thinking it might prove instructive, as well as interesting to the youthful readers of "The Friend," I offer it for insertion therein, if deemed desirable. He was the son of parents who were not members of the Society of Friends,—the father who had formerly been a Friend, having lost his right by marriage with a person not in membership. The children, William and his sister, both preferred attending Friends' meetings to going to other places of worship; appearing to understand and to love our silent meetings; and their father desiring that they should be brought up as Friends, they were admitted as pupils in Friends' Select School. William being blest with an amiable disposition and tender heart, possessing a fine flow of spirits and natural sociability, made himself many friends; was very active at home, always ready to lend a helping hand, imagining he could do a great many things beyond his reach. Thus though there was no want of proper interest in lawful things of this world, and he was a cheerful, lively boy; loved play, with his little friends, he had for several years past manifested a deep interest in serious things; was exemplary in his manner of sitting in meetings for worship; and when there was any preaching, always gave evidence of his attention thereto by his remembrance of the texts quoted. He very much enjoyed the family readings of Scripture, to which he gave close attention, often saying, with evident feeling, "I love Jesus my Saviour." His father, or aunt, were in the habit of reading aloud in the evening to the family, and religious works were mostly selected; at which times he was often very much affected, even to sobbing. When about nine years of age, on hearing the account read of C. E. Smelt's last sickness and expressions, his feelings were so overcome that he wept aloud, so that his father had to take him on his lap to comfort him. His spirit seemed troubled at the sin in the world. He remarked to one of his acquaintance, that "this was a very wicked world, and especially this city; that there were so many temptations to do wrong he did not want to live in it—he wanted to go home," as he generally called heaven. His last illness, which was of about three weeks duration, was very severe from the first. His physicians said, from the character of his disease his sufferings must have been intense, nearly, if not all the time; all which he endured with the fortitude of a mature christian. His uncomplaining patience throughout was truly remarkable. He was never once heard to murmur. When severe spasms came on, he would sometimes look up at his father and say, "Oh Pa!" but not a word indicating impatience. And notwithstanding the severity of the disease wasted his flesh until he was reduced to a mere skeleton in a short time, he never gave way to the least irritation, even though from the restlessness day and night, it seemed as if it must be nearly insupportable. From the first of his being taken sick, he expressed his belief that he should not recover; said, "no-

body but his Heavenly Father could do anything for him." And though his heart went out in strong affection to his relatives, and in special tenderness towards his only sister, with whom he lived in close, harmonious companionship, yet he seemed at once to give up the world and all that was in it, and to turn his thoughts heavenward, saying: he wanted to go home and be with his Saviour. He told his sister at one time that, "without it was the wish of his heavenly Father that he should recover, he did not desire to." It was often touching to see him clasp his parents round the neck and lavish his caresses upon them, with calmness and composure, never shedding a tear, though all were in tears around him. When it was made known to him that he could not live, he received the intelligence with calmness, saying: he "wanted to go home and be in Heaven." He very much loved to be quiet; and when pain permitted, seemed to be in deep thought. He loved to have the Scriptures read to him as long as he was able to bear it. As his aunt sat fanning him one day, he looked up at her with sweet innocence and said, "Aunty, I hope to meet thee in Heaven." At another time as his mother was waiting at his bedside, he said: "Ma, I am going home soon. The Lord is the good Shepherd, and I am his little lamb." Being able to sit up in bed one morning, a few days before his death, he asked for all his little keepsakes, and money box; having the latter broken open, he counted the contents, then divided all his treasures between his parents and sister, maintaining entire calmness throughout, though all present were bathed in tears. He gave his Bible to his mother, and requesting her to keep his best suit of clothes to remember him, desired the remainder to be given to poor children. It may be here stated, that it was his particular request, that no flowers should be placed about his body after his death. Being asked when near the close, whether he felt happy, he sweetly replied: "Very." He was favored with his mental faculties to the last; and although for some time deprived of speech nearly two hours before the close, whilst passing through the dark valley, his lips were in constant motion, and it seemed evident he was engaged in prayer or praise. "Oh Father!" addressed, without doubt, to his heavenly Father, was distinctly understood several times; and this continued as long as his lip had power to move.

So ended the life of dear little Willie: and so precious was the assurance felt that his sufferings were over, that his eternal happiness had begun, with the sense of calmness and peace that prevailed around us at the time there seemed left no room to mourn."

May we not believe from the account above given of W. T. Comfort, that the secret of his being such "a happy little boy," of his living in such unvarying harmony with his beloved sister, of the sweetness and gentleness of his spirit, &c., was, that he loved, and lived in the daily fear of offending that "Good Shepherd, the bountiful Giver of all his comforts and blessings, whose "little lamb" he told his mother he was. And that it was his child-like trust in Him, that He alone could help him, that enabled him to bear with such exemplary patience the severe suffering he was permitted to endure. Truly has it been felt to be exemplary, and instructive to his *old* friends. Associated with this feeling, is

peculiar sweetness in the remembrance of this dear innocent child, as he was occasionally seen among us while in health, and the belief that he was then indeed, as now, a child of the Lord. Doubtless his young school-mates remember him with affection. Should any of them read this notice, would it might prove instructive as well as interesting to them; and encourage them daily to seek to know their dear Saviour's will concerning them, as manifested to their souls, and to strive to do it; then will they feel, that the only source of true happiness will be found in endeavoring to obey and serve him.

For "The Friend"

### Friends' Freedmen's Association.

Of the resumption of the work at the South, our Superintendent, Alfred H. Jones, writes:

"Danville, Va., 10th mo. 13, 1873.

The people, colored and white, welcomed us back with apparent pleasure to our temporary home, which, after five years sojourn here, seems somewhat like a permanent one.

Since our arrival the weather has been delightful, precluding the use of fires, and affording a nice time for getting under way for business. Several of our schools opened this morning.

There has been an unusual amount of sickness and mortality among the children during the summer. The seats of many are vacant, and familiar faces are absent.

17th. I would suggest that an early supply of second-hand comfortables and blankets would be of excellent service, and prevent so much suffering among the destitute by night, in the early winter.

It is often late in the season, and after much of the cold is past, before a supply comes to hand; and this winter particularly, there will be a demand for clothing.

The chills and fever are prevailing to an alarming extent, reducing the blood to a consistency little above water, making the victims sensitive to the slightest changes of temperature. Hitherto Danville has been early free from chills. They work much like an epidemic. For the first time in thirty years, they were last year the scourge of Salem (N. C.). More than a thousand cases appeared in Charlotte one fall, and at other times they have been nearly exempt. In like manner, nearly all points in the miasmatic districts have been visited.

The present financial embarrassment, by stopping the banks from issuing currency, has compelled a large number of factories, in the height of their operations, to stop business, and others to run on partial payments, promising the balance when times change. Such a state of things in a manufacturing town is attended with the most unhappy results, turning hundreds of operatives out of employment. With cold winter approaching, the scene can be easily imagined.

ALFRED H. JONES.

## THE FRIEND.

TENTH MONTH 25, 1873.

After his vivid description of the character of George Fox, the religion he promulgated, and the principles of the gospel held by the early Friends, William Penn says, 'This being the testimony and example the man of God

before mentioned was sent to declare and leave amongst us, and we having embraced the same as the merciful visitation of God to us, the word of exhortation at this time is, that we continue to be found in the way of this testimony, with all zeal and integrity, and so much the more, by how much the day draweth near.'

Truly there is a high and noble trust committed to Friends; one which, as they rightly execute it, will tend to the advancement of the universal church, but which as they fail to maintain and fulfil it, must bring them under condemnation. Its importance, and the obligation to be faithful therein, are felt by those among the members who, by obedience to the Light of Christ manifested to the soul, have realized that Friends have seen more fully and clearly than other professors into the character and attributes of the glorious gospel of our Lord Jesus Christ; experiencing that as it separates them from the evil that is in the world, and weans their affections from its friendships and fashions, filling their hearts with the love that "breathes through Immanuel to the whole heritage of God," it is indeed "the power of God unto salvation." Such as these may find that the proportion of Christian professors who have been so fully enlightened as to comprehend the spirituality and strictness of the religion of Christ, is comparatively small; and that very many who are sincere and zealous in the faith they profess, yet hold it with a mixture of error, and an imperfect conception of the nature and need of complete regeneration and newness of life; substituting therefor reliance on a literal belief in the truths of Scripture, and depending unduly on ceremonial performances; but whenever and wherever they meet with any, the main bent of whose spirits is, to be found walking in the strait and narrow way of salvation, they will have a feeling of christian fellowship with them as being children of the same family, who can agree with and understand one another in the essentials of their heavenward pilgrimage.

But while rejoicing in the sincerity and integrity which others may manifest for the same blessed religion, so far as it has been unfolded to them, that has been more fully made known unto themselves, and embracing such as fellow heirs of the same heavenly kingdom, truly convinced and conscientious Friends will find themselves restrained by that Divine Grace, under the government of which they are striving to live day by day, from lowering the standard that has been given them to uphold before the world, so as to sanction or palliate the errors of others, and it will keep them bound to the truth as it has been revealed by its Author; with the hope that thus they may be made instrumental in more fully instructing and influencing for good those who are earnestly laboring for the attainment of eternal rest and joy, in that kingdom where nothing that is impure or unholy can ever enter. Difference in views in relation to many things connected with the Church, and the manners and habits of the community around them, may, and probably will interfere with such Friends mingling in close intimacy with other professors, lest thereby they might be unwarily drawn into some compromise of a truth or testimony they know belongs to the gospel of salvation; but in their ordinary or casual intercourse with their religious friends or neighbors not of their communion,

each will recognize in the other some of the distinctive features of Him of whom the whole family in heaven and earth is named, can greet each other in that love which is the common bond of the household of faith, and wish each other God speed in the high-way of holiness.

Unflinching firmness in practically upholding the religion we profess, evincing at the same time the meekness and gentleness of Christ, is far more noble and truly Christian, far more likely to obtain respect, than to hold it, as it were, on the lip and tongue, and to balk its designed effect by compliance with the spirit and opinions of other professors, who are unprepared or unwilling fully to adopt the spiritual, heart-searching principles of the gospel, as understood by Friends; requiring the bearing of the daily cross, and the thorough washing of regeneration. To this upright course we are all called, younger as well as older, and to it we may attain if, in the obedience of faith, we look unto Him who has promised to be strength in the weakness of his depending children, to supply Grace in every time of need, and who knoweth what is best for us before we ask him.

There may be many things relating to the Redeemer's kingdom which the young and inexperienced may not yet comprehend; for our Heavenly Father does not open all things to his true born babes at once, but as they are able to bear them. The more need is there, then, to hold fast the profession of our faith without wavering, keeping humbly at the feet of the Master, resting in the faith that all things will be unfolded which it becomes us to know; the faster and clearer as the necessary warfare is steadily maintained, and our daily abode is in Him, the true and living Vine. "Wherefore, O ye young men and women! look to the Rock of your fathers. There is no other God but him, no other light but his, no other grace but his, nor Spirit but his to convince you, quicken and comfort you; to lead and guide you to God's everlasting kingdom. So will you be possessors as well as professors of the truth, embracing it, not only by education but by judgment and conviction; from a sense begotten in your souls through the operation of the eternal Spirit and power of God; by which you may come to be the seed of Abraham, through faith and the circumcision not made with hands; and so heirs of the promise made to the fathers, of an incorruptible crown; that a generation ye may be to God, holding up the profession of the blessed truth in the life and power of it."

As an evidence of the great difference in principles and practice that has already taken place in different places among those claiming to be members of the Society of Friends, we give the following extract from a communication in the last number of the (London) Friend, advocating the introduction of the study of music in Friends' Public Schools. "The scruples Friends formerly held against music are now generally abandoned. So universally is it now expected in Friends' families, that our private schools find the necessity of including it in their course, in order to obtain and keep their pupils. This applies even to boy's schools, where music would not be expected in schools of the same class in other denominations."

Philadelphia Yearly Meeting at its last ses-

sion, directed its subordinate meetings to carry into effect, by affectionate labor, and if need be by disownment, its discipline against indulgence in music, or having musical instruments in its members' houses. Can two walk together unless they be agreed? Can the same fountain send forth bitter water and sweet?

WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Master of this Institution are expected to be vacated at the close of the Winter session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

- NATHANIEL N. STOKES, Cinnaminson P. Office, Burlington Co., N. J. CHARLES EVANS, No. 702 Race Street, Philadelphia. DEBORAH RHOADS, Haddonfield, N. J. REBECCA S. ALLEN, No. 335 South Fifth Street, Philadelphia.

SUMMARY OF EVENTS.

FOREIGN.—The London Times has received a special dispatch reporting the substance of the agreement made between the Count de Chambord and the monarchical parties in the French Assembly, to be laid before that body at the opening of the session. It includes universal suffrage, the eligibility of all persons to civil employment, a reasonable liberty of the press, and the tricolor to be maintained as the flag of France. The dispatch also says the Assembly is called to meet not later than the 27th inst.

The Republicans are working with great activity and energy to counteract the designs of the monarchists. Eighteen deputies, from the Department of the Seine, have signed a manifesto protesting against the attempted royal restoration, and declaring that they will earnestly resist all such schemes. It is believed the Republicans will unite in proposing to the Assembly that the question of a restoration of royalty be referred to a commission which is charged to report on constitutional laws. The prolongation of MacMahon's tenure of office as President will also be proposed.

The trial of Marshal Bazaine, at Versailles, continues. The investigation thus far goes to sustain the charges. It appears the accused did not recognize the Paris government, and considered the Emperor his only legitimate superior. He made the surrender on his own responsibility, considering that there was, at that time, no legal government in France. The capitulation was he maintained, compulsory. He had resisted to the last, and only yielded when his provisions were exhausted. When interrogated in regard to some points, Bazaine hesitated in his answers and showed much embarrassment.

The insurgent squadron has left the port of Cartagena, and on the 20th was off the harbor of Valencia, followed and watched by several British, French and Italian war vessels. The insurgents captured three Spanish merchant ships at the entrance of the harbor, and threaten to seize or sink the gun-boat Lepanto, which is lying in the harbor. A bombardment of Valencia was threatened, if the fleet was not supplied with provisions and a certain sum of money. Spanish affairs have not materially changed. Admiral Lobos has been removed from the command of the fleet operating against the insurgents at Cartagena, and the Minister of Marine has himself assumed the command. The insurgents have lost one of their vessels, but have still a formidable fleet afloat. On the 17th the government squadron was at Gibraltar, having gone thither for coal.

A St. Petersburg dispatch of the 17th says, the river Neva has risen ten feet beyond the usual height, causing great damage in the city and the country through which it passes.

In Hungary the ravages of cholera continue. The deaths from that disease, previous to 9th mo. 1st, numbered 104,000. The disease is declining in Vienna, but increasing at St. Petersburg.

The Emperor William, of Germany, arrived at Vienna on the 17th, and was received with great en-

thusiasm by the people. The exhibition does not close until the 20th of next month.

The correspondence between the Pope and the German Emperor is officially published.

The Pope complains that the measures of the German government aim at the destruction of Catholicism; and reminds the emperor that measures injurious to the Christian religion also tend to undermine the throne.

The emperor, in his reply, deeply regrets that a portion of the Catholic priests in Germany have organized a party which is engaged in intrigue against the State, disturbing religious peace to the extent of open revolt against the existing laws, and declares that he must maintain order and law even against the servants of a church which, he supposed, acknowledged obedience to secular authority as a divine command. He expresses the hope that now the pope has been informed of the truth, he will use his authority to suppress the agitation which the emperor declares has no connection with religion or truth.

The shipments of gold from England to New York continue. The Bank of England has advanced its rate of interest to 6 per cent.

John Bright has been re-elected to Parliament there being no opposition to him.

The British government having officially represented to the Emperor of Brazil the sufferings of English emigrants to that country, free passage home has been given to 164 of the emigrants by the Brazilian government.

London, 10th mo. 20th.—U. S. six per cents, 1865, 93½. Five per cents, 91½.

Liverpool.—Uplands cotton, 9½d. a 9¼d.; Orleans, 9½d. a 9¼d.

Advices from South America report that the insurgents of Entre Rios have been signally defeated. A whole battalion mutinied against the rebel leader Lopez Jordan, and submitted to the Federal authorities. General Mitre's negotiations for a treaty to define the boundary line between Paraguay and the Argentine States have fallen through.

A dispatch from Rome says on the 20th that the General of the Society of Jesuits was to-day officially notified by the government that the order must immediately vacate the premises now occupied by them in that city.

On the same day the government took possession of six convents under the law for the abolition of religious corporations. The United States and Portuguese Consuls protested against the seizure of certain portions of the Franciscan convent, on the ground that they were the property of citizens of their respective countries.

UNITED STATES.—There were 288 interments in Philadelphia last week, including 83 children under two years. There were 60 deaths of consumption, 24 debility, and 11 disease of the heart.

The interments in New York last week numbered 543. During the last four weeks, the value of domestic produce exported from New York has been over \$29,000,000.

The exports from the United States have latterly increased so greatly in amount that it is estimated they will not be less than \$650,000,000 the present year. At the same time the imports have declined, and it is supposed will not exceed \$600,000,000.

The following table shows the immigration to all the ports of the United States from the countries named during the past two years, each ending 6th mo. 30th.

Table with 3 columns: Country, 1872, 1873. Rows: From England (69,764, 74,818), From Ireland (68,732, 77,344), From Scotland (13,916, 13,841), From Wales (1,214, 840).

Total from Great Britain, 153,626 166,843. From Germany, 141,109 149,671.

According to the census of 1870, there were 10,892,015 persons of foreign birth in the United States, including their descendants of the first generation. This class of persons formed about two-sevenths of the entire population.

The Western Union Telegraph Company owned and worked on the first of Seventh mo. last, 65,757 miles of line, 154,471 miles of wire, and 5,740 offices. There were 9,196 persons in the employ of the company. For the last year the receipts of the company were \$9,333,018, and the net earnings \$2,757,963.

The Markets, &c.—The following were the quotations on the 24th inst. New York.—American gold, 108½. U. S. sixes, 1881, 111¼; ditto, 1865, 107; 5 per cents, 105½. Superfine flour, \$5.10 a \$5.50; State extra, \$6.15 a \$6.50; finer brands, \$7 a \$10.50. Red western wheat, \$1.55; No. 2 Chicago spring, \$1.35 a \$1.36; No. 3 do., \$1.32. Oats, 49 a 53 cts. Western mixed corn, 58 cts.; yellow, 61 cts.; white, 65 a 67 cts. Philadelphia.—

Uplands and New Orleans cotton, 17 a 18 cts. Cube sugar, 7½ cts. Superfine flour, \$4 a \$4.75; extras, \$5 a \$6; finer brands, \$6.50 a \$10. White wheat, \$1.65 a \$1.80; amber, \$1.58 a \$1.63; Penna. red, \$1.57; western \$1.45 a \$1.50. Rye, 85 a 90 cts. Mixed corn, 61 cts. yellow, 62½ cts. Oats, 44½ a 50 cts. Smoked hams 14 a 15 cts. Lard, 8½ a 8¾ cts. Sales of about 3200 beef cattle at 6½ a 7 cts. per lb. gross for extra; 7¼ for a few choice; 5½ a 6½ cts. for fair to good, and 4 a 5 cts for common. About 12,000 sheep sold at 5 a 6 cts. per lb. gross, and 9,000 hogs at \$6.75 a \$7 per 100 lb. net. Chicago.—Spring extra flour, \$5 a \$6.50. No. 2 spring wheat, \$1.05 a \$1.06; No. 3 do., \$1. No. 2 mixed corn 38 cts. No. 2 oats, 32½ cts. Rye, 63 a 65 cts. Barley \$1.32 a \$1.33. Baltimore.—Choice amber wheat, \$1.70 a \$1.75; Penna., \$1.55 a \$1.57. Southern white corn 75 cts.; yellow, 65 cts.; western mixed, 62 cts. Oats 48 a 50 cts.

WESTTOWN BOARDING SCHOOL.

The WINTER SESSION of the School will commence on Second-day the 3rd of Eleventh month.

Pupils who have been regularly entered and who go by the cars from Philadelphia, can obtain tickets of the Treasurer, No. 304 Arch St., or they can procure them at the depot of the West Chester and Philadelphia Railroad, corner of Thirty-first and Chestnut streets, by giving their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. In such case the passage, including the stage fare from the Railroad Station, will be charged at the School, to be paid for with the other incidental charges at the close of the term. Conveyances will be at the STREET ROAD STATION on Second and Third-days, the 3rd and 4th of Eleventh month, to meet the trains that leave Philadelphia at 7.25 and 10 A. M., and 12.10 and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at the latter place, it must be put under the care of Hibberd Alexander & Sons, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of the City, by sending word on the day previous (through the post-office or otherwise) to H. Alexander & Sons, N. E. corner of 18th and Market Sts. The charge in such case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same charge they will also collect baggage from all other railroad depots, if the checks are left at their office corner of 18th and Market Sts. Baggage put under their care, if properly marked, will not require any attention from the owners, either at the West Philadelphia depot, or at the Street Road Station, but will be forwarded direct to the School. It may not always go on the same train as the owner, but it will go on the same day, provided the notice to H. Alexander & Sons reaches them in time.

DURING THE SESSION, passengers for the School will be met at the Street Road Station, on the arrival of the first train from the City, every day except First-day and small packages for the pupils, if left at Friend's Book Store, No. 304 Arch street, will be forwarded every Sixth-day at 12 o'clock, except on the last two Six-days in the Twelfth month, and the expense charged their bills.

Tenth month 18th, 1873. The Annual Meeting of the Auxiliary Bible Association of Friends of Philadelphia Quarterly Meeting, will be held at No. 109 North Tenth Street, on Fourth-evening, the 29th inst., at 7½ o'clock. A. M. KIMBER, Secretary.

FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Application may be made to Ebenezer Worth, Marshallton, Chester Co., Pa. Joseph Scattergood, 413 Spruce St., Philada. Aaron Sharpless, Street Road P. O., Chester Co., Pa. Thomas Wistar, Fox Chase P. O., Philada.

WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd of Eleventh month. Friends intending to send pupils to the Institution are requested to make early application to AARON SHARPLESS, SUP'T, Street Road P. O., Chester Co., Pa., or to CHARLES J. ALLEN, Treasurer, 304 Arch St., Philadelphia.

## The Despotism of Fashion.

History furnishes many instances of nations that have been misgoverned by arbitrary kings and despotic emperors, inflicting untold sufferings upon the people. Even in our own age, we have not been without Napoleons, who from selfish motives would have sacrificed the true interests of great nations; but fortunately their unwise ambition resulted in their downfall and obscurity.

But, alas for the despot who rules the world! Her power stands unrivalled, and apparently almost unlimited. History fails to record an instance of such tyrannical and universal despotism as that of fashion. With an iron rod she rules the people of almost every race and time, and woe to the individual who refuses to bow to her behests.

And here let us inquire, What nation or people, has been the leader, or pattern, for our costume? Has it been one distinguished for the virtue, the high moral standard, or Christian nobility of its people? I blush with shame and deep sorrow of heart, as I reply, No! A corrupt city—the capital of a corrupt nation—has had most to do here. Paris has long been noted for its infidelity, its gross immorality, its profligate men, its lewd women; and yet to be decked in Parisian fashions has been, and still is, thought to be a great accomplishment, and a great honor. Nor do people pause to consider the terrible judgment, the bitter suffering, the woeful misery, which has been permitted to overtake that city of revels—that mother of abominations.

But Satan stands behind the old despot, fashion, and says, "Lead on the people to destruction—disguise my cloven feet!" And we march on, haughtily and thoughtlessly, walking and mincing as we go."

There was perhaps never a time when fashion was carried to such ridiculous and wicked excess as the present. Fashion is not now contented with certain forms of dress, and with frequent changes. But nothing short of the most reckless extravagance, the most gaudy and fantastic ornaments, can satisfy her demands. Multitudes of people spend no inconsiderable proportion of their precious time in preparing the most silly adorning for per-

sonal apparel, equipage for travelling, &c. A thoughtful person is almost ashamed of his species, when he sees men who have not independence enough to appear in company unless dressed in a fashionable suit. His boots must have heels so high that his toe nails are grown into his toes, or his feet crippled in some shape; while the toes of his boots or shoes must be either square and very wide, or come to a point, according to the caprice of fashion—being careful to have no regard to comfort or health. His pants must fit very tight, so that he cannot safely stoop, or be so large that he could jump into one leg. His coat must reach below his knees at one time, and at another it is made too short to call anything more than a jacket. The hat is either almost without crown or brim, or varied to some other shape, so that one cannot tell a man from a boy by his chapeau.

But I cannot spend more time in describing a man's dress, or how could I ever think of finding space to speak of the endless variety of women's attire—the enormous load of superfluities which they carry? Their skirts, whether of the most costly silk, or of the purest white, are used to sweep the dusty sidewalks and muddy crossings; while children from three to twelve years of age have scarcely any skirt at all; so that they are not only dressed immodestly, but their health endangered, that fashion may be regarded. Who can have patience to mention the waste of time which the present fashion in female attire demands—the flounces and overskirts, with their trimmings—the immodest hump on the back—the hitch-ups and catch-ups—the gaudy ribbons, and superabundance of trimming. And the head dress is often a shame to the sex. Bonnets are now discarded. A little strip of trimming across the head is enough, leaving the forepart of the head bare, even in the coolest weather. I have seen children sent eight or ten miles to ride, with only a little, thin hat to protect their heads, with the thermometer not much above zero. And on the back of the head, whether the weather is hot or cold, must be placed an enormous bundle of bark or false hair.

Health is so far disregarded, that thousands die annually only to pay their vows to the shrine of fashion. Beauty, convenience, comfort, and modesty, are at all times sacrificed in the same interest. And, alas! even morality and religion become subject to its overwhelming power, and thus the most essential and important duties of life are disregarded, that fashion may have the homage which she asks for.

The public press is nearly all committed to the same cause—and one can but wonder how entirely it is controlled by this despotism. Do you talk of free press, and free speech, and of independence of thought and action? It is idle talk—yea, false. There are rare exceptions. Now and then some self-denying child of God, dressed in accordance with Christian

simplicity, pleads with others to use a little common sense in the matter of dress, and allow conscience to speak in the premises. But amid the din, and roar, and bustle, and commotion of the extravagant, sweeping, rushing world, these refreshing and noble exceptions are lost, or overwhelmed. The newspapers and magazines assist the tyrant, as he continues his arrogant sway of wickedness, drawing in the young and unwary, until they are fully committed to the same cause, and finally confused and lost in fashion's vortex.

Does any reader say, This is imaginary, and over-wrought? I deny it. Show me your young men and young women, (or even the older class,) who have the independence to disregard the modes of fashion prevailing, and dress prudently, neatly, modestly, and plainly—in accordance with common sense, and the principles of Christianity. Where are they? Even the various denominations of professed Christians have no voice to lift against this constant change of dress, and the extravagance which it induces. It was not always so. Not only the Society of Friends, but other denominations, formerly regarded, in some degree at least, Christian simplicity. But now even the formerly self-denying Quakers are aping the fashionable world to a shameful extent. Where, then, shall we look for a determined protest against this awful sin? Nothing seems able to confront the tyrant. He goes on, conquering and to conquer, until even now the woe which was formerly pronounced by the prophet against the pride of that day, seems to belong to, and is perhaps impending over, this age. It would appear that the haughty daughters of Zion were then loaded with foolish ornaments. Read the judgments which God then pronounced against them for this cause—Isaiah iii. 16, to end of chapter. And if, under the old covenant, this wantonness and pride were to be condemned and punished, how much greater must be the condemnation to us who live under the Christian dispensation, and profess to be of the new Israel of God—humble, self-denying followers of the lowly Jesus!

But, in a newspaper article, I have not space, had I time and ability, to portray in true colors the abundant and multiform evils resulting from fashion. The slavery which it causes our women in such constant sewing, to make and remake the tremendous costume now prevailing—the severe and constant labor and engrossing care thus forced upon their husbands, to procure funds with which to indulge their wives and daughters in keeping up with their neighbors in the race of fashion. Not a few men have been led into crime, that they might have the ability to keep themselves and families in the extravagant style of the day. When you, young wives or daughters, survey with such pride and self-complacency your gaudy attire, pause for a moment to consider whether your shameful extrava-

gance does not cause your father or husband to toil late and early, in the work shop or counting house, perhaps until his health is impaired; and whether you are not loading him with debts, which may yet make you homeless, or defraud honest creditors, and thus perhaps break down, by constant anxiety, the health of your loved ones, and make their lives an early sacrifice to this mammon of fashion. Let us consider ourselves as rational beings, and as possessed of immortal souls; and how can we spend so large a proportion of our precious time in decking these mortal bodies? How contradictory the conduct and profession of nominal Christians! Instead of *self-denial*, *self-indulgence*, *pride*, *extravagance*, and much wickedness, are patent to all not blinded by custom. And even the professed ministers of the Gospel dare not come out boldly in condemnation of such folly; but suffer themselves and their families to fall into the same disgraceful fashions. And why is it so? Dare we not brave a corrupt public opinion? Of whom are we afraid? "Who art thou, that thou shouldst be afraid of man, that shall die, and of the son of man, who shall be made as grass; and forgettest the Lord, thy maker, that hath stretched forth the heavens, and laid the foundations of the earth; and hast feared continually every day, because of the fury of the oppressor, as if he were ready to destroy? And where is the fury of the oppressor? I am the Lord thy God, that divided the sea, whose waves roared, the Lord of Hosts is his name." REFORMER.

#### Great Discoveries by Accident.

The great discovery that made Charles Goodyear famous was an accident. For ten years he gave all his time to ascertain how india-rubber could be treated so that it would neither stiffen by cold nor melt by heat. As everybody knows he succeeded, but it was after a thousand mistakes, and at a time when he was not experimenting. Gesticulating earnestly as he stood arguing near a bar-room stove one winter's day, he let fall on the heated surface a piece of india-rubber and sulphur, which he had been rolling together in his hand. Upon recovering it, he found that a portion of the little ball had become more elastic than before, and, by subsequent trials, that the same portion was affected neither by heat nor cold. In fact, the interior portion of the ball had been vulcanized by chance, and from this trivial matter, which occurred in a country tavern thirty-four years ago, has grown up in this and other countries a business that employs a capital of many millions of dollars, and more than one hundred thousand workmen.

Again, during the process of vulcanizing large quantities of india-rubber, a residuum of hard black coal is continually being deposited. For several years this residuum was regarded as useless, and was got rid of by shooting cart-loads of it into holes or sinking it in the sea. Observing an Irish girl one day in Woburn, Massachusetts, cleaning cutlery upon what looked to be a black stone, Goodyear had the curiosity to examine it. To his surprise, he found the seeming stone to be india-rubber coal—not a mineral at all, but a vegetable. Seeing that the upper surface of this novel knife-scourer had not only been worn smooth by use, but had taken a brilliant polish, the thought occurred to him that the material might answer as a substitute for ivory, bone

and horn. Upon trial, he found that it was so, and he immediately took out in the United States, England and countries on the continent, many patents of application; that is, patents not for the discovery of the material, but for the discovery of the uses of the material. Manufacturers saw the advantages of the substitute and seized upon it eagerly. And now it is used the world over for handles to knives and surgical instruments; for laboratory tools; for harness trimmings and house ornaments; for buckles and locks; parlor furniture and study conveniences; combs and backs of hair-brushes; door-knobs and walking canes; caskets, bracelets and necklaces; finger-rings and the settings of precious stones, and a thousand other purposes.

The operation of whitening sugar was discovered by accident. All sugar is dark until washed. Pack some brown sugar in a funnel; how is it to be washed? Clearly not by pouring water upon it; which would dissolve the crystals, but by letting it drain dry. Such used to be the process. Ten thousand loaves of sugar, in funnels, would sometimes be draining at once in a Cuban sugar-house. It happened at a plantation, early one morning, that old "mammy," after feeding the poultry, left the gate of their yard open. There had been a shower, and the feet of the fowl were sticky with clay; yet they nevertheless crossed over to the sugar-house, and entering at the door, went picking into the funnels and depositing moist clay on their contents. Nobody knew till then that moist clay gives off water so sparingly, that it will purify sugar without dissolving it. The hint was taken, experiments were made, and the fact clearly ascertained. It was one of the most curious and useful of chance discoveries. To this day yellow and brown sugar in the West Indies is whitened by spreading moist clay over the surface. This is called "claying the sugar."

The metal called cadmium, which when crystallized into white octahedrons is so beautiful, and which is also so useful in the arts, was discovered by a very odd chance. It is a custom in Germany that the government every now and then examines druggists' medicines to see if they are pure. The chemical inquisitors whom it employs went into an apothecary's shop in Berlin some years ago, and, among other articles, tested some zinc. It was mixed with sulphur, and yet turned yellow. They were horrified. The druggist was arrested, his shop closed, a large fine was imposed upon him, and he was forbidden to trade. Why? Because zinc combined with sulphur is white, while arsenic combined with sulphur is yellow; and the experts reported our poor druggist for having arsenic in his zinc. He knew it could not be so, however; and he employed Professor Stromeyer to analyze it, who discovered the new metal, cadmium, to be the cause of the yellow. This white, brilliant, tin-resembling metal, from which cadmium yellow comes, is now regularly extracted from ores of zinc.

There is a color made and used at the famous Gobelin manufactory at Paris, called the Gobelin red dye. It was at one time in so great repute that the populace thought it must have been obtained from the evil one. It was accidentally discovered by that odd Dutch philosopher, Cornelius Van Drebbel, who professed to have been the inventor of almost everything, from a mousetrap to a machine which should move perpetually. Ho

was probably the first constructor of a thermometer, and he improved the telescope and microscope. About 260 years ago, when engaged one day in filling a glass tube with a decoction of cochineal, his dog sprang playfully upon him, causing him to spill a few drops. There was a solution of tin in a vessel on the table. Into this the decoction of cochineal fell, when, lo! what has since been known as the Gobelin red dye was produced.

Steam engines in their early use had no self-acting valves. A workman at stated time had to turn on and to turn off a tap. As the work was light, and attention only was required, boys were usually employed as tap-turners. It so happened, while this was the custom, that a young fellow—lazy, perhaps, but possessing brains—got tired of running hither and thither, and perpetually doing the same thing. Getting hold of a strong cord, he contrived a connection between the beam at one end and the tap at the other end, and tied both together. It answered perfectly. The movement of the beam turned off the tap at the proper moment, and at the next proper moment turned it on. The engineer saw it, and though he discharged the boy for laziness, he took out a patent for the invention. From that time all steam engines have been built with self-acting valves.—*Our Young Folks.*

For "The Friend."

John Heald.

(Continued from page 66.)

1st mo. 30th, 1817. "We attended Marlborough Meeting. My mind soon became silently quiet, and enjoyed a peaceful serenity, and in a while I was engaged to encourage those present to labor for a like quiet habitation. It was a comfortable meeting, in which some of the dangers of neglecting to labor were pointed out, but the weather had become cold, the house was open, the wind blew and we became chilly, and I thought our comfortable feelings passed off sooner on that account than they would have done, if the house had been comfortable.

31st. At Centre Meeting. I began with: Give not that which is holy to dogs, neither cast your pearls before swine. When I first felt this impression, I felt startled at bringing these ideas into view before a large assembly; but finding the impression to be of a humiliating kind, such as I had heretofore commended, I did not think it safe to hesitate; so I went on and way opened in a trying humiliating way to myself, and I am induced to think it had a good effect on the minds of the bearers. Though this [advice] might be considered to apply solely to ministers, being addressed by our Lord to His disciples, I had an idea that it applied to each class of society for each one had a precious gift bestowed. They have the reproofs of instruction which are the way to life, and if they cast these behind their back, what better is it than to give that which is holy to dogs, or casting their pearls before swine? Is it not a prostituting those precious things to the swine's nature? I went on from one sentence to another, and the power seemed to attend. Though I had no prospect of much to say, the way still opening, and weight and humility continuing and increasing, I proceeded and delivered a long testimony. In the latter part I endeavored to show that though there were tribulations to be met with in the way leading from death to life, yet that these were not harder, if so

ward, as were often met with in the way of usual gratification, or in following on to obtain the delights and vanities of the world.

2d mo. 2d. Attended Salem Meeting, which was large. I began with: 'I beseech you to let the gospel have free course among you.' This is a loving request of the apostle, and we may find in the sacred writings another invitation: 'Seek the Lord while he may be found, call upon him while he is near.' I think it may fairly be inferred that there is a time when he may be found, and that the time may come when if we call he will not hear; if the proper time for attention is neglected. I went on, in the opening that attended, to show that where a living ministry was exercised, if those who are favored with it are unfaithful and go counter to clear conviction, they are in a worse condition than if they had not been favored with it; they become hardened. It is no matter whether it was immediately or instrumentally conveyed, here the gospel has not free course, here the loving invitation is not attended to, but another way is devised to please the natural inclination, and then condemnation is experienced to attend the minds of those who are casting the reproofs of instruction behind them. These are laying a foundation for sorrow of heart. This I was enabled to set forth in such a manner, that many were tendered and I believe humbled, and the meeting ended, after an humble supplication for preservation from the trials that are in the world; and for support and strength to do our several duties with acceptance to our great and gracious Benefactor, that by His holy aid we may be enabled to go on in the highway to happiness, and be safely landed on the eternal shore where no sorrow can come, but where we may praise the God of our salvation who is worthy for evermore.

In the evening, at William Dennis', several friends being there, besides a large family. I remarked in regard to ministry, that those who are exercised therein should be content to attend closely to their gifts, and endeavor to do what is required, and not to exceed. If only a little is required, be faithful in the little and despise not the day of small things. Watch against high-mindedness and indulge it not even in secret. Those who are thus engaged are likely to be entrusted with more, and to be preserved.

3rd. At Providence, I remarked that some, when they had the company of strangers, gave up their own concern, to sit idle till the stranger should communicate something. Thus much precious time may be lost. If the important concerns of religion are a favorite subject of contemplation, the mind in its silent retirement will go to its favorite object, and seek to know what it must do, in order that the necessary work may be accomplished. I had to show that the work was a progressive one; that in the beginning God created such and such things on the first day, and others on the following days, each in order progressively. Thus the works of God were accomplished, and last of all he made man. The work that is required of us is to be done progressively, and not all at once. Some of us know that we were once young, and that there was a time when we first felt our minds impressed with a desire to be prepared to die; that we then discovered that to gain Divine favor we must forsake evil. If we did so, we felt peace; if not, we felt condemnation, and had no assurance of being happy. When we have been

deeply impressed with a sense of our situation we have been induced to supplicate for mercy; and when we have yielded obedience to our duty we have had to learn the practice of one thing after another. Some duty to be performed would be presented to the mind, and as this was faithfully attended to, then something else, and so on. Thus we may see it is a progressive work, and the growing is from stature to stature, and not all at once. Pressing the attention of those present to their duty, as the only way to gain the favor of Heaven, I thought the minds of many were tender and solemn.

6th. Attended meeting at Caincreek. It was small and we sat a considerable time before I found my way open to communicate. I began with: 'We will eat our own bread and wear our own apparel, only let us be called by thy name to take away our reproach.' I do not doubt but that many, with me, have lamented that there were so many who were satisfying themselves with the appearance, the form or show, of religion, without the reality, without the substance. Many have earnestly desired to feel or know the ownings of the Heavenly Father's love, but after they have been favored with a measure of it they have consulted fleshly ease, or have been unfaithful to known or required duty, and have lost the place of favor, and are contenting themselves with an outside resemblance, like eating their own bread and wearing their own apparel; esteemed religious, honest in their dealings, and perhaps punctual to their engagements too.

In younger years, when the mind is turned towards the close of life, a desire prevails to be prepared to end well. Then it is seen what must be parted with in order to obtain Divine favor, and as such have been faithful and have denied themselves, they have felt peace in a secret satisfaction. Then something else is presented to the mind, and if faithfulness is abode in, and the cross borne, they become prepared to do some little service, which, if honestly done, tends to peace; then the heart does not condemn such, and if our heart does not condemn, then have we hope towards God. How easy! how plain and simple is the way! To yield obedience attentively is the way to have this hope, and it is a comfortable hope. How necessary it is to be in readiness. Some have been taken out of time as in a moment, without so much as time to lift up their eyes and hands to Heaven for mercy. How unsafe to pass away the time without this hope, or in eating our own bread, and wearing our own apparel, and only having a name, without a well-grounded hope.

Some have been so desirous of enjoying gaiety, and the delights of sense, that they have been very eager to obtain them; but conviction has covered their minds, and has rendered the enjoyment less comfortable. If they continue in this course, they are laying a foundation for lasting misery; but if they would deny themselves these gratifications, and take up their daily cross and follow the dear Redeemer, they would have peace of mind.

8th. We were at the Quarterly Meeting composed of the meetings we have attended since we left Neuse. In the time spent on the state of Society, I encouraged those present to attend their religious meetings, wishing them to be so devoted thereto, that they might know a being set free from the concerns of

the world so far as to feel at liberty to leave them without anxious care. There is a time in which our minds may be properly employed in attending to necessary cares, but I believe such times should not be long, or else we are in danger of being drawn into a love of them. We must learn to attend to them, and to leave them in the right time."

(To be continued.)

### Spectrum Analysis.

The study of the spectra of the fixed stars, a matter of extreme difficulty, has been most patiently and carefully prosecuted by Dr. Huggins. It must be borne in mind that, owing to their vast distance, the stars, even when viewed with the most powerful telescope, never appear otherwise than as points of light, all that the telescopes can do being to intensify that light. Now a telescopic image of the luminous point has to be kept steady upon the slit of the spectroscopic, whose aperture is not above 1.300th of an inch in breadth; and this can only be accomplished when the telescope is so hung as to be free from tremor, and is so accurately moved by clockwork that the earth's motion is effectively neutralized. Moreover, in our climate, it is only on a few of those nights on which the stars appear to the naked eye to shine brilliantly that the air is steady enough to prevent the flickering and confusion of the spectra which is fatal to these very delicate observations. Now, as had originally been pointed out by Fraunhofer, the spectrum of the several fixed stars differ very greatly from that of the sun and from each other; and in order to determine the component parts of their luminous atmospheres it is necessary to be able to bring into comparison with the spectrum of each star the spectra of various incandescent metals and gases.

This is accomplished by a very ingenious but simple arrangement, which Dr. Huggins has attached to his telescopic spectroscopic, by which, on pressing a button, the observer can combine, in the same view, the spectrum of a star and the spectrum of any chemical object—such as hydrogen, magnesium, or iron—which he may wish to compare with it. In this manner it is easy to determine with certainty whether a particular set of bright or dark lines seen in the spectrum of the star is or is not coincident with the characteristic spectrum of any substance already known to him. As Sirius is by far the brightest of the fixed stars, Dr. Huggins early devoted great attention to its spectrum, which he found to be a continuous one, crossed by great numbers of dark lines, which are disposed at pretty regular intervals through the whole length. Its series of colors so far corresponds with that of the solar spectrum that the combination of the whole gives white light.

The spectrum of Sirius further corresponds with that of the sun in presenting four strong dark lines, which correspond (though with certain differences) with the three principal Fraunhofer lines, C, F, G, and the fourth near H, that indicate hydrogen; and the peculiarity of its line F has led, as will be presently shown, to a most remarkable discovery in regard to the proper motion of this conspicuous star. But the very multiplicity of its lines, taken in connection with the circumstance that Sirius never rises high enough in our sky to be out of the range of the strongly disturbing influence of our own atmosphere, has made the

determination of the elementary substances whose presence those lines indicate more difficult than those of certain other stars, to which Dr. Huggins has accordingly given a preferential attention. The spectra of all the stars yet examined, except two, show the presence of hydrogen, which we have seen to be one of the most important constituents of the sun. Sodium, magnesium, calcium and iron are very frequently recognized, and in Aldebaran there have been observed, in addition, bismuth (which has been found in the sun), antimony, mercury and tellurium—the last being a metal which is very rare in the earth (though named from it), and which has not been recognized in the sun.—*Good Words*.

Selected for "The Friend."

### Vanity.

Vanity is exceedingly misplaced, when ranked, as she commonly is, in the catalogue of small faults. It is under her character of harmlessness that she does all her mischief. She is, indeed, often found in the society of great virtues. She does not follow in the train, but mixes herself with the company, and by mixing, mars it. The use our spiritual enemy makes of her, is a masterstroke. When he cannot prevent us from doing right actions, he can accomplish his purpose almost as well "by making us vain of them." When he cannot deprive the public of our benevolence, he can defeat the effect to ourselves, by poisoning the principle. When he cannot rob others of the good effect of the deed, he can gain his point by robbing the doer of his reward.—*Hannah More*.

*The Trailing Pine of Siberia*.—The curious tree or bush known to the Russians as "ked-revnik," and rendered in the English translation of Vrangell's Travels as "trailing cedar," is one of the most singular productions of Siberia. I hardly know whether to call it a tree, a bush, or a vine, for it partakes more or less of the characteristics of all three, and yet does not look much like any of them. It resembles as much as anything a dwarf pine tree, with a remarkably gnarled, crooked, and contorted trunk, growing horizontally like a neglected vine along the ground, and sending up perpendicular bunches through the snow. It has the needles and cones of the common white pine, but it never stands erect like a tree, and grows in great patches from a few yards to several acres in extent. A man might walk over a dense growth of it in winter and yet see nothing but a few bunches of sharp green needles, sticking up here and there through the snow. It is found on the most desolate steppes, and upon the rockiest mountain sides from the Okhotsk Sea to the Arctic Ocean, and seems to grow most luxuriantly where the soil is most barren and the storms most severe. On great ocean-like plains, destitute of all other vegetation, this trailing pine lurks beneath the snow, and covers the ground in places with a perfect net-work of gnarled, twisted, and interlocking trunks. For some reason it always seems to die when it has attained a certain age, and wherever you find its green spring foliage, you will also find dry white trunks as inflammable as tinder. It furnishes almost the only fire-wood of the wandering Koraks and Chookchees, and without it many parts of northeastern Siberia would be absolutely uninhabitable by man. Scores of nights during our explorations in

Siberia, we should have been compelled to camp without fire, water, or warm food, had not nature provided everywhere an abundance of trailing pine, and stored it away under the snow for the use of travellers.—*Tent Life in Siberia*.

### THANKFULNESS.

Selected.

For beauty in this world of ours,  
For verdant grass and lovely flowers,  
For song of birds, for hum of bees,  
For the refreshing summer breeze,  
For hill and plain, for streams and wood,  
For the great ocean's mighty flood,—  
In every thing give thanks!

For the sweet sleep which comes with night,  
For the returning morning's light,  
For the bright sun that shines on high,  
For the stars glittering in the sky,—  
For these, and every thing we see,—  
O Lord! our hearts we lift to Thee.  
In every thing give thanks!

Selected.

### ODE TO WISDOM.

No more to fabled names confined,  
To Thee, supreme, all-perfect mind,  
My thoughts direct their flight:  
Wisdom, thy gift, and all her force  
From Thee derived, unchanging source  
Of intellectual light!

O send her sure, her steady ray  
To regulate my doubtful way  
Through life's perplexing road,  
The mists of error to control,  
And through its gloom direct my soul  
To happiness and good.

*Elizabeth Carter.*

Selected.

### RESIGNATION.

The air is full of farewells to the dying,  
And mournings for the dead;  
The heart of Rachel for her children crying,  
Will not be comforted!

Let us be patient! these severe afflictions  
Not from the ground arise,  
But oftentimes celestial benedictions  
Assume this dark disguise.

We see but dimly through the mists and vapors;  
Amid these earthly damps,  
What seem to us but dim funereal tapers,  
May be Heaven's distant lamps.

*Longfellow.*

### Scientific Notes.

A recent book on "Workshop Appliances," by C. P. B. Shelley, in the chapter on measuring instruments, gives a description of Whitworth's "Millionth Measuring Machine," an instrument so marvellously delicate that it enables us to detect the expansion of a one-inch bar produced by the touch of a finger. Another machine of the same kind, when proper precautions are taken, renders distinctly perceptible a difference of one 2,000,000 of an inch.

In some recent experiments on the effect of electricity on plants, a galvanic current was made to pass through certain portions of the Lady Slipper (*Balsamina impatiens*). This plant was selected partly because it was easily procured, and partly as being very sensitive to external agents. Its stem is impregnated with juices which afford a ready passage to electricity, and its delicate-tinted flowers indicate by their changes of color the influence of the current traversing them. After half an hour's passage of a feeble current there was no sensible effect, but the plant left to itself gave signs of enfeeblement, and the part above the point where the current entered

quite dried up. When a stronger current was used, the plant soon indicated disorder by the drooping of the leaves all along the stem, and, left to itself, soon withered. In these experiments the plant was killed by the decomposition produced by the electricity in the tissues. This was proved in the following manner: A branch of the Balsamina, with delicate rose-colored flowers, was exposed to the influence of an alkali, such as potash or ammonia, and the rose-tint was thus changed to blue. On placing another branch in the galvanic current, the same effect was produced in the flowers near the wire connected with the negative pole of the battery, showing that alkaline substances had accumulated there, which could only have been derived from the decomposition of the tissues of the plant. In the same manner, by reversing the conditions, and connecting violet-colored flowers with the positive pole, the presence of an acid was shown by the change of the blue tint of the violet color to red.

The experiments were extended to fruits and seeds. The current was applied for several minutes to an apple on a branch which bore several nearly ripe. After some days the apple fell off, seemed more matured than the others and soon decayed. Similar experiments were made on pears and peaches with the like results.

The current was next made to act on seeds which had been soaked in water to make them conductors of electricity. These seeds, and some through which the current had not been permitted to pass, were then sown in pots filled with good garden earth. The electrified seeds germinated sooner and at first showed a more rapid growth, but ere long were overtaken by the others.

The scientific expedition which wintered at Mossel Bay, Spitzbergen, report that during the night of winter, when walking between high and low water, every step leaves upon the snow a very intense luminous mark, bluish-white. This had before been observed by Arctic travellers, and attributed to the decomposition of animal substances; but it was found to be due to thousands of minute crustaceans, for which the snow, moistened with salt water, seems to be the favorite locality. These small animals were observed at a temperature of 18° below the freezing point of water. At this temperature, the human feet, as well as all bodies drawn upon the ice moistened with sea-water, leave an impression of a magical aspect.

The preparation of Linden bark for matting and other purposes, forms quite an important branch of Russian industry. A large amount is exported to England and Germany; and some of the inland uses to which the material is put are grain-sacks, box-covers, wagon-covers, carpets, sieves, sails for canal boats, and shoes. In the spring or early summer, when the flow of sap facilitates the separation of bark, the peasants repair, with wives and children to the forests. The lower part of the bark is generally prepared for roofing purposes, being heated and pressed into the form of plates. That of the upper stem and the branches is bound in bundles and put in water, where it is left for several months. Then it is dried in heat, divided into thin bands, and woven into mats of various strength. The strongest of them are sold at Nishni-Novgorod at about \$25 the hundred. The yearly production of mats is estimated at 14,-

00,000. For this no fewer than 1,000,000 inden trees are hewn annually.

Sea-water is disagreeable to take, but bread prepared with it, is said to be agreeable to the taste, and to keep longer than ordinary bread. It is very wholesome. During a passage of five months, from Havre to San Francisco, by a sailing ship, the *Louisianne*, having on board 160 passengers and 25 in crew, sea-water bread was exclusively used. There was not, during this long time, a single case of illness. It is said to be especially valuable in cases of dyspepsia, scrofula and goitre.

The Brighton Aquarium (England) has recently been enriched by the addition of a young seal, which was caught by some Yarmouth fishermen. It has a habit of sitting upright in the water with his head and houlders above the surface, looking inquisitively at every thing about him. When satisfied with the condition of things about him, he half closes his eyes and pats his stomach with his right flipper, or flaps both of them across his breast in a ludicrous manner, exactly as a abman warms the tips of his fingers on a winter day by swinging his arms vigorously across his chest and striking his hands against his body on either side. It is very well-behaved and takes food from the hand.

#### Memoirs and Letters of Sarah Hillman.

Our dear friend, Sarah Hillman, a minister of the Northern District Monthly Meeting, Philadelphia, who deceased the 11th of Ninth month, 1855, aged 61 years, left behind her letters and memoranda from which some selections are proposed for the pages of "The Friend."

She is still, by many, well remembered as faithful hand-maiden of her dear Lord; and hile prompt and diligent in His service, was nevertheless of delicate constitution and feeble bodily ability; being by her contemporary and worthy fellow-laborer in the gospel field, Thomas Kite, thus appropriately characterized: "A precious jewel in a very delicateasket."

Notwithstanding this, the gift committed, is recorded of her, was occupied with godly ear, and to the edification of the sincere-hearted; and though suffering from weakness and disease, she often endeavored to cheer her friends in that day of conflict and trial, to hold on their way without faltering, believing the Lamb and his followers would finally have the victory.

The Diary, as submitted to the hands of the compiler, commences about the 20th year of her age. Though thus early penned—for wisdom is the grey hair unto men—it is believed that by its solid perusal those of punger years may be encouraged by the faithful dedication and faithfulness of a heart sweetly warmed by the Saviour's love, to follow her as she followed Christ; those feeling the deep inward stirrings, the effectual livings, the purifying baptisms of the Holy Spirit preparatory to the solemn work of the ministry, may read and ponder how one of an earlier day was taught in the school of great self-reduction, and under the discipline of the cross of Christ gradually, and, as in the back-land of the desert, received that holy, qualifying power of the anointing to bear the messages of the Lord unto the people; and parents and teachers may hereby be incited to diligence in the imperative duty of watching over and right-

ly training their interesting and highly responsible charge, in the nurture and admonition of the Lord; who will require of them, as delegated shepherds, a strict account for the required care to promote the spiritual growth, in good-hiking before Him, of this precious portion of His heritage.

[Note.—It may be proper here to state, before proceeding with the diary, that the compiler in making slight verbal corrections that seemed to be needed, has been careful not to alter the sense of passages, neither to draw therefrom unwarrantable conclusions.]

"1814. 9th mo. 24th. Desiring that my life may be more consistent with my profession—that of following a crucified Saviour—I am induced to pen some of the occurrences of my daily life, in order that I may not (if I should stray) forget what I have experienced heretofore, though but a child—a child indeed in the work of salvation. Oh! that I might not lose what I have known, but that I might travel on from one degree of strength to another till I arrive at the stature of a perfect man in Christ. 'Mark the perfect man and behold the upright: for the end of that man is peace.'

The company of dear Asenath Hunt has been strengthening. Believing her to be a qualified instrument in thy hand, dearest Father, to labor for the restoration of Zion in its ancient purity, O! that she may so run as to receive the answer of peace; and continue to wear the inscription of, 'Holiness to the Lord.'

My mind has often been impressed with the belief that at a future day, or that at some time perhaps not so far distant as I am willing to think it, I shall, if obedient, be under the necessity of expressing myself to my brethren and sisters even in their solemn assemblies. O, that ere I embark on this sea of trial, thou, O gracious Father, would furnish me with convincing evidence, that it is a flame of thy own kindling, and touch my lips with a live coal from off thy holy altar, that I may not bring reproach on Thy name nor the religion which I profess. Be pleased, dearest Father, to bring me out of the spirit of the world, to stain the glory thereof in my view, and leave nothing for me to rely upon but thy holy arm, which alone is sufficient to save.

Considering the great want of attention in parents to the very important concern of rightly bringing up their children in the nurture and admonition of the Lord, as they are expressly commanded, my mind is at times clothed with desire that those under my care\* may be instructed by thee, dearest Father, to love thee, fear thee, and obey thee, that thus there may be a succession of instruments raised up to publish thy blessed truth, that it may spread from sea to sea, and from the rivers to the ends of the earth. Cause thy visitations of love to extend, dearest Father, to all ranks and classes of the people, that so they may join in ascribing to Thee thy due—praise forevermore. —

Ninth mo. 25th. Feeling feeble in health, and it being a very dull morning as to the state of the atmosphere, my mind seems to partake of the gloom; but I feel a hope it may disperse ere long, and a brighter prospect present to view. As we see in the outward, after a long season of rain the sun appears more beautiful, so after a season of poverty and

\* Sarah Hillman was engaged in that useful employ of teaching school during many years of her life.

gloom to be favored to witness the arising of the Sun of righteousness is indeed a source of the greatest consolation to a mind desirous of being enlightened and led thereby. This, I trust I may say, is my desire, however I may deviate from my intentions; indeed it is at times my most ardent wish; but at others, when overtaken by the love of pleasure, I am almost ready to forget on what I yesterday built my hopes—even heaven. O! that Thou, dearest Father, wouldst enable me to be more circumspect in my conduct and conversation among men, and in my going in and out before the children. Favor with thy light to direct their feet in the right path, that thy name may be exalted in the earth; and that thy servants may not labor in vain, but that their example may influence others to follow them as they are endeavoring to follow Thee.

26th. Yesterday was indeed a day of exercise to my mind which I trust will not be forgotten; neither will prove to my disadvantage though it amount to nothing more than silent travail. I have been made sensible this afternoon, that little intimations, if rightly attended to, always bring their reward. In thy fear, I trust, dearest Father, I was enabled to take a book in hand containing some salutary counsel to read to my scholars; when Thou wast pleased to awaken one of their minds to attend seriously thereto. For this, I hope, a degree of gratitude has ascended up to thy holy throne, and desires that thou would be pleased to enable me again to perform any little service of this kind when consistent with thy blessed will. Open the hearts of the children, that they may feel desirous of serving Thee. Make them to know that Thou alone art worthy to be feared, loved, and obeyed. Grant, dearest Father, that she whom thou hast been pleased this day to awaken, may still follow on to know Thee, and be enabled to ascribe the praise to Thee. And that those who have not yet felt the power of Thy love may feel it, so that they also may be made willing to follow Thee even in tribulation.\*

(To be continued.)

From the "London Atheneum."

#### The Story of William Barents.

Of all the adventurous voyages of the Dutch—it may almost be said of any nation—the most remarkable were the last of the three undertaken in 1594-1596, by the illustrious William Barents, to discover a northeast passage by the sea of Tartary (Siberia) to Cathay and China, as related by Gerrit de Veer, whose work was edited by Dr. Beke, for the Hakluyt Society, in 1853.

On this third voyage, after passing round the northeast end of Novaya Zemlya, Barents reached a bay, most suitably named by him Ice Haven, where, being unable to extricate his ship from the ice, he and his crew, seventeen in number, "were forced in great cold, poverty, misery and grief, to stay all the winter." Fortunately they found a large supply of drift wood, and with this material, eked out by planks from the fore-castle and poop of the

\* If upon reading these notes, there are Friends who have MSS., either letters or otherwise, concerning Sarah Hillman, suitable for publication, it would be kind in them early to place them where they may be accessible to the compiler, to be incorporated with these memoirs as they are now passing through the press. Such, if left at Friends' Book Store, 304 Arch street, might be so used; and when done with again left there, or returned to their respective owners.

ship, they built a house, into which they removed all their provisions and valuables. A chimney was fixed in the centre of the roof, a Dutch clock was set up and made to strike the hours, bedsteads were placed along the walls, and a wine cask was converted into a bath. The surgeon wisely prescribed bathing as a necessary preservation of health. Snow storms and gales of wind prevailed throughout the winter, which had the good effect of drifting snow round the house as high as the roof, and thus raising the temperature within. But their sufferings were intense; and it is touching to read of those poor fellows asking their skippers to let them make merry on Twelfth night, with a little sack and two pounds of meal.

In the following summer, Barents and the survivors of his crew (three or four having died during the winter) set out on their return voyage in two open boats, which they had built with the timbers of their ship, and they marvellously reached home in safety, with the exception of their able leader, who, having been long ill, sank under the fatigues of the voyage, and like Behrend, La Peyrouse, Franklin, and now Hall of the Polar, found a grave in the midst of his discoveries.

The voyage of Barents, though the first, remained the only one in which the northeast end of Novaya Zemlya had been rounded; so that the house in the Ice Haven remained unvisited for nearly three centuries. But the spell was broken in 1871, when the Norwegian, Elling Carlsen, the circumnavigator, both of Spitzbergen and Novaya Zemlya, reached the spot on September 9th of that year, and saw the house still standing at the head of the bay.

He found it 32 feet long by 20 broad, and the planks of which it was composed were 1½ inch thick by from 14 to 16 broad. The materials had evidently belonged to a ship, and among them were several oak beams. Round the house were several large puncheons standing, and there were also heaps of reindeer, seal, bear and walrus bones. The interior is described by Capt. Carlsen, exactly as represented in the curious old drawing in Gerrit de Veer's narrative, which was reproduced in the edition of the Hakluyt Society. The row of standing bed places along one side of the room, was exactly as shown in the drawing, and several of the articles represented in the drawing, the clock, the halberd and the muskets, were still in their old places.

Mr. Markham gives a list of the numerous articles, down to the minutest scrap, found and brought away by Capt. Carlsen, and he remarks: "The house in which Barents and his gallant crew had wintered, can never have been entered by any human foot during nearly three centuries that have since elapsed. There stood the cooking pans over the fire place, the old clock against the wall, as shown in the drawing, the arms and tools, the drinking vessels, the instruments, and the books that had beguiled the weary hours of that long night, two hundred and seventy-eight years ago. 'The history of China,' points to the goal which Barents sought, while 'the Manual of Navigation' indicates the knowledge which guided his efforts. Stranger evidence never told a more deeply interesting story."

The articles enumerated by Mr. Markham are, perhaps, the most valuable in an antiquarian point of view; but not the least interesting are the flute which will still give out a

few notes, and the small shoes of the poor little ship's boy, who died during the winter.

On Capt. Carlsen's return to Hammerfest, in Norway, Mr. Lister Kay, who happened to be there on his way to Lapland, purchased of him these remains of Barents, which he liberally ceded to the Dutch Government at the price he had paid for them, thereby securing to the native land of the great navigator, the precious relics, which are now safely deposited in a room in the Foreign Office at the Hague.

For "The Friend."

### The Influence of Wealth.

It must appear obvious, we think, even to the most indifferent observer, that the accumulation of wealth, or the influences attendant thereon, has had a prejudicial effect upon our religious growth as a people, dwarfing us in comparison with the high standard set up by our fathers, and leading far away from that simplicity which characterised the early and prosperous days of the Society.

The result is indeed most painfully apparent when we look abroad to our religious gatherings, dwindling in numbers and diminishing in life; so that we can scarcely fail to be reminded of those expressive words of our Saviour: "*An enemy has done this.*"

The world has indeed been too much with us; or we have not been sufficiently fortified against its attacks, and an advantage has been gained, detrimental to a growth and establishment in the ever blessed truth.

The apostle John declared, "if any man love the world the love of the Father is not in him." And whilst these truths have been proclaimed from our galleries as far back as my recollection goes, they have failed to produce any very apparent beneficial effect; and the seed thus sown, seems to have fallen on barren ground.

Many of the most favored ministers of our Society in former days, were men of small means in an outward sense; but as they placed their dependence in, and relied solely upon that which had qualified them for service in the Church, their influence became extensive, and their lives, even more than their words, with truth's power became eloquent.

Woolman, and Jordan, and Healy, and many others we might name, were all of them men whom the world could not seduce by its speciousness or even by its blandishments; and, while clothed upon with mortality, their eyes were fixed upon a better country, to which they were drawn by an irresistible attraction.

When the children of Israel were smitten before the enemies of the Lord, "it was the concern of Joshua to ascertain the cause, and after a time of much search, it was found that the Babylonish garment and golden wedge in Achan's tent had produced the result; and how often since that day has similar causes been attended with like effects; men of orderly lives, whose influence for good has been very much lessened, by an attachment to worldly possessions, and a steady engagement in the pursuit thereof.

"We brought nothing into the world, and it is certain we can carry nothing out," saith the apostle, and enjoins, having food and raiment, therewith to be content; and adds, "godliness with contentment is great gain."

"There is a sore evil," says Solomon, "which I have seen under the sun, namely; riches

kept for the owners thereof to their hurt; and how often have we witnessed wealth left to children which has proved a positive injury. Solomon himself was an example of this kind. The treasure left by his father (according to Josephus) was immense. The effect of which was to induce foreign nations to court him in favor, with whom he made affinity, even forming matrimonial alliance with their women; and, although highly favored with knowledge of the true and living God, yet sorrowful to relate, he became an idolater, and bowed to the God of his wives."

Horace, a heathen poet, has said, *Prescentur sequitur cara pecuniam*. An increase of wealth is followed by an increase of care. And Juvenal declared that, "wealth which is acquired by so much labor and so many privations, can be preserved only by greater anxiety and solicitude." As imitated by Dr. Johnson:

"Wealth heaped on wealth no peace nor safety buys,  
The dangers gather as the treasures rise."

What a lesson to the Christian does the language of these ancients, on whom the light of revelation never shone, convey; and how astonishing, that so many apparently considerate people, should be so eager to embark upon this troubled sea.

R.  
Haddonfield, 10th mo. 1873.

For "The Friend."

"Blessed are the pure in heart for they shall see God."—Matt. v.

It is our privilege to believe that Moses the great lawgiver, stood first among the pure in heart, and meek of his day; for it is said of him, "this man Moses was very meek, above all the men which were upon the face of the earth," choosing rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season; and refused to be called the son of Pharaoh's daughter, esteeming the reproaches of Christ, greater riches than all the treasures of Egypt. For years he kept his father's flock, in the bare parts of the desert, which prepared him for the important work of his after life; and when the angel of the Lord appeared in a flame of fire out of the midst of a bush, Moses turned aside to see this great sight, why the bush burned and was not consumed. When the Lord saw that he turned aside to see, God called to him out of the midst of the bush, "Moses, Moses! and he said, here am I," at which God said draw not nigh hither, put off thy shoes from off thy feet, for the place where thou standest is holy ground." No doubt, he obeyed this simple command in childlike faith and purity of heart, as we read in the sacred volume, Moses hid his face for he was afraid to look upon God. Again, when the Lord called him, and said unto him, "Come near and I will send thee unto Pharaoh, that thou mayest bring my people the children of Israel out of Egypt;" he queried with the Almighty "who am I, that I should go unto Pharaoh, and behold they will not hear me nor hearken unto my voice, for they will say the Lord hath not appeared unto thee?"

This was the second time the Lord had visited Moses, and it would seem in him not only a want of faith in the most High, but distrust of his almighty power; incomprehensible to some of the present day, that one whom it is said "the Lord spake face to face," should doubt, after the extraordinary revelations of his holy will, or hesitate to obey His

mandates; but we must observe in the lives of the most favored of the Lord's servants that human nature is the same in all. The third time Moses reasons with God, he leads his own unfitness: "Oh my Lord, I am not eloquent, neither heretofore nor since thou has spoken to thy servant, but I am of slow speech, and of a slow tongue! Mark the gracious reply of Him who made man's mouth! "I will be with thy mouth, and teach thee what thou shalt say." "I have made thee a god unto Pharaoh, and Aaron shall be thy prophet."

Notwithstanding this condescension, long-suffering and kindness vouchsafed to the great sinner, he still further provoked the Lord, saying: "Oh my Lord, send by the hand of whom thou wilt send!" and the anger of God was kindled against Moses.

We have no record wherein to find greater grace and confidence manifested to his creature, than in the life of Moses; and yet how often we find the same thorn in the flesh to afflict him; poor, weak human nature failing to do, what the spirit would gladly effect. The marvellous signs and wonders in Egypt, and the journey through the wilderness towards Canaan, afford material for an abler pen than the writer, who simply desires to call the attention of the young and inexperienced, to a practical knowledge of those great truths, which are given for our instruction.

After Moses had been forty days in the mount, where he received the tables of stone, written upon by the finger of God, the Lord said unto him, get thee down; and Moses trembled and went down, and when he beheld the great sin which Aaron and the children of Israel had committed, his anger waxed hot, and he cast the tablets out of his hands, and brake them beneath the mount, forgetting the Lord could reprove them in his own way and time. There is another striking circumstance in the life of this pure and holy man; when God commanded him to speak to the rock, he took the rod and smote it twice; disobeying the direct command of the Lord, for which act he was not permitted to enter the promised land. Num. xx. 11.

It is not the design of the writer, to mark the shortcomings of this eminent servant of the Lord, but to set forth the necessity of keeping on the watch, when faith and patience are sorely tried, and for the sake of those who are ready to fear they can not attain to such a state of perfection. Let us then hold forth the language of encouragement to some of the readers of the "Friend," who have already turned away after perusing the brief view of the lives of the three meek men of Chester county, saying: "We can never attain to such a perfect state." "Surely their trials are not as great as ours, or they of like passions." "My grace is sufficient for you;" the grace of our Lord Jesus Christ; it made them what they were, and is still able to smother all the fiery darts of the enemy, and remove mountains of difficulty out of the way.

James Emlen, Samuel Hilles and Joseph Roads were shining lights in their day; but each had their trials and peculiar characteristics. James Emlen's knowledge of human nature was profound, and with a discerning spirit he was admirably qualified to speak a word to the weary, and many, were they now living, could set their seals to this; and his memorable sermon in the women's Yearly

Meeting; his strong and persuasive appeal to mothers, for the right training and education of their children; and his touching and beautiful address to the children, put forth in the demonstration of the Spirit and with power, bearing witness in their hearts (with the still small voice which had spoken to them before), until there were many tearful eyes to be seen, and not a discordant sound to be heard; and as he closed, it would seem truly as if it was none other but the house of God, and this the gate of heaven: "they were, indeed, words fitly spoken, like apples of gold in pictures of silver." But space and time fail me to tell of all that might interest the weary traveller Zionward, or encourage the young to rely upon the grace of their Saviour; yes, time would fail to tell of Nathan Sharpless, Jesse Maris, Joseph and Joel Evans, and of many others of Chester county, who were meek and pure in heart and of the children of God, and who are now, we humbly trust, singing the song of Moses and the Lamb.

"The way which leads to life is wonderfully straight; oh, how little is the door, and how stripped must we be to pass thereby."

## THE FRIEND.

ELEVENTH MONTH 1, 1873.

Men naturally love ease and self-indulgence; they are unwilling that anything should stir up the nest in which they are reposing. In our spiritual as in our natural life, we are easily tempted to indulge in "a little more sleep, a little more slumber, a little folding of the hands to sleep." Most of us dislike that which will call forth opposition, and too many shrink from bold avowal and support of the truth if it must be attended with controversy. How many in our religious Society who once knew what was the right, and saw that it was in danger, to whom, if faithful, ability would have been given to have stood as watchmen and standard-bearers, have shrunk from a righteous defence of the truth, until their spiritual vision became dimmed; they lost the armor in which they once trusted, and in their journey from Jerusalem to Jericho they have fallen among thieves, who have stripped them and left them half dead.

Such as these not only lose their own standing in the Truth, but they are in a fearful degree responsible for ravages made on the flock, over which they stood as delegated shepherds, whose duty it is to guard and defend it from the wolves that come in sheep's clothing.

That is an instructive though an almost appalling account given by S. Fothergill in a meeting in England. He said that a Friend who, when young, was religiously concerned for his soul's salvation, and also for the welfare of the church, had a dream, in which he saw himself placed in a green field or pasture, walled round, and lambs feeding in it well-favored and in good order, and in the middle of the enclosure a clear spring for them to drink at. A sharp instrument was given to him with which he was to guard the well, that nothing should foul or muddy it. He was also directed to keep up the wall, and if any breaches were made in it he was to repair them. Samuel said that years after this Friend had had this dream, he met with him

in America. He had fallen away from the good condition he had once been in, and was plunged into darkness and distress. While in this state he had another dream, in which he again saw himself in the same field he had seen in his vision in early life, but it had lost its verdure, the lambs were distempered and scattered, the wall was much broken down, the water in the well or spring was fouled and muddy, and serpents in it hissed at him, and he found he could not destroy them because he had lost the weapon formerly given to him; and as he stood looking at the diseased and perishing lambs, he thought he heard a voice saying, *All these will I require at thy hands.*

What an awful warning! But those who are willing, in abasedness of self, to stand uprightly and firmly in defence of the Truth as it is in Jesus, not drawn aside by desire for popularity, nor turned back by the frowns, the misrepresentations or the contumely of false brethren, experience preservation through all the suffering and reproach they may have to endure; and they know their feet to be more and more firmly planted on the Rock of ages, and feel in themselves that it standeth sure, having this seal, the Lord knoweth them that are his.

May the number of these be multiplied, and may they labor, in the meekness of wisdom, to build up the wall that others have allowed to be thrown down, to keep the well-spring in the "garden enclosed," from mixing with the "muddy waters of Babylon," and to shield and feed the lambs by training them, as much as may be in their power, in the doctrines and testimonies of the gospel as held by Friends.

### SUMMARY OF EVENTS.

FOREIGN.—Paris dispatches say that the Monarchists have determined not to hasten the re-opening of the Assembly. The day will be left to the appointment of the Ministry. Strong opposition is manifested to the restoration of a monarchy under the Count de Chambord, and it is said the monarchists are less hopeful. Bonapartists and Republicans alike, protest against the proposed action of the monarchists. Bishop Dupanloup has charged the cures of his diocese to pray for the restoration of the monarchy. The *Memorial Diplomatique* says, the Count de Chambord has assured the foreign Powers that his policy will not be aggressive, and he will not attempt to reinstate the Pope in his temporal possessions. The prefect of Lyons has issued an order suspending the municipal council of that city from office for two months, and appointing a committee of forty citizens to administer the duties of the council in the interim. Elections for municipal officers were held in various places on the 26th ult., and resulted generally in the success of the Republican candidates. Republican petitions, although prohibited by the prefects, are being circulated throughout France, and being numerously signed by the most influential citizens.

On the 22d ult. John Bright addressed an assemblage estimated to number 16,000 persons, at Birmingham. He commended the Gladstone administration for its just legislation, with the exception of the Education act, which, he said, was framed in a hasty manner and needed amendment. He advocated the repeal of that clause by which denominational schools are allowed to receive payment from the public rates. Speaking of the war against the Ashantees, he expressed the belief that the interests and honor of the country would be best consulted by the absolute withdrawal of the British colonies from the Ashantee coast at no distant date. He then referred to the relations between Great Britain and the United States. Some Englishmen had spoken of the Treaty of Washington as humiliating to Great Britain. He on the contrary maintained that the conduct of the administration in reference to that treaty, and subsequent arbitration under its provisions, had added a nobler page to the history of England than had all the bloody battles recorded in its history.

Large shipments of specie from England to the U.

States continue. The bank rate of interest is now 7 per cent.

The Cunard Steamship Company have determined to withdraw their vessels from the West India service, at an early day, and establish a daily line between Liverpool and New York.

Nothing has been heard from the steamship Ismalia, which sailed from New York for Glasgow about a month ago, and it is feared the vessel has been lost.

London, 10th mo. 27th.—Consols, 92½. U. S. sixes, 1867, 96¾; do. 5 per cents, 91¼ a 91½.

Liverpool.—Uplands cotton, 9d. a 9¼d.; Orleans, 9¼d. a 9¾d.

The situation in Spain has not materially changed. The insurgents in the south maintain their ground obstinately, and have captured a number of Spanish vessels. The Carlists announce that their forces defeated the Republican troops near Puigcorda, recently. It is said that the government of Germany has sent two cavalry officers to accompany the Carlist head-quarters in its movements in Spain.

A dispatch from Central Asia brings intelligence of frightful scenes in Khiva upon the evacuation of the capital by the Russian troops. The Youmuds, soldiery of the khan, revolted and plundered the town, after which they destroyed it. In addition to these outrages the Uzbeks slaughtered 16,000 of the Persians who were emancipated from slavery. The Khan sent to General Kauffman asking assistance to enable him to restore order.

Baron Penedo, charged with the settlement of the conflict between the Church and State authorities in Brazil, has reached Rome and presented his credentials to the Pope.

Cardinal Petra is about to leave Rome for France on a mission from the Vatican to the French bishops. The Jesuits must quit their establishment in Rome the 2nd inst. The Father General of the Society will go to Belgium.

Bombay, by the last census, had 816,560 inhabitants, and Madras 427,770.

The Pall Mall Gazette publishes a table showing that 17,422 lives have been lost at sea on the coast of the United Kingdom, during the past twenty-three years.

The Baltic Gazette says the Russian government has been obliged to order arrests among the Roman Catholic clergy in the diocese of Chelm, a conspiracy having been discovered among them.

A Madrid dispatch of the 27th says, the insurgent vessels from Cartagena obtained \$2,500,000 in specie, by the plundering of merchant ships off Valencia. It is reported that the insurgents in Cartagena are completely demoralized, and their leaders disagreeing among themselves.

About 300 new vessels are being built on the Clyde, at Glasgow, Scotland.

The emigration in the quarter ending 6th mo. 30th last, from England to the United States was 79,966, British North America 14,905, Australia 4,813, and all other places 1223: total 100,907.

UNITED STATES.—The mortality in Philadelphia last week 263, including 72 children under two years. There were 39 deaths of consumption and 18 old age.

The deaths in New York last week were 514.

Memphis, Shreveport, and other cities in the southwest, are still suffering terribly from the ravages of yellow fever.

The earnings of the Pennsylvania Railroad from 1st mo. 1st, to 10th mo. 1st, 1873, were \$18,720,807, an increase of \$2,501,557 over the same period in 1872.

At the recent election for a Judge of the Supreme Court in Pennsylvania, 466,176 votes were polled, viz., for Gordon 240,235; Ludlow, 225,941. The election did not excite much interest and the vote was therefore far from a full one.

The amount of gold collected in California, between 1848 and 1873, is estimated at \$1,380,700,000, of which about 93,000,000 was mined in 1853.

The ship, Three Brothers has been loaded at San Francisco with 4600 tons of wheat, valued at \$199,000.

According to the reports received by the Department of Agriculture, at Washington, the corn crop of the present year will be below average. That of 1872 was estimated at 1,092,000,000 bushels, that of this year it is expected will fall about 250,000,000 bushels below the crop of last year.

The exports of domestic produce from New York have amounted in the past five weeks to \$37,000,000.

The Markets, &c.—The following were the quotations on the 27th ult. New York.—American gold, 108¾. U. S. sixes, 1881, 113; ditto, 1868, 113; ditto, 10-40 5 per cents, 107. Superfine flour, \$5.15 a \$5.65; State extra, \$6 a \$6.35; finer brands, \$6.50 a \$10.30. Red western wheat, \$1.50; No. 1 Milwaukee spring, \$1.40;

No. 2 Chicago spring, \$1.32. Oats, 46½ a 50 cts. Western mixed corn, 58 a 59 cts.; yellow, 60½ cts.; white, 70 cts. Philadelphia.—Uplands and New Orleans cotton, 16 a 16½ cts. Cuba sugar, 7½ cts. Standard white petroleum, 16 cts. Superfine flour, \$4.50 a \$5.25; extras, \$5.50 a \$6.25; finer brands, \$6.50 a \$10. Amber wheat, \$1.58 a \$1.63; red do., \$1.45 a \$1.50. Rye, 83 cts. Yellow corn, 62 a 63 cts.; western mixed, 61 a 62 cts. Oats, 44 a 50 cts. Smoked hams, 12 a 14 cts. Lard, 8½ a 8½ cts. Clover seed, 9½ a 10 cts. Timothy, \$2.50 per bushel. The cattle market was dull. About 3200 beef cattle sold at 63 a 7 cts. per lb. gross for extra; 5½ a 6 cts. for fair to good, and 3½ a 5 cts. for common. Sheep sold at 4 a 6 cts. per lb. gross: sales 12,000 head. About 9,000 hogs sold at \$6.50 a \$6.62 per 100 lb. net. Chicago.—Spring extra flour, \$5 a \$6. No. 1 spring wheat, \$1.07; No. 2 do., \$1.03; No. 3 do., 98 cts. No. 2 mixed corn, 37 cts. No. 2 oats, 30¾ cts. Rye, 62 a 63 cts. No. 2 barley, \$1.33. Lard, 7 a 7½ cts. Baltimore.—Choice amber wheat, \$1.65 a \$1.70; Ohio and Indiana red, \$1.35 a \$1.45. Western mixed corn, 64 cts.; yellow, 68 cts. Oats, 48 a 52 cts. Cincinnati.—Family flour, \$6.85 a \$7.10. Wheat, \$1.35 a \$1.37. Corn, 45 a 47 cts. Oats, 35 a 43 cts. St. Louis.—No. 2 winter red wheat, \$1.49 a \$1.50; No. 3 fall, \$1.25; No. 2 spring, \$1. No. 2 mixed corn, 41½ a 42 cts. Oats, 32 cts.

WESTTOWN BOARDING SCHOOL.

The WINTER SESSION of the School will commence on Second-day the 3rd of Eleventh month.

Pupils who have been regularly entered and who go by the cars from Philadelphia, can obtain tickets of the Treasurer, No. 304 Arch St., or they can procure them at the depot of the West Chester and Philadelphia Railroad, corner of Thirty-first and Chestnut streets, by giving their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. In such case the passage, including the stage fare from the Railroad Station, will be charged at the School, to be paid for with the other incidental charges at the close of the term. Conveyances will be at the STREET ROAD STATION on Second and Third-days, the 3rd and 4th of Eleventh month, to meet the trains that leave Philadelphia at 7.25 and 10 A. M., and 12.10 and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at the latter place, it must be put under the care of Hibberd Alexander & Sons, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of the City, by sending word on the day previous (through the post-office or otherwise) to H. Alexander & Sons, N. E. corner of 18th and Market Sts. Their charge in such case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same charge they will also collect baggage from the other railroad depots, if the checks are left at their office corner of 18th and Market Sts. Baggage put under their care, if properly marked, will not require any attention from the owners, either at the West Philadelphia depot, or at the Street Road Station, but will be forwarded direct to the School. It may not always go on the same train as the owner, but it will go on the same day, provided the notice to H. Alexander & Sons reaches them in time.

DURING THE SESSION, passengers for the School will be met at the Street Road Station, on the arrival of the first train from the City, every day except First-days; and small packages for the pupils, if left at Friends' Book Store, No. 304 Arch street, will be forwarded every Sixth-day at 12 o'clock, except on the last two Sixth-days in the Twelfth month, and the expense charged in their bills.

Tenth month 18th, 1873.

BIBLE ASSOCIATION OF FRIENDS.

The Annual Meeting of "The Bible Association of Friends in America," will be held in the Committee-room of the Arch Street Meeting-house, Philadelphia, on the evening of Fourth-day, the 5th of Eleventh month, at 8 o'clock.

The members of the Philadelphia Auxiliary, both men and women, and Friends generally, are invited to attend. WILLIAM EVANS, Secretary.

A Stated meeting of the Female Society of Philadelphia for the Relief and Employment of the Poor, will be held at the House of Industry, No. 112 N. Seventh St., on Seventh-day, the 1st of 11th mo, at 3½ o'clock. JULIANNA RANDOLPH, Clerk.

RECEIPTS.

Received from Joseph Armfield, Agent, Englan £1. 10s., vol. 47, 3 copies, and for Samuel Alexandre Samuel J. Alexander, Joshua Ashby, William L. Belows, Samuel Braddurn, James Boorne, John Bottomole John Edw'd Baker, Robert Clark, Jno. Cheal, Willia Graham, Forster Green, Abraham Green, Anna Glove Susanna Grubb, Enoch Halden, John Hodgkin, Samu Hope, John Horniman, Henry Horsnail, Willia Irwin, Susanna Kirkham, James Kenway, Isaac Lloy John Finch Marsh, Thomas Marsden, Manchest Friends' Institute, Samuel Moorhouse, William I Nash, Daniel Pickard, Samuel Pickard, Rachel Ric man, Holman Shephard, Ann Swithenbank, Joh Sykes, Elizabeth Thwaite, Lucy W. Walker, Willia Wright, and Edward Watkins, 10 shillings each, ve 47; for Sarah Elcock, 10s., vol. 44; for John Bellow 13s., to No. 52, vol. 46, 2 copies; for William Richar son, £1, vols. 46 and 47; for William James Le Ta 15s., to No. 52, vol. 47, and for William Bingham, £ 10s., vol. 47, 3 copies.

WESTTOWN BOARDING SCHOOL.

The WINTER SESSION will open on the 3rd Eleventh month. Friends intending to send pupils the Institution are requested to make early applicati to AARON SHARPLESS, SUP'T, Street Road P. ( Chester Co., Pa., or to CHARLES J. ALLEN, Treasur 304 Arch St., Philadelphia.

WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of th Institution are expected to be vacated at the close of t Winter Session, in the 4th month next, Friends w may feel drawn to undertake the duties attached thein, are requested to communicate thereon with eith of the following named members of the Committee.

- Nathaniel N. Stokes, Cinnaminson Post-offi Burlington Co., N. J.
- Charles Evans, No. 702 Race St., Philadelphi
- Deborah Rhoads, Haddonfield, N. J.
- Rebecca S. Allen, No. 335 S. Fifth St., Philae

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

MARRIED, at Friends' Meeting, on Arch St., Phil delphia, on the 9th ult., C. CANBY BALDERSTON, Westtown, Pa., and MARY ANNA BROWN, daughter Nathaniel H. Brown, of Philadelphia.

—, at Friends' Meeting, Fallowfield, Chest Co., on the 23rd ult., CHARLES M. TATNALL, of W mington, Del., to REBECCA L. GIBBONS, daughter Abraham Gibbons, of Coatesville, Penna.

DIED, on the 24th of Sixth month, 1873, ANN CLE son, widow of James Clemson, aged 75 years, a member of Sandy Spring Monthly meeting, Ohio. She h been afflicted for many years, and bore her sufferi with christian patience. She discharged the duties life becoming a true woman; and though she stay with us more than three score years and ten, we loth to part with her.

—, on the 5th of Ninth month, 1873, FRANCES wife of Thomas C. Garrett, a member of Germanto Preparative and Frankford Monthly Meetings, Phi delphia. Endowed with an unusually sympathetic a winning nature, it was in the home circle that her i fluence and her virtues were chiefly felt, flowing th in almost hidden channels to soothe and gladden t poor, the solitary and the afflicted. Humble in t estimate of her religious attainment, and keenly sen tive to the evil that doth so easily beset, she looked her Saviour not only for forgiveness, but for the da and hourly strength needed to overcome. A strong w was moulded and subdued as her Christian life matur. Though she was not wont to express much respecti her spiritual experiences, the whole tenor of life, as w as conversation, showed that her thoughts and affectio were more and more fixed on the unseen and etern so that in seeing the removal of this beloved one aft weary months of suffering, we feel the truth of the la gage, "Our light affliction, which is but for a momen worketh for us a far more exceeding and eternal weig of glory; while we look not at the things which a seen, but at the things which are not seen;" and co solingly rejoice in believing that the song of the 1 deamed, begun on earth, is now evermore hers, "St vation to our God which sitteth upon the throne, a unto the Lamb."

For "The Friend."

John Heald.

(Continued from page 83.)

2nd mo. 12th, 1817. "We went to the meeting at Springfield. After sitting nearly an hour, I said, Friends, maintain the watch. The enemy, I apprehend, is near, watching to catch the unwary. Take care, for he will use every crafty and subtle device to obtain an advantage over the careless. If he can deprive any one of any portion of happiness, he will do it. Well-intentioned people are sometimes beguiled and deprived of real comfort by unwatchfulness. We went home with Nathan Hunt, and in the course of the evening he said he did not know that he was ever better satisfied with a meeting, or the service of it.

13th. Attended Deep River Meeting. Here we saw the first stove since we crossed James' River. There was a large collection of people. It began with: A just weight, and a just measure and balance in outward affairs are essential, and are not more necessary in that sense, than in an inward and spiritual view. It is possible to acquire something and call it by the name of religion, and put it on as a garment and wear it for a while, and then take it off and lay it away, as not having present use for it; and then occasionally put it on again, with a specious outside appearance. Does not this require a just weight to weigh by? A name, a show, an outside appearance—are these weight? The Lord seeth not as man seeth, He looks at the heart; no fallacious appearance deceives Him.

Many things were mentioned and brought forth to view, to be tried; and those present were invited to weigh things with attention, which are of eternal moment.

14th. We attended Pine Wood's Meeting, of large and slow in gathering, and to me rather heavy and dull, but at length I stood up and said, Where much is given, much will be required, and where little is given, there little will be required. Those who have received none of the Lord's mercies, if any such can be found, may hold themselves excused and make no return; but if there be none such on the face of the earth, then have we all received somewhat. We who are here are

all blessed with life, and many with health, and we have food and raiment sufficient for us, and some are earnestly craving more, who have felt little or no gratitude for the many favors they have received. These are partakers of the Lord's gifts and graces without a suitable return being made. Is not this a mark of ingratitude? If we have been receivers of His blessings, and not grateful for the past, what can we reasonably expect will be our situation when we stand in need?

These ideas, some may be disposed to think, will suit such and such, and would allow them to take and improve by them, and thus as it were, hand away to others what they should use to improve by themselves."

J. H. then extended a caution against giving way to a censorious disposition, which would expel love, and bring into the heart envy, hatred and malice. He adds: "My mind seemed raised into light, and heavenly power attended, and out of weakness I was made strong. Soon after the testimony was delivered, I felt my mind bowed in supplication, and then the meeting concluded in prayer for more of the Divine favor, and a return of blessing and praise for that already received.

16th. We again attended Springfield Meeting. Notice had been spreading since we were here before, and a large number of Friends and others collected, and I was deeply concerned and felt myself very weak to have so great a charge on me. In secret I breathed to the Helper of His people for strength and support to bear me through, while the meeting was gathering. Before they had quite all come, I said, Obedience is wanting. This sentiment has fixed on my mind during the time this meeting has been collecting. Manifest knowledge is a great blessing, a great favor, one among the greatest bestowed upon man, yet how we neglect to yield obedience! We cannot be in favor with our Maker, while we are unfaithful in yielding obedience to what is known to be required. Such are led from the paths of piety and virtue into byways and crooked paths, and forsake living mercies for lying vanities, walking in the paths of folly and dissipation. In all this course what do we enjoy? A little portion of that which, if it be somewhat sweet when partaken of, leaves bitterness behind! Instead of the reward of obedience, those who go into the paths of folly often partake of a bitter cup, which makes their pleasure less than it appears to be. After a time of dissipation, when all is still, as in the night when retired to rest, what sadness of heart, what distress in secret—the sure reward of disobedience; when, if obedience had been yielded to there would have been peace of mind, a secret satisfaction without condemnation, with a hope of obtaining mercy. The holy apostle has said, that if our heart condemn us, God is greater and knows all things; but if our heart condemn us not, then have we hope toward God. I reminded them of the closing period of life in

a feeling manner. Many felt the force of it with tenderness of heart, as I recited a case I was a witness of, where neglected obedience brought very trying distress, followed by severe repentance. How could any expect that it should be said to them, 'Well done, good and faithful servant, enter thou into the joy of thy Lord, (nor indeed would such a sentence be true) while disobedience was lived in.' I then endeavored to set forth the situation of the obedient, when on the point of leaving this world, rejoicing at the prospect of going into mansions of joy and delight, there to remain forever.

19th. We attended the meeting at Hunting Creek, which in a hilly, thinly settled part, might be called large, though many of the people appeared to me very ignorant of genuine religion. After sitting some time, I addressed them with, 'Whosoever loveth father or mother more than me is not worthy of me, and whosoever loveth wife or children more than me is not worthy of me,' &c. This appeared to me to be a criterion whereby we might try our love. Another saying of our dear Lord seems to lead almost to the same thing, which is, Lay not up for yourselves treasures on earth, but lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, nor thieves break through and steal—adding, Where your treasure is, there will your hearts be also. That which we most love will be our treasure, there our hearts and minds will go. This was a time of hard labor though I thought something was gained."

In the course of John Heald's testimony at Deep Creek on the 20th, he mentioned an affecting case, in which he had been called to visit a man, apparently near the end of life, who felt that he was not fit to die, and had little of that hope which is an anchor to the soul to bear up his mind in that time of trial. The man recovered from his sickness, but instead of taking warning from the experience of his bed of disease, again plunged into the paths of folly and dissipation, choosing to cleave to the evil and refuse the good. The warning to be derived from this sad instance of the perversity of the human heart was held up to view; and in an affectionate appeal made to those present, J. H. said: "I feel a measure of that love that wishes well to all the human family. I wish well to every society, to every class of my fellow-creatures. I wish they would all refuse the evil and choose the good. I wish the sincere, the honest-hearted to be encouraged, though they may feel impoverished and go mourning on their way, to keep as near the good as they may be favored to do, and to beware of formality. How dangerous it is to get into this, to have nothing but an outside sanctified show, while the mind in secret is running after the delights or gratifications of the world. Beware of this, for the All-seeing Eye will behold it. Instead of worshipping Him in Spirit and in truth, some-

thing else is adored." He adds: "The minds of the people were solemn for the time, and I hope it will be for their profit."

The incident above mentioned by J. H. tends to confirm the remark that has been made by persons who have had large opportunities for observation, that but little reliance is to be placed on what are called death-bed repentances. A recent writer in *The Lutheran Observer*, quotes the remark of a pious English physician, that he had known many sick persons who, soon expecting to die, had been led, as they supposed, to repentance of their sins and saving faith in Christ; and who had eventually been restored to health again. Soon after their recovery, nearly all of them plunged again into the follies and vices of the world. He refers also to the experience of an American physician, whose piety led him to attend not only to people's bodies, but their souls, who stated, "That he had known a hundred or more instances, in his practice, of persons who in the prospect of death had been hopefully converted, but had subsequently been restored to health. Out of them all he did not know of more than *three* who devoted themselves to the service of Christ after their recovery, or gave any evidence of genuine conversion."

(To be continued.)

#### A Remarkable Murder Case.

Leonard Sargeant, of Manchester, Vt., formerly active in politics, and once Lieutenant Governor of that State, has published a pamphlet containing a narrative of and the evidence in a famous murder case which occurred early in the present century. L. Sargeant was one of the counsel for the defence, and his account of the incidents, which covered a period of eight years, is very interesting. The pamphlet is printed for the purpose of giving to lawyers the points in a case which has often been quoted; but additional importance is attached to it from the prominent part taken by the newspapers even at that early day in public affairs.

In 1812 there lived in Manchester a man named Barney Boorn, who had two sons, Stephen and Jesse, and a son-in-law named Russel Colvin, all living with him. Colvin was an eccentric man, supposed to be insane at times, and frequently absented himself for days without notice and without giving any account of his adventures. At last he was missing so long that people began to make inquiries, and suspicions of foul play were aroused. Months and years passed, and yet there was no explanation of Colvin's absence. Some of the neighbors remembered that the Boorn brothers, very shortly after his disappearance, had declared that Colvin was dead, and that they had "put him where potatoes would not freeze." They had not been on good terms with him, and this added to the prejudice against them.

Singularly enough, other circumstances began to accumulate against the brothers. Some children found a dilapidated hat, which was recognized as the one Colvin wore at the time of his disappearance. Search was made for the bones of the supposed murdered man. Soon afterward a dog uncovered some bones beneath an old stump, which at first were pronounced to be human bones, but subsequently were found not to be. An uncle of the boys had a dream in which Colvin came to his bed-side and told him that he had been

murdered. A barn in the neighborhood was mysteriously burned, and it was at once conjectured that the murdered man had been buried under it, and that the fire was intended to destroy all traces of the crime. All these circumstances added to the excitement against the Boorns. Stephen was then out of the State, but Jesse was arrested. He confessed that his brother Stephen had told him a short time previously that he and Colvin had quarrelled, and that he had killed Colvin by a blow on the head. The people of the neighborhood and for miles around spent the next few days in another search for Colvin's bones, but none were found.

Stephen Boorn was brought home. He denied the statement of Jesse and asserted his innocence. The brothers were imprisoned to await the meeting of the Grand Jury. The principal witness before that body was a forger, who had been confined in jail with the Boorns. He reported in detail a confession of the murder by Jesse Boorn, and both the boys were indicted. This was in September, 1819, more than seven years after the disappearance of Colvin. In November the trial took place. Meanwhile Stephen was induced by the remarks upon the hopelessness of their case to confess the crime, in the expectation of mercy from the Court.

This confession was the chief evidence against them. Notwithstanding that it was drawn out by hope of obtaining a more favorable verdict, and that no body had been found as proof of the murder, or even that Colvin was dead, the brothers were convicted and sentenced to be hanged on the 28th of January, 1820. The character of the evidence upon which they were convicted will attract the attention of lawyers at this time as showing what remarkable changes have taken place in criminal jurisprudence. So decisive did the testimony against them appear to be that the mother of the convicts was expelled from the Baptist church, and the father was held as a prisoner for a time, upon suspicion that they must have been accessory to the murder.

A few of the citizens who were disposed to be merciful, signed a petition for the commutation of the sentence against the Boorns. The Legislature voted to change the sentence of Jesse to imprisonment for life, but refused to interfere with that of Stephen. It occurred to Stephen in an interview with his counsel, that it would be a good plan to advertise for Colvin in the newspapers. Up to that point his counsel had believed him guilty, but he assured them that his confession was untrue and he was innocent. The following notice was therefore printed in the *Rutland Herald*:

"Murder.—Printers of newspapers throughout the United States are desired to publish that Stephen Boorn, of Manchester, in Vermont, is sentenced to be executed for the murder of Russell Colvin, who has been absent about seven years. Any person who can give information of said Colvin may save the life of the innocent by making immediate communication. Colvin is about five feet five inches high, light complexion, light-colored hair, blue eyes, about forty years of age."

"Manchester, Vt., November 26th, 1819." Newspapers travelled slowly then, and Stephen's friends had but little hope that this would save him even if his story was true. Three days afterward, says Mr. Sargeant's pamphlet, the *New York Evening Post* copied it, and "the next day it happened that the

notice was read aloud in one of the hotels in New York. Another man standing near, named Whelpley, said he had formerly lived in Manchester, and was well acquainted with Colvin, and related many anecdotes and peculiarities concerning him. Tabor Chadwick, of Shrewsbury, N. J., was also standing near and listened to the conversation, which made a deep impression upon his mind. On thinking the matter over after his return home, it occurred to him that a man then living with his brother-in-law, William Polhemus, of Dover, New Jersey, answered exactly the description of Colvin as given by Whelpley." Finally, he wrote a letter to the *Evening Post*, giving his conclusions. Whelpley saw it, went to Dover, identified Colvin, and, after great effort, induced him to visit Manchester. There was great rejoicing in the town, and Stephen Boorn was brought from the prison to fire the cannon that celebrated his deliverance.

The author truly remarks that this case is without a parallel. To the newspaper alone was due the discovery of the unconscious cause of the trial and conviction of his brother-in-law and the prevention of an unjust execution. It needs no extraordinary vision to see how difficult it would be for such a case so long to remain a mystery in these days, when everybody is a daily newspaper reader. A few points in the Kelsey case, now undergoing investigation at Oyster Bay, may remind the reader of the Colvin case; but if Kelsey is still alive, as some maintain, it is not likely that he can remain undiscovered by his pursuers and unconscious of what is going on behind him for eight years.

For "The Friend."

A letter to a female friend, in the 10th year after John Newton lost his wife, presents a most interesting picture of the vividness of his feelings and recollections, even after that lapse of time; but not less so of the glowing thankfulness and quiet rest, which "the hope of the gospel" had shed over his mind.

Pottswood Green, 1800.

"My Dear Madam: Though through mercy my wounds are well healed, and I am satisfied the Lord has done all things well with me and mine, yet this place revives some old sensations more than any other spot on the globe could do. Here my Eliza Cunningham and very dear Mary languished long, and this was the last house they were both in till they returned to Coleman street, to go out no more till removed in the hearse. There is a wood at a little distance, to which I often resorted, and still resort. If you were there, and the trees could speak, they might tell you much of the exercise of my mind, to which they were witnesses. I call it my Bethel. There in my distress I sought the Lord, and He heard me. There I have since performed, or at least acknowledged the vows I made in the time of my trouble. As my dear Mary was not a young woman, and we had lived together more than forty years, some people have thought I made too much ado, when called to resign her. I pity those who can not feel as I do! They do not know that a union of hearts in the married state, when the Lord affords His blessing, is strengthened daily by a series of reciprocal endearments and obligations in the course of forty years; and that as passion in time abates, friendship is proportionately strengthened and heightened, so that perhaps the flesh feels more at parting at the

end of forty years, than at the end of four. He must have a steady hand, who can draw the exact line between over valuing and undervaluing our creature comforts. The latter was not my fault. Alas! I was an idolater, and I suffered for it. Now all is over, I can be thankful for the years 1789 and 1790. But I would not live them over again for the wealth of the Indies. Yet nothing in the singular history of my life is more wonderful to myself than the manner in which the Lord supported me through the trying scene, and at the close of it. Scarcely in any other way could I have known so much of the power and faithfulness of His promise to give strength according to the day, and of His all-sufficiency; for I had no more of what are called sensible comforts than usual; but still was supported! I know not how, but I well know, that if His arm had not been underneath me I must have sunk like a stone in the water. I learned also in that school, not to be so over-anxious for my friends, when under great trials, as I had formerly been; for I saw, yea, I felt, that the Lord is able to make us equal to any thing which He calls us either to do or suffer. (Hab. ii. 17, 18.) Though the recollection of what I had once, and what I now have not, is seldom out of my thoughts when awake, yet through mercy, I am quite easy—the wound is healed—the scar only remains, and I allow myself to look often upon it, because it reminds me of the skill and tenderness of that faithful Friend, who so managed the wound He made for my good, that nothing now but the scar appears. It also excites humiliation, and reminds me how well I deserved to have been chastised more severely. When I see you and Mr. R. together, I am often reminded how it was once with me. I rejoice for you indeed; I do not envy you; sometimes I am inclined to pity you; and to fear you are too happy in each other. Oh! may the Lord preserve you from the excess of affection, which filled my otherwise happy life with anxious cares, and thorns, and clouds, from the beginning to the end of our union. From these the separating stroke freed me; and if I have not had so much pleasure since, neither have I had so many pains; and, perhaps, upon the whole, and when all deductions are made, my widowhood has been the happiest part of my life; especially as the Lord, by the affection and attention of my dear E., has repaired my loss as far as the nature of the ease will admit. At R—I was in a pleasing bustle; here I have a pleasing retirement. In London, I lived in a crowd; at P—there is a crowd to me. Many vain intruders often tease me most at such seasons as I most desire to be freed from them; they follow me into the pulpit. I hope I do not tone them, or wish to judge them! Often in prayer some idle fancy buzzes about me, and makes me forget where I am, and what I am doing. I then compare myself to a man upon his knees before the King, pleading for his life, or returning thanks for some great favor; in the midst of his speech he sees a butterfly; he immediately breaks off, leaves his speech unfinished, and runs away to catch the butterfly. Such a man would be thought mad; and my vile thoughts prove that I am not free from spiritual insanity. Is it so with you? I believe it is at some times, and in some degree, though I hope you are not so bad as I. As we all spring from one stock, though our features differ, depravity and the common family likeness, which runs

through the whole species; but Jesus came into the world to save sinners; He died for us, and

His hands infected nature cure  
With sanctifying grace.

We hope in a little time to see Him as He is. His precious blood cleanses us from all sins, and makes our defective services acceptable to God. Tell all who love the Saviour (by whatever names they are known) whether ministers or people, that I love them, and pray to the Lord to reward all who showed me kindness for His sake.

I am your affectionate and obliged,  
JOHN NEWTON."

#### The Markets of Paris.

C. C. F. writes to the Baltimore American: We visited at an early hour yesterday morning, the great central market of Paris, which presents a most novel scene to the stranger, being so different from those to which he is accustomed. They are called Halles, and there are in the city eight for wholesale transactions, fifty-seven for retail dealers, and one central cattle market, where the slaughtered meat is sold by auction, either the whole animal, or quartered, where the butchers' stores throughout the city obtain their supplies. It was to this great central market that we repaired yesterday morning. It combining all the peculiarities of the other markets, both wholesale and retail.

The Central Halles cover a space of ground about as large as that occupied by the Camden Street Depot, of the Baltimore and Ohio Railroad, the streets passing through it, but being covered by glass roofs, making the whole one building, mainly of iron and glass. It is, however, divided into ten distinct halles or markets. But the most singular part is the underground portion of the market house, which has parallel lines of tramways extending from the cellars through a tunnel, which passes under the Boulevard Sebastopol and connecting with the Railroad de Centre, nearly a mile distant. This railroad encircles the city and connects with all the other roads, so that the produce for this great market is all brought by this underground tunnel direct into the cellar.

When we reached the market house everything was in full blast, wholesale and retail. Instead of stalls in the retail markets, each dealer is provided with an iron cage about ten feet square, and some only half this size, in which they transact their business, the fronts being provided with folding iron doors, so that they can be thrown open, or closed up at night and locked. This contrivance makes ventilation perfect, and keeps everything secure. They are in rows close together, with passage ways about twelve feet wide between them. One section is for meats, another for cheese, eggs and butter, another for poultry and game, another for vegetables, and another for flour, feed and grain. On the opposite side of each of these pavilions is another for the sale of each of these articles by wholesale, and at least fifty auctioneers were busy selling, each with clerks and cashiers to note the sales and receive the money.

There are numerous other markets, much smaller, but most of them built in the same style in all sections of the city. The whole number of wholesale markets is twenty-two and of retail markets fifty-seven. The Marche

des Herboristes, for the sale of fresh medicinal herbs, is held on Wednesday and Saturday, and the Marche au Pain is daily supplied by bakers from the environs, who are allowed to sell their bread here on condition of its being cheaper than the bread made and sold by the bakers of Paris. This they are enabled to do by the difference of the rent and general expenses in the outskirts as compared with that within the walls. The retail dealers in all these markets pay 20 cents per day to the city for fixed stalls, or 6 cents for temporary stalls. There are also flour markets, and another very popular establishment in the market, which is in reality a market for old clothes. This is called the Marche du Vieux Linge. It is a market for old clothes and stuffs, shoes and tools, and is a very extensive affair. It is about seven hundred feet long by two hundred feet broad, built in iron pavilions, and contains *two thousand four hundred* places for dealers, each of about thirteen square feet, and each and all these stalls are filled with dealers, from which some idea can be obtained of the scene here presented. This was built as a speculation, the city granting the contractor the right to build it and receive the rents for fifty years, at the same time paying the city \$40,000 per annum, and the whole to revert to the city at the expiration of fifty years. It cost the contractor \$700,000. The new stalls set up for the dealers are so elegant, and the articles offered for sale so cleverly "renovated," that the visitor can scarcely believe himself in an "old clothes" mart. It has been a very successful speculation, and the poor man can here procure a very respectable outfit for a very small outlay. These dealers are constantly on the lookout for the contents of rubbish rooms, old clothes, and all the odds and ends that accumulate in an easy living household. The space occupied by this structure is two entire blocks, the streets passing through it being roofed over with iron, glass and zinc. It is a very elegant structure, built like the Grand Central Market, entirely of iron. The roof is about forty feet high, with a greater elevation in the centre, where there is an immense open gallery, reached by two flights of iron stairs. Seeing that there was a crowd of people up there, we ascended, and found a doorkeeper, who required one sou admission. This proved to be a place for the sale of old clothes too far gone for renovation, and the articles were piled up in lines along the floor, through which the purchasers, to the number of probably a thousand, were circulating. Both buyer and seller pay one sou admission, which defrays the expense of this branch of the establishment. Musty-looking old shoes by the cart load were here, shocking old hats, and all manner of women's apparel. They were doing an extensive business, however, and during our ramble we were frequently invited to purchase some threadbare garment, from which it may be judged how shabby the European traveller gets in his outward appearance by the time he reaches Paris. The goods displayed in the two thousand four hundred stalls below looked as bright as new, almost, as the display in the windows on the boulevards, though many of them were slightly out of fashion.

"Be assured, that the more you seek God, the more your faults will insensibly be corrected."

Selected.

O Friends, be ye all watchful, and take heed lest any of the testimonies of Truth be laid waste; for that which leads thee to be weary of bearing witness to the truth, and to lay it waste, the same will lay thee waste, and bring thee into such a state as thou wilt want the Truth to bear witness for thee. Therefore, let all lukewarm ones, who are neither hot nor cold, be awakened; and all that have gone backward, be warned to return to their first love; else the Lord will come against them, and the day hastens that will divide such their portion among hypocrites, except they repent.—*Stephen Crisp.*

## Lapland.

The sight of the camp was barren enough, a few stunted birch trees being the representatives of vegetable life, unless one includes the few patches of bla-bar and the scraps of moss which had been trodden as nearly as possible to the condition of the meagre soil which afforded them their existance.

This scene of desolation and unmitigated dampness was the actual home of the Lappander, and now were we to make acquaintance with a family of these quaint and interesting people. They are true Mongolians, we are told, and much of the poetical is often connected with their names. The Arabs of the north, the dwellers in tents, the proud and ingenious people who are vainglorious of their isolated life and contented with their peacefulness, who have never known war with their neighbors nor feuds among themselves, and who so rejoice in the natural beauties of the country they inhabit that it seems to them the fairest the world can boast.

Surely this is a people with whom it is well to make acquaintance.

The *vagvisare* lifts the flap which serves as an entrance to the tent, and announces our arrival to the family within. It is an ordinary *kata*, perhaps eight feet in diameter, with a fire in its centre, above which is a hole in the roof, to serve as a means of exit for the smoke. We conjecture that such a tent might accommodate two, three, perhaps four persons, and we wait to see how many shall emerge.

One comes forth, a man, dressed in a garment of skin, brown and rusty, with a tall cap, also brown and rusty, which has a long projecting peak. Spangles of brass and other barbarous ornaments adorn his person, and a knife hangs at his side. His face is tanned to the color of his dress of skins; his expression is one of low cunning and arrant knavery, and his bleared eyes, that are watering from the smoky atmosphere in which he has been sitting, lend to his hang-dog face an appearance of dissipation that is melancholy to see. Is there anything of poetry about the creature? Poetry! there is nothing but dirt.

But he is followed by another animal of the same type—an old woman, who grins, and smirks, and chatters; an undesirable, filthy old hag. Then follow a young woman, another woman, a third woman, two more men; and there are still an old man and two women in the tent. We have been deceived by the chroniclers of Lappish traditions, if these are fair specimens of the people. They are a low and filthy herd, who are not inodorous. Dirt is the only thing remarkable about them, and that one sees to perfection. Their

clothes are plastered with dirt, their faces are smeared with dirt, their hands are caked with dirt; they are the princes of dirt, the very personification of dirt.

The reindeer, among which we find ourselves, are good specimens of the animal. Some of the number are fine, handsome beasts, with tall, branching antlers that reach above one's head; but mostly they are not so large, their size hardly exceeding that of a young calf. Many are a dun brown, shading off to white under the belly and round the head, but the greater proportion are of a peculiar mouse color, relieved in the same manner with white. The hair is long and thick, in such dense masses on the creature's sides as to be of surprising softness. They certainly require a warm covering, for in the extreme of winter it frequently occurs that they must endure a coldness of temperature which, measured on the scale of Fahrenheit, would be represented by perhaps 80 degrees of frost. Such cold is of the most intense severity, but it is often reached in Swedish Lapland; it is, in fact, far colder than on the north coast of Norway, where the sea is never frozen up; colder than the very extreme north, where the arctic expeditions have wintered. The lowest temperature recorded in the meteorological register attached to Dr. Sutherland's account of the expedition under Mr. Penny, dispatched by the Admiralty in 1850 to search for traces of Sir John Franklin, is only 41 degrees below zero, or 73 degrees of frost. This was attained on the 24th of February, 1851.

The hair of the reindeer seems to be but indifferently fastened to the skin, and is perpetually falling off. The animal is, in fact, in a chronic state of moult, although not, of course, to such an extent for it to be apparent beyond the mere signs of loose hair on the ground.

Our old friend who had taken us under her charge, was an important personage in the milking inclosure, her duty consisting in lassoing the deer and tying them up ready for milking. The process of catching the animals is very pretty. The weary old woman prepares the rope in her black and shrivelled hands, casts a glance round the herd before singling out her victim; then, with a dexterous throw which seldom misses its aim, she flings the noose round the animal's horns, and hauling in the slack, has the reindeer a most secure prisoner. She then knots the rope about the animal's nose and ties it firmly to a tree; after which she directs her attention to another member of the herd.

When an animal is secured, one of the other Lapps, either man or woman, carrying a dirty little bowl having a long handle, approaches the captive and commences the operation of milking, which, accompanied by many resounding slaps on the deer's udder, is a process of sufficient nastiness to provoke a sentiment much resembling disgust.

Each animal yields about half a pint of milk; a rich unctuous liquid, thick and creamy. We tasted the produce of this herd—with what amount of relish I will not say, since we had seen the warm fluid trickling over the grimy hands of the Lapps. I sipped for the sake of being able to say that I knew the flavor of reindeer milk; but I was sincerely glad to forget the taste by cramming my mouth full of berries of a less nauseous character than the lacteal compound.—*London Society.*

Original.

## JESSIE'S VISION.

She sat on the steps the summer night,  
And watched the clouds in the fair moonlight,  
Watched, as a vision rose to her sight.

A vision rare of a great white throne,  
And a luminous glory 'round it shone,  
Clearer than golden topaz stone.

One there was on that holy seat,  
One with a royal presence sweet,  
With the world and its clouds beneath His feet.

Around Him gathered an angel band,  
Souls of the blest from the heavenly land,  
Radiant and joyous, with beckoning hand:

Beckoning hand to the wondering child,  
'Till her soul of its awe was half heguled,  
And the love in her heart looked out and smiled.

"Mother," she said, as she sought her side:  
"I have seen the Lord who was crucified,  
I have seen the throne, naught else beside.

I have seen the angels beckon to me,  
And the light so pure and heavenly,  
Mother, that sight was fair to see."

Little the mother's tender heart  
Thought with her daughter dear to part,  
Little she dreamed of the coming dart.

One short week—and the child had gone  
To swell the ranks of the angel throng  
She saw in her vision, the clouds among.  
Chester Co., 10th mo. 27th.

## THY WAY IS BEST.

"Father, not my will, but Thine be done."

Thy way, O Lord! Thy way—not mine!  
Although opprest,  
For smoother, sunnier paths I pine,  
Thy way is best.

Though crossing thirsty deserts drear,  
Or mountain's crest;  
Although I faint with toil and fear,  
Thy way is best.

Though not one open door befriend  
The passing guest;  
Though night its darkest terror lend,  
Thy way is best.

So seeming wild without a plan,  
Now east, now west,  
Joys born and slain, hopes blighted, can  
Thy way be best?

My soul by grief seems not to be  
More pure and blest;  
Alas! I cannot, cannot see  
Thy way is best.

I cannot see—on every hand  
By anguish prest,  
In vain I try to understand  
Thy way is best.

But I believe—Thy life and death,  
Thy love attest,  
And every promise clearly saith,  
"Thy way is best."

I cannot see, but I believe;  
If heavenly rest  
Is reached by roads where most I grieve,  
Thy way is best.

Newman Hall.

*A Fireless Engine.*—The last and most remarkable invention in engines, or locomotive power, was tested some days since in Chicago which astonished a large number of our citizens, who witnessed the modus operandi of its workings. D. Myers has for years been studying over the problem how to dispense with horses in the propelling of street cars. He expended time and money in inventing and modeling a pneumatic engine, that should run with compressed air as a motive power.

ut, though at one time thought to be a success, the invention failed to satisfy the railroad men, and was set aside as too unreliable to be made useful. D. Myers did not despair. His inventive genius did not desert him, and his determination to succeed never flagged. Air having proved a failure, he next resorted to steam, and made an attempt to overcome the objections made to its use in the streets. His success has been complete, and may be but a short time when horses in front of a street car will be a thing of the past. The great objection to steam dummies has been the danger and annoyance of falling cinders from the smoke-stack. The invention of D. Myers entirely removes this objection, for there will be no fire, and consequently no cinders connected with his dummy. The process is ingenious, yet simple. He charges a boiler with steam enough to last for a trip of ten or fifteen miles, and sends it on its journey without a spark of fire. The invention was tested on the track between Hyde Park Station and Thirty-ninth Street—a distance of three miles—in presence of numerous spectators. At the southern terminus of the track a large stationary boiler, from which the dummies are supplied with steam by means of three-inch pipe extending from one to the other. The dummy boiler is two thirds filled with water, when the steam is turned on, the gauge on Saturday indicated 170 pounds. The round trip (six miles) was made in twenty minutes, and there were 57 pounds of steam left. It was pronounced an unqualified success. A stock company for putting in use the new machine has been organized with a capital of \$500,000. J. E. Young of the Chicago, Danville and Vincennes road being President. A large number of capitalists have become interested in the invention, and much of the stock has already been taken. Mr. Myers offers to run the Hyde Park dummy cars of the South Side company at two-thirds of the present cost, making five trips an hour, instead of one as at present.—*Late Paper.*

For "The Friend."

#### Scientific Notes.

The stock-holders in rail-way and omnibus companies, have long suffered from the dishonesty of some of the conductors employed, who put into their own pockets a portion of the fares received. Several expedients have been adopted to remove or diminish this evil—one of the latest is an apparatus invented in England, and designed to be attached to the rear end of omnibus and street passenger rail-way cars—by which every individual must enter and leave the car by passing through a turnstile. Every time a person passes, the revolution of the turnstile pierces a hole in a strip of paper connected with some machinery enclosed under lock and key. At the end of the trip, the box is unlocked, the number of holes counted and fresh paper introduced.

An English inventor has recently patented fire-proof paper and ink. Vegetable fibre, such as commonly used in paper-making, is prepared in the usual manner by grinding into pulp, and mixed with double its weight of asbestos, and a small portion of borax and gum. The asbestos is a fibrous stone, usually found in serpentine beds or other rocks of igneous origin, and easily worked into a fine fibre which feels soft and silky. It is very little affected by heat. The base of the ink is gamboge or black lead.

In the address of its President, at the recent meeting of the British Scientific Association, there is the following paragraph: "There is an urgent need of accurate scientific knowledge for the direction of manufacturing processes, and there could not be a greater mistake than to suppose that such knowledge need not go beyond the elementary truths of science. In every branch of manufacture improvements are made from time to time, by the introduction of new or modified processes, which had been discovered by means of investigations as arduous as those conducted for purely scientific purposes, and involving as great powers and accomplishments on the part of those who conducted them. Any manufacturer of the present day who does not make efficient arrangements for gradually perfecting and improving his processes, ought to make at once enough money to retire; for so many are moving onwards in this and other countries that he would soon be left behind."

The production of steel through the inventions of Bessemer and others, has largely increased of modern times. In Great Britain, in 1852, the total annual produce of steel was 50,000 tons. Now more than 500,000 tons are made by the Bessemer process alone, in addition to very large amounts by other methods.

It is a popular opinion that sun-light has a tendency to extinguish household fires. A recent writer suggests that this may be true, and may be owing to some hitherto undiscovered energy of solar light. He refers to the remarkable power of light in awakening from sleep, even when loud noises seem to have little effect; and thinks that the animal and vegetable worlds awake to life and work mainly in consequence of some such power of light. After plants have utilized the light, it is not useable again for the same purpose. Take two screens of dark paper with holes in them, say of half an inch in diameter—cover one hole with letter paper and the other with a green leaf—put pieces of photographic paper behind them, and expose to sun light. Beneath the letter paper will be found a dark spot on the photographic paper, but beneath the leaf there will be no discoloration. The leaf will have made use of the light so that its chemical energy is gone, and the letter paper will not have used it.

In a recent article on railway speed in *The Engineer*, the highest rate habitually attained is said to be on the Great Western Railroad, of England, some of whose trains make 50 miles an hour. At different times, rates as high as 70 miles an hour have been reached, under peculiarly favorable circumstances. The power consumed, the risk of accident, and the cost of running increase very rapidly as the speed increases, and arguing from these premises, the writer concludes that a rate of 100 miles an hour is practicably unattainable.

The efforts of the Great Eastern to repair the broken 1865 Atlantic Cable have proved unsuccessful. She picked up a portion of the old cable of 1858, from a depth of 1800 fathoms, which is of interest to electrical engineers on account of its condition, and to scientific men generally from the evidence it presents of aggressive animal life at that depth.

A society, numbering nearly 100 members, has been formed at Hamburg to re-introduce the ancient practice of burning instead of burying. Each member on entering makes

a will in which he orders that his remains shall be burnt.

The Abbe Plessis in experimenting on the muscular power of insects, adjusted a light box to a large horned beetle, and gradually added weights till the whole amounted to 24 pounds. The beetle was standing on a smooth plank, and in spite of the load being 315 times its own weight, it moved steadily along.

II. Ranke describes a case of spontaneous combustion in a stack of hay not thoroughly dry. The stack was 28 feet long and 23 feet high, and 16 feet thick. It leaned on two sides against solid masonry. On removing five feet from the top one or two sparks made their appearance. Water was poured on, but the exposed hay gave smoke and sparks at various points, and presently burst into flame.

#### Forestry.

George May Powell read the following paper, which was addressed to the club:

In response to your kind letter inviting me to prepare a paper on the subject of Forestry, please allow me respectfully to submit the following suggestions:

As Professor Hough so aptly said in his recent address on the subject at Portland: "We must make the people themselves familiar with the facts and necessities of the case." Among these "facts and necessities" are: First, the frequent losses of millions of dollars to the manufacturing interests of the country in a single season from depletion of hydraulic power in the mill streams made scanty by droughts. Second, The sweeping of vast values in dams, dykes, fences, &c., to destruction by freshets. Third, A still greater damage to the agricultural interests from droughts. Fourth, The unhealthful influence of these droughts, and of the absence of the conservative influence of foliage. Fifth, Deterioration of soils not easily computed. Sixth, Waste of wealth of material for fuel and for manufacturing purposes. Seventh, and not least the marring of the beauty of our Fatherland by the ruthlessness and ignorance with which the beautiful robes of forest green have been and are being, stripped from the hills and valleys. Eighth, Loss of opportunity in the years that pass to repair and prevent these evils, from not understanding their existence and remedy.

On the other hand, it will pay, as proved by experience, in raising "second growth" timber in New England, sixteen per cent. on capital invested, to plant trees for such purposes as for cabinet and especially carriage makers' use; and more still if material were as closely worked up for charcoal, faggots, &c., as science abroad works up what is termed refuse here. Second, By examining the prices of hoop-poles, and also the space nurserymen occupy to grow a given number of young trees, it will be seen that an acre planted to oak and hickory may in five years be yielding, with good management, from \$20 to \$50 a year for several years thereafter, and still leave abundance of trees for permanent growth. This is made more plain by the statement that the New York prices for hoop-poles are as follows: For eight foot poles, \$2 to \$4 per 100; ten foot, \$4 to \$5; twelve foot, \$7 to \$8; and fourteen foot poles, \$10 per 100.

As we proved a few months since, in the work of the Oriental Topographical Corps in Egypt and Spain, a considerable number of reliable persons can be pledged, as a matter of public good, to plant 1,000 tree-seeds a year.

A little system in effort would soon establish the custom of planting seeds of trees along the highways, division fences, and other waste places. This alone might soon add many millions of dollars to the aggregate value of property in almost any state in the Union. The time and labor of planting one small tree will plant dozens of seeds. The seeds of the maple, elm, ash and several others of the most valuable trees are so small that scores of them may be carried in the vest pocket to plant at convenience.

It is important to give the people, through the press, some of the simplest ways of collecting, keeping and planting tree seeds. There are, perhaps, points to be developed also which have not occurred to even European foresters. I have noticed, for example, in maple-sugar orchards, there is often a tree or two in each which is called the "sweet tree," because there is more sugar in a given quantity of sap from one of them than from the same quantity from one of the other trees. I believe science will yet show how to make all the trees of an orchard as rich, or richer than these in saccharine matter. If so, any one of the maple sugar producing States has a large annual increase of cash receipts to secure from this source—an item worth considering by a nation sending tons of gold abroad annually for near 500,000 tons of sugar for home consumption. The stumps of most of the hardwood trees could be made worth more than any other part of the tree, by working them up into the finer kinds of furniture requiring variety of color and of curl of fibre in the wood. Now they are a nuisance. The oak stumps now used to make plank for heavy farm sled-runners illustrate this. Such timber would make the finest veneers, and it can be saved by grubbing down the trees. The labor of felling by grubbing down, would be far less than digging out the stumps after felling in the usual way. The tree in the wind would be the lever to bring it down after less work in digging and cutting the surface roots than would be needed to dig up the stump if the tree were cut by the common method.

The argument that tree planting does not pay, because only a coming generation can reap the benefits is false as well as selfish and unpatriotic. A piece of ground on which the seed has been planted only long enough for the little sprouts to be above ground has, then, an increase in value many times the cost of putting in the seed. Each year of growth of these young trees thereafter, is also many times the value of putting in the seed. Many a landholder is growing "land poor" with idle land which would make him rich at a trifling expense of putting forest tree seed on it.

This Club is strong in proportion as it proves itself useful. Perhaps it seldom finds a richer field of usefulness than, first, bringing together what has been done in this country by way of advancing in forestry. Second, in getting full information on what has been done in countries where they have had more centuries than we have had years of experience. Third, as "what is everybody's business is nobody's business," it may be wise to appoint a committee to at least begin to gather this information.

GEO. MAY POWELL.

The meeting then adjourned.

"Fly from being applauded, and give no quarters to the love of admiration."

*The Rats of Paris.*—According to an article in a late number of the Catholic Magazine, the large and ferocious rats which abound in the sewers of Paris, and infest some quarters of the city, did not make their appearance there until the year 1727. Previous to that time a brown rat of smaller size had held possession for several centuries at least; but it soon disappeared after the arrival of the "surmulots," as the present rats are named. They came from Asia, and the following account is given of their emigration from that quarter of the world.

In the year 1725, there were terrible earthquakes in the countries on the borders of the Caspian Sea, and soon after a general movement of these animals commenced. "They advanced in immense battalions, and their arrival in Askalon in the autumn of 1727 was remarkable. Nothing stopped them, not even rivers, for they are good swimmers. They either passed the Volga, or took possession in legions of the vessels which they found there. Others pushed on in an opposite direction. A whole army moved simultaneously towards Siberia, and having entered the little town of Juikh, mastered it, and a quarter of the town was given up by the conquered to the conquerors.

The vessels lying in the Russian ports, on board which the surmulots had taken free passage, returned to France, and the hungry rats were the first to disembark.

Twenty years later the surmulots were masters. The black rat cannot make head against this intruder, stronger than he is, better armed with teeth, and far more prolific.

The black rat has been driven from England by the grey rat, to which the name of Hanover rat has been given, on account of the time of his appearance in that country, and he is now master of the situation."

## THE FRIEND.

ELEVENTH MONTH 8, 1873.

In addition to the account given in a former number, of the proceedings of Ohio Yearly Meeting, we take the following extracts from the printed minutes just received.

*At Ohio Yearly Meeting of Friends, held at Mount Pleasant, by adjournments from the 29th of the 9th month to the 2d of the 10th inclusive, 1873.*

Reports have been received from all the Quarterly Meetings, their Representatives being \* \* \* \* \*

The Clerk of the Select Meeting produced a minute issued by Greenwich Monthly Meeting of Friends, held the 1st of 8th month last, endorsed by Salem Quarterly Meeting, New Jersey, the 14th of same month, setting our beloved friend Clarkson Sheppard, a minister, at liberty to attend this meeting and some of the subordinate meetings; and one for our beloved friend Isaac Morgan, a minister, from Kennet Monthly Meeting of Friends, Pennsylvania, dated the 2d of the present month, setting him at liberty to attend this meeting and a few of the subordinate meetings. Also, one from a Monthly Meeting of Friends of Philadelphia, held the 28th of last month, for our beloved friend Joseph Scattergood, an elder, setting him at liberty as a companion to Clarkson Sheppard in his present religious

engagement. All of whom are acceptably in attendance.

\* \* \* \* \*  
*Third of the week and thirtieth of the month.*—Elwood Dean, on behalf of the Representatives, reported that they had conferred together, and were united in proposing that Wilson Hall serve this meeting as Clerk, and that Joseph Branson be Assistant, which was united with, and they appointed to the service. \* \* \* \* \*

The consideration of the state of Society was entered upon by reading the Queries and Answers from the Quarterly Meetings, proceeding as far as the Annual Queries, the following being a summary thereof:

*Ans. 1st.* All our meetings for worship and discipline have been attended, and generally by the most of our members, though nearly all the Quarters acknowledge a remissness in this religious duty in some members, especially in the middle of the week. Unbecoming behavior therein generally avoided, except sleeping or drowsiness in some, and a few cases of lightness reported in one of the answers. Care in the reported deficiencies has been taken in two of the Quarters. The hour of meeting pretty well observed.

*Ans. 2d.* Most Friends maintain love toward each other in a good degree, as becomes our christian profession. Tale-bearing and detraction discouraged by most Friends, but not so generally as would be best. Where difference arise, care is taken to end them.

*Ans. 3d.* Most Friends endeavor, by example and precept, to educate their children, and those under their care, in plainness of speech, deportment and apparel, to guard them against reading pernicious books and from the corrupt conversation of the world, and they are encouraged to read the Holy Scriptures. By several of the Quarters acknowledge the need of greater faithfulness on the part of some in maintaining these christian testimonies.

*Ans. 4th.* Friends appear to be clear of importing, vending and distilling spirituous liquors, and nearly clear of the unnecessary use thereof. Clear of frequenting taverns, but not altogether clear of attending places of diversion. Moderation and temperance in good degree observed.

*Ans. 5th.* The necessities of the poor, and the circumstances of those who appear likely to require aid, have been inspected and relief afforded, and some care has been taken to promote the school education of their children.

*Ans. 6th.* As far as appears, Friends maintain a faithful testimony against a hireling ministry, oaths, military services, clandestine trade, prize goods and lotteries, except the occasional attendance of some of our members at places where a hireling ministry is supported. Wherein one of the Quarters report the extension of care.

*Ans. 7th.* Friends appear careful to live within the bounds of their circumstances, and to avoid involving themselves in business beyond their ability to manage, generally just in their dealings, and mostly punctual in complying with their engagements; and where any have given reasonable ground for fear in these respects, care has been extended to them.

*Ans. 8th.* A good degree of care is taken to deal with offenders seasonably and impartially and to endeavor to evince to those who will not be reclaimed, the spirit of meekness and love before judgment is placed upon them.

\* \* \* \* \*  
 The committee having charge of our Boarding School, made the following report, which as read and satisfaction expressed therewith. The proposition therein contained was united with and adopted.

REPORT.

From the minutes of the Acting Committee, it appears the amount charged for board and tuition for session ending 3d month 12th, 1873, for an average of about 58½ pupils, was \$3,228 40  
 come from other sources, . . . 1,423 15  
 Making . . . . . 4,651 55  
 Expenditures, . . . . . \$1,515 35  
 Balance in favor of school for session, 136 29  
 Amount charged for board and tuition for session ending 8th month 20th, 1873, for an average of about 16½ scholars, . . . \$714 15  
 come from other sources, . . . 1,469 14  
 Making . . . . . 2,183 29  
 Expenditures, . . . . . 2,142 40  
 Leaving a balance in favor of the Institution for session of . . . 40 89  
 and balance for the year of . . . 177 18  
 \* \* \* \* \*

We wish to caution our friends against introducing scholars into the School whose character and conduct are known to be inconsistent with our religious profession, as the influence of such has an injurious and hurtful tendency on the school. If Friends are careful in this respect, and in every other way, endeavor to promote the original design of the school, thus strengthening and encouraging the acting committee and officers in the discharge of their respective duties, we believe blessing will continue to rest upon their efforts.

Signed on behalf of the committee.

\* \* \* \* \*  
 Our Book Committee, appointed last year, made the following report, which was satisfactory to the meeting, and the proposition to add \$150 to the balance in the hands of the committee, was approved. The committee is again entrusted with the care of the concern, and desired to continue their labors as heretofore, and report to this meeting next year. They are directed to call on the Treasurer for the amount named:

REPORT.

We, the committee appointed to have the care of purchasing and distributing the approved writings of Friends, report, that we have purchased at Friends' Book Store, in Philadelphia, 727 volumes of Friends' books and 150 pamphlets, at a cost of \$393.00. The greater portion of which have been disposed to members and others, by sale and gratuitous distribution. It has been difficult to obtain as definite information from the committee in the different branches of the Yearly Meeting as would be desirable in regard to the disposition of books and the number still in their hands, but a considerable number in some of the meetings are not yet disposed of.

\* \* \* \* \*  
 Balance in the hands of the committee, \$13.25.

In addition to the above, there has been a investment of about \$100 to supply a demand for books ordered, mostly in Iowa. We have also received, through the liberality of a friend, 55 copies of the Biographical Sketches, and 15 copies of John Barclay's Letters, for

gratuitous distribution among Friends, especially in Iowa.

The committee in charge of this interesting concern are encouraged to believe that some interest has been awakened amongst Friends and some others not of our Society, in becoming more acquainted with our religious principles; and we believe there is still open a large field for useful labor in this way within the limits of this Yearly Meeting.

\* \* \* \* \*  
 The committee appointed to attend to the proper laying down of Springfield Quarterly Meeting, report they attended to the appointment.

\* \* \* \* \*  
 From the reports received from the Quarters, it appears there are within our limits 850 children of a suitable age to attend school; 302 of whom have attended Friends' schools exclusively; 390 have attended District schools only; 35 have attended both Friends' and District Schools; 36 family and subscription schools, taught by members but not under the care of meetings; 20 District or other schools not under the care of meetings; 67 are reported as not going to school the past year, but mostly receiving instruction at home.

There have been 19 schools taught under the care of meetings, including two family schools, ranging in time from two to six months each.

We again recommend this interesting concern to the care of subordinate meetings, with desires that Friends everywhere may become more alive to the guarded and religious education of our youth, withdrawing their support from the district schools, and putting shoulder to shoulder, in establishing and supporting more schools under the care of Preparative and Monthly Meetings. Quarterly Meetings are directed to produce explicit reports, as heretofore, to this meeting next year.

The many deficiencies manifested by the reports from the various branches of the Yearly Meeting have humbly reminded us of our many shortcomings and weaknesses, which we desire may afresh incite us to increased faithfulness in the support of the various christian testimonies handed down from our forefathers for us to uphold and maintain before the world.

The remissness apparent in the attendance of meetings for divine worship, has raised in our hearts renewed desires for increased faithfulness therein, remembering the language of the Apostle, "I beseech you, therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable, unto God, which is your reasonable service." Persuaded we are that if we are concerned to obey the Saviour's injunction, "Seek first the kingdom of God and the righteousness thereof," we will not allow our temporal business to deter us from assembling with our brethren for the performance of the solemn duty of divine worship; remembering that from Him all our blessings flow, both spiritual and temporal, that He can bless the little, and blast the much, and that He has graciously promised "where two or three are gathered together in my name, there am I in the midst of them." This promise will be verified by those who are thus concerned to assemble, and in deep, reverent silence to wait for the arising of the divine life; we shall then be preserved from drowsiness or sleeping, also from

wandering thoughts, and experience a renewal of our spiritual strength.

The meeting was dipped into exercise and deep travail on account of the flood of printed matter issued from the public press, most of which is of such a character that Friends cannot consistently read or allow to be placed in the hands of their children. All fictitious reading was impressively alluded to, and the poisonous effects on the morals of those indulging in such reading clearly set forth. It not only poisons, but intoxicates the mind, thus rendering substantial reading distasteful, and disqualifies from receiving any benefit therefrom. Newspaper reading was also brought to view and discouraged, believing that a large proportion of them contain matter calculated to lead the mind astray. We desire that parents, and all concerned Friends, may redouble their diligence and care in discouraging the introduction of all improper reading into their families, and labor for a qualification to interest their dear children in the writings of our early Friends, and especially in the frequent perusal of the Holy Scriptures. The attendance at fairs, shows, and all other places of diversion, was also alluded to and discouraged as being prejudicial to a growth in the truth.

Under an humbling sense of our unworthiness, and the unmerited goodness and mercy of Israel's unslumbering Shepherd, in still watching over us for good, we desire the encouragement of all to increased diligence in the discharge of all our religious duties, fully believing that if this is the case, He will continue to be with us at times, not only when our hands are engaged in the necessary cares of life, but we will also feel while in our assemblies, a sense of his solemnizing presence, which has been manifest during the various sittings of this our annual assembly, to the humbling of many minds.

\* \* \* \* \*  
 This meeting having brought its business to a close, now solemnly concludes, to meet again at the usual time and place next year, if permitted so to do.

WILSON HALL, Clerk.

We have received a copy of "The Methodist Home Journal" of the 4th ult., containing some account of the (Binns) Yearly Meeting, in Ohio, held in the 9th month, signed by Lizzie M. Boyd, who is herself a Methodist, but appears to have been in attendance at the meeting. We believe all are admitted who wish to be present.

The language used in portraying the exercises of the meetings is entirely Methodist, sometimes approaching irreverence, for which the members of the meeting are not responsible. There are two or three statements of what we doubt not are facts which we extract, as showing how nearly these "modified Quakers" have approached the Methodists in many of their principles and practices. Philadelphia Yearly Meeting has no connection with this body, but it is in full unity with other Yearly Meetings, and in the accounts published of its proceedings, is spoken of as highly favored.

"At night, the meeting was held in the interest of holiness; clear, definite work. All with bodies prostrate in the dust; souls bowed in deep humility, suppliants at the cross, tarried for about an hour, while a multitude of brief petitions ascended from burning hearts,

bringing down the overshadowing glory of the Lord. Definite testimonies of entire sanctification; many seeking. All could not speak. Those enjoying 'perfect love' were requested to stand up; a multitude arose—just like a Methodist meeting. A large number expressed their desire for this great salvation, by rising. The fire burned.

"Sixth day.—The burden of talk and prayer was consecration; probing, searching, trying, refining. For four unbroken hours the Spirit brooded over the assembly, in its great mission of bringing light and peace. Many of the clearest, most remarkable experiences we have ever heard. The Holy Ghost fell upon the people, leading to different outward manifestations—some weeping, some praising, others silent under the overpowering glory. One young lady received such a baptism that she fell as a leaden weight to the floor. A few thought she had fainted, and carried her out of the house; some discovered it was the power of the Lord upon her. Marvellous were the unfoldings of God while she lay in that state. It was the 'baptism of fire.'

"The night, as usual, was given to experience; in fact, every meeting ran into testimony. While they mused, the fire burned, and they couldn't help but tell it. The gushing fountain of living water within would flow outward. The doxology was sung at the close of the meeting. Those who would have opposed it with all other progressive movements, were so vastly in the minority that they were forced to silence; lost in the shadowy distance of old conservatism. The car of salvation swept right by them, and left them to creep in, some day in the future to catch up.

"In the first meeting for the promotion of holiness, there was a spirit of controversy manifested on the part of a few; but it was soon shown them, as Bro. Inskip says, that 'things were all to be one way,' and one way it was after that. And so they sung on, and knelt in prayer, and got fully saved; and talked experience, and preached holiness, and the Lord had his own way gloriously.

"Seventh day.—This evening was the last night service to be held. It was devoted to those whose voices had not been heard as yet. As we stopped at the door of the meeting-house, our eyes were greeted with the beautiful sight we had witnessed again and again, a whole audience kneeling in prayer. An audience of Quakers all on bended knee before the throne! The wonder of this can only be understood by those who know the former prejudice of this Society to any one kneeling except the one leading in prayer. After a large number had offered up brief petitions of present need, they all arose, and probably over a hundred testimonies were given of the power of the blood, interspersed with singing. Several standing, waiting their opportunity to speak, reminding one of our national camp-meetings, when the tide runs high."

#### SUMMARY OF EVENTS.

**FOREIGN.**—The shipments of gold from England to the United States continue. The Bank of England has advanced its rate of discount to 8 per cent.

It is reported that the marriage of the Duke of Edinburgh to the Princess Maria, of Russia, will be solemnized according to the forms of the Church of England, and that the Dean of Canterbury will go to Russia for that purpose.

Sir Henry Holland, the celebrated physician, traveler and author, died on the 29th ult., aged 85 years.

The Times reports on good authority that General Wolesley, commander of the Ashantee expedition, took

out instructions to offer the Ashantees peace on condition that they lay down their arms and withdraw from the territory under British protection.

The British government has decided, after next year, to extend no pecuniary support to consular chaplaincies. These offices date from the time of Charles I., and cost the government £9000 a year.

On the 29th ult. so dense a fog covered London that locomotion was almost suspended. Numerous accidents occurred during the darkness.

A meeting of the National Laborers Union has been held, in which it was stated that the general agent of New Zealand would give free passage to all laborers who wished to emigrate to that colony, and that there was room there for twenty thousand families.

London, 11th mo. 3d.—Consols, 92½. U. S. sixes, 1867, 96; new five per cents, 90½.

Liverpool.—Uplands cotton, 8½d. a 8½d.; Orleans, 9½d. Breadstuffs quiet.

The schemes of the French Monarchists for placing the Count de Chambord on the throne, have been frustrated by the unyielding obstinacy of the Count, who insisted upon restoring the white flag of the Bourbons, and occupying the throne as a right in virtue of his descent from Charles X. He insists that he alone is the pilot, and capable of guiding France into port, because he has the mission of authority. The avowal of these opinions deprives him of the support of the more liberal monarchists, and it is believed there will be no attempt to proclaim a monarchy at present.

It is expected the Assembly will vote for a prolongation of the powers of President MacMahon, and that a series of strongly conservative measures will be introduced.

A dispatch has been received in Madrid announcing a decisive defeat of the Carlists by the national troops. The Spanish Minister of the Colonies has sailed from Cadiz for Cuba and Porto Rico.

The government troops besieging Cartagena have been reinforced by five thousand men.

The law for the reorganization of the Italian army has been published. The strength of the army when on a peace footing is fixed at 214,000 men. Some of the Jesuits whose establishment in Rome was recently closed, have left that city for the United States.

Prince Bismarck has been reappointed President of the Prussian Ministry in place of Gen. Von Roon. It is understood that his restoration carries with it the effective control of the whole Cabinet, which he demanded previous to his resignation some time ago.

The total amount invested by the German government in United States funded loan is \$18,000,000, of which \$8,000,000 were negotiated during the present month.

Advices from all parts of the province of Bengal show that the crops are failing and the impending famine cannot be avoided.

The Chinese government has resolved to make energetic efforts to suppress the coolie trade.

Advices from Rio Janeiro state that General Mitre has succeeded in making a treaty which fixes the boundary between Paraguay and the Argentine Republic, and it has been ratified.

Iceland will next year celebrate the tenth centennial anniversary of its settlement. It was discovered by Naddod, a sea rover in 860, and was settled by Ingolf a Norwegian chief in 874. There are over 300 Lutheran churches on the island, with public schools attached to them. Nearly all the inhabitants can read and write, and appear to be honest, temperate and religious.

**UNITED STATES.**—The public debt statement of the first inst., shows an increase during the Tenth month of \$3,039,000. The coin balance in the Treasury \$82,313,581; currency balance \$4,312,155. Outstanding legal-tenders \$360,952,206.

The ravages of yellow fever in Memphis, Shreveport and other cities of the south-west, have abated since the commencement of cooler weather.

There were 454 deaths in New York last week.

The interments in Philadelphia for the week ending 11th month 1st, numbered 265, including 76 children under two years. The mean temperature of the Tenth month, per Pennsylvania Hospital record, was 56.99 deg.; the highest during the month 80 deg., and the lowest 34.50 deg. The amount of rain during the month 5.88 inches, making a total of 51.48 inches since the beginning of the year. The average of the mean temperature of the Tenth month for the past 84 years, is stated to be 54.74 deg.; the highest mean during that entire period was 64 deg., in 1793, the lowest 46 deg., in 1827.

During the quarter ending 9th mo. 30th, 68,588 emigrants arrived at the port of New York, of which 38,613 were males, and 27,975 females.

The estimates for the Legislative branch of the gov-

ernment have all been prepared, and show an increase over those of any previous year, the pay of members and senators having been largely increased. The salaries of Senators will be \$555,000, and for pay of employees \$144,000, with \$199,000 contingent expense. For salaries of members of the House of Representatives, the estimates are \$2,400,000, officers and employees \$218,000, contingent expenses \$267,000: total \$3,783,000.

The yield of wine in California this year is estimated at 3,000,000 gallons, a falling off compared with last year of about 2,000,000 gallons.

The consumption of iron of all kinds in the United States, in 1872, is estimated at 4,311,500 tons.

During the last fiscal year, 13,030,606 acres of the public lands were disposed of, which is 1,626,266 acre more than in the previous year.

The amount of gold and silver coin in the United States is estimated by the Director of the Mint, from the most reliable data obtainable, at \$140,000,000, which about \$5,000,000 is in silver. An increase of coin has been gradually going on during the present year.

**The Markets, &c.**—The following were the quotations on the third inst. *New York.*—American gold, 107 U. S. sixes, 1881, 113; ditto, 1867, 117; ditto, 10-5 per cents, 106½. Superfine flour, \$5.15 a \$5.65; Standard, \$6.10 a \$6.40; finer brands, \$6.50 a \$10.25. Western wheat, \$1.48 a \$1.50; No. 2 Chicago spring, \$1.36; No. 3 do., \$1.33½. Barley, \$1.27 a \$1.50. Oats 44 a 49 cts. Western white corn, 69 cts.; yellow, 6 a 61 cts. *Philadelphia.*—Middlings cotton, 15 a 16 c for uplands and New Orleans. Crude petroleum, 1 cts.; standard white, 16 cts. Flour, \$5 to \$9 per barrel. Amber wheat, \$1.55 a \$1.65; red, \$1.45 a \$1.50; No. spring, \$1.35 a \$1.37. Yellow corn, 65 cts. Oats, a 48 cts. Smoked hams, 12 a 14 cts. Lard, 8½ a cts. Clover seed, 8 a 9 cts. Sales of about 3000 head of cattle at 6 a 7 cts. per lb. gross for fair to choice, a common 3 a 4½ cts., a few extra brought 7½ cts. She sold at 4 a 6 cts. per lb. gross, and hogs at \$6.50 a \$6.60 per 100 lb. net. *Chicago.*—Spring extra flour, \$5.50, \$6.50. No. 1 spring wheat, \$1.03; No. 2 do., \$1.00. No. 2 mixed corn, 35½ cts. No. 2 oats, 29 cts. R. 60½ a 61 cts. No. 2 barley, \$1.28. Lard, 6½ c *Milwaukee.*—No. 1 spring wheat, \$1.09; No. 2 do. \$1.04½. No. 2 oats, 29 cts. No. 2 corn, 38½ c *Detroit.*—No. 1 white wheat, \$1.41. Corn, 47 cts. Oats 36 cts. *St. Louis.*—No. 2 winter red wheat, \$1.48. No. 2 corn, 37½ cts. No. 2 oats, 32½ cts.

The Treasurer of the Friends' Freedmen's Association acknowledges the receipt of \$10 for the Freedmen from Yohoghany, Pa.

**ERRATA.**—In the quotation from Horace, on page 86 in our last number, for "*Presertum sequitur op pecuniam*," read "*Crescentem sequitur cura pecuniam*."

In the same No. on page 87, 40th line, for *tablets* read *tables*.

In No. 10, page 75, for *Opraelarum diem*, read *praelarum diem*.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

**DIED,** on the 26th of 7th mo. 1873, at the residence of her husband, Aaron Morris, SUSANNAH MORRIS, her 64th year, a much esteemed member of Springville Monthly and Hopewell Particular Meeting, Linn Co., Iowa. From the time she was taken ill she believed that she would not recover, and although at times suffering was almost unbearable, she wished not to complain, and said she was willing to bear all that the Lord placed upon her. On one occasion she said, "this world has lost all its charms for me." She was looking forward to brighter scenes of glory. She observed that it was hard to leave her family, "yet all seemed bright as the noonday." About four hours before her death a deep sleep came over her, from which she never awakened, and she peacefully and without a struggle passed from earth. She was a woman beloved by all, hated by none. Though her family and friends mourn her departure, they have the consoling belief that she is, through mercy, now at rest in that "better land" where all is peace and joy, forever and forever.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, ELEVENTH MONTH 15, 1873.

NO. 13.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

[From a little work by Daniel Kirkwood, on "Comets and Meteors," published by J. B. Lippincott & Co., of this city, the following extracts are taken for insertion in "The Friend."]

## Comets.

The term *comet*—which signifies literally a *airy star*—may be applied to all bodies that revolve about the sun in very eccentric orbits. The sudden appearance, vast dimensions, and extraordinary aspect of these celestial wanderers, together with their rapid and continually varying motions, have never failed to excite the attention and wonder of all observers. Nor is it surprising that in former times, when the nature of their orbits was wholly unknown, they should have been looked upon as omens of impending evil, or messengers of an angry Deity. Even now, although modern science has reduced their motions to the domain of law, determined approximately their orbits, and assigned in a number of instances their periods, the interest awakened by their appearance is in some respects still unabated.

The special points of dissimilarity between planets and comets are the following:—The former are dense, and, so far as we know, solid bodies; the latter are many thousand times rarer than the earth's atmosphere. The planets move from west to east; many comets revolve in the opposite direction. The planetary orbits are but slightly inclined to the plane of the ecliptic; those of comets may have any inclination whatever. The planets are observed in all parts of their orbits; comets, only in those parts nearest the sun.

The larger comets are attended by a *tail*, or train of varying dimensions, extending generally in a direction opposite to that of the sun. The more condensed part, from which the tail proceeds, is called the *nucleus*; and the nebulous envelope immediately surrounding the nucleus is sometimes termed the *coma*. Zenó, Democritus, and other Greek philosophers held that comets were produced by the collection of several stars into clusters. Aristotle taught that they were formed by exhalations, which, rising from the earth's surface, ignited in the upper regions of the atmosphere. This hypothesis, through the great influence of its author, was generally re-

ceived for almost two thousand years. Juster views, however, were entertained by the celebrated Seneca, who maintained that comets ought to be ranked among the permanent works of nature, and that their disappearance was not an extinction, but simply a passing beyond the reach of our vision. The observations of Tycho Brahe first established the fact that comets move through the planetary spaces far beyond the limits of our atmosphere. The illustrious Dane, however, supposed them to move in circular orbits. Kepler, on the other hand, was no less in error in considering their paths to be rectilinear. James Bernouilli supposed comets to be the satellites of a very remote planet, invisible on account of its great distance,—such satellites being seen only in the parts of their orbits nearest the earth. Still more extravagant was the hypothesis of Descartes, who held that they were originally fixed stars, which, having gradually lost their light, could no longer retain their positions, but were involved in the vortices of the neighboring stars, when such as were thus brought within the sphere of the sun's illuminating power again became visible.

Comets of extraordinary brilliancy have sometimes been seen during the daytime. At least thirteen authentic instances of this phenomenon have been recorded in history. The first was the comet which appeared about the year 43 B. C., just after the assassination of Julius Cæsar. The Romans called it the *Julium Sidus*, and regarded it as a celestial chariot sent to convey the soul of Cæsar to the skies. It was seen two or three hours before sunset, and continued visible for eight successive days. The great comet of 1106, described as an object of terrific splendor, was seen simultaneously with the sun, and in close proximity to it. Dr. Halley supposed this and the Julian comet to have been previous visits of the great comet of 1680. In the year 1402 two comets appeared,—one about the middle of February, the other in June,—both of which were visible while the sun was above the horizon. One was of such magnitude and brilliancy that the nucleus and even the tail could be seen at midday. The comet of 1472, one of the most splendid recorded in history, was visible in full daylight, when nearest the earth, on the 21st of January. This comet, according to Laugier, moves very nearly in the plane of the ecliptic, its inclination being less than two degrees. Its least distance from our globe was only 3,300,000 miles. The comet of 1532, supposed by some to be identical with that of 1661, was also visible in full sunshine. The apparent magnitude of its nucleus was three times greater than that of Jupiter. The comet of 1577 was seen with the naked eye by Tycho Brahe before sunset. It was by observations on this body that Aristotle's doctrine in regard to the origin, nature, and distance of comets was proved to be erroneous. It was simultaneously observed by Tycho at Oranienberg, and Thaddeus Hagecius at

Prague; the points of observation being more than 400 miles apart, and nearly on the same meridian. The comet was found to have no sensible diurnal parallax; in other words, its apparent place in the heavens was the same to each observer, which could not have been the case had the comet been less distant than the moon. The comet which passed its perihelion on the 8th of November, 1618, was distinctly seen by Marsilius when the sun was above the horizon. The great comet of 1744 was seen without the aid of a glass at one o'clock in the afternoon,—only five hours after its perihelion passage. The diameter of this body was nearly equal to that of Jupiter. It had six tails, the greatest length of which was about 30,000,000 miles, or nearly one-third of the distance of the earth from the sun. The spaces between the tails were as dark as the rest of the heavens, while the tails themselves were bordered with a luminous edging of great beauty.

The great comet of 1843 was distinctly visible to the naked eye, at noon, on the 28th of February. It appeared as a brilliant body, within less than two degrees from the sun. This comet passed its perihelion on the 27th of February, at which time its distance from the sun's surface was only about one-fourth of the moon's distance from the earth. This is the nearest approach to the sun ever made by any known comet. The velocity of the body in perihelion was about 1,280,000 miles an hour, or nearly nineteen times that of the earth in its orbit. The apparent length of its tail was sixty-five degrees, and its true length 150,000,000 miles. The first comet of 1847, discovered by Mr. Hind, was also seen near the sun on the day of its perihelion passage. That discovered by Klinkerfues on the 10th of June, 1853, and which passed its perihelion on the 1st of September, was seen at Olmutz in the daytime, August 31, when only twelve degrees from the sun. After passing its perihelion, it was again observed, at noon, on the 2d, 3d, and 4th of September. Finally, the great comet of 1861 was seen before sunset, on Monday evening, July 1, by Henry W. Ballantine, of Bloomington, Indiana. It was again detected on the following evening just as the sun was in the horizon.

Besides the thirteen comets which we have enumerated, at least four others have been seen in the daytime; all, however, under peculiar circumstances. Seneca relates that during a great solar eclipse, 63 years before our era, a large comet was observed not far from the sun. "Philostorgius says that on the 19th of July, A. D. 418, when the sun was eclipsed and stars were visible, a great comet, in the form of a cone, was discovered near that luminary, and was afterwards observed during the nights." The comet which passed its perihelion on the 18th of November, 1826, was observed by both Gambart and Flaungues to transit the solar disk,—the least distance of the nucleus from the sun's surface being

about 2,000,000 miles. The second comet of 1819 and the comet of 1823 are both known in like manner to have passed between the sun and the earth. Unfortunately, however, the transits were not observed.

A few cometary orbits are hyperbolas, more ellipses, and a still greater number parabolas. Comets moving in ellipses remain permanently within the limits of solar influence. Others, however, visit our system but once, and then pass off to wander indefinitely in the sidereal spaces.

(To be continued.)

For "The Friend."

John Heald.

(Continued from page 90.)

2nd mo. 23d, 1817. "We attended the meeting at Chestnut Creek, in Virginia. We sat awhile and there came a shower of rain, and many men and boys, and women and girls rose up and went out to bring in saddles. I think I do not remember to have witnessed a meeting so much disturbed on a like occasion before. Daniel Pickett attended this meeting, and in the forepart delivered a short testimony, but I sat under a concern, and the time had passed so long, that I supposed I should pass the meeting in silence. I felt easy with being there, and believed I was in my place in sitting quiet; but when an hour or more was spent, I felt a remark present, and stood up, and said, there is much to be learned that is necessary to be known; and there is not perhaps a more necessary lesson than that of bringing our wills into subjection to the Divine will. The Divine Master said, Learn of me for I am meek and lowly of heart, and ye shall find rest for your souls."

John Heald proceeded to show, that in outward learning those who are idle and inattentive make but little progress; and so in our pursuit of heavenly blessings, it was needful that we should be diligent and in earnest. Among the spiritual lessons which it was needful to learn, he specified that, of choosing the good and refusing the evil, or as it is elsewhere expressed, of ceasing to do evil, and learning to do well; and also that which the apostle declared he had attained to, of knowing how to want and to abound, and to be content therewith, and to glory in the cross of Christ that crucified him to the world and the world to him. He then adds these comments: "Indeed there is so much to be learned that there is no time for idleness. Time, O how precious! and how is it wasted and squandered away, as if we had nothing to do; much to learn and but little learned, and the time may be far spent, shorter than we are aware of."

Obedience is better than sacrifice, and to hearken than the fat of rams. This was expressed to the first anointed king of Israel. He received a command to go and do, but he was not obedient, and we find that he bitterly complained, in the time of his distress, that the Lord had forsaken him, but we do not find any such complaint until he had been disobedient. After this he complained that the Lord had forsaken him, and answered him no more by prophet, by vision, or by dream. How lamentable was his case, and how many have lamented that they have neglected to improve the time with which they have been blessed. Oh! the anguish, the sorrow, the lamentation and the tears, that some have poured out, because of their own neglect. If they had only

been faithful and obedient as far as they knew and were capable of, and when they found inability had asked of him who giveth to all men liberally and upbraideth none, they would no doubt have obtained help; for I have been a sorrowful witness of the distress of many, and they have all taken the blame to themselves, and acknowledged their unfaithfulness—no complaint of want of ability, but of obedience. Therefore be faithful with the ability received; wait on the Lord and serve Him. Such will be made acquainted with the manner of performing true spiritual worship. The hour cometh and now is, when the true worshippers shall worship the Father in spirit and in truth, for such the Father seeketh to worship Him. This is true Christian worship, and this is what all ought to attain to; all should learn, and if any man lack wisdom let him ask of God who giveth to all men liberally. I had no expectation of advancing anything like as much, when I first stood up, but way opened, and I pursued it to great length before I found myself at liberty to sit down. Divers were tendered.

The next day rode home with Daniel Pickett, about 25 miles, and crossed the mountain in the way. Notice was given of a meeting in the hollow or valley. Next day, the 25th, the meeting was held in a school-house, which was full, and more of other people than Friends. After sitting awhile I said, Better is a poor and wise child, than an old and foolish king, that will no more be admonished. I endeavored to show the need of learning obedience, and attending to admonition. I went on a considerable time pressing the necessity of taking counsel, and being as wise children. Such will hardly be called wise, who will not be admonished, who will not attend to the reproofs of instruction which are the way to life. Are we not neglecting to attend thereto, if we feel condemned for doing a thing, and yet go and repeat it again; and as often feel sadness and condemnation or remorse, and still continue to repeat the like? Are not such like an old and foolish king that will no more be admonished, because they will not attend to the reproofs of instruction? I then stated a little of my own experience in regard to suffering for not learning obedience to that inward instruction. In the time of doing this, tenderness in many was evinced. This was a good meeting, favored largely with heavenly regard.

26th. We went to Westfield Meeting, which was large, the weather cold and the people restless. My mind was soon loaded with exercise. My breathings were earnest for my own preservation, and I felt interested for the welfare of the people. My mind was impressed with the greatness of the work that was necessary to be carried on, and done while time lasted; under a sense whereof I repeated the expressions of our Lord, when, under a sense of the sufferings that were approaching, he said: 'I have a work to do, and how am I straitened until it be accomplished.' We have a great work to do individually, and are we straitened until it be accomplished, or are we easy about it, not caring much whether it is done or not? The apostle left an injunction to the believers to work out their salvation with fear and trembling; and the Divine Master said: 'Work while it is called to-day, for the night cometh wherein no man can work;' so we may see that there is a work to do, and it is a work of great consequence to

us; our everlasting welfare depends on the attention we give now in a little while. Can it be accomplished with such attention as has heretofore been given, or is it not necessary to be more industrious? Is there not danger of the time being spent before the work is accomplished? The labor was long, and it was a solemn time. In the course of the exercise formality was treated on, as a great hindrance to the work of the soul's salvation."

After this John Heald attended meeting at Blues Creek and at Muddy Creek, which were depressing seasons, owing to the insensibility and inattention to true religion which seemed to prevail. On 3d mo. 3d, "we attended Deep River Monthly Meeting. Gideon Molineux labored for some time. I followed him with saying: Thou wilt keep him in perfect peace whose mind is stayed on Thee, because he trusteth in Thee. Our labors were to encourage to a confiding in the Preserve of men. The business was conducted to satisfaction. In the course thereof, Jeremiah Hubbard was recommended as a minister to the Quarterly Meeting.

5th. We were at Newberry Meeting. My exercise was to encourage to do right, as the way to obtain the most satisfaction. We may observe that where a family or neighborhood do right and avoid wrong, they live in love and enjoy tranquillity; but if they go into wrong practices they become distressed and do not enjoy comfort, but anguish and tribulation is what they fall into. It was so with Israel. Moses and Joshua, to encourage them held out promises of good enjoyment they should partake of, if they would be obedient and serve the Lord; and while they were faithful they were favored and enjoyed peace but when they forsook the right way, they were perplexed and distressed. In Jeremiah we may find they had the promise, if they would turn from the evil of their ways, to repent, return and live; but if they did not their destruction was of themselves. When this good prophet had labored much to persuade them to be obedient to the Lord and serve Him, but they would not be reclaimed under a sense of the distress that was coming on them, he said: 'Oh that mine head were waters, and mine eyes a fountain of tears, that I might weep day and night for the slain of the daughter of my people.' And when his mind was alarmed with a prospect of their calamity, and he was about to intercede for them, he was forbidden—the Lord saying to him, 'Lift up neither cry nor prayer for them for I will not hear thee.' So there was a time when they might have done better; and there came a time when they must suffer. I also instanced our Saviour weeping over Jerusalem, and endeavored to encourage those present, since it was as easy to do right now as at any former time."

(To be continued.)

*How they Train Sheep Dogs in California.*—C. E. Babb, in one of his letters from California, tells of what an old shepherd told him about the way they train the famous shepherd dogs in southern California. He says you may go over the plains and hills there for miles and see thousands of sheep, but not a man to watch them. Around each flock or band of say a thousand sheep are half a dozen dogs of a peculiar breed—dogs whose progenitors were imported from the sheep pastures of the old world. These dogs take the entire care

the sheep, drive them out to pasture in the morning, keep them from straying during the day, and bring them home at night. These dogs have inherited a talent for keeping sheep, but the shepherds do not depend wholly on that. They cultivate it in this way—so that the old shepherd says: "When a lamb is born it is taken away from the mother sheep before she has seen it, and a puppy put in its place. The sheep suckles the puppy and learns to love it. When the puppy grows old enough to eat meat it is fed in the morning and sent out with the sheep. It stays with them because it is accustomed to be with its mother, but it cannot feed with them. As they get full the dog gets hungry. At length, impatient to return where it hopes to get another piece of meat, it begins to tease and worry its mother, and finally starts her toward home; the other sheep follow, and thus the whole flock is brought in. If the dog brings the sheep home too soon, or comes home without them, he gets no supper or is punished in some other way. Hence he soon learns when to come, and to see to it that none of his charge are left behind. These animals are trained by taking advantage of their instincts and appetites."

For "The Friend"

In a letter to Hannah More, by John Newton, in the 5th month, 1800, he adverts to the death of his beloved friend and neighbor, William Cowper, which will be read no doubt, with deep interest, by some of the admirers of that eminent poet.

H. C. W.

"My dear:—Glad should I be to have another peep at you, but all is uncertain; and if he precept, 'Boast not thyself of to-morrow,' is a proper admonition to all persons of all times, it certainly does not become me, at the age of seventy-five, to look so far forward as to the end of a whole month. Well! my times are in the Lord's hands, and should we not meet upon earth, I trust we shall meet before the throne, where neither sin nor sorrow shall be able to distress us. Here we are sometimes called to sow in tears, but the harvest will be one of everlasting and uninterrupted joys. Oh! this blessed hope softens the trials of life, and will gild the gloomy valley.

"My most dear and intimate friend William Cowper, has obtained a release from all his distresses. Why was he, who both by talents and disposition seemed qualified, if it were possible, to reform the age in which he lived, harassed by distresses and despair, so that the bush which Moses saw all in flames, was a fit emblem of his case!

"The Lord's thoughts and ways are so much above ours, that it becomes us rather to lie in the dust in adoration and silence, than to inquire presumptuously into the grounds of His proceedings; yet I think we may draw some lessons from his sufferings. I wish to learn from them thankfulness, for the health and peace with which I have been favored; and cautious not to depend upon whatever gifts, abilities, or usefulness, past comforts or experiences, have been afforded me. In all these respects my friend was, during a part of his life, greatly my superior. He lived, (though not without short conflicts), in point of comfort and conduct, far above the common standard, for about ten years; and for twenty-seven years afterwards, he knew not one peaceful day. May it remind me likewise of the precarious tenure by which we hold all

our desirables. A slight alteration in the nervous system, may make us a burden and a terror to ourselves and our friends. It may likewise reconcile us to lighter troubles, when we see what the Lord's most favored and honored servants are appointed to endure. But we are sure that He is rich enough to make them abundant amends for whatever His infinite wisdom may see meet to call them to, for promoting His glory in the end; for this bush, though so long in the flames, was not consumed, because the Lord was there. The last twelve hours of his life he lay still and took no notice; but so long as he could speak, there was no proof that his derangement was either removed or abated. He was, however, free from his great terrors. There was no sign of either joy or sorrow when near his departure. What a glorious surprise must it be, to find himself released from all his chains in a moment, and in the presence of the Lord whom he loved, and whom he served; for the apostle says: 'When absent from the body, present with the Lord.' There is no intermediate state. How little does he think now of all he suffered while here!

"This is a disinterested letter. It neither requires nor expects an answer from you. When I wrote last I was desirous of possessing one more token of your kindness. You have gratified me, and I ask no further. Probably this will likewise be my last to you. My health is remarkably good; but eyes, ears, and recollection fail. I aim to adopt the words of Dr. Watts, and sometimes think I can, 'The breaches cheerfully foretell, the house will shortly fall;' yet as I am still able to preach, and am still heard with acceptance, I have no reason to wish to be gone. Pray for me, my dear ladies, that I may work while it is called to-day, and that when the night cometh, I may retire like a thankful guest from an abundant table. My ease is almost as singular as Jonah's. He was the only one delivered after having been entombed in the belly of a fish; and I, perhaps, the only one ever brought from bondage and misery in Africa, to preach Jesus Christ and him crucified? In early life I knew much of the evil of the world, but I brought it all upon myself. During the last half century, I have been favored with as much of the good which such a world as this can afford, as perhaps any person in it. I have had internal conflicts, abasements, bereavements, and sharp trials; but I think upon the whole, I have been as happy in temporals, as the present state of mortality will admit. Even now I can think of nothing with a serious wish, beyond what I have, if a wish could procure it. But all the past is like the remembrance of a dream, gone beyond recall; the present is precarious, and will soon be past likewise. But oh! the future! Blessed be He who hath brought immortality to light by the Gospel. I need not say to myself, or my dear friends who are in the Lord, *Quo nuncabit in loco?* we know where they are and how employed. There I humbly trust my dear Mary is waiting for me, and in the Lord's own time I hope to join with her, and all the redeemed, in praising the Lamb, once upon the cross, now upon the throne of glory.

"How apt is self to occupy too much of my paper, when I am writing to those whom I love: excuse a fault that flows from a sincere regard which cannot be confined by forms. I love you, I love Patty, I love you all. If I

were a poet, I should think more frequently of the five sisters and Cowslip Green, than of the nine muses and Parnassus. The Lord bless you all separately and jointly, with all the blessings pertaining to life and godliness.

"I am, my dear,

"Your very affectionate and much obliged,  
"JOHN NEWTON."

#### Wakefulness from Overwork.

A symptom of mental exhaustion, indicative of a very great degree of mental strain, is persistent wakefulness. The physiological cause of this condition is well understood. During excessive labor of the brain there is an increased flow of blood to the working organ, the vessels of the head and neck become distended with blood, as is shown by the flushing of the face. If this condition of distension is long continued, the vessels are apt to lose the power of contracting when mental activity is diminished. Hence arises the impossibility of fulfilling the physical conditions of sleep, the most important of which is the diminution of the flow of the vital fluid to the brain. Some extraordinary instances have been recorded of prolonged wakefulness as a result of mental overstrain. Boerhaave mentions that when, on one occasion, intently engaged on a particularly study, he did not close his eyes in sleep for six weeks. Sir Gilbert Blanc was informed by Gen. Pichegrue that, for a whole year, when engaged in active campaign, he slept but one hour in the twenty-four. These and other similar cases have probably been unconsciously exaggerated, for people often sleep without having an after-consciousness of the fact. It is certain that the continued deprivation of any considerable part of the normal amount of sleep will be seriously detrimental to health. Dr. Hammond, in his work on sleep, mentions the case of a literary man in America who, for nearly a year, while intently engaged in a favorite study, restricted his period of rest to four hours a day, and frequently less. At the end of that time the overtaking of his mental powers was manifested in a curious way. He told the physician that, though still able to maintain a connected line of reasoning, he found that as soon as he attempted to record his ideas on paper the composition turned out to be simply a tissue of arrant nonsense. When in the act of writing, his thoughts flowed so rapidly that he was not conscious of the disconnected nature of what he was writing; but as soon as he stopped to read it over he was aware how completely he had misrepresented his conceptions. If the language happened to be at all intelligible it was sure to have no relation to the ideas he wished to express. Thus wishing to obtain a book from a friend, he found that, instead of the request, he had written the prayer of Socrates, as given by Plato.

Sir Isaac Newton, in the later years of his life, suffered greatly from wakefulness. The fact, well known to every medical man, that persistent sleeplessness is frequently the precursor or initiatory stage of several most intractable maladies, physical and mental, always invests the presence of this indication of mental overstrain with grave interest. But a continued course of excessive mental labor generally manifests itself on the mind itself in various ways, all more or less premonitory of approaching collapse. The brain-worker begins to perceive an unwonted want

of clearness in his ideas; work comes gradually less easy to him; he is alarmed at sudden awkward failures of memory; a feeling of surfeit or disgust will steal over him in the midst of work; he becomes unable to fix his attention, and latterly feels as if all mental energy was crushed out of him.

If these warnings of an overwrought brain, now speaking distinctly with the tongue of disease, are disregarded, the wonder frequently is, not that the inevitable retribution follows, but that it should have been so long delayed. What particular form the Nemesis shall assume, whether of physical or mental disease, will be determined by accidents partly of personal habit and temperament, and partly of inherited predisposition. It is noteworthy, however, that the common opinion that excessive mental occupation gravitates towards insanity, does not appear to be verified by facts. Indeed, one of the foremost of living physicians doubts whether alienation of mind is ever the result of overstrain. It is to physical, not to mental, derangement that excessive work of the brain generally gives rise. Insanity, he points out, finds the most suitable material for its development among our cloddish, uneducated classes; while the worst form of physical diseases are originated and intensified by our educated overstraining brain-workers.—*Chambers' Journal*.

#### A Striking and Unanswerable Fact.

Truly it is a striking and unanswerable fact, that there has not been *one* individual, who has risen to any eminence for religious dedication in our Society, but has had to tread the narrow and strait path; and has had to attribute his progress to giving up, in the ability received, to obey the secret monitions of the Spirit of Christ, even in little things: nor has there, I believe, been *one* who has swerved from this course, that has *ultimately* turned out better than the salt that has lost its savor.—*John Barclay*.

*Do all for God.*—Some Christians are constantly burdened by their daily cares. They wear a troubled, anxious look, which depresses all with whom they come in contact. They fail to see that they should serve God by their cheerful acceptance of daily duties and labors. It is a great mistake to separate religion from what is wrongly called secular occupation. All is of God! He is above all, through all, and in all. We are to do all in Him and for His sake. How beautiful life becomes when it is thus taken up in detail for God! Everything is sanctified. The common duties, the irksome round of trivial events, are made holy by the intention in which they are met. There is always a daily cross to be taken up, but, if it is borne after Christ, it becomes a means of grace. No service is trivial where Christ is served. The ceaseless labor of the household, small though it may seem to outsiders, is as duly noted and rewarded by the Master as the more prominent work of other servants. Let none despond; Christ gives to each his place. In that place and no other, He desires to be served. Do the work of your calling faithfully; do it as well as you can, as in His sight, and of you shall be said those words of highest praise, "She hath done what she could."

"When God calls for a sacrifice, the more promptly we yield it, the less we shall suffer."

The many beautiful sunsets which have been witnessed during the late Summer and the present Autumn, so often brought to mind the following lines written long since, when the author was but sixteen years of age, that they are offered for insertion in "The Friend," as perhaps descriptive of the enjoyment and feelings of others, at that lovely, that sweetly impressive hour of the day.

Original.

#### SUNSET.

'Twas evening—and the orb of day,  
That rose obscured in massy clouds,  
And rode the vaulted sky unseen,  
Now threw aside his humid veil;  
And once before his glorious close  
Displayed his radiant face, and shed  
A softened mellow light o'er all  
The undulated scene beneath.  
The scattered clouds in ragged forms  
Pass slowly 'cross his beamy disk,  
And cast their huge dark shadows o'er  
The woody heights; in silent pomp  
Then sail majestic off, and leave  
The verdant summits of the hills  
Tinged with his soft but lucid light.  
At length half sunk beneath the west,  
Arrayed in garbs of liquid gold,  
The fleecy clouds refulgent wait  
The moment of his bright depart;  
Then gradual die away the tints,  
Which erst in dazzling beauty glowed,  
'Till sober twilight comes apace,  
And all enrobes in misty grey.  
So Zion-ward enwrapt in clouds,  
The christian walks this vale of tears;  
Yet with a hope Divine sustained,  
Undaunted wends his way. But oh,  
What rapture fills his longing soul,  
When far beyond this world of storm,  
He sees the blissful gates unbarred,  
And as from hallowed lips he hears  
"Enter thou here and find thee rest!"  
How calm, how sweet the closing scene!  
The vanquished clouds recede, disperse:  
Radiant with celestial hope,  
His gladdened spirit beams, and all  
Around, its parting rays illumine.

1821.

C. M. S.

Though 'tis not now the season when the lovely wood Anemone, "with look so like a smile," brightens here and there the dark shade of the forest floor, there are some wild flowers even yet to be found decking their varied beautiful homes; and perhaps the following lines, addressed by a youth of fifteen years to that graceful little gem, may not inappropriately find a place in the columns of "The Friend."

Original.

#### TO AN ANEMONE IN A BURIAL GROUND.

Say lovely plant, while round thee throwing  
Thy wealth of leaves and starry flowers,  
While young spring on thy petals glowing,  
Thou drink'st bland April's sunny showers,  
Lovest thou thy home?

Thou standest by that long grey stone  
Like Beauty watching o'er the dead—  
Her bright cheek pales to hear the tone,  
The knell that lays her loved one's head  
In the cold dark tomb.

Sweet flower, thou reck'st not of the scene,  
The funeral scene, thy birth-place ground,—  
The rank grass waving long and green,  
The hollow wind that moans around,  
The silence dread;

The damps that creep with twilight's shade,  
The graves cold gleaming through the gloom,  
The red earth piled in mounds new made,  
The awful stillness of the tomb,—  
Thou'rt 'mongst the dead.

Thou bendest with such drooping grace,  
Thou seem'st an emblem of the maid  
That whilom bowed her sorrowing face  
Like spirit of the church-yard shade,  
O'er this grey stone.

She was a bright, but fading flower,  
Like thee too bright for her dark home;  
Her spirit, chained here for an hour,  
Was freed, and left earth's sinful gloom  
For God's high throne.

A plant in Heaven's own nursery reared,  
She wintered here mid earth-born things;  
As buds unfold their petals seared,  
She homeward spread her long closed wings,  
And soared away.

How blest that hour—the mourners by—  
They had but in their woe-struck sight,  
Their sweet bird flown—her upturned eye  
Saw opening glory, and for night  
The heavenly day.

For "The Friend."

#### Scientific Notes.

A recent academical address by A. Stren at Giessen, speaks of the circulation observable in the changes on the earth's surface. A familiar example is that of water, which evaporated from the sea, is condensed in the atmosphere, falls to earth again as rain, snow or dew, filters through the soil, and by stream and rivers returns to the sea. But this circulation is not so simple as at first sight may appear. For the water evaporated from the sea is absolutely pure, while the water which returns in rivers carries with it large quantities of solid matters. When these solid matters with the water bearing them, have reached the sea, the motion which kept them in suspension ceases, and there ensues a mechanical deposit.

But the substances dissolved in river-water often exceed those mechanically suspended in it, and consist for the most part of compounds of lime, with some magnesia and a little common salt. To give some idea of the quantities, it has been calculated that the Rhine, which is comparatively a small river, carries annually to the sea, over 100 million cubic feet of solid substances dissolved in its waters. These are all washed out of the earth's strata by the rain water passing through them. The lime thus brought into the sea-water furnishes the material with which the coral polyp build the great coral banks, and the various tribes of mollusca deposit their shelly coverings.

This levelling action of water in wearing away the mountain masses and filling up the sea-bottoms, is counterbalanced by other forces, which depress some portions of the earth's surface and elevate others. Among the gradually rising stretches of land are Norway, the north of Sweden, the west coast of England, Ireland, a great part of France, Syria, the east coast of Africa, &c. Among those which are gradually sinking are the south of Sweden, the east and south of England, Greenland, the isles of the Pacific, &c.

A. W. Bennett recently read before the British Association, a paper on the movement of the glands on the upper side of the leaf of the common Sun-dew, *Drosera rotundifolia*, a plant common in America as well as England. These glands are not hairs, but portions of the leaf, which terminate in a pellucid knob within which is formed a peculiar viscid secretion. When examined with a microscope of low magnifying power, this secretion may be seen collected about the knobs, and stretching in glutinous strings from one to another. The secretion has probably an attraction for flies and other small insects, as, if the plant is examined in its native bogs, scarcely a leaf will be found in which an insect is not imprisoned. The experiment was made of placing a very small insect on a leaf. Immediately on coming into contact with the viscid secretion it made vigorous efforts to escape, but these efforts only seemed to entangle it all the more deeply. The contact of the insect appeared

excite a stronger flow of the secretion. It soon enveloped the body of the animal in a dense and almost transparent slime, firmly binding down the wings and rendering escape hopeless. During all this time the insect was sinking lower and lower down among the glands towards the surface of the leaf, but only a slight change had taken place in the position of the glands themselves, which had tightly converged so as to imprison it more completely. But after the struggles of the prisoner had practically ceased, a remarkable change took place in the leaf. Almost the whole of the glands on its surface, even those removed from the body of the insect by a distance of at least double its own length, began to bend over and point the knobs at their extremities towards it. The experiment was made in the evening, and by the next morning almost every gland on the leaf was pointing towards the object in the centre, forming a dense mass over it.

The nearly allied Venus' Fly-trap (*Dionaea muscipula*), which imprisons flies by a much more sudden motion of the sides of the leaf, is said to digest and absolutely consume the insects thus entrapped. What becomes eventually of the prisoners of the sundew, the experiments have not been carried sufficiently far to ascertain. A small piece of meat placed on another leaf produced changes similar to those caused by the fly, the glands converging over it in the same manner. Pieces of wood and of worsted placed on the leaves produced no such results.

Du Binz read a paper before the British Association, showing that alcohol reduced the temperature of the body in warm-blooded animals  $3^{\circ}$  or  $4^{\circ}$ . The apparent warmth felt after taking a dose of it was due to the irritation of the nerves of the stomach, and the engorgement of the vessels arising in the skin.

Selected for "The Friend."

The following is a copy of a letter written by Robert Barclay to Christian Nollason, whom he afterwards married. John Barclay in his "Memoirs of Friends in Scotland," says: "It may be interesting to some readers, to contemplate the grounds and motives for entering on the marriage state, which appeared to influence such a mind as that of the 'Apologist,' at the age of twenty-one years; at least so far as these are developed in the following letter addressed to the worthy object of his choice."

"28th of First mo. 1669.

"Dear Friend:—Having for some time past had it several times upon my mind, to have saluted thee in this manner of writing, and to enter into a literal correspondence with thee, so far as thy freedom will allow, I am glad this small occasion hath made way for the beginning of it.

The love of thy converse, the desire of thy friendship, the sympathy of thy way, and the meekness of thy spirit, have often, as thou mayst have observed, occasioned me to take frequent opportunity to have the benefit of thy company; in which, I can truly say, I have often been refreshed, and the life in me touched with a sweet unity, which flowed from the same in thee,—tender flames of pure love have been kindled in my bosom towards thee, and praises have sprung up in me to the God of our salvation for what He hath done for thee! Many things in the natural will, concur to strengthen and encourage my affection

towards thee, and make thee acceptable unto me; but that which is before all and beyond all, is, that I can say in the fear of the Lord, that I have received a command from him to love thee, and for that I know his love is much towards thee, and his blessing and goodness is and shall be unto thee, so long as thou abidest in a true sense of it.

I write not these things to draw out thy mind, but as being with me so to do, that thou mayst rather be humbled, and love the more to abide in the low, meek, quiet, satisfied, peaceful, contented habitation, from which there is safety that cannot be hurt, and peace that cannot be broken,—a place of rest and quietness, where the children of light and babes of the household of faith have fellowship together, and embrace one another in the pure love, which is mysterious, and hid from such as are led away by the foolish loves, and fond affections of this world. For when any that bear the name of Truth, or have at any time tasted of the good thereunto belonging, are entangled herein, they cannot but receive great hurt, and much damage to their spiritual prosperity and advancement. Against this it is my study to watch, and my earnest desire to be enabled so to do. My friendship and respect for thee doth engage me to offer the same advice to thee, because thou and I are those, amongst the small handful in this place, whose private condition puts in a capacity to be obvious to temptation of that kind; by yielding to which I fear it will be found, some have received hurt. That such as are behind may be preserved from the like danger, is the cry of my soul. I am sure it will be our great gain so to be kept, that all of us may abide in the pure love of God; in the *sense* and *drawings whereof*, we can only discern and know how to love one another.

In the present flowings thereof, I have truly solicited thee, desiring and expecting, that, in the same thou mayst feel and judge.  
ROBERT BARCLAY."

*A Struggle with a Devil Fish.*—Charles B. Brainerd, of Boston, in writing to the Scientific American about specimens of the devil fish, relates this interesting incident: The strength which these creatures possess is almost beyond comprehension, as is evinced by what took place when my pet was captured. He had seized hold of a submarine diver, at work in the wreck of a sunken steamer off the coast of Florida. The man was a powerful Irishman, who claimed to weigh 300 pounds. His size and build fully verified his statement, and to use his own language, "the baste landed on top of my shoulders and pinned my arms tight. I felt my armor and myself being cracked into a jelly." It seems that he was just about being brought to the surface, else the monster would have killed him, for he was suffering so from the terrible embrace that he could move no part of himself. When dragged on to the raft from which he had descended and finally released, he had fainted. The men on the raft seized the fish by one of its wriggling arms, and tried to pull it off, but could not break the power of a single one of its suckers. The fish was only removed by being dealt a heavy blow across the sack containing the stomach. This sack stood stiffly up above the eyes, while the eyes stood out like lobsters' eyes, and gleamed like fire. The monster is, all in all, one of the most frightful apparitions it could be the fate of man to

meet. It fulfils in every particular the horrible features attributed to it in Victor Hugo's "Toilers of the Sea." Notwithstanding the severity with which the able Frenchman has been criticised for "creating a nondescript with his weird imaginations," the truth must be granted that his "nondescript" has an actual existence, as is evidenced by the specimens in Brighton and Hamburg, as well as my own.

For "The Friend."

### The Right Use of Wealth.

We must surely believe an honest accumulation of wealth, and the right use thereof, with the blessing of the Lord, which maketh truly rich, will not retard the work of the soul's salvation, or the spread of the Redeemer's kingdom. Many of the servants and children of God, who have been entrusted with great possessions, exerted an influence for good among those with whom they associated, as they were enabled to walk humbly before the Most High; living in his holy fear, and bearing the cross of Christ, neither poverty nor riches, could separate them from His love, who bought them with the price of his own precious blood.

It does not follow, because a man is rich, that his ways are displeasing in the Divine sight: "The love of money," and the improper use of it, "is the root of all evil." We find the "poor rich" man cannot rise above the things of earth, whilst the "rich poor" man may soar beyond the skies, and has his treasure there: let us then shroud the former with the drapery of the past, and brighten the present with the names of John Woolman, Richard Jordan, and Christopher Healy; rich in faith and good works, whose memories are still shining with the rays of the Sun of Righteousness, and are covered with the fragrance of the eternal morning. We doubt not, these have experienced the truth of the prophetic declaration, "they that turn many to righteousness, shall shine as the stars in the firmament, forever and forever." Let us read the New Testament, where we may find the account of the rise of Christianity, when our glorious gospel day was ushered in, with "Peace on earth and good will to man;" and mark the phalanx of noble men, poor and rich, wise and simple, who received the glad tidings with joy, and served God in their day and generation. A certain centurion's servant, who was dear unto him, was sick, and ready to die; when he heard of Jesus, he sent the elders of the Jews unto him, beseeching Him that he would come and heal his servant. They besought him, *instantly*, saying, "he was worthy for whom he should do this, for he loveth our nation, and hath built us a synagogue." Notwithstanding their impatience, mark the condescension: then Jesus went with them; and when he was not far from the house, the centurion sent friends to him saying, "Lord trouble not thyself; for I am not worthy that thou shouldst enter under my roof; neither thought I myself worthy to come unto thee; but say in a word, and my servant shall be healed." Jesus marvelled and said unto the people, "I have not found so great faith, no not in Israel." Luke vii. And John gives us the account of the nobleman who had the same living faith, when he besought Jesus saying: "Sir, come down ere my son die!" Note the gracious reply, "go thy way, thy son liveth."

These were true witnesses of the divinity and love of Christ, not only in his outward appearance, but felt his inward power to heal the sick. Joseph of Arimathea, an honorable counsellor, was a good man and just, and waited for the kingdom of God. After the crucifixion of our Lord and Saviour, he "craved the body of Jesus, and laid it in his own new tomb." Nicodemus (who came to him by night) at the time of the burial, brought one hundred pounds of spices (very costly) as a token of his love and respect, which, through fear of the Jews, he had not been willing to manifest openly, was strengthened by the Holy Ghost at the time of this great trial, to fill the linen with the spices, and assist in wrapping the body of Jesus therein; while the immediate followers of their Lord and Saviour, through the weakness of the flesh, and anguish of spirit, forsook him and fled.

It is unnecessary to enumerate all the names of the good and rich, who had their part in the first resurrection, over whom the second death had no power, simply to convince some that the influence of wealth will produce its beneficial effects, or evil, as its possessor may choose; rather let us leave the things which are behind, and press forward towards the mark for the prize of the high calling of God in Christ Jesus our Lord, and gather up the fragments which remain, that nothing be lost.

We have had fathers and pillars, to go no more out, in the church of our day, with whom we took sweet counsel and went up to the house of God in company. Samuel Bettle, John Letchworth and Thomas Kite, all preachers of righteousness, setting forth in their daily walk and conversation, the great truths of salvation, and confirming in the line of their experience the words of the Psalmist: By humility and the fear of the Lord, are riches, honor, and life. These having kept the faith, and finished their course with joy, are now, we believe, in the full fruition of that sight which John the divine had, when he saw a pure river of water of life, clear as crystal, proceeding out of the throne of God and of the Lamb.

Of Samuel Bettle it may be said, "Blessed is the man who walketh not in the counsel of the ungodly, nor standeth in the way of sinners, but his delight is in the law of the Lord, and in his law doth he meditate day and night." (Psalm 1st.) He was a faithful laborer in the Lord's vineyard, making a right use of the trust committed to him, keeping to the injunction, let not thy left hand know what thy right hand doeth. When called upon by the writer, whose privilege it was to know him intimately, to administer to the comfort of a widow, he made no reply but sent her one hundred dollars. Careful to entertain strangers, he did it cheerfully, and oftentimes refreshed the Lord's poor messengers, that their feet might not be turned out of the way.

It will require an abler pen than the writer's to portray the life of our beloved and honored friend, but it may not seem out of place to allude to a memorable sermon which he preached in the meeting-house at Newton, the place where Richard Jordan had so often through the gospel trumpet, sounded an alarm, and not very long after his death. On First-day morning, after the meeting had been gathered into solemn silence for half an hour, Samuel Bettle rose and commenced with, Labor not for the meat which perisheth, but for that meat which endureth unto everlasting

life, which the Son of Man shall give unto you; for him hath God the Father sealed; and in a striking manner without any attempt of his own to elucidate the text, he went on from one part to another, wherein he set forth the stupendous work of our redemption by the coming, life, sufferings and death of our Lord Jesus Christ, not only the doctrine, but the efficacy of that blood which was shed on Calvary's mount for every man.

But space and time forbid the writer to trespass farther; suffice it to say, there were other interesting circumstances connected with the life of our valued friend, which might be instructive to many; of which his extraordinary view of the immortality of the soul, when he had the yellow fever, is not among the least.

Q. U.

#### Curiosities of the Sea Bottom.

*Forest and Stream* has a communication from Com. Beardslee, commanding the steamer Blue Light, assisted by Professor Verrill of Yale College, from which we copy the following passages:

"Cape Cod is a dividing line upon our coast. South of it one class of creatures are found in profusion, but the quohog clam (the *Calista convexa*), certain star fishes and worms, and the oyster have not existed, or having existed, have become extinct north of this line, except in a very few localities. A live *Calista convexa* (a species of clam) brought up in Casco Bay upset at once the opinion held till then that it was extinct so far north. Quohog shells in plenty we find in the ancient Indian shell mounds, which dot every slope of the island, showing that once they existed in plenty. Now but one little bay—a mere cove at the head of Casco Bay—furnishes this creature, which, south of Cape Cod, is but the common plentiful clam. Oyster shells, of a size to which a Saddle Rock is but a pigmy, lie thickly planted six feet below the present bottom of Portland Harbor. They, too, however, are extinct. In that great convulsion of Nature that was so sweeping in its effects not a living oyster was left to fulfil a mission. It seems a sad mistake up here, where oysters could be eaten every day in the year, and the nightly blanket renders superfluous the mosquito bar. But the ocean is still well filled, and with fruits and flowers, with vegetables and plants, masons and well diggers, robbers and cannibals, and each bearing in a greater or less degree a resemblance, either in appearance or habits, to the creature or object above water that it is named for. Way down in the dark depths animal life utilizes every inch of ground, and no square foot above the surface can equal in number or variety of forms the same space at the bottom of the sea. Strange, odd, horrible creatures, with none or many eyes, with speckled bodies, and long, slimy, clinging arms, changing at once their form and size at will, and, like the genii of the Arabian Tales, from a mere starting point extend themselves almost indefinitely in size. Beautiful creatures, too, as the anemones and dahlias, at first frightened and jarred as we see them in the dredge, mere masses of pink or purple flesh, covered with a tough skin; left to themselves in a cool dark place they protrude from an opening in their bodies, clusters of gay-colored and gracefully moving antennæ, which in some branch like coral, in others bear close resemblance to the stamens and petals of

flowers. Down here the animal kingdom takes from the floral tribe the duty of embellishing. Living, breathing, food-devouring flowers, and the kitchen garden too, and orchard, are not unrepresented. Sea cucumbers, (*Pentacta frondosa*), sea peaches, (*Cynthia pyriformis*), sea pears, (*Boltonia clavata*), and apples, are found in plenty, the former so close a simile of the fruit, both in form and color, that it could be mistaken, the one for the other.

"The flowers though, beautiful as they are are but brigands; those graceful petals wave but to entice and grasp a victim, which, when seized, is pressed close to its mouth, and then even if larger than its captor, is swallowed whole. The process of swallowing whole a morsel larger than the swallower, is rather an unusual proceeding among animals, and of course an unusual method has to be adopted. The anemone does it in this way; holding tightly its prey, it gradually protrudes its stomach from its mouth, and turning it inside out, envelops its dinner, and then it lies quietly awaiting the death and digestion. It rejects such portions as are not suitable, and stows away its stomach for future use. What a blessing some men would esteem this faculty to be.

"The sea cucumber is another curious creature; first found it is a small, compact 'gherkin;' left to itself, it will swell and develop to an immense cucumber, quite large enough to make a boat of, if the sea urchins had the same habit as did those urchins of whom I was once one.

"Starfish we find in great numbers and varieties, different according to the character of the bottom. The common 'five-fingered Jack' is found everywhere, and at each haul of the dredge, whether from mud or rocks, '*asterias vulgaris*' is the first object called out to the note taker."

*Prayer.*—Clement of Alexandria says:—"Prayer, if I may speak so boldly, is intercourse with God. Although we do but lisp, although we address God without opening the lips, in silence, we cry to Him in the inward recesses of the heart; for when the whole direction of the inmost soul is to Him, God always hears." Again, when he is wishing to present the ideal of a devout Christian, arrived at the maturity of knowledge, the same writer says: "He will pray in every place, but not openly, to be seen of men. He prays in every situation; in his walks for recreation, in his intercourse with others, in silence, in reading, in all rational pursuits. And although he is only thinking on God in the little chamber of the soul, and calling upon his Father with silent aspirations, *God is near him, and with him, while he is yet speaking.*" —*Neander.*

#### Vesuvius.

All around is spread a magnificent prospect. Immediately below lies the Atrio, just above which may be clearly seen the three small craters which gave rise to the lava of 1858; the current itself may be traced running from them against the walls of Somma, then turning to the west, in which direction it is hidden for some short distance by the more recent flows of 1867 and 1868, and again appearing with its rosy structure south of the Salvatore ridge; shorter currents from the same craters

re also seen running eastward, farther into the Atrio. Beyond from the steep and lofty hills of Somma, a little to the west is the ridge of San Salvatore, a fragment of old Somma, standing up amid black lava-flows (1855 and 1868 on the north, and 1767, 1858, and 1867 on the south). Farther off lie the plain, with scattered towns and villages, surrounded by green vineyards, the beautiful bays of Naples and Baiæ, the islands of Ischia and Procida, the old volcanic mountains of the Phlegrean Fields; and farther off still, bounding the fertile plain, and marking an old sea-coast, are the higher mountains beyond Capua and the snowy Apennines. Turning from this magnificent prospect, the crater-edge is gained; the sides are seen to slope steeply inwards, but the volumes of smoke constantly passing upwards hide the structure of the interior except for momentary glimpses, leaving the edge of this great smoking caldron, some small holes attract attention, holes not more than a yard or so wide, but of unknown depth, up which is constantly ascending a powerful current of hot air, so that fine sand or fragments of paper thrown in are at once blown forcibly out. Passing round the edge of the crater, a view to the south is obtained; the plain on which Pompeii stood lies directly below, bounded by the mountains behind Castellamare, again forming the boundary of the old sea before mentioned. Across the blue waters of the bay the hills behind Sorrento and the island of Capri please the eye by their soft outline and delicate tint. Vile black lava-flows form a well-contrasted foreground. On the south-east side another flow of the 1867 lava can be traced; while those of 1850 and 1834 run also to the south and south-east, and, far below, the red craters of 1760 are conspicuous. Having about completed the circuit of the crater, the descent upon the south-west side is very instructive. The first part is made very rapidly, plunging to the knees in fine black ash (which near the summit is quite hot below the surface), accumulated about and among the lava-flows of 1834, &c. In this easy manner about half the height of the mountain is descended in a very short time. The ash is for the most part very fine, and on examination is found to contain many separate crystals of leucite and augite. The several little red craters of 1794 are now reached; small model craters, at present very shallow, all close together, and one of them double—the birthplace of the lava-stream which destroyed Torre del Greco and ran far out into the sea. Just above these might be observed the sudden termination of a much more recent stream, presenting the appearance of a low line of steep cliff, and far below, only just above Torre del Greco, may be noticed the eleven little craters opened out along a straight line in 1861, and which again threatened the town with destruction. Soon after leaving the craters of 1794, the region of vineyards is once more gained, not before passing, however, signs of their former higher existence, in the shape of ruined huts enveloped in lava, yet not overthrown. Sometimes a wall of lava may be seen approaching within a foot or so of a hut, which it may partly surround yet not overthrow. It seems that such an elastic rising cushion of hot air is entrapped between the hut walls and the lava as to resist the progress of the latter for some time, though finally it usually curls over the summit of the dwelling and envelopes all. As regards the

character of the Vesuvian products, both lava and ashes, a good deal of variety is exhibited. There are the trachytic tufts of earlier eruptions associated with leucitic lavas or grey-stones: there are basalts of modern eruptions, crystals of augite in a dark matrix; and there are modern leucitic lavas. So that we have the three classes of volcanic rocks represented.—*Hardwicke's Science Gossip.*

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 85.)

"1814. Ninth mo. 29th. During the several days passed since last date, my mind has been favored with an unusual degree of peace; and, I trust, with a measure of the heavenly Father's love, for which I desire to be thankful to him.

Eleventh mo. 11th. I have of latter time felt the chilling blasts of adversity (if I may so term it) beating against me; or rather felt all sense of my heavenly Father's love withdrawn as behind the curtain. In this state no consolation, no solid peace, no sweet communion of spirit has been experienced; but instead thereof a waste, howling wilderness to journey through, without a guide or protector. For when thy light is withdrawn, dearest Father,—when none of thy comfort is dispensed to us poor, finite beings, what can we do? Truly we can do nothing without thee. But now I would thank thee for the change which thou wast pleased to afford this evening, even comfort and consolation to my mind; a sweet serenity, a solemn covering, more to be prized than the golden wedge of Ophir. Oh! that thou wouldst enable me to walk worthy of a continuation of thy favor from season to season, and to enable me to perform any little act which thou mayst be pleased to appoint unto me.

No date. "May I not at this season, dearest Father, acknowledge that thou art good; and that I am vile; and may I not once more desire that thou wouldst favor me to see wherein I have offended, that thou hast seen meet to prove me again by depriving me of thy soul-sustaining consolations. I have been ready to say at seasons, 'I have no hope,' though I would not give out willingly, but would rather call upon thee till thou art pleased to arise and answer. O, that thou wouldst purge me of all that is displeasing in thy Divine sight, that thou wouldst not spare nor have pity till thou hast made me whole! Bring me into suffering, dearest Father, or chasten me in any way that thou seest meet, rather than let me pass on in forgetfulness or without regard to thy will, but that I may be humbled sufficiently and made willing to do whatever thou mayst appoint unto me, that so thy favor may not be withdrawn, and that I may be a grateful receiver of thy manifold mercies. Enable me, O Lord! to follow thee more faithfully; and be pleased to show me thy will concerning me, that so by thy Divine help and strength, I may journey forward, and at the conclusion of all things here below, be permitted to enter that glorious city whose builder thou art; where I may join in ascribing glory to thee and the dear Son of thy bosom, Jesus Christ our Lord."

As clearly portrayed in the foregoing memoranda, Sarah Hillman was not permitted to pass along smoothly and easily without crosses and exercises; but had, in her measure, to participate in the cup of suffering the

dear Saviour drank of, and the thoroughly cleansing baptism He was baptized with; which, as fairly implied in His communication to James and John, all His *must* partake of. She also understood this baptism to be with burning and fuel of fire; designed to consume not only the dross and the tin, but the reprobate silver also; and that there was no turning from the grave injunction, "Work out your own salvation with fear and trembling," &c. This tends to preserve from lukewarmness; to break up every false, deceitful rest, and to bring the chastened, meek and lowly disciple in abasedness and contrition of soul to the footstool of Christ Jesus, where the ear is made and kept attentive to His in-speaking; still, small voice as the one thing needful. She even interceded for the fellowship of her Redeemer's sufferings; or in any way to be taught the discipline of the cross, if she could but be preserved from indifference and disobedience to his will; which, submitted to and obeyed, is our sanctification. To serve our generation according to His will, and thus be found among the Lord's faithful followers in the great day when we shall each have to give an account of our respective stewardships, is the one thing, which above all others, should claim our deepest solicitude and attention. At the same time we need not expect to sing the song of the redeemed, or to be saved with an everlasting salvation, unless that song be learned here, and now; for, as is written, "No man could learn that song but the hundred and fifty and four thousand which were redeemed from the earth."

"1815. First mo. 12th. Though my mind has not been stayed for some time past sufficiently on God, yet in the riches of his mercy, He has been pleased again to furnish me with an evidence that He still regards his children who desire to serve him, for which I hope to be thankful; and this query has run through my mind, What shall I render to Thee for all thy mercies? What *shall* I render? O! that I might be enabled to lay down all, even, as it were, my life at thy feet, to become, dearest Father, as passive clay in thy hand, that thou mayst do with me as is most agreeable to thee: that in all things I might be able to say, not my will, O Lord, but thine be done.

"The subject which at present most affects me, enable me, dearest Father, to cast entirely upon thee. Be thou pleased to keep near me and strengthen me for thy work and service; and O! when my mind may be clothed with exercise, and all that is living within me quickened under a sense of the awfulness of thy word, and my will humbled and slain before thee, O! keep me at these seasons from running into the work without thy word of command, Go, and I will go with thee. Blessed Father, enable me now under the present blessing of serenity and quietness of spirit to keep my mind stayed upon thee. Suffer me not again to wander away as one without a shepherd; but O! that thou wouldst help me to say, Do with me as Thou wilt. I greatly desire to be preserved from all worldly-mindedness, and to keep my mind, as much as may be, fixed on Heaven, that so I may join in ascribing praise, with the spirits of just men made perfect, before the Lamb forever.

"Second mo. 7th. Under a sense of the goodness of Israel's Shepherd, in thus favoring me to partake of the bounties of his table, I am induced to offer the tribute of thanksgiving and praise to his great name: who, I

boast not in asserting, hath thus far been pleased to help, and measurably to preserve me from the wiles of the enemy. O! that my mind may be stayed in Him, and enabled to persevere in the way of well-doing. Let not the gratifications of this world, O my soul, hinder thee from performing the will of heaven; but let thy desires be so fixed in the blessedness of that eternity towards which thou art travelling as to be able to say, Thou knowest, O Lord, that thy servant desireth above all other considerations to serve thee in all things. My mind has been humbled for some time under a sense of thy mercies and love to me, a poor, unworthy creature, who has so often stumbled at thy will; but I beg and implore for resignation, and strength, and wisdom, and understanding, that so I may not move without thy direction, neither do any thing to hurt the cause of Truth in the earth; Oh no! rather let me cease to lift up a voice among the sons of men. But if so be that I may be the instrument of turning any to the true fold, I think I may say, I am willing to spend and to be spent for the honor of Thy name. O! that this might be evinced by my daily conduct and in all my proceedings, that in the end this glorious call may be held forth: Come, thou blessed of my Father, enter into the joy of thy Lord; and not to me only but to all those whom thou hast visited and invited to thy table to feed on the heavenly bread thereof."

(To be continued.)

My spirit craves for more evident marks of godly simplicity among the Quakers, so-called. I am one of those who mark the boasted "march of intellect" with a jealous fear. The refinements of our day seem, in my view, to draw the mind from under the cross of Christ. According to my observation, we are not the plain, unfashionable people that, if faithful, we should be; we are too generally intermingled with the manners and maxims of the times. Everlasting Mercy can yet turn and overturn, and settle a faithful people.—*Mary Capper.*

## THE FRIEND.

ELEVENTH MONTH 15, 1873.

### SUMMARY OF EVENTS.

**FOREIGN.**—The French National Assembly met on the 5th, at Versailles, with a full attendance of members. President MacMahon sent a message which was read to the Assembly. He expresses the opinion that the government absolutely lacks two things essential as conditions of efficiency. It has neither sufficient vitality nor authority. With its powers liable to be changed at any moment it can do nothing durable. He urged the Assembly to consider the dangers of the situation and create a strong durable executive, which can energetically defend society.

The Deputies of the Right warmly cheered the message, and a motion that executive power be conferred on Marshal MacMahon for a term of ten years; that he continue to maintain the present form of government until the constitutional bills are voted, and that a committee of thirty be appointed to examine said bills was, after debate, declared "urgent" by a large majority.

On the 6th inst. the Assembly re-elected Buffet as its President by a unanimous vote, the entire Left declining to vote. On organizing the bureaus of the Assembly, it was found that the Republicans would have a majority of one in the committee on the prolongation of President MacMahon's powers. This result caused great excitement and, according to the *Paris Presse*, has induced the Right to agree that MacMahon's term of office shall be limited to five years, and also that he

shall be officially designated by the title of President of the Republic. By these concessions the Right gained over one Republican member, and now have a majority in the committee.

The Bazaine trial is still progressing. Count Palikao, Napoleon's last Minister of War, testified in regard to his acts while in office. He accepted the responsibility of the march on Sedan, and admitted that he received in Paris the dispatch from Marshal Bazaine.

All the ministers have tendered their resignations, but they were not accepted by President MacMahon.

A Paris dispatch of the 11th says: "The excitement here and at Versailles is subsiding, and it is believed the crisis is over. Both sides seem disposed to pursue a conciliatory course. It is anticipated that the compromise offered by the Right will be accepted." Ex-President Thiers considers that the establishment of a conservative Republic is assured.

Bismarck, as Chancellor of the Empire, has laid before the Federal Council the invitation of the United States government to Germany to participate in the Centennial Exhibition at Philadelphia, with a recommendation that it be accepted.

In the recent elections in Prussia for Deputies to the Diet, the Liberals have gained fifty members. A Berlin dispatch says: The German Minister of Finance has decided to sell 20,000,000 dollars of silver to the United States government, which is the highest bidder.

A decree has been promulgated in Rome by the Italian government for the expropriation of four more convents in that city.

Another large fire has occurred in Constantinople. The latest advices from India are more favorable. In some districts the crops were improving, and with a continuance of favorable weather there were hopes that the apprehended famine might be mitigated if not wholly avoided.

The steamer *Virginus*, which has been employed in carrying arms and ammunition to the Cuban insurgents, was captured by the Spanish gunboat *Tornado*, near Jamaica. She had 170 passengers and crew, who with the vessel and cargo were taken to Santiago de Cuba. Some of the insurgent leaders were among the prisoners, of whom four were tried by a military court and executed on the 4th inst. The condemned were the Cuban Generals Bembeta, Cespedes, De Sol, and Washington Ryan.

The Bank of England rate of discount has been advanced to nine per cent. Heavy shipments of gold to the United States continue.

The Spanish steamship *Murillo*, which was seized at Dover for running into and sinking the emigrant ship *Northfleet*, has been condemned and will be sold.

An explosion in a fire works factory, at Lambeth, caused the immediate death of eight persons and the injury of a number more.

A steamship from Australia, with 489,000 pounds sterling in bullion, arrived at London the 4th inst. The gold will be shipped to New York.

Alexander Brogden, M. P., delivered an address the 4th inst., at Darlington, in which he stated that he had been offered 10,000 tons of English rails, now lying at New York, for a price of \$10 per ton less than their original cost.

Lord Derby has made a speech in opposition to the Ashantee war. He holds that the British protectorate had better not have been extended to its present dimensions, expresses a doubt whether it was wise to take over the Dutch forts, and protests against any further extension of the same policy.

London, 11th mo. 10th.—Consols, 92½. U. S. sixes, 1867, 95½; new five per cents, 89½. There is a money pressure in London, and loans have been made at 10 and 13 per cent.

Liverpool.—Uplands cotton, 8½d.; Orleans, 8¾d. Breadstuffs steady.

The total attendance at the Vienna Exposition, according to official count, numbered 5,340,073 persons.

A severe engagement between the Carlists and government troops is reported in the province of Navarre, near Miranda del Arga, in which both sides suffered greatly. The Carlists claim a victory, but this is denied at Madrid.

**UNITED STATES.**—There were 248 interments in Philadelphia last week, including 50 deaths of consumption, 12 croup, 15 debility, 16 marasmus, and 11 old age.

The deaths in New York city last week were 465. The cost of widening and improving the streets of the burnt district of Boston will be \$5,070,000.

During the year ending 9th mo. 30th, 1873, 20,354 applications for patents were filed in the Patent Office, Washington, and 12,999 patents were issued, 235 extended, and 965 allowed but not yet issued. The fees

received during the same period amounted to \$701,62 which is \$2,177 in excess of the expenditures.

The number of vessels built during the past year greater than that of any year since 1865. The increase of tonnage has been 258,280 tons. The sailing tonnage has increased 294 vessels and 58,426 tons, steam tonnage 262 vessels and 44,891 tons, the canal boat tonnage 885 vessels and 115,615 tons, and the bar tonnage 117 vessels and 39,348 tons. Owing to the advance of labor and materials abroad, the cost of American built ships is now but little greater than that of the best British.

The census of school children in Florida, for 1873, was 70,995. Last year it was 62,869.

United States Treasurer Spinner, in his annual report, says that there has been a large falling off in the receipts, amounting to \$28,280,704 on customs, and \$16,912,863 on internal revenue, mainly due to the great reduction of taxation. Unless taxation is increased, or the expenditures of the government reduced, the reduction of the public debt will cease.

**The Markets, &c.**—The following were the quotations on the 10th inst. *New York*.—American gold, 10 U. S. sixes, 1881, 112½; ditto, 1862, 106; ditto, 10-5 per cents, 105. Superfine flour, \$4.90 a \$5.45; St. extra, \$5.50 a \$6.15; finer brands, \$6.50 a \$10.25. Wh. Michigan wheat, \$1.60; white Ohio, \$1.50; No. 1 M. waukie, spring, \$1.37½; No. 2 do., \$1.32; No. 2 Chick spring, \$1.28. State barley, \$1.20 a \$1.30. Oats, 4 a 4½ cts. Western mixed corn, 57 a 58 cts.; yellow 59½ a 60½ cts.; white, 69 a 70 cts. Carolina rice, 67½ cts. Brown sugar, 6½ a 7 cts.; refined, 9½ a 10 cts. *Philadelphia*.—Uplands and New Orleans cotton, 13 14½ cts. for middlings. Superfine flour, \$4.25 a \$4.45; extra, \$5 a \$5.75; finer brands, \$6 a \$10. Am. wheat, \$1.55 a \$1.61; red, \$1.45 a \$1.50; No. 1 spr. \$1.35 a \$1.40. Rye, 80 a 85 cts. Yellow corn, 63 cts. western mixed, 60 a 62 cts. Oats, 45 a 51 cts. Sm. hams, 11 a 13 cts. Lard, 8½ a 8¾ cts. Clover seed, 6 a 8 cts. The cattle market was dull and prices low. About 3000 beef cattle sold at the Avenue Drive-way extra at 6½ a 6¾ cts. per lb. gross; fair to good, 5 a 6 cts. and common 3 a 4½ cts. Sheep sold at 4½ a 5½ cts. per lb. gross, receipts 11,000 head. Hogs, \$6 a \$6.25 per 100 lb. net, receipts 9,000 head. *Chicago*.—No. 1 spr. wheat, 98 a 99 cts.; No. 2 do., 95 cts.; No. 3 86½ cts. No. 2 mixed corn, 34½ cts. Oats, 27 cts. No. 2 barley, \$1.23. Lard, 6½ cts. *Baltimore*.—Amber wh. \$1.62 a \$1.65; red, \$1.50 a \$1.60. Southern white corn, 74 a 75 cts.; yellow, 66 a 67 cts.; western mixed, 61 cts. Oats, 46 a 50 cts. *Cincinnati*.—Family flour, \$6.25 a \$6.60. Wheat, \$1.25 a \$1.30. Old corn, 45 cts. 1-70 cts. Oats, 32 a 40 cts.

### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnamonson Post-office, Burlington Co., N. J.  
Charles Evans, No. 702 Race St., Philadelphia.  
Deborah Rhoads, Haddonfield, N. J.  
Rebecca S. Allen, No. 335 S. Fifth St., Phila.

### FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to  
Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philadelphia.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philadelphia.

### FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WOODINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting, Birmingham, Chester Co., Pa., on the 15th ult., STEPHEN W. SAVERY of Parkerville, to SUSANNA FORSYTHE, daughter of Mr. Forsythe, of Birmingham.

WILLIAM H. PILE, PRINTER.  
No. 422 Walnut Street.

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Comets.

(Continued from page 98.)

### HALLEY'S COMET.

As comets are subject to great changes of appearance, one can never be identified by any description of its magnitude, brilliancy, &c., or the time of a previous return. This can be done only by a comparison of orbits. If, for example, we find the elements of an orbit very nearly corresponding in every particular with those of a former comet, there is a degree of probability, amounting almost to certainty, that the two are identical. Sir Isaac Newton, in his *Principia*, published shortly after the appearance of the comet of 1682, explained how the periods of those mysterious visitors might thus be ascertained, thus directing the attention of astronomers to the subject. Dr. Halley soon after undertook a thorough discussion of all the recorded cometary observations within his reach. In the course of his investigations he discovered that the path of the comet observed by Kepler in 1607 coincided almost exactly with that of the one which passed its perihelion in 1682. Hence he concluded that they were the same. He found also that the comet of 1531, whose course had been particularly observed by Perseus, moved in the same path. The interval between the consecutive appearances being nearly 76 years, Halley announced this as the time of the comet's revolution, and boldly predicted its return in 1758 or 1759. The law of universal gravitation had at this time just been discovered and announced. But although its application to the determination of planetary and cometary perturbations had not been developed, Halley was well aware that the attractive influence of Jupiter and Saturn might accelerate or retard the motion of the comet, so as to produce a considerable variation in its period. During the interval from 1682 to 1759, the application of the higher mathematics to problems in physical astronomy had been studied with eminent success. The disturbing effect of the two large planets, Jupiter and Saturn, was computed with almost incredible labor by Clairaut, Lalande, and Madame Lepaute. The result as announced by Clairaut to the Academy of Sci-

ences in November, 1758, was that the period must be 618 days longer than that immediately preceding, and that the comet accordingly would pass its perihelion about the 13th of April, 1759. It was stated, however, that, being pressed for want of time, they had neglected certain quantities which might somewhat affect the result. The comet, in fact, passed its perihelion in March, within less than a month of the predicted time. When it is considered that the attraction of the earth was not taken into the account, and that Uranus, whose influence must have been sensible, had not then been discovered, this must certainly be regarded as a remarkable approximation.

But during the next interval of 76 years the theory of planetary perturbations had been more perfectly developed. The masses of Jupiter and Saturn had been determined with greater accuracy, and Uranus had been added to the known members of the planetary system. A nearer approximation to the exact time of the comet's perihelion passage in 1835 was therefore to be expected. Prizes were offered by two of the learned societies of Europe—the Academy of Sciences at Turin, and the French Institute—for the most perfect discussion of its motions. That of the former was awarded to Damoiseau,—that of the latter to Pontecoulant. The times assigned by these distinguished mathematicians for the comet's perihelion passage were very nearly the same, and differed but a few days from the true time. Had the present received mass of Jupiter been used in the calculations, Pontecoulant, it is believed, would not have been in error as much as 24 hours. It may be proper to remark that, during the entire period from 1759 to 1835, the position of Neptune was such that it could produce no considerable effect on the motion of the comet.

This interesting object will again return about 1911.

From the earlier descriptions of this comet we infer that its brilliancy is gradually diminishing. In 1456 its tail, which was slightly curved like a sword or sabre, extended two-thirds of the distance from the horizon to the zenith. The appearance of such an object, in a grossly superstitious age, excited throughout Europe the utmost consternation. The Moslems had just taken Constantinople, and were threatening to advance westward into Europe. Pope Calixtus III., regarding the comet as confederate with the Turk, ordered prayers to be offered three times a day for deliverance from both. The alarm, however, was of short duration. Within ten days of its appearance the comet reached its perihelion. Receding from the sun, the sword-like form began to diminish in brilliancy and extent; and finally, to the great relief of Europe, it entirely disappeared.

The perihelion passage of 1456 was, until recently, the earliest known. It was shown by Laugier, however, in 1843, that among the

notices of comets extracted by Edward Biot from the Chinese records, were observations of a body in 1378, which was undoubtedly the comet of Halley. Further researches among these annals enabled the same astronomer to recognize two ancient returns, one in 760, the other in 451. Still more recently the distinguished English astronomer, Mr. Hind, has traced back the returns to the year 11 B. C. He remarks, however, that previous to that epoch, "the Chinese descriptions of comets are too vague to aid us in tracing any more ancient appearances," and that "European writers of these remote times render us no assistance." Let us now inquire whether the comet had probably made any former approach to the sun in an orbit nearly identical with the present. It is well known that the modern period of this body is considerably less than the ancient. Thus, the mean period since A. D. 1456 has been 75.88 years; while from 11 B. C. to 1456 A. D. it was 77.27 years. In determining the approximate dates of former returns, the ancient period should evidently be employed. Now, it is a remarkable fact that of more than 70 comets, or objects supposed to be comets, whose appearance was recorded during the six centuries immediately preceding the year 11 B. C., but one—that of 166 B. C.—was observed at a date corresponding nearly to that of a former return of Halley's comet. Of this object it is merely recorded that "a torch was seen in the heavens." Whether this was a comet or some other phenomenon, it is impossible to determine. But as the comet of Halley was more brilliant in ancient than in modern times, it seems highly improbable that seven consecutive returns of so conspicuous an object should have been unrecorded, especially as twelve comets per century were observed during the same period. It would appear, therefore, that the perihelion passage of 11 B. C. was in fact the first ever made by the comet, or at least the first in an orbit nearly the same as the present.

The motion of Halley's comet is retrograde. The point of its nearest approach to the sun is situated within the orbit of Venus. Its greatest distance from the centre of the system is nearly twice that of Uranus, or 36 times that of the earth. The comet is, consequently, subject to great changes of temperature. When nearest the sun its light and heat are almost four times greater than the earth's; when most remote, they are 1200 times less. In the former position, the sun would appear much larger than to us; in the latter, his apparent diameter would not greatly exceed that of Jupiter, as viewed from the earth. It would be difficult to conjecture what the consequences might be, were our planet transported to either of these extremes of the cometary path. In the perihelion, the waters of the ocean would undoubtedly be reduced to a state of vapor; in the aphelion, they would be solidified by congelation.

## ENCKE'S COMET.

It was formerly supposed that all comets have their aphelia far beyond the limits of the planetary system. In 1818, however, a small comet was discovered by Pons, the orbit of which was subsequently found to be wholly interior to that of Jupiter. Its elements were presented by Bouvard, in 1819, to the Board of Longitude at Paris. The form and position of the orbit were immediately found to correspond with those of a comet observed by several astronomers in 1805. The different appearances were consequently regarded as returns of the same body. Its elliptic orbit was calculated by Encke, who found its period to be only about three years and four months. Its perihelion is within the orbit of Mercury; its aphelion, between the asteroids and the orbit of Jupiter.

Encke's comet is invisible to the naked eye, except in very favorable circumstances; it has no tail; its motion, like that of the planets, is from west to east; and its orbit is inclined about  $13^\circ$  to the ecliptic.

A comparison of the successive periods of this interesting object has led to the discovery that its time of revolution is gradually diminishing; a fact regarded by Encke and other astronomers as indicating the existence of an ethereal medium.

## BIELA'S COMET.

The discovery of Encke's comet of short period was followed, in 1826, by that of another, whose revolution is completed in about six years and eight months. It was observed on the 27th of February, by M. Biela, an Austrian officer; accordingly it has since been known as *Biela's comet*. On computing its elements and comparing them with those of former comets, it was found to have been observed in 1772 and 1805. Damoiseau having calculated the dimensions of the comet's elliptic path and the time of its return, announced as the result of his computations the remarkable fact that the orbits of the earth and comet intersect each other, and that the comet would cross the earth's path on the 29th of October, 1832. This produced no little alarm among the uneducated, especially in France. Even some journalists are said to have predicted the destruction of our globe by a collision with the comet. When the latter, however, passed the point of intersection at the predicted time, the earth was at a distance of 50,000,000 miles.

At the return of 1845-6, Biela's comet exhibited a most remarkable appearance. Instead of a single comet, it appeared as two distinct bodies moving together side by side, at a distance from each other somewhat less than that of the moon from the earth. Astronomers, anxious to determine whether the cometary fragments had continued separate during an entire revolution, awaited the next return with no ordinary interest. The two bodies appeared at the predicted time (September, 1852;) their distance apart having increased to 1,250,000 miles. In 1859 the comet, on account of its proximity to the sun, entirely escaped detection. At the return in 1865-6 the position of the object was quite favorable for observation, yet the search of astronomers was again unsuccessful. In 1872 the body escaped detection both in Europe and America. One fragment was seen, however, at Madras, India, on the mornings of the 2d and 3d of December,—several weeks after its perihelion

passage. The comet's non-appearance in 1866 and its greatly diminished magnitude in 1872 leave no room to doubt its progressive dissolution. This subject will again be referred to in discussing the phenomena of meteoric showers.

(To be continued.)

Selected for "The Friend."

Letter of Robert Jordan, of North Carolina, dated 1736.

I am often cast down at the evidence of false ministry prevailing in many places, and am weary of contending in spirit against it, though not weary of suffering for the truth. It is a clear and uncontrovertible fact, that in proportion to the declension of religion, in the root and life, preaching increases, to the lessening the credit and authority of the ministry, and rendering it contemptible. I am confirmed in my judgment, and have been many years, that as the ministry was, and the sincere ministry yet is, instrumental to gather the churches, it is now proceeding apace to scatter them, and this through the working of the mystery of iniquity, with the heat and forwardness of man's spirit. To some, yea to many, that silence and passiveness of mind, so essential to the performance of these calm, meek and deliberate acts of worship, is as strange and irksome, as it is by their conduct rendered useless to the people. But though we cannot help seeing, we are told we must say nothing, all is revelation, all is perfect, and there is great peace. To put it out of all doubt, we are often told they are under a mighty sense of life and power, are under heavy burdens, and sore exercises; but whether they lay them on themselves or not, I shall not determine. These find it easier to do than to suffer, till the Master gives direction and makes way. Some measure their service by their noise, and would prove a divine gift by human art and extasy; and while they are full of peace and joy, the church mourns. Even prophesying is coming pretty much into practice, several instances of which have proved false and ridiculous. Some who preach up self-denial and mortification, can hardly bear contradiction, much less reproof, and though they preach up humility, they aspire to the chief seats and uppermost rooms.

I believe this ministry has a direct tendency to promote infidelity, by giving ground of suspicion, that the noble principle, the holy unction, the light and superadded grace that comes by Jesus Christ, is either uncertain or dangerous to follow. The nature of man is subject to extremes, being apt to step out of a state of superstition into that of unbelief. In short I may conclude by saying with John Fothergill, "that the distemper in the ministry, is the greatest in the church." R. J.

## Scientific Notes.

A gigantic fungus, known as the Bank of England fungus, was an object of much attention at a recent fungus exhibition of the English Royal Horticultural Society. This immense fungus was found on a plank of Baltic fir, supported by a joist of British oak, and it has been suggested that the growth of this and similar fungi is assisted, if not generated by an action between the two kinds of wood, similar to the galvanic effect produced by the opposition of two different metals.

As an instance of the effect of soil upon the color of flowers, it is mentioned that a plan of the *Lilium coridion* was transplanted into heath soil, when the flowers changed from sulphur yellow to red.

At a recent meeting of the French Association for the Advancement of Science in Lyons it was stated by Prof. Gerard, in an interesting lecture on the recent progress of chemical industries, that the production of beet sugar in France, had increased from three million kilogrammes in 1836 to four hundred and fifty millions, and that the beet furnished in addition more than 6,000 tons of potash per annum. Potash is also largely obtained from salt water. This branch of industry received, a few years ago, a severe and unexpected blow, on the discovery at Stassfurt, in Saxony, of enormous beds of native chloride of potassium, the appearance of which in the European market brought down the price in one day from 55 to 22 francs per 100 kilogrammes. The manufacturers who derived their supplies from the sea were not discouraged however but by changes and improvements in their processes, have continued to furnish a large supply of potash to European commerce.

One of the excursions of the association was to Solutrè, where there are many vestiges of what is supposed to be pre-historic man, but which is particularly characterized by an extraordinary accumulation of broken and calcined bones of horses. It is estimated that nearly 40,000 carcasses of horses have been gathered here.

Prof. Dyer, recently read a paper before the British association, on the changes in the vegetation of South Africa, caused by the introduction of merino sheep. He commenced by referring to the fact, that civilization and merino sheep had introduced one obnoxious weed, the *Aanthium spinosum*, into the sheeps walks of South Africa. Its fruit getting into the wool had seriously injured its value. The sheep, in connection with overstocking the farms in the inland districts of the Cape, were doing very serious injury by eating down the better and more agreeable plants, and giving room to poisonous and bitter ones. So great had been the increase of these, that it was now dangerous to have stock on many farms, which formerly were free from any injurious herbs. Long stretches of the colony abounded in plants which, when eaten by the oxen, caused their intoxication, to the serious hindrance of transport.

In a recent communication to the Vienna Academy, Prof. Czermak investigated some curious phenomena occurring among the lower animals. More especially, he examined one which has long been known, viz.; that if a shy hen be caught and held down to the ground for a little time, and if a chalk line be drawn on the ground from its beak, or in cross direction from its eyes, it will become quite still and helpless, and make no attempt to escape after the hands are removed. Keicher in the 17th century, attributed this effect to the influence of the chalk line on the hen's imagination. The essential point appears to be the arresting of the animal's attention by some object put before its eyes. The same effect may be obtained by holding a finger or glass ball, a candle, &c., before the space between the eyes. This paper contains many curious facts on the subject.

Recently a gardener in England was charged with murder before the criminal court, b

iving a fellow servant poisonous mushrooms to eat. Three persons were dangerously poisoned with them, and one actually died, yet here was no reason to suspect the poisoner of any intentional injury. The fungi so closely resembled edible mushrooms, that a killed witness saw nothing to distinguish them.

A correspondent of the English Mechanic, writing from India, and speaking of the rapid growth of vegetation in that warm and moist climate says, he has measured a growth of eight inches in the bamboo in twenty-four hours, and twelve inches in a creeper in the same time.

For "The Friend."

(Continued from page 98.)

3d mo. 6th, 1817. "At Hopewell Meeting, I was led to treat on the attendance of religious meetings. I commiserated the trials and difficulties of women, who are desirous to attend meetings, but whose husbands are too busy. Sometimes they have a young child added to all their difficulties, and must either stay away, or carry it along. It appears to me that such stand in need of encouragement. I would rather put up with some noise than discourage them. There are many women who have great difficulties to go through, and I wish they may be encouraged to press through. It may be, if such are faithful, that as the unbelieving husband is sanctified by the wife, the faithfulness of the wives may be blessed to the husbands, to their preservation and furtherance. After considerable encouragement to women, I sat down, but soon I turned to the men, and took the words I had made use of, in regard to men being too busy at sometimes, and so anxious to accumulate or amass wealth, that they could not spare time from that employ. But try, my brethren, and consider timely whether the excuse will do. On this I enlarged and it became a time of stirring up.

7th. At Sandy Spring, I said, Whereunto shall I liken the men of this generation. They are like children sitting in the market-place, and calling one to another, saying, we have piped to you and you have not danced, we have wept to you and ye have not lamented. Thus many treat the concerns of religion much in the same way, treat it like the amusements of children. I expressed much, and instruction was no doubt conveyed to quicken the attention of some. It was, I think, a good meeting.

8th. We attended Shubern Meeting, not large. Silence continued long. At length I said, Whatsoever ye hear in the ear, that publish on the house-tops. Sometimes that which is secretly conveyed, a secret instruction, may be published to others. I took occasion to open some of my own exercises in regard to worship, and, in describing this, many were tendered, and it became a very solemn time. I am induced to believe that it will be remembered by some, though it was humiliating to me. The comfortable sensations which remained on my mind afterward were very pleasant, and in secret I praised the High and Holy One, and blessed His adorable name.

9th. Attended New Garden Meeting. It was large, and attended with heavy, trying exercise. After perhaps more than half an hour's silence, I said, Have salt in yourselves. These expressions of the Divine Master have settled on my mind with impressive weight,

and I believe that such who have salt in themselves will not be looking out to others to supply them with that which they ought to have in themselves. It was dull, slow labor for a considerable time, but keeping to the labor and exercise, way opened to move on more quickly, and in the end Truth reigned. My mind was remarkably turned to the youth, of whom there were a large number present. On the whole I think it was a good meeting. The invitation to them was sweet, encouraging and living, and my soul breathed for their preservation, and I rejoiced in the accomplishment of the labor at that time.

12th. Attended New Garden Select Quarterly Meeting. It was as much favored as any I now remember to have attended, and I found it best for me to say that the present owning of calming quietude and love spread over and impressed on our minds was, I believed, designed to strengthen for future labor and attention to duty.

13th. Were at New Garden Quarterly Meeting held at Deep River. It was large, and I sat quiet till near the time to turn to the business, when I said a remark or two attends my mind. One is, the work if ever it is done must be done at home; that it is not necessary to come here to get others to do it for us. The next is, we may view that as being at a distance, which may be near, that is the most awful moment we shall ever experience, the close of time. A due attention is therefore necessary to be getting in readiness for that time. Near the close of the business Jeremiah Hubbard mentioned the prevailing scarcity of bread, wishing Friends to give heed to aiding the poor of every class among the people, and not to be partial, but to relieve wherever they could.

After the conclusion of the meeting," J. H. adds, "I felt very comfortable, and expected to go on the day following towards home, but coming near and passing by New Garden Meeting-house, and at times for days before, I felt my mind inclined to attend a meeting at this place on First-day next, which could not be without staying two days more. Feeling inclined to have an opportunity with the members of our Society alone, belonging to Hopewell Particular Meeting, I passed the night and wore the exercise secretly, only said to my companion when going to bed alone, I do not know but we shall have to be at New Garden next First-day. Next morning finding it to rest weightily on my mind, I let it be known to Friends, and they encouraged me to attend to my exercise.

The meeting at Hopewell on the 15th was trying in the forepart, but towards the close," J. H. says: "My mind rejoiced in feeling that the Truth reigned, the precious influence whereof spread, to the tendering of the minds of many. Oh, how good is the humbling, melting influence of Divine love. My soul rejoiced in secret, and I left this meeting with comfort.

16th, and First of the week. We again attended New Garden Meeting. It was large and a great number of comely youth were present. My mind was laden with concern. In the beginning, I acknowledged the great favor of improving in silence, and held out the idea that the enjoyment to be experienced in that improvement exceeded earthly enjoyments. That such as came feelingly to know it for themselves, would have a sense like the Queen of Sheba had, when she came from the utter-

most parts of the earth to hear the wisdom of Solomon; she said one-half had not been told her. I also expressed that my mind in the present journey had been clothed with a sense of mourning from day to day, and from week to week, on account of my fellow mortals, who, through unfaithfulness and inattention, had lived without this knowledge, and without giving attention to the momentous concern, and had suffered their minds to go after the delights and vanities of the world. These delights seemed to be all they possessed, and with them they seemed to be satisfied. In conclusion, the spirit of supplication breathed forth through me for the people to be divinely favored, both aged and youth as well as the middle-aged. Oh blessed be the great and adorable name of the Lord, who in mercy afforded strength and ability so far to accomplish the work for which I came, that I feel my mind peacefully calm, and I believe it has been to the satisfaction of well-disposed Friends and others, as far as I know.

After meeting we called to see a man who had his leg broken six months and more, and is still unable to walk and suffers much pain. We had a solid opportunity with him and family; then again to Benajah Hiatt's, and had an opportunity at parting with that dear family, whom I love, and who have rendered us acceptable service."

The next day J. H. left for home, and on the 20th attended South River Meeting. Of this he says, "there were in attendance not more than ten men and a less number of women, and here it may be noted that they have but this one meeting to make a Preparative, Monthly, and a Quarterly Meeting. In the course of the sitting, I stated that there is that which withholdeth more than is meet, and it tendeth to poverty. This I believe, though it might bear on the ministry, would also bear instruction to other classes of society, for each have a duty to perform, and if it is neglected it tends to poverty in these as well as in ministers. Secret neglect of duty, I am induced to believe, may tend to spread poverty over an assembly at times. The prophet expressed, How is the gold become dim, and the most fine gold changed; the precious sons of Zion, comparable to fine gold, how are they esteemed as earthen pitchers! What a caution, to show the effects of unfaithfulness!"

After this meeting, J. H. not feeling relieved, remained in the neighborhood till the next First-day, in the meantime visiting several families, in which but little opening presented for any religious service. In the meeting on First-day a degree of solemnity attended the vocal labor, but the discouraged preacher thought that what was said did not seem to take much hold of those present, and would probably soon slip away and be forgotten. He adds this ejaculation, "O that they may timely prepare for their latter end!"

They crossed the Blue Ridge at Rockfish Gap, and entered the valley of the Shenandoah, and after attending a few meetings in the settlements of Friends through which their road passed, J. H. reached home on the 9th of 4th mo, 1817, and found his wife and family well, and was favored with "a sense that the work was finished for which I had left my home."

(To be continued.)

Deliberate long of what thou canst do but once.

## A LOWLY LIFE-PSALM.

Selected.

"Whom have I in heaven but Thee? and there is none upon earth that I desire beside Thee."—Psalm lxxiii. 25.

All gone, all gone, for this life gone,  
My days of health and strength;  
Wearied and worthless, glad were I,  
To welcome home at length;  
And yet I'm happier far in truth  
Than e'er I was in buoyant youth;  
For, Jesus, Thou art more to me  
Than health and strength and youth could be.

All gone, all gone, for this life gone,  
Dear hopes most fondly nursed;  
They glittered long around my path,  
Till each bright bubble burst.  
I wept; but oh! the blest despair  
Has led me heaven's own joys to share;  
For, Jesus, Thou art more to me  
Than Hope's fond dreams fulfilled could be.

All gone, all gone, for this life gone,  
My soul's elastic spring;  
Of vigor stript, I shrink aside,  
A crushed and useless thing:  
Yet this is gain; for thus I prove  
Far more His patient, pitying love;  
And sweeter, safer this to me  
Than self-reliant strength could be.

And going fast, while most are gone,  
Loved friends of early days;  
The world grows stranger year by year  
I lose, but not replace.  
'Tis well! I'm cast the more on One;  
Stars scarce are missed while shines the Sun;  
And, Jesus, Thou art more to me  
Than loved and loving hearts could be.

Dear Lord, I thankful kiss the hand  
That gently stripped me bare,  
And laid me on Thy tender breast,  
To lose my sorrow there:  
'Twas anguish when earth's cup was spilled,  
But now with Thee 'tis overfilled;  
For, Jesus, Thou art more to me  
Than all earth's brimming cups could be.

What grace! to show a soul so vile  
Thy more than mother's care,  
And lead through wreck of earth's poor joys,  
Thy joys with Thee to share.  
What grace! That Thou to such hast given  
The foretaste now of feast in heaven;  
The foretaste even now, to me,  
More than a thousand worlds could be.

—The Witness.

## TIME.

Selected.

The lapse of time and rivers is the same;  
Both speed their journey with a restless stream;  
The silent pace with which they steal away,  
No wealth can bribe, no prayers persuade to stay;  
Alike irrevocable both when past,  
And a wide ocean swallows both at last.  
Though each resemble each in every part,  
A difference strikes at length the musing heart:  
Streams never flow in vain; where streams abound,  
How laughs the land, with various plenty crown'd,  
But time, that should enrich the nobler mind,  
Neglected, leaves a dreary waste behind.

Cowper.

*The Red River Raft.*—There is now a certain prospect that the great raft, which has been an obstruction in the Red river, in Louisiana, ever since the advent of white men in this country, will soon be removed, and that navigation will be opened for steamers from Shreveport, La., to Jefferson, Texas. The history of the raft and the attempts to remove it is exceedingly interesting. In 1805, the obstruction of logs reached one hundred miles. Since that time rafts have formed at various points in the river near Shreveport. One of these was removed by Captain Shreve in 1830, by the help of a Congressional appropriation, and another between 1840 and 1844, under a

government contract by Gen. Williamson. In 1854, the raft region extended only twelve miles, and at that time Captain Fuller, aided by a Congressional appropriation of \$150,000, attempted to remove it. At the end of two years, however, the appropriation had been exhausted and nothing accomplished, and the work being abandoned, the obstruction began to increase. The present raft region extends thirty-five miles, from a point forty miles above Shreveport to the Arkansas State line, and contained, before the present work commenced, nearly fifty rafts, from one-eighth of a mile to a mile in length, and occupying the entire width of the river, navigation only being accomplished through the bayous around the raft, but, as these were only available at very high water, navigation was insignificant. In 1871 the attention of the Engineering Department was again directed to this work, and an appropriation of \$10,000 having been made by Congress, the work of preliminary surveying was intrusted to Lieutenant Woodruff, who completed it in 1872, and submitted plans and specifications for the removal of the raft, whereupon an appropriation of \$150,000 was made. The plans were accepted, and Lieutenant Woodruff reached the raft region in January last with a snag-boat, two crane-boats and all the requisite machinery for his work. The following description shows the difficulties to be overcome:

Logs, roots and snags of every description had been crowded and jammed into a tangled mass, becoming more compact each year as the pressure from above increased. Annual freshets had brought down mud and deposited it in and over this mass until, in places, the raft itself had become entirely covered with earth, small islands, or "tow-heads," thus being formed. Upon these tow-heads were growing trees, usually willows, three feet and more in circumference.

In addition to the removal of logs by sawing and cutting, blasting-powder was used, but it did not prove of any use. Dynamite was then tried, but failed, refusing to explode even with an electrical exploder. At last nitro-glycerine was brought into use, and it never failed to do its work thoroughly. All that remains to be done now is the blowing out of some tow-heads and improving certain points in the channel, which will be accomplished in a few weeks. The obstruction of centuries will then have been removed by the skill and perseverance of Lieutenant Woodruff. The saddest part of the record of this great work is that Lieut. Woodruff has not lived to finish it, having died of yellow fever at Shreveport, October 1st.—*Late Paper.*

For "The Friend."

## Memoirs and Letters of Sarah Hillman.

(Continued from page 104.)

"1815. 5th mo. 22d. Attended our Monthly Meeting, which was large. In it the spring of the gospel was mercifully opened, and the streams thereof were spread among us to the refreshing of the weary traveller; so that well may we adopt the language, How beautiful upon the mountains are the feet of those that publish the glad tidings of peace and salvation. Many, I trust, were encouraged, as was I also, to put their trust in Israel's Shepherd, who is indeed as formerly to His dedicated children, strength in weakness, riches in poverty, and a present help in every needful time. I believe had I simply attended to the heaven-

ly Counsellor within, I should have been strengthened to utter a few words in our women's meeting, which would have yielded peace. But, O dearest Father, I would beg and implore thy mercy and forgiveness for this error, and hope, if consistent with thy Divine will, thou wilt open the eye of my mind to see and understand thy good pleasure concerning me! O Lord, be pleased to grant strength, that so I may not stumble nor fall. I believe it was not so much through disobedience, as a fear of not being bidden to put forth my hand to the ark, remembering the example of Uzza who incurred the Divine wrath by putting forth the hand without thy mandate. O! be pleased, dearest Father, to grant that thy visited children may be fed and sustained by thee; that they may not faint nor grow weary; but may run the race set before them with alacrity and cheerfulness of heart: counting (as did the apostle) all things but as dross that they may win Christ. So, O Father, mayest thou never want a man to sit on the throne of David; but mayest thou anoint judges as at the first, and counsellors as at the beginning, who shall run at thy bidding and publish thy name from sea to sea and from the rivers to the ends of the earth. Hereby many nations shall flow together saying, 'Come ye, and let us go up to the mountain of the Lord, to the house of the God of Jacob; and he will teach us of his ways, and we will walk in his paths,' &c. Then shall thy dear Son, the Lord Jesus Christ, be all in all to us; and we become encircled in Thy heavenly embraces, and enabled to join the general assembly and church of the first born whose names are written in heaven, and sing praises evermore to thee in thy holy habitation. Amen, saith my spirit.

7th mo. 20th. Many and various have been the exercises through which I have passed since my pen has moved in this way. Some of them have been occasioned by want of attention to that Teacher within, who, did we duly heed, would be as a lantern to our feet and a guide to our path. I have at times been favored to feel the descendings of Heavenly dew upon my heart, for which I desire ever to be thankful; being fully assured of the declaration, 'Without Me ye can do nothing.' Unless thou art pleased, dearest Father, to help us from thy sanctuary, it is vain for us to labor. Unless Thy light shine in our hearts, and diffuse itself there, we cannot but be in darkness. As the heath in the desert, we know not when good cometh. O then, that thou wouldest be pleased to illuminate our hearts, and teach us the way wherein we should walk! Let not the enemy of our souls have any power over us; but sanctify us to thyself a peculiar people, zealous of good works.

12th mo. 1st. I have, this day, displeased my beloved parent by giving way to passion, a destructive, baneful thing to the peace of individuals, and even to society at large. Condemnation seizes on the mind! This is of moment; but of how much greater importance is it when I reflect, that I have offended a greater and heavenly Parent, even He who has done so much for me, who has led me and fed me all my life long. My soul can but acknowledge that He has dealt bountifully with me; not according to my deserts, but according to his great mercies. May I be more watchful hereafter, and if it should be consistent with thy blessed will, dearest Father,

forgive the sins of thy servant, and to enable me to move forward in that way which thou knowest, I hope I shall stand firm. How art able to make thy children strong when the grand adversary, who is going about to destroy, presents his baits. Under whatever garb he appears, strengthen me to say, 'Let thee behind me, Satan, for thou savorest not the things that be of God,' &c. Then will thy peace flow as a river. Then will joy fill thy heart. O! that this may at every future season be my experience, that so my conduct may not bring reproach on thee, O Lord, nor on the gospel which thou camest to introduce.

1816. 5th mo. 2d. My mind is, I fear, too much engrossed with the things of time, too much enveloped in the concerns of this fading world, to make that progress which would be pleasing to the great I Am, who has been calling and inviting me to come to Him and partake freely of the bounties of his table. He is at seasons condescended to pour forth of His spiritual blessings so that my cup has run over. But I have been drawn aside to partake again of the trifling amusements of this world, which are indeed vanity; and have thus brought myself into distress and suffering; in which state of abasement, O! that I may be enabled to adopt the language, Let not thine hand spare, nor thine eye pity, till thou hast made of me what thou wouldst have me to be.

12th mo. 11th. My soul, thou hast been favored at seasons with the descendings of Heavenly dew; thou hast felt the operations of Divine love upon thee; but what dost thou know of the religion? What progress hast thou made toward the New Jerusalem? What hast thou done to the honor of God? Nothing in comparison to His goodness and to His unmerited mercy, in that He has been pleased to visit and invite thee to his banqueting house where His banner over thee has indeed been love. But thou hast revolted again and again when He has been pleased to make known His will concerning thee, and presentations have been made to thy mind of crosses—for the Divine will is contrary to our corrupt nature, therefore leads to crosses—how hast thou shrunk back from partaking of the cup! But grant, O dearest Father, that my will may be slain by the sword of thy Spirit, that so in all things I may say, 'Not my will but thine, O Lord, be done.' Make me to go down to the potter's house, and become passive in Thy hand, O Lord, that so thou mayest make of me, and deal with me as seems good unto thee. For thou art worthy to have the dominion; and unless this passive state is attained unto, *thou canst not reign* in us. Dearest Father, suffer not the enemy to triumph over me; but be pleased to grant that I may never be plucked out of thy holy hand. Let my soul ever praise thee in heights and in depths, in sickness or in health, in the dark winter season, as in the sunshine of the sabbath day."

Very noticeable is the fact that dear Sarah Hillman's life at this period was much one of prayer. This seems to have been her strong hold, as a prisoner of hope, when disappointments came, or when conflicts and crosses, or even a wounded spirit—which was not unfrequently the case—fell to her lot. This, which has been the consolation and refuge of the righteous in every age, was now her hope and refuge. And He, who is a God hearing prayer, did not let her plead in vain. Spiritual growth follows spiritual prayer—that which is of the

Saviour's begetting or which He prompts to. For when grace teaches the heart, then the heart maketh wise the lips. While the formal, or head-taught offering is but a lifeless thing, this, like the earnest, humble pleading of the poor publican is a thing of life; being recognized by Him who seeth in secret, and in whose ear the most hidden, heart-felt sighs and cries and groans are as audible as the most manifest offering. That which called forth these repeated, childlike intercessions from S. H. was the deep feeling of want, of weakness, of helplessness, and that without Christ, the Head, she could do nothing. They are the cries of the child to its fond, loving Parent. The pleadings of penury in the ears of Sovereign mercy; who hath said, "Call upon me in the day of trouble, and I will deliver thee, and thou shalt glorify me."

It is said that the Lord seldom gives His people much of a victory over the enemies of their own houses, until he has let them feel how potent and deep seated these enemies are; and that in Him alone is the strength of salvation. This makes Sarah Hillman cry out, Grant, dearest Father, that all that Thy righteous controversy is with may be slain by the sword of thy Spirit. Suffer not the enemy to triumph over me; and also that I may never be plucked out of thy holy hand. It is when, through the insinuations of the light of Christ, we are brought to a sense of our estrangement from the Father by sin—brought to a sense of our impotency, and to feel the plague of our own hearts, that we effectually apply to the Physician of value for that balm, which, to the contrite, the passive and self-abased is ever forthcoming for, is adequate to, and mighty to heal all the wounds from which, as fallen and lost creatures, we suffer: for with the Lord is mercy and plenteous redemption. And while the Captain of salvation ever leads those that follow Him first into the wilderness, or a separation from the spirit, manners and maxims of this world, and into "a land not sown," yet, in his own good time, He will give these vineyards from thence, and cause to sing unto Him songs of praise and thanksgiving on the peaceful shores of resignation, rest, and ultimate deliverance.

(To be continued.)

For "The Friend."

#### On the Parallax and Distance of the Sun.

It has been a matter of great importance to astronomers to ascertain, not only the exact form and dimensions of our globe, but also its true distance from the centre of our system. By patient research and laborious measurement of arcs of meridians in different parts of the world, both the true figure of the earth and its absolute size have been satisfactorily ascertained. An inaccurate estimate of the earth's diameter, caused Newton to drop for a time his theory of Universal Gravitation; but some sixteen years afterwards, viz. in 1682, having heard the results of Picard's celebrated measurement of the meridional arc between Paris and Amiens, which had been completed several years before, Newton, with the more accurate knowledge thus furnished him of the earth's diameter, and consequently of the size of the lunar orbit, computed again the effect of the earth's attraction at the distance of the moon, and found, to his inexpressible delight, that it completely confirmed his theory.

The distance of the earth from the sun, is

the great natural unit that is employed in expressing the distances of the other planets from the centre of our system, the standard yard measure, as it has been aptly called, not only of the solar system, but also of the immense universe of suns that stretches in every direction around us. Although the *relative* distances of the planets from the sun have been pretty accurately known since the time of Kepler, the absolute distance (in miles) of any one of them, remained for a long time a matter of great uncertainty. It was not, indeed, until about a century ago, that any reliable approximation was made to the true distance of the sun from the earth. In the early days of astronomy, the form and position of the planetary orbits were unknown: the sun, the moon, the planets, and the fixed stars, were all crowded round the earth at distances of which no conception was formed; and their apparent motions in the heavens were completely misunderstood. One of the Greek philosophers (we do not remember who it was), when inquired of as to the size of the sun, answered: that it was just as large as it appeared to be! Anaximander (born about 610 B. C.), the friend and disciple of Thales, ventured the conjecture that it was not less than the earth. But Anaxagoras, although he lived a hundred years later, was more moderate in his opinions. His theory was, that the sun was a burning plate or globe larger than the Peloponnesus; an idea which, so far as the *size* of the great luminary is concerned, has been *more* than confirmed by modern investigations. Aristarchus, of Samos, who lived about 300 years before the Christian era, was probably the first who made any attempt, on correct principles, to calculate the relative distances of the sun and moon. This he did by observing the angular distance of these luminaries from each other at the time when the moon is dichotomized, that is, when exactly one half of its *earthward* hemisphere is illuminated by the sun. By this method, which is correct enough in principle, although it is not available because of the impossibility of obtaining the angle with sufficient accuracy, Aristarchus calculated that the sun must be eighteen or twenty times as far off as the moon. Eratosthenes, who was nearly cotemporary with Aristarchus, is said to have made a much larger estimate of the sun's distance, and he conjectured that the diameter of the sun was twenty-seven times as great as that of the earth. Hipparchus, whom Playfair calls "the greatest astronomer of antiquity, and one of the inventors in science most justly entitled to admiration," by measuring the breadth of the earth's shadow at the time of a lunar eclipse, computed the sun's distance to be about 1300 times the earth's radius. He flourished about 150 B. C. Nearly three centuries later, Ptolemy, who got many of his ideas from Hipparchus, adopted a similar method, and estimated the sun's distance equal to 1210 times the semi-diameter of the earth. It is observable that the results obtained by Aristarchus, Hipparchus and Ptolemy, were remarkably similar; and yet they were scarcely more than one-twentieth of the true measure.

For more than fourteen centuries after the time of Ptolemy, little or no progress was made towards a more correct estimate of the sun's distance. But towards the close of the sixteenth century, the great observer Tycho Brahe, who has been called "the restorer of

astronomy," and his young friend Kepler, the laborious and ingenious calculator, appeared on the field of action; and early in the next century, viz., in 1609, Galileo invented the telescope. The estimates of the sun's distance by Hipparchus and Ptolemy, made his "horizontal parallax" nearly three minutes of a degree. By the "horizontal parallax" of the sun, is meant the angle contained between two lines drawn from some point in the sun, say from his centre, to the earth, one of them passing through the earth's centre, the other just grazing its surface. It is therefore equivalent to the apparent semi-diameter of the earth as seen from the sun; for at the earth the two lines are separated from each other by a distance equal to the earth's radius. Kepler, from data furnished chiefly by the observations of Tycho, reduced this horizontal parallax of the sun to one minute, indicating a distance of about thirteen and a half millions of miles. The distinguished Halley, the friend and cotemporary of Newton, made the parallax twenty-five seconds, and Newton himself assumed it at twenty seconds, although he was aware that Horrocks and Flamsteed had estimated it as low as twelve seconds. It is a fact of some interest, that the author of the *Principia*, in the first edition of that celebrated work (published in 1687), made his calculations respecting the force of the sun's attraction, on the supposition that the centre of our system was but forty-one millions of miles from us; and in consequence of this error in his data, he made the quantity of matter in the sun about one-thirteenth of the true quantity. During the next forty years, more accurate observations had shown that the sun's parallax had previously been over-estimated, and consequently his distance correspondingly under-estimated; and therefore in the third edition of the *Principia*, published in 1726, the solar parallax is taken at  $10\frac{1}{2}$  seconds, making the sun's mass—that is, his weight or quantity of matter—169,282 times that of the earth, instead of only 28,700 times as in the first edition, this quantity being affected in the proportion of the cube of the number that is assumed as the sun's true distance in making the calculation. We may add that a parallax of  $10\frac{1}{2}$  seconds indicates a distance of about 78 million of miles.

It is observable, that in all the later and more successful attempts above referred to, to obtain the sun's true distance, it has been his *horizontal parallax* that astronomers have endeavored to measure. It will therefore, we think, be worth while to detain the reader a few minutes, while we endeavor to explain to him more fully what is meant by this term. In general terms then, the parallax of a body—whether it be the sun, the moon, a planet, or a meteor flying through the upper regions of our atmosphere,—is the *difference* in the absolute *direction* of the said body, as seen by two observers situated in different parts of the earth. For example, if an observer at Newport, R. I., at a time when the moon is on his meridian, should find by careful measurement, that the centre of its disk is just five degrees south of a certain star; then an observer at Arica,—a small town of Peru, on the tongue of land that extends along the coast between Bolivia and the sea—would at the same time see the moon only about four degrees south of the same star. As the star has no sensible parallax, this difference of one degree in the moon's apparent position is its

*parallax* with reference to the two places on the earth's surface that we have named. We have selected these because, while they are nearly on the same meridian, they are about sixty degrees of latitude apart, and hence the straight line or chord drawn *through the earth*, not on its surface, from one place to the other must be nearly equal to the earth's radius. If therefore one degree is the moon's parallax with reference to these two places, it is also very nearly the moon's "*horizontal parallax*." Owing to the elliptical form of the moon's orbit, her horizontal parallax is sometimes less than a degree, and sometimes a little more than a degree, being when least  $53' 52''$  and when greatest  $61' 32''$ , or  $1^\circ 1' 32''$ . The reader must not confound the comparative position of a heavenly body with reference to the fixed stars with its position relative to the *horizon* of the observer. They are totally different. The former is affected by parallax, the latter by the curvature of the earth. The change in the former as we move from place to place is small; but the latter may be affected to the extent of 180 degrees: and it was the variation in the latter that proved, even to the early astronomers, that the earth is round. Thus, in the illustration given above, if by the Newport observer, the moon was seen just 40 degrees *south* of his zenith, the spectator at Arica (omitting the effect of refraction) would see it 21 degrees *north* of his zenith. If it were not for the *parallax*, he would see it just 20 degrees north of the zenith, but the parallax throws it *one degree farther north*. We have used the moon instead of the sun in this illustration, because the parallax of the latter is too inconsiderable for our purpose, being but eight or nine seconds.

As has already been stated with respect to the sun, so with the moon its horizontal parallax is equivalent to the apparent semi-diameter of the earth as seen from the moon. The apparent diameter of our earth, therefore, to a spectator on the moon would be about two degrees, varying from  $1^\circ 47' 44''$  to  $2^\circ 3' 4''$ . But let us say a few words to elucidate these technical terms, "apparent semi-diameter," and "apparent diameter." They mean respectively the *angular measurement* of the half diameter and the whole diameter of the body that may be spoken of. Thus calling to our aid again our near and interesting neighbor, the moon; when she is at her mean distance from us, her apparent diameter is  $31' 26''$  varying in different parts of her elliptical orbit from  $29' 3''$  to  $33' 31''$ . Now, if at the time of full moon we were to conceive an arc—a quarter of a circle—drawn on the apparent concave of the sky from the zenith of the observer, through the moon to the horizon, the said arc or quadrant would contain 90 degrees; and if we had an instrument suited to the purpose, we would find that the moon's round disc would cover about one one-hundred and eightieth part of the said arc: but the one one-hundred and eightieth part of 90 degrees is just half of one degree: therefore we would conclude, that the moon's angular breadth as seen from the earth, in other words her "apparent diameter," was at the time of the observation about half a degree, or 30 minutes. This, therefore, is what is meant when we say that the moon's apparent diameter is 30 minutes, or that its apparent semi-diameter is 15 minutes.

The difficulty of ascertaining the sun's parallax by any direct method, will be in some

measure understood and appreciated when it is stated, that even if two stations suitable for the purpose could be selected on the earth's surface as much as a *whole* diameter apart, the undertaking would be equivalent to an attempt to measure the difference in the *moon's* position among the stars when she is viewed from two places on our globe only *twenty* miles apart; nay, the former undertaking would be far more laborious in its execution, and more uncertain in its results, than the latter, owing to the greater difficulty of ascertaining with sufficient accuracy the length of the *base line* which, in the one case, would be nearly eight thousand miles, while in the other, it would be but twenty miles.

But, inasmuch as the *relative* distances of the earth and other planets from the sun are accurately known—having been deduced both by direct observations and from their periodic times by means of Kepler's Third Law—if we can seize on any *one* of the planets at a time when it is much *nearer* to us than the sun, we can measure its parallax, and thence by a simple proportion obtain the sun's parallax. Jupiter and the three planets beyond him, never come as near to us as the sun; Mars, Venus and Mercury, are at times considerably nearer than that luminary; but in the case of Mercury the difference is not sufficient to make it worth while for astronomers to pay much attention to him on this behalf. Mars, when in opposition, is usually about twice as near to us as the sun; and is to that extent more favorably situated for obtaining his parallax. Hence he has been made use of for this purpose. But when, at the time of opposition, he happens to be also in or near his perihelion, then his distance from us is only 37 one-hundredths of the sun's mean distance, and he is, therefore, nearly three times more favorably situated for the determination of his parallax than the sun ordinarily is, (we may say, than the sun ever is. Such a favorable coincidence happened in 1751; Mars at the time of opposition that year being very near to the perihelion point of his orbit. Accordingly two astronomers, by previous arrangement, made the requisite observations; they were, of course, posted at distant stations; Wargentin was at Stockholm, and Lacaille, at the Cape of Good Hope; both places being nearly on the same meridian, but having a difference of latitude of  $93^\circ 18'$ , at therefore 5,764 miles apart, as measured by *straight* line or chord drawn from one place to the other *through* the earth. The resulting horizontal parallax of Mars at the time of the observations was  $24\frac{1}{2}$  seconds. To obtain from this the sun's mean parallax, we say, As 1 (the mean distance of the sun) is to 37 (the relative distance of Mars at the time), so is 2 seconds the parallax of Mars at the time, to seconds, the mean horizontal parallax of the sun; a result remarkably near the correct value.

But *Venus* is the most favorably situated of the planets, for the determination of parallax. When in inferior conjunction with the sun she is only about *two-sevenths* as distant from that body; and if she happens at the same time to be so near her node as to pass direct between us and the sun, appearing as a dark spot crossing the sun's disk—a coincidence which occurs at alternate intervals of 8 at about 113 years\*—she offers the astronomer

\* More accurately, the intervals are  $105\frac{1}{2}$ , 8,  $121\frac{1}{2}$ ,  $105\frac{1}{2}$ , 8,  $121\frac{1}{2}$ , 8; &c.

an excellent opportunity of ascertaining first, or relative parallax as referred to the sun, and hence the absolute parallax of each.

We have been led to make the foregoing statement of some of the more interesting and important points of our subject, as an introduction to an article on *The Approaching Transit of Venus*, which it is proposed to transfer to "The Friend," with some modifications, from one of the foreign journals; but that which was meant to be a brief preface, has become so unexpectedly extended, that the article itself must be deferred to the next number. LLN.

Better is a little with the fear of the Lord, than a great treasure, and trouble therewith.

## THE FRIEND.

ELEVENTH MONTH 22, 1873.

From the accounts received from various parts of the country, of the circumstances attending meetings held under the sanction of recent Yearly Meetings, and conducted by persons appointed for the purpose, it becomes more and more evident that the members continue to diverge more widely and distinctly their views respecting the important subject of Divine worship, and as to what may be permitted or encouraged to take place under profession of worship, among those who assemble under the name of Friends. This is one of the anticipated results of the existing difference in religious faith that has been for many years dividing the Society; and we apprehend will go on manifesting its fruits, until the "strange fire" which it has kindled has burnt out or been extinguished.

A correspondent speaking of the "General Meeting" held at Richmond, Indiana, in the first part of this month, under the care and oversight of a committee of Indiana Yearly Meeting, says, "It exceeds any thing ever known among Friends, having taken the shape of a genuine Methodist 'love feast,' or revival. Old, steady Friends have joined in and attended regularly, and singing, preaching, praying, shouting and groaning are part of the adjuncts. \* \* \* Nearly all the prominent Friends [including the Clerk of the Yearly Meeting] are actors in these scenes of humiliation. There are forms for mourners, &c., and a great deal of hymn singing, &c., is indulged in. The meetings in the mornings sometimes last from 10 o'clock to 2 and 3 o'clock, P. M., and those in the evening from 7½ o'clock to 1 o'clock."

In looking over the Society we are sorrowfully impressed with the fact that there are comparatively few left who are willing to stand firmly and suffer patiently for the original doctrines and testimonies of Friends. This pseudo religious excitement is so epidemic in its character, and so readily propagated from one to another, and there is what such a disposition to palliate, and under a false notion of charity, to gloss over and find excuses for these aberrations from the principles and practices of Friends, that not a few who confess they see that the whole thing is an error, yet flinch from declaring or acting decidedly against its different developments, whether they be in such acts and scenes as

above mentioned, or in the preaching and praying which lead into and stimulate them. But we would ask, is not the time at hand, or has it not come, when the members will have to take an open stand on one side or the other; for as Wm. Penn justly says, "where principles are at stake, a neutral is either a hypocrite or a coward." It is certain that what are now called "old fashioned" Friends, cannot unite with such proceedings as are being weekly enacted in some parts of the Society; nor can they rightly consent to be implicated in the stumbling charge made by other religious Societies, that Friends have found it necessary to modify their principles.

It is not necessary to call in question the convictions or the sincerity of those who think it right to adopt the views recently and widely spread among the members, or to engage in these newly introduced exercises and modes of worship: in these respects to their own Master they must stand or fall. But how they can reconcile claiming to be Friends, while pursuing the course they are, with their loud professions of "consecration" and "holiness," we cannot understand. The Hicksites did and still do the same thing, and though theirs was the grievous error of denying the divinity of Jesus Christ, and the efficacy of the atonement made by his sacrifice on Calvary; while the present troublers of the church preach up a literal belief in both, as all sufficient for immediate salvation; yet the latter, like the former, is repugnant to the principles held by Friends, and those who adhere to these well known principles cannot have fellowship with either.

That it is a time of shaking, of trial and perplexity, especially to the younger members in the Society, no one can doubt, and when so many older ones, who ought to know better, are led away by the "splendidly delusive spirit that has gone out into the camp," we may not wonder that many of them are captivated by it.

It may not be unprofitable to revive at the present time the following extracts from the manuscript in the hand writing of that exemplary and devoted minister of Christ, William Jackson, late of Chester county, and found among his papers after his death. He states it was secretly but intelligibly communicated to him by the Head of the church, while sitting in meeting in the 9th month of 1769, and pondering on the state of the Society and its future condition. That the "perilous times" of which he was forewarned, included the revolutionary war and the Hicksite heresy, we doubt not; but we have no more doubt that they also referred to the present period of "treading down and perplexity."

"Your fathers purchased the Truth through many hardships and grievous sufferings outwardly; and it was precious in their eyes; the testimonies thereof preferred to all other considerations, or outward enjoyments. And is it a light thing, O ye backsliding children, to trample on my testimonies, and to disregard my precepts which I committed unto them. Or is it a time for you, ye that dwell at ease in sealed houses, or in the pursuit and enjoyment of outward possessions, and my house, wherein your fathers worshipped me in the beauty of holiness, lying waste, and the advancement of my cause of Truth neglected? My truth shall yet be precious to a scattered remnant amongst you, whom I have chosen here and there; and am choosing, trying, and

preparing in the furnace of affliction, as it were, one of a city, and two of a tribe, who shall bear my name, and show forth my praise in the midst of this crooked and rebellious generation, who are stiff necked and hard-hearted. Though I have visited them repeatedly with message after message, line upon line, and precept upon precept, through my servants whom I have constrained and sent among them, for many years back, yet they will not hearken to my voice, nor lend an ear to my words through my messengers, nor to the immediate instructions and reproofs of my Spirit, which testified the same things within them, bearing witness to the truth of my message outwardly communicated. Notwithstanding I have thus invited and called to them in compassion repeatedly, to return to my fear, and have given them space of time to repent, yet they have chosen their own ways, and still follow after their own pursuits, which are full of snares and dangers (though they see it not; ) therefore, snares and dangers shall begin to overtake, and surprise or surround them, whereby many shall be brought into confusion, and fearfulness shall greatly surprise them when no succor is near for their relief; and my servants, my chosen few, shall find it to be their duty more and more to withdraw in spirit from the fellowship of those who inhabit the outward court; and who, instead of worshipping me according to their pretensions, have either neglected assembling in a suitable zeal for that purpose, or when assembled, have used hypocrisy, and even dissembled in my presence to the stumbling of weak inquirers. My servants shall be more and more withdrawn into the inner court, where I will feed, nourish and protect them from all the snares and dangers that shall greatly afflict their formal professing brethren. And I will yet be sanctified in the sight of those who have disregarded my precepts; being relapsed from my fear into ease and forgetfulness, have cast my covenant behind their backs, even slighting the means which I have promoted through the channel of my faithful servants, for reforming, searching, and cleansing my church.

"And notwithstanding the perilous times that are coming, let my little ones, my faithful remnant, be comforted; the ease with them shall not always be so afflicting and painful, as it appears to be now. I have a great work begun, which shall be carried on, notwithstanding all opposition. I will utterly remove the false balance that has prevailed, and I will demolish the bag of deceitful weights, where-with some have been weighing themselves and their services, being deceived thereby, and in the pride of their hearts have kicked against my Word, and rejected my dispensation as a vain thing, although I intended them for their instruction and profit.

"Yea, the lofty looks of man shall be humbled, and the haughtiness of my people shall be bowed down; and my name and truth alone shall be exalted; saith the Lord. I will search Jerusalem as with candles, yea, I will break the strong holds of all such who have made lies their refuge; and I will punish the members of the church who are settled upon their lees: and some of this generation shall be mighty instruments in mine hand to bring my great work forward; I will wonderfully dignify them with strength, wisdom and courage in my services; so that nothing of hypocrisy or dissimulation shall be able to stand before

them; for I will be their Captain, and they shall follow my direction; acting in my counsel; though their steps and proceedings may, in many instances or respects, seem strange to those whose eyes are not clearly opened to perceive my dispensations; yet they shall prosper and prevail, to the exaltation of my glory; saith the Lord!"

#### SUMMARY OF EVENTS.

**FOREIGN.**—The report of the prolongation committee was read in the French Assembly the 15th inst. It commences by showing the difficulties of prolonging MacMahon's powers with the present organic laws. To do so, it says, would result in a more or less disguised dictatorship under the title of President of the Republic. France wants a settled government, but it is impossible to grant MacMahon more than five years power. The report also proposes to so constitute the Republic that France may not become the prey of revolutions, and recommends the appointment of a committee of thirty to consider constitutional bills. It concludes by appealing to the Conservatives to help found the Republic, now that the schemes of the Monarchists have failed, otherwise a dissolution of the Assembly is inevitable.

In the election for members of the Assembly on the 16th inst., the Republicans carried the Department of the Aube.

Three thousand Communists are still in prison awaiting trial.

The trial of Colonel Stoffel, at Versailles, for using language while giving his testimony in the Bazaine trial, disrespectful to the public prosecutors, resulted in his being sentenced to three months imprisonment and the payment of costs.

Abdel Kader, the Arab chieftain, who so long resisted the French in Algeria, died in Paris the 11th inst.

The produce of the direct and indirect taxes in France, for the first nine months of the present year, is published in the *Journal officiel*. The former brought in 485,000,000, being 38,500,000 more than the sum calculated on for that period. The indirect taxes show a deficit for the same time. The estimate in the budget was 1,303,000,000, whereas the receipt is only 1,297,000,000, being a difference of 6,000,000. President MacMahon sent a message to the Assembly on the 17th inst., in which he asks that the powers of the present Executive may be prolonged for seven years; he requests also that there be no postponement of the action prolonging his powers until after the constitutional bills are voted. If his term is prolonged, he will use the powers granted in the defence of conservative ideas, which he is convinced are those of the majority of the nation.

In the Bazaine court martial, Blondin, director of the Bank of Metz during the siege, testified that General Coffinieres urged him to conceal a quantity of gold on the 20th of 8th mo., saying the Prussians would enter the city in a few days. The trial is not apparently near its close.

The German government has addressed a remonstrance to France on account of the pastoral issued by the Bishop of Nancy, ordering prayers for the recovery of Metz and Strasburg.

As soon as intelligence of the capture of the *Virginus* reached Madrid, the U. S. Minister made a proper representation of the case to the Spanish government, and in consequence the Cuban authorities were requested by the Minister of Foreign affairs to stay further proceedings until the matter could be fully and calmly investigated. The orders of the home government were, however, totally disregarded, and after executing the rebel generals, many other persons found on the vessel were put to death. The captain and thirty-six of the crew were executed at Santiago de Cuba on the 7th inst., and on the next day twelve more of the Cuban volunteers were shot. A Havana dispatch of the 14th says, the trials of all the prisoners taken on the *Virginus* are concluded, and out of the whole number only eighteen will be saved from death. Some of these will be condemned to the chain gang, and four or five set at liberty. The U. S. Minister at Madrid has been instructed from Washington, to enter with the Spanish government a strong protest against the proceedings at Santiago, characterizing them as an outrage on civilization and humanity, and an insult to the American government.

Cartagena is still held by the insurgents. It is reported that another battle has taken place between the Carlists and the Republicans, again resulting in a victory for the former. The Republicans are said to have

lost 1300 men, and the Carlists 200. A Bayonne dispatch says that Don Carlos has struck a medal in commemoration of the recent victory over the Republican forces.

The Italian Parliament was opened in Rome, by the king, on the 15th inst. In his speech the king said he hoped for a continuance of the work of internal organization; that thus Italy might increase her prosperity amid order and safety—the two indispensable conditions of industry and progress. The relations with all foreign powers are friendly. Since the causes of war between Austria and Italy have disappeared, there remains nothing but the confidence of mutual interests and wise friendship. Testimonials of affection for Italy have been addressed by the emperors and peoples of both Austria and Germany. In reference to the Pope he said, "We will respect his religious sentiments and his liberty, but will not permit attacks upon the nation and its institutions."

The first budget ever published in Egypt has just been issued by authority of the Khedive. It gives details of the estimated revenue and expenditure for the twelve months from the 10th of 9th month, 1873, to the 10th of 9th month, 1874, and shows revenue equal to £10,166,000, and expenditure equal to £9,046,000, leaving a surplus of £1,120,000.

Advices from Rio Janeiro to the 23d ult., have been received in Lisbon. The small pox prevails in Rio to an alarming extent. The revolution in Paraguay has been suppressed.

The German Federal Council has ordered the distribution among the States of the Empire of another instalment of the French war indemnity, amounting to three millions of dollars.

On the 14th inst. the German government made a further investment of \$3,000,000 in U. States funded loan.

The plan of constructing a railway in connection with the Ashantee expedition, has been given up as impracticable, and the shipment of rails from England has been discontinued.

The Dean of Westminster has been appointed to proceed to St. Petersburg to perform the Protestant marriage of the Duke of Edinburgh with the Grand Duchess Marie, of Russia.

Intelligence has been received in London that famine prevails in Greenland, caused by the failure of the fisheries. In one village alone 150 persons had starved to death.

The committee of the London Stock Exchange have adopted a resolution that four British shillings per dollar shall be the rate of exchange after the 3d proximo. Under the present improved methods of refining, the gold contained in the worn silver coin withdrawn from circulation in Great Britain can be extracted in sufficient quantity to render the operation profitable. Thus, in 1872, crowns and half crowns weighing 117,048 ounces were subjected to refining, and 81.27 ounces of gold were recovered.

The Foreign Office has instructed the British Minister at Madrid, the consuls at Havana and Santiago, and the Governor of Jamaica, that the English government reserves its decision on the question of the executions which have already taken place at Santiago, but will hold the Spanish government, and all concerned, responsible for any additional executions of British subjects.

London, 11th mo. 17th.—Consols, 92½. U. S. sixes, 1865, 93½; five per cents, 91.

Liverpool.—Cotton to arrive is 1-16d. cheaper. Sales of uplands shipped in the 10th and 11th months, 8½d.; low middlings deliverable in the 12th month, 8¼d.

A dispatch from Aden says: "An encounter took place recently in the district of El Ahsa, between bodies of Arabs and Turks, in which three hundred of the former and seventy of the latter were killed and wounded. It is probable that in consequence of this occurrence the British force at Aden will interfere, and prevent encroachments by the Turks upon the territory of the surrounding tribes."

Much adulterated tea is now shipped from China. In London there was recently 10,000,000 pounds in bond, which had been condemned as unfit for consumption, and notices have been given to merchants in China that all spurious teas will henceforth be destroyed.

The new Vienna water-works were opened on the 24th ultimo in the presence of the Emperor, the Archdukes and various high officials. The water comes from the Alps, a distance of fifty-four miles, by means of tunnels and aqueducts. The cost of the works has been about \$10,000,000, and they have been finished in three years and a half.

UNITED STATES.—The interments in Philadelphia last week numbered 255. There were 41 of consump-

tion, 11 disease of the heart, 12 inflammation of the lungs, and 12 old age.

In New York there were 525 deaths last week. Nine hundred and forty thousand operatives are employed in the production of iron in the United States; 42,000 of these are employed in preparing ore and fuel; 25,000 in preparing fuel for rolling mills; 42,000 in the rolling mills; 23,500 in blast furnaces, and 3500 bloomeries; 800,000 are engaged in manufacturing articles of iron. The value of pig iron manufactured last year was \$75,000,000. The product of the rolling mill and forges was \$63,000,000, and the entire value of manufactured iron for the year was \$900,000,000.

*The Markets, &c.*—The following were the quotations on the 17th inst. *New York*.—American gold, 106 U. S. sixes, 1881, 114¼; ditto, 1865, 109¾; new five per cents, 109. Superfine flour, \$5.20 a \$5.70; Standard, \$5.90 a \$6.45; finer brands, \$6.50 a \$10.25. *Wholesale*.—Canada wheat, \$1.65; red western, \$1.49; No. 2 Chicago spring, \$1.35 a \$1.36. State barley, \$1.50. Oats, 52 55 cts. Yellow corn, 66 cts.; western white, 75 c. *Philadelphia*.—Cotton, 15½ a 16 cts. for uplands at New Orleans. Crude petroleum, 10¼ cts.; standard white, 14½ cts. Superfine flour, \$4 a \$4.75; extra, \$5.50; finer brands, \$6 a \$10. White wheat, \$1.62 a \$1.78; amber, \$1.55 a \$1.64; red, \$1.45 a \$1.55. Rye, 76 a 80 cts. Yellow corn, 64 a 65 cts. Oats, 46 a cts. Smoked hams, 11 a 13 cts. Lard, 7½ a 7½ c. Clover seed, 6 a 7½ cts. Beef cattle were in better demand, and prices were higher. About 2300 arrived at Philadelphia, sold at 6½ a 7 cts. per lb. gross for extra; 5 a 6 cts. fair to good, and 3 a 4 cts. per lb. gross for common. Sheep sold at 4½ a 5½ cts. per lb. gross. Receipts, 100 head. Corn fed hogs, \$6 a \$6.50 per 100 lb. net. Sales of 5,500 head. *Chicago*.—No. 1 spring wheat, \$1.60; No. 2 do., \$1.03; No. 3 do., 95 cts. No. 2 mixed corn, 39 cts. No. 2 oats, 30 cts. Rye, 62 cts. Barley, \$1.25 a \$1.33. Lard, 7½ cts. *Baltimore*.—Choice white wheat, \$1.65; choice amber, \$1.70; red, \$1.40 a \$1.60. White corn, 70 cts.; yellow, 63 cts. Oats, 45 a 50 cts. *Louis*.—No. 2 winter red wheat, \$1.52; No. 3 do., \$1.35 a \$1.27; No. 2 spring, 95 cts. No. 2 mixed corn, 40 cts. Oats, 35 a 36 cts. *Cincinnati*.—Family flour, \$6 a \$6.55. Wheat, \$1.31. New corn, 43 cts. Rye, 50 cts. Oats, 33 a 42 cts. Lard, 7 a 7½ cts.

#### FOR RENT

To a Friend, the small dwelling on the meeting-house property, West Philadelphia. An oversight of the property will be accepted as part of the rent. Apply to John Callen, Forrest Building, 119 S. Fourth St. Henry Harris, 512 Walnut St.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office, Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia.

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philadelphia.

#### FRIENDS' BOARDING SCHOOL FOR INDIVIDUAL CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philadelphia.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philadelphia.

#### FRIENDS' ASYLUM FOR THE INSANE, Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at his residence, on the 1st of 11th mo. 1873, in the 63d year of his age, AMOS CORE, a member of the Middleton Monthly and Particular Meeting, Columbiana Co., Ohio.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, ELEVENTH MONTH 29, 1873.

NO. 15.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

Memoirs and Letters of Sarah Hillman.

(Continued from page 109.)

It is recorded of Him, the Lord of life and glory, who ascended up on high and led captivity captive, that He "gave gifts unto men." And how true is it, that if the Lord be our shepherd, then however weak and feeble, and unworthy we may feel ourselves, He will make a way where there seems to be no way; and will, as we hold fast our allegiance in faithful and faithfulness, turn again our captivity, however sore it be, as the streams of the south; and will give gifts for the perfecting of the gifts, for the work of the ministry, for the edifying of the body of Christ. Such a gift we are prepared to believe is forthcoming to our dear friend; and the time seems near at hand—though in reality not yet\*—when an open acknowledgment of her Redeemer's name and cause must, if obedience keep pace with knowledge to the law of her God inwardly revealed, soon be made in the religious assemblies of the people.

How instructive it is to observe her caution and prudence under all the turnings of the Lord's holy, chastening hand upon her, to prepare for that which the prophet, in his greater measure, experienced when he cried out, "Woe be me! for I am undone; because I am a man of unclean lips, and dwell in the midst of a people of unclean lips," &c. But this was but the forerunner of the following: "Then flew one of the seraphims unto me, having a live coal in his hand \* \* \* and he laid it upon my mouth;" which prepared for the humble, obedient, passive offering as a living sacrifice, "Here am I, send me." Sarah Hillman felt the work of the ministry to be an awful work; she desired to be thoroughly cleansed from all self-confidence; she asked not to be spared painful baptisms; heeding no doubt the precept of the same evangelical prophet already quoted: "Be ye clean, that bear the vessels of the Lord."

While there may be danger, as there have been instances of withholding in this way

more than is meet, and thus erring on the other hand; and while we wish not to discourage—so far as these remarks may—the least child called of their Father in heaven, in sweetness, in simplicity, humility, and child-like dependence, to the advocacy of His cause and kingdom before men, would that all who have since her day spoken in our religious meetings, had known and felt the solicitude and caution of this wise handmaiden! Would, they had been *as careful* to bide the full time of preparation; to let patience have her perfect work; to go full oft for instruction to the potter's house; to remain the full and appointed season in the stripping chamber, and in the washing pool; and withal, to feel that without Christ Jesus and the leavening, preserving, invincible power of His grace when submitted to, they are truly nothing and could do nothing to His glory! Then, if there were fewer speakers, and fewer words spoken, these we might hope would be anointed teachers, with their lessons learned in Jordan's veriest depths, whence some of the life-giving power of the Holy Spirit would, without the sound of the tool, witness for their offerings.

No date; but probably the early part of 1817. "The work of the ministry has ever appeared to me to be a very awful work; but at present I think it is increasingly so. To stand forth in the assemblies of God's people, and there speak of Him—to break the silence of a congregation—how awful! And how pure must one be before fitted for so important a vocation. My soul is humbled within me at times under the prospect; knowing the frailties of my nature, and fearing lest it is all delusion—lest I should, by putting my hand to the ark, offend the Lord. Sometimes I think it strange that my mind is thus exercised, and endeavor to persuade myself it cannot be that I am called to this great work, and try to shake off the exercise. But it returns again; and now my desires are, if it is thy will, blessed Father, thou wouldst be pleased to grant a sure evidence of it, and a portion of strength to perform. Make me more passive; destroy all the dregs of corruption which remain in me, and cleanse me thoroughly; so that all my confidence may be in Thee. Let me abide in the bottom of Jordan till preparation of heart is experienced to bring up stones of memorial to the honor of thy great name."

Without date. "O that my covering might be the garment of humility; and my adorning a meek and quiet spirit.

"3rd mo. 10th, 1817. This morning attended our week-day meeting, which proved indeed a season of favor. Soon after taking my seat, so great was the distress of my mind that I was ready to cry out, 'Can these dry bones live?' Yet after some time, our beloved friend, \_\_\_\_\_, was led to set forth the glorious state of those who, by attending to the law of the spirit of life in Christ Jesus, have washed their robes, and become inhabitants in those man-

sions prepared for the righteous. Earnest breathings of spirit were begotten in me, that the precious savor felt in this meeting might not pass away as the morning cloud or the early dew, but remain upon us to nourish up the soul; and that we might be more engaged to continue in the way of well-doing to the end, that so we may obtain the crown.

"5th mo. 11th. After a long season in which many different dispensations have been experienced, I am induced to add a few remarks to my diary. My heart has felt I trust some degree of submission to the Divine will at seasons, though there seems to be a want of true and experimental knowledge. I am led at times to fear the crown, which has been shown me, is given to another, through my unwillingness to enter into the labor. And at others I have thought the work of preparation is not fully effected, and that is the reason why I have to travel so long in the deeps. When I reflect that in the deep pearls are procured, how it animates and encourages to abide here and seek therefor. But when presentations of suffering and baptism are offered, my poor, unregenerate nature is ready to flinch therefrom; and the language of my heart is, How can I go, or how can I speak? I am a child. My family is poor in Manassah, and I am the least in my Father's house. O that my soul was more purified! Let the language of my spirit be, Lord strengthen! Suffer me not to swerve to the right hand or to the left! Grant an indisputable evidence of thy righteous will; for I desire to serve Thee. Thou hast been pleased to call me, and O! that thou wouldst cause thy judgments so to take hold upon me, that every earthly gratification may be thoroughly purged from me, and my heart made clean and fitted for the reception of thy holy presence; that thus the place where briars and thorns grew, may produce pleasant fruits.

"The life is more than meat, and the body than raiment. And if the life is preserved it is enough. This is a state of trial and exercise; and all who are engaged to enlist under the banner of the Lamb, have their share of suffering. But if we are only brought thereby to the true sheepfold, there is no cause to mourn; for there is no true joy in anything this world affords. He only is the happy man who follows the pointings of Truth in all things, and is willing to suffer any privation for the sake of peace with his God.

"12th. Attended our week-day meeting. Went in much dread, lest I might feel the necessity of opening my mouth therein; but found nothing more to do, than to labor after a settlement in the quiet habitation, and obey the command to tarry there till power from on high was received. Much painful exercise was my portion. Near the close a little encouragement was administered through the ministry of dear \_\_\_\_\_. He was concerned to invite those who had been willing in the day of the Lord's power to follow him, to con-

\* The time of S. H.'s first appearance in the ministry, is believed to have been on First-day the 23th of Third month, 1830, at Westfield, N. J., when in company with her beloved friends, George and Ann Jones.

time steadfast. Assuring them that however they might be tempted, the Lord would always furnish a way to escape. Oh! that these seasons may not be forgotten; but be treasured up, that my faith fail not; for truly I never saw a time when all things seemed so fluctuating. Every mountain and island seem removed; and nothing to rest upon but the Divine mercy. May every false rest be totally broken up, and the new Jerusalem, wherein dwelleth righteousness, established. It is indeed a time wherein mourning seems to be the garment worn by many at seasons, yet as we become willing to abide all our necessary baptisms, a belief is sometimes permitted to attend that the garment of praise will in due time be granted, and ability furnished to acknowledge, 'Hitherto the Lord hath helped.'

No date. "How awful is death! How awful the approach of the pale horse and his rider, to him who has not been concerned to set his house in order! He has been permitted to summon one in the bloom of life; one perhaps who had formed plans of long continuance here, and who had promised himself much pleasure in the society of the partner of his life, and the innocent prattle of his sweet babes. But he has been summoned to appear before the dread tribunal—suddenly called to meet his God. May we all be aroused to a sense of the necessity of witnessing preparation for this awful change before the midnight cry go forth; for there is no work, nor device in the grave. O, dear Lord, stain the glory of this world in our view, that we may become weaned therefrom, and be qualified to say unto others, follow us as we are endeavoring to follow Thee! Thou, dearest Father, knowest us altogether as we are. Wilt Thou be pleased to quicken to more lively zeal in putting away those things which hinder our progress in the way and work which Thou appointest unto us. We pray to Thee to preserve us—for we can do nothing of ourselves—out of temptation; and deliver us from evil; for thine is the kingdom, and power, and glory forever."

(To be continued.)

*Fragment on Prayer.*—Can there be any thing more imperative than the command, "Watch and pray!" or any language more sweet and encouraging than "Pray unto thy Father, who seeth in secret?"

Doubtless Christians should live in the spirit of prayer. "It is the Christian's vital breath," and marvellous is the privilege, unto this day and hour, of communion with the Almighty power, God over all, who breathed the breath of life whereby we became living souls. By the same Almighty power, we are kept from the path of destruction. Sweet is the inviting language of our Redeemer, who has cast up a new and consecrated way, by which we have access to the mercy-seat. "When ye pray," said He, "say, our Father." Glorious privilege! that while clothed with human nature, feeling and mourning our omissions and commissions, we may "kneel before the Lord our Maker," in prostration of body, soul and spirit. Although utterance may fail, there is an availing sigh, a tear of contrition, and a Spirit, better than our own, helping our infirmities. I allude not to any forms, but the real, humble breathings of the soul, a thirst for the living God.—*Mary Capper.*

There is a great difference between rudeness and plainness.

### Comets.

(Continued from page 106.)

According to the theory now generally accepted, comets enter the solar system *ab extra*, move in parabolas or hyperbolas around the sun, and, if undisturbed by the planets, pass off beyond the limits of the sun's attraction, to be seen no more. If in their motion, however, they approach very near any of the larger planets, their direction is changed by planetary perturbation,—their orbits being sometimes transformed into ellipses. The new orbits of such bodies would pass very nearly through the points at which their greatest perturbation occurred; and accordingly we find that the aphelia of a large proportion of the periodic comets are near the orbits of the major planets. "I admit," says M. Hock, "that the orbits of comets are by nature parabolas or hyperbolas, and that in the cases when elliptical orbits are met with, these are occasioned by planetary attractions, or derive their character from the uncertainty of our observations. To allow the contrary would be to admit some comets as permanent members of our planetary system, to which they ought to have belonged since its origin, and so to assert the simultaneous birth of that system and of these comets. As for me, I attribute to these a primitive wandering character. Travelling through space, they move from one star to another in order to leave it again, provided they do not meet any obstacle that may force them to remain in its vicinity. Such an obstacle was Jupiter, in the neighborhood of our sun, for the comets of Lexell and Brorsen, and probably for the greater part of periodical comets; the other part of which may be indebted for their elliptical orbits to the attractions of Saturn and the remaining planets.

Generally, then, comets come to us from some star or other. The attraction of our sun modifies their orbit, as had been done already by each star through whose sphere of attraction they had passed. We can put the question if they come as single bodies or united in systems."

The conclusion of this astronomer's interesting discussion is that—

"There are systems of comets in space that are broken up by the attraction of our sun, and whose members attain, as isolated bodies, the vicinity of the earth during a course of several years."

Lexell's comet of 1770 is the most remarkable instance known of the change produced in the orbits of these bodies by planetary attraction. This comet passed so near Jupiter in 1779 that the attraction of the latter was 200 times greater than that of the sun. The consequence was that the comet, whose mean distance corresponded to a period of  $5\frac{1}{2}$  years, was thrown into an orbit so entirely different that it has never since been visible.

The great comet of 1858 was one of the most remarkable in the nineteenth century. It was discovered on the 2d of June, by Donati, of Florence, and first became visible to the naked eye about the last of August. The comet attained its greatest brilliancy about the 10th of October, when its distance from the earth was 50,000,000 miles. The length of its tail somewhat exceeded this distance. If, therefore, the comet had been at that time directly between the sun and the earth, the latter must have been enveloped for a number of hours in the cometic matter.

The observations of this comet during a period of five months enabled astronomers to

determine the elements of its orbit within small limits of error. It completes a revolution, according to Newcomb, in 1854 years in an orbit somewhat more eccentric than that of Halley's comet. It will not return before the 38th century, and will only reach its aphelion about the year 2800. Its motion per second when nearest the sun is 36 miles when most remote, only 234 yards.

In the year 466 B. C., a large comet appeared simultaneously with the famous fall of meteoric stones near Ægyptos. The former was supposed by the ancients to have had some agency in producing the latter phenomenon. Another of extraordinary magnitude appeared in the year 373 B. C. This comet was so bright as to throw shadows, and its tail extended one-third of the distance from the horizon to the zenith. The years 156, 136, 130, and 48, before our era, were also signalized by the appearance of very large comets. The apparent magnitude of the first of these is said to have equaled that of the sun itself; while its light was sufficient to diminish sensibly the darkness of the night. The second is said to have filled a fourth part of the celestial hemisphere. The comet of 130 B. C., sometimes called the comet of Mithridates, because of its appearance about the time of his birth, is said to have rivaled the sun in splendor.

In A. D. 178 a large comet was visible during a period of nearly three months. Its nucleus had a remarkably red or fiery appearance, and the greatest length of its tail exceeded 60°. The most brilliant comets of the sixth century were probably those of 531 and 582. The train of the latter, as seen in the west soon after sunset, presented the appearance of a distant conflagration.

Great comets appeared in the years 975, 1264, and 1556. Of these, the comet of 1264 had the greatest apparent magnitude. It was first seen early in July, and attained its greatest brilliancy in the latter part of August, when its tail was 100° in length. It disappeared on the 3d of October, about the time of the death of Pope Urban IV., of which event the comet, in consequence of this coincidence, was considered the precursor. These comets, on account of the similarity of their elements, were believed by many astronomers to be the same, and to have a period of about 300 years. In the case of identity, however, another reappearance should have occurred soon after the middle of the nineteenth century. As no such return was observed, we may conclude that the comets were not the same, and that their periods are wholly unknown.

The comet discovered on the 10th of November, 1618, was one of the largest in modern times; its tail having attained the extraordinary length of 104°. The comet of 1652, so carefully observed by Hevelius, almost equaled the moon in apparent magnitude. It shone however, with a lurid, dismal light. The tail of the comet of 1680 was 90° in length. This body is also remarkable for its near approach to the sun; its least distance from the solar surface having been only 147,000 miles. I will always be especially memorable, however, for having furnished Newton the data by means of which he first showed that comet in their orbital motions are governed by the same principle that regulates the planetary revolutions.

Of all the comets which appeared durin

the eighteenth century, that which passed its perihelion on the 7th of October, 1769, had the greatest apparent magnitude. It was discovered by Messier on the 8th of August, and continued to be observed till the 1st of December. On the 11th of September the length of its tail was 97°. The comet discovered on the 26th of March, 1811, is in some respects the most remarkable on record. It was observed during a period of 16 months and 22 days,—the longest period of visibility known. On account of its situation with respect to the earth, the apparent length of its tail was much less than that of some other comets; its true length, however, was at one time 120,000,000 miles; and Sir William Herschel found that on the 12th of October the greatest circular section of the tail was 15,000,000 miles in diameter. The same astronomer found the diameter of the head of the comet to be 127,000 miles, and that of the envelope at least 643,000. As a general thing, the length of a comet-tail increases very rapidly as the body approaches the sun. But the perihelion distance of the comet of 1811 was considerably greater than the distance of the earth from the sun; while its nearest approach to the earth was 110,000,000 miles. Its true magnitude, therefore, has probably not been surpassed by any other observed; and had its perihelion been very near the sun, it must have exhibited an appearance of terrific grandeur. This comet has an elliptic orbit, and its period, according to Argelander, is 3065 years.

The great comet of 1861 was discovered on the 13th of May, by John Tebbut, Jr., of New South Wales. In this country, as well as in Europe, it was first generally observed on the evening of June 30,—19 days after its perihelion passage. Sir John Herschel, who observed it in Kent, England, remarks that it far exceeded in brilliancy any comet he had ever seen, not excepting those of 1811 and 1858. According to Father Secchi, of the Collegio Romano, the length of its tail was 118°. This, with a single exception, is the greatest on record. The computed orbit is elliptical; the period, 419 years.

(To be continued.)

The first thought of repentance, or *desire of turning to God*, is thy first discovery of the light and Spirit of God within thee; it is the voice and language of the Word of God within thee, though thou knowest it not; it is the bruise of thy serpent's head; thy dear Immanuel, who is beginning to preach within thee that same which he formerly preached, saying, "Repent, for the Kingdom of Heaven is at hand." But, above all things, beware of taking this desire of repentance to be the effect of thy own natural sense and reason, for in so doing thou lovest the key of all the heavenly treasure that is in thee; thou shuttest the door against God, turnest away from Him; and thy repentance (if thou hast any) will be only a vain, unprofitable work of thine own hands, that will do thee no more good than a well that is without water.

But if thou takest this awakened desire of turning to God to be, as in truth it is, the coming of Christ in thy soul, the working, redeeming power of the light and spirit of the Holy Jesus within thee—if thou dost reverence and *adhere* to it, as such, this faith will save thee, will make thee whole; and by thus believing in Christ, though thou wert dead, yet shalt thou live.—*William Law.*

For "The Friend."

### Faithfulness.

I wish to call the attention of Friends to the editorial in the 11th number of "The Friend;" for the sentiments advanced therein, are very applicable to the condition of things in the Society at the present time, and I do most cordially unite therewith. It seems to me there has been too much dread of controversy, by those who are endeavoring to stand for the doctrines and testimonies of our Society. It was not so in the rise of the Society; for Friends in that day felt called to stand for the defence of the gospel, and to contend earnestly for the faith once delivered to the saints: and in those days they knew the cost of their faithfulness in maintaining those doctrines and testimonies. They not only had to endure the frowns of the world, but outward suffering; and they were willing to endure all that was permitted to come upon them, rather than let fall any of their principles; for they were fully persuaded that they were the principles of the gospel of Christ. And like Paul, who was set for the defence of the gospel, they shunned not to declare all the counsel of God, through good report and evil report. And so in this day, those who feel called upon to stand for the same principles, will have to bear the frowns of the world, and be called by those even who style themselves Friends—illiberal—sectarian—uncharitable, &c. The word charity, seems now to be made to cover a great deal, and has been made use of by all who wish to make innovations on our doctrines. Those who wished to change them into Unitarianism in 1828, cried out for charity, and did not want us to judge them, but wished to be styled Friends; and so now those who are endeavoring to overturn the faith of the Society, are crying out for charity.

R. Barclay, in his treatise on Church Government, says: "If the apostles of Christ of old, and the preachers of the everlasting Gospel in this day, had told all people, however wrong they found them in their *faith* and *principles*, our *charity* and *love* are such we dare not judge you nor separate from you, but let us all live in love together, and every one enjoy his own opinion and all will be well; how should the nations have been, or what way can they be brought to truth and righteousness. Would not the devil love this doctrine well. We should all have real charity for one another; but we should not give up our principles for the sake of a spurious charity. For the doctrines and testimonies originally held forth by the Society of Friends are, I fully believe, the doctrines of the Gospel of Christ, and should not be frittered away to please the unconstant will of man, who is wanting more liberty, and is continually endeavoring to make innovations upon them, either on one hand or the other.

Though we should be called by those who are making these innovations,—uncharitable,—illiberal,—sectarian, &c., we should maintain our principles through good report and evil report, as deceivers yet true,—for those doctrines are worth suffering for. Therefore let those who are convinced of the Truth, faithfully maintain it in the meekness of wisdom in the face of opposition. Remember how it was with Caleb and Joshua, when they were sent with ten others to spy out the promised land, and the ten brought back an evil report of the good land; they maintained

the truth of it being an exceeding good land, and that Israel, with the Lord's help, was well able to overcome the inhabitants thereof—though all the congregation bade them stone them with stones. They, too, for their faithfulness, were alone permitted to enter that good land, out of that great multitude, who all rebelled against the Lord, with the exception of Moses, and died in the desert. It was said of Caleb, he had wholly followed the Lord, and through his faithfulness he was permitted, with Joshua, to enter the promised land, and have an inheritance there. And I believe those that faithfully maintain the Truth as it is in Jesus, in this day, will be blessed whether they be few or many, though they may have opposition to bear, even from their own people, even from those who say they are Jews, and are not. If they keep their integrity as Caleb did, they will have "an inheritance incorruptible and undefiled, and that fadeth not away, reserved in heaven for you, who are kept by the power of God through faith unto salvation." It would be very desirable if there were more of this number in our Society, who are valiant for the Truth, and who are not swayed, either to the right or left, by the fear of man, for it is a snare to our feet. But let us be willing to be accounted of no reputation, even fools for Christ's sake, and not be afraid of the frowns and scoffs of the wise in worldly wisdom. I believe if this were the case, things would be very different among us, for the Lord would then, in His own time, raise up more standard bearers amongst us, as He has done formerly in this Society, who were not ashamed of the cross, nor of the doctrines and testimonies given to this Society to uphold before the world; but were valiant for the Lord's cause, and like Paul counted even their lives not dear unto themselves, so they might finish their course with joy. Therefore I would say to all to whom our principles are dear, "be ye steadfast, unmoveable, always abounding in the work of the Lord, forasmuch as ye know that your labor is not in vain in the Lord."

Ohio, 11th month, 1873.

For "The Friend."

### Butter Making.

In a recent visit to a Butter Factory, I was interested in noticing the precautions that were found necessary, in order to make an article of superior quality. The first requisite is the most scrupulous cleanliness—everything about the establishment must undergo frequent and thorough washing. When the tin pans are emptied of the milk from which the cream has been removed, they are first scalded in hot water, and then repeatedly rinsed in pure cold water, no soap being permitted to be used, lest some infinitesimal portions of it should adhere to the surface, and thus injure the flavor of the butter. When the washing is accomplished they are then exposed, whenever the weather permits, to the direct rays of the sun, whose action seems to produce on the tin some mysterious effect which promotes the separation of the cream from the milk. The huge churn is placed by a window, and after being cleansed, the open mouth is so turned that the beneficent light may penetrate its wooden chamber.

A free ventilation of the room in which the milk pans stand is secured by windows covered with wire gauze, and other contrivances, and a stream of water is kept constantly

flowing around the pans through the entire length of the room, on both sides, not only to equalize the temperature, but also that its power of absorbing odors may assist in removing everything that could contaminate the delicate aroma of the butter. The proprietor said that at one time he found a hidden cause was injuring the quality of the article he manufactured, and after some search and reflection he discovered that the gas from a coal-oil lamp which he was using for illumination in the evenings, was absorbed by the cream and affected the taste of the butter; and he was compelled to place over the flame a tin tube to convey the products of the combustion into the outer air.

The information gathered during this visit has suggested some reflections in thoughtful moments. Those of his servants, whom the Head of the Church chooses as his instruments in proclaiming the gospel of salvation, or whom He employs in his service in other lines of duty for the good of others, have frequent experience of that washing and refining process of which the treatment of the milk-pans may be considered a symbol. After these have been strengthened with power from on high to perform the duties required of them, they often know what it is to be emptied of all, and to pass through searching baptisms, every particle of the old manna washed away, and thus to be fitted for receiving fresh supplies of grace, and a renewed ability to go forth and labor. Indeed these washings of regeneration and renewings of the Holy Ghost, are in measure the experience of all true christians, and like all the dispensations of our Heavenly Father, are to be endured with patience; nay with rejoicing.

The care of the butter-maker to keep from his milk-house every unsavory odor, may well remind us how important it is to prevent our minds from being corrupted by any evil presentations. If we open a book to read, and find its pages suggesting improper thoughts, rendering impure the well-spring of action, flushing the mind with unhealthy excitement, and rendering it less easy and acceptable to us to turn our hearts with reverent attention to the feeling of the presence of our Heavenly Father, how important is it that we close the volume, and abstain from that which evidently is injuring us.

If a favorite companion manifests a disregard for the sacred truths of religion, if he tempts us to indulgences or practices inconsistent with its self-denying but most wholesome and beneficial restraints, if his influence over us tends to lead us away from the flock of Christ's companions, let us beware lest the sacred oil entrusted to us should be spoiled by the ill-effects of his language and example.

If through giving way to any of the weaknesses of flesh or spirit, to which we are subject, we find ourselves drawn away from a filial trust in our Heavenly Father, and a loving yet reverent turning of the heart to Him; and become conscious of something like a mist rising between, chilling our affections, and intercepting the rays of his love, let us turn with full purpose of heart, and seek for forgiveness, restoration to Divine favor, and strength to contend successfully with those things that war against the soul, and destroy its peace and happiness.

Absence of occupation is not rest;  
A mind quite vacant is a mind distressed.

For "The Friend."

### The Approaching Transit of Venus.

We now present to our readers the article on the approaching transit, referred to at the conclusion of the introductory essay published in our last number. It is, for the most part, an abridgment of a paper on the same subject published in a late number of the *Edinburgh Review*. A few inaccuracies of statement and expression have been corrected, some additional matter has been here and there inserted, and several passages have been entirely re-written. Although the subject of *Parallax* has occupied considerable space in our introductory paper, yet, as it is at the root of the whole subject, and as it is desirable, therefore, that the reader should have a pretty clear conception of it, we have thought best, although it involves some repetition, to retain most of this portion of the original article, so that by having the matter presented to him from different standpoints and by different hands, the reader may the more readily and the more fully comprehend it.

It is not unworthy of remark that in the several advances towards an adequate idea of the vast distance of the sun, the one thing which each successive investigator set himself mainly to accomplish was the discovery of how large our familiar earth looks when it is seen from the sun; for to know how large any body of already ascertained size appears is substantially to know how far it is away. By exact measurement performed by the most patient and laborious application of the theodolite and measuring rod, man has found that this earth measures 7,925 miles across in its broadest diameter. Now we can determine by the simplest application of geometric principles how large a sphere that is 7,925 miles across must look at any given distance. With every successive withdrawal from the position of the observer, it appears less and less. How far, then, by this estimate is it withdrawn from the sun, and how small does it look from that remote post of observation? Marvellous as it may seem, there are ways in which this can be ascertained. Far as the sun is away in the trackless void, and impossible as it is to take human organs of vision there to look back upon the earth, there is nevertheless something else appertaining to the organization of man that can be made to perform the inscrutable journey—namely the human intellect. This power it is which is to be commissioned afresh upon the work a few short months hence, when a numerous staff of carefully equipped observers start for remote regions of the earth to watch from those vantage grounds the planet Venus sweeping, as a black speck, across the sun's bright face.

What is called in the hard language of technical astronomy the parallaetic displacement, or parallax, of the sun, means virtually, when it is applied to two stations on opposite sides of the earth, and is reduced to the simplest form of expression that the case admits of, 'how large does the earth look from the sun?' Thus, if one man stood at some given point on the earth, and a second man was placed on the opposite side, exactly a full diameter of the earth away, and an observer in the sun looked forth upon these two Terrestrials, he would see them an earth's breadth asunder. The two earth-stationed men, on the other hand, would look at the observer in the sun along lines which respectively converged to his place; and the *angle of convergence* of the

two lines, or the *difference* in the *direction* of the said lines, would obviously be identical with the *angle of divergence* by which the two men are looked at from the sun. In the first case—that, namely, of convergence—the angle is observed by the consentaneous action of two remote men upon the earth, and that angle is called the 'parallax' of the sun. In the second case—that namely of divergence—the apparent size of the earth is gauged as it is seen from the sun. Therefore, the parallax of the sun, or displacement of it caused by viewing it from opposite sides of the earth, and the apparent diameter of the earth considered as if viewed from the sun, are one and the same thing.

It may be here necessary to say, that the astronomer in his actual treatment of this piece of investigation, has found it convenient to deal with the *half-diameter*, rather than with the whole diameter, of the earth; and this, simply because he found it possible to compare the observed position of the sun when just sinking out of sight upon the horizon with the fixed and known position of the luminary as it would be seen if contemplated from the centre of the earth; or, what is the same thing from a position on the earth's surface diametrically between that centre and the centre of the sun. The solar displacement deduced from this method of observation is called the '*horizontal parallax*' of the sun. To observe, therefore, the "*horizontal parallax*" of the sun is the same thing as to ascertain *half the apparent diameter* of the earth measured from the sun. The language of the horizontal parallax observation is used, because it affords a convenient average standard of comparison. Observations from a different base are reduced to the expression they would have had if the exact half-diameter of the earth, which lies between its circumference and centre, had been employed.

Now when this most interesting observation of the sun's parallax is attempted in the routine of terrestrial astronomy, it is found that the two lines which run from widely severed observers, and which meet at the sun, are so very nearly in the same direction—so very nearly parallel with each other—that it requires the nicest effort of visual discrimination to discover that they are convergent and not parallel. If the reader will take the trouble to lay down upon paper two lines diverging from each other by an angle of one degree,—that is to say, diverging at the rate of one-eighth of an inch in seven inches—and will then conceive this angular space to be again split into 400 subdivisions, he will get some approximation to a notion of what the quantity is that has to be dealt with when this, the horizontal parallax of the sun, with a basis of nearly 4,000 miles, is under examination. It is just one of these exquisitely minute subdivisions that has to be measured. The quantity, indeed, is so fine that it cannot be determined accurately, when it is dealt with in a straightforward direct way. The expedient is, therefore, adopted of dealing with it indirectly. The nearest neighbor of the earth, the planet Venus, is made a sort of stepping-stone. The astronomer, by a subtle exertion of the mighty magic which it is his privilege to wield, transports himself to the planet Venus at the convenient contingency when it happens to be directly between the earth and sun, and there notes how large the earth appears from this stage of the journey, that is,

apparent or angular diameter as seen from that position; and then, as he already knows the actual diameter of the earth in miles, he ascertains from these data, by a simple calculation very familiar to mathematicians, how far Venus is from the earth at that time; and then, as he already knows from another source, which will be further alluded to presently, what are the *relative distances* from us of Venus and the sun, he readily obtains the actual distance of the sun from the earth. This, indeed, is substantially what astronomers are about when they send carefully prepared expeditions forth to remote regions to observe the transit of Venus' across the sun's face.

In the process of observing this occurrence, the sun's face is used as a sort of illuminated dial-plate, upon which the progress of the dark planet can be traced. It is very convenient to the astronomer to seize the opportunity to do this, because it at once enables the planet's presence to be marked at a time when it would otherwise be altogether invisible, and it also affords a fixed standard of admeasurement to which the precise movement of the planet can be very readily and accurately referred. And this is a matter of the utmost moment to the success of the observation; for this reason, that its great efficacy depends upon the fact that the track of the dark planet across the sun's face is not the same to observers watching it from remote stations on the earth; and that from the difference of two tracks traced to the sun for remote stations on the earth situated at known distances asunder, the apparent size of the earth as seen from Venus can be reasoned out.

The *relative distances* of the several planets from the sun, as compared with that of the earth, may be ascertained by various methods. One of these methods—which, however, is applicable to the two inferior planets only—so simple in its general features, that it may be well, in this connection, to give a brief explanation of it as applied to the planet which we are now more especially considering. It is observable that Venus *always* rises and sets within a few hours of the sun, that she is, indeed, never *more* than about half a quadrant from him; so that, when not lost in her brilliant rays, she either lingers behind him in the evening, or heralds his approach in the early dawn. This proves that her orbit is wholly within that of the earth; for if it were not so, the planet would often be seen far away from the sun, and sometimes in the opposite part of the heavens. When she is receding from the sun, her apparent or angular distance from him increases more and more slowly from night to night, until at length she becomes stationary for a time as respects the sun and then begins to approach him again. At this *turning point* she is said to be at her "greatest elongation from the sun." This "greatest elongation" is found, on an average to measure  $46^{\circ} 20'$ , varying, however, from  $45^{\circ} 26'$  to  $47^{\circ} 13'$ . This variation is owing chiefly to the elliptical form of the orbits of the earth and Venus. But to avoid complicating our problem, we shall here to regard the two orbits as circular, and to assume that the greatest elongation under this supposition is  $46^{\circ} 20'$ . Now, if at the time of such greatest elongation, lines be drawn connecting the three bodies, we shall have a *right-angled triangle*, Venus being at the right angle, because the line from the earth to Venus, if produced, would simply

touch the orbit of the latter, and would not cut it; and geometry teaches us that when a straight line touches a circle, the line drawn from the point of contact to the centre is at right angles to the tangent or touching line. Of the two acute angles of our triangle, one is at the sun, and the other is at the earth and measures  $46^{\circ} 20'$ . With these data we open our trigonometrical tables, and by a simple inspection of the table of *natural sines*, we learn, that if we call the hypotenuse of our triangle, or the distance of the earth from the sun, 1,000, the perpendicular, or the distance of Venus from the sun, is 723. When, therefore, the three bodies are in line, Venus being between us and the sun (as is the case at the time of a transit), it follows, that, of the 1,000 measures, or units, representing the distance of the latter, 723 will lie between the sun and Venus, and the remaining 277 between Venus and the earth.

(To be continued.)

For "The Friend"

John Heald.

(Continued from page 107.)

When John Heald paid his first religious visit to the eastward, in 1809-10, he made his home in Philadelphia, at the house of Benjamin Kite. The acquaintance thus commenced ripened into a sincere friendship; one of the fruits of which was an epistolary correspondence, which was continued, at intervals, to near the close of life. A number of the letters of J. H. to his friend B. Kite have been met with, since the commencement of this publication of the extracts from his journal. It seems a suitable time to introduce some selections from these, before entering upon the account of the other religious engagements, which followed after our friend's return from his extensive journey in the Southern States.

"Columbiana Co., Ohio, 8th mo. 10th, 1811.

Esteemed Friend:—I received thy letter dated 5th mo. 19th and 31st, the 23d of last, though it had come to my house some time before; but that day I came home from the Miami. I was out from home about ten weeks, chiefly in that quarter. They have twenty-six meetings, the largest of which is on White Water—a branch of the Great Miami—and contains 110 families. The rest, of different numbers; all of them which I attended, 769 [families], besides about thirty families on the Wabash, near Post Vincent, about 170 miles further than I was. Trying exercise and hard labor were many times my lot; but, I believe it is not too much for me to say, I was helped in every time of need, and have desired, and have been enabled, I hope, to ascribe the praise to Him, to whom it is due. Infirmary of body attended me and still does, and my mind was and is mostly humble, I trust under a sense of the greatness of the work, and my inability in a bodily as well as in a mental capacity to perform it, but may acknowledge that I believe, yea find, that there is great advantage in passing through these humbling dispensations, though for the present they are not joyous, but grievous, so true is this:

An hour's adversity may teach us more,  
Than long prosperity had done before.

I have heard thy son Thomas has for some time made a public appearance [as a minister]. I may here observe, that among the many who set out and set out well in this way, how few

hold out to the end. Some soon turn aside; some again flourish for awhile, and then forsake the cause. Some again, who have steadily trod along (as far as I have seen), and at different distances of time, have fallen from a highly favored state, where unnumbered blessings were in their possession, or near at hand, into an impoverished, lamentable condition, the most abject and pitiable. I have often viewed these and applied them to myself, how dangerous my lot is, and how unsafe I am, and with this still added, that it appears to me, that more of these (according to their number) than of any other class, the adversary has drawn down and degraded. I could, but shall add no more of this, and only say that in early life some small sufferings I have found to be brought up in my mind at different times to the present stage of life, to my own profit and that of others; that we know not when we pass through adverse trials, the use they may be of to ourselves or others.

Some of your city will, I expect, be pleased to hear something about Wm. Flanner. I was at his house in the 12th mo. last, and he went with me to several places and some meetings. To me we were agreeably together. He had a good looking piece of land, I thought, and a tolerably good fix on it, especially for the backwoods. I was there again since, in the 5th mo. He had, since I was there before, laid his concern before the Monthly and Quarterly Meetings, to perform a religious visit to the lower part of this State, through Kentucky and Tennessee, and, I think, the Carolinas, which was approbated by those Meetings; but his wife being unwell he was detained, and I understood, and believe it was so, was very scarce of that which is still so necessary to procure bodily sustenance, money. He was, I have no doubt, much tried. But a few days ago, brother William had been to those parts and told me he was gone, and I wish him well.

I wish you all well.

JOHN HEALD."

The remarks made in the foregoing letter on the danger of falling away, which attends those engaged in the public ministry of the gospel, have received many sad illustrations. It is a truth, applicable to Christians of every rank and station, that we are exposed to this danger, unless we are preserved in a state of humility and watchfulness. The exhortation of the apostle is very significant: "Work out your salvation with fear and trembling." Though we may rely with unshaking confidence on the unchanging love of God, and that He will never forsake those who strive to serve Him; yet, sad experience teaches us, how frail we are, and how apt to disobey or neglect the Divine commands. Hence the truly religious mind is often covered with a holy *fear* of doing despite to the Spirit of Grace; and this fear, by preserving in a humble and watchful condition, is one of the greatest safeguards against sin. Those who are thus exercised, can realize the importance of our Saviour's command: "Watch and pray, lest ye enter into temptation." Those who are placed in the conspicuous station of ministers, are subject to the same temptations as are common to other men; and may fall away from a good condition as well as others; unless they are preserved in that subjection to the Divine will, without which none are safe. But they have also peculiar trials and temptations. Being made at times instrumental in

conveying help and comfort to others, they naturally become objects of affectionate interest and regard; and are looked up to with a degree of deference and respect that tends to elevate their self-esteem. If not on their guard, they may appropriate to themselves some of the praise which belongs solely to the Head of the Church, especially when the gift which has been dispensed to them is attended with a pleasing delivery and eloquence of language. Hence it is often observable, that those who are most eminently gifted in these respects, as well as in the Divine power which accompanies their services, are frequently subjected to mortifying baptisms of flesh or spirit, which make them feel their own insignificance and dependence on Divine help and support. Such was the case with the late Thomas Evans, who possessed, in an unusual degree, those qualities which are calculated to win popularity,—brightness of intellect, amiability of disposition, a sympathetic nature joined with energy of character, which enabled him to render assistance in various ways to those in trouble, and a fluent, eloquent, and affectionate exercise of the ministry, attended with much of the Heavenly anointing, which often carried comfort and conviction to the hearts of his hearers. But, during all the later years of his life, he was under much bodily weakness, often accompanied with suffering, which had a very humbling effect upon him, and doubtless was designed as one means of preserving him within the safe enclosure of humility. It is said of Thomas Kite, near the close of life, after many years of active service in the church, that he would walk the streets of Philadelphia mourning in secret over the sins of his youth. During his last afternoon, when he knew death to be near, the one text that seemed uppermost in his mind, and which he many times repeated was this: "Not by works of righteousness which we have done, but of His mercy He saveth us by the washing of regeneration and the renewing of the Holy Ghost, which He hath shed on us abundantly, through Jesus Christ, our Saviour." So, William Evans, as the end drew near, passed through a season of depression, in which he was stripped of self-confidence, and appeared to value the sympathy and friendship of those who were far his inferiors in religious attainments.

What lively illustrations do these instances furnish, of the language of the Spirit to the church of Laodicea: "As many as I love, I rebuke and chasten." Let us then accept such dispensations as evidences of the Divine love, and bless the hand that smites us.

The allusion in John Heald's letter to the difficulty which Wm. Flanner found in procuring money, brings to mind a paragraph in one of his letters written several years after this, in which he states that he was then paying interest on money, which he had borrowed to enable him to pay one of the religious visits which he had been engaged to make. The difficulty of procuring funds in those newly settled sections, before the introduction of railroad facilities, may be readily inferred from the prices at which he mentions their produce was sold. Wheat 50 cts. per bushel, rye, 25 cts., oats, 12½ cts., and butter, 6¼ cts. per pound.

(To be continued.)

*Influence of Piety.*—Lord Peterborough, more famed for his wit than his religion, when

he had lodged with Fénelon, the Archbishop of Cambrai, was so charmed with his piety and beautiful character that he said to him at parting: "If I stay here any longer I shall become a Christian in spite of myself."

For "The Friend."

#### Consistent Walking.

A christian walk, as becomes a professor of the name of Christ, will be the object of thoughtful care, and earnest concern in every religious mind; and although this necessary obligation has been at some periods much lost sight of, indeed buried underneath a weight of dead forms and ceremonious observances, yet doubtless this mark of true discipleship has found faithful supporters in every generation of the Christian church. May we not mourn that such examples are not more general. In the words of the apostle, "the letter killeth, but the Spirit giveth life;" and in proportion as the heart is awakened and brought under the regenerating power of this divine principle, which is truly of the Father and his Son, will the lives of all be a living type of an exalted profession.

A consistent bright example; what a precious influence this exerts upon all who come within the range of its awakening power. How benignant is the lustre that shines out from the daily path of such. It is more profitable than words fitly spoken, which are described to be as "apples of gold in pictures of silver."

A christian life flowing as it does, from a love of the truth embraced in a profession of godliness, will gradually extend so as to include our whole walk, and even many things considered of minor importance. How convincing is such a life; how powerfully it appeals to all engrossed in worldly cares, and to all who find themselves an easy prey of the deceitful enemy, to come into the vineyard of their hearts and labor, where the fruit to be gathered is not that which comes from the eager pursuit of wealth, nor the praise of men; but the harvest to be reaped is peace, joy, contentment, patience, meekness, charity. And is it not for want of this practical belief, this singleness of dedication to the work which our heavenly Father gave us to do, as a separate branch of the professing church, that the enemy of all righteousness has been permitted of latter time so much to ensnare our unguarded feet; by which many of the old paths have been deserted, some of our testimonies contemned and set aside, as of no value in our day, having "outlived the causes" that led to their adoption.

This is one of the snares, which threatens, if yielded to, to remould our whole internal structure, and conform us more and more fully to the world, and other religious denominations; and if not checked must result in our extinguishment. I reverently believe it is the design of the Head of the church to preserve a people that will be jealous for the cause of Truth, as it was committed to our Society in the beginning, and for the upright support of which many in that day suffered cruel persecutions and death from prolonged and loathsome imprisonment. We have always been known as a people different in manners and maxims from the world at large; and if we would perpetuate these, and extend our existence from one generation to another, our individuality and original character must be zealously guarded. Is not our testimony

in behalf of a pure language, simplicity of dress and manners, and a free gospel ministry according as our Saviour taught his disciples worth as much now as at any former time and is not the non observance of these as widespread as when the lips of George Fox were heard up and down through his native land preaching with power; and calling the people out of the follies and formal ceremonial worship of that day to the inspeaking word of Divine Grace in the heart. Oh that we would return to the same fountain, from which he and his co-laborers drank so largely; that we were in short, a more earnest people, and faithful to our principles and our early history. The would our broken ranks be renewed with sons and daughters equipped for warfare; we should more largely partake of the blessings of the Most High, and be fed and nourished from His table, to endure all the turnings and overturnings that may be needed for our further refinement. Then indeed, would our principles be known and read of all men, at the Ark which our fathers bore so conspicuously, would be our rich inheritance.

A striking example of the effect of faithful dedication to the pointings of duty, in influencing the hearts of others to renounce the highway of the transgressor, and to yield to the heart to the regenerating power of the Spirit of Truth; is mentioned in the published life of John Woolman, in his own words.

"An ancient man of good esteem in my neighborhood came to my house to get his will written. He had young negroes; and I asked him privately, how he purposed to dispose of them? He told me. I cannot, I then said write thy will without breaking my own peace, and respectfully gave him my reasons for it. He signified that he had a choice should have written it; but as I could not be consistent with my conscience, he did not desire it; and hence got it written by some other person. A few years after, there being great alterations in his family, he came again to get me to write his will: his negroes were yet young, and his son, to whom he intended to give them, was, since he first spoke to me, from a libertine, become a sober young man, and he supposed I would be free, on that account, to write it. We had a friendly talk on the subject, and then deferred it; a few days after, he came again and directed their freedom; then I yielded to his wish, and wrote his will."

The faithfulness of this excellent man, provided the means under the Divine blessing, of rescuing the slaves of this family, and their descendants, from the curse of bondage; who upon the heart of the slaveholder a wonderful change was wrought, through the power of Divine Grace, flowing as from vessel to vessel.

P. B.

"I believe that every doctrine, as well as every word of God, is only effectually profitable as it is worked out in the soul's own experience. Head knowledge will not do. Hearing with the outward ear does but little for the soul. It enables us to make no highway towards heaven, nor does it unfold to us the tenderness of Christ and his sufferings, or the real character of God. The truth as it is in Jesus is more known in one deep trial, than in a year of smooth sailing. Worldly prosperity is but indifferent soil for the christian to grow in; it rather stunts the soul, unless kept mellow by affliction; and nothing but a

almighty arm can save from the sleep of death." W.

For "The Friend."

A few suggestions have presented themselves, I believe in love, in thinking over the present state of our Society in many places. One is, in connection with the text, "Where the spirit of the Lord is there is liberty." Now, when a company of true believers assemble to worship before the Lord, in spirit and truth, will there not be the same liberty left to remain silent, as there is to speak? and will not He, who is Head over all things to His church and people, be the *alone* Guide and Director?

We know how valuable words fitly spoken are, whether few or many, and how much depends upon the faithfulness of those who are called to the work of the ministry; but is there not danger in the present day, in some places, of too much urging and pressing to speak, and even judging of the salvation of those who do not.

There are many ways of confessing our oppressed Lord before men. And as his humble, dependent children endeavor to live near unto Him, he is graciously pleased to show them *st how* and *when* to do so.

Do we not believe there are now saints in every age, who, when they trod this earth, walked in all pleasing in the sight of our Heavenly Father, and who seldom or never in a public assembly, felt called upon to speak of the work of grace that was going on in their hearts, or to testify that they were His accepted children.

These were not slothful in business, but fervent in spirit, serving the Lord; daily concerned for their own salvation and that of their fellow men, and *willing* workers in His vineyard, just in the way they felt to be required of them *by Him*. Having beheld their lives, "and considering the end of their conversation," should we lightly set aside their example or the example of those who are now laboring to follow Christ in the way which they believe the unerring Spirit of Truth leads?

"Let us not, therefore, judge one another any more; but this rather, that no man put a stumbling-block or an occasion to fall, in his brother's way."

Indiana.

Selected.

It is a satire upon human nature to reflect that the cradle and the coffin, our entrance and our exit, should be scenes of fantastic folly, of which neither subject can be conscious. The seeds of vanity are often sown in the cradle by parents who afterwards complain how difficult it is to eradicate them.—*Amuel Drew*.

## THE FRIEND.

ELEVENTH MONTH 29, 1873.

It is a great favor to have a deep, steady conviction of the immutable truth of the principles of the gospel which have always been held by the consistent members of the religious Society of Friends, and to keep a firm, unwavering adherence thereto. If our lives are brought into conformity with them, we shall find them to ensure our attainment of

the fulness of the blessing of the gospel of Christ. The "unlearned and unstable" are liable to be blown about with every wind of doctrine; and wresting the scriptures to their own destruction, to substitute for the truth as it is in Jesus, that which is the offspring of the unregenerate reason and imagination, ever ready to meddle with the theory of religion, and always falling short of comprehending the mysteries of the kingdom of heaven. But there is a holy certainty attending the practical application of the principles of the gospel, as understood and believed by Friends, bringing the soul into secret communion with Him, by and through whom grace and truth were and still are brought to light, and who alone can supply living faith in our once crucified but now glorified Redeemer.

Though always professing these sacred truths and principles, there is no doubt but that the Society of Friends has long been in a declining condition. The Hicksite controversy and secession, when they took place, roused Friends by the shock they produced, from the lethargy into which many had slid; and for a time there seemed ground for hope that more life would circulate throughout the body. But as the alarming convulsion passed off, it was soon apparent, that while some were deepened in religious experience, others were disposed to relapse into their former supineness, and not a few had not the clear-sightedness to discover the snare of running into an opposite extreme of disbelief, which Satan was spreading for their feet.

The love and eager pursuit of wealth have been a besetting sin within our borders, and with its acquisition, the undue reliance on school learning, and the willingness to be governed by the wisdom of this world, the gratification of the lust of the flesh, the lust of the eye and the pride of life, has been largely indulged by very many of the members. The simplicity and self-denial of our forefathers have been rejected, and the talents bestowed with the command, "occupy until I come," have been buried in the earth, wrapped in the napkin of a fair religious profession.

The adorable Head of the church, by his invincible power, brought the early Friends out from among other professors, and having fully instructed them, by the inshining of his holy Spirit, in the mysteries of his gospel, enabled them to maintain and promulgate it, "as the ministers of God, in much patience, in afflictions, in necessities, in distresses, in stripes, in imprisonments, in tumults, in labors, in watchings, in fastings." He has at different times, and to succeeding generations, declared by his servants, whom He has raised up and qualified for his service, that He will not allow the doctrines and testimonies He has required Friends to exemplify before the world, to fall to the ground, nor they, as a Society, to become extinct. But those servants have also declared, that if while He was looking for grapes, the members continued to bring forth wild grapes, He would shake it and reshape it until that only remained which could not be shaken; after which it should again be instrumental in gathering the people to him, the Shiloh of God.

Ann Jones, of Stockport, England, in a very solemn sermon preached by her, at her own meeting, not long before her death, made use of the following prophetic language: "The day hastens on apace when this people will be shaken in a way they little expect—when

the hail shall sweep away the refuge of lies; when all that can be shaken will be shaken to the very base. For the day will try every man's work, of what sort it is, and all that are not found building on the immutable Rock of ages will be swept away. For the hail shall sweep away the refuge of lies, and the waters shall overflow the hiding-place, when the overflowing scourge shall pass through. Then, may we know the Lord to be our dwelling place, to hide us in the clefts of the rocks, and in the tops of the ragged rocks, until the storm be overpast."

Some years after the Beaconite heresy had broken out in England, and some of the more active among them had left the Society, Sarah L. Grubb, in a communication delivered in the men's apartment of the Yearly Meeting said—

"She was once more amongst us—she had been impressed with exercise both that morning when in their (the Women's) meeting, and since among us, that there were few now who were able to see the state in which we are; blindness, in part, had happened to so many. The leaders of the people had caused them to err; some had acted vilely, had even kissed their Master while they betrayed him. There had been many sandy builders amongst us, but few dig deep enough to get to the rock. There was much disposition to dwell on the surface, and to cherish it both in Meetings for Worship and Discipline. There was much of creaturely activity, but the Lord would never own such; and whoever they were who were building on the sand, whether they were such as fronted the people or not, the storms and tempests that were yet to come, would sweep them away. Yes, the floods and the rains would descend upon their building, and it would not stand, though some were now very fair to look upon. But there were a few burden bearers, and she wished they might be willing, as it were, to bear the Ark on their shoulders till the time of deliverance came.

"When our predecessors were enduring persecution, and immured in noisome dungeons, with evil company, how they increased! And now, in a time of ease, how few we are, and what a scattering there had been; many had tried to remodel this church, but it never could and never would be done; because it was first gathered by the Power of Him before whom all men are but as a drop of a bucket, and who taketh up the isles as a very little thing;" and the Lord would not undo His own work.

"How much the young were to be felt for; how many parents were acting as Aaron did, when he made the gods: and the people said, 'These be thy gods, O Israel, that brought thee out of the land of Egypt.'" She knew she was taking up the time, and felt that some were querying what would all this come to? But the Lord was her witness, that she desired we might take the warning;—that she had not even been tempted as Jonah was to complain because the people repented; but she had rather it were so, though the Lord had been pleased to speak by her. She had prayed that the judgment might be averted, and that He would spare his people. He did indeed take up the isles as a very little thing; and men were but as grasshoppers before him. She nevertheless desired we would be warned by a poor insignificant instrument; if not, many would come from the east and from the west, and would take the seats of those who had

been unfaithful, and a glorious crown would be given them."

#### SUMMARY OF EVENTS.

**FOREIGN.**—The remonstrances of the United States government with that of Spain on account of the capture of the Virginias, and the execution of the passengers and crew, have caused angry feeling at Madrid, and the late interviews between the United States Ministers and the Spanish authorities have been of a stormy character. A Madrid dispatch of the 22d says: "President Castelar had a long conference to-day with Mr. Layard, the British Minister. The result of the interview is favorable to the continuance of good relations.

"The idea of submitting the case of the Virginias to arbitration is much talked of, and should this course be agreed to, the German Emperor is indicated as the probable arbitrator." There is no doubt the Spanish government desire to preserve friendly relations with this country, and are disposed to make all reasonable concessions in the matter, but the position at this time is critical, and they dare not offend popular feeling.

Prominent officers of the insurgent force, at Cartagena, had determined to surrender the city to the national government, but the plot was discovered by their colleagues and the parties were arrested. Contreras and Galvos are now sole rulers of the insurgents.

Don Alphonso, brother of Don Carlos, has been appointed Generalsissimo of the Carlist forces. According to a Bayonne dispatch, a body of 400 republicans, in the province of Almeria, had been destroyed by the Carlists recently, all of the soldiers being either killed or captured.

In the French Assembly on the 19th inst., a motion for the unconditional prolongation of President MacMahon's powers was rejected; also a proposition that the question be referred to a popular vote, was defeated, 88 yeas to 499 nays. The Assembly finally agreed, by a majority of 66, that MacMahon's powers should be prolonged seven years independently of the adoption of constitutional bills. A motion that a committee of thirty be appointed to report on constitutional bill, was adopted by a majority of 68.

Gambetta and Jules Favre, have appeared as witnesses in the Bazaine trial. Favre gave an account of his interview with Bismarck, and declared that the latter told him he had reason to believe Bazaine would not recognize the government of September.

The population of Berlin is now stated to be 907,419, having increased 86,824 in ten years.

An explosion took place in the colliery at Wigan, on the 21st inst., by which twenty-five miners were killed or injured.

Disraeli made a political speech in Glasgow, on the 22d inst. He predicted a great struggle in Europe between the spiritual and temporal powers. He feared the conflict might result in anarchy, and declared that the partisans of home rule in Ireland would unmask and show Great Britain their real designs.

The London Times says, the demand for the surrender of the Virginias could not with justice be maintained, but the other demands reported to have been made on Spain by the United States, are such as England might join in.

An immense demonstration in favor of home rule took place in Dublin the 23d inst. It is estimated that 60,000 persons took part in the procession and mass meeting which followed. Speeches to the multitude were made by several orators. No disturbance occurred.

London, 11th mo. 22d.—Consols, 92½. U. S. sixes, 1865, 93; new five per cents, 91½. The Bank of England rate of discount has been reduced to 8 per cent., and loans in the open market have been made at 6 per cent.

Liverpool.—Uplands cotton 8½d. a 8½d.; Orleans, 8½d. Sales of Orleans shipped in the next two months, 89-16d.

A Calcutta dispatch of the 19th says: The fears of famine in Bengal are revived. The press advise the importation of food from America.

Dispatches from Cape Coast Castle report that the English surprised an Ashantee camp. The natives at first took to the jungle, but afterwards rallied and attacked the troops. They were driven off after an engagement of two hours. Five English officers and fifty-two African auxiliaries were wounded. General Wolseley had made a reconnaissance in front, and found 40,000 Ashantees encamped at Mamfon.

A very heavy snow-storm has occurred in and around St. Petersburg. The river Neva is closed by ice.

The Dutch expedition against Acheen has left Batavia.

The effective Spanish force in Cuba is officially stated to number 54,000 men.

According to Dr. W. Reiss, of Heidelberg, by whom the first successful ascent of the crater of Cotopaxi was made, the height of the mountain is understated in Humboldt's and other estimates; the barometer giving 19,660 feet, and separate trigonometrical calculations 19,496 feet for the northern and 19,427 for the southern summit respectively.

By the arrival at San Francisco of the steamer Great Republic, advices from Japan to the 1st inst. have been received. On the 24th ult. the Ministers of the Mikado, with two exceptions, resigned in consequence of a proposition to send an expedition to Corea. The resignations were accepted, but subsequently most of them were withdrawn, and the Mikado has abandoned his Korean and Formosan projects.

A dispatch from Rome of the 20th says: The Pope to-day delivered an address to the foreign students about to leave for their homes in consequence of the suppression of religious institutions. He warned the Americans among them of the complete and almost excessive liberty to which they would soon be exposed, but at the same time drew a contrast between non-interference with the Church in their country and the persecutions to which it was subjected in the German Empire.

**UNITED STATES.**—The interments in Philadelphia last week were 252 in number. There were 46 deaths of consumption, 8 of apoplexy, 8 typhoid fever, 8 disease of the heart, and 8 old age.

The deaths in New York last week were 519. Wm. M. Tweed, for many years an influential New York politician, has been found guilty of enormous frauds upon the city. He has been sentenced to twelve years imprisonment and to pay a fine of \$12,750.

The expenditures of the Post-office Department for the year ending 6th mo. 30th last, were \$29,084,945, and the receipts for the same period \$22,996,741. The Postmaster General says, the Telegraph should be made a part of the postal system without further delay, and urges the assumption of the telegraph service by the government.

The Gloucester fishing fleet lost twenty-four vessels and one hundred and fifty-two men during the past year.

**The Markets, &c.**—The following were the quotations on the 22d inst. *New York.*—American gold, 110½. U. S. sixes, 1881, 113½; ditto, 1862, 108½; 10-40 5 per cents, 108. Superfine flour, \$5.35 a \$6.10; State extra, \$6.30 a \$6.75; finer brands, \$7 a \$10.25. White Michigan wheat, \$1.75; red western, \$1.52; No. 2 Chicago spring, \$1.45. Canada barley, \$1.75; State, \$1.35 a \$1.37. Oats, 54 a 57 cts. Western white corn, 78 a 80 cts.; yellow, 70 a 71 cts. *Philadelphia.*—Uplands and New Orleans middling cotton, 15½ a 16½ cts. Cuba sugar, 7 a 7½ cts. Superfine flour, \$4.50 a \$5; extras, \$5.25 a \$5.75; finer brands, \*6 a \$10. White wheat, \$1.65 a \$1.80; amber, \$1.58 a \$1.65; red, \$1.45. Rye, 76 a 80 cts. Yellow corn, 63 a 69 cts. Oats, 47 a 53 cts. Smoked hams, 11 a 13 cts. Lard, 7½ a 7¾ cts. Clover seed, 6 a 8 cts. per lb. *Chicago.*—Extra Spring flour, \$5 a \$5.75. No. 1 spring wheat, \$1.10; No. 2 do., \$1.05; No. 3 do., \$1. No. 2 mixed corn, 40 cts. No. 2 oats, 32 cts. Rye, 65 cts. No. 2 barley, \$1.35. *Louisville.*—Extra family flour, \$5.75. Corn in sacks, 55 a 60 cts. Oats in sacks, 45 a 48 cts. Lard, 8 a 8½ cts. *Baltimore.*—Southern white corn, 70 a 72 cts.; yellow, 68 cts.; new corn, 50 a 65 cts. Oats, 48 a 52 cts. *St. Louis.*—No. 3 fall wheat, \$1.27½ a \$1.30; No. 2 spring, \$1.04 a \$1.05. No. 2 mixed corn, 42 cts. *Cincinnati.*—Family flour, \$6.75 a \$7. Wheat, \$1.40. Old corn, 54 a 55 cts. Rye, 80 a 82 cts. Lard, 7½ a 7¾ cts.

#### FOR RENT

To a Friend, the small dwelling on the meeting-house property, West Philadelphia. An oversight of the property will be accepted as part of the rent.

Apply to

JOHN C. ALLEN, Forrest Building, 119 South Fourth street.

HENRY HAINES, 512 Walnut street.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Ailen, No. 335 S. Fifth St., Phila.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

**MARRIED,** at Friends' Meeting, West Grove, Chest Co., Pa., Eleventh month 13th, 1873, EDWARD SAVEE of Wilmington, Del., to HANNAH HUGHES, of a former place, daughter of Samuel and Mary A. Hughes, both deceased.

**DIED,** at North Dartmouth, Mass., on the 30th 10th month last, GEORGE M. EDDY, a beloved member of Dartmouth Monthly Meeting, in the 63d year of age. This dear Friend was distinguished for his quiet and forbearing disposition; and few were more watchful lest the cause of Truth should suffer from his example or precept, and he thereby become a stumbling-block to others. He was a tender and affectionate husband, a kind and gentle father, ever feeling a deep concern that his children might be brought up in the nurture and admonition of the Lord. He was careful never to allow his business, though often of a pressing nature, to prevent his attending meetings as they came in course, taking his family with him as much as practicable. He met with many close trials and privations during the late civil war, feeling constrained to bear testimony to the peaceable principles of Friends in an open manner. More than once the infuriated people threatened to destroy his place of business, by fire otherwise, if he did not comply with certain requirements which his peaceable principles would not permit. At one time having been absent from the city, on his return he was met by a delegation of men, appointed for the purpose, who said to him that if he did not close his store during a war meeting to be held that afternoon, it would be destroyed before morning. He was favored with ability calmly and quietly but unflinchingly to remonstrate with them against their proceedings, and to inform them that he could not conscientiously comply with their demands. He who had proved a present helper in every needful time, did not fail him in this time of trial; for he was preserved unharmed in person or property, to the end of the conflict. Having endeavored to be faithful in his early days, he advanced in life he evinced an increasing concern to live up to the principles and testimonies of the religious Society of which he was a member, as promulgated by George Fox and his co-laborers at its rise, and for which he felt concerned faithfully to stand through evil report and good report, and to strengthen and hold up the hands of those who were brought under suffering by their faithful testimony and allegiance to them, and the unshaken faith of which he lived and died. When he had been confined to his bed two or three days, he said to his wife that he believed it to be his last sickness, and he did not know that he could be taken a better time. He had endeavored to live in a state of preparation, and now through the mercy of God Christ Jesus our Lord, every thing looked peaceful and sweet, and he believed there was a mansion prepared for him. He observed, "there is nothing worth living for compared with the joys of Heaven," evincing that he had been made willing to give up his family, which had caused him a great struggle. He then supplicated most fervently, and after a little pause, said, "A new day begins to dawn, it is already light." Afterward he spoke of his approaching dissolution and gave some directions in regard to his burial, and said he felt that his work was done. At intervals his voice was several times heard in supplication; in which state he continued until his purified spirit took its flight, we do not to the mansion of which he spake as being prepared for him.

WILLIAM H. PILE, PRINTER.

## The Approaching Transit of Venus.

(Continued from page 117.)

The astronomer, then, having possessed himself of these proportions, proceeds to make a practical application of them in ascertaining the sun's distance, in this way. He first fixes beforehand upon two suitable, remote stations on the earth, and then employs competent observers to watch from them the passage of the planet across the sun's face. One method of obtaining the exact measure of the distance asunder of the transit-tracks on the sun's face, is for the observers to note the precise time that is occupied by each passage. When, since the apparent angular motion *per cursum*, that is their change of apparent place among the stars, both of Venus and the sun, at the time, is known, we can deduce from the time occupied by the transit, as seen by each observer, the length of the transit track expressed in minutes and seconds of an arc. Next—assuming that the tracks are straight and parallel (which is very nearly the case)—since the sun's face is a circle, the diameter of which at the time (also expressed in minutes and seconds of an arc) is accurately known, we can calculate exactly the relative position of the two tracks or chords, in the said circle, and hence also their precise distance apart, expressed in seconds of an arc. This distance apart can also be obtained, but not so accurately, by each observer taking frequent measurements during the transit, of the angular distance of the track from the edge of the sun's disk. But this distance apart of the two tracks marked, as it were, across the sun's face, by whatever method obtained, is their apparent distance apart as viewed from the earth. The same absolute distance on the sun's surface, if viewed from Venus and measured there, would subtend an angle greater than that measured at the earth exactly in the proportion that the earth's distance is greater than the distance of Venus, that is in the proportion that 1000 is greater than 723, because the nearer an object is to us the larger is the visual angle that it will subtend. Suppose now the observed angle of separation of the two tracks seen by two remote observers on the earth's surface and measured in the manner just described, is found to be 35 seconds:

the same distance on the sun's face if viewed from Venus would subtend an angle of 48½ seconds, because 48½ is greater than 35 in the proportion that 1000 is greater than 723.

Now, if a straight line were drawn from one of our earth-stationed observers through Venus to the sun, it would terminate in the imaginary line that we have supposed to be drawn on the sun's disk to represent the apparent path of Venus across the sun as seen by that observer. If then two such lines be drawn at the same instant, one from each observer, they will cross each other at the planet, say at its centre, and will there form four angles, two of them very large and equal to each other, and two of them very small and also equal to each other.\* Now, of the latter pair of opposite angles, the one towards the sun is, in the case supposed above, 48½ seconds, and therefore the other angle, that is the one towards the earth, is also 48½ seconds. But this last angle is the apparent or angular distance apart of the two earth-stationed observers as seen from Venus.

We will next assume that our two observers are 6000 miles apart (as measured along a line at right angles to the line joining the earth and Venus.) Now we know how far apart two lines diverging at an angle of 48½ seconds are at any given distance from the angle or point of divergence, and vice versa. At one mile from the angle they are 235 millionths of a mile asunder: at one million miles, therefore, they are separated by a space of 235 miles; and hence, by a simple proportion we learn that where the said lines are 6,000 miles apart the point of divergence must be distant about 25,500,000 miles. This, then, is about the distance of Venus when she is between us and the sun, if the data we have assumed are correct. But we want to know the distance of the sun. As already stated, the relative mean distances of Venus and the earth from the sun are 723 and 1000: when, therefore, they are in a line the distance of Venus from the earth on the same scale will be represented by the difference of these numbers, that is by 277, as already explained. We say then, as 277 is to 1000 so is 25,500,000 miles, (the distance of Venus from us) to the distance of the sun, which, by working out this proportion, we find to be about 92,000,000 miles. In the foregoing we have used the relative mean distances of the earth and Venus from the sun. The variation from these in different parts of their orbits is considerable. The astronomer is of course careful to use the true relative distances as they actually are at the time of the transit, these being of course affected by the ellipticity of the two orbits and the "perturbations" of the other planets and of our moon. There are other circumstances which have to be taken into account in determining by this method the sun's parallax; but these have not been introduced in

\* It will assist the reader to draw the figure.

the foregoing explanation, as our aim has been simply to give the reader an idea of the general principles.

The transits of Mercury and Venus are said to have been first predicted by Kepler. He announced a transit of Mercury for 1631, and two of Venus for 1631 and 1761. The transit of Mercury was observed by Cassendi, a distinguished French mathematician and philosopher. That of Venus in the same year was not seen in consequence of the sun being at the time below the horizon of observers in western Europe. Another transit of Venus, which Kepler had not predicted, was observed in 1639, near Liverpool, by Jeremiah Horrocks, a young Englishman who had six years before discovered that the transit would take place, although he announced the fact to no one except to his friend William Crabtree, of Manchester. Crabtree watched for the new phenomenon, but owing to the clouds he caught but one view of it a few minutes before sunset.

As early as 1663, the ingenious James Gregory (the inventor of the Gregorian telescope) pointed out the use that could be made of transits of Venus for obtaining the solar parallax, and subsequently Dr. Halley made a similar suggestion, and proposed a method for carrying it into effect. He could not expect to live until the occurrence of the next transit, (he died in 1742, in his eighty-sixth year,) but he exhorted his successors to prepare themselves for the event. Accordingly extensive preparations were made for observing the transit of 1761 for this purpose, and expeditions were sent to such remote stations as were considered the most eligible and accessible. Some of the principal of these were Tobolsk, Calcutta, Madras, St. Helena, the Cape of Good Hope and the small island of Rodrigue, in the Indian ocean. But unfavorable weather at some of the stations and other difficulties that had not been provided for, prevented the full success of the undertaking. From some of the more reliable observations a parallax of 8½ seconds was deduced, but according to Pingré the collected results gave a parallax as great as 10½ seconds. The former value makes the sun's distance about 96 million miles, and the latter about 78 millions. Such a discrepancy was mortifying, and astronomers, feeling determined to profit by the experience they had gained in 1761, looked forward with some impatience to the next transit which was to happen just eight years after, to wit on the 3rd of Sixth month, 1769. Accordingly in that year the renowned navigator, Captain Cook, was sent to Otaheite, in the South Pacific, to watch the appearance of the transit, while a large band of astronomers were to be engaged in the same way in the opposite hemisphere of the earth, viz: at Cape Wardhus, Kola, St. Petersburg, Yakutsk and other places in the far north, and at various points in Europe and Asia. Observations were made at about fifty stations in Europe, at six or

more in Asia, and some seventeen in America. There were two stations in California, and one on the west coast of Hudson's Bay, in latitude  $58^{\circ} 47'$  North. Among the American observations may be especially noted (both on account of their real value and as a matter of interest to the readers of "The Friend") those made at three stations in and near Philadelphia, by committees appointed for the purpose by the American Philosophical Society, viz: in the State House Square, Philadelphia, at the residence of David Rittenhouse, Norriton (about 20 miles N. W. of Philadelphia), and near Cape Henlopen, Delaware.\*

After the various observations had been brought together and collated, there was found to be more discrepancy than had been anticipated in the results obtained from different pairs of observations; but by using those which from the relative situations of the observers and other circumstances were the most reliable, the values obtained for the sun's mean horizontal parallax by different astronomers, varied from 8.47 seconds to 8.92 seconds, the former indicating a distance of 96,480,000, the latter 91,620,000 miles.

(To be continued.)

For "The Friend."

### Mixed Marriages.

There can hardly be a doubt that the ground of the testimony our early Friends had against mixed marriages, was because of their fear that from the want of congeniality induced by dissimilar educational training, and especially from diversity in religious sentiment, such parties could not live so harmoniously, or the domestic nest be so happy and sweet as when the religious views are the same, and the intellectual status not much unlike. A good deal of stress should properly be placed upon this, because much of the congeniality of heart and mind is fairly attributable to such significant fact. For instance, how generally well understood is the frequency with which even those who love each other, do not see eye to eye, and harmonizing in Christian belief and in Christian doctrine. A large part of the troubles and animosities, and even deadly strifes that have disturbed society and afflicted christendom in general, is attributable to this fruitful source. Hence, have we any ground to expect that where parties, whose religious training and moral and intellectual culture have been greatly different, are brought into such endearing, at least close, because life-enduring bond, that they will be so likely to coalesce, and to sail smoothly over life's troubled sea? Facts very greatly disprove such hypothesis. And then also—a resultant by no means to be overlooked in this connexion—if the parties have children, what will likely be the effect upon them? Will not indetermination, doubt or indifference, and ultimate estrangement be the probable, legitimate, bitter fruits?

How wisely forecasting and restraining,

\* See *Transactions of the American Philosophical Society, Vol. I.* The Committee for the Observatory in the State-House Square, were John Ewing, Joseph Shippen, Dr. Hugh Williamson, Charles Thompson and Thomas Prior. For the Norriton Observatory were appointed William Smith, Provost of the College of Philadelphia, John Lukens, Surveyor General of Pennsylvania, David Rittenhouse, of Norriton, and John Sellers, Representative in Assembly for Chester county. The Cape Henlopen observations were conducted by Owen Biddle and Joel Bailey, assisted by Richard Thomas of Chester county.

then, is the following from our excellent code of Discipline: "It is advised, that parents exercise a religious care in watching over their children, and in endeavoring to *guard them against* improper connexions in marriage; that they (to continue the quotation) be not anxious to obtain for them large portions and settlements, but that they be joined with persons of religious inclinations, suitable dispositions and diligence in their business, which are more necessary to a comfortable life in a married state." And also the subjoined from the same, which is required to be read annually in our Preparative or Monthly Meetings: "That no young or single persons make or encourage proposals of marriage with each other without consent of parents or guardians, or keep company with those not of our religious Society upon that account; and if parents give their consent to, or connive at their children's thus keeping company, or marrying, that they be dealt with according to our Discipline."

In Friend's Library, vol. 12, pp. 433, 434, is the following account given by Martha Routh, while on a religious visit to the inhabitants of the island of Nantucket, in the year 1795. It sorrowfully represents how the sad fruits of disobedience sometimes press heavily upon us, when the awful messenger of death presents that serious view of things which should be allowed their due place in health and strength; and when the painful consequence might have been averted: "We had an opportunity of sitting with a widowed Friend and her surviving children, who had that day buried her eldest daughter, a very comely young woman, who about eleven months before, contrary to her mother's and friends' advice, had gone out in marriage with one not of our Society. When so ill that her dissolution appeared near, she requested to see me, if I was free to go. My dear friend, E. Rotch, accompanying me, we went and sat by her; an affecting time indeed it was; her near relations were in great distress, and her own was almost insupportable, begging earnestly in a plaintive language, that seemed almost to pierce my soul, for a little longer time, that she might be favored to feel a hope of reconciliation to the Almighty, and to her friends; saying, she was afraid she had been deceived in thinking she had a right to choose for herself in the step she had taken.

"I could say very little, but recommended to her and those about her, as much stillness and inward retirement as they could attain, and to seek the Father and Fountain of all sure mercies; feeling little or no evidence respecting her life or death, acceptance or rejection by the Lord; yet I expressed a hope that a little longer time would be given, remembering the compassion of Christ to the thief on the cross. This proved to be the case; during which time my mind was brought under an unusual travail, both by day and night, on her account. When I went to see her again, she lay very quiet, though in great bodily pain, and seemed to have a ray of hope; saying, all she could endure while she lived, she desired to bear with patience, if her time might be lengthened until her peace was more fully made. While sitting with her, I was not afraid to believe or mention, the evidence vouchsafed, that there was mercy for her with the Lord; at which she seemed much tendered.

"On seeing her again, she had in the interim

undergone much painful conflict; and going in with L. R. a few hours before her close one of her sisters thought her in a quiet sleep but on going to her I found it was the sleep of death, which took place in about three hours. Nothing that could be said would then affect her, but a passage of Scripture rising again with life, which had opened livingly in my view when sitting by her on former visit, though not then to make mention of, I believed I was now commissioned to drop it: 'Comfort ye, comfort ye my people,' &c.; for I have a firm belief 'her warfare was accomplished.' Which was matter of much consolation to her afflicted mother and relatives; yet I had strongly to recommend to the younger part of the family, that the deeply affecting and instructive lesson might not be forgotten, but remembered like 'the wormwood and the gall,' to the humbling their souls, which I thankfully hope will be the case with some of them at least."

That ancient Israelite and worthy see John Churchman, has left us the annexed hints and cautions with respect to the matter, a *b c* lessons in this very important step of life. A step which for good or evil involves so much, and has such a practical, swaying influence, both for time and eternity. It is thus, as an extract from a letter of his, introduced to the reader.

John Churchman's advice to a young woman on the subject of marriage: "I feel the anxious perplexed state thy mind is in, though there be no objection as to outward circumstances and thy relations and friends are pleased with the proposal. Yet as it is a concern of the utmost importance, it may seem difficult how to determine." After some useful hints of his own experience he thus proceeds: "There are seasons when the mind, fixed in deep attention on the Sovereign Good, is composed and quiet, totally uninfluenced by outward objects, when human considerations lose the energy, and we, regardless of the sentiments of men, are only solicitous to gain the approbation of Heaven, and follow wheresoever He is pleased to lead, whether to do or to suffer. In these awful moments calmly weigh it, and see how it then appears, whether it bring uneasiness or a cloud, or otherwise; and let nothing prevent thy acting accordingly. At other times think as little about it as may be; it will but tend to puzzle and distress thy mind the more. Never let persuasion or the bias of affection induce thee to depart from the sense and judgment that is formed here. Be sure marry none but an Israelite. There is most assuredly to be met with by the honest inquirer, that which can direct to an happy breadth."

E. S. J.

Philada., 11th mo. 27th, 1873.

The Christian is the world's Bible, and the only one that it reads. If we take care that in this book be plainly shown the loving spirit, the grandeur and the winning friendliness of Christ, then shall we see many hearts open to receive this actual testimony of christian life and suffering. For many of our opponents envy us in secret our christian comfort in misfortune and under heavy loss. Their hearts are often stirred by a deep yearning after the support which bears us up; and this superiority of the Christian life can often drive the hardest heart to seek the help of our Lord. In fine, only life can beget life. Before such argument ancient Rome herself

the mightiest empire of the world, and the most hostile to christianity, could not stand. Let us live in like manner, and then, (though it should have a short-lived triumph) eventually must be fulfilled what Augustine says: "Love is the fulfilling of the truth."—*Prof. Theodore Christlieb, of Bonn, before the N. Y. Conference of the Evangelical Alliance.*

### Comets.

(Continued from page 115.)

#### THE DISINTEGRATION OF COMETS.

The fact that in several instances meteoric streams move in orbits identical with those of certain comets was first established by the searches of Signor Schiaparelli. The theory, however, of an intimate relationship between comets and meteors was advocated by the writer as long since as 1861,—several years previous to the publication of Schiaparelli's memoirs. In the essay here referred to it was mentioned—

1. That meteors and meteoric rings "are the debris of ancient but now disintegrated comets whose matter has become distributed around their orbits."

2. That the separation of Biela's comet as it approached the sun in December, 1845, was but one in a series of similar processes which could probably continue until the individual fragments would become invisible.

3. That certain luminous meteors have entered the solar system from the interstellar spaces.

4. That the orbits of some meteors and periodic comets have been transformed into orbits by planetary perturbation; and

5. That numerous facts—some observed in ancient and some in modern times—have been decidedly indicative of cometary disintegration.

What was thus proposed as theory has been since confirmed as undoubted facts. When the hypothesis was originally advanced, the data required for its mathematical demonstration were entirely wanting. The evidence, however, by which it was sustained was sufficient to give it a high degree of probability. The existence of a divellent force by which comets near their perihelia have been separated into parts is clearly shown by the following facts. Whether this force, as suggested by Schiaparelli, is simply the unequal attraction of the sun on different parts of the nebulous mass, or whether, in accordance with the views of other astronomers, it is to be regarded as a cosmical force of repulsion, is a question left for future discussion.

#### HISTORICAL FACTS.

1. Seneca informs us that Ephoras, a Greek writer of the fourth century before Christ, had recorded the singular fact of a comet's separation into two distinct parts. This statement was deemed incredible by the Roman philosopher, inasmuch as the occurrence was then without a parallel. More recent observations of similar phenomena leave no room to question the historian's veracity.

2. The head of the great comet of A. D. 389, according to the writers of that period, was composed of several small stars." (*Hind's Comets*, p. 103.)

3. On June 27, A. D. 416, two comets appeared in the constellation Hercules, and pursued nearly the same apparent path. Probably at a former epoch the pair had constituted a single comet.

4. On August 4, 813, "a comet was seen which resembled two moons joined together." They subsequently separated, the fragments assuming different forms.

5. The Chinese annuals record the appearance of three comets—one large and two smaller ones—at the same time, in the year 896 of our era. "They traveled together for three days. The little ones disappeared first, and then the large one." The bodies were probably fragments of a large comet which, on approaching the sun, had been separated into parts a short time previous to the date of their discovery.

6. *The third comet of 1618.*—The great comet of 1618 exhibited decided symptoms of disintegration. When first observed (on November 30.) its appearance was that of a lucid and nearly spherical mass. On the eighth day the process of division was distinctly noticed, and on the 20th of December it resembled a cluster of small stars.

7. *The comet of 1661.*—The elements of the comets of 1532 and 1661 have a remarkable resemblance, and previous to the year 1790 astronomers regarded the bodies as identical. The return of the comet about 1790, though generally expected, was looked for in vain. As a possible explanation of this fact, it is interesting to recur to an almost forgotten statement of Hevelius. This astronomer observed in the comet of 1661 an apparent breaking up of the body into separate fragments. The case may be analogous to that of Biela's comet.

8. The identity of the comets of 1866 and 1366, first suggested by Professor H. A. Newton, is now unquestioned. The existence then of a meteoric swarm, moving in the same track, is not the only evidence of the original comet's partial dissolution. The comet of 1866 was invisible to the naked eye; that of 1366, seen under nearly similar circumstances, was a conspicuous object. The statement of the Chinese historian that "it appeared nearly as large as a tow measure," though somewhat indefinite, certainly justifies the conclusion that its magnitude has greatly diminished during the last 500 years. The meteors moving in the same orbit are doubtless the products of this gradual separation.

9. The bipartition of Biela's comet in 1845, as well as the non-appearance of the two fragments in 1865 and 1872, were referred to in a previous chapter.

The comet of Halley, if we may credit the descriptions given by ancient writers, has been decreasing in brilliancy from age to age. The same is true in regard to several others believed to be periodic. The comet of A. D. 1097 had a tail 50° long. At its return, in March, 1840, the length of its tail was only 5°. The third comet of 1790 and the first of 1825 are supposed, from the similarity of their elements, to be identical. Each perihelion passage occurred in May, yet the tail at the former appearance was 4° in length, at the latter but 2½°. Other instances might be specified of this apparent gradual dissolution. It would seem, indeed, extremely improbable that the particles driven off from comets in their approach to the sun, forming tails extending millions of miles from the principal mass, should again be collected around the same nuclei.

The fact, then, that meteors move in the same orbits with comets is but a consequence of that disruptive process so clearly indicated

by the phenomena described. In this view of the subject, comets—even such as move in elliptic orbits—are not to be regarded as permanent members of the solar system. Their debris becomes gradually scattered around the orbit. Some parts of the nebulous ring will be more disturbed than others by planetary perturbation. Portions of such streams as nearly intersect the earth's path sometimes penetrate the atmosphere. Their rapid motion renders them luminous. If very minute, they are burnt up or dissipated without leaving any solid deposit; we then have the phenomena of shooting-stars. When, however, as is sometimes the case, they contain a considerable quantity of solid matter, they reach the earth's surface as meteoric stones.

Selected for "The Friend."

Extract from *Biographical Sketches and Anecdotes of Friends.*

While Mehitable Jenkins was in England on a religious visit, perhaps in the year 1787, she attended the circular meeting held at Exeter. Catharine Phillips was also at the meeting, and in the exercise of her beautiful and acceptable gift, spoke largely to those assembled. After Catharine had ceased, Mehitable, who was an illiterate woman, and not extensive as a minister, stood up and delivered a brief testimony. Some critical Quakeress, concerned perhaps for the literary reputation of the Society of Friends, complained to Timothy Berington, that such a Friend as Mehitable should speak in such a large meeting. The complainant thought that good order required that an opportunity should be taken with Mehitable to prevent the possibility of her disturbing large gatherings, and said that the Friend's gift appeared better adapted to small meetings of our own Society. Timothy Berington, from whom the anecdote is derived, replied to her, that he believed no harm had been done. It so happened that he had invited a man of some standing in Exeter, to attend this circular meeting, who had accepted the invitation. Soon after he met Timothy and expressed his warm thanks for the treat he had received. Timothy said he was pleased to find him so well satisfied, adding, "My friend Catharine Phillips is considered a great minister." "Yes," replied his friend, "we know Mrs. Phillips is a very sensible woman; we are therefore not surprised to hear her preach a good sermon; but the few words the elderly lady from America said, were to me far more weighty, and suited to my situation of mind than anything Mrs. Phillips had to say. I hope to be thankful as long as I live, for the great instruction, and sensible feeling of Divine goodness I experienced from the sweet, short sermon of your American Friend."

This anecdote is very much in accordance with the testimony of William Penn. The wife of Lord Baltimore, after attending a meeting for worship at the time of the Yearly Meeting in Maryland, told him she did not want to hear him, and such as he, for he was a scholar, and a wise man, and she did not question but he could preach; but she wanted to hear some of the mechanics preach—husbandmen, shoemakers, and such like rustics; for she thought they could not preach to any purpose. William told her, some of them were rather the best preachers we had among us.

The account of John Steel, and his testimony against those ancient apostates, John Wilkinson and John Story, is a strong illustration of the power of the Holy Spirit in qualifying illiterate instruments for the Lord's work. His testimony was in the words of William Penn, "Neither the wisdom of the North, nor the eloquence of the South, but the power of God through a ploughman, and marvellous in our eyes."

About 125 years ago, a Friend from England, on a religious visit to America, appointed a meeting in Philadelphia. After a time of silence a young man in his common working clothes, with a leathern band around his waist, arose from his seat about the middle of the meeting, and stepping into the passage-way began to preach with great energy and power. The youthful preacher was the illiterate Thos. Brown. The Friend who had appointed the meeting felt excused from any public labor therein, but was well satisfied with that which had taken place. After the close of the meeting some of his friends gathered round him, expressing their sorrow that another should have occupied the time so that he should have had no opportunity of relieving his mind. He replied, "The service fell upon the lad."

*The Policeman's Dog.*—In the riots of July, 1863, a patrolman was carrying Sergeant Buckley, badly wounded, on a stretcher to the Charles street police station. A black French poodle, followed the stretcher into the station, and thenceforth became the pet of the house. "Jim," as he was called, was supposed to have belonged to some colored family which had fled from the city. The men taught him many tricks. At roll-call he invariably headed the platoon and took his position by the sergeant. He was taught to distinguish one baton from another, and as he liked to fetch and carry, the officers let him bring their locusts. Bets were once made by the men that Jim could not distinguish between a genuine officer and a sham one. Officer Wiseburn, Jim's warmest friend, changed clothes with a fireman, who taking the locust in hand, walked up and down the street. Jim noticed him, darted out of the station, snuffed at the clothes, sat down for a moment, looking straight in the face of the disguised fireman, seemingly puzzled, sprang upon him, caught the club between his teeth, growled and pulled, until the fireman allowed himself to be led into the station, where he dropped the club. Jim carried it to Wiseburn, who was in the fireman's clothes.

Jim's good nature won for him the love of all the children in the neighborhood, and he became their playmate. He knew his friends, and never failed to resent an injury. There were two butchers in the rear of the station, one a good-natured Irishman, who kept in a basement, the other a German on the avenue. For some time, every morning and evening, he entered the stores and invited the butchers to feed him. The Irishman never failed to give him a hearty meal. The German rarely gave him a morsel, and once drove him out of the store. Many ladies knowing him had been accustomed to allow him to carry their baskets to market. Jim, on reaching the Irishman's store, ran in, compelling his patroness to follow him, thus materially adding to the Irish butcher's trade.

Jim's jumping feats were so extraordinary that the officers took a pride in showing him

off. One day, while he was exhibiting to a crowd of admirers by jumping on a pile of lumber, one of the heaviest boards tipped over and fell upon him, breaking one of his legs. With a howl of pain he hobbled off to officer Wiseburn's post.

"What's the matter, Jim?" asked Wiseburn. The dog tried to show his broken leg. Wiseburn, stooping, saw the nature of Jim's injuries, and tenderly bore him to the station. The police surgeon pronounced Jim's wound fatal, and advised his being shot. Wiseburn would not suffer this, so he bandaged Jim's leg, put him into a basket filled with soft hay and warm clothes, tied him up and cared for him with a tenderness which seemed to win Jim's heart. It was many weeks before he was allowed to walk out.

Two years after the accident, one night as the officers were preparing to go on patrol, they saw Jim in Charles street, hobbling by the side of a small bulldog which he was supporting. Jim had picked up a dog that had been run over. On reaching the station he sought Wiseburn, who picked up the wounded dog and took care of him.—*New York paper.*

#### TO HANNAH MORE.

BY JOHN NEWTON.

Written in her Album at Cowslip Green, at her residence, when asked to insert his name previous to seeing her, as was the custom.

Why should you wish a name like mine,  
Within your book to stand,  
With those who shone and those who shine  
As worthies in our land?

What will the future age have gained  
When my poor name is seen,  
From knowing I was entertained  
By you at Cowslip Green.

Rather let me record a name  
That shall adorn your page:  
Which like the sun is still the same,  
And shines from age to age.

Jesus, who found me when I strayed,  
In Afric's dreary wild;  
Who for my soul a ransom paid,  
And made his foe a child.

He taught my wild blasphemous tongue,  
To aim at prayer and praise,  
To make his grace my theme and song,  
And guided all my ways.

A pattern now of mercy's power,  
Where'er I stand is seen,  
Such as I think was ne'er before  
Beheld at Cowslip Green.

#### HYMN IN THE PROSPECT OF DEATH.

Earth, with its dark and dreadful ills  
Recedes, and fades away;  
Lift up your heads, ye heavenly hills;  
Ye gates of death, give way!

My soul is full of whispered song;  
My blindness is my sight;  
The shadows that I feared so long  
Are all alive with light.

The while my pulses faintly beat,  
My faith doth so abound,  
I feel grow firm beneath my feet  
The green, immortal ground.

That faith to me a courage gives,  
Low as the grave to go;  
I know that my Redeemer lives—  
That I shall live I know.

The palace walls I almost see,  
Where dwells my Lord and King;  
O grave! where is thy victory?  
O death! where is thy sting?

Alice Cary.

#### Scientific Notes.

In making skeleton leaves, the following method is recommended as superior to the old process of allowing the leaves to rot in water. Dissolve 4 ounces of washing soda in a quart of boiling water; then add 2 ounces of slaked quick lime, and boil for fifteen minutes. Allow it to cool and pour off the clear liquid. Heat it till it boils, and then put in the leaves to be prepared and boil them gently for an hour, or until the soft parts can readily be removed. This is best done by floating them on a board under cold water, and rubbing with a soft brush. If the skeletons are not pure white, bleach them by putting a table spoonful of chloride of lime in a quart of water and soaking in the solution for ten or fifteen minutes.

The Queen Bee of our hives, it has long been known cannot sting. Recent examination has shown that she possesses this weapon, but that it is blunted and more curved than in the working bee, and she is not able to pierce the skin of man with it. On placing two Queen Bees in a glass jar, and closely watching their motions in attacking each other, each queen was seen to attempt to disable her rival as much as possible by means of her powerful jaws; at the same time she feels about with her sting, which is totally unable to penetrate the skin of her rival, till she finds one of the breathing holes, through which she injects her poison with a rapidly fatal effect.

Weeds.—A recent writer of a chemical turn of mind says: Two years ago I took a large house and grounds which had been uninhabited and utterly neglected for three years. The lawn is nearly an acre in extent. Dandelions, buttercups, plantains, docks, &c., were in the ascendant. After many attempts to eradicate them, I found at last that one drop of the common, strong sulphuric acid, dropped upon the crown of each weed entirely destroyed it and it will never grow again. I used one of the ribbed bottles employed by chemists and photographers for dropping poisons, and found it to answer perfectly, and it enables one to apply the acid with great rapidity. Large docks which have hitherto never been destroyed except by digging up, are effectually destroyed by the acid.

Lime as a preservative of wood. A writer in *Chambers' Journal* says, that lime is a good preserver of timber. Ships and barges used for the transport of lime last longer than others. A small coasting schooner laden with lime was cast ashore and sunk. She was raised and set afloat once more, and remained sound for 30 years. Again, a platform of nine planks was used to mix mortar on for a long time, but being no longer required, was neglected, and at length hidden by the grass that grew over it. Sixty years afterwards, on cleaning the ground, it was discovered sound and well preserved.

The great fires of Chicago and Boston have called attention to fire-resisting building stones. Dr. Ott of New York, shows that limestones are unsuitable for building stones owing to the facility with which they calcine when exposed to high temperatures. Among limestones, those which contain magnesia give way the soonest. Of the primitive rocks, granite, gneiss and mica are untrustworthy, for they crack to pieces even when exposed to radiant heat. In their natural state they contain water, and the stone ex-

lodes by the raising of the temperature, or these reasons, Dr. Ott gives the preference to the sandstones.

Blackly, in his "Experimental Researches on Hay Fever," details some experiments showing the amount of pollen floating in the air. He daily exposed slips of glass coated with a non-drying liquid, and placed horizontally, to the air at the ordinary breathing height of four feet nine inches from the ground. The experiments were commenced in the 4th month, and continued to the end of the 7th. The highest number of pollen grains obtained in twenty-four hours on the surface of a square centimetre was 880, on 6th month 28th. By using pieces of glass similarly prepared to an elevation of 1,000 feet or less in the atmosphere, by means of kites, he found the pollen was much more largely present in the upper portions of the atmosphere than near the surface, the average of his experiments making nineteen times as much. These experiments afforded abundant proof of the presence of the spores of fungi in the air in large quantities. In one experiment which lasted four hours, and in which the number of pollen grains collected at an altitude of 1,000 feet was over twelve hundred, the spores of a cryptogam were so numerous, that he could not count them. At a rough estimate they could not be less than from 30,000 to 40,000 to the square inch. A fact like this makes the ubiquity of fungoid organisms a thing easy to comprehend.

Watch springs, made of an alloy of aluminum, are said to have been successfully prepared by a manufacturer in Saxony. They are superior to those of steel in their freedom from liability to oxidize, in not being affected by magnetism, and in being less brittle.

The disturbing echo in public halls, which renders the voice of a speaker indistinct, it is said can be prevented by stretching a few wires across the building, on a level with or above the speaker's head.

For "The Friend"

John Heald.

(Continued from page 118.)

The political troubles, which were caused by the contests between England and France under the government of Napoleon, extended to this country, and finally culminated in what is called the three years' war. The peaceful current of business was much disturbed by the agitations which preceded this, and much suffering was the result. In a letter to John Heald, written 9th mo. 22d, 1811, Benjamin Lite thus alludes to this subject: "The congested state of the commercial world, by the straining and contending of the governments, renders it very difficult for us, who live by buying and selling, to get along with our business." In his reply, John Heald is led to make some reflections which may convey a useful lesson to some in the present day. He writes under date 10th mo. 29th, 1811: "You live your trials; when that which was once thought safe, is become hazardous, here is a trial; to sit still and do nothing, is not doing advantage; and doing, and that to a disadvantage, is no better; but circumstances require something to be done; industry is that by which those are to live whose circumstances are limited; to be still, is to fall rough; and to go on ends in the same manner, I think, is one among the numerous

advantages that is obtained, in setting out early, or closing in with the first visitations of divine love, and endeavoring faithfully to follow on through the varied dispensations that are permitted. For when a trial falls on them, these can look over the motives and inducements to their undertakings; and having been favored with a peaceful evidence from time to time, there is something to recline upon; that though their expectations are disappointed, they feel that they have trodden along, as Job of old did, when he was loaded with afflictions, and when his friends would have persuaded him that he had not stood upright, he could not find his deviation, where it was, if he had made any, but could say, 'I know that my Redeemer liveth, and shall stand upon the earth;' and though in vindicating his innocency, he expressed some things of which he was ashamed when he was called upon to answer to the demands of the Most High, yet he came not under condemnation for having wilfully gone aside, either to the right hand or to the left. So, when the time of trial was over, he was replenished with substance and tranquillity, and passed his days in peace. But when improper motives and inducements have been followed in the will of the creature, or when there has been a turning aside from the right way, and in this situation such have been overtaken in a time of adversity, there is no prop nor support to lean upon, they are reduced to the like state which king Saul was, and for the very same cause, to wit: for not 'obeying the divine command.' So when they are forsaken they may endeavor to make a fair outside show, and even desire to be honored in the sight of the people; but I see but little hope these can have to escape from a time of adversity like unto his, when he 'fell along upon the earth,' and had eaten nothing all that day, nor all that night, and there was no strength left in him. He could not then say, I know that my Redeemer liveth, but could say, 'God has forsaken me, and answereth me no more,' &c. So the time of your adversity may in secret be profitable to some, and even to many, for the more the foundation is tried, the more sure they stand that are upon it, for the foundation of God standeth sure. It has stood through all by past ages, and every storm and shock, and still remains to be the same, and He never fails, nor forsakes those who trust in Him, but is to them a place of broad waters, to refresh themselves from the heat and from the storm, and as a mighty rock in a weary land, and as a tower, whereunto the righteous flee and find safety, as they have ever done.

"While I pen these lines, I am reminded of my own standing, and how near a time of adversity may be; when I consider of the great power which threw the stars down to the ground, even a third part of the stars of the firmament. And I have not arrived above these, no nor to them. If I am worthy to be classed with the stars, it is with those of least magnitude, which can be seen but a small distance. If larger ones are cast down, why not I too. I often am fearful I shall be overtaken in some unguarded moment, and in a day of forgetfulness be surprised and drawn down, and my lot be to fall away, never to see good nor comfort to my soul, but I believe for myself, and for others, that our safety depends upon our faithfulness, that if we closely attend, with the most scrupulous attention to our duty, both as to time and place, and not

to make our own time, but to leave our own business, and our own concerns, to do our Master's business, when and where, and as he may require, and to be given up so to do, not accounting it a yoke of bondage, but cheerfully going, and faithfully doing; in this way we have grounds to hope for preservation, and even in this we may have to venture our lives, in danger of losing them. We may then rely on his merciful support; but if we are dilatory and inattentive, how can we expect the precious favor of protection or preservation."

On the 2nd of 8th mo. 1812, John Heald again wrote to his friend, B. Kite.

"Esteemed Friend.—I received a few days since thy acceptable letter of the 3rd of 6th mo. last. To my mind it savored of a living concern remaining on thy mind to fill up thy allotted portion of duty in time, as it passes along. In this I wish to be one with thee. The peace which flows through the mind so sweetly, and at times along with it a well-grounded hope that at some time we may enter into rest that has no end,—the satisfaction or comfort, who can know who have not felt it! If our little, feeble exertions and labors, in whatever line they may be, are crowned with such a glorious reward, who but would be willing to be employed in such things? Many would have the reward, who seem to want it without submitting to do the little required. I do not doubt but that many miss of very precious enjoyments for want of faithfulness in little things, sometimes by not denying themselves the little gratifications, and sometimes by not carefully doing the little duty required."

After mentioning that Rowland Green, Susannah Horne and Mahlon Hockett, had been in succession visiting their meetings, he again alludes to the unsettlement caused by the war with Great Britain. "The situation of public affairs appears to spread a gloom over many," thou observes, and it does here; listing some, drafting some, and some turning out volunteers. The militia are not ordered away, but to be in readiness at a short notice, among whom are several Friends of our Meeting. Noting these things is not pleasant to me, though it seemed necessary just to hint a little, to give some idea that a portion of sufferings may be near to some here, and those not a few—but through all I esteem it a most precious favor to have the mind preserved, and in a still, quiet habitation, where none makes afraid. When I reflect what great numbers there are, who, for want of a more close attention to right things, have not attained thereto, I can but pity them, apprehending that I see so great a loss sustained which a little timely care and attention would have prevented.

I want to know how many Friends in and about the city [of Philadelphia] are doing, and how they are. There are many whom I love and wish well. If they are doing well it would be pleasant to hear of it. In this state of probation we are all, no doubt, tried in some way, and it may be often doubtful where we shall land at last." He enumerates among those of whose welfare he would gladly be informed, Joseph Gibbons, Nathan Harper and wife, Richard Jordan, Richard Cooper, Joseph Clark, Joseph Cruikshank and wife, and Nicholas Wain.

From the same to the same.

"Columbiana Co., Ohio, 1st mo. 13th, 1813.

"Wm. Heald set out day before yesterday,

to meet three other Friends to wait on the Legislature of this State with an address from our Quarterly Meeting in regard to the militia law, as many of our younger men have been drafted for six months, and have not complied with the requisition, and the law is said to be of so doubtful a meaning, that even the officers, to whom the execution of it is referred, are divided about it; some saying that they may impose a fine at their discretion, anywhere between \$8 and \$100 for every month, while others say that they can go no higher than \$100 for any draft. If it should be construed to mean \$100 a month, and be exacted, all the property that many industrious families possess will not be sufficient, it is believed, to answer the demand. The complicated miseries of war are many—but some I trust are escaped to the strong Tower, where they repose themselves in quiet safety, and at times are favored with that which is the reverse thereof, even love, to overshadow and cover, feelingly cover, all the sensitive parts within them—which the bloody warrior can hardly know, while engaged in that employ.”

(To be continued.)

At the request of an aged Friend, I copy the following for the columns of "The Friend," if approved by the editors.

“Upon the 4th day of the Fourth month I was drawn forth to wait on the Lord; and as I was waiting, the consideration of my dear children, whom the Lord had taken to himself in their innocency, came before me, and my soul blessed his holy name for his great love towards them and me, in that they are gone to their rest, and shall never partake of those exercises and sorrows those do that remain in the world. Then my soul was poured forth before the Lord for them that remain, that as they grow up in years, they may grow in grace, and in the knowledge of our Lord and Saviour Jesus Christ; or else I would rather follow them to their graves whilst they are young, than that they should live to the dishonor of his worthy name. And then a more general and weighty concern came upon me for Friends' children, that are grown up and do not come under the yoke nor bear the cross. Oh! the cry that ran through my soul; and in the anguish and bitterness of my spirit I said, Lord, what will thou do with Friends' children when we are gone off the stage of this world; will thou raise up children, and not those of believing parents? And this was the word that livingly sprung up in my soul. They reject my counsel, and cast my law behind their backs, and will have none of my reproofs; and though my hand be stretched forth all the day long, yet they will not hear, but go after their own hearts' lust. Then I said in my heart, Lord, are they all so? The answer was, there are some that are innocent, whom I will bless with a blessing from me, and they shall shine forth to my praise. And now, Oh Friends! that you may dwell and abide in the innocent life, that so the blessing of the Lord you may feel daily to descend upon you. But as for you that 'reject the counsel of the Lord, and cast his law behind your backs, and will have none of his reproofs,' which are sorrowful sayings concerning you who are the children of believing parents,—you who are under the profession of the Truth, which will do you no good unless you return unto the Lord; therefore, I desire you may all return unto him whilst

the day of a long-suffering, merciful God lasteth. But if you still reject the counsel of the Lord, the many faithful warnings you have had, how will you answer it in the day when He cometh 'to render unto every one according to their deeds?' And now, something further is with me to parents of children. Dear friends! you that have been convinced of God's unchangeable truth, and have known the work and operation of it, working out and bringing down that which was of a contrary nature to it,—and oh! that we may all abide faithful in his work, and retain our integrity to the Lord,—then let our breathing cries and prayers be offered up to the Lord for our children, that He would be pleased to look down in mercy upon them, and visit them as He did *our* souls. But as David said, "If I regard iniquity in my heart, the Lord will not hear me;" so I desire we may all be clear in our offerings before the Lord, that He may smell a sweet savor from them.

Dear friends: what is here written is with great caution, knowing that I have children of my own, and that many honest parents have had children, which is no small exercise; but if we keep faithful to the Lord, and discharge our duty to them by precept and example, we shall be clear of them in the sight of God. And therefore friends, faithfulness is the word that runs through me; not only for our own souls, but for our children's also; that a generation may grow up to his praise in this part of the world, when our heads are laid in the dust. Great and manifold hath the love and mercy of God been towards us; the consideration of it many times hath deeply affected my mind; and it was He, by the same arm of power, that reached unto us and brought a concern upon us in our own native land: and I do believe, that many had as clear a call to leave their native country as some of old had; which caused many days and nights of sore travail and exercise before the Lord, and no ease could we have, but in giving up life and all unto him, saying, 'Lord do what thou wilt with us, only let thy presence preserve us.' And to his praise we can say, He hath been with us since we came to this country, and hath preserved us through many and various exercises both inwardly and outwardly: and now that which lies on our parts, I desire may be considered by us all, that so suitable returns may be made unto the Lord, by walking in humility and godly fear before him; that so, good patterns we may be, by keeping our places 'to the praise of Him who hath called us,' for He is worthy forevermore. And friends, something more is with me, which I thought to omit, but find I cannot well do it; that is, concerning our children, that we be very careful while they are young, that we suffer them not to wear such things that Truth allows not; and though it may be said they are but little things and well enough for children, but we find that when they are grown up, it is hard for them to leave off, which, may be if they had not been used when young, would not have been expected when grown up: so I desire we may all be clear in ourselves, and keep our children out of the fashions and customs of this world. And oh! that we were all of one heart and mind in these and other things, then would the work of the Lord go on easily, which is the sincere desire of your friend,

HANNAH CARPENTER.”

1787.

For "The Friend."

Memoirs and Letters of Sarah Hillman.

(Continued from page 114.)

“1817. 12th mo. 22nd. My mind has for two or three years been oftentimes deeply exercised, under a prospect of being called to the work of the ministry. How has all that is within me bowed before the Majesty of heaven and earth when this prospect has been renewedly opened to my view; when presentation and openings have been made and felt, but I have thought not sufficiently clear to warrant my standing forth. So awful the work appears, that I have ever craved to be preserved from hastily entering into it, or indeed to run at all, unless clearly convinced that it is indispensably necessary for me, and that the time for my liberation to service is fully come. I desire to abide all the necessary purifications, that so none of the dross, tin, or reprobate silver may remain, but every thing which will not abide the fire being purged away and the pure gold only remaining, the glorious cause may be exalted. But O! when I look at my many infirmities, when I contemplate how small the progress made, to what I might by this time have made, I am ready to conclude I shall never become qualified for any service in the Lord's vineyard.”

The following letter is the first from Sarah Hillman's pen that has come to the hand of the compiler. She has now reached the 24th year of her age; and, as is sweetly observable the grace of the Lord Jesus which strives with which woos, and would bring salvation to all if obedience did but keep pace with the knowledge received, is still helping her on to more and greater victories over the enemies of her own house; still leading to the perfection of holiness in the fear of the Lord; still teaching practical, saving lessons of self-denial and the discipline of the cross; still, with its hand maiden prayer, adding thread to thread, and stitch after stitch to the wedding garment clean and white, which is the righteousness of saints.

Would, that more in our day were incited by such examples to "stir up the gift of God that is in them; to take heed to the injunction, "Watch and be sober; to "put on the breastplate of faith and love, and for a helmet the hope of salvation;" to dedicate their all to Him who is the life and the light of men; to surrender themselves wholly to that Power who can open the blind eye and unstop the deaf ear, and thus make the slave a freeman and, above all, to live to and for that Saviour who died for us, the Just for the unjust, that through repentance and amendment of life He might bring us to God. How then would He lead into green pastures beside the still waters; how create a new heaven and a new earth wherein dwelleth righteousness; how pour out the blessings of his kingdom till there should not be room enough to receive them; how cause that instead of the thorn should come up the fir tree, and instead of the brittle myrtle tree; and even make that, which now seems but as a wilderness and a desert to bloom and blossom as the rose. The truly the lively hopes and spiritual blessing unto a full cup and sufficient for all our need would be poured into the contrited bosom, and the grateful language of the heart be "The Lord is my Shepherd; I shall not want." "Thou anointest my head with oil my cup runneth over. Surely goodness and mercy shall follow me all the days of my life

and I will dwell in the house of the Lord forever."

To Betsey Purington.

Philada., 1st mo. 5th, 1818.

It is not from a belief that my much loved elder sister (if I may use that endearing term) needs the epistolary aid of a child like myself, that I am induced to address thee, but I trust it is in a measure of that love which lives beyond the grave, and by which the disciples of Jesus are made manifest, according to his testimony—'By this shall all men know that ye are my disciples, if ye have love one to another.' Oh this precious love! How does it bind, not only the elder branches with those of like experience, but the young men and children, as they yield thereto are all thereby found as in the 'bundle of life,' and made fellow heirs of one common salvation. May it continue to pervade our hearts. Mayest thou, dear friend, in thy approaches before the throne of grace, remember the children; who feel that they have need of the prayers of the faithful; of those in whom the expressive language of conduct speaks saying, 'Follow;' and who evince themselves conquerors, through the sufficiency of the Father's love. Forget thou remember her who now addresses thee under the appellation of sister, who feels indeed,

A child beset with solemn prospects round,  
While called to tread with awe the sacred ground,  
And that many are the trials necessary for our purification in this scene of probation, but who knows that her helper is Almighty. He who is the leader and the guide of his people, indeed strength in weakness, riches in poverty, and a present helper in every time of need, every time of conflict, in every winter season; though fogs and clouds obscure the light of the Sun of Righteousness from the eye of the mind, yet he is the same; He sustains the character of the Shepherd of Israel, and will arise, as he is waited upon in the patience, with healing under his wings. Then since the Christian has such a blessed and heavenly helper, there is need for him to gird up the reins of his mind, and hope to the end; there is need for him to be a grateful receiver of the manifold favors of his Heavenly Father, while well may he in the language of the poet break forth,

'I'll praise thee for thy mercies past,  
And humbly sue for more.'

or although a little from his munificent hand satisfy the hungry soul, yet the manna which the golden pot contains, must be sought daily. Under the law they were commanded to go forth and gather every man according to his eating daily; so must we. And, as under that dispensation, 'he who gathered much had nothing over, so he that gathered little child-like faithfulness, had no lack;' how beautifully is it descriptive of the duty of a Christian! He is not called upon to work or watch only a day or a week, but the command is, 'Watch and pray continually, that ye enter not into temptation.' \* \* \* \*

I greatly desire to be preserved from burdening thee with words without life, but think may just add, that when thine and thy companions' certificates were read, the desire of my heart was, that ye might so fulfil the work assigned you, that ye might receive that down of peace which the world can neither give nor take away; and now feeling it renewed, I afresh desire that as we have parted together of the streams of that river

which makes glad the whole heritage of God, we may continue to feel that unity which is with the Father and with the Son; and although we never meet again, our souls may still hold converse; and when these bodies are consigned to their mother earth, our spirits shall join that innumerable multitude which John saw, in crying Holy forevermore.

Farewell beloved friends, farewell. From your little friend,  
SARAH HILLMAN.

Oh! that you may remember her and crave that she may be favored to know his voice certain, and his discoveries clear; not Ahimaz like, have to say, 'when I ran, there was a tumult, but I knew not what it was.'

Again I say, farewell."

1819. 9th mo. 9th. Truly the awful importance of time has of late been proclaimed. The messenger upon the pale horse has arrested some in an unexpected moment; but we trust their lamps were measurably trimmed. May we who remain be engaged to meet our God. Perhaps ere another year, I too may be summoned to appear before his dread tribunal who giveth not account of his matters. Oh! that, through unreserved dedication, an entrance may be mercifully granted into that city whose walls are salvation, and whose gates eternal praise."

(To be continued.)

THE FRIEND.

TWELFTH MONTH 6, 1873.

We have been watching with much interest, and some anxiety, the development and character of the difficulty that, within the last few weeks, has grown up between the United States Government and that of Spain. It is a cause of regret, though not of surprise, to observe how quickly and how generally the public mind has been agitated by the statements made by the press, and how glibly the initiation of war is spoken of, without counting the cost in human life, and attendant misery.

That a sanguinary and barbarous revenge has been taken by the enraged Spaniards on those who were on board the noted vessel, captured by them, in which cold blooded murder was committed under color of military law, appears to be generally believed; and the number of the victims, and the peculiar circumstances attending the butchery of so many subjects of different nations, has shocked the feeling of the community in both Europe and America. It is precisely one of those cases fitted to arouse the passions of the people; to appeal to what the unregenerate world calls the sense of national honor, in our own citizens, and to precipitate unreasoning and hasty action under the excited impulse of the hour.

Especially is there danger of some summary and rash course being pursued, where, as in the present case, there are parties widely spread throughout the community, whose interest and pleasure it is, to paint the transaction in its most revolting colors; to brand any hesitancy in seeking "redress" as cowardly and mean, and to stimulate the already excited passions of the people by inflammatory appeals to their self-esteem, and their warlike instincts. But for this, we apprehend, there would not have been such hot haste to prepare to strike a blow, which, if given, would be followed by all the calamities of war.

To the true disciple of the Prince of Peace, all the circumstances of this deplorable ease,—the voyaging of this well-known blockade-runner; her loading; the use intended to be made of her cargo; her capture, and the savage sacrifice of a large part of her crew and passengers to gratify the vindictive passions of her captors—all are readily recognizable as altogether unauthorized and indefensible by the religion of the New Testament. But it is one of the terrible evils of the war policy, to familiarize the people to many and great infractions of the benign and just principles of the gospel, and to reconcile them to have their actions regulated by the far lower standard of expediency and the law of nations. Hence we hear, on the present occasion, much said about the necessity to disregard the notorious character of the vessel, and the business in which it is admitted she was engaged, and to demand immediate and humiliating concessions from Spain; because it so happens that while the "Virginus" was pursuing her nefarious trade, she had in some way, long ago procured American registration, and carried the American flag. The honor of the flag, we are told, must be upheld; and in order to do homage to this fascinating myth, this great country might seem to be on the eve of a war, fastened on it, with all its guilt and horrors, by a few men, whose actions have shown them to be blood thirsty desperadoes. And this in a professedly christian country, whose government and people have just been boasting of the beautiful example set by it and Great Britain in settling a dispute of far greater magnitude by arbitration. How true are the words of our Saviour, "How can ye believe which receive honor one from another, and seek not the honor which cometh from God only."

The Law of Nations refers almost exclusively to the mode of, and the circumstances connected with waging war; and though it is gratifying to observe that christianity is gradually removing some of its most repulsive features, and introducing others more in accordance with the requirements of our professed religion, yet it is no criterion by which a Christian may decide what is right or wrong. The absurdity of supposing, that while men are individually bound to live consistently with the benign and peaceable principles of the religion of Christ, when associated as a nation they may lay those principles aside, and regulate their actions by a code designed merely to restrain the corrupt lusts that war in their members, from betraying them into the extremes of inhumanity, is too glaring to escape the notice of any reflecting mind.

At such a time of excitement as the present, it becomes the duty of every one to refrain, in both word and deed, from encouraging the war spirit which many seem very desirous to spread, and as opportunity presents, to exert whatever influence he or she may possess, in endeavoring to propagate more rational and christian views and feelings; that so, with the blessing of Divine Providence, our country may not madly incur again, the awful crimes, the sufferings and the irreparable losses that so severely punished the people during the late war, and under which they are still smarting.

Since the above was written, we rejoice to find that the danger of hostilities between the two governments is very much lessened, and

there is reason to believe, that if Spain is able to carry out her portion of the terms agreed on, all ground for contention will be removed, and both countries escape the dreadful conflict into which they appeared likely to be plunged.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The Spanish Cabinet has agreed to deliver to the United States government the steamship *Virginus*, and all the persons remaining alive who were captured with her, leaving the question whether the seizure of the vessel was legal, to be settled hereafter by a mixed tribunal. The question whether damages shall be paid to the families or relations of the prisoners who were shot, is also to be settled in a similar manner. A Madrid dispatch says, this decision is in conformity with the opinions of the leading Spanish statesmen, of all parties, to whom the question was submitted by the government.

The negotiations by which the controversy was settled, were conducted in Washington between the Spanish Minister, Admiral Polo, and the United States Secretary of State, and were brought to a conclusion the 29th ult. A protocol was then agreed upon and signed, and the Spanish Minister telegraphed the result to his government.

A Havana dispatch of the 30th says: The news of the settlement of the *Virginus* question, and the terms upon which it is based, was received here with much excitement. The chief authorities of the island assembled in conference, have sent a manifesto to the Spanish government, asking it to wait until it shall have received a protocol in relation to the case, which will show the right of capture and the justice of the subsequent proceedings. The mass of the people oppose the surrender of the *Virginus*.

The insurgents still hold Cartagena, and seem determined on a desperate resistance. The besieging force are bombarding the city. The arsenal and barracks have been the chief marks for the besieging artillery, but the cathedral and hospitals have also been struck. On the 23rd ult. the theatre, and two entire streets were destroyed, and about 200 persons were killed and wounded in the city. The insurgents have raised the black flag on the forts. There is great distress among the non-combatants who have taken refuge in the suburbs.

A German expedition for the exploration of the Lybian desert, under the direction of Dr. Gerhard Kohns, is expected to set out from Egypt early in the present month.

Several Italian newspapers report that a number of Italian, French, Belgian, German and Austrian capitalists are about to form a company for the purchase of the convent property at Rome. Their intention is said to be to leave the monks and nuns in possession of the property and the convent buildings, and thus to render the law suppressing the religious orders at Rome illusory.

The Bazaine trial continues. Rouher has given his testimony in relation to the negotiations of the Empress Eugenie, in the endeavor to save the Rhine army and avoid the cession of territory. General Boyer testified that Bismarck told him he was willing to grant an armistice if the army of Metz would declare in favor of Napoleon.

The French Cabinet has been reconstructed: Beule, who was Minister of the Interior, has retired, and De Broglie takes his place. The Duke de Cases, the only new minister, takes the Foreign Office in place of De Broglie. These are the only changes reported.

The Assembly rejected Leon Say's interpellation in regard to the illegal delay of elections, by a vote of 364 to 314.

The Augsburg Gazette says, the King of Bavaria has signed a decree repealing the concordat with the Pope.

The explanations given by the French government in regard to the pastoral of the Bishop of Nancy, ordering prayers for the recovery of Metz and Strasburg, are regarded in Berlin as unsatisfactory.

Sentence has been pronounced against Archbishop Ledochourki, for continuing unlawfully to institute priests. He is condemned to two years imprisonment and an additional fine of \$5400. Bailiffs entered the residence of the archbishop last week, in accordance with the decree of the court, and seized the furniture. He expresses surprise at the severity of the measure, and maintains an attitude of resistance. A Berlin dispatch of the 26th says, the archbishop has been ordered to resign within a week of the notice. He has received a letter from the Pope exhorting him to firmness.

The Bank of England has reduced the rate of discount to 6 per cent.

Sir John Duke Coleridge, Lord Chief Justice of the Court of Common Pleas, is to be raised to the peerage. He will become Baron Coleridge.

The ship *Clyde*, from St. John, N. B., has been wrecked off Valentia, Ireland. Ten of the crew were drowned.

A small boat made from the *Polaris*, which the whaler *Ravenscraig* took on board when she received Captain Buddington, will be sent from Glasgow to New York. It will be placed in the Smithsonian Institution at Washington.

A proposal of the Erie Railway Company is published in the *Railway News*. The Company proposes an issue of \$22,000,000 more of ordinary Erie shares at \$35 currency, instead of issuing more bonds. This proposal, it says, will be a measure of greater financial soundness, and will make the total share capital \$100,000,000.

Dispatches from Cape Coast Castle report another engagement with the Ashantees, in which forty English and native auxiliaries were killed and wounded. The Ashantees also boldly attacked the British in another place, but were driven off after an hour's fight. General Wolseley, commanding the Ashantee expedition, condemns the native auxiliaries as worthless. Their tardiness and cowardice, he says, keep him from advancing upon the Ashantees.

Intelligence has reached London of a terrible marine disaster. The steamship *Ville du Havre*, which left New York on the 15th ult. for Havre, when one week out, came in collision with the British steamship *Loch Earn*, from London for New York, and sunk shortly after. Eighty-seven persons were saved by the boats of the *Loch Earn*, and sent to England by the ship *Trimountain*. Two hundred and twenty-six of the passengers lost their lives. The *Loch Earn* was badly damaged by the collision, and immediately put about for Queenstown, but had not arrived there on the first inst.

**UNITED STATES.**—There were 269 interments in Philadelphia last week, including 47 deaths of consumption, 13 inflammation of the lungs, 17 debility, 11 typhoid fever, 11 old age.

The deaths in New York city last week were 492. According to the State census of Iowa, the population of the State is 1,251,533. The national census of 1870 gave it a population of 1,191,792.

General Sherman's report to the Secretary of War shows a total of 25,535 enlisted men in the cavalry, artillery and infantry service, and 3,970 non-combatants. The actual strength for military service, after deducting the sick list and necessary details about the numerous forts, he thinks does not exceed 19,652 men.

The Secretary of the Navy, in his report to the President, says there are now in the navy 165 vessels, carrying 1269 guns, which is a reduction since the last annual report, of thirteen vessels.

The expedition organized under the authority of Congress for the survey of the Darien and Nicaragua routes, with the view to the construction of a ship canal between the Atlantic and Pacific, have completed the service. It is stated that the route selected by Commander Selfridge includes one hundred miles of river navigation of the Atrato. It is estimated that the work would cost between \$50,000,000 and \$60,000,000.

The total number of immigrants from other countries landed in the United States during the year ending 6th mo. 30th last, was 459,833, of whom 275,792 were males, and 184,041 females.

The Public Debt of the United States, less cash in the Treasury, amounted on the first instant to \$2,159,862,054, having increased \$9,028,576 during the 11th month.

The first session of the Forty-third Congress convened in Washington on the first inst., quorums being present in both Houses. The House of Representatives now has 292 members, of whom 278 answered at roll call. James G. Blaine, who was Speaker of the last Congress, was re-elected by a large majority.

A local census of the city of Baltimore, just taken, gives a population of 302,893, an increase of 19,823 over that of 1870, which was 283,070.

**The Markets, &c.**—The following were the quotations on the first inst. *New York*.—American gold, 108½. Superfine flour, \$5.65 a \$6.35; State extra, \$6.80 a \$7.15; finer brands, \$7.50 a \$10.25. Red western wheat, \$1.58 a \$1.60; No. 2 Chicago spring, \$1.50. Oats, 56½ a 59 cts. State rye, \$1.03. Western yellow corn, 77 cts.; white, 76 a 80 cts. *Philadelphia*.—Midlings cotton, 16½ a 17½ cts. for uplands and New Orleans. Superfine flour, \$4.50 a \$5; extras, \$5.25 a \$5.75; finer brands, \$6 a \$10. White wheat, \$1.70 a \$1.80; amber, \$1.67 a \$1.70; red, \$1.55 a \$1.70; choice spring, \$1.60. Rye, 85 cts. Yellow corn, 73 a 74 cts.

Oats, 49 a 53 cts. Sales of about 2200 beef cattle at 4 to 7½ cts. per lb. gross. Sheep, 4½ a 6 cts. per lb. gross. Hogs, \$6.75 a \$7 per 100 lbs. net. Receipts 8.00 head. *Chicago*.—Spring extra flour, \$5.50 a \$5.75. No. 1 spring wheat, \$1.10; No. 2 do., \$1.08. No. 2 mixed corn, 47 cts. No. 2 barley, \$1.39 a \$1.40. Lard, 7 cts. *Milwaukee*.—No. 1 spring wheat, \$1.13; No. 2 \$1.08. No. 2 mixed corn, 49½ cts. Oats, 34½ cts.

#### FOR RENT

To a Friend, the small dwelling on the meeting-house property, West Philadelphia. An oversight of the property will be accepted as part of the rent.

Apply to

JOHN C. ALLEN, Forrest Building, 119 South Fourth street.

HENRY HAINES, 512 Walnut street.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa. Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia. Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philad.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on Sixth-day, 11th mo. 7th, 1873, in the 92 year of his age, SAMUEL W. JONES, a much esteemed member of the Monthly Meeting of Friends of Philadelphia for the Western District.

—, at West Chester, Pa., on the 9th ult., JAM MILLER SCARLETT, son of John and Catharine Scarlett formerly of Robeson, Berks Co., Pa., aged 26 years. (This dear young Friend it might perhaps be said, th he came nearer exemplifying the truth of the declaration of the Psalmist, than most of the present generation: "Wherewithal shall a young man cleanse his ways, by taking heed thereto according to thy word. It is not desired that any extended obituary notice should be published, but in these days of mournful declension and backsliding among us, it is refreshing the weary traveller Zionward, to meet with one who great simplicity did endeavor "to cleanse his ways, taking heed thereto according to thy word." An innocent cheerfulness of countenance and deportment, unite with uprightiness and firmness in adhering to what he believed to be right, were conspicuous traits in the life of our young friend. He was one of the few of the present day, who believed it right to adhere scrupulously to a plain costume during his life, and near its close requested that his funeral should be conducted in similar manner. His illness was of long duration, during which he was careful in using words expressive his inward state, fearing, as he said, lest he "shon give away all he had." For some time previous to his close it pleased his Heavenly Father to try his faith by a season of strippedness and desertion, which continued at times for several weeks, but the day before his departure he said, "I have been mercifully shown thy way is clear," and his friends have the consolation, hope and belief that what is their loss, is, through adorable mercy, his eternal gain.

WILLIAM H. PILE, PRINTER.

## The Approaching Transit of Venus.

(Continued from page 122.)

About fifty years ago the distinguished German astronomer, Encke, undertook a reconsideration and rediscussion of these results, and also of some that had been deduced from observations of the transit of 1761 by Hirst at Madras, by Lalande at Paris, and by Bergmann at Upsal. From this laborious investigation Encke decided that the horizontal parallax of the sun must be an angle of 8.5776 seconds, and the distance of the sun about 95,286,000 miles.

From that time Encke's estimate of the sun's distance was adopted as the best light on the matter that was likely to be obtained until a half century more should pass, and another transit of Venus give renewed opportunity for correction. But it was generally understood that there was nevertheless no actual value in the long range of decimal figures, namely 8.5776, which Encke had given as the value of the angle of parallax. From Encke's time, indeed, the most restless astronomical spirits continued to nibble at these figures, instead of accepting them in faith, or of waiting upon Venus to furnish the next opportunity for their revision and correction; and they began to make guesses at a probable solution of the problem by the tentative application of less exact, less powerful, and less orthodox methods. Four of these subsidiary attempts deserve special notice, both on account of their ingenuity, and on account of the remarkable agreement of the results that have been reached through their instrumentality.

First Hansen, who has made extensive and valuable researches in the department of Physical Astronomy, about the year 1854, revised some older work of La Place, and calculated the difference in the effect of the sun's attraction in diminishing the moon's motion, and near the times of new and full moon—that is when the moon is nearer to the sun than the earth, and when the earth is nearer to it than the moon. He then compared the results of his calculations with the observed irregularities in the moon's motion known to be due to this cause, and he said, "Encke's determination of the solar parallax makes the

sun's distance too great. It must be about 92,000,000 miles, and the resulting parallax 8.88 seconds."

Next, Leverrier carefully examined certain periodical inequalities of the sun's apparent motion in the heavens, and from this examination, aided by a subsequent correction of one part of the calculation by E. J. Stone (at that time at Greenwich observatory), it was inferred that the sun's distance is about 91,320,000 miles, and his parallax 8.95 seconds.

Then the French philosophers, Fizeau and Foucault, contrived arrangements of rapidly revolving wheels and mirrors, by which the speed of wave-transmission in a light-beam could be measured. Fizeau's experiments were made as early as 1849, and accorded remarkably well with the estimate that was then generally adopted as the probable distance of the sun. He made the velocity of light 194,663 miles per second, and, since long continued observations of the eclipses of Jupiter's moons had proved that it requires 16 minutes and 26 seconds for light to be transmitted across the full breadth of the earth's orbit, or 8 minutes and 13 seconds (equal to 493 seconds) for the half-diameter, it follows that 493 times 194,663 miles, or about 95,970,000 miles is the distance of the sun according to Fizeau. Several years afterwards Foucault repeated these experiments, or, more correctly speaking, he tried them in a different way and with new and improved apparatus. The resulting velocity of light was 298,000,000 metres or 185,172 miles per second, making the sun's mean distance about 91,300,000 miles, and his "mean horizontal parallax" 8.952 seconds.

And, finally, the Astronomer Royal and E. J. Stone used as a base of survey the distance through which an observer on the earth is carried by the sweep of its rotation in a few hours, and marked the position of the planet Mars among the fixed stars from each extremity of this base; and then, applying the proportion of the relative distances of the earth and Mars from the sun, calculated that the horizontal parallax of the sun should be about 8.9 seconds.

This remarkable series of independent observations, based each on a separate ground, therefore seemed to indicate that the sun was something less than 92,000,000, instead of something more than 95,000,000 miles away, and so gave increased reason for an anxious anticipation of the return of the next transit of Venus, when the more exact observation could (once again) be very carefully made. In the meantime, it occurred to E. J. Stone, shortly before leaving Greenwich upon his appointment as Astronomer Royal at the Cape of Good Hope, that a very careful re-examination of the observations of the transit of 1769 might possibly throw some light upon the way in which so erroneous a conclusion as Encke's estimate could have been arrived at. The old observers of the transit had found considerable difficulty in determining the exact instant

when the planet entered upon, or left, the face of the sun, and they were probably not aware of a fact that is now well known, namely, that a dark body seen upon a bright background always appears smaller to the eye than if seen with less intense contrast. It is now understood (and indeed this appearance was noticed by some of the observers both in 1761 and 1769) that from this or some other cause the instant when the planet has completed its entrance upon the sun's bright face, and the instant when it has commenced to leave it, is marked by the formation, or breaking, of a fine black band or ligature, stretching like a stalk between the dark rim of the planet and the bright rim of the sun, rather than by a clear contact of the sharply defined circular outlines. It, therefore, obviously is a matter of some consequence whether this true indication of exact contact was, or was not, generally used in the observations of 1769. From a close examination of the records, E. J. Stone arrived at the conviction that some of the observers did, and some did not, fix their observations from these appearances of the fine band, and that much of the confusion, and probably much of the error of the calculations based upon those observations, was due to this cause; and he then found, that if all these observations were classed accordingly as they belonged to the group in which the true, or the false, indications of contact appeared to have been used, and the calculations were then made under this correction, the parallax of the sun according to these very observations of 1769 was 8.91 seconds.

Since this revision of the 1769 observations, it has been pretty generally admitted that the result must be accepted as a confirmation of the deductions drawn from the other independent investigations which have been alluded to, and that it must henceforth be held that the parallax of the sun is very close upon 8.9 seconds, and the distance of the sun very close upon 92,000,000 miles; and that the residual error which will have now to be looked to at the great opportunity of the next transit of Venus, in 1874, will probably not be more than three-hundredths of a second in the matter of the angular measure of the parallax, and 300,000 miles in that of distance. The nature of the task which the astronomer will have to perform, in dealing as a matter of observation with this exceedingly minute quantity, will perhaps be best conceived from the statement given by R. A. Proctor, that the coarser correction of more than three millions of miles—which appears to have been happily accomplished—involved the examination of a dimension which was about the same thing as the face of a sovereign looked at eight miles away, or a human hair looked at 125 feet away! The scrutiny of the angle of displacement that would correspond with a distance of 300,000 miles would be very much like the task the Astronomer Royal would have to perform if he undertook from his central throne

of astronomical science at Greenwich to detect the face of a bright sovereign held up for him in the sunshine at Peterborough, nearly 80 miles distant.\*

So great an advance has, however, now been effected in the instruments and processes of astronomical investigation, that it is believed it will be more easy at the present time to deal with the small possible error of 300,000 miles than it was a century ago to deal with the larger quantity of 3,000,000 of miles. Money has already been provided by the forethought of the State to enable the renewed attack upon the interesting problem to be made systematically, with all the advantages the advanced science of the day can confer, and arrangements for the work are already in progress. The situations that promise to be most convenient for the observation have been carefully considered. Very good sites for the northern stations of survey will fall in Tartary, North China, and Japan; and for the southern stations, about Crozet Island, Kerguelen Land, and Royal Company Island, in the South Pacific. The best stations for the work, viewed merely as a piece of parallactic survey, are obviously those which are as far asunder as possible, but nevertheless within such a range that each of them must have both the beginning and the end of the transit well in sight between the rising and the setting of the sun.

(To be continued.)

For "The Friend"

John Heald.

(Continued from page 125.)

From John Heald to Benjamin Kite.

"Columbiana Co., Ohio, 26th of 6th mo. 1813.

"The account of the late and sudden death of Caleb Shreeve, as contained in thy letter, has drawn the attention of many Friends, who having heard that I had received the intelligence, have, some of them, applied to hear the certainty; to many of whom I read or showed thy information, and they appeared to retain a remembrance of him, accompanied with sincere respect, and I believe were all affected, in measure at least, with the account of so quick, so hasty a summons. When I have read it to some I have found silence to follow, and tears in many instances flowed both with respect to him and dear Susannah Horne, expressive of both sympathy and endearment. I believe a general sympathy prevails with respect to the latter, and I doubt not but that many sincere prayers have ascended for her support and preservation, and safe keeping through her many and deep trials; and from some perhaps whose hands she never pressed. May these be accepted.

"As to the state of public affairs, they are pretty still at present hereaway. I believe that no Friends have suffered yet by the operations of the militia law here, except for muster fines; but I have heard that in some of the lower parts of the State, some have been stripped of their property considerably, and it may soon be so here. The operations of the law in case of a draft are far from being mild, but would soon deprive many industrious families of all their property, where a non-compliance takes place.

"In one letter I sent thee, I think I men-

tioned brother William had, by deputation of our Quarterly Meeting, gone to wait on the Assembly, in company with some other Friends. They reported since that they had complied with their appointment, presented our memorial, and waited upon the different branches of the Legislature until that bill containing the militia law passed through both houses; the rigors of which were much lessened before it passed; and they thought it was done, at least in part, to favor the Society; but it still has serious consequences involved in it. Whether our members will have to bear the shock, or be shielded therefrom, is still a secret, perhaps for best and wisest purposes."

For want of a convenient opportunity of sending, this letter was not forwarded for a considerable time, and when it was sent was accompanied by the following, dated 14th of 9th mo. 1813, in which an account is given of the first opening of Ohio Yearly Meeting:

"Esteemed Friend,—I seem to have but little time to spare to write to thee at present, and to help make that deficiency up, I must send a letter I wrote some time past, and intended to have taken to our Yearly Meeting to obtain a conveyance for it to thee, but I forgot it then.

"As I have mentioned our Yearly Meeting, I will go further, and say it was attended by about (I suppose) two thousand Friends, though I am ready to conclude the number was rather less, although some Friends expressed that they supposed there was three thousand or nearly. The business began on Second day, and was concluded on Sixth-day evening, the 20th of 8th mo. 1813. Attended by a considerable number of Friends from several Yearly Meetings, as New York, Philadelphia, Baltimore, Virginia and Carolina, a solemnity continued to attend the several sittings and deliberations thereof, and near the close my mind was led to view in retrospect the time when the number of Friends' families were less than ten, and when my father, one young woman and myself, were all that attended one meeting, and that the only meeting then in this western country, and less than 40 years ago, and then the first established meeting and the opening of a Preparative—after that the opening of the first Monthly Meeting in the 12th mo. 1785, some years since a Quarterly Meeting, and now a Yearly Meeting is opened attended by such a large number of Friends, and with the overshadowing solemnity so successively prevailing, that I said in my heart, how great things thou hast done, and art doing, for this thy people, O Lord! how dost thou delight to do us good; how small but a few years ago, and what a multitude now: all this brought about within the compass of my own knowledge—the opening of all those meetings I have attended, except the Preparative before mentioned.

"John Leechworth accompanied me home, we (*i. e.* my family and self) were glad of his company. I was with him at five or six of our meetings. Daniel Haviland attended most of them with his companion, Job Kinyon—what multiplied favors to us—they will be respectfully remembered here, I believe, their labors have been acceptable where I attended, and where I have heard since of them. John and I came to my house the 24th of last mo., and I parted with him at the close of a meeting at Fairfield the 29th, with desires by both of us, that when it is well with thee remember me, he was well then, I believe.

"The letter first mentioned in this, contains an account that will nearly suit the present time, both with regard to the appearance of the times and with respect to health, though I think there is less complaint now than there was then. I cannot well omit mentioning, before I conclude, that from accounts received at our Yearly Meeting, about eight young men were imprisoned in the lower part of this State, for a short time, because they when drafted, did not march with the militia, and others suffered restraint of property to the amount of several hundred dollars.

"My love affectionately to thee, thy wife and children, to I. James and his; I still remember him as in my other letter, before mentioned, is expressed. I likewise would be remembered (as thou mayest have opportunity and freedom) to many others. Farewell

"Thy friend I trust in sincerity,  
JOHN HEALD."

"Columbiana Co., Ohio, 11th mo. 1st, 1813.

"Esteemed Friend,—Thy letter of 26th of 9th mo. last, I received about two weeks after date, which was satisfactory. I have but little in view at this time to write to thee, but having, as I suppose, a favorable opportunity, thought it not best to miss writing altogether as opportunities are sometimes far apart.

"I have not heard anything from John Leechworth since he left the borders of our Quarterly Meeting. He at that time was well, and in company with Daniel Haviland and Job Kenyon, their prospects lying together, and their labors when I was with them, appeared to be in unison. These things rather relieved my mind respecting a companion, as I hoped they would be mutual helps to each other, though still it would have fitted my sentiments better, could he have been furnished with a suitable companion from home.

"I. James' love I accept cordially. Day after day I remember him with unfeigned love, desiring he may be continued an object of Divine favor. Notwithstanding I have loved many worthy men, I do not recollect that my mind, for so long a time together, so often turned to any of them as it has done to him; and that he should not be well, 'neither in body nor in mind,' as thy letter to me say he said, is an affecting account to me. I still crave for his low dwelling place to be near unto the Fountain and well-spring of life where his mind may often be refreshed and quieted, and find rest in the day of trouble. This will be a sanctuary of defence, undisturbed by the triumphs of such who may rejoice at his downfall, if any such there be which is often the case. Anthony Benezé I think, says, that 'the highest act of charity in the world is to bear with the unreasonableness of mankind,' or to this import.

"I conclude with love to thee and to thy bosom friend, and to your dear children.

Farewell, affectionately, my friends.

JOHN HEALD."

"Columbiana Co., Ohio, 5th mo. 1st, 1814.

"Esteemed Friend,—I have thought that I would prepare a few lines against the time of holding Ohio Yearly Meeting, to send thee, supposing an opportunity may offer at that time to convey them.

"I think my last letter to thee mentioned the typhus fever at Sandy Spring. The

\* The reader must bear in mind that in this illustration, it is not the whole parallax, but only the successive corrections of it, that are compared, viz., three-tenths and three-hundredths of a second respectively.

alamity had not then passed over, but a short time after showed that several young families were left without fathers, and others without mothers to provide for their necessities.

"I saw a letter which brother William had received from thee that informed of the deaths of Thomas Scattergood and Mary Harper, two friends I much esteemed, whom I sometimes had thoughts of seeing, as well as some of the rest of you, this fall; as I have an expectation of attending the Yearly Meeting in Baltimore, and the meetings in and about that part of Maryland, and in the lower part of the Delaware State, before I come to Philadelphia. I laid the matter before our last Monthly Meeting, and for anything that has yet appeared I shall be left at liberty to go, but still the concern may decline and die away, or some cause may obstruct. The Monthly Meeting has not yet done with it, and the Quarterly Meeting has all its part to do after that, and I have my business to settle or arrange, so I can only inform that the thing is in train.

"Our esteemed friend, Nathan Hunt, and companions were here, and had several large meetings in these parts, the latter part of the 3th month. Since Daniel Haviland and John Letchworth, we have had no public Friends travelling through here but these, and they attended but few of our meetings, but went to several towns and had meetings there where no Friend had before, and lengthy communications mostly, and generally well received and approved, as far as I know; though at our meeting he disapproved of much noise and shouting in time of worship, and several of the society of the Methodists were there, who have since showed a dislike to his doctrine, or rather testimony, while others say his declaration is true, and he the greatest preacher they ever heard.

"The military noise is much stilled to what it was, though there is some yet. O! how much is peace to be preferred, where no jarring, discordant sounds are heard to tire the mind with inquietude. But can we indeed expect the rod of affliction to be altogether laid by? But while my mind views the subject, I am disposed with David to say, let us not fall into the hands of man, but into the hand of the Lord.

"Farewell my friends,  
JOHN HEALD."

### Comets.

(Continued from page 123.)

### METEORIC STONES.

Although numerous instances of the fall of aerolites had been recorded, some of them apparently well authenticated, the occurrence long appeared too marvelous and improbable to gain credence with scientific men. Such a shower of rocky fragments occurred, however, on the 26th of April, 1803, at L'Aigle, in France, as forever to dissipate all doubt on the subject. Similar displays since that time have been frequently witnessed;—indeed scarcely a year passes without the fall of meteoric stones in some part of the earth, either singly or in clusters. It would not comport with the design of the present treatise to give an extended list of these phenomena. The following account, however, includes the most important instances in which the fall of meteoric stones has been actually observed:

(1.) 1478 B. C.—According to the celebrated Parian chronicle, an aerolite, or *thunder-stone*, as it was called, fell in the island of Crete, about 1478 years before the Christian era. This is undoubtedly the most ancient stone-fall on record. Meteoric masses have been found, however, the fall of which *probably* occurred at an epoch still more ancient.

(2.) 1200 B. C.—A number of stones, which were anciently preserved in Orchomenos, a town of Bœotia, were said to have fallen from heaven about twelve centuries before our era.

(3.) 1168 B. C.—A mass of iron, as we learn from the Parian chronicle, was seen to descend upon Mount Ida, in Crete.

(4.) 654 B. C.—According to Livy, a number of meteoric stones fell on the Alban Hill, near Rome, about the year 654 B. C.

(5.) 616 B. C., *January 14*.—It is related in the Chinese annals that on the 14th of January, 616 B. C., a meteoric stone-fall broke several chariots and killed ten men.

(6.) 466 B. C.—A mass of rock, described as "of the size of two millstones," fell at Egos-potamos, in Thrace. An attempt to rediscover this meteoric mass, so celebrated in antiquity, was recently made, but without success. Notwithstanding this failure, Humboldt expressed the hope that, as such a body would be difficult to destroy, it may yet be found, "since the region in which it fell is now become so easy of access to European travellers."

(7.) 465 B. C.—The famous stone called the "Mother of the Gods," and which is described or alluded to by many ancient writers, was said to have fallen from the skies. The poet Pindar was seated on a hill at the time of its descent, and the meteorite struck the earth near his feet. The stone, as it fell, was *encircled by fire*. "It is said to have been of moderate dimensions, of a black hue, of an irregular, angular shape, and of a metallic aspect. An oracle had predicted that the Romans would continue to increase in prosperity if they were put in possession of this precious deposit; and Publius Scipio Nasico was accordingly deputed to Attalus, King of Pergamus, to obtain and receive the sacred idol, whose worship was instituted at Rome 204 years before the Christian era."—*Edinburgh Encyclopedia*.

(8.) A. D. 921.—An immense aerolite fell into the river (a branch of the Tiber) at Narni, in Italy. It projected three or four feet above the surface of the water.

(9.) 1492, *November 7*.—An aerolite, weighing 276 pounds, fell at Ensisheim, in Alsace, penetrating the earth to the depth of three feet. This stone, or the greater part of it, may still be seen at Ensisheim.

(10.) 1511, *September 14*.—At noon an almost total darkening of the heavens occurred at Crema. "During this midnight gloom," says a writer of that period, "unheard-of thunders, mingled with awful lightnings, resounded through the heavens. . . . On the plain of Crema, where never before was seen a stone the size of an egg, there fell pieces of rock of enormous dimensions and of immense weight. It is said that ten of these were found, weighing 100 pounds each." A monk was struck dead at Crema by one of these rocky fragments. This terrific display is said to have lasted two hours, and 1200 aerolites were subsequently found.

(11.) 1637, *November 29*.—A stone, weighing 54 pounds, fell on Mount Vaison, in Provence.

(12.) 1650, *March 30*.—A Franciscan monk was killed at Milan by the fall of a meteoric stone.

(13.) 1674.—Two Swedish sailors were killed on shipboard by the fall of an aerolite.

(14.) 1751, *May 26*.—Two meteoric masses, consisting almost wholly of iron, fell near Agram, the capital of Croatia. The larger fragment, which weighs 72 pounds, is now in Vienna.

(15.) 1790, *July 24*.—Between 9 and 10 o'clock at night a very large meteor was seen near Bordeaux, France. Over Barbotan a loud explosion was heard, which was followed by a shower of meteoric stones of various magnitudes.

(16.) 1794, *July*.—A fall of about a dozen aerolites occurred at Sienna, Tuscany.

(17.) 1795, *December 13*.—A large meteoric stone fell near Wold Cottage, in Yorkshire, England. "Several persons heard the report of an explosion in the air, followed by a hissing sound; and afterward felt a shock, as if a heavy body had fallen to the ground at a little distance from them. One of these, a plowman, saw a huge stone falling towards the earth, eight or nine yards from the place where he stood. It threw up the mould on every side; and after penetrating through the soil, lodged some inches deep in solid chalk-rock. Upon being raised, the stone was found to weigh 56 pounds. It fell in the afternoon of a mild, but hazy day, during which there was no thunder or lightning; and the noise of the explosion was heard through a considerable district."—*Milner's Gallery of Nature*, p. 134.

(18.) 1796, *February 19*.—A stone of 10 pounds' weight fell in Portugal.

(19.) 1803, *April 26*.—This remarkable shower was referred to on a previous page. At 1 o'clock P. M., the heavens being almost cloudless, a tremendous noise, like that of thunder, was heard, and at the same time an immense fire-ball was seen moving with great rapidity through the atmosphere. This was followed by a violent explosion, which lasted several minutes, and which was heard not only at L'Aigle, but in every direction around it to the distance of 70 miles. Immediately after, a great number of meteoric stones fell to the earth, generally penetrating to some distance beneath the surface. Nearly 3000 of these fragments were found and collected, the largest weighing about 17 pounds. The occurrence very naturally excited great attention. M. Biot, under the authority of the government, repaired to the place, collected the various facts in regard to the phenomenon, took the testimony of witnesses, &c., and finally embraced the results of his investigations in an elaborate memoir.

(20.) 1807, *December 14*.—A large meteor exploded over Weston, Connecticut. The height, direction, velocity and magnitude of this body were discussed by Dr. Bowditch in a memoir communicated to the American Academy of Arts and Sciences in 1815. The appearance of the meteor occurred about 6h. 15m. A. M.,—just after daybreak. Its apparent diameter was half that of the full moon; its time of flight, about 30 seconds. Within less than a minute from the time of its disappearance three distinct reports, like those of artillery, were heard over an area several miles in diameter. Each explosion was followed by the fall of meteoric stones. Unlike most aerolites, these bodies when first found were

so soft as to be easily pulverized between the fingers. On exposure to the air, however, they gradually hardened. The weight of the largest fragment was 35 pounds.

(21.) 1859, November 15.—Between 9 and 10 o'clock in the morning an extraordinary meteor was seen in several of the New England States, New York, New Jersey, the District of Columbia, and Virginia. The apparent diameter of the head was nearly equal to that of the sun, and it had a train, notwithstanding the bright sunshine, several degrees in length. Its disappearance on the coast of the Atlantic was followed by a series of the most terrific explosions. It is believed to have descended into the water, probably into Delaware Bay. A highly interesting account of this meteor, by Professor Loomis, may be found in the *American Journal of Science and Arts* for January, 1860.

(To be continued.)

*Incident from the Life of Geraldine Denning.*  
—When waiting for a few minutes on a platform once in Norfolk, a Friend directed her attention to an unconverted man standing on the opposite side of the line, saying, "He is very hard to reach with the Truth." He was a gamekeeper, and was accompanied by a retriever dog. She quickly crossed the line, went up to him, and stroking his four-footed friend, said cordially, "What a beautiful dog you have here!" "Yes!" said the man rather gruffly; "but take care he don't bite you. He is not fond of strangers!" "O! he won't bite me. Dogs know who are fond of them; no doubt you are very fond of him?" "That I am!" "Do you feed your dog?" "Yes, ma'am!" "House him?" "Yes, of course!" "Does your dog obey your word of command?" "Yes, ma'am!" "And you would be disappointed if he did not love and obey you?" "That I should," then looking proudly at his dog, "but Rover does love his master," and he patted the dog's head as he looked up trustfully in his face. "Would you be grieved if he followed a stranger?" "Yes," he replied, rather impatient at so many questions. "Ah!" said she, in a sad, tender reproachful tone, "you ungrateful sinner, what a lesson does that dog teach you! God has fed you, housed you, cared for you, loved you these many years—but you do not love or obey Him—you do not follow Him! He so loved you that he gave His only begotten Son to die on the cross for your sins, and yet you never have loved Him in return! You follow a stranger, Satan is your chosen master. The dog knows its owner—you know not yours! Truly may it be said of you, 'the ox knoweth its owner, and the ass its master's crib; but Israel doth not know, my people doth not consider!'" She looked sadly, yet kindly, at him, as she earnestly uttered these words. His eyes filled with tears—he fixed them on his dog, and in a choking voice said, after a few moments, "Ah! Rover, Rover! thou hast taught thy master a lesson this day! I have been an ungrateful sinner, but, by God's help I'll be so no longer." The train was just arriving, so quoting a few of the precious promises of Scripture, she bade him adieu with a shake of the hand. That evening the gamekeeper was found for the first time in a prayer meeting, crying, "God be merciful to me, a sinner," and soon he was rejoicing in a sense of pardon through the precious blood of Christ.

Selected.

#### TOO SOON?

Too soon for me, I know.  
Came the sharp summons—but, beloved, for thee,  
Thy spirit wings outstretched, and plumed to go,  
Too soon it could not be.

Was it too soon to take  
Thy place amid the glory and the light  
Of the eternal city, and awake  
Where there is no more night?

Too soon to quaff the tide  
Of life's pure river? or on that bright shore  
To wander with the loved and glorified,  
Gone but awhile before?

Up, where no storms may beat,  
Above the stars—beyond the sapphire dome,  
All sorrow ended, and all joy complete,  
Thou'rt safe, beloved, at home.

Safe, from this place of tears,  
Safe from the touch of time, the taint of sin;  
Where there are no more conflicts, no more fears,  
I know thou'rt entered in:

Entered the realms of peace,  
The many mansions of perpetual joy,  
Where hymns of heavenly harpers never cease,  
And bliss hath no alloy.

There, the glad notes prolong  
Of praise, that echoed with thy failing breath,  
Breaking triumphant from thy faltering tongue,  
E'en in thine hour of death.

Why should this parting grieve?  
Why this sad weeping while we kiss the rod?  
O selfish sorrow! when we must believe  
Thy blessedness with God?

Peace, troubled heart, 'tis best;  
Life's struggle over, and his arms laid down,  
To the worn pilgrim comes the hour of rest,  
The palm-branch and the crown.

M. N. M.

Selected.

#### YOUTH RENEWED.

Fancies again are springing,  
Like May-flowers in the vales;  
While hopes, long lost, are singing  
From thorns like nightingales;  
And kindly spirits stir my blood,  
Like vernal airs, that curl the flood:  
There falls to manhood's lot  
A joy which youth has not,  
A dream more beautiful than truth,  
Returning Spring, renewing Youth.

Thus sweetly to surrender  
The present for the past,  
In sprightly mood, yet tender,  
Life's burden down to cast,  
This is to taste, from stage to stage,  
Youth on the lees refined by age;  
Like wine well kept and long,  
Heady, nor harsh, nor strong,  
With every annual cup is quaff'd  
A richer, purer, mellowed draught.

James Montgomery.

To all the inhabitants of England, and to all that dwell upon the earth.

God alone is the Teacher of His people. He hath given to every one a measure of grace, which is the Light that comes from Christ. It checks and reproves for sin. All who wait in that Light, come to know the only true God and Father of light, in Christ Jesus, who is the way to Him. This I witness to all the sons of men:—that I came not to the knowledge of eternal life by the letter of the Scripture, nor by hearing men speak of the Name of God. I came to the true knowledge of the Scriptures, and to the eternal rest in Christ of which they testify, by the inspiration of the Spirit of Jesus, the Lion of the tribe of Judah, who alone is found worthy to open the seals of the book.—*William Deusbury.*

#### Unprofitable Reading.

"You cannot afford to read such books," was the remark of a sagacious gentleman to a young friend, whom he saw constantly occupied with fictitious literature. The caution has a world of wisdom in it. The young *cannot afford* to give all, or even the half of the time they have for reading, to the fascinating pages of fiction. And yet, let the sales of booksellers, the issues of magazines, and the shelves of the circulating and the public libraries be examined, and it will be found that the perusal of fictitious works far exceeds that of useful publications. Youth is man's opportunity. The mind has only a given capacity, and if that is filled with fiction, it finds small place for admission. Surprise is sometimes expressed that industrious young men and women, who read very little in comparison with voracious novel readers, happen to be better informed and more capable in business than some who fancy themselves of literary tastes, and who have the reputation of being "bookish" young people. The fact is that these apparent non-readers are practical and observant persons. They have some clear aim in life, and pursue it by attaining knowledge. Part of their improvement is gained by observation, and more by thought and reasoning. They do read; but it is with an object, and if the amount in pages is small, that small amount is well digested and applied. They take up books for a purpose and with an object; and discard such promiscuous reading as does not minister to the end they have in view. They have no taste for mere fiction, as fiction; and what few works of imagination they care to read are such as illustrate the truth. Mere tissues of wild invention, resting on impossible machinery and ending in startling catastrophes, presenting details of crime and plots woven with exciting sin, have no charm for those who ask themselves whether they can *afford* to read a book. It is a rare accomplishment to be able to peep into an exciting volume, and give it a toss aside, if it proves unworthy of the time it would occupy. Many persons seem to think that to begin a volume commits them in honor and honesty to go through with it. Yet one is no more bound to do this than he is to make a hearty meal upon food which he knows is unwholesome.

The too prevalent error is in permitting light reading to displace the more solid and really useful. There is hardly a young man in business to-day in the United States who could not find volumes treating of his particular calling, or upon subjects pertinent to it. The perusal of these works would give him the benefit of the experience of others, and make him at five-and-twenty better informed in his daily work than he could become by his own experience without such aids in some form at five-and-forty. Few avail themselves of this opportunity. But those few are the successful men. The world calls them lucky. Say, rather wise. They are prudent, and know what they cannot *afford*.

Look at this matter in a more general light, and one that concerns everybody. How many are there among those who "talk politics" who are acquainted in any proper degree with the history of their country, and with the true science of politics? How many have studied the facts and theories which underlie the questions of public policy which are continually presented to the voting public? A

general knowledge of these subjects, gained by reading original authorities, ought to form part of every man's self-acquired education, and also some knowledge of the laws and customs which bear upon his own business. The young especially cannot afford to be without this description of useful knowledge, and yet there are thousands to whom the idea of acquiring it never occurs.

In the matter of fitness for companionship, and ability to converse, power to impart knowledge, and to appreciate and receive it, judicious reading is indispensable. Facts for the foundation, imagination for the embellishment, and a judicious blending of the useful and ornamental for the furnishing, constitute proper mental structure. It is to the rearing of this that youth should be devoted—the youth including moral as well as mental science. The excessive pursuit of fiction will not answer the conditions. So, young men, think yourself, before you enter upon the next sensational novel, "Can I afford it?"

### Scientific Notes.

For "The Friend."

The Pittsburg "Iron World" says, the most powerful pair of engines in the world, are in course of construction in that city. They are designed to raise water into the Highland reservoir, an altitude of 365 feet. Reducing the capacity of some of the largest pumping engines in the world to a uniform lift of one foot high in twenty-four hours, it is found that one at the Lehigh zinc mines, will lift 3,600,000 gallons; the pair at the Chicago water works, 4,500,000,000 gallons; the pair at Haarlem, Holland, 1,000,000,000 gallons. The new Pittsburg engines are expected to lift 14,240,000,000 gallons. The pair will weigh 1,500 tons, and cost \$42,550.

**Hydraulic Forging.**—One of the recent improvements in the working of iron, is the application of the endward pressure, which can be given by the hydraulic press to the forging of heavy masses of iron, as a substitute for the ordinary steam-hammer. It is said to dispel the scoria, and make perfect welding of the heated surfaces.

There is a building for worship at Bergen, large enough to contain nearly 1,000 persons, made of paper. It is circular in shape. The staves outside, and the statues within, the roof, the ceiling, the Corinthian capitals, are all of paper-mache, rendered water-proof by saturation in vitriol, lime water, whey and white of egg.

For disinfecting the air of sick-rooms, chloride of lime and acetic acid, are said to be the best materials. For rendering harmless excrementitious matter, salts, such as copperas, combined with alumina and lime, are recommended—as being effectual and cheap.

The losses incurred by the German armies during the late war, have been published in tabulated form by Captain Leclerc, a French officer, who undertook this work during his captivity in Prussia. The materials were obtained from various lists published by the Ministers of War. It is stated that, from the 1st of 7th mo. to the 3d of 9th mo., the four German armies lost 74,786 men. The investment and siege of Paris, from 15th of 9th mo., 1870, to 28th of 1st mo., 1871, involved a loss of the German armies of 11,710 men.

The spectroscope has been recently applied to determining the velocity with which the different stars approach or recede from us.

When the star is moving towards our system, the lines in its spectrum are shifted toward the violet end; and when moving from us, toward the red end of the spectrum. By observing the amount of displacement we can estimate the velocity. Dr. Huggins has made some observations from which he calculates that some of the stars of the Great Bear are receding from us at about nineteen miles per second.

For sometime past, a novel plan for administering cod-liver oil, has been successfully practiced in Paris at a children's hospital, to which about 300 small loaves are daily supplied, each containing a small portion of this oil. A writer in the "English Mechanic" says, he has tested the plan with satisfactory results. His wife every week makes a large loaf, which is nowise unpalatable. She mixes three table-spoonfuls of the oil with a quantity of warm milk, using as much flour as is necessary to form a dough, which is improved by thorough kneading like other bread. She adds the usual allowance of salt, and a small portion of brown sugar. The plan is recommended for those to whom the oil is prescribed, and whose stomachs refuse to take it in the ordinary way.

Of 100 boys, between 12 and 16 years of age, who were employed in a tobacco factory near Vienna, 72 fell sick during the first six months.

Owing to the destruction of the native dogs in Australia, by the sheep-farmers, kangaroos are said to increase so fast, as to be quite a nuisance.

A Vienna manufacturer, Brunfaunt, has made some recent improvements in spinning glass. After many trials, he discovered a composition which may be made into curled or frizzled yarn. The frizzled threads surpass in fineness the finest cotton, and appear almost as soft and elastic as silk lint. The woven-glass flock wool has quite recently been used as a substitute for ordinary wool wrapping, for patients suffering from gout, and its use for this purpose is said to have been successful. The smooth threads are now woven into textile fabrics, which are made into cushions, carpets, tablecloths, shawls, &c. The glass yarn approaches silk in softness, and to the touch is like the finest wool or cotton. It possesses remarkable strength, and it remains unchanged in light and warmth, and is not altered by moisture or acids. Being incombustible, it is especially valuable for making dress materials. The composition of the materials is still a secret, and the spinning requires extraordinary attention. This part of the business is said to be very trying to the sight.

**A Little Every Day.**—A few of us students had obtained permission to take our meals every day with a private family in the town. We waited for every meal from five to ten minutes; a fragment of time which we usually expended in chatting, joking, and skylarking. A large scientific work in royal octavo lay on the table—probably the only book treasure of the house. Several of us expressed a desire to read it, but regretted the lack of time and opportunity. One of our number, however—a silent, studious sort of chap—quietly took up the volume, nibbled at the title-page, glanced over the table of contents, and attacked the preface. In a moment more he was called to the table, and after eating, was out with the

rest of us. At the next meal, he resumed his reading where he had left off, and so on from time to time, until the continuity and steady purpose of his occupation attracted attention and exposed him to many a volley of chaffing from his companions. He only smiled, and went on with his reading, while we went on with our usual chit-chat, until at last we forgot to notice him at all. The winter passed away; the spring approached; and the last dinner-bell of the term had just left its final clatter in the air, when the young tortoise-plodder in the big octavo closed its covers together with an emphatic slap, and an announcement of "the end." All the rest of us had wished to master the book, but hadn't had the time; he, by reading a little three times a day, had transferred its entire contents to his head.—*Christian Union.*

### White Wheat.

For "The Friend."

Having occasion to prepare some crushed wheat for an invalid, I wended my way to a miller in our parts, and asked for white wheat, as being peculiarly fitted for the necessities of the occasion. He had none, but said he looked for some peculiarly nice on the arrival of his team, that day. I called again on the morrow, and when he untied his sack, told him that was just what I wanted. Indeed, the round, plump seeds were beautiful and inviting, and I gladly carried home my prize.

A mill was procured, and seated in my chair, I began to fill the hopper with the newly purchased wheat: but as I poured it out, little by little, my watchful eye caught sight of a grain that evidently did not belong there:—a poor, thin, unpromising seed, indeed. It was removed. Soon another, and yet another, presented, and were also carefully culled out:—they were *cheat*. After a time the hopper was full and I began slowly to grind my wheat, but all the while the impression—amounting to a certainty—rested with me, that more or less of cheat was still mingled with my beautiful grains.

The next charge was carefully inspected also, and I began to perceive that a few larger, darker colored grains were also present: good, sound wheat, happily, but not of so pearly, pure a white as the original package was intended to be; but they were good wheat, and so, though their presence might darken the final result of my grinding a little, I let them pass.

But there was still a third kind of grain met my now watchful eye—small—seemingly white—but so thin that it required examination to detect what they were. Evidently they had started in growth to become grains of white wheat, like those they were mingled with, but blasting had come upon them—probably the *fly* had infested their early growth, and they had become withered grains, husks indeed, but no life sustaining starch within: vitality had fled.

As I sat and patiently turned the handle of my little mill, I fell to musing on the contents of that hopper. How like the professing christian church seemed the cup-full before me. Carefully culled perhaps the community may be, by anxious watchers—caring for souls as they that shall give account; many false ones, cheats, removed from their midst, yet, despite their care, still containing some that escape their vigilance, and mar, by their incongruity and wrong doing, the perfect har-

mony of the church. Causes of mourning and blushing to the honest-hearted members who must bear the reproach brought on the truth by these unfaithful ones.

The dark wheat may well resemble some whom we find in every religious community, who are honest seekers after salvation: whose hearts cling to the hopes of the gospel: whom their fellow-believers recognize as one with them, and whom they yet find weak in the faith: needing a watchful care, a leading by the hand, lest they go astray. Ready to halt, yet always keeping their faces Zion-ward, they need and gratefully accept, the proffered sympathy, aid, and encouragement of more favored members of the church. It may be in the language of Nicholas Wain, "maimed in both their feet, they can sit at the King's table, and eat of the King's meat, but they cannot do the King's commandments,"—yet these, despite many haltings by the way, under the kind and fostering care of truly spiritual brethren, in the end attain the desire of their souls; through much tribulation, entering those mansions where the wicked cease from troubling and the weary are at rest.

But the withered grains! my reflections on them were sad. Some persons start on the Christian journey fair and promising: thought by their friends, doubtless thinking of themselves, that a life of religious usefulness is before them. Looked upon by elder brethren as those who will be ready to come forward and take their places in the church militant, as honest standard-bearers for the cause of Truth. And yet the watchful eye of these gifted fathers look in vain for that bringing fruit to perfection which is the mark of Christian growth. The form of godliness is there, but the life is gone. Having a name to live, they are dead. Some of these know their degenerate state, and for shame sake will not own it. If we look over a grain field as the wheat ripens for harvest we will find the fruitful heads, bowed by the weight of their valued seed, bending over with a seeming humility, while those stems in which are found the withered seed stand upright with unbending forms. So, too often, it is with these blighted ones. Proudly holding their heads above their fellows, yet useless cumberers of the church. These, if we could read their secret history, have some sin—some departure of soul—that, like the worm in the wheat, has silently preyed on the vitality of their religion, till, little by little, life has become extinct; leaving indeed the form, the husk, but nothing else.

Dear reader—let us strive so to live, that when the sheaves of corn, fully ripe, are gathered by the Lord of the Harvest, we may indeed be found, white wheat, ready for the heavenly garner. W.

*The Element of Success.*—The success of almost every enterprise depends upon the degree to which those engaged in it tax their powers of mind. Many things deemed impossible by the rest of the world have been effected by those who brought the full force of their minds to bear upon what they set themselves to accomplish. Whatever may be said of the difference in talent of individuals, if we inquire into the cause of their success, we shall find genius outstripped by moderate talent when the latter brings its full powers of mind to the work. Whether in the school-room or in every-day business of life; in the humble walks of bodily toil, or the professional avoca-

tions; in invention or execution, in theory or practice, the question on which success depends is not who has the strongest power of mind but who brings that power into use.

#### Physical and Intellectual Life.

The following article from a recent work entitled "Intellectual Life," by Philip Gilbert Hamerton, contains much that is valuable as well as interesting to a large class of our readers.

The incompatibility between our physical and intellectual lives is often very marked, if you look at small spaces of time only; but if you consider broader spaces, such as a lifetime, then the incompatibility is not so marked, and gives place to a manifest conciliation. The brain is clearer in vigorous health than it can be in the gloom and misery of sickness; and though health may last for a while without renewal from exercise, so that if you are working under pressure for a month, the time given to exercise is so much deducted from the result, it is not so for the life's performance. Health sustained for many years is so useful to the realization of all considerable intellectual undertakings that the sacrifice to the bodily well being is the best of all possible investments. Franklin's theory about concentrating his exercise for the economy of time was founded upon a mistake. Violent exertion for minutes is not equivalent to moderate exercise for hours.

The desire to concentrate good of various kinds into the smallest possible space is one of the commonest of human wishes, but it is not encouraged by the broader economy of nature. In the exercise of the mind every teacher is well aware that time is an essential factor. It is necessary to live with a study for hundreds and thousands of hours before the mind can assimilate so much of the subject as it may need; and so it is necessary to live in exercise during a thousand hours of every year to make sure of the physical benefits. Even the fresh air itself requires time to renovate our blood. The fresh air cannot be concentrated; and to breathe prodigious quantities of it which are needed for perfect energy we must be out in it frequently and long.

The inhabitants of large cities have recourse to gymnastics as a substitute for the sports of the country. These exercises have one advantage—they can be directed scientifically, so as to strengthen the limbs that need development; but no city gymnasium can offer the invigorating breeze of the mountain. We require not only exercise but exposure—daily exposure to the health-giving inclemencies of the weather. The postman who brings my letters walks 8,000 miles a year, and enjoys the most perfect regularity of health. There are operatives in factories who go through quite as much bodily exertion, but they have not his fine condition. He is as merry as a lark, and announces himself every morning as a bearer of joyful tidings. What a postman does from necessity an old gentleman did as regularly, though more moderately, for the preservation of his health and faculties. He went out every day; and as he never consulted the weather, so he never had to consult the physician.

Nothing in the habits of Wordsworth—that model of excellent habits—can be better as an example to men of letters than his love of pedestrian excursions. Wherever he happon-

ed to be he explored the whole neighborhood on foot, looking into every nook and cranny of it—and not merely in the immediate neighborhood, but extended tracts of country; and in this way he met with much of his best material. Scott was both a pedestrian and a equestrian traveller, having often, as he tells us, walked thirty miles or ridden a hundred in those rich and beautiful districts which afterwards proved to him such a mine of literary wealth. Goethe, to a wild delight of all sorts of physical exercise—swimming in the Ilm by moonlight, skating with the mer- little Weimar court on the Schwanssee, riding about the country on horseback, and becoming at times quite outrageous in the exuberance of his energy.

Alexander Von Humboldt was delicate in his youth, but the longing for great enterprises made him dread the hindrances of physical insufficiency, so he accustomed his body to exercise and fatigue, and prepared himself for those wonderful explorations which opened his great career. Here are intellectual lives which were forwarded in their special aims by habitual exercise; and, in earlier ages, have we not also the example of the greatest intellect of a great epoch, the astonishing Leonardo da Vinci, who took such a delight in horsemanship that although, as Vasari tells us, poverty visited him often, he could never sell his horses or dismiss his grooms.

For "The Friend"

The following extracts are taken from a volume entitled "Adventures and Discoveries of Dr. David Livingstone and the Heri Stanley Expedition." Published by Hubbard & Bro., Philadelphia and Boston, by subscription, and sold at West Chester, Pa., by an intelligent and modest colored man by the name of Parker Denny, a graduate of Lincoln University. On the whole it is an interesting volume of travels, and shows some interesting traits in the character of D. Livingstone.

On page 9, D. L. says: "Time and travel have not effaced the feelings of respect I inspired for the humble inhabitants of my native village. For morality, honesty and intelligence, they were, in general, good specimens of the Scottish poor. In a population of more than 2000 souls, we had, of course, a variety of character. In addition to the common men of men, there were some characters of sterling worth and ability, who exerted a most beneficial influence on the children and youth of the place, by imparting gratuitous religious instruction. The name of one worthy man was David Hogg, who addressed me on his death-bed with these words: "Now, lad, make religion the *every day business of your life*, and not a thing of fits and starts; for if you do not, temptation and other things will get the better of you."

On page 36, he says: "The Bechuana Chief of the Lake region, who had sent me to Sechele, now sent orders to all the people on the river to assist us, and we were received by the Bakoba, whose language clearly shows that they bear affinity to the tribes in the north. They call themselves Bazeiye, i. e. *men*; but the Bechuans call them Bakoba, which contains somewhat the idea of slaves. They have never been known to fight, and, indeed, have a tradition that their forefathers in their first essays at war, made their bows of the Palma Christi; and when they broke, they gave up fighting altogether. They have

riably submitted to the rule of every tribe which has overrun the countries adjacent to the rivers, on which they especially love to dwell. They are thus the Quakers of the body politic of Africa."

The renewed attention of Friends is called to the following works for sale at

## FRIENDS' BOOK STORE.

Wel's History of the People called Quakers.  
Journal of the Life and Travels of George Fox.  
Barclay's Apology for the True Christian Divinity.  
Journal of John Richardson.

Picture Pages for Little Children.

Dissipation, sorrow, and loss, are the companions of Reuben, however large degrees of strength and excellency may at times appear.—  
Fothergill.

## THE FRIEND.

TWELFTH MONTH 13, 1873.

"I saw there was no remedy; either I must be buried by that fiery baptism of Christ with him into death, or else there could be no rising with him into newness of life; *there might be a rising into newness of profession, notion and words*, but that would not do; it was *newness of life* I must come to; the other I had tried over and over. I saw that I must die with Him, or be planted with Him in the likeness of death—that is die unto sin—if ever I came to be planted with Him in the likeness of his resurrection, and so live unto God."

This is the testimony of one of the early Friends, who, under a sense of the need to have the work of salvation wrought out, had tried the form of religion professed by many different religious societies, had himself made a full acknowledgment, of what Christ had done for him, without him, and was well versed in the knowledge of the sacred truths recorded in the New Testament; but had found that all these failed to prevent his being conformed to the spirit and precepts of the world, and to transform him by the renewing of his mind.

But, he says, that when he was made willing to give heed to the reproofs of instruction communicated in the silence of all flesh, under the clear in-shining of the Light of Christ in his soul, there was opened to him "a true discovery of the tree of knowledge in the mystery, upon which I saw that I had been feeding with all the carnal professors of religion, and how we had made a profession of that which we had no possession of; but our souls were in the death; feeding on the *talk* of that which the saints of old did enjoy."

This is in accordance with the doctrine of Christ and his apostles, and it remains to be unchangeably true. "I am the light of the world; he that followeth me shall not walk in darkness, but shall have the light of Life." "He that doeth truth cometh to the light that his deeds may be made manifest that they are wrought in God." Faith in this "true Light," and obedience thereto, are essential to being brought out of the natural state of ignorance and darkness, and receiving that knowledge of God and of Jesus Christ whom He hath sent, which is life eternal. The knowledge of the Father or of the Son obtained by reading, through teaching, or in any other way than by this in-shining of the Holy Spirit, is powerless for the salvation of the soul. "He came unto his own and his own received him not; but as many as received him, to them gave He power [the privilege, as one translation has it] *to become the sons of God.*" These must be born "Not of blood, nor of the will of the flesh, nor of the will of man, but of God."

Saving faith in Christ, both as to what He has done for man's salvation when personally on earth, and as He is manifested within, the hope of glory; must be of "the operation of God," as He "worketh in us to will and to do of his own good pleasure;" and it is this kind of faith alone, which ever has been and ever will be the saint's victory. "The carnal mind is enmity against God; and is not subject to the law of God; neither indeed *can be.*" It may, indeed, say much about the free salvation purchased by Christ, and that man is reconciled by his death, and justified by his resurrection; but it is the carnal mind still, and

with all its high sounding profession, is enmity with God, and not subject to his law written on the heart. It is this "carnal mind" that must be crucified, buried, as is said in the above quotation, by that fiery baptism of Christ with him unto death, if ever we know what it is to be raised with and by Him into newness of life. All other professions of conversion are but "a rising into newness of profession, notion and words."

It is this doctrine of becoming children of the resurrection, heirs of God and joint heirs with Christ, through obedience to the Grace of God manifested in the soul, that Friends, from their beginning have, as living witnesses, borne testimony to. George Fox says, he rejoiced when he was sent forth to preach the gospel and kingdom of Christ, that he was commanded to turn people to this Light, Spirit or Grace, by which all men might know their salvation, and their way to God. He was to turn them from *their own ways*, to Christ the new and living way. By obedience to this Light of Christ, and only by obedience to it, we can know what it is to be reconciled to God through the death of his Son; to experience repentance and forgiveness of sins, through the merits of that most acceptable sacrifice which He made on Calvary, and arrive at that sanctification and perfection spoken of by the apostle, where he says: "For by the one offering He hath perfected forever them that are sanctified." For however much knowledge of the coming, life, sufferings and death of the Saviour, we may store up in the head, by study and research, it will avail nothing towards making us partakers of the salvatory benefits purchased by them, unless the Holy Spirit whom He promised to send, shall take of the things of Christ, show them unto us, and apply them to our condition. Let no man separate what God hath joined together. "If we walk in the Light, as God is in the Light, we have fellowship one with another, and the blood of Jesus Christ, his Son, cleanseth us from all sin."

Speaking of their growth in grace, the same Friend of whom we have spoken says: "Thus things opened wonderfully in us, and we saw not only common sins, which most confess to be so, but still live in them—but also the hypocrisy and sinfulness of the professors of religion, even in their religion, when performed out of the true Spirit, Grace and Life, which, in the mystery, is the salt that every gospel sacrifice is to be seasoned withal, according to the example in the figure." \* \* "Being cleansed and made meet, we came to have great delight in waiting upon the Word in our hearts, for the milk thereof, which Peter speaks of. In so waiting, we received the virtue thereof, and grew thereby, and were thus fed with the heavenly food that rightly nourished our souls; and so we came to receive more and more of the Spirit, Grace or Life from Christ our Saviour, in whom all fulness dwells. Thus we came to know the true Teacher, which the saints of old did witness; and therefore never wanted a teacher, nor true Divine instruction, though we had left the hiring priests and the high-flown notionists, and sat down together in silence; for this was our desire, to have all flesh silenced before the Lord and his power, both in our hearts and from without."

Would that the members of our religious Society were more generally acquainted with this inward transforming work, this waiting

upon the minister of the Sanctuary, in his appearance to the soul; then would there be known more fruit-bearing branches among us, more true *believers* in Christ, and less flippant talk about being engaged in his work and service; less equivocal assumption of extraordinary manifestations of his presence and power.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The crew of the *Loch Earn*, which ran down and sunk the *Ville du Havre*, were landed at Plymouth, Eng., about two weeks after the collision. The captain of the *Loch Earn* says, after first sighting the steamer, and seeing that she was coming dangerously near, he rang the ship's bell and ported his helm to starboard, but the steamer came right across the *Loch Earn's* bows. The captain and crew of the *Loch Earn* were brought into port by the *British Queen*, which took them off the ship on the 29th ult., at which time she was in a sinking condition. The captain of the *Loch Earn* considers that a great loss of life resulted from the fact that his vessel drifted such a long distance from the steamer after the collision, before it was possible to shorten sail, and from the tardiness of the steamer in showing signals. Among the passengers on the *Ville du Havre* were a number of the delegates to the late meeting of the Evangelical Alliance, who were returning to their homes. The lost steamer was, it is said, one of the best finished vessels ever built on the Clyde, and also the largest, with the exception of the *Great Eastern*. Her tonnage was 5500, length 430 feet, beam 48 feet, and depth of hold 40 feet.

Spanish affairs seem to be nearly unchanged. The siege and bombardment of Cartagena continue. The insurgents are still as defiant as ever, and made a sortie from the city on the 5th inst. Military operations in the north of Spain are temporarily suspended. Don Carlos has taken up his winter quarters at Durango, a town in the province of Biscay, thirteen miles south-east of Bilbao. His brother, Don Alfonso, has gone to Paris.

In order to comply with the conditions of the agreement made with the United States, the Madrid government telegraphed to the Capt. General of Cuba, directing the *Virginus* to be delivered up. This measure caused great excitement and indignation in Havana, and General Jonvellar, the Captain General, refused to obey the order, alleging that the immediate delivery of the *Virginus* would cause a frightful convulsion throughout the island, and be attended with disastrous consequences. If insisted upon he must resign his position, and demand that another person be sent in his place who can carry out the orders of the government. The effervescence however subsided in a few days. A Havana dispatch of the 6th says: The feeling in this city continues to improve, and opposition to the delivery of the *Virginus* is decreasing. Prominent Republicans and many Conservatives are in favor of the delivery of the steamer, and advise a cessation of the opposition thereto. A Havana dispatch of the 8th says: Captain General Jonvellar authorizes the statement that the island is tranquil. He has no doubt that all will be arranged peaceably.

The arguments for the prosecution in the Bazaine trial have been brought to a close. The degradation of the accused is demanded, and afterward his execution. On the 6th the closing argument in defence of Bazaine commenced.

Bartholdi, now first secretary of the Legation at St. Petersburg, has been appointed French Minister at Washington, to succeed the Marquis de Noailles, who will be transferred to Rome.

A motion to censure the government for continuing the state of siege in Paris, was voted down in the Assembly, 407 to 273.

Archbishop Leischowski replies to the demand of the German government for his resignation, refusing to comply. He declares that he is responsible only to the Pope.

A Vienna dispatch says it has been decided not to demolish the exhibition building, but to keep it for public use, like the Crystal Palace of London.

Australian advices show a satisfactory condition of business in those colonies. The building trades cannot find hands enough to complete contracts. All occupations are active, good workmen are never out of work, and a sufficient number of domestic servants are not to be obtained at any wages.

The London Hour says it has trustworthy information that by a privately expressed wish of Pius IX, the cardinals have been in consultation, and have selected

Cardinal Pecci, Archbishop of Perugia, for the next Pope. He was born in 1810, and became Cardinal in 1853.

The German authorities have closed the Augustine College and the Theological Seminary of the Roman Catholic diocese of Munster, for failing to comply with the ecclesiastical law enacted recently.

Reinforcements have been sent from England to the troops under Sir Garnet Wolseley, in Africa.

An imperial ukase has been issued in St. Petersburg, requiring that six men out of every one thousand inhabitants of Russia, including the Polish provinces, shall be drafted into the army.

Advices from the city of Mexico say that the United States Minister had waited on the President, and formally presented the congratulations of the United States on the adoption by the Mexican Congress of the amendments to the constitution. The minister declared these amendments would contribute materially to secure and increase the general prosperity without weakening the great interests of religion.

**UNITED STATES.**—The interments in Philadelphia last week numbered 251, and in New York 525.

The mean temperature of the Eleventh month, in Philadelphia, by the Pennsylvania Hospital record, was 39.34 deg. The highest during the month was 60 deg., and the lowest 23 deg. The amount of rain for the month 4.99 inches. The rain fall of 1873 has already amounted to 56.47 inches.

The President's message, sent to Congress at the opening of the session, refers at some length to the relations with Spain. The outrage on the *Virginus* induced him to authorize the Secretary of the Navy to put the navy on a war footing, trusting to Congress and public sentiment to justify and sustain him. He believes that slavery is the sole cause of all the outrages and troubles in Cuba. The Spanish government has liberated the slaves in Porto Rico, and also several thousand persons in Cuba, who were illegally held in bondage; but the reactionary slaveholders in Havana have thus far been able to defeat all measures for the abolition of slavery in the island. The President suggests an amendment to the Constitution to authorize the Executive to approve of so much of any measure passing Congress as his judgment may dictate, without approving the whole, the disapproved portions to be referred back under the same rules as now; and also that there shall be no legislation by Congress during the last twenty-four hours of its session except upon vetoes, and that when an extra session is called, legislation shall be confined to the special subject submitted in writing by the Executive. The policy towards the Indians which commenced early in his administration, will be adhered to, and continued with only such modifications as time and experience may show to be necessary.

The receipts of the government from all sources for the fiscal year ending 6th mo. 30th last, were \$333,738,204, and expenditures on all accounts \$290,345,245, thus showing a surplus of \$43,329,959. But it is not expected that the next exhibit will show such a favorable condition of the finances. The financial panic has caused a serious interruption of business and the revenues have fallen off heavily. The Secretary of the Treasury anticipates a considerable deficiency of income. He recommends an increase of taxation and retrenchment in appropriations and expenditures.

The President has nominated Attorney General G. H. Williams, of Oregon, to be Chief Justice of the Supreme Court, and B. H. Bristow, of Kentucky, to be Attorney General.

A table accompanying the annual report of the Comptroller of the Currency shows that the national bank currency is distributed thus: New England, \$110,489,966; middle States, \$124,608,130; southern and southwestern States, \$33,160,308; western States, \$78,785,148; Pacific States and Territories, \$1,924,038.

Many bills and resolutions have been laid before Congress, including several in relation to the currency. Among others one by Senator Morrill, of Vermont, instructing the Committee on Finance to report a bill for free banking and resumption of specie payments on First mo. 1st, 1875.

The Senate has confirmed a long list of Presidential nominations for various offices.

The House of Representatives, by a vote of 141 to 29, has passed a bill removing all disabilities imposed and remaining on any person by reason of the sixteenth article of the amendment to the Constitution.

**The Markets, &c.**—The following were the quotations on the 8th inst. *New York*.—American gold, 109½. U. S. sixes, 1881, 114; ditto, 1865, 113½; 10-40 five per cents, 109½. Superfine flour, \$5 a \$6.10; State extra, \$6.50 a \$6.95; finer brands, \$7.25 a \$10.25. No. 2 Chicago spring wheat, \$1.50 a \$1.52; No. 3 do., \$1.47;

No. 1 Milwaukie, \$1.60; white Michigan and Canadian, \$1.85. State barley, \$1.65. Oats, 54 a 57 c State rye, \$1.03. Western mixed corn, 76½ cts.; yellow 78 a 79 cts. *Philadelphia*.—Uplands and New Orleans cotton, 16½ a 17½ cts. Cuba sugar, 7½ cts. Standard white petroleum, 13 a 13½ cts. Superfine flour, \$4.50 \$5; extras, \$5.75 a \$6.25; finer brands, \$6.50 a \$10. White wheat, \$1.75 a \$1.80; amber, \$1.65 a \$1.68; red \$1.55 a \$1.60. Yellow corn, 75 a 78 cts. Oats, 48 53 cts. Sales of about 2000 beef cattle at 7 a 7½ cts. per lb. gross for extra, 5½ a 6½ cts. for fair to good, and 4 5 cts. for common. About 10,000 sheep sold at 4½ a 5 cts. per lb. gross, and 7,000 hogs at \$7 per 100 lbs. *Chicago*.—No. 1 spring wheat, \$1.14; No. 2 do., \$1.12 No. 3 do., \$1.04 a \$1.05. No. 2 mixed corn, 51½ c Oats, 38½ cts. No. 2 fall barley, \$1.43. Lard, \$½ c *St. Louis*.—No. 2 winter red wheat, \$1.53 a \$1.57; No. 2 spring, \$1.10. No. 2 mixed corn, 50 cts.; old, 55 c Oats, 37½ a 38 cts. Rye, 78 cts. *Cincinnati*.—Family flour, \$6.85 a \$7.60. Wheat, \$1.45. Corn, 50 cts.; no ear, 47 a 48 cts. Rye, 90 a 91 cts. Oats, 41 a 45 c *Baltimore*.—Choice white wheat, \$1.82 a \$1.85; fair prime, \$1.60 a \$1.75; choice amber, \$1.80 a \$1.85; go to prime red, \$1.70 a \$1.75; Ohio and Indiana, \$1.60 \$1.65; Penna. \$1.50 a \$1.55.

The Committee of The Yearly Meeting to visit the Subordinate Meetings, will meet on the 20th inst. The Committee-room, Arch St., at 10 o'clock A. M.

#### THE WESTERN SOUP HOUSE,

Situated at No. 1615 South street, exclusively under the control of and mainly supported by Friends, will be opened for the delivery of soup on the 15th inst. It is expected that owing to the large number of persons out of employment, a greatly increased demand will be made this year upon the Society, in view of which the Friends having the management, earnestly solicit contributions to aid in carrying out the charitable work which may be sent to either

SAMUEL BETTLE, No. 151 North Tenth St.;  
DAVID SCULL, Jr., Treasurer, 125 Market St.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office, Burlington Co., N. J.  
Charles Evans, No. 702 Race St., Philadelphia.  
Deborah Rhoads, Haddonfield, N. J.  
Rebecca S. Allen, No. 335 S. Fifth St., Philadelphia.

#### FOR RENT

To a Friend, the small dwelling on the meeting-house property, West Philadelphia. An oversight of the property will be accepted as part of the rent.

Apply to  
JOHN C. ALLEN, Forrest Building, 119 South Fourth street.  
HENRY HAINES, 512 Walnut street.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to  
Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philadelphia.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philadelphia.

#### FRIENDS' ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at Tottenham Green, near London, England, Second mo. 24th, 1873, MARY FORSTER, in her 8th year. On the 5th of Third mo., RACHEL FORSTER, (widow of Josiah Forster,) in her 90th year. Also, on the 11th of Tenth mo., ROBERT FORSTER, aged 1 year, and on the 14th, his sister, ANNE FORSTER, aged 76 years, all valuable members of Tottenham Meeting, and interred in Friends' burial-ground at Winchmore Hill; the two last on the 18th of Tenth mo.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, TWELFTH MONTH 20, 1873.

NO. 18.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

PHILADELPHIA.

stage, when paid quarterly in advance, five cents.

For "The Friend,"

## The Approaching Transit of Venus.

(Continued from page 130.)

In the work of actual observation of the passage of the planet across the sun's face another new power will be brought into play, of which nothing was known in the days of Captain Cook and of the staunch old ship appropriately and modestly named the "Enterprise," the immediate effect of which will be to obviate the recurrence of the difficulties and confusion that came in the train of the observations of 1769. In his very able and most admirable address to the Mathematical and Physical Section of the British Association for the Advancement of Science, at the recent meeting at Brighton, Dr. Warren de La Rue, the President of the section, dwelt mainly upon the interest and importance of the position that photography has now taken at the observatory of the astronomer. Photography, in its relation to astronomy, no longer satisfies itself with being merely the portrait-painter of the telescopic features of the celestial bodies; it now claims to be the most exact and refined instrument for measuring the apparent relative positions of the planetary wanderers, and indeed also of the diurnal hosts of the sky, and in this sense the new claimant is to be admitted to play a part in the transit observations of 1874. But photography, it will also be observed, has the still stronger recommendation that it is a permanent record, as well as a refined method of instrumental observation. If impressions of the actual appearance of the solar face are secured upon photographic plates at rapidly succeeding instants, as the dark planet moves across the sun, and this be done from several widely-separated stations on the earth, the successive phases of the transit will be caught, as it were, *grante delicto*, and stereotyped where they can be seen for all future time, as well as at the moment of occurrence, and so be again referred to by fresh bands of observers as long as continued scrutiny may seem to be required for the improvement of deductions or for the elimination of error. For an adequate apprehension of this particular value of the process it is only necessary to consider the power it would have given Locke and Stone in their re-examination of

the observations of the transit of 1769, if they had had photographic registers, instead of pen-and-ink records, of those observations to deal with.

Lewis Rutherford, of New York, has furnished a remarkable series of proofs of the great capabilities of photography in the matter of refinement of astronomical delineation. He has produced photographic maps of the moon's face twenty-one inches across. He has photographically engraved a beam of sunlight, when scattered by the deploying power of the spectroscope-prism into a band eighty-four inches long, so that more dark Fraunhofer absorption-lines can be discerned in the picture than had hitherto been seen by the direct observation of the eye. He has made photographic images of groups of fixed stars in which every constituent star of the group is so rendered on the plate as to admit of the most refined micrometrical admeasurement, both of relative distances and positions. Another successful worker in the same field, Professor Young, has secured photographic portraits of the red prominences, or hydrogen flames, of the sun in the full blaze of ordinary daylight. It is, therefore, clear that great results may be looked for at the hands of this new auxiliary of the observatory.

It is obvious, and beyond dispute, that there are some grave drawbacks to the employment of photography as an instrument of exact astronomical observation; but it is not unworthy of note that at the present time these very drawbacks have become matters of especial interest to men of science on account of the very ingenious steps that are being taken to neutralize their powers of mischief. Thus, it is well known that the ordinary photographic image formed by lenses of glass has certain inherent aberrations and imperfections that, for any purpose of exact measurement, require to be either removed or ascertained and allowed for. The lenses of the optician bend and blur the light-beams that they employ in painting the picture. The collodion film, which receives the impression of the picture, dilates and contracts unequally and capriciously after it has been stamped with the image. But measures are in progress to meet and entirely neutralize these causes of inaccuracy when photographic art is employed in turning the next transit of Venus to account, which are remarkable instances of the exhaustive forethought and care which are now required in the proceedings of exact science. The distinguished optician, Dallmeyer, is at the present time engaged in the construction of nine instruments to be used in photographing the appearances and progress of the transit, which are to be so scrupulously and exactly alike, that comparisons of pictures made by them at different stations may have the highest attainable value, and in which, at the same time, all optical sources of inaccuracy shall have been reduced to the utmost extent that the present state of constructive

skill allows. Five of these photo-heliographs, as the instruments are called, are for the British Government, one is for the Indian Government, two are for the Russian Government, and one is for the veteran astronomical photographer, Dr. Warren De La Rue. The experiments and trials with these fine instruments are already so far advanced that the instruments are as nearly perfect for the precise purpose for which they are to be used, so far as their optical performance is concerned, as may be. Their visual and chemical foci are practically identical, so that the image that is seen clearly by the eye will be as clearly engraved by the light upon the sensitive film; and Dr. De La Rue finds that when a reticule of crossing lines—a kind of square meshed net of very regular finish—suspended, for the purpose of testing the instruments, on the Pagoda in Kew Gardens, is photographed by one of them, the image of the reticule corresponds exactly with another image of a transparent lined glass reticule introduced into the principal focus of the object-glass of the instrument, magnified seven diameters, and photographed at the same time with the distant scale. For the full extent on the plate which is occupied by the image of the sun, both these square meshed scales appear ruled with almost mathematical precision; they are both free from the distortions familiarly known as the "pincushion" and the "barrel-like" distortion. There is simply a slight tendency to thicken the lines of the image derived from the transparent glass reticule as they get away from the centre of the field, which is obviously due to slight curvature of the field of sharpest definition; and this residual optical imperfection, trifling as it is, Dallmeyer is now still further diminishing, by altering the curves and lengthening the focus of the enlarging lens, and he states that he has not the slightest doubt that in the end all error due to optical distortion will have been absolutely removed. There will still remain the imperfections of unequal contraction in the collodion film after the image has been photographed; but even these errors will be made of no practical import by the admirable device of the lined reticule; because if the image of this reticule is photographed on the plate at the same time as the image of the sun, any imperfection of image produced by unequal contraction of the film will be revealed by a corresponding irregularity in the lines and squares of the reticule. If these lines and squares are mathematically exact and true, as they should be, it will be known that the picture of the sun is also, in the same sense, true; and if, on the other hand, those lines and squares are in any place distorted from their true regularity and measure, there will be identically the same distortion in the image of the sun; and this being then known, will be taken into account and allowed for at its exact value, whatever that may be.

Dallmeyer's beautiful instruments are to

furnish an image of the sun's disc at the time of the passage of the planet in 1874, which will be nearly four inches, or in exact figures 3931.6 thousandths of an inch, in diameter; and the image of Venus will have a diameter of 126.66 thousandths of an inch. The greatest possible parallax displacement of the planet on the sun's face for the widest base of observation that can be secured on the earth will amount to 95.7 thousandths, or nearly one-tenth, of an inch. This therefore will be the quantity that will be available in the photographic picture for micrometric examination and scrutiny. The time secured will be substantially the true instant of the particular phase photographed, as photographic pictures of the sun with instruments of this class are commonly made in the hundredth part of a second on account of the great intensity of the sun's actinic power. It is anticipated that the chord of the sun's circular face along which the planet will be seen to pass from any given station on the earth will be easily determined to within a tenth part of a second of angular measurement, and that an error of a tenth part of a second in this would involve an inaccuracy not exceeding eighteen one-thousandths of a second after reduction to the expression for the sun's horizontal parallax. This therefore is the promise which the acceptance of the alliance of photography in the transit observations of 1874 holds out. Many of the highest authorities—foremost among them Dr. Warren De La Rue in England and Professor Bond in the United States—hold that the measurement of the photographic images of the transit will in all probability give a result of threefold higher value than any direct eye and hand observation that could be secured.

If the recent corrections of the sun's distance are ultimately established by the transit observations of 1874, this will really indicate that the sun itself is a spheroid 850,000 miles across, and that in mere matter of bulk it is so vast that a million and a quarter of earths would barely suffice to make up its volume. A much more satisfactory and philosophic conception of "the Home Rule" of the universe is secured, if a start is made in idea from this grand central stand-point, rather than, in accordance with the more usual practice, from the earth. The source of activity and power is an orb nearly one million of miles across, and the pigmy earth which is dependent upon that source for light, warmth, life, and all change and movement of whatever kind, is suspended in space one hundred and eight diameters of that central orb away, and is of one million and a quarter times smaller dimension than the sphere from which it receives these endowments. There is certainly more for the human intellect to seize when the fact is stated in this way than there is when the sun is spoken of as a sphere ninety-two millions of miles from the earth, and as large again as the moon's orbit. It is a suggestive and noteworthy feature in the economy of Nature that in the one instance which comes within the personal experience of man, the great central fountain and source of impulse, energy, and power is six hundred times larger than the entire cluster of subordinate worlds that are lit, warmed, and organized from that source. Such in the marvellous scheme is the ratio of power to result, of active determining cause to passive accomplishment—six hundredfold to one! Fire-eddies thousands of

miles across, and flame-tongues one hundred thousand miles high, whirl and leap in the sun in order that soft winds may breathe, gentle rains fall, verdant plants grow, and endless generations of animals succeed each other and run through the appointed round of sentient being, on the islet worlds that have been scattered through space, each at the appropriate span of remoteness that fits it to the end secured.

(To be continued.)

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 127.)

"1819, 9th mo. 12th. This day our dear and valued friend, H. Fisher, departed this life. Her loss will be deeply felt, not only in her own family, but in the Church of Christ. She was a dignified minister, adorning the doctrines of the gospel with that simplicity which becomes the followers of a meek and lowly Saviour; and her example loudly calls to us to follow her as she followed Christ. My spirit mourns the removal of such from our Zion. Yet inasmuch as Israel may be supplied by the great Lord of the harvest with standard and testimony bearers, qualified to stand for the honor of his cause, may we be preserved from an unavailing anxiety. Let us rather centre into quiet resignation of spirit, seeing He doeth all things well. As we thus yield to the turnings of his Divine hand, no doubt many will be qualified by the great Potter for his service; and we shall realize a succession. Instead of the father will arise the son, and instead of the mother shall come up the daughter, who shall support the precious testimonies for which some of our predecessors suffered unto death. Oh I crave to be a companion of those thus concerned, that haply my day's work may be completed ere my glass be run. It is the righteous that shall hold on his way, and men of clean hands that shall wax stronger and stronger.

13th. In recounting the many mercies of an Almighty Father, a desire is raised that my steps be so ordered of Him as not to bring a shade upon that religion I profess; but that, through the future steppings of life by example and precept, I may show more and more my fidelity and allegiance to Him who is the King eternal. Oh he has blessed me many times with his life-giving presence, and fed me with the dainties of his house! But how oft have I turned aside from his instructions; how oft have I through fear evaded the cross, which is the only way to the crown. May it be my concern to walk in humility and fear before him; and, in holy resignation, to say Amen to all his dispensations; knowing that he afflicteth not willingly, but in order that I become thoroughly refined; and with the Psalmist to acknowledge 'Before I was afflicted I went astray, but now have I kept thy word.' And, 'I will praise thee with uprightness of heart, when I shall have learned thy righteous judgments.' Thus we have abundant cause to bless Him for all his dispensations, but most for the severe. For Him indeed,

'Not more in the sweet  
Than the bitter I meet—  
My tender and merciful Lord.'

14th. How beautiful upon the mountains do the feet of those appear who bring unto us glad tidings. Sweetly has my spirit united this morning in the exercise of a brother, who was engaged to set forth the necessity of pre-

senting our bodies as living sacrifices before the Lord; and to press upon all the necessity of a death unto sin, and the new birth unto righteousness. Also that as in the wisdom of the great Minister of ministers, a number of these delegated servants have recently been removed, He would be pleased to qualify and send forth more laborers into the various part of his vineyard, seeing the harvest is great. Oh that I may not be found wanting in dedication; that my path may be made plain before me; and that my feet may indeed be preserved from running unseemly, and also strengthened to go forward, when a clear manifestation is discovered. Ah I fear lest my garment have gathered defilement, or else why am I so long in so feeble a state? As a child I can not go. May He, whose ways remain to be higher than our ways, again pluck my feet out of the mire and clay; thoroughly cleanse and purify me, until every remaining dreg of corruption is washed away, and preparation witnessed to receive the inscription of Holiness. All the vessels in the Lord's house were to be of beaten gold.

1817, 10th mo. 3rd. Accompanied my dear friend — to Green Street Meeting; in which the canopy of Ancient goodness was mercifully spread over us, and a living testimony borne, by my precious sister, tending to animate us to hold on our way. She was earnestly solicitous that we might diligently improve the talents committed to us, lest an awful day of reckoning might overtake, in which the which was laid up in a napkin would be taken from us, and some turned away with the sentence, 'Cast ye the unprofitable servant into outer darkness.' May none so unwisely cover or hide the precious gifts of a merciful Father, as to receive the portion of the slothful servant.

5th. Once more favored with the overshadowing goodness of the Shepherd of Israel and with the living streams of Gospel ministry flowing as from the heavenly fountain through instruments qualified by the Ministers of ministers, to hand each their portion of measure. May we render unto our Almighty Father the tribute of thanksgiving and praise now and forever. May our hearts, from season to season, be raised to Him for ability to stay our minds upon him, breathing unto him Hallelujah, Hallelujah! for it is in, and by him we live and move,—

'He is my God, and I will praise him.  
My father's God, I will exalt him.'

12th mo. 14th. Attended our week-day meeting in much poverty and emptiness. But was favored to participate with my beloved brethren and sisters in the promise, 'When two or three are gathered together in my name, there am I in the midst of them.' What shall I render unto thee, O Lord, for all thy benefits to a poor unworthy creature? Truly they have been multiplied far beyond my deserts, by Thee who art pleased to realize thyself a friend to those who put their trust and confidence in thine Almighty arm. Oh grant I pray thee, dearest Father, if consistent with thy blessed will, an evidence thereof concerning me. Thou knowest I desire above all things to serve thee, and that all other love without thee cannot sanctify my soul! Will thou then be pleased to unveil thy glorious presence to the eye of one of the least, yet the least of thy family; and enable her to make straight steps to her feet in the path cast out by thee for thy ransomed children to walk in?

For the way of the good man is ordered by thee, and thou upholdest his path.' Thou wilt not suffer his foot to be moved. For thou art the lot of his inheritance, and his portion forever—a precious portion. Levi shall have no part nor lot with his brethren. The Lord is God is his portion.

This is of all most to be desired. Oh that this may be mine. Then indeed I might unite with the sweet singer of Israel, 'the lilies are fallen unto me in pleasant places. Yea, I have a goodly heritage.'

12th mo. 26th. Almost another year has elapsed in fleeting moments from us. Poor probationers. And what improvement, Oh my soul, art thou conscious of? Hast thou been constantly pointing to thy proper centre,—the interests of a life to come—or hast thou, unconscious of thy fleeting state, listlessly passed along pursuing the bawbles of the world, while the business of thy soul's salvation has been neglected? Ah no! I trust this has not been entirely the case. Although with blushing and confusion of face, I may acknowledge myself far short of having attained the dignified state to which the followers of Christ are called,—even perfection. For He hath said, 'Be ye perfect, for I, the Lord your God, am perfect.' Nevertheless I follow after, if haply I may attain thereunto; assuredly believing that the God of all grace who hath thus called, will, after we have suffered a while according to his eternal glory, take all who thus follow on to know him, perfect, establish, strengthen, settle them. To him be glory now, henceforth, and forever. For he hath abundantly satisfied my soul many times with his goodness, and his mercy endureth forever.

1820, 1st mo. 10th. My soul, thy love is supremely to the King of kings. All other loves thou disdainest for the love of God. He is the chiefest of ten thousands; yea, the together lovely. But oh! how slow art thou to confess to this before thy brethren, although He hath long called thee to give proof; yea, in the midst of the congregation, to declare thyself on his side. How dost thou mourn his absence, and cry Lord, Lord! But thou must also do those things which he requires of thee, or thou wilt not become his chosen. It is to such as keep his commandment he has promised a place, and a name in his house, better than of sons and of daughters."

(To be continued.)

#### Of Migratory Birds—When and Where They Go.

The following instructive communication is published in the *N. Y. Evening Post*:

The time for the departure of the birds is at hand. Throughout the whole belt of the rigid and north temperate zones the feathered inhabitants are moving, or making ready to invade the clime of perpetual warmth, and no surveyor-general, with his compass to direct and science to guide, could more accurately calculate his distances, to arrive at a given point, than do these aerial travellers.

Already the swallows are gone. Weeks ago we saw them scurry aloft in squads, hurrying hither and thither, getting ready to join themselves into grand armies for movement. Like poor Charles Lamb at his business, "they come late and they are the earliest to go." They do not reach Massachusetts, unless the season is unusually mild, until the middle of May, arriving in pairs, but they leave in the begin-

ning of September, after having united themselves into flocks. These flocks at times assume very large magnitudes, as the different families of Hirondos join forces, often obscuring the sky for some time while they are passing over. They follow the coast in their flight, and when bewildered by the seaboard fogs, as they often are, they arrest their course until the sky clears, when they rise in a spiral form from the reeds and marshy lands, where they have lain in harbor, and, extending their ranks, resume their way towards the tropics. The flight of the swallow surpasses in fleetness that of every other winged creature except the humming bird. The American swift, or swallow, has been caught in the spring near New York with a crop full of undigested rice, which proves it to have flown from the rice fields of Carolina in twelve hours—more than one hundred miles an hour.

But with the migration of the swallows we missed the songsters. The different tribes of the warblers retire before the frosty airs and keen winds ruffle their plumage and make hoarse their sweet voices. The shy blue bird, the meadow lark, with his melancholy tone, and the wood thrush, whose notes is as fresh to the ear as the odor of the damp woods is to the nostril, are all gone. The bobolink, whose rapturous singing made the meadows melodious in early summer, first lost his inspiration, then became a *bon vivant*, and then hied himself off, with his wife and children, to regale upon the seabiscuit seeds in the plains of New Jersey and Delaware, whence, if the sharp sportsmen overlook him, he will proceed to the remote rice fields along the coast of the Gulf of Mexico.

On the other side of the globe the nightingale, which is the chief of the warblers—the famous singer of the world—now hastens to the myrtle groves of the Adriatic Sea or the rose bowers of Persia, or the date trees of "Araby the blest," where ages ago its thrilling song

"Pierced the sad heart of Ruth,  
Who stood in tears amid the alien corn."

This bird, which breeds as far north as Sweden and Russia, ornithologists tell us, is never heard in Wales, Scotland, nor the western shires of England. The male precedes the female a week or two, to the north, in the spring, and having selected his haunt in some bosky thicket, he lures his mate to him, when she arrives, by his song. It is said that a nightingale caught after it has paired seldom survives.

The Baltimore oriole, or hang-nest, resplendent in the beauty of his scarlet and gold dress, migrates and returns in the spring by the single bird, and flies only by day. He retreats to Mexico and goes as far north as Nova Scotia. The oriole is rare and sagacious, and the female exhibits method and a very nice distinction of distance in building her nest. This I saw illustrated, two or three years since, by a bird which chose the locality whereon to hang her nest, in an elm not twenty feet from my chamber window. She constructed the nest upon the extremity of a pendant limb, which was too flexible to bear a ladder, or even the weight of a child, and too high to be reached by portable steps, and which held her treasure secure, poised on its outmost tip, far from the reach of danger. The nest—made like a long netted purse—was woven, in and out, out and in, of horse-

hair and dried marsh-grass, as deftly and cunningly as a maiden's fingers could have done it, and the entrance into it placed on the side opposite from the window, so that the eggs within could not be seen. During the process of nest-making, which required a week, the male watched from an adjacent tree, and cheered on his wife in her work, with his songs, but he did not offer to help her. The oriole possesses a song which he accents with almost human pathos, but his call note is sharp and harsh.

"I'll pay my rent in music, said a wren."

The robins are not yet all gone, but the remnant of them are making great haste to join the hegira. During the past few weeks they have been in the oat and wheat stubble, eating themselves into prodigious good order, to be in readiness for their journey. Thorough gleaners are the redbreasts—not a mustard seed do they leave to warm the throat of the snowbird in winter, or to bury itself under the approaching snows, if they can find it. They eat up our cherries, currants and strawberries; they plunder the garden of the late grapes, they ravage the flower-stalk of its seed, and spoil the brilliant mountain ash of its scarlet berries, the clematis of its purple fruitage, and the sumach of its crimson spikes; and after they reach the Carolinas, they betray the same inordinate appetite, by cramming their crops with the aromatic juniper berries to such an extent that, whether through the overfeeding or whether through the intoxicating fumes of the fruit, they are unable to sustain themselves upon their perch, and tumble off into the hands of watchful little darkies, who know their gluttonous habits. The robin returns to us early in April; often, in mild seasons, by the last of March they are here, in the very face of the late snow-storms. Already paired, they attend strictly to business. Their first nest is constructed before the leaves are out, and they will warble you such a song while they are building it—such a clarion outburst of hope and faith, and certainty in the summer's success—that they storm your heart, in spite of yourself, into a corresponding belief. They sing with like ecstasy until the autumn, but less frequently, and with a little falling off, perhaps, in expression.

The American robin is domestic in his nature, but he never becomes familiar like his English namesake. Let him choose his home ever so near your house, he wants nothing of you but his rent, and for that he pays in music. A robin has built during five successive years in a niche not far from our door. We have not marked her, but we judge her to be the same bird. This nest is made early, and soon as the brood is out of it she begins nimbly on a second; the third follows in process of time. During two of these years she has built the second and third nests in the near neighborhood of the first, on two elms growing one on each side of the house, sometimes clearing out the old habitation and relining it for present occupation. But she is cunning and sharp as she is bold and independent; it is the cherry-trees which bring us the honor of her company, and she guides her fledglings on to the loaded branches with an impunity which defies red rags and the other insignia of the scarecrow. She rears, on an average, nine young birds during one season, and it is in these small family companies that

the robins forage, in the fall, before their departure. But he leaves his song when he goes south; when there he only chirps in a broken, croaky sort of way to his fellows, as though lamenting his exile. A resident of South Carolina told me that he discovered there in summer, in a live oak grove, a robin with a broken wing. The disabled bird had found it impossible to accompany his companions away, and it haunted this grove, where probably it had passed the winter, all the summer, chirping dismally to itself, but never raising a song note.

(To be concluded.)

Selected.

#### PRAYER FOR THE FAMILY OF A FRIEND.

Blessings, oh Father shower,  
Rich blessings in this household from on high,  
May no dark cloud o'ercast their sunny sky  
Nor tempest lower;  
But the sweet dove of peace, a cherished guest  
In their home's hallowed ark take up her rest.

Oh! bless them in the ties—  
The holy, tender ties of husband—wife—  
Which thou hast flung around them; guard from strife  
Earth's choicest prize;  
Domestic love unsullied by a fear  
That aught but death can change the fond heart here.

Saviour! Thou who didst take,  
Young children in thy arms—oh! look on these  
Who hush sweet accents at their parents' knees  
And ne'er forsake;  
But through life's wilderness direct their feet  
To the blest fold where all thy lambs shall meet.

And oh! bless thou their store,  
Reward their labors with a bounteous hand,  
And may their hearts incline to thy command—  
Think on the poor;  
May the blest charity their bosoms warm,  
Which shields a brother from affliction's storm.

Not for the gifts alone  
Which are of earth and pass with time away  
For those I love with deep desire I pray;  
But from thy throne  
Bow down thine ear Most Holy! and bestow  
The blessings which from thee alone can flow.

May peace and heavenly joy  
That passeth human understanding, fill  
Their inmost souls, and grateful praises still  
Their tongues employ;  
And aspirations of pure love arise,  
In clouds of spirit-incense to the skies.

Yet one more boon I crave,  
For those oh Father! whom my soul holds dear;  
When thy last solemn messenger draws near,  
And Jordan's wave  
Lies just before them—be their stay and guide,  
Through death's dark vale—thou Blessed and Crucified!

I leave them in thy hand,  
Most Merciful! Now and forever more  
Thy will be done! And when on heaven's bright shore  
With joy we stand,  
Our ransomed souls shall swell the sacred song  
"Glory and honor to the Lamb belong."

#### Sleeping in a Cold Room.

*Hall's Journal of Health* says that cold bed-chambers always imperil health and invite fatal diseases. Robust persons may safely sleep in a temperature of forty or under, but the old, the infant and the frail, should never sleep in a room where the atmosphere is much under fifty degrees Fahrenheit.

All know the danger of going direct into the cold from a very warm room. Very few rooms, churches, theatres and the like, are ever warmer than seventy degrees. If it is freezing out of doors it is thirty degrees—the difference being forty degrees more. Persons will be chilled by such a change in ten min-

utes, although they may be actively walking.

But to lie still in bed, nothing to promote the circulation, and breathe for hours an atmosphere of forty and even fifty degrees, when the lungs are always at ninety-eight, is too great a change. Many persons wake up in the morning with inflammation of the lungs who went to bed well, and are surprised that this should be the case. The cause may often be found in sleeping in a room the window of which had been foolishly hoisted for ventilation. The water-cure journals of the country have done an incalculable injury by the blind and indiscriminate advice of hoisting the window at night.

The rule should be, everywhere during the part of the year when fires are kept burning, to avoid hoisting outside windows. It is safer and better to leave the chamber door open, as also the fireplace—then there is a draft up the chimney, while the room is not so likely to become cold. If there is some fire in the room all night the window may be opened an inch. It is safer to sleep in a bad air all night with the temperature over fifty, than in a pure air with a temperature under forty. The bad air may sicken you but cannot kill you; the cold air can and does kill very often.

[In the above advice there is a similar want of discrimination as is rightly censured in the "water-cure journals." It is often as safe and healthful to admit fresh air into sleeping apartments when fires are kept burning, as in warm weather. Those who are neither children nor old, suffer more frequently from breathing impure air in unventilated sleeping rooms, than from the fresh air introduced which is 40° or a little below. It must be an extraordinary case where inflammation of the lungs, is produced by "sleeping in a room, the windows of which have been foolishly hoisted for ventilation," unless the foolishness has been in having a draft of cold air blowing immediately on the sleeper.—EDITORS.]

*I'll rest when I get Home.*—While walking through a street in the city of —, a few days ago, I passed a man whose head was whitened and body bowed by the hardships of not less than sixty years. His limbs trembled under their heavy burden, and with much apparent effort he advanced but slowly. I heard him talking in a low and subdued voice, evidently mourning over his weakness and poverty. Suddenly his tone changed and his step quickened, as he exclaimed "I'll rest when I get home."

Even the thought of rest filled him with new life, so that he pursued with more energy his weary way. To me it was a lesson. If the thought of the refreshing rest of home encourages the care-worn laborer, so that, almost unmindful of fatigue and burdens, he quickens his steps homeward, surely the christian journeying heavenward, in view of such a rest, should press onward with renewed vigor.

This little incident often comes to mind amid the perplexing labors of the day, and stimulates me to more constant and earnest effort. Each laborer toiling in his Master's vineyard, bearing the heat and burden of the day, can say, "rest when I get home." Here let us be diligent in the service of our Lord, remembering that our rest is above. Fellow-travellers, are thy burdens grievous to be borne, so that thou art ready to faint in the way?

Jesus says, "Come unto me, all ye that labor and are heavy-laden, and I will give you rest." To rest from toil is sweet; to rest from sin is heaven.—*American Messenger.*

#### Arboriculture at Vienna.

The important subject of arboriculture upon which we have undertaken from time to time to inform the public, has recently been under consideration by a body of learned men at Vienna. The meeting was held under the title of the International Congress of Land and Forest Culturists, and those in attendance, either by special appointment or voluntarily, represented the leading government of the world. These representatives combined in an eminent degree scientific and practical knowledge, and their action on the preservation and increase of the forests of the world is likely to be of the greatest importance.

The conclusions arrived at are given in a series of resolutions, of which the first two sets relate to agriculture and arboriculture combined. The most important suggestion in them is that international conventions shall be held for the consideration of these topics and that, so far as possible, government ought to be induced to obtain trustworthy statistics of the actual condition of the land and forests within their own geographical limits, in order to made the discussions practical and of immediate use.

The third set of resolutions relate exclusively to arboriculture. The most important of these resolutions are as follows:

"The International Congress of Land and Forest Culturists resolve:

"1. We recognise the fact that, in order to effectually check the continually increasing devastation of the forest which is being carried on, international agreements are needed especially in relation to the preservation and proper cultivation (for the end in view) of those forests lying at the sources and along the courses of the great rivers, since it is known that, through their irrational destruction, the results are great decrease of the volume of water, causing detriment to trade and commerce, the filling up of the river's bed with sand, caving in of the banks and inundations of agricultural lands along its course.

"2. We further recognise it to be the mutual duty of all civilized lands to preserve and to cultivate all such forests as are of vital importance for the well-being—agricultural and otherwise—of the land, such as those on sand-coasts, on the sides and crowns as well as on the steep declivities of mountains, the sea-coasts and other exposed places; and that international principles should be laid down, which the owners of such protecting or 'guardian forests' be subject, thus to preserve the land from damage.

"3. We recognise, further, that we have not at present a sufficient knowledge of the evils (disturbances in nature) which are caused by the devastation of the forests, and therefore that the efforts of legislators should be directed to causing exact data to be gathered relating thereto."

In a fourth resolution the Austrian Minister of Agriculture, who presided over the meeting and in other ways aided in the deliberations, was requested to bring the results of the conference to the attention of other governments, a duty which he promised, in a brief but earnest speech, to fulfil.

Whatever may be thought of these resolu-

ions, they are certain to command attention. They distinctly enunciate the old doctrine that the state has a right of guardianship in its forests—a principle recently advocated in his country by Dr. Franklin B. Hough, who especially attempted to show in what way the state can exercise this right without infringing upon the rights of the individual. So far as this question is concerned, however, each government will be left to settle it with its own citizens.

For "The Friend"

John Heald.

(Continued from page 131.)

From the same to the same.

"Columbiana Co., Ohio, 8th mo. 5th, 1814.

"Esteemed Friend,—I received thine yesterday of the 22d of 5th mo. last. I had a few days before written to thee, chiefly to inform thee of my prospect of an extensive eastern journey, and that I expected to call and see thee, &c.

"But having received thy letter, so acceptable to me to obtain from thee, I think best to add a few lines in reply to it. In the first clause of thy letter, thou mentions what often happens, or sometimes takes place, *i. e.*, utter strangers meeting and soon united in love to each other, a mystery the mere worldling knows not of. We were so, and have had little acquaintance. I have viewed and reviewed it over, in every part, I believe, that recollection furnishes me with; and I freely acknowledge that when thou proposed writing in the first instance to each other, I did not feel much inclination to it; but I have not, believe, held a correspondence with any one to a greater extent, nor to more satisfaction, than with thyself; and as I do believe that our acquaintance originated in the Truth, I do not think it very difficult to account for it being pleasant.

"In the next place thy sentiments respecting a salutary hedge of discipline set about us, are so consistent with mine, that I approve of them; but as we are liable to miss our way, how kind is it in those that love us, to be honest with us. Although, on such occasions, such may be very nearly tried, and may be apprehensive of gaining ill-will, but having been faithful, let them leave the event, as is sometimes recommended to some who have to labor in a public line, and deeply tried. But honest labor has for its reward precious peace, and, sometimes, the desire of the soul satisfied by seeing the return of such whom they have labored with. May thy labors and the desire of thy soul be crowned with such success in the case alluded to, and be restored and his sun go down with brightness!"

"We now resume the extracts from our friend's journal.

"In the 5th mo., 1817, I informed our Monthly Meeting of a prospect I had of attending most or all of the Particular Meetings within our Quarterly Meeting of Salem, and of having public notice given to others, that they might attend if they would; and also, that I felt an increasing concern to have a meeting of meetings out north, in the Connecticut River in particular. In the course of the summer and fall I attended, as way opened, to the concern, and had several good meetings, but after being at most of the meetings among friends, I thought sometimes the other would wear off, without a necessity to attend to that

part of the concern. But though I felt very weak for such a task, still the exercise revolved in my mind at times, and at length I found it safest, as I believed, to fix on a time to go, and to send word to two families of Friends, who lived remote from meeting—sixteen miles off.

Several Friends bearing me company, we had a meeting there the 19th of the 10th mo., where several of their neighbors came, and I understood they were well satisfied with the testimony I was favored to bear among them. Next morning we went towards Warren, the place I had felt the first draught to, and when within about three miles of it, we came to Isaac Heaton's, a justice of the peace. Understanding what we were going to the town for, he proposed that we stay at his house for the night, and send word by a man who was there then, and who lived in the town. I said it was necessary that we should first know whether we could have a place to hold a meeting in, and then we could fix on a time to hold it. He said there was no doubt at all but we could get the court-house to hold our meeting in, and the man from town would spread the notice there that night, and there would be no occasion for us to go. So we concluded to stay. When we were a little time settled, Isaac said to us, if you have no objection to preach here to-night, I will send out and notify the neighbors, and let them come in and have a meeting. I said, we will first consider of it, and after a short consultation I said, if thou thinkest that thou and thy neighbors are willing to come together and sit an hour and a half or more in silence, and then if there is no preaching, endeavor to be satisfied without it, thou mayst notify them as soon as thou pleasest. So he sent the notice, and in a short time there came in and sat down thirty or forty persons. After some time of silence I felt an engagement to declare to them that which I believed to be my duty to do, and it became a solemn time, much to my satisfaction, and the people were loving. Most of them came, before they went away, to shake hands and bid us farewell, which they did in a friendly manner.

In the morning we parted with this kind family. They had fed us and our horses, and would receive nothing for pay.

We then proceeded to Warren, where the spreading of notice had been attended to, and a considerable meeting collected, in which I bore testimony for some time to the Truth, and way of salvation. The people though mostly strangers to our Society, behaved becomingly in the silent part of the meeting.

After dinner, we went on towards a town called Canfield, which is on the way home, and where I felt engaged in mind to have a meeting. We proposed having a meeting next day at 10 or 11 o'clock, but the person to whom we communicated the prospect, made so many objections to the time, that I concluded to go on in the morning. But after going to bed and viewing the matter in my own mind, I felt easiest to stay to the time our landlord proposed, which was candle-light the next evening. The meeting was a solid time. I was favored in this as well as in the other meeting beyond my expectation. I revived the sufferings of the martyrs, showing how constant they were, and how firm they stood to support the good cause, even to death, and how glad they would have been to enjoy such privileges as we enjoy. The meet-

ing concluded with supplication, and I rejoiced under a sense of Divine favor, that it is sufficient to strengthen the weak."

In the conclusion of his account of this service, after speaking of some other meetings which he attended, John Heald makes the following remarks; "I may acknowledge that I have been helped through these meetings to my comfort, and look back to the conflict, with satisfaction. I suppose few, if any, can conceive how trying it has always been to me to have meetings appointed for me, especially among those who are unacquainted with the manner of holding our meetings. He, whom I have endeavored to serve in the gospel of His Son, knows how I have gone forth in obedience to what I have no doubt He required of me; and to His praise be it spoken, He has in the needful time been a ready helper as well as sufficient, and has made the burthen lighter than I expected."

The next religious service of much magnitude into which our friend entered, was an extensive visit through Pennsylvania, New Jersey, the Eastern States, New York, Canada, occupying more than a year in its accomplishment. But a few months elapsed after the completion of the visit in his own neighborhood, last described, before this industrious servant again left his home, on this important mission.

(To be continued.)

*The Stassfurt Potash Mines.*—These salts were first discovered at Stassfurt, Prussia, in connection with an extensive rock-salt deposit. In sinking a shaft to the depth of 1066 feet, a peculiar layer of various saline compounds, 158 feet in thickness, was penetrated, which directly overlaid the rock-salt. This surface deposit seemed to consist of all the more soluble compounds, but slightly altered, of the oceanic waters, from which the entire deposit originated. As a source of salt for ordinary domestic purposes, it was considered unfit, and, consequently, whatever had to be removed to get at the underlying rock-salt, was drawn aside, as worthless. The celebrated analytical chemist, H. Rose, subsequently called attention to this refuse mass as a source of potassa compounds. The government soon acted upon his suggestion, and caused, in 1860, sales at low rates, offering at the same time premiums to those parties who should succeed in inventing some suitable mode by which they might be changed into more valuable compounds for industrial purposes. The present extensive chemical industry at Stassfurt, and in its vicinity, is the outgrowth of that movement. The production of potassa [there] amounted in 1867 to 24 million pounds, and the entire capacity of the Stassfurt mines, as far as explored at that time, promised to be from 100 to 120 millions of pounds per annum for 100 years to come. *Annual Report Mass. Ag. College.*

*Bats.*—When passing through the channels among the large boulders in the river's bed, we often disturbed flights of small bats. The effect was very strange, as they would flit like arrows shot from an unseen hand, for a short distance, to the shady side of some rock, into which the flooding water had worn curious cavities; here they seemed as quickly to vanish as they appeared, for when they had once fastened themselves to the crevices, their color and shape so much resembled the un-

equal surface of the cross-grained stone, that it was almost impossible to distinguish them even at a limited range.—*Wickham's Journey.*

From The "British Friend."

*Report from the Conference appointed under the direction of the Yearly Meeting for the Consideration of the subjects referred to in the Proposition from Essex Quarterly Meeting, and on the Religious Instruction of our Younger Members.*

To the Yearly Meeting:—This Conference met on the 11th, and has continued its sittings, by adjournments, to the 14th of the Eleventh month, 1873. It has been very numerously attended by Friends from various parts of the country, and in the free interchange of sentiment that has taken place, the deliberations have been marked by the prevalence of brotherly love, and we trust that they have been largely owned by the presence of the Lord.

Among the subjects which have successively obtained attention are the following, viz.:

I. The decrease in the attendance at our meetings for worship held on First-day afternoons or evenings, and on other days of the week.

II. The lessened interest apparent in many places in the meetings for transacting the affairs of the Church.

III. The relative decline in the number of our members, or rather *the vitality and growth of the body*, as affected by

1. The amount of religious teaching.
2. Pastoral care bestowed on our members, including the constitution and functions of the meetings of ministers and elders.
3. The religious instruction of the young.
4. The question of birthright membership.
5. The influence of our Society on the world at large.

Of these important subjects the time of the Conference did not admit of a full deliberation on the question of birthright membership; or of any distinct consideration of the action of our religious Society as a Church upon the world at large.

With regard to the first of the above subjects, namely, the decrease in some localities of the attendance of our meetings for worship held on First-day afternoons or evenings, and on the other days of the week, an earnest desire has been expressed in the Conference that our meetings for worship may fully exemplify the reality of our faith in the Lord Jesus Christ, and in His continued presence with those that are truly gathered in His name. In order to do this, it was felt very necessary that Friends should come to their meetings in a worshipping spirit, and that each, in faith and prayer, should seek to know his or her right part therein, whether in utterance or in silence.

A very general expression was given to a desire that no alteration should be made in the recognized mode of conducting the First-day morning meetings. But at the same time there appeared to be a strong feeling in the minds of many Friends that, with regard to a second meeting on a First-day, where a pretty unanimous feeling prevails amongst the Friends of a meeting, the scriptures might with advantage be regularly read, or the substitution might be made of a meeting expressly appointed for reading the scriptures, or for giving the opportunity of religious teaching; and if in such latter case, the ordinary meet-

ing for worship should be discontinued, it is nevertheless desired that Friends should be encouraged, who might not attend a second meeting on First-day, to devote a portion of the remainder of the day in promoting the religious instruction of their families or neighbors; but it is desired that those who do so should take duly into account the claims of their own meeting on their sympathy and help.

The Conference was enabled to deliberate on these important subjects in a spirit of mutual forbearance and tenderness, and whilst the above appeared to be the prevailing judgment, it is only right to state that many who have, nevertheless, the highest value for the sacred volume, were not prepared to encourage the practice of the stated reading of the scripture in our meetings for the public worship of God.

With regard to our meetings for transacting the affairs of the Church, the following suggestions obtained general concurrence, most of them having been already adopted with advantage in several large meetings, viz.:

I. That as far as practicable, matters of formal and routine character, and those relating to accounts, should be previously digested either by the clerks or committees, so as to occupy as little of the time of the meeting as possible.

II. That, especially where certificates of membership or their acknowledgment are numerous, a simple statement may be made of the names of the Friends to whom they relate, and of the meetings from which they come, or to which they are addressed; care being of course taken to ensure the regularity and correctness of the documents.

III. That, in pursuance of the recommendation of the last Yearly Meeting, a greater variety of subjects of general Christian interest may rightly engage the attention of these meetings.

IV. That much advantage may arise from more general and frequent joint Conferences of men and women Friends, both in Monthly and Quarterly Meetings, in relation to such subjects as may rightly engage the united concern of all the members of the Church.

V. The promotion of the social character connected with these meetings, which have of late years in many places been largely interfered with by the increased facilities for travelling.

With regard to the important subjects of the religious teaching and pastoral care bestowed on our members, and the religious instructions of our younger members, many valuable observations were offered, encouraging Friends, whether as heads of families or otherwise, to faithfulness to their duty in these respects. And various testimonies were borne to the great value of religious visits in Christian love to Friends in their families. After very serious deliberation, it is thought right to suggest:—

I. That, in addition to the duties resting upon parents and heads of families, and the more special services developing upon individuals, it is greatly to be desired that Friends, in their Monthly and other meetings, should fully recognise the responsibility of the Church itself in relation to these great duties, and from time to time consider the state of their respective congregations as regards oversight and pastoral care, religious teaching, and the reli-

gious instruction of the young, and endeavor, under the guidance of their Lord, to make appointments and arrangements for these purposes;—that, when so met, they may be encouraged, as a collective body, to seek in united prayer those gifts which are essential for these services. Under such a preparation it is believed that Monthly and Quarterly Meetings, whether of men or women Friends, would be enabled to exercise more efficient pastoral care through the more frequent appointment of Committees for visiting their members in Christian love.

II. Under the like preparation it is believed that the way would open for the holding of meetings for mutual religious instruction, in which those assembled, with single eye in dependence upon Christ, might enjoy mutual edification and profit.

This Conference, seeing that the duties of the Ministers and Elders especially relate to the oversight of the flock, recommends to the Yearly Meeting such a change in the constitution of Meetings of Ministers and Elders as should increase their service by the introduction of the Overseers, and at the discretion of Monthly Meetings, of other suitable Friends.

In offering these suggestions, the earnest desire has been expressed that the attention and expectations of Friends may be turned, not to "decline," but to life, and growth, and fruitfulness, in the deepening persuasion that this is the will of God in Christ Jesus, concerning all that trust in Him.

Signed by direction, and on behalf of the aforesaid Conference.

WM. D. SIMS, Clerk.

*A Salutary Hint for a Festive Season.*—How many are spending their time and money on vanities and superfluities, while thousands and tens of thousands want the necessaries of life, who might be relieved by them, and their distresses in poverty or in sickness, be in some degree softened by the administering of suitable things.—*John Woolman.*

## THE FRIEND.

TWELFTH MONTH 20, 1873.

In the columns of the present number, will be found the Report of the Conference, held last month in London, under the sanction of the Yearly Meeting, given at its last session. It is represented to have been fully as large as the Yearly Meeting itself, there being about four hundred members in attendance. It was composed of representatives from the different Quarterly and other subordinate meetings, with the members of the Meeting for Sufferings. Other Friends were allowed to be present.

We suppose that some of our readers will be startled, on reading the changes agreed by it to be recommended to the Yearly Meeting for its adoption; especially that in reference to sanctioning so wide a departure from the well known principle and practice of Friends, relative to the worship of the Most High, and to meetings for worship.

But the only novelty in the step now taken, is in proposing to make that general or universal which has, for some time, been practised in many meetings, and to obtain for it the direct authority of the Yearly Meeting.

It was asserted by many who favored this change, that reading portions of Scripture, was as much a part of divine worship as teaching; and, perhaps, the assertion is true, in reference to a great portion of what is heard in some meetings under the character of teaching; and should it be concluded to arrange for having the latter as well as the former, we do not see but that they will stand on the same footing.

But, as Robert Barclay truly says, "All true and acceptable worship to God, is offered to the inward and immediate moving and drawing of his own Spirit." \* \* \* "All other worship, both praises, prayers or preaching, which man sets about in his own will, and his own appointment; which he can both begin and end at his pleasure; do or leave undone as himself seeth meet \* \* \* are all but superstition, will-worship, and abominable idolatry in the sight of God." The pre-arranged reading of the Scriptures, is as much will-worship and stated service or ritual, as reading the liturgy in the "established church." Much has been said, both in this country and in England, to reconcile Friends to having the Scriptures read in their meetings, but we cannot see how any one, understanding and holding the doctrine of Friends in relation to the spirituality of Divine worship, and the necessity for the direct influence of the Holy Spirit for every act of worship, can give countenance to such an open violation of that fundamental doctrine, as to assemble with those who practise it. We would suppose they would greatly prefer to sit down with their families at their own homes, and there sit reverently upon the Father of Spirits, than submit to such a ceremony, such an impediment to the most solemn act in which their souls can be engaged.

One of the speakers, who evidently saw the intimate effect of what was being done, observed, "If there was any bond of union in a christian body, it was worship." True, but London Yearly Meeting has long known, that the practice of reading the Scriptures in meetings for worship, has obtained in many of its subordinate meetings,—and, from the printed reports of its proceedings we infer, it has never ceased the feeblest voice against this palpable violation of the principles of Friends; but has recorded meetings practising it, all the privileges of full unity with the body. It has thus held its own hands, so far as maintaining the testimony to spiritual worship is concerned; and, from the revelations made in the course of the debate, the same is evident in relation to the maintenance of the testimony of Friends against a man-made and hireling ministry.

It was the general testimony of the speakers, that a large portion of the members attend the meetings of Friends only on the morning of the First day of the week: in the afternoon or evening, these attend at meetings for worship of other religious Societies. The reason assigned for this was, that these members wished to hear more teaching and bible reading. They went to the meetings of Friends in the morning, because they were members, but that was as much as they could bear of silent meetings, or such meetings as Friends hold, as they frequented the other places of worship, to obtain that which Friends' meetings could not supply. Besides this large class, there were some who absented themselves from First-day afternoon or evening meetings, because they thought they were better em-

ployed in bible classes or mission schools. We should suppose from the tenor of the remarks, that a considerable percentage of those who took part in the debate, belonged to the one or the other of these classes; which include a few who appear to be in the station of ministers. One observed, "It was his lot more often to occupy the platform or pulpit of another denomination, than to attend our meetings, and at these places he always found the bible; there is liberty for it, and there ought to be this liberty for its use with us." Sometimes they wanted to repeat a whole chapter, and they could not tax their memories with so much. Another, "He often did the latter [go to other places of worship] himself. He found there something that one could appreciate, in the reading, the hymns and the prayers. There were gathered people who could not feed on silence alone." Another, "In going among the services of other denominations, he had found that the preaching of the gospel with them, was not merely characterized by as much or more intellectual power as with us, but also with as much real, living power of the Holy Ghost." We give these extracts, to exemplify the views of that class of members, who habitually or frequently, on the afternoon or evening of First day, attend the places of worship of other denominations. Now, all these members must be constantly violating one of the most important christian testimonies held by Friends. They must have long been proper objects for disciplinary treatment, as approving and encouraging a man-made and paid ministry. But not only are these, and such others as hold similar sentiments, not brought under the action of the discipline, but London Yearly Meeting puts into their hands authority to deliberate what changes shall be made in the meetings for worship of Friends, in order to bring them more into conformity with their views; hoping, thereby, to induce them to attend more frequently.

Were not the subject so sad and serious in itself, it would call forth a smile, that so large a body of professed Friends, claiming to be highly cultivated and intellectual, should put before the world such an absurdity as that the members of the same religious Society, shall have two distinct systems of worship, and practise whichever may be preferred by a majority of each congregation: and yet this is what the recommendation amounts to.

Some appeared to think, that if the First-day morning meetings were spared from change, they would escape sacrificing the principles of Friends; and the afternoon and evening meetings, might be held to suit whatever views on the subject the larger part of the members might entertain. But we think the spirit of the debates shows, that a large portion of the abettors of the change, thought there was no religious principle involved, that was worthy to be put into competition with what they term "religious instruction," or with affording opportunities for the exercise of that which in these days is so much talked of, the "gift of teaching." After carefully reading over the debates—which were taken down by a regularly employed reporter—we confess we are surprised that the Convention restrained itself so far as it did. They indicate that a large number in the body approve of comments being regularly made on the portions of Scripture read in the meeting, and of meetings appointing pastors, to be

kept employed in instructing or teaching the members.

The "logic of facts" is apparently proving the truth of a statement published in a work written by a member in London, five or six years ago, entitled "George Fox, the Friends and Baptists," viz., that "The main body of Friends," in England, have "come round, with little exception, to the very views for which their *Beacon* brethren were obliged to secede." The book contains so much that is erroneous, that, with many, it destroyed the value of the testimony. But, as we have said, facts seem to substantiate its truth. Certainly the wide step now taken, is a legitimate fruit of Beaconite principles; and as they become more and more firmly fixed, and their advocates become more confident in their power, another and another step will be—we may say must be—taken away from the Quakerism of the early Friends, in order to bring "modified Quakerism" into harmony with the "enlightenment of the age."

The bitterness of feeling manifested by several towards Elders, and the decided expression of their being worse than useless, are unexpected, and lead to the belief that many of them stand in the way of the exercise of this very largely bestowed "gift of teaching." The idea of a gift for eldership appears to be entirely ignored.

Will the Yearly Meeting adopt the recommendations? Was it not virtually sitting in judgment in the Conference? Time will make manifest.

#### SUMMARY OF EVENTS.

FOREIGN.—The protracted trial of Marshal Bazaine, on the charge of capitulating at Metz without doing all that was required by honor and duty to avoid the surrender, resulted in a verdict of guilty. The judges condemned him to death, and to be degraded from his rank previous to his execution; they however signed an appeal to President MacMahon commending Bazaine to mercy. A Paris dispatch of the 12th says: The sentence of death against the Marshal is commuted to twenty years of seclusion. He is to bear the effects of degradation from his rank, but will be spared any humiliating ceremony. He will be sent for confinement to the island of Saint Marguerite, off Cannes.

During several days last week, London and the surrounding country were enveloped in so dense a fog as to make all travel or locomotion dangerous. Business was almost suspended, and for two days no vessels arrived or left the port. A number of persons were drowned by falling into the river docks. The fog covered an area of about fifty miles square, of which London is the centre. In consequence of the darkness the cattle-show proved a failure, some of the animals died, and many others were withdrawn by the owners.

The Bank of England has reduced its rate of discount to 4½ per cent., and loans outside the bank are made at 3½ and 4 per cent. The bank gained £618,000 in gold in one week.

The last advices from the Gold Coast, report the condition of the British fleet there as very unhealthy. Sir Garnet Wolseley was on board the ship *Simoon*, suffering from fever. The hostilities with the Ashantes have thus far been mere skirmishes, and nothing decisive was expected until the reinforcements from England arrived. The authorities had determined that all Fantees should be forcibly enlisted as carriers, laborers and police.

A Havana dispatch of the 12th says, the *Virginus* has been taken to the port of Bahia Honda, sixty miles west of Havana, where she will be delivered by a Spanish man-of-war to a vessel of the United States navy. Captain General Jouvellar has given the necessary orders for the transfer of the *Virginus* prisoners at Santiago de Cuba to an American war vessel. A dispatch of the 14th says: The Spanish steamer *Bazan* has sailed from Santiago de Cuba, for Bahia Honda, with the *Virginus* passengers on board, and is expected at the latter place to-morrow. It has been arranged that the *Virginus* and her surviving passengers and

crew, shall be delivered to the Americans at the same time at the port of Bahia Honda.

The ship Arabia, from Calcutta for Boston, has foundered at sea. No date is given, but the disaster occurred in lat. 28 north, long. 63 west. Part of the crew were landed at Gravesend, from the bark Tropic, which vessel rescued them. The remainder of the crew, thirteen in number, were drowned.

Elizabeth, Queen Dowager of Prussia, and widow of King Frederick William IV., died on the 15th inst., aged 72 years.

The German government has subscribed for 24,000,000 marks of the new Hungarian loan.

At a recent election in France to fill vacancies in the National Assembly, Republican deputies were chosen. A petition for the restoration of the monarchy, with 120,000 signatures, had been laid before the Assembly.

A Madrid dispatch of the 15th says: The bombardment of Cartagena opened again to-day with increased vigor. It is said the great Powers have assured Castelar that they will recognize the Republic when the Cartagena insurrection is suppressed.

The steamer Bechton has been lost in the Mediterranean. Twenty-two lives were lost.

London, 12th mo. 15th.—U. S. sixes, 1867, 95½; five per cents, 92½.

Liverpool.—Uplands cotton, delivered in the First month, 8¼d.

A special dispatch to the Pall Mall Gazette says, that as Baron Reuter has not begun works of internal improvement in Persia within the time fixed upon, the Shah has declared the concessions and agreement with him void.

The German Press regard the verdict in the case of Marshal Bazaine, as the result of political intrigue, and think he has been unjustly condemned.

The Dutch government has received intelligence that 9000 troops belonging to the expedition which lately left Batavia for Acheen, have effected a landing on the coast of that country without opposition.

The Emperor of Russia has ordered the Grand Duke Alexis on another journey around the world next spring.

The balance sheet of the Universal Exhibition at Vienna shows a loss of 19,700,000 florins.

UNITED STATES.—There were 273 interments in Philadelphia last week, and 475 in New York.

Deep snows have fallen on the line of the Central Pacific Railroad, but as yet no delay has occurred.

The New York and Erie canal navigation has been closed for the season, the ice being from eight to ten inches thick in portions of the canal.

The new postal treaty between the United States and Germany, providing for an interchange of postal cards between the two nations, has gone into effect. The treaty includes not only the German empire, but also Austria, Hungary, &c. A one cent stamp is required upon the postal card before it can be forwarded.

The proceedings of Congress have been for the most part unimportant. The question of repealing the act of last Congress making a large increase in the salaries of the members, has been debated in the House of Representatives, and a great number of bills and resolutions on other subjects have been introduced in both Houses. The House of Representatives has decided to adjourn from 12th mo. 19th to 1st mo. 6th.

The distinguished scientist, Louis Agassiz, died in Boston last week, in the 67th year of his age. He was a native of Switzerland, but had resided many years in the United States, and for the last 26 years had been professor of geology and zoology in Harvard University.

The Markets, &c.—The following were the quotations on the 15th inst. New York.—American gold, 111½. U. S. sixes, 1881, 119½; ditto, 1865, 116; 10-40 five per cents, 112½. Superfine flour, \$5.80 a \$6.25; State extra, \$6.65 a \$7.10; finer brands, \$7.50 a \$10.25. No. 2 Chicago spring wheat, \$1.62; red western, \$1.58 a \$1.60; white Indiana \$1.75. Oats, 56½ a 59 cts. State rye, \$1.09. Western mixed corn, 79 cts.; yellow, 81 cts.; white, 83 cts. Philadelphia.—Middlings cotton, 16¼ a 17¼ cts. for uplands and New Orleans. Refined sugar, 7¼ a 8 cts. Superfine flour, \$5 a \$5.50; extras, \$5.75 a \$6.50; finer brands, \$7 a \$10.25. Red wheat, \$1.58 a \$1.60; amber, \$1.64 a \$1.68; white, \$1.75 a \$1.85. Rye, 95 cts. Old yellow corn, 77 a 78 cts.; new, 67 a 70 cts. Oats, 53 a 58 cts. Smoked hams, 11 a 13 cts. Lard, 8½ a 8¾ cts. Clover seed, 8 a 9 cts. About 3000 beef cattle sold at the Avenue Drove-yard. Extra at 7¼ a 7½ cts. per lb. gross, and lower grades at 4 a 7 cts. Sheep sold at 5 a 6¼ cts. per lb. gross. Receipts 13,000 head. Corn fed hogs sold at \$7.50 a \$7.75 per 100 lbs. net. Receipts 7000 head. Chicago.—Spring extra flour, \$5.25 a \$5.75; winter superfine, \$7.50 a \$7.75. No. 1

spring wheat, \$1.18½; No. 2, \$1.16½; No. 3 do., \$1.08½. No. 2 mixed corn, 54 cts.; new, 50 cts. No. 2 oats, 39½ cts. Rye, 78 cts. No. 2 fall barley, \$1.42. Lard, 8¾ cts. St. Louis.—No. 2 spring wheat, \$1.18 a \$1.19; No. 2 winter red, \$1.65. Yellow corn, 60 a 61 cts. No. 2 Oats, 44½ a 45 cts. Lard, 7¾ cts. Cincinnati.—Wheat, \$1.45 a \$1.47. Old corn, 60 cts.; new, 55 cts. Oats, 42 a 50 cts. Barley, \$1.25 a \$1.55. Rye, 95 cts.

The Committee of The Yearly Meeting to visit the Subordinate Meetings, will meet on the 20th inst. in the Committee-room, Arch St., at 10 o'clock A. M.

The renewed attention of Friends is called to the following works for sale at FRIENDS' BOOK STORE.

- Sewel's History of the People called Quakers.
  - Journal of the Life and Travels of George Fox.
  - R. Barclay's Apology for the True Christian Divinity.
  - Journal of John Richardson.
  - Do. Richard Jordan.
  - Do. Henry Hull.
  - Do. Thomas Chalkley.
  - Do. William Savery.
  - Do. John Churchman.
  - Do. Thomas Ellwood.
  - Do. Elizabeth Collins.
  - No Cross No Crown, by William Penn.
  - Rise, Progress and Key, do. do.
  - Letters of John Barclay.
  - Do. on Religious Subjects, by John Kendall.
  - Do. of Elizabeth, Lucy and Judith Ussher.
  - A Compendium of Religious Faith and Practice, by Murray.
  - Extracts from the Papers of Edwin Price.
  - Life and Gospel Labors of John Woolman.
  - Do. do. do. Richard Davies.
  - Do. do. do. Abel Thomas.
  - Do. do. do. Samuel and Mary Neale.
  - Life and Religious Services of William Evans.
  - A Concise Account of Friends, by Thomas Evans.
  - Examples of Youthful Piety, do. do.
  - Piety Promoted. By William and Thomas Evans.
  - Evans' Exposition of the Faith of Friends.
- PAMPHLETS.
- True Christian Baptism and Communion.
  - Ancient Testimony of the Society of Friends.
  - Memorials of Deceased Friends.
  - Reasons for the Necessity of Silent Waiting.
  - Letters to Susanna Sharpless.

The following are published by the "TRACT ASSOCIATION OF FRIENDS:"

- Biographical Sketches and Anecdotes of Friends.
- Bound Tracts, in 2 volumes.
- Brief Account of Sarah Grubb.
- Mary Dudley and Daughters.
- A Mother's Legacy to her Daughters.
- Some Account of Ann Reeve.
- Divine Protection through Extraordinary Dangers.
- Memoir of Rachel C. Bartram.

The following Books are sold by Jacob Smedley, independently of those published by the "Book Committee."

- Dictionary of the Holy Bible, (illustrated.)
- The Wheat Sheaf.
- Gleanings from Pious Authors.
- Historical Memoirs of Friends. By Wm. Hodgson.
- Reformers and Martyrs, before and after Luther. By Wm. Hodgson.
- Glimpses by Sea and Land. By M. L. Evans.
- Power of Religion. By L. Murray.
- Gleanings at Seventy-five. By S. Lukens.
- Social Hours with Friends. By M. S. Wood.
- A History and General Catalogue of Westtown Boarding School, 2d edition. By W. W. Dewees.
- Selections of Religious Poetry.
- Dymond's Essays on Morality.
- Plain Path to Christian Perfection.
- A Guide to True Peace.
- Food for Young Appetites.
- A Plea for the Dumb Creation.
- The Book of Birds.
- The Book of Animals.
- A Ladder to Learning.
- The Arm Chair.
- Parents' Gift.
- Original Poems. By Taylor.
- The Child's Treasury.
- Brief Account of William Bush.
- Last illness and Death of Jane Wheeler.
- Dress, and Worldly Compliances.
- On the Mountain. By M. E. Atkinson.
- Picture Pages for Little Children.

ERRATA.

In the essay "Mixed Marriages," in the last 16 No. of "The Friend," page 122, on the 17th line from the beginning, for harmonizing read harmonize. And the same, 3rd col. and 25th line from the top, for read more.

FRIENDS' FREEDMEN'S ASSOCIATION.

A Public Meeting will be held in the Committee room, Arch Street Meeting-house, on Third-day evening, Twelfth month 23rd, 1873, to hear the report M. C. Cope and James E. Rhoads, the committee late visiting the schools. All are heartily invited to attend. By order of the Board,

JOHN B. GARRETT, Secretary.

Philada., 12th mo. 16th, 1873.

WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

- Nathaniel N. Stokes, Cinnaminson Post-office, Burlington Co., N. J.
- Charles Evans, No. 702 Race St., Philadelphia
- Deborah Rhoads, Haddonfield, N. J.
- Rebecca S. Allen, No. 335 S. Fifth St., Phila.

FOR RENT

To a Friend, the small dwelling on the meeting-house property, West Philadelphia. An oversight of the property will be accepted as part of the rent.

- Apply to JOHN C. ALLEN, Forrest Building, 119 South Fourth street.
- HENRY HAINES, 512 Walnut street.

FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term.

Application may be made to Ebenezer Worth, Marshallton, Chester Co., Pa. Joseph Scattergood, 413 Spruce St., Philada. Aaron Sharpless, Street Road P. O., Chester Co., Pa. Thomas Wistar, Fox Chase P. O., Philada.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, 12th mo. 1st, 1873, MARY T. ISAAC, wife of William Isaac, in her fifty-fifth year, Matron of the Emlen Institution, Warminster, Bucks Co., Pa., a member of Buckingham Monthly Meeting of Friends, after a short and severe illness, during which she had a clear view "of a beautiful country where all were happy." She heard a voice say, "thou mayest be pure." Expressing great thankfulness that she "had not deferred preparation for death until now, her poor body has all it can bear with the pain and suffering from its diseased condition." "Through the acceptable goodness and mercy of my dear Saviour, all will be well with my soul if taken now." Feeling resigned to part with her beloved husband and children, and willing, if the Lord's will, to remain longer to be an instrument in His hands for the good of the poor colored children, amongst whom she believed He had called her to labor. To the colored lads of the Emlen Institution, she had been as a tender mother for nearly 20 years; her affectionate and earnest counsel and prayer in her labor of love for the souls of these boys, continued to the last. Near her close, taking each child by the hand, she directed them to their Saviour, and bade them farewell. Their tears and emotions showed how they felt at the parting. She admonished them about her to prepare for death while in health, saying, a sick bed is not the place to prepare for death." Her purified spirit was calmly released and is, we humbly trust, through the mediation and atoning blood of our dear Saviour, now an inhabitant of that "beautiful country," where the wicked cease from troubling and the weary are forever at rest.

WILLIAM H. PILE, PRINTER. No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, TWELFTH MONTH 27, 1873.

NO. 19.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

## Sub-tropical Rambles—by Nicolas Pike.

In this volume, the author, who is or was United States Consul at the Island of Mauritius, not only gives the history, statistics, &c., of his adopted home, but describes the peculiar customs of the Indians who inhabit it, its rambles over its mountains and shores, the characteristics of the adjacent islands, and especially the natural productions of the land and the surrounding waters. He was a corking naturalist, and waded on the coral reefs collecting the various denizens of these various formations, as well as acquiring much interesting information respecting their habits.

Many of the inhabitants of those tropical waters, are more or less dangerous to the unroteeted fisherman. Not to mention the sharks which abound in the deep waters, and are very voracious, the various kinds of spiny shes are much dreaded, and the eels which elsewhere are harmless, here grow to an enormous size, and often attack the unwary intruder on their haunts. N. Pike says:

"Nearly all the eels I have here met with resemble snakes in the manner of elevating their head, and the fierce way they turn on a man when disturbed. One cunning fellow, I think the *Anguille morele*, often gives the unwary fisher a sharp bite. It grows about two feet long, and is of a sandy color, with its tail tipped pink. The fin is scarcely perceptible round the tail, which is stiff and pointed, and with it he digs a hole in the muddy bottom, deep enough for him to stand at the end in. Here he waits for his prey, with his head only visible, his keen eyes allowing nothing to escape him, and being so colorless under water he often catches the fishermen's legs or hands as they grope about after catch."

In describing a visit to Mapou Bay, he tells of the capture of one of the largest species. On a little projection of rock running out into the bay, I amused myself watching the gambles of the small fish as they disported in the shallow pools. In one little basin, containing about six feet of water clear as crystal, there were several small *Chatodons*, and amongst them two or three of the richly colored *Holothurus semicirculatus*. The body of this fish is of glossy black, with perpendicular lines

from the top of the head to the pectoral fins, alternately of the purest white and brightest imperial blue. When not frightened, it will swim gracefully round and round in circles, glancing its bright golden eye at the intruder; but make the slightest movement, and, like a flash of light, it disappears to its hiding place, and remains till the fancied danger is past. I was watching one of these lovely little creatures, almost breathless lest I should disturb it, when suddenly it vanished; and I was curious to see the cause of its panic, as I was quite innocent of it. After waiting a few seconds, I caught a glimpse of the head of an eel, not larger than a man's thumb, protruding through an opening in the coral bed four inches wide. Finding that the animal did not come out, and that he was evidently lying in wait for his prey, I determined to take him, if possible; so baited a good sized hook, and suspended it over his hole. Hook and bait were seized, and I saw that I had an ugly customer to deal with, a large savage fellow. I prepared a cod hook with steel chain, and baited and attached it to a good-sized cod line. He seized greedily, and with a jerk I drew out his head. I called loudly to Jumna, who was a weak siekly little man, to hold on tightly to the line, while I jumped into the water to spear him. He didn't half like the job; however, he held on. I carefully approached the hole when the brute came at me boldly. I was a little too quick for him, and planted my grains into his neck, about six inches from his head. We then began hauling him out, but it took all our strength to handle him, for he resisted furiously. We pulled away nine feet, and still saw no end to his body—ten feet! eleven feet! 'Why,' said I 'we have caught a young sea serpent.' Twelve feet! and his tail began to wriggle out. I then quickly retreated to the rock, and we made for the shore, dragging our game; and even on land we had much ado to hold him, till I despatched him by severing the vertebrae with my hatchet.

This monster eel measured twelve feet three inches in length, and round the largest part of the head fourteen and a half inches. The head of this species terminates in a blunt point, the two small bright eyes not more than an inch from the end. The large mouth is filled with long sharp teeth, even the roof is covered with these formidable weapons. This eel is very dangerous, but not so common as reported. There are several species of this genus, but none so large as this. The fishermen call it the 'Cave Eel,' its specific name I do not know. I was not a little proud of my game, so kept him, and on my return had him stuffed, and he now hangs on my office ceiling."

Our author thus introduces us to another fish which requires cautious handling. "We pass a little pirogue tossing about on the waves with two men in it, one pulling and the other sorting his fish. As we pulled by

him, to our questions as to what he has caught, after showing us some packets assorted ready for sale, he held up one of the most dreaded fish of the coast, the Mud Laff (*Synanceia brachia*), abundant all round the island, and considered good food by the lower classes.

This most hideous and disgusting-looking fish averages from 16 to 18 inches in length. The spongy, wrinkled, leprous-like skin is ordinarily blotched with white-grey and brown, on an olive ground, but is generally so covered with mud and weeds that it is only after a great deal of trouble that it can be cleaned so as to show its true colors, as it seems to exude a glutinous matter which, attracting anything it comes in contact with, forms a thick coat over the whole body. The dorsal resembles an irregular row of tubercules, each with a spine rather than a fin, and the short wide puffed out pectorals give it a dull appearance when swimming, as if it had a ruff round its neck. Being the color of the mud, it is difficult to distinguish it at a short distance, and its very small bright eyes at the top of the head enable it to lie in wait unseen by its victims; the ventrals lie flat in the ooze, and the uneouth head is drawn back so that the great vertical mouth stands wide open to catch any unwary fish that pass his way. The prey is sucked in and swallowed, but it is a sorry day when human hand or foot inadvertently touches it. I have hitherto managed to escape them in my wadings in search of marine curiosities, but I always keep a very sharp lookout, and wear the thickest of long boots.

Grand River, is said to be especially infested with laffs, and during a visit there the fishermen cautioned me about going into the water, as I should be sure to be 'piqued. However, I wished to make some experiments with this fish, so went expressly with the hope of capturing some. The truth of their abundance was soon verified, and an old expert that I had taken the caution to secure as assistant quickly procured me several specimens. We placed them alive in a vessel prepared for the purpose.

One large one I laid on a dish, and tickled him under the pectorals, when the dorsal, which usually lies in a lumpy mass on the back when undisturbed, was quickly raised, and in a few seconds, when I touched the dorsal, the fish, with a spasmodic effort, ejected a greenish slimy substance through the hollow spines, and this I concluded to be the poison injected into wounds, making them so difficult to cure. To prove the dangerous nature of this poison, I punctured the ball of the fore-paw of a kitten with one of the front spines (said to be the worst). The animal was immediately affected, and died of convulsions in an hour.

I saw a poor fellow near Tamarind Bay who had trodden on a laff, which wounded the ball of the great toe on the right foot. It was much swollen when I looked at it.

I at once opened the wound with a scalpel, and applied a strong solution of liquor ammonia to it. His comrades made a poultice of the leaves of the *Ehretia petioles*, and applied it; and in about an hour's time he began to feel a little relief. I gave him also a good glass of brandy to keep up his courage, for he was near fainting from the agony he endured, and his state of alarm lest lockjaw should ensue was pitiful to see. I afterwards learnt that he felt the effects of the wound for a very long time. I have seen several such cases since, and one especially terrible in the hospital, where the puncture was on the sole of the foot, and no aid had been given till some hours after. The foot and leg swelled tremendously; and after some days the wound sloughed, leaving a large hole. It was over two months before the man was able to be discharged."

(To be concluded.)

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 139.)

"1820, 3rd mo. 5th. This day two precious Friends have been permitted in an awful manner to pass from this scene of probation into that city which needeth not the light of the sun nor of the moon. How uncertain the tenure of human existence! As they were crossing the Delaware on the ice, to visit a beloved friend, it broke, and they were ingulphed in the mighty water. To them it was no doubt a happy passport to that haven of rest, for which they had been laboring many years; and they now reap the reward of their labors in the bosom of the church triumphant far above the heavens. Could we hear the voice of their departed spirits, methinks they would say: Daughters of Jerusalem weep not for us, but weep for yourselves and for your children. We are happy, and rejoice that our work was cut short in righteousness. No: we do not mourn for you, precious sisters, so much knowing yours is great gain; but mourn the church's loss in the removal of her pillars. May we centre to the gift within and acquiesce in His will, who doth all things well. Perhaps it was his good pleasure to take them by a shorter road to Heaven than some, as he did Elijah; and let us, like Elisha, ask not for them, but for a double portion of the spirit that was upon them; that so we may be able if required, to step into their places, and thus fill up the chasm left. This would be an acceptable sacrifice in the sight of Him who seeth not as man seeth, and would also prove a blessing to us.

3rd mo. 17th. How poor is man. How poor am I? Poor without Christ—his life, his light, his strength: but with him rich. By his power able to do all things, and to suffer all things; because he is Almighty. His power is invincible. He knoweth all our trials, and having been tempted in all points as we are, is able to succor them who are tempted, and ever liveth to make intercession for us. How great is the goodness of the Lord! Oh my soul, mayest thou never forget his manifold mercies bestowed upon thee! Let it be thy concern often to inquire, what shall I render unto thee, O Lord! for all thy benefits? And in humble resignation mayest thou adopt the answer, "I will take the cup of salvation and call upon the name of the Lord now in the presence of all his people." For he has indeed preserved my feet from

falling, therefore to him belongeth praise forever. May I ever endeavor to live under the government of this blessed Teacher sent from God, that, haply in that period, when this tabernacle of clay may be about to be consigned to the narrow house, the soul may rise triumphant above the fear of death, rejoicing in the hope of a glorious immortality.

May I continue steadfastly devoted and dedicated to the will of my Heavenly Father; and, as the clay in the hand of the potter, stand passive. Not anxiously enquiring what doest thou? But resting my all in his hand, hold myself not as my own, but the Lord's. And thus, whether the north or the south wind blow upon my garden, whether my lot be as among the pots or on the mountains, whether surrounded with sorrows, or whatever be my situation, my soul in this holy confidence can rejoice; because, The Lord is my shepherd, and all his sheep shall witness the refreshing bounties of his table to be indeed better than corn, wine or oil.

'Give what thou canst, without Thee we are poor, But with Thee rich, take what thou wilt away.'

3rd mo. 26th. A series of engagements, both of body and mind, have of late prevented my adding any matter to this manual; although not less willing to acknowledge to the goodness of Christ than formerly. But my poor spirit has been much depressed of late, from an apprehension, that after having thus far been made to confess before men, in measure, my desire that the kingdom of Christ may come, I should now fall from the steadfastness of faith, and so never become what my dear Lord designed I should. In seasons of fears and reasonings like these, Ob! how does the soul weep and mourn; and at seasons adopts the language of poor Zion, 'The Lord hath forsaken me.' Yet being secretly supported by the everlasting Arm, although not seen, we are preserved; and in His time made to acknowledge, Though sorrow endureth for a night of deep proving, yet joy cometh in the morning. The christian's life is a warfare. It consisteth not in the abundance of the things which he possesseth, but in the strength of his Captain. The wise king Solomon justly addresses the child of grace, 'My son if thou come to serve the Lord, prepare thy heart for temptation.' Notwithstanding this, there are seasons when the devoted soul can feelingly rejoice in the Lord, and count it all joy when he falls into manifold temptations. Knowing that the trial of his faith is more precious than gold; and that he has an advocate with the Father, who was himself tempted, and knows how to succor them that are tempted. May all be engaged then in seasons of trial, to come boldly, through Divine aid, to the throne of grace in full assurance of faith; that so Christ may become our righteousness, sanctification, and redemption.

4th mo. 24th. Now that our annual assembly is passed, what canst thou say of the benefit thereof? Has it been to thee a season of spiritual consolation? Or like the heath in the desert, has thou been heedless of good when it cometh? With unconcern, suffering other things to occupy the time, and thus has left no room for the introduction of the rain of Heaven? Though ere the time arrived for this large gathering, my spirit was reduced to so low an ebb as not to feel anxious; but rather a willingness begotten to be poor, stripped and destitute, what if I say an indifference to the scenes below;—to all that can be

received through the aid of mortals—and a craving to be found as clay in the hand of the great Potter, whether fruit be on the vine for me, or my dwelling remain as in the region and shadow of death, where my soul oft feels herself left, yet not forsaken; because a grain of faith is in mercy vouchsafed, supporting above the billows, which otherwise would overwhelm my little bark. 'The great I Am,' still condescends to hear his little ones who have none in Heaven but him, nor in all the earth in comparison of him. And truly it is my lot to go through this scene of change without much of that sympathy and help from brethren and sisters, with which some others are favored. No doubt this is in best Wisdom, that all my springs may be in Christ, the Alpha and Omega; whose goings forth have been from old, from everlasting.

May he in the riches of his goodness, pour upon me, if consistent with his blessed will the spirit of power, that haply all the good pleasure of his will may be wrought in and upon me to the praise of his grace; even me who have long travelled in weakness and fear and much trembling. Who hast often, very often been ready to say, there is no way for me. I shall surely one day fall. Yet trusting to the sufficiency of Israel's unslumbering Shepherd, I do crave that as in seasons over and past, I may cast every crown at His feet and acknowledge, by Thy might all things may be done. Thou, who hast begun the work and carried it on thus far, I trust to for ability still to journey forward in the way of holiness. Thy ways, O Lord, are past finding out. Thou art a companion of all them that fear thee, and that trust in thee. Teach me thy statutes."

(To be continued.)

For "The Friend."

### The Approaching Transit of Venus.

(Concluded from page 138.)

Some of the observations of the transits of 1761 and 1769 were used for determining the solar parallax on the principle described in the early part of this article. But as this method is of limited application, other methods of observation and calculation were adopted which would make available the important data that might be furnished by the numerous observers who were located at places where the *whole* of the transit was not visible. In these cases the object was to ascertain with reasonable accuracy the difference in the absolute time of the beginning, or of the ending of the transit at two stations whose difference of longitude was considerable. Most of the preparations for the approaching transit have been based on this latter method somewhat extended and improved; the aim being to establish a company of observers at suitable locations as near as practicable to each of the two places on the earth where the transit will begin the earliest and where it will begin the latest; also to select stations near each of those two other places where the transit will end the earliest and the latest; that thus the *maximum effect* of parallax on the times of the beginning and end of the phenomenon may be observed and measured. This method is sometimes known as Delisle's or the French method. It has, however, the disadvantage that the exact longitude and true local time of each station must be known. In the method of observation which was suggested by Halley on the other hand, the entire progress of the

transit from beginning to end must be watched from two remote stations, and the exact interval of time between the beginning and end must be ascertained at both. But the special recommendation of this method is that either the exact longitudes nor the local times of the stations are required. It is obviously a very desirable thing that two plans of observation so distinct in principle and in detail should be employed in order that the one may be used as a check upon the other. But there is a still stronger reason for the employment of both methods, depending upon the fact that sometimes the one and sometimes the other method of observation is best adapted to the circumstances of the time when the transit takes place. It occasionally occurs that good results can be secured by Delisle's process when stations suitable for the employment of Halley's process are not to be had, and sometimes the converse is the case.

A very long interval commonly lies between successive transits, because during that time the planet passes either above or below the face of the sun as it sweeps round that luminary, at a nearer distance, and with greater speed, than the earth. The planet is only seen on one face of the sun when the orbital paths of both itself and the earth are so arranged as to permit the planet to be diametrically between the earth and the sun as it traverses this part of its journey, passing the earth on account of its greater speed. It, however, generally happens when this planet has once passed over the sun's face after the long interval, that it may be seen there again after a comparatively short lapse of about eight years. This occurs because the first time the planet goes round again to overtake the earth in the position in which it lies between it and the sun, the relative courses of the two tributary bodies have not departed from each other enough to carry the planet clear of the sun's face either above or below. It is therefore again seen upon that face as it sweeps by. This is the reason why there was a transit of Venus in 1761, eight years before the historical transit associated with the name of Captain Cook, and this is why there will be a transit again in 1882, eight years after the transit of 1874, for which preparations are now in rapid progress. After the year 1882 no further opportunity for the revision of the estimates of the sun's distance by this royal method of observation will occur again until the years 2004 and 2012.

In the early preparations for the observation of 1874 it was assumed that the arrangements should be directed towards carrying out the operations upon Delisle's plan. The Astronomer Royal, after a careful consideration of the whole subject, came to the decision that the five best stations that could be fixed upon for government observers to be employed would be Alexandria,—Woahoo, one of the Sandwich Islands in the North Pacific,—Rodriguez Island to the northeast of Manriua,—Christchurch in New Zealand,—and Kerguelens Island far south of the Indian Ocean; and that on these stations Delisle's method of observing first and last contacts at different stations would have to be mainly, if not exclusively, adopted.

A grant of public money to the extent of the requirements of the equipments on this case was arranged, and the preparation for the work was systematically entered upon. A new prophet, however, shortly afterwards

arose. In the midsummer of the year 1869, R. A. Proctor presented a memoir to the Royal Astronomical Society, in which he questioned the soundness of the view which had been authoritatively adopted, and supported his argument in the matter by a method in which he is peculiarly skilled, namely, the diagrammatic, or pictorial, representation of the conditions of the question in the form of six orthographic maps representing the course of the transit for different parts of the earth. With these maps for the device upon his shield, he affirmed that the old Halley method of observing the entire duration of the transit from remote stations of the earth would be found to promise better results in 1874 than Delisle's method, even with the Astronomer Royal's own stations of observation, and that it would yield materially better results, if other possible positions were also occupied in the Antarctic Ocean.

After having given a careful consideration to these representations and arguments, the Astronomer Royal continues to be of opinion that the difficulties and disadvantages of occupying high northern and southern latitudes, for the sake of securing a wide and suitable base for the more extended application of Halley's method of observing, more than counterbalance the advantages that might be secured by the proceeding; and that arrangements for doing so are unnecessary, because in the present state of astronomical science, with the improved facilities at command for the exact settlement of longitudes, even better results will be secured by the application of Delisle's method without the enlarged base than could be obtained by the most advantageous application of Halley's method. Good observations at Kerguelens Island, when compared with observations of the duration of the transit at French, German, and Russian stations near Japan, will, nevertheless, in reality give fair means of using Halley's method, if at any time held desirable to do so; and observations both at Rodriguez Island and Christchurch may also be utilized in the same way, as the entire transit will be visible at those stations. But if the views which have been for some time gaining ground among practical astronomers of all nations are correct, it will never become necessary to apply the method even as a check, simply because when the longitudes of good stations of observation are accurately and exactly known, Delisle's method, virtually based upon the comparison of the absolute Greenwich times at the different stations, is unquestionably superior to the less refined Halley's method of comparing the durations at the different stations.

The Astronomer Royal, of course, cannot be presumed to be yet endowed with the attribute of infallibility. But no one who is familiar with Sir George Airy's distinguished career, and who has marked his able and painstaking administration of the affairs of the National Observatory during a period of thirty-seven years, can doubt he has well considered his ground in the position that he has assumed, and knows what he is doing; as must also the large band of experienced French, German, Russian, and American astronomers, who have not joined in the admonitory cry that has been raised by one single English voice. One distinctly expressed anxiety of the Astronomer Royal has been that, with the limited means at his disposal, and which, it

will be remembered, it is one part of his onerous duty to apply in the best possible direction, it has not been possible to include the Marquesas Islands, and some other desirable stations in the Pacific, in his operations. This anxiety is only in part removed by the welcome announcement just made that Flourien, an experienced naval officer and competent observer, will be sent to the Marquesas by the French Government, who, by this act, will make a very material and valuable contribution to the work.

England, in its possibly too narrow and too economical treatment of the grand opportunity the approaching transit affords, will not be alone in the interesting and important labor. R. A. Proctor, not having to administer the limited allowance of public money awarded for this service, may mourn over the conception of England not standing in the van of the movement, or perhaps accomplishing its objects single-handed. But the Astronomer Royal, with a more cosmopolitan sense, in all probability feels that the result will no less certainly be secured under the admirable spirit of co-operation and consent that binds nation to nation, where the noblest achievements of science are concerned. Thus American astronomers intend to secure photographs of the transit wherever the sun is ten degrees above the horizon through the entire duration of the phenomenon, and wherever the effect of parallactic displacement is most pronounced. They will certainly have leading stations at Wladiwostok, near Yokohama and Peking, and in some other parts of China, Japan, or the adjacent isles, and also in one of the Sandwich Islands. The Germans will occupy three principal stations and eight subordinate ones, at which measurements will be made of the distance of Venus from the nearest and furthest points of the sun's limb throughout the occurrence of the transit, and at which also times of first and last contacts will be taken, and photographic pictures be secured. Russia will fill no less than twenty-seven stations, scattered through Eastern Siberia, and stretching between the Caspian Sea and the mouth of the Amoor, at all of which first and last contacts will be observed.

The finest instruments, especially prepared for this work by such men as Repsold, Fraunhofer, Steinheil, and Dallmeyer, will be provided for all these several stations, and the observing staff will be trained, at Berlin, under the superintendence of Professor Anwers, at Pulkowa under that of Otto Struve, and at Washington under the care of Rear Admiral Sands. Among other refinements of instrumental ingenuity it is worthy of note that Janssen intends to employ an apparatus which will enable him at the time of expected contacts of the planet with the sun's limb to record at almost continuous short intervals a series of photographic impressions, which must therefore include in the series the one giving the true contact, the time of its occurrence being simultaneously marked.

The transit of 1874 occurs on the 9th of Twelfth month, but no part of it will be visible in any portion of the Western Continent excepting, perhaps, the southern end of the peninsula of Alaska. It will also be invisible in the northwestern part of Africa and in about one half of Europe, say in all that portion which lies north-west of a line extending from the west end of Sicily to that point in

the eastern boundary of Europe where the arctic circle crosses the Ural Mountains. On the contrary the transit of Twelfth month 6th, 1882, will be visible throughout the whole of North and South America, excepting, of course, nearly all that portion of the former which is included within the arctic circle. It will also be visible in Africa and in the southwestern part of Europe. The inhabitants of South America and of the eastern portions of the United States, Canada and Mexico, will have the opportunity (weather permitting) of witnessing this rare and interesting phenomenon from the beginning to the end. On that occasion the planet will be seen on the sun's disk for about six hours. In 1874 it will cross the sun along a line more remote from the centre of the latter, and in consequence of this the passage will be accomplished in about four hours. It may be worth while to add, that in 1878, nearly midway between the two transits of Venus, there will be a transit of *Mercury*. It will be due on the 6th of Fifth month, and the whole transit will be visible in the United States.

*In Patience Possess Ye Your Souls.*—The soul loses command of itself when it is impatient; whereas, when it submits, without a murmur, it possesses itself in peace, and God is with it. To be impatient is to desire what we have not, and not to desire what we have. An impatient soul is a prey to passions unrestrained, either by reason or faith. What weakness, what delusion! When we acquiesce in an evil, it is no longer such. Why make a real calamity of it by resistance? Peace does not dwell in outward things, but within the soul. We may preserve it in the midst of the bitterest pain, if our will remains firm and submissive. *Peace in this life springs from acquiescence even in disagreeable things, not in an exemption from suffering.*—*Fenelon.*

"My peace I give unto you, not as the world giveth." The world, it is true, promises peace, but it never gives it; it yields us some fleeting pleasures, but they cost us more than they are worth. It is the religion of Jesus alone that can give peace to man; it unites him with the Saviour; it subdues his passions, it controls his desires, it consoles him with the love of Christ; it gives him joy even in sorrow, and this is a joy that cannot be taken away.—*Fenelon.*

If I were seriously persuaded that the life of a Christian is a life of patience and self-denial, if in sincerity and truth I loved Jesus Christ, who suffered and humbled Himself for me, should I be contented with talking of trials when I am called upon to bear them, with giving lessons to my neighbors and not applying them to myself? Should I be so impatient with the infirmities of others, so discouraged by obstacles, so disquieted by little troubles, so sensitive about human friendship, so jealous and intractable toward those whom I ought to conciliate, so severe toward the faults of others, so lenient and so backward in mending my own? Should I be so ready to murmur at the trials by which God would prove my virtue?—*Fenelon.*

So to live that when the sun  
Of our existence sinks in night,  
Memorials sweet of mercies done  
May shine our names in memory's light,  
And the blest seeds we scattered, bloom  
A hundred-fold in days to come.

*Bowring.*

#### PUTTING OFF THE ARMOR.

Selected.

Why weep ye for the falling  
Of the transient twilight gloom?  
I am weary of the journey,  
And have come in sight of home.

I can see a white procession  
Sweep melodiously along,  
And I would not have your mourning  
Drown the sweetness of their song.

The battle-strife is ended;  
I have scaled the hindering wall,  
And am putting off the armor  
Of the soldier—that is all!

Would you hide me from my pleasure?  
Would you hold me from my rest?  
From my serving and my waiting?  
I am called to be a guest!

Of its heavy, hurtful burdens  
Now my spirit is released:  
I am done with fasts and scourges,  
And am bidden to the feast.

While you see the sun descending,  
While you lose me in the night,  
Lo, the heavenly morn is breaking,  
And my soul is in the light.

I from faith to sight am rising,  
While in deeps of doubt you sink;  
'Tis the glory that divides us,  
Not the darkness, as you think.

Then lift up your drooping eye-lids,  
And take heart of better cheer;  
'Tis the cloud of coming spirits  
Makes the shadows that ye fear.

O, they come to bear me upward  
To the mansion of the sky,  
And to change as I am changing  
Is to live, and not to die;

Is to leave the pain, the sickness,  
And the smiting of the rod,  
And to dwell among the angels,  
In the city of our God.

*Alice Cary.*

#### THE DANDELION.

My childhood's earliest thoughts are linked with thee;  
The sight of thee calls back the robin's song,  
Who, from the dark old tree  
Beside the door, sang clearly all day long,  
And I, secure in early piety,  
Listened as if I heard an angel sing  
With news from heaven, which he did bring  
Fresh every day to my untainted years,  
When birds and flowers and I were happy peers.

How like a prodigal doth Nature seem,  
When thou, for all thy gold, so common art!  
Thou teachest me to deem  
More sacredly of every heart,

Since each reflects in joy its scanty gleam  
Of heaven, and could some wondrous secret show,  
Did we but pay the love we owe,  
And with a child's undoubting wisdom look  
On all the living pages of God's book.

*J. R. Lowell.*

#### Our Migratory Birds—When and Where They Go.

(Concluded from page 140.)

The wild pigeons move south from the dense forests of the Northwest and West, at this season, in hordes. Audubon, in his "Birds of America," gives an account of a migration of these birds. He counted one hundred and sixty-three flocks of wild pigeons passing a given point, in Ohio, during twenty-one minutes; and he left off counting them because he found it impossible to keep an accurate account of the great numbers in flocks. He said: "The light of noonday was eclipsed, and the buzz of their wings had a tendency to lull the senses to repose; if a hawk approached their rear, they rushed into a compactness like a torrent and with a noise like thunder."

But this was long ago; now, notwithstanding the bird quadruples itself yearly, owing to the diligence of the modern sportsman, the multitudes of the wild pigeons in our forests are greatly diminished. This bird flies with great rapidity, and resorts to the southern and southwestern States during the winter.

The night-hawk, whose returning screech salutes our ears in New York in the late warm May twilights, as they circle far above the house-tops, make an extensive migration. Their range is from Maine to Mexico, and in October they pass in great numbers over the table lands of Texas, over the Rio Grande and the western shores of the Gulf into the sunny valleys of the Sierra Madre. These birds are rapid in flight and very graceful in evolution. The changing seasons impel a corresponding change of habitation to divers hawks and falcons which raise their young in northern latitudes, but which move southerly with the moving sun. The garrulous crow, which is gregarious after its brooding, resorts in flocks of thousands down the Atlantic coast; the cuckoo, the friend of solitude: the whip-poor-will, crying its mandate from the most sequestered glens, take wing for more salubrious airs; and the humming-bird, whose motion is swifter than the eye can follow, and whose beauty, like that of blossoms, seems born of the untwisted rays of sunlight, flies far towards the Equator into the realms where the soft trade-winds blow. The humming-bird has been caught and confined in conservatories in the middle states, but has never lived through a winter's captivity. It raises two young birds only in a summer.

The amphibious birds follow fast in the wake of the denizens of our woods, swamps and meadows. The Canada or wild goose, which in spring is seen by myriads on flight to the far North—to Anticosti Island, the Maydeleins, to Bay Chaleure, Labrador, few stopping even in Nova Scotia—where they breed, is now departing thence. They arrive on the Upper Lakes in October, and towards November they wing past in flocks, keeping in the course of rivers and streams, to the neighborhood of the inland bays and waters of the Southern States. Of the ducks, which take warning as the sun crosses the equinox, and hasten to the broad lagoons and estuaries which indent the southeast coast, it is a pleasure to speak and to think. The first in point of favor in the *cuisine* is the canvas-back. This bird harbors, in winter, principally, on the shores of the Chesapeake Bay, and the Santed River; his home in summer is in the north west, in the plains and low vales of British America and Alaska, and around their inlet warmed by the Pacific gulf stream.

Other ducks, less delicate to the palate but more attractive to the eye, keep pace with this choice bird in its autumnal pilgrimage. The red-necked, the ring-necked, the velvet pied, the surf, the golden-eyed, and the Muscovy duck, almost as "good eating," say southern people, as the canvas-back, are all now making haste to put their web feet into water which is free from ice shackles. The eider, whose down lines the mantles of empresses and girdles their fair necks, flies in groups of three; he leaves Labrador by the first of August and returns there by the first of May, two weeks before the coast is free from ice. The teal, the screaming loon, and the long-necked crane, are not far behind the ducks in movement. The crane flies by day

d by night, through storm and sunshine—thing impedes his course; he arrives at the ces in the middle of October.

The American swan, little known on the stern coasts, is another bird of migratory character. According to Sir John Franklin's account the swan leaves the Polar Sea about the middle of September, and retreats to Hudson's Bay, where he remains until the middle of October. There the birds collect into flocks of twenty or thirty and then proceed on their way. They rarely follow water-courses like wild geese, but keep inland when travelling, and generally far above the highest peaks of mountain ranges. The swan is rapid flight, and when mounted, with the wind favorable, he will travel one hundred miles an hour. They prefer the Pacific coast, and they assemble in winter about the Columbia river, attending their flight as far south as California.

But, besides the numbers of flying fowl which now stream over shore and land, the atmosphere above the great oceans teems with a freight of winged creatures passing above the "multitudinous seas" safely to their home in winter warmth. And for these

Vainly the fowler's eye  
Might mark thy distant flight to do thee wrong,  
As darkly seen against the crimson sky,  
Thy figure floats along."

The great black-backed gull, the *larus marinus*, is king of all these sea-birds. He is a native of both continents, and his nest is made in the desolate crags of Labrador and Greenland, or on the high, rocky barrens of the Icy Cape, but his home is miles up in the keen, cold air, above the lashing waves of the northern waters. There he sails the blue ether, soaring like the eagle, leisurely and with elegance, in proud circles, well knowing that no other bird can attain his height. This gull is a terror to all lesser waterfowl, as he makes unremitting warfare upon them in destroying their eggs and unfledged young. "Even the shoals of the finny tribes sink into deeper waters on his approach." He resorts in winter to the warm waters around the Bahama Islands and the Florida Keys. Audubon relates having seen a pair of these gulls there alighting on a sandbar to which they had flown in from the sea; but they were extremely shy, hovering only on the outer edge of the bar towards the sea.

But these wild creatures, like many land birds, become attached to particular places, and make them afterwards their constant haunts. A story is told of a "scorris," or young black-backed gull, which, having been captured, was presented to a gentleman who resided on the western coast of Scotland. He made the young bird sufficiently tame to induce it to return and stay in the ponds within his grounds during the winter; in the spring it would fly away to the gulls' breeding places in the Arctic, but each November, or December, at latest, having forsaken its mate, it again returned to its adopted home, where it was fed during the winter. The gull continued this practice regularly for thirty years. These birds are voracious, and devour all sorts of food excepting vegetables.

The burgomaster gull is found in small numbers. He follows, like many hyperborean birds, the northwest coast of America, inhabiting Baffin's Bay, the Polar Sea and Greenland, but he is rare in the United States. The lesser gull is more numerous. The Pomeranian

jager is another fierce and destructive waterfowl. The Arctic jager, or warrior, flies far towards the Arctic seas; few birds excel this in length and power of flight. The fulmar inhabits the remotest northern fields of our sphere—possibly beyond where latitude has any reckoning. The rocky island of St. Hilda is the only locality in British America which it visits. All these boreal birds subsist upon the blubber of dead whales and seals and animal substances only. Sir John Franklin noticed, during a winter which he passed at Melville Island, a pair of ravens which remained there all winter. The intensity of the cold upon their breath had encrusted around their necks collars of frostwork, like great ruffles, which for some time adhered to them. Thus it appears there are birds which dwell continually where "treasures of snow and treasures of hail are reserved against the time of troubles." Others hibernate with us, but they are few. Those of carnivorous nature like the owls; the cross-bill, which subsists upon the seeds of the pine and spruce, and the snow bunting, which comes to us from higher regions as alms-folk, eating the seed which is scattered from hay around the haystacks, and what may chance to hang in the heads of flower-stalks which protrude above the snows.

LUCY A. MILLS.

Williamstown, Mass., October.

For "The Friend."

Should the Editors of "The Friend" be willing to republish the following extract from a letter, which appeared some years ago, written by a late deeply experienced Elder, it may afford instruction and edification to some who are greatly tried and burdened, by the present state of things in our religious Society.

After speaking of some who were puffed up with an idea of their own knowledge in religious things, and ready to condemn those who were standing firm for the doctrines of Truth, and the preservation of the hedge with which the Head of the Church has enclosed our religious Society, he continues:—

"Those restless persons, whether in youth or more advanced, being very confident, generally despise dominion, and are not afraid to speak evil of dignities; and although they have much to say, may think they have attained to considerable experience, and that they are called to the ministry; and frequently appear in the assemblies of the people under that character; yet from the opportunities that have been afforded, their communications so far from convincing that they are the channels for a purer ministry, it is seen and felt in that gift of discernment which blessed be the Lord, is yet continued to the faithful among us, that very little or nothing of the anointing power and healing virtue of the Gospel, flows through them; but that an aptitude to declaim, and if possible to sow the seeds of disesteem and division, is prevalent in them: for it is an immutable truth, that ministry without baptism is not Christ's, whatever other class it may fall under; and although they may tell a great deal about purity, perfection, and extraordinary enjoyments, they are themselves subject to the dominion of a self-seeking spirit, which, working in a mystery, may, through the vehemency and heat of their creaturely powers, make as it were, fire to come down from heaven in the sight of men.

Well may it be queried, who shall stand in

this day of close conflict between spirit and spirit? Nothing I am sure that belongs to man, with all his knowledge and acquirements, will be a sufficient defence; but it may be that the faithful are, as heretofore, to be exercised with much silent, painful suffering, having the sackcloth underneath, and little else to rest upon than the revelation which at times is graciously vouchsafed, that the foundation of God standeth sure, having this seal, the Lord knoweth them that are his. For although we are exhorted earnestly to contend for the faith once delivered to the saints, yet as the battle is the Lord's, the way of overcoming has generally been more by secret travail under deep abasement, than by open contest; and as Friends simply and humbly keep to His divine power in their own measures, He will in his own time make way for the deliverance and reign of his royal seed, the Spirit of our Lord Jesus Christ.

Let us my dear friend, not believe every spirit, for we are told that Satan hath transformed himself into an angel of light; and the great Head of the church forewarned his disciples that those should arise, who, if it were possible would deceive the very elect; having all the appearance and profession of the true followers of a vilified and crucified Lord.

Let us keep close to that which in our youth tendered our hearts, brought us into love with the way and work of Truth, into near union with those on whom the care of the churches rested, and also with the testimonies and statutes given us as a people to preserve and maintain inviolate: what fear and care it wrought, that nothing through us should arise to cause uneasiness to any, or give occasion for our elder Friends to be brought under exercise on our account. Here much fervent love towards each other was experienced, and we often felt bound up together in the bundle of life.

There is a time, and that may now be, in the present state of things, that even under much contradiction and gainsaying, it is needful for the subjects of the Prince of Peace to keep in retiredness of spirit, to be dumb, and as it were overcome by a contrary power: but though they may seem thus to be crushed and contemptuously trodden upon, they are in the hollow of His hand, and in the vision of Light enabled at seasons to realize in their experience the faith and patience of the saints in former ages, knowing the incomes of the love of God, and that the Lamb and his sincere followers will have the victory.

With much love to thee and thy dear parents, I remain thy friend,

JONATHAN EVANS."

*Ashes in the Orchard.*—D. W. Kautzman, of Des Moines, Iowa, writes to the Iowa *Home-stead* that ashes are worth one dollar per bushel to put about fruit trees, and that he would not sell his ashes at that price and do without their use in the orchard. He has used ashes about fruit trees for fifteen years, and during that time has never seen a borer where ashes were used. The borer is a terrible pest to the fruit-grower, and if all other impediments to successful growing were as easily overcome and completely controlled as the borer, then fruit-growing would be very successfully practised. At the recent meeting of the Fruit-growers' Association of Ontario, Mr. Moodie stated that he had been in the habit of using unleached ashes as a manure for his fruit trees, and that he values them

more highly for this purpose than barn-yard manure.—*Late Paper.*

John Heald.

For "The Friend."

(Continued from page 141.)

In a letter to his beloved friend, Benjamin Kite, dated 1st mo. 26th, 1818, John Heald informs him of his prospect of visiting New England, &c., which had then received the approbation of his Monthly Meeting, and in a prospect of a later date, after noting the endorsement of his certificate by the Quarterly Meeting, he adds, "But a train of difficulties appear to lay in the way, and whether I can get to your Yearly Meeting I must leave. It is a very difficult time here to get that which will answer to pay debts, &c. with, and what may be the result I know not—time will decide. What cannot be performed must remain undone, and I intend to be there if I can with consistency." This allusion to a scarcity of money brings to mind a passage in one of his letters a few years later, in which he incidentally mentions that he was still paying interest on money he had borrowed to enable him to perform a religious visit.

It may seem to some a trying situation for a Friend to be thus straitened in his circumstances, and apparently hampered thereby in his movements; and it is undoubtedly the duty of meetings and of individuals to enter into sympathy with such, and to extend help where needful. In this case, probably, it was not so much the want of property, as the difficulty of procuring money, that embarrassed John Heald, and we know not that he ever omitted a religious service for want of adequate pecuniary means; and the knowledge that his labors of that kind would require some previous effort to enable him to perform them, may have caused him to weigh with more care the impressions of duty, and to seek for a clearer sense of the Divine requiring. The late Joseph Elkinton was accustomed to relate an anecdote of one, who, travelling as a companion to a minister of the Gospel, informed a Friend, at whose house they were entertained, that he had retired from business, in order that he might be at liberty to engage in such services as he was then rendering. The Friend replied to him, that he had, to that extent, disqualified himself—thus conveying to him the caution, that there is a degree of safety to many in being so situated that it requires a sacrifice to be made before we can run the Lord's errands. It is an easy matter for persons of an active temperament, especially if gifted with a flow of language, and possessing those qualities which attract the kindness and attention of others, to find so much that is pleasing to human nature in travelling abroad in the performance of religious services, as to induce them to enter on such labors without having the feeling of the Apostle when he wrote, "*Voe is unto me if I preach not the Gospel.*" They will be the more easily led to travel about on these "light-weighted concerns," if they are freely supplied with money through the liberality of their friends. If we are not on our guard, we may in this way weaken our testimony against an hiring ministry, and our religious Society may be afflicted with a class of ministers who are running their own errands, instead of those of the Head of the Church. Of such it will be true in a spiritual sense, that they

have labored in vain and spent their strength for naught.

The account of this visit is thus commenced: "On the 30th day of the 3rd mo. 1818, about 10 o'clock, after a tendering opportunity in my endeared family, I passed on through Redstone and over the Allegheny Mountains to Monallen, the roads very deep and muddy, which was a cause of much weariness to us and our horses. Thomas Wickersham was my companion." A week's travel brought them to Monallen, where they had the company of Hinchman Haines, returning from a religious visit to Ohio. Together they attended a number of meetings, in which they labored harmoniously. On 4th mo. 9th, at Huntington, J. H. says: "The meeting was divinely favored. Hinchman had lengthy labor that I thought was well adapted. I had but little to say, though I rejoiced secretly in the labor, and was thankful for the blessing.

10th. We were at Warrington Meeting. After a time of silent exercise, Hinchman was favored to break the way, and I followed for some time; after which he entered into a lengthy solemn supplication, which ended the meeting. I thought some of the strongest walls of opposition were broken down that I had witnessed, and had been engaged in helping to demolish. May the praise be ascribed to Him who is rich in poverty, and a ready helper in the needful time.

11th to Newberry. I soon felt a concern to invite the people to an inward attention, to an examination of their own conditions. When I stood up, it seemed only to gather their attention a little, but one thing after another pressed on, till several were tendered, though the communication was not long. Soon after I sat down, Hinchman delivered a long testimony to the sufficiency of the inward gift and grace of God, and showing forth the operation and effects of spiritual baptism, of which water was but a type. After he was done, I invited them to come up hither and see the Bride, the Lamb's wife, the redeemed church; to come taste and see for themselves the enjoyment which the faithful partake of."

After attending several other meetings, J. H. arrived in Philadelphia, and on the 18th was at the Yearly Meeting of Ministers and Elders, where Benjamin White opened his prospect of a religious visit to Great Britain and Ireland, which was referred for further consideration to another sitting. In his memoranda of the proceedings of the Yearly Meeting, our friend has preserved the following caution, which might suggest a useful hint to some in the present day. "A disposition, I thought, had manifested itself of enough of speaking to the cases which came before the meeting, but this afternoon this increased, and the unsettledness was trying. At length the case was concluded for the present, and my mind was under no small exercise. Before the adjournment I observed that I wished for an improvement. I wished that those who had been active might be careful to get into the quiet, and consider what had passed; see if the unflattering witness would speak peace to them. I wished them not to let the evening pass, without viewing over the transactions of the day; soon after which a great quiet prevailed, and the minute of adjournment was read.

After the rise of the meeting, he went into Jersey, and on First-day, the 26th, attended

a meeting at Moorestown, in which J. H. says "I labored in a lengthy way, not so impressive or powerful, accompanied with baptizir weight, as I thought I had known. We lodged at Samuel Roberts', where was Esther Collins of whose company I was glad. On Second day we attended Westfield Meeting. It was not large, but I soon felt concerned to speak. I began with, 'Is Israel a servant, is he home-born slave?' The subject of a too eager pursuit of the world, I entered upon at a considerable length, and I thought I was favored in delivering the testimony. We lodged at Hinchman Haines'. 'Evesham Meeting, the 28th,' was highly favored with impressive weight and baptizing power, humbly sh abroad. We dined at Isaac Haines'. Here we had a religious opportunity, sweetly comfortable. Of these opportunities we have several. We went in the evening to J. Haines, Jr.'s. In a later hour we went to father Job's. Here was another precious opportunity.

29th. We attended Easton Meeting. It continued to be held in a school-house, which was nearly full. In the early part I addressed the audience. I began with: 'Friends, if Christ, would you not expect them to be favored? I think for my part they would. Should we not labor to contribute our part to the happiness of ourselves and one of another. Horton Howard followed acceptably, and after him, I again added until near the close. It was hard and trying labor, but near the close it became very pleasant and solemn.

30th. After lodging at Josiah Reeve's, we were at Upper Evesham. Here was a large meeting collected; we sat down, but there was poverty enough, and it seemed to reign in silence; but I found a concern to stand up and say, 'Friends I do not know that I can preach to you, but I seem disposed to exhort a little. I asked, Can it be necessary to tell you over and over again, what you know you should do? To know what should be done, and neglect to do it, this is cause of poverty, for it is withholding more than is meet, which tendeth to poverty; and this poverty spreads so that the devoted, dedicated ones are made to partake thereof, and even the children, who have not yet learned to labor for necessary support. We know that as relates to the outward, there are some who are not capable of labor for their outward support; so [it is] to labor for that bread that nourishes the soul to everlasting life. It is possible I may be mistaken, but poverty seems to me to prevail. I have no doubt but, in the dispensation of Providence, the faithful are made to partake of poverty. This puts upon search to know why it is so, and this proves a blessing to them, and tends to keep them watchful and attentive. But to wait to be told to attend to what we know should be done, poverty is increased thereby."

(To be continued.)

#### "SOWING HIS WILD-OATS."

"Sowing his wild-oats," ave! sowing them deep In the heart of a mother to blossom in tears, And shadow with grief the decline of her years. "Sowing his wild-oats," to silver the head Of the sire who watched his first pulse-throb with joy, And whose voice went to heaven in prayer for his boy. "Sowing his wild-oats" to spring up and choke The flowers in the garden of a sister, whose love Is as pure and as bright as the blue sky above.

For "The Friend."  
Niagara.

visit to Niagara a few weeks ago, during most delightful of all our seasons, when trees were changing their summer garb the richer tints of autumn, induced the wing lines. While I am sensible they do not convey a dull apprehension of the reality; if I should succeed in investing the subject with any fresh interest, and rendering it some more attractive, I shall be amply compensated.

S. Buckingham, has drawn a more lively scene in his truthful and beautiful poem, written in 1838, than I have seen elsewhere in her compositions. In these stirring lines, which is blended the value of accurate description with the life of true genius, are to be found some of the best thoughts in our literature, in which this marvellous work of the Almighty is made to join, as with the beholder, celebrating the power and perfection of the Divine Architect.

Diadem is an emerald green of the clearest, purest hue, bound with waves of snow-white foam and spray of ethery dew, the tresses of the brightest pearls, float o'er thy ample sheet, the rainbow lays its gorgeous gems in tribute at thy feet. Reign is of the ancient days—thy sceptre from on high; birth was when the morning stars first looked from yonder sky; sun, the moon, and all the orbs that shine upon thee now, the first wreath of glory that entwined thy infant brow. Who can see thy incense rise, or hear thy torrents roar, not bow before the God of all to worship and adore. The ocean be as nothing in the hollow of Thy hand, the stars that crown the heavens, in Thy balance, grains of sand; Niagara's rolling flood seems great to us who lowly bow, great Creator of the whole! how passing great art Thou."

In speaking of Niagara, it may truly be said the Divine Architect has stamped upon each a manifestation of His power and glory that language cannot fully describe it, but that it can be reproduced by the genius of the poet.

This crowning waterfall must be seen to be understood, and to be felt must be studied in its own overwhelming presence. A comprehensive sense of its true grandeur and glory only thus be known, as the beholder comes near it face to face, hears its voice nowhere heard, speaking from the rock and the sea. No painting, however full in its details, can truly represent it. The grandeur of power in which nature has clothed it, is felt only before its own rocky altar. The rushing, leaping, roaring flood above the and the fearful plunge of such a river as Niagara, into the deep unexplored channel below; the language of power which the irrevocable torrent proclaims; that bright fleecy copy of mist, and rainbow glory; all these more cannot be taken from their dwelling place, but must be seen and felt there, if seen and felt at all.

In the rich scene spread out before us by the Almighty Creator to incite our admiration and lift our thoughts heavenward, is there any object which can be closely seen and comprehended, that makes upon the senses a

more profound impression. Born into nature's royal household, that all who should look upon it, might see therein a revelation of the Infinite power that called all things into being, and rejoicing in their comprehensiveness and perfection, learn the valuable lesson to regard ourselves, and all the works of our hands, as but the dust of the balance in comparison therewith. Numbering its visitors out of all the generations that have come and passed away for ages, are we not animated and refreshed with the remembrance that thy ministrations and teachings have been from the beginning; all who love instruction in nature's sanctuary come freely from all the earth, of whatever people or language, and worship at thy altar; thy voice is the same it ever was, pointing the savage and the civilized to the one inexhaustible Fountain of wisdom and knowledge: all, all of whatever class, are bowed into self-nothingness before thee!

It has been estimated, that fifteen hundred millions of cubic feet per minute, or one million two hundred thousand tons per hour pass over the falls. A river of such extent, large enough to float the shipping of any one of our ports, plunging over a precipice of 160 feet, presents to the mind a reality at once sublime and terrible. That the fall should not be heard for many miles, without reference to the direction of the wind, is a surprise to very many visitors. The density of the atmosphere, modifies the sound remarkably; and others approach with extravagant expectations, and are disappointed that the sound is not deafening. Hence astonishment is often upon the lips of visitors, stopping at a neighboring hotel, or walking within a square or two of the rapids or the fall itself, to find a low voice in conversation may be heard, or even the gentle whisper of the passing breeze. Such, however, is the case when the wind is not favorable; and this was my experience; but passing over to the Canada side, where the breeze met our faces, the effect was wonderfully changed, and yet the sound was not so overpowering as our anticipations had prepared us to realize. Though the air was filled with the voice of struggling waters, other sounds were heard; we talked without effort, even when within a few feet of the cataract. The effects are about as various as are the minds and temperaments of individuals. The morning with its clear air, before the dampness that has been distilling into dew has passed away, or at night when other sounds are asleep, is the time to hear Niagara in her fullest expression. When we take into our thoughts the whole picture, Niagara, where the awful leap is made; or above, fiercely contending among the rocks, and sweeping onward with inconceivable power; may we not wonder that any other voice could be heard in her presence. I think many who have loved to look upon this marvellous work of the Almighty will acknowledge, that as the mind becomes filled with the subject, will the ear be also filled to the exclusion of other voices, with the wondrous language of nature speaking there from the rock in her watery armor.

(To be concluded.)

"Let him that thinketh he standeth take heed lest he fall;" for unassisted human strength is utterly unable to afford adequate support in the hour of temptation or weakness. We are only so far safe, when we depend on a mightier arm than our own for support.

## THE FRIEND.

TWELFTH MONTH 27, 1873.

It has always been considered a matter of importance with Friends, that their children should be early initiated into a knowledge of the contents of the Holy Scriptures; in order that they may become familiar with the blessed truths therein recorded; especially in reference to the coming, life, sufferings and death of Jesus Christ, the Saviour of the world. But they have been very far from believing that the knowledge thus obtained, could, of itself, have the effect of working out the salvation of the soul, or, that imparting this knowledge, constituted a religious education.

George Fox, speaking of the religious duty laid upon him, says, "I was made to warn masters and mistresses, fathers and mothers, in private families, to take care that their children and servants might be trained up in the fear of the Lord, and that themselves should be patterns of sobriety and virtue to them. For I saw, that as the Jews were to teach their children the law of God, the old covenant, and to train them up in it; yea, the very strangers were to keep the Sabbath among them, and be circumcised before they might eat of their sacrifices; so all that made a profession of Christianity, ought to train up their children and servants in the new covenant of life, Christ Jesus, who is God's salvation to the ends of the earth; that all may know their salvation. And they ought to train them up in the law of life, the law of the Spirit, the law of love and faith, that they might be made free from the law of sin and death. And all Christians ought to be circumcised by the Spirit, which puts off the body of the sins of the flesh, that they may come to eat of the heavenly sacrifice, Christ Jesus; that true spiritual food, which none can rightly feed upon, but they that are circumcised by the Spirit."

Here the kind of religious teaching and training that is needed, for rightly bringing up children, is clearly set forth; instructing them in the spirit and privileges of the new covenant; wherein the Law of the Spirit of life in Christ Jesus, is written on the tablet of the heart. How essentially different from teaching the mere letter of the Scriptures, inducing them to say they believe in and love that Saviour who died for them, and giving them to suppose that by so saying they are safe. It is by childlike obedience to this Law of the Spirit of life in Christ Jesus, that any or all saving knowledge of God and of his dear Son, as our Saviour, our sin-bearer and our Mediator, is to be availingly acquired. The Scriptures testify of Him, and of this—and exceedingly precious are they, especially to the man of God—but children and grown people may study the Scriptures, and comment upon them from youth to old age, may persuade themselves that in them they have eternal life, and may say a great deal about Christ in all his outward offices, as well as of the Holy Spirit, and yet never come to Christ himself that they might have life.

To find and believe in Christ Jesus availingly, we must come to him as he reveals himself by his Holy Spirit to the soul. All other knowledge of Him, and of his blessed offices, revealed through flesh and blood, is, of itself, powerless to save the soul; to cause it

to experience the washing of regeneration, and the renewing of the Holy Ghost; whereby it is reconciled to God through the death of his Son, justified, sanctified and made meet for the kingdom of heaven. Hence Satan is well satisfied when he can succeed in occupying the attention of those who are "seeking" to enter the kingdom by literal, outside knowledge, by a strong and fervent belief in Christ, begotten merely by their own reasoning or force of understanding; and thus keep them from the inward, convicting, crucifying, transforming work of the law of the Spirit of life, which alone can set free from the law of sin and death, under which he holds them. Thus it is in this day, as in the days when our Saviour declared to his disciples, Many shall seek to enter in at the strait gate and shall not be able; also, "Many shall say to me in that day, Lord, Lord! have we not prophesied [or preached] in thy name? and in thy name have cast out devils; and in thy name done many wonderful works? And then will I profess unto them, *I never knew you*: depart from me, ye that work iniquity."

A heavy burden was laid upon the first members of the religious Society of Friends, to bear testimony against those who professed much in regard to the religion obtained through the Scriptures; who said they were their rule of faith and practice, and who largely used the words of the prophets, of Christ and of his apostles; but who evidently did not live in the Spirit that inspired the holy men who wrote the Scriptures. They testified that such never could rightly understand the sacred truths recorded in them, let alone teach those truths to others; and they declared, that so long as any refused to be searched by the Light of Christ; to have all their words and deeds brought to this Light, and their understandings enlightened thereby, the mysteries of Christ's teachings would be a sealed book to them.

Of what immeasurable importance is it then, that in the education of children, they should be early imbued with a knowledge of this inspeaking voice of the Holy Spirit, and incited to unreserved obedience thereto; that they should be trained up (to use the words of G. Fox) "In the new covenant of light, Christ Jesus \* \* in the law of life, the law of the Spirit; the law of faith and love, that they may be made free from the law of sin and death." And how awful is the responsibility of those, who by exalting the Scriptures above what they claim for themselves, and holding out the idea that, by the study of them alone, we may become wise unto salvation; set them above the blessed visitations of the Day Spring from on high, and draw away the attention from the Spirit that maketh alive, substituting therefor the letter, which of itself killeth.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The steamer *Virginus* has been surrendered to the United States by the Cuban authorities, and the surviving passengers and crew were, on the 19th inst., delivered to Commander Braine, of the U. States steamship *Juniata*. They were sent on board that vessel, which soon after took her departure for New York. When the *Virginus* reaches Washington, an investigation will be ordered to ascertain whether she had a right to carry the United States flag.

A column of 500 Spaniards, which was sent out to surprise a depot of arms and ammunition belonging to the Cuban insurgents, fell into an ambuscade prepared for them. Only about one hundred Spaniards escaped, all the rest being killed or captured.

The French Assembly has passed a bill increasing

the salary of President MacMahon, in order to enable him to give fetes at Paris. This action does not imply the removal of the national capital to Paris. A rumor is current that in consequence of the successes of the Republicans in the late supplementary elections for members of the Assembly, the Right has resolved to propose an alteration of the suffrage law, by which four millions of voters will be deprived of the franchise.

On the 16th inst., a terrible storm visited Scotland and the north of England. In Glasgow, Sheffield, Leeds, Halifax, Drewhsbury and Nottingham, great damage was done and many lives were lost. In Leeds alone, property to the amount of \$500,000 was destroyed. The destruction was serious in many other places, and the shipping suffered severely at Newcastle and Shields.

Advices from Cape Coast Castle report that General Wolesey had recovered his health and resumed active duty. During his illness the war was at a stand still, and movements had since been made difficult owing to the large number of sick. The authorities at Madeira objected to the establishment there of a sanitarium for British soldiers stricken with fever. About one hundred of the invalids have been sent to St. Helena. The King of Dahomey has joined the Ashantees.

An official inquiry will be made at Greenwich into the causes of the collision between the *Loch Earn* and the French steamer *Ville du Havre*.

An ordinance has been officially promulgated at Berlin, ordering that in future all bishops, upon their installation, shall solemnly engage to maintain the completest subordination to the State, and to co-operate in the suppression of all disloyal intrigues.

The Papal Nuncio at Paris has been notified that the Archbishops of Paris, Cambay and Valencia, have been created Cardinals.

A Singapore dispatch of the 17th says, the Dutch forces which lately landed on the coast of Acheen have had an engagement with the Sultan's army and defeated it.

A council of war has been appointed in Madrid to examine a plan of a campaign for the complete crushing of the Cuban rebellion.

Fifty arrests have been made at Barcelona of persons engaged in the recent demonstration in favor of declaring Barcelona independent.

A Bayonne dispatch announces the capture of Berga by the Carlists.

The bombardment of Cartagena continues. Pardon is offered to all who surrender. The insurgents are still able to obtain provisions, but their ammunition is said to be failing. The besieging forces have occupied part of the suburbs. On the 20th the insurgents made several sorties, but were driven back each time. Many of them are deserting.

A Madrid dispatch says that the United States Minister, General Siekles, has determined to tender his resignation.

A Berlin dispatch says: The Emperor William has had a slight stroke of apoplexy, which causes much anxiety.

A Calcutta dispatch of the 20th says: One half of the supply of food in the province of Bengal has been exhausted, and it is now believed that famine cannot be averted. Thus far there had been no actual suffering among the people.

A Penang dispatch of the 20th says: The Dutch troops in Acheen are now in possession of all the country on the left side of the Acheen river. The Dutch meet with strong resistance on their march.

Liverpool, 12th mo. 20th.—Uplands cotton 8½d.; Orleans, 8½d. a 8½d.

**UNITED STATES.**—The number of interments in Philadelphia last week was 256. At the election in this city on the 16th inst., 84,108 votes were polled, viz: 59,114 for the new constitution, and 24,994 against it. The majority in the State of Pennsylvania in favor of the new constitution is very large.

The number of interments in New York last week was 464.

The two Houses of Congress on the 19th inst., adjourned till the 6th of next month. A bill appropriating \$5,000,000 for the recent unusual expenditures in the navy, passed both Houses. A bill for the repeal of the bankrupt law has passed the House of Representatives by a large majority. It is believed that the Senate will not agree to a total repeal of the law, but prefer amending it in such particulars as will guard the debtor from the exactions of a small minority of his creditors, leaving the question of involuntary bankruptcy to be determined by those more largely interested. A bill to redeem the loan of 1858 has passed the House, and also a substitute for that of last session providing for an increase of the salaries of members of Congress, and

others. Members of Congress are to receive \$6000 a travelling expenses, annually, in full of all compensation, and the Vice President and Speaker \$8000.

A deficiency in revenue being anticipated, the Heads of Departments have been requested by Congress to revise the estimates of expenditures and reduce them to the smallest amounts possible. It is believed that the estimates for work on public buildings, fortification, improvements of harbors, &c., can be reduced many millions of dollars.

It is now said that the steamer *Virginus* at the time of her capture, had forfeited the right to bear the flag of the United States and carried it unlawfully, and that her clearance papers were obtained by perjury.

The Pacific division, 115 miles in length, of the Northern Pacific Railroad, was finished on the 17th inst. This completes the rail connection between the Columbia River and Tacoma, the Puget Sound terminus.

Governor Booth, of California, in his late message to the Legislature, calls attention to the glaring evils arising from the Chinese immigration. If it continues on a large scale it will, he thinks, change the relations capital to labor, and modify the character of the prevailing civilization. He expresses the belief that it is the general sentiment of the people of the State, that while the Chinese who are here, or who may come under the stipulations of the treaty with China, should be protected from violence and persecution, the General Government should call for such a re-adjustment of the treaty as will restrain their further immigration.

**The Markets, &c.**—The following were the quotations on the 20th inst. *New York*.—American gold, 111 U. S. sixes, 1881, reg. 115, coupons, 118½; ditto, 18 117; ditto, five per cents, 110½. Superfine flour, \$1 \$6.20; State extra, \$6.55 a \$6.85; finer brands, \$1 \$10.50. White India wheat, \$1.75; red western, \$1. No. 2 Chicago spring, \$1.52. Canada barley, \$1.75; western, \$1.42. Oats, 57 a 60 cts. Western mixed corn, 80 a 82 cts.; new do., 78 a 80 cts.; white, 86 cts. *Philadelphia*.—Cotton, 16¼ a 17¼ cts. for uplands; New Orleans Refining sugar, 7¼ a 7½ cts. Superfine flour, \$5 a \$5.75; extras, \$6 a \$6.75; finer brands, \$8 a \$10.25. White wheat, \$1.70 a \$1.85; amber, \$1.68 a \$1.68; red, \$1.55 a \$1.60. Rye, 95 cts. Yellow do., 78 a 80 cts. Oats, 53 a 58 cts. Smoked hams, 12 a 13 cts. Lard, 8½ a 8¾ cts. Clover seed, 8 a 9½ cts. *Baltimore*.—Choice white wheat, \$1.85 a \$1.87; choice amber, \$1.85 a \$1.88; good to prime red, \$1.70 a \$1.75; Pennsylvania do., \$1.65 a \$1.70; western, \$1.55 a \$1.60. Oats, 50 a 55 cts. *Cincinnati*.—Wheat, \$1.47 a \$1.50. New corn, 53 a 54 cts.; old, 58 cts. Oats, 43 a 50 cts. Lard, 8¼ a 8½ cts.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminsou Post-office, Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philadelphia

**FRIENDS' ASYLUM FOR THE INSANE**  
Near Frankford, (Twenty-third Ward,) Philadelphia  
Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, on the 26th of the 8th month, 1873, MARY I. NEEDLES, widow of Edward Needles, in the 86th year of her age.

—, on the 25th of 9th month, 1873, at the residence of her son, Joshua B. Lippincott, SARAH LIPPINCOTT, aged 84 years.

—, on the 26th of 11th month, 1873, ANA MILNOR, aged 85 years, all esteemed members of the Monthly Meeting of Friends of Philadelphia, for the Western District.

—, on the 4th of Twelfth month, 1873, ISRAEL FRANKLIN WHITALL, in the 79th year of his age, a much esteemed member of Gwynedd Monthly Meeting of Friends, Pa. Trusting in the Lord, his end is peace.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

PHILADELPHIA.

Stage, when paid quarterly in advance, five cents.

## Comets.

### METEORIC STONES.

(Continued from page 132.)

(22.) 1860, *May 1*.—About 20 minutes before 1 o'clock, P. M., a shower of meteoric stones fell in the southwest corner of Guerny county, Ohio. Full accounts of the phenomena are given in *Silliman's Journal* for July, 1860, and January and July, 1861, by professors E. B. Andrews, E. W. Evans, J. L. Smith, and D. W. Johnson. From these interesting papers we learn that the course of the meteor was about 40° west of north. Its visible track was over Washington and Noble counties, and the prolongation of its projection, to the earth's surface, passes directly through New Concord, in the southeast corner of Muskingum county. The meteor when first seen was about 40 miles from the earth's surface. The sky, at the time, was for the most part covered with clouds over northwestern Ohio, so that if any portion of the meteoric mass continued on its course it was invisible. The velocity of the meteor, in relation to the earth's surface, was from three to four miles per second; and hence its absolute velocity in the solar system must have been somewhat greater than that of the earth.

"At New Concord, Muskingum county, where the meteoric stones fell, and in the immediate neighborhood, there were many distinct and loud reports heard. At New Concord there was first heard in the sky, a little southeast of the zenith, a loud detonation, which was compared to that of a cannon fired at the distance of half a mile. After an interval of ten seconds, another similar report. After two or three seconds another, and so on with diminishing intervals. Twenty-three distinct detonations were heard, after which the sounds became blended together and were compared to the rattling fire of an awkward squad of soldiers, and by others to the roar of a railway train. These sounds, with their reverberations, are thought to have continued for two minutes. The last sounds seemed to come from a point in the southeast 45° below the zenith. The result of this cannonading was the falling of a large number of stony meteorites upon an area of about 10 miles long by 3 wide. The sky was cloudy, but some of the stones were seen first as 'black specks,'

then as 'black birds,' and finally falling to the ground. A few were picked up within 20 or 30 minutes. The warmest was no warmer than if it had lain on the ground exposed to the sun's rays. They penetrated the earth from two to three feet. The largest stone, which weighed 103 pounds, struck the earth at the foot of a large oak-tree, and, after cutting off two roots, one five inches in diameter, and grazing a third root, it descended two feet ten inches into hard clay. This stone was found resting under a root that was not cut off. This would seemingly imply that it entered the earth obliquely."

Over thirty of the stones which fell were discovered, while doubtless many, especially of the smaller, being deeply buried beneath the soil, entirely escaped observation. The weight of the largest ten was 418 pounds.

(23.) 1860, *July 14*.—About 2 o'clock P. M. on the 14th of July, 1860, a shower of aerolites fell at Dhurmsala, in India. The fall was attended by a tremendous detonation, which greatly terrified the inhabitants of the district. The natives, supposing the stones to have been thrown by some of their deities from the summit of the Himalayas, carried off many fragments to be kept as objects of religious veneration. Lord Canning and J. R. Saunders succeeded, however, in obtaining numerous specimens, which they forwarded to the British Museum and several European cabinets. They are earthy aerolites, of a specific gravity somewhat greater than that of granite.

(24.) 1864, *May 14*.—Early in the evening a very large and brilliant meteor was seen in France, from Paris to the Spanish border. At Montauban and in the vicinity loud explosions were heard, which were followed by showers of meteoric stones near the villages of Orgueil and Nohic. The principal facts in regard to the meteor are the following:

Elevation when first seen, over . . .	55 miles
" at the time of its explosion . . .	20 "
Inclination of its path to the horizon . . .	20° or 25°
Velocity per second, about . . .	20 miles,
or equal to that of the earth's orbital motion.	

"This example," says Professor Newton, "affords the strongest proof that the detonating and stone-producing meteors are phenomena not essentially unlike."

(25.) 1868, *January 30*.—It is obviously a matter of much importance that the composition and general characteristics of aerolites, together with the phenomena attending their fall, should be carefully noted; as such facts have a direct bearing on the theory of their origin. In this regard the memoirs of Professors J. G. Galle, of Breslau, and G. Vom Rath, of Bonn, on a meteoric fall which occurred at Pultusk, Poland, on the 30th of January, 1868, have more than ordinary interest. These memoirs establish the fact that the aerolites of the Pultusk shower entered our atmosphere as a swarm or cluster of distinct meteoric masses. It is shown, moreover, by Dr. Galle that this meteor-group had a pro-

per motion when it entered the solar system of at least from 4½ to 7 miles per second.

The foregoing list contains but a small proportion of the meteoric stones whose fall has been actually observed. But, besides these, other masses have been found so closely similar in structure to aerolites whose descent has been witnessed, as to leave no doubt in regard to their origin. One of these is a mass of iron and nickel, weighing 1680 pounds, found by the traveller Pallas, in 1749, at Abakansk, in Siberia. This immense aerolite may be seen in the Imperial Museum at St. Petersburg. On the plain of Otumpa, in Buenos Ayres, is a meteoric mass 7½ feet in length, partly buried in the ground. Its estimated weight is about 16 tons. A specimen of this stone, weighing 1400 pounds, has been removed and deposited in one of the rooms of the British Museum. A similar block, of meteoric origin, weighing more than six tons, was discovered some years since in the province of Bahia, in Brazil.

## SHOOTING-STARS.—METEORS OF NOVEMBER 14.

Although shooting-stars have doubtless been observed in all ages of the world, it is only within the last half century that they have attracted the special attention of scientific men. A few efforts had been made to determine the height of such meteors, but the first general interest in the subject was excited by the brilliant meteoric display of November 13, 1833. This shower of fire can never be forgotten by those who witnessed it. The meteors were observed from the West Indies to British America, and from 60° to 100° west longitude from Greenwich. As early as 10 o'clock in the evening of the 12th, shooting-stars were observed with unusual frequency; their motions being generally westward. Soon after midnight their numbers became so extraordinary as to attract the attention of all who happened to be in the open air. The meteors, however, became more and more numerous till 4, or half past 4 o'clock; and the fall did not entirely cease till ten minutes before sunrise. From 2 to 6 o'clock the numbers were so great as to defy all efforts at counting them; while their brilliancy was such that persons sleeping in rooms with uncurtained windows were aroused by their light. The meteors varied in apparent magnitude from the smallest visible points to fire-balls equaling the moon in diameter. Occasionally one of the larger class would separate into several parts, and in some instances a luminous train remained visible for three or four minutes. No sound whatever accompanied the display. It was noticed by many observers that all the meteors diverged from a point near the star *Gamma Leonis*; in other words, their paths if traced backward would intersect each other at a particular locality in the constellation Leo. In some parts of the country the inhabitants were completely terror-stricken by the magnificence of the display.

In the afternoon of the day on which the shower occurred the writer met with an illiterate farmer who, after describing the phenomena as witnessed by himself, remarked that "the stars continued to fall till none were left," and added, "I am anxious to see how the heavens will appear this evening; I believe we shall see no more stars." A gentleman of South Carolina described the effect on the negroes of his plantation as follows:—"I was suddenly awakened by the most distressing cries that ever fell on my ears. Shrieks of horror and cries for mercy I could hear from most of the negroes of the three plantations, amounting in all to about 600 or 800. While earnestly listening for the cause I heard a faint voice near the door, calling my name. I arose, and, opened the door, and it is difficult to say which excited me the most,—the awfulness of the scene, or the distressed cries of the negroes. Upwards of a hundred lay prostrate on the ground,—some speechless, and some with the bitterest cries, but with their hands raised, imploring God to save the world and them. The scene was truly awful; for never did rain fall much thicker than the meteors fell towards the earth; east, west, north, and south, it was the same."

(To be continued.)

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 146.)

"1820, 11th mo. 19th. There is that which scattereth, and yet increaseth; and there is that which withholdeth more than is meet, which tendeth to poverty. From either of these errors may preservation be realized through simple attention to the Spirit of Christ Jesus; that thus the stripes, consequent on disobedience, may not be given. Oh! the spirit is willing to do the Master's will, but how weak is the flesh! He who took upon him our infirmities knoweth our weaknesses, and compassionates them; or truly some feeble ones might conclude, 'There is no hope.' It is indeed of the Lord's mercies that we are spared in the land of the living. For after being made sensible of deep poverty and unworthiness, He yet strengthens again to look toward his holy temple; and is pleased from time to time to console our spirits with this blessed evidence. The Lord is in his holy temple; let all rejoice in the greatness of his excellency. O my soul, trust thou in God! Thou hast indeed tasted of his goodness; and although thou hast often to mourn the absence of thy Beloved, mayest thou still trust in the promise, 'He will come, and will not tarry.' Thou hast long labored under an awful apprehension of being called publicly to advocate the blessed cause of Truth and righteousness, but yet feelest many fears. Oh! that my heavenly Father would condescend to unfold to my poor mind with undoubtable clearness his blessed will; and furnish with ability as well as willingness to bear or to suffer all the turnings of his hand upon me. This is all my desire. Preserve me, O Lord! from the power of the lion and of the bear, that so thy holy Name may be glorified by me. Thou knowest that I love thee, and desire to serve thee. Yea, thou knowest all things; who only art acquainted with the secret exercise and travail of my poor soul. O, dearest Father! thou only canst aid me to make war in righteousness, and also enable to become victorious. Sensible of the need of thy aid continually, I

pray for ability from thee to labor! Make me as a hired servant in thy house, if haply a mansion may but be prepared for me, even the least and lowest in thy kingdom.

1821. Fourth month. I have no prospect of keeping a regular diary; but just at some seasons, when a liberty is felt, to pen some of the feelings and sentiments of my heart. Not because I think remarks that may be penned likely to prove edifying to any, but from a hope to benefit myself, by comparing notes in my spiritual progress. Perhaps there was a time wherein my situation more resembled the heath in the desert, than for some time past; yet I crave to be kept in the path of self-denial; and crave also for ability to possess my soul in patience. He who cannot lie, hath promised to be strength in weakness; and that He will never leave those who put their trust in Him.

1822. 11th mo. 30th, shows a lapse of many months; during which much might have been written but there was not strength at seasons to perform the task through bodily indisposition; at others the mental faculties were incapable of action. But now being once more permitted to feel a little spring of life, I gladly forego the pleasures of society, for the more consolatory one of retirement, wherein the soul may enjoy communion with God.

How oft might we participate in this blessed fellowship, but that we bow to earth, instead of keeping our minds directed to their proper centre, and having our eye steadily fixed on that eternal weight of glory, in reserve for those who fight the good fight of faith and lay hold on eternal life. My soul, how art thou busied? Thou hast been raised from the bed of sickness to a degree of health, for the purpose of bringing glory to thy Heavenly Father by an unreserved dedication of thy time and talents to His service! Yet thou remainest inactive; and why? because thou listenest to the insinuations of the potent enemy, who would persuade that thou art too weak to do any thing that can advance the cause of Truth; that blessed cause which thou hast felt to be dear from infantile years; and which thou hast believed thyself called to espouse even publicly, although sensible of the truth of the dear Master's testimony, that without Him we can do nothing. Nevertheless, being assured also that through His Spirit strengthening us, we can do all things, I desire, above every other consideration, to obtain mercy, and to be found faithful, even though it be my lot to go down into deep suffering; yea, seven times into Jordan, if, dearest Father, thy divine arm be underneath, and thy seal be upon my movement! This will be enough. To be thy faithful, devoted servant is my earnest desire; that so glory may redound to Thy ever adorable name now and forever. Yea, my soul can testify that Thou art good, and doest good. O! teach me thy statutes. What shall I render unto Thee for thy many mercies conferred upon the least of thy flock? Oh! enable to say, I will take the cup of salvation, and call upon thy name in the presence of all thy people; and will pay all my vows. Thou alone knowest what these are, and what Thou hast been calling for at my hands; and Thou only canst enable me to perform Thy blessed will. To Thee therefore, dearest Father, may mine eye be ever directed, even as the eye of a maid unto her mistress; that thy will may be perfected."

Surely no one can turn from the serious perusal of the latter part of the foregoing memoranda, without feeling his or her heart warmed and instructed, if not likewise enamored by worthy thoughts of that matchless, unwearied Lord that planned our redemption, and caused the Saviour's humiliating life on earth, as well as ignominious death—the shedding of His most precious, efficacious blood—that so through the leavening, transforming operation of his Holy Spirit—the washing of regeneration and the renewing of the Holy Ghost—the heart and affections of His creature, man, might be brought into such sweet and willing subjection to His blessed and holy will as is manifest in the case before us. With her the expressive, living testimony seems to be, "Abba, Father!" Thy will be done in all things concerning me. Oh! how this brokenness and childlikeness, this tender, contrite, humble, teachable state, tends to prepare the way of the Lord, and make his paths straight within us. How will He in richest grace and mercy condescend to, and come into such a heart, and set up His righteous, glorious kingdom there, and dwell and reign as King of peace; while of the increase of this government and peace there shall be no end. Proving to such willing and obedient souls that He is indeed "Emmanuel," "God with us"—a Saviour nigh at hand—a Redeemer that hears and answers prayer—an ever present Comforter and guide into a truth. These, as the Good Shepherd, He will guard, and feed, and strengthen, after the power of an endless life, because His compassions fail not. These, He will more and more manifest himself to, and perfect His work in. These shall increase their joy in the Lord, and experimentally rejoice in the Holy One of Israel, their Saviour. These, the Lord Jesus through the life and power of his Holy Spirit, will further teach and enlighten in the mysteries of regeneration and holiness; and finally, as they continue faithful to Him, will lead unto living fountains of waters and God shall wipe all tears from their eyes.

"1823, 1st mo. 17th. How awful the situation in which we as a Society are now placed! While many are subscribing to declaration and doctrines which to a little remnant, persecuted remnant, appear calculated to secure the foundation of christianity; yea, even the removing of the Corner Stone agreed to the declaration: 'Behold I lay in Zion for a foundation a stone, a tried stone, a precious corner stone, a sure foundation,' &c. The if this foundation be destroyed what can we do? Ah Lord God! cause those who desire

\* Sarah Hillman is here no doubt alluding to the painful prevalence of that unitarian doctrine, or spirit of unbelief in the outward manifestation of the Lord Jesus as our only Saviour and hope of salvation, as well as in the authenticity and Divine authority of the Holy Scriptures, which even earlier than this date began to foreshadow the coming, and which culminated in the deplorable separation of 1827-8. It may be added, will appear in the sequel, that S. H. lived to see the Society assailed and sorely troubled by an error of an opposite character; in which, while the dear Saviour in His outward coming as the Son and Sent of God, seemed fairly upheld, His second advent in the heart as the light and the life of men—a fundamental doctrine of Quakerism—was much overlooked, or little regarded. It is this inward appearance, derived through the offering for sin in the prepared body, "another Comforter," as our Sanctifier, Good Remembrancer, and Teacher of all things, which the Redeemer prayed the Father for, and sent in His name, that the Society of Friends have ever felt called upon to uphold unmistakably before the world.

stand on this alone sure foundation to feel that thou indeed livest; that Christ Jesus, thy dear Son, is making intercession for us. Deliver us not up to reproach. Gather us from the teachings of men. Lead us to Thyself. Thou only art able to save; and thou only art enabled to fight the good fight of faith, and to lay hold on eternal life. The signs of the times proclaim an awful day; so that we are ready to query, "Who shall stand?" May we keep our eye fixed upon Him, who bore our sins in his own body on the tree; and like Him, our heavenly Exemplar, when we are reviled, revile not again; but commit our cause to Him. He knoweth how to deliver us; and will deliver even to the end.

If we believe not that He is, why then do we approach Him? Why should we meet socially to worship that Being, whom we do not comprehend? Whom, according to the doctrine of many in our day, we are not bound to believe in, or, which is the same thing, we are not bound to believe what we do not understand, or that is not internally revealed to us. We are told in the Scriptures of truth that 'he that cometh to God must believe that he is;' and I believe there is no way to the Father, but through the Son. "Neither knoweth any man the Father save the Son; and he to whom the Son will reveal him." And, 'All Scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness; that the man of God may be perfect, thoroughly furnished unto all good work.' And, we are bound to believe what is there written."

(To be continued.)

For "The Friend."

#### Scientific Notes.

At the last meeting of the French Academy of Sciences, a communication was read respecting the Australian tree *Eucalyptus globulus*, the growth of which is surprisingly rapid, attaining besides, gigantic dimensions. This plant, it was stated, possesses an extraordinary power of destroying miasmatic influence in fever-stricken districts. It has the property of absorbing very large amounts of water from the soil, and of emitting antiseptic camphorous effluvia. When sown in marshy ground, it will often dry it up in a short time. The English were the first to try it at the Cape of Good Hope, and within two or three years they changed the condition of the unhealthy parts of the Colony. A few years later, its plantation was undertaken on a large scale in various parts of Algeria. At Pondook, twenty miles from Algiers, a farm situated on the banks of the Hamyze, was noted for its extremely pestilential air. In the spring of 1867, about 13,000 *Eucalyptus* were planted here. In the Seventh-month of the same year, the time when the fever season used to set in, not a single case occurred; yet the trees were not more than nine feet high. Since then complete immunity from fever has been maintained. In the neighborhood of Constantia, a farm was in equally bad repute. It was covered with marshes both in winter and summer. In five years, the whole ground was dried up by 14,000 of these trees, and the farmers and children enjoy excellent health. At the factory of the Gue de Constantine, in three years a plantation of *Eucalyptus* has transformed twelve acres of marshy soil into a magnificent park, whence fever has com-

pletely disappeared. In the island of Cuba, this disease has been relieved by introducing the tree into the unhealthy districts.

The *Chicago Tribune* gives an account of a fireless locomotive in use on the tramways in that city. In front of the cars was the motive power, contained in a small, compact, and neat locomotive. It consisted of a boiler eight feet long, by three feet in diameter, and the usual machinery on a small scale. There was no fuel, no fire, no fireman. The steam was supplied for the round trip of six miles before starting. The locomotive boiler was three-fourths full of cold water. The steam was introduced from a supply boiler, and rising through the cold water quickly raised its pressure to 170 lbs. to the square inch. With this supply the locomotive started, drawing a heavy car three miles in ten minutes; and using enough steam to reduce the pressure in the boiler from 170 lbs. to 90 lbs. The return trip being down grade, only consumed 33 lbs.

The Naval Medical Report (England) contains a fatal case of tobacco-poisoning. A boy who had been frequently punished for chewing tobacco, and had often been on the sick list, seems to have swallowed two pieces to escape detection. He complained of feeling sick, went to his hammock, and shortly afterwards was heard breathing stertorously. When seen by the surgeon, the pupils were insensible to light, and the pulse was scarcely perceptible. The post-mortem examination revealed two small pieces of tobacco in the stomach.

The *Phylloxera*, an insect injurious to the vine, has committed such ravages in France, that it is estimated that it destroys two-fifths of the produce of the ground devoted to the cultivation of that plant. The subject continues largely to engage the attention of the French Academicians and others. One of the observers who has been studying the habits of the insect in America says, that the French and American insects are the same, but that certain varieties of American vines resist its attacks. He found in America a species of *Aearus* which attacks and feeds on the *Phylloxera*, and he thinks it might be useful to introduce this into France.

At a meeting of the French Academy on the 20th ult., Alphonse de Candolle presented the 17th and last volume of his "*Prodromus Systematis naturalis regni Vegetalis*;" a work commenced 60 years ago by his father, and continued by himself with several co-laborers. The original object of the elder Candolle was, to give a brief enumeration of all the species of the vegetable kingdom, according to the principles of the natural method. Latterly the work has become much more detailed. It is certainly the largest work on botany extant (perhaps also in natural history); and describes 58,975 species.

For "The Friend."

I have been much interested in reading Wm. Evans' Journal, and think these paragraphs good advice for all. Will the Editors please insert in "The Friend."

"The house of our kind and intelligent friend, where we were entertained, was an agreeable lodging-place to us; the influence of education and suitable reading in expanding the mind, divesting it of many illiberal, contracted notions, was visible here. But in too many cases, we find Friends of sufficient

means, who have neglected the education of their children very much, or after having given them small portions, do not provide them with suitable books, to employ their leisure hours, in storing their minds with useful and instructive ideas. Labor for our subsistence is unquestionably necessary; but we may slide into the habit of pursuing our worldly concerns with such avidity as to lose all relish for mental improvement; and for those things which are invisible and eternal. When old age overtakes this description of persons, they have few objects of thought and conversation but the little round of worldly concerns which have engrossed their time and attention for many years; but little interest in anything beyond their own affairs; and for want of having been engaged to lay up treasure in heaven, are often destitute of any ability to promote the welfare of religious society, and the advancement of the testimonies of Truth. Their example tends to lead those around them into the same worldly pursuits, and thus instead of being the salt of the earth and lights in the world, they prove stumbling blocks to sincere enquirers after Truth, and *blind guides* to the youth in the Society. Such persons are objects of commiseration and regret. These are subjects that ought to call forth the *energies* of the Society; not only in a fervent concern for the religious welfare of the young people, but in adopting proper measures for their guarded school education, *visiting* them in their families, and endeavoring to elevate their minds by furnishing suitable libraries in the Preparative Meetings."—page 145.

"In conversation with a man who had travelled but little, and who was not a little contracted in his views of others, I was led to the reflection that where people are delving in the earth all their lives, and paying scarcely any attention to the improvement and enlargement of their minds, they possess little qualification to judge of others. They try everything by their own standard, which is formed according to the limited sphere they move in; and for want of knowing, either by intercourse with others or reading, the great variety of habits which prevails among people equally pious, they often censure what differs from their customs, and conclude that those who so differ are influenced by pride. This is especially obvious where the heart has not been softened by the Spirit of the Redeemer, and brought to see its own deformity, and thence clothed with Divine charity. True religion effects wonderful changes in us; while it clothes us with proper love and allowance for others, it erects a standard founded upon the purity and simplicity of the gospel of Christ, and neither condemns for those distinctions which arise from mere difference of education, nor admits of those varieties which spring from and foster pride in the human heart and are inconsistent with the Truth."—page 147.

It is dangerous to act contrary to conscience, in little things as well as great. It is tempting God to withdraw his Holy Spirit. That way of persuading ourselves, which we are apt to practise when inclined to a thing which the first simple suggestion of conscience opposes, is to be carefully watched against. Yet we seem not to be deceived with it, but to see the right all the while.—*Wilberforce*.

## Sub-tropical Rambles—by Nicolas Pike.

(Concluded from page 146.)

We make a few additional extracts.

"Hundreds of *Holothuriæ* lie on the bottom, particularly the common *Biche de mer*. It is of a dark brown, and I believe of the same species as the one so plentiful in the Chinese seas, and eaten by the Celestials. I am not aware of its being an article of food here. It is quite harmless, and will live a long while in a vessel of salt water. Very different is another species, the *Gratelle*, which may not be handled with impunity, for it causes most violent irritation of the skin when touched, and brings out an eruption and swelling; fortunately it only lasts a few hours, and if bathed at once with the 'Ledum' lotion, the pain soon ceases.

This *Holothuria*, about the size and shape of a small cucumber, is a mottled brown color, and has to all appearance four fins when taken; but soon after capture it throws them all off, and they swim about quite independently of the trunk. I have at different times found at least twenty varieties of *Holothuria* in Port Louis harbor, many of the most vivid hues. I once kept a large one for inspection that was covered above with thick red blunt bristles, and underneath with black ones, having a flat white enamelled top. These bristles lengthened near the mouth, which was surrounded by a circle of twenty very dark maroon tentacles, with ciliated edges and delicate pink lining. All over it were minute white shells stuck fast in the bristles. Sand and small corals lay in the water, and I saw it pick them up by closing the tentacles round them, and drawing them into the bony-looking aperture. The intestinal canal terminates in an opening twice as wide as the mouth, and is so transparent that it can be traced, and its contents easily seen. In the same glass were two others of different species; but they both died in the night, disgorging their whole insides, and lying across the large one. They were so entangled that the live one could not move, and this caused such excessive irritation, that though I carefully removed them early in the morning, the thin membrane burst, and the whole of the viscera protruded. The delicate pink arborescent branchiæ were all forced out, and a bundle of snow-white and rose filaments several feet in length lay entangled *en masse* in this animal ruin. The sand and coral *debris* forms only a portion of their food, or perhaps may be taken only to assist digestion, for some of them are very voracious, and I have frequently found crabs and sbrimps in their mouths."

"While examining the reefs, I found some curious annelides, of a blackish brown color, about half an inch in width and nearly eleven feet in length. I saw them in the tide pools, and when disturbed they would rapidly disappear in the crevices of the coral beds. Many of them were in process of multiplying their species by spontaneous division. I noticed that the animal buried as much of the body as he wished to separate; but this division did not take place always in the centre of the body, as some writers assert, frequently not a fifth being thrown off. The anterior portion to be separated appeared to be in a dormant state, which gave me a good opportunity to examine the separation with a magnifying glass. This portion was very transparent, and all its parts, even the eyes and antennæ, appeared to be as perfect as in the original

animal, but it was only connected with it by a small thread-like ligament.

I saw numbers of *Holothuriæ*, most of them a dirty brown, mottled with yellowish white. There are several species of this family here, some of them I had observed at Grand Port, of a beautiful orange color, about six inches in length.

The *Actiniæ* were radiantly beautiful. One species was nearly eight inches in diameter and six in height, of a purplish color, shaded yellow. The tentacles, when fully expanded, were tipped with scarlet, forming the most brilliant combination of colors possible."

"Some Creole fishermen offered to provide us rare sport from a fishing excursion to the reefs, if we would stand the expenses, which were only a few dollars, and to which we gladly assented; and active preparations in torches, &c., went on for the evening's diversion. We pulled our pirogues about a mile out from the shore, to the outer reef, and anchored them, leaving one man as a guard. We all then jumped into the water, which was nearly up to our waists, armed with long spears, and we followed our guides cautiously, just keeping clear of the breakers. Suddenly there was a halt, and silence was enjoined. Our torches were lit, and in a hole close to us we observed numbers of fish that soon approached the light. 'Now is your time!—throw in your lances!' said our sable friends; and away they went, cleaving the water, scattering the *Medusæ* and jelly fish in all directions, that left behind a train of phosphoric light as they darted through the waves. A cord was attached to the lances; and as I drew mine in, I found I had speared a large fish of the genus *Pseudoscarus*, called here a *Cateau*, very handsome, but not very choice eating. We bagged several fine fish, none weighing less than from two to two and a half pounds. On we went, the Creoles evidently knowing every hole and break in the reefs. We disturbed myriads of little animals which appeared to have taken up their abode in the empty cells in the great coral beds. This sea garden was lighted up with millions of tiny sparks—the glow worms of the deep, lighting the finny tribes of nocturnes to their prey, and presenting a pyrotechnic display on a small scale to us, but to them possibly equal to our brightest calcium light.

We were glad to hear that our old enemy the *Tazarre* never attacks at night. One of the Creoles hooked a large *Ourite*, or catfish (their Creole name), *Octopus vulgaris*. No sooner was it on the hook, than it darted its long tentacles up the pole, and wound one of its slimy feelers, with its double row of cup-like suckers round his arm. The knife was instantly applied, and the limb severed from the body of the fish; but even then it was with difficulty that it could be detached, the suckers possess such remarkable tenacity. After removal, a sense of numbness remained for a good while in the arm. The brute was, however, dislodged from his hole, and proved to be a large one, measuring ten feet from tip to tip of the tentacles. I had often seen this animal on the reefs, but had always given it a wide berth, knowing it to be dangerous; and coming to close quarters with the disgusting-looking animal did not at all make me anxious for its proximity. A number of smaller ones were caught, and the fishermen despatched them by turning their bodies inside out, thus leaving an empty sack."

## Primitive Man and Revelation.

BY PRINCIPAL DAWSON, D. D., M'GILL COLLEGE, MONTREAL.

The battle-ground of opposition in the name of Science and Philosophy to the Holy Scriptures is ever changing, but in modern time most of it, in so far as Science is concerned has centered on the early history of the earth and man as contained in Genesis. One portion of the controversy may be held to be disposed of. The geological record is so manifestly in accordance with the Mosaic history of creation that to all those (unfortunately a yet too few) who have an adequate knowledge of both stories, the anticipation of our modern knowledge of Astronomy, Physics, and Geology in the early chapters of Genesis is so marked as to constitute a positive proof of inspiration. Recent discoveries and hypotheses have given another turn to the discussion, and have directed it to questions relating to primitive man and the connection of the modern period with previous geological eras. Man, we are told, is a descendant of inferior animals. His primitive condition was one of half brutal barbarism. His rise to the actual position of humanity was through countless ages of progressive development, extending over periods vastly longer than those of sacred history. These doctrines, supported by much plausible show of proof, are given forth by popular writers as ascertained results of scientific research, and we are asked to accept a new Genesis, shorn of all the higher spiritual features of that with which we are familiar, holding forth no idea of individual life and salvation, but only a dim prospect of some elevation of the race as the result of an indefinite struggle for existence in the future.

Many good men are naturally anxious as to whether this may grow, and whether we are not on the brink of a decided breach between the word of God and the study of the earliest human remains. My own belief is that the doctrines of the antiquity and descent of man as held by the more extreme evolutionists have attained to their maximum degree of importance, and that henceforth the more advanced speculators must retrace their step toward the old beliefs, leaving, however, some most valuable facts in explanation of the early history of man. The subject is too extensive to allow of a full exposition of my reasons for this belief in the time to which this address must be limited, but I may refer to a few of the most recent facts in proof of my statement.

The physical characters of the known specimens of primitive men are unfavorable to the doctrine of evolution. Theories of derivation would lead us to regard the most degraded races of men as those nearest akin to the primitive stock; and the oldest remains of man should present decided approximation to his simian ancestors. But the fact is quite otherwise. With the exception of the celebrated Neanderthal skull, which stands alone and is of altogether unascertained date, the skulls of the most ancient European men known to us, are comparable with those of existing races, and further, the great stature and grand development of the limbs in those of the most ancient skeletons which are entirely or nearly so, testify to a race of men more finely constituted physically than the majority of existing Europeans. The skull found by Schmerling in the Cave of Engis, associated with the bones of the mammoth and other

ctinet animals, is of good form and large capacity, and presents characters which, though recalling those of some European races, also resemble those of the native races of America. The bones described by Christy and Sartet on the Cave of Cro-Magnon, in France, represent a race of great stature, strength, and agility, and with a development of brain above the European average; but the lines of the face show a tendency to the Mongolian and American visage, and the skeletons present peculiarities in the bones of the limbs found so in American races, and indicating, probably, addiction to hunting and a migratory and active life. These Cro-Magnon people lived at an epoch when France was overgrown with dense forests, when the mammoth probably lingered in its higher districts, and when a large part of the food of its people was furnished by the reindeer. Still more remarkable, perhaps, is the fossil man, as he has been called, of Mentone, recently found in a cave in the south of France, buried under various accumulations which bespeak a great antiquity, and associated with bones of extinct animals and with rudely-fashioned implements of flint. It appears from the careful descriptions of Dr. Rurere that this man must have been six feet high and of vast muscular power, more especially in the legs, which present the same American peculiarities already referred to in the Cro-Magnon skeletons. The skull is of great capacity, the forehead full, and the face, though broad and Mongolian and large-boned, is not prognathous, and has high facial angle. The perfect condition of the teeth, along with their being worn perfectly flat on the crowns, would imply a healthy and vigorous constitution and great longevity, with ample supplies of food, probably vegetable, while the fact that the left molar had been broken and the bone healed, shows active and possibly warlike habits. Such a man, if he were to rise up again among us, might perhaps be a savage, but a noble savage, with all our capacity for culture, and presenting no more affinity to apes than we

If the question be asked, What precise relation do these primitive European men bear to anything in sacred history? we can only say that they all seem to indicate one race, and this allied to the old Turanian stock of northern Asia, which has its outlying branches to this day, both in America and Europe. If they are antediluvians, they show that the old Nephthim and Gibboim of the times before the flood, were men of great physical as well as mental power, but not markedly distinct from modern races of men. If they are postdiluvians, then they reveal the qualities of the old Rephaim and Anakim of Palestine, who it is probably were of Turanian stock. In any case, they may well have points of historical contact with the Bible, if one were better informed as to their date and distribution.

(To be concluded.)

For "The Friend"

John Heald.

(Continued from page 150.)

5th mo. 1st, 1818. A great frost this morning. We went to Cropwell meeting. I sat some time, and said at length: I have been introduced to a view of two states that are very different. One of them is an humble one, even so much so, that when anything is proposed for their encouragement, they decline

accepting it, because of their unworthiness. The others are willing to glean up every encouragement held out for such who think they are unworthy of it, and apply it to themselves. Here it is readily discovered that there is a difficulty in administering to each, when each are disposed to take that which is designed for the other; the humble ones being ready to accept of close doctrine, supposing it good enough for them, while the others want a fair reputation. I labored a considerable time before I felt a release.

In the afternoon we had a very satisfactory meeting at a school-house, in which I had the largest share of the public labor; though Horton Howard, John Hunt and Hinchman Haines, each in their turn had acceptable service in it. I was glad of the opportunity. I understood that the inhabitants had been an indifferent people in regard to religion, and in some instances dissipated and intemperate characters, but some Friends had been concerned about them, and had some meetings with them; and some, who were travelling on Truth's account, had also meetings among them; and many of them had become thoughtfully concerned, and profitably so. My sense of their situation was favorable.

In the evening at Enoch Roberts', I proposed a time of silence. It became a very trying season. Hinchman and Horton both bore a feeling testimony, which tended in some measure to relieve me. I at length found openness to do what I thought to be my share.

2nd. We went to John Hunts', and from thence to Haddonfield meeting. I soon felt a concern to speak to the people. I began with, 'How goodly are thy tents, O Jacob, and thy tabernacles, O Israel!' How goodly is the situation of this people, or rather how goodly might it be, would they live as they ought to do, conformably to the dictates of Truth in their own bosoms. How goodly the enjoyments these would enjoy! John Hunt followed in a short testimony, after which Horton was enabled to enter deeply into the subject, and to bear a lengthy testimony to the truth, with demonstration and power. We parted with Horton this evening, he went to the city, and we staid at Benjamin Cooper's. Next day, being First-day, we went to Newtown meeting. I found a concern to bring to view our accountable situation. If in the space of two hours we were each to be called to a final account, would we not be likely to be careful how we spent the time, and what we did or omitted to do? This some live in daily conformity to, and how needful for us all to be careful! I labored until I felt a calm release of mind, having stood up twice, and at each time delivered considerable. I waited sometime and rather looked for some other laborer to engage in it, but none entered upon it, and I thought the time might be further spent than I was aware of, so I moved for the meeting to close; and Richard Jordan said, Why, the meeting is not done. I went to Benjamin Cooper's, and dined, and in the afternoon called at R. Jordan's. He then said, he would have tried to help me, if I had not moved so soon. On weighing the subject, I feel sorry it so happened, but I am not certain that he did not let the proper time pass. I feel that what I did was not wilfully wrong, if it was an error of mine.

The next day we had a large, favored meeting at Woodbury. I stated that some when

they come to meeting, having notice of a stranger being there, wait with expectation to hear what may be said, and if silence is continued to the end of the meeting, they are disappointed, go away dissatisfied, and conclude that the time is lost. I think it a pity that any should be induced to come to a meeting and gain no profit by it. If each one was to turn their attention inward, and consider what they ought to do to please their Creator, they might profit and improve, if it should be so that words should not be expressed. I addressed the youth in a very feeling manner, and, in doing it, reached in an affecting way to the parents. My mind was humbly thankful for the favor, and vocal supplication was offered to the Author of all good, and praises for the gracious blessings bestowed.

5th mo. 5th. Attended a meeting at Upper Greenwich. It seemed to me that the life of religion was low. After sitting sometime and under exercise, I felt an openness to say, It has been no small exercise to me to appear in the capacity of a teacher or instructor. This has frequently been trying to me at home and abroad, being ready to conclude [inquire] what is there that I know, that other men or women do not know. But I have sometimes thought it might be profitable to tell people what they do know, and call their attention to it. And now I would ask if there is not a belief lodged in the minds of many, that religion is at a low ebb? And is there not in the minds of such, a secret sense of mourning at times on account thereof? If the minds of the people are secretly elad in mourning on this account, is it not worth while to consider the cause, and shall we not be led to the belief, that it proceeds from unfaithfulness?—a little unfaithfulness in one, and a little in another, and a secret departure from the paths of rectitude, that no human eye is privy to, no mortal knows of, but the individual, who secretly supposes a little indulgence cannot be of much disadvantage. It is known to be wrong, but a little will be gratifying, and will not be of much disadvantage to the good cause; so the individual goes on to do the thing, and is convicted and feels remorse of conscience—is condemned within. In a little while he finds a like temptation, again yields to it, and again is condemned. If such an one goes on, and carries his own condemnation in his bosom, and in this condition comes to a final close, what idea can we affix to such an end? Where is the well-grounded hope? Is it not likely that shades of sorrow would cover such? Meditate, and consider that this secret deviation accounts for the low state of religion in our time, as I apprehend. In regard to the performance of worship, such are unfit and unprepared to perform that great duty. Though such may be punctual in attending thereon, the mind may be roving after visionary objects, and delighted therewith. This is to serve for worship to a God, who sees the secret of every heart!

6th. Were at a meeting near Upper Penn's neck. I felt some exercise with great poverty. After a time of this kind of silence, I said: "Friends, have we not read that open rebuke is better than secret love? Under the legal dispensation, it was written, Thou shalt in anywise reprove thy brother, that sin be not upon him. The Author of the Christian religion said, If thy brother offend thee, tell him his fault between thee and him alone; if he hear thee thou hast gained thy brother. It

may not be improper to consider whether this requisition is not neglected, though required by the law and the gospel; and does not this omission proceed from an individual neglect of duty? Such are in the commission of acts for which they are condemned in themselves, and thus the neglect of individual duty leads to a neglect of social duty. On being retired, such feel little or no reconciliation with the Author of their existence, but carry the sense of condemnation with them. But if they submit to do right, in this there is no condemnation, but peace. I was introduced into the concern in a way to gain upon them, so gradually to find a near access to them, and admonish and reprove with tenderness, and invited to be more obedient; and so parted with feelings of love and nearness.

We passed on this evening to Salem, and lodged with Priscilla Wright, a widow. 7th. Were at their meeting. I felt a concern to say: Reprove a wise man and he will be wiser; then adverted to the disposition I frequently meet with in appointed meetings, suffering the mind to be turned outward instead of an inward attention; and from one subject to another, until several things were brought to view. Among these, was the dissipating one of partaking of strong drink, and some of the effects thereby produced, and the danger of indulging in wrong practices. It was lengthy labor. In the afternoon we went to Greenwich, to the house of John Sheppard, where we were kindly entertained.

5th mo. 8th. Had a meeting at Greenwich, not very large. It was a trying, exercising season to me, in which I felt doubtful of the meeting being to much profit. At length I felt as I believe that I had better engage in testimony. I said, I have been laboring to be reconciled to silence or vocal labor, whichever might appear most likely to bring peace of mind. We may read the declaration of the inspired prophet, that the work or fruit of righteousness shall be peace, and the effect, quietness and assurance forever. Again, we read, there is that scattereth abroad and yet increaseth, and there is that withholdeth more than is meet, and it tendeth to poverty. Withholding more than is meet is so common, that I think it deserves more frequent attention than is given to it; and for want of this attention, the peaceful reward is often missed. I went on for some time, but seemed to get but little entrance. I, however, did not find a release of mind, and laboring along seemed still not to be released, nor to gain on the audience, but again laboring I found an entrance, and it became a solemn time, and a sense of much favor and love prevailed and spread, until we seemed to be near one to another, and considerable tenderness was shown. In the afternoon we returned to Alloway's Creek, and in passing along the streets of Greenwich, I felt a flow of love to the inhabitants.

(To be continued.)

### Niagara.

(Concluded from page 151.)

From Table Rock or Goat Island, much of the sound is evidently shut in, by the depth and narrowness of the channel; also the fall is broken and subdued by the amazing depth of the river underneath, which at the "Horse Shoe," drops into its own bed, and not upon masses of rock, as in the case of the other falls in the

vicinity of incomparably less volume. Indeed, such is the depth of the river, that the mighty torrent from above is soon lost in the abyss below, and instead of flowing on violently over the surface, forces its way to the bottom of the channel, bulging the surface turtle shape, passes silently outward, leaving the face of that unexplored depth from a short distance below the fall to the whirlpool, comparatively peaceful. The Canada side is a much better situation for a general outlook. The overwhelming scene of terrible power in the clashing sound of angry waters is there fully unfolded, for in one unexampled picture are grouped the chief glories of Niagara.

Here the visitor looks the American Fall full in the face; the fall of the Bridal Veil and Centre fall are directly before him; there he overlooks the precipitous walled front of Goat Island, crowned with verdure, and forest trees clothed in the vesture of autumn, while to his right hand, the eye takes in the whole of the great Horse Shoe Fall, its western wing so near, that he might almost step from the rock and bathe beneath the cataract. Table Rock, or that part which remains of it, affords the best view of the wonderful channel below, comparable to a trough some 600 feet or more in depth, cut out of the rock, to conduct in safety to the lake this remarkable river. Into this mysterious passage is gathered the whole of Niagara, less than a quarter of a mile in width, while above the fall, the opposite shores are about two miles asunder. Planting his feet firmly upon the very edge of the rock, he views a scene truly indescribable. In an outward sense the beholder is one of nature's baptised children: a gentle wind carries the mist all around and above, while close to the right, a cloud of vapor spreads its hazy outline over the sky, and marks the agony and struggle of the flood underneath: at his feet, the river moves on in subdued grandeur in the pride of its strength; a better view of which can nowhere else be had, down to the upper suspension bridge, and beyond, until its waters are shut out from the eye by a turn in the channel some distance above the railroad bridge at Falls City, two and a half miles away.

As I stood upon Table Rock looking down into the deep channel, the river passing before me in triumph to the lake, its surface, though wonderfully agitated in the vicinity of the fall, but beyond, not more broken than I have seen the bright waters of our Delaware; the contrast was deeply impressive; the quiet, powerful movement of that deep mysterious river, without soundings, and the wild, rushing rapids, united to the heavy voice and furious leap of the cataract, hushed in this sudden transition into comparative stillness. I saw therein a living, perpetual type of Time's headlong river flooding its victims over the rocks of adversity, onward with steady unyielding power and purpose to that transition which divides the turbulent waters of this life from the still, untrodden courses of the life beyond. The rapids far exceeded my expectations; the fall did not; and my impression is, the more they are seen and studied, the deeper will be our sense of their exceeding grandeur, and that the beholder stands awed as in the presence of the Infinite. The river above the rapids, is more than twice the breadth of the Delaware opposite Philadelphia; Goat Island, at the fall two miles below, dividing it; that portion passing east and

north, producing the American Fall, being greatly less than that which passes west, following the channel, causing the Horse Shoe Fall. At least two-thirds of the breadth, and a much larger proportion in quantity of water is compressed here into less than half a mile, with added power and depth, at the point where the sweeping flood leaps wildly into the abyss below. The green appearance of the water as it passes over the "Horse Shoe," referred to so beautifully in the lines herewith copied, is believed to be owing to its depth estimated to be not less than twenty feet; and on account of the singular shape of the rocky breastwork, the waters are piled in upon each other in their descent at this point; which, by the wearing away of the rock, has assumed nearly an angular form, producing a wonderful concentration; as it were two cataracts, joined, in part face to face, curving out and northward toward either shore. I refer now to the Canada Fall, or that which separates Goat Island from the Canada shore, and in looking at it carefully, I am unable to speak of it as crescent shaped, or as resembling a horse shoe. The wearing away of the rock has certainly made it a very irregular one, and that which would correspond to the base of the curve is as I have stated, nearly an angle; and this is recognised as marking the channel of the river, and the boundary between American and British territory. The Whirlpool, a short distance below the lower suspension and railroad bridge, is a remarkable feature of the river, caused by an angular turn, and sudden narrowing of the channel, in conjunction with the powerful under-current much stronger than at the surface, produced by the overwhelming pressure of the fall itself. These forces operating together, cause this singular rotary motion, which doubtless penetrates the river its entire depth, believed to be from 500 to 600 feet at this point. Goat Island contains about 69 acres, is a fraction over a mile in circumference, and heavily timbered, with pleasant carriage ways, and walks, and seats here and there under the ample shade.

The approach to the American Fall, and entrance to the "Cave of Winds" underneath is from the western side of the island; also the finest view of the rapids, is to be obtained from its south-western extremity, from the point where Prospect Tower recently stood, torn down to make way for one more durably built.

This is a position about opposite Table Rock, affording, perhaps, the best view that can be obtained of the river above the falls and as the eye travels upward and over the long line of rapids, one fall succeeding another and gathering power with added rapidity lashed into fury and narrowing toward the cataract; sweeping onward with unmeasured power, and majesty, every thought is gathered into stillness, and wondering admiration.

Here a good profile view is had of the American Fall, and from the crest of the rock, we may look over into the awful chasm separating Goat Island from the western shore, into which the resistless torrent has rolled century upon century. Here too the town of Clifton and the highlands that skirt the opposite shore are in full view, while not far to the right is the upper suspension bridge spanning the river; its towers and cables and interlacing net-work of iron, a truly noble and beautiful work, and a model of engineering skill.

The towers are covered with wood and corrugated iron, and in point of architectural beauty are highly ornate, imparting to each a peculiar air of elegance and strength, and rendering the whole very attractive among the many wonders of that interesting locality. Its height above the surface of the river is 90 feet, and length from rock to rock, the natural abutments upon which it rests, 1190 feet; and is capable of supporting 3000 tons. The iron bridge connecting Goat Island with the eastern side of the river, fifty rods above the American Fall, is an object of interest. The inquiry is often made, how was it ever built upon piers, over such a tremendous rapid? Certainly not without much difficulty and hazard of life. The structure is a plain one, and not attractive in any other light than as associated with peril, engineering ability and intrepid daring; and as affording the only communication with Goat Island. It seems to rest in safety upon its rocky bed, over which the water sweeps wildly by, shaking every joint and timber.

Thus are grouped together in one deeply interesting picture, the sublime and beautiful, the awfully grand, and the picturesque; and the works which men's hands have reared, wherein they seem to have been inspired by the overwhelming grandeur and perfection in the natural world around them.

Such is a faint view of Niagara, and a glimpse of its surroundings, as they appeared to the writer on an afternoon in autumn, as the sun was passing to the west behind the green hills that look out from the Canada shore; and after the perfection and brightness of summer had felt the first touches of the frosts of autumn.

P. B.

Philadelphia, 11th mo., 1873.

## THE FRIEND.

FIRST MONTH 3, 1874.

The new year is signalized in this State by changing its inhabitants and legislature under the action and restraints of a new Constitution; which, while it contains some serious defects, is generally conceded to be superior to the old one.

The article in which those conscientiously opposed to all warlike measures are particularly interested, is that on the militia; which has undergone a change that in one respect is an improvement; but in another is a retrograde step, unbecoming the assumed superior intelligence and christian liberality of the age. The clause in the old Constitution which declared that "Those who conscientiously scruple to bear arms, shall not be compelled to do so; but shall pay an equivalent for personal service," has been stricken out, and in place of it, the article says the Legislature "may exempt from military service persons having conscientious scruples against bearing arms." The framers of the old Constitution were far influenced by the principles of christian civilization, as to provide that men conscientiously scrupulous on the subject, should not be forced to violate their sense of duty to their heavenly Father, by any law making it obligatory on them to bear arms; though they committed the contradiction of punishing them, by obliging them to pay an equivalent therefor. But those who framed the new Con-

stitution, while they reiterated the fair sounding sentences, about the rights of conscience being inalienable; that "No human authority can, in any case whatever, control or interfere with the rights of conscience," yet retrograded from the advance the others had made, by taking away the prohibition, and leaving it optional with the legislature whether to exempt such or not. They could hardly have supposed the legislators would be more just, or more observant of the emphatic declaration respecting liberty of conscience, than themselves; and it seems fair to infer that their object in making the change was, to authorize more rigorous measures, when thought needful, in order, if possible, to force those conscientiously scrupulous against bearing arms, into the ranks of the militia.

The provision in the Article that the Legislature shall defray the expense of the militia out of the State Treasury, does not remove the liability to a military tax, and Friends as well as all others, may be subjected to the difficulties and losses resulting from having their property rendered liable for such a tax, with all the penalties attached for non-payment. Such a law was before the Legislature last year, and we believe, passed the House of Representatives, but failed in the Senate for want of time.

Were it not that every day's experience shows how readily men deny or disregard in practice, what they freely admit in theory, it might excite surprise that the members of the Convention, who readily admitted that liberty of conscience was emphatically guaranteed in the Bill of Rights; and very many, perhaps most of whom, were willing to acknowledge that war was a great evil, and irreconcilable with the precepts and principles inculcated by Christ and his Apostles, could nevertheless consent to strike from the Constitution of Pennsylvania a christian feature, so far creditable to it, as it approximated to the original and noble provision made by the Founder of the State, to secure to all the enjoyment of worshipping the Almighty according to the dictates of their conscience, without let or hindrance, and to engraft in its place a mere subterfuge, which leaves these sacred rights of conscience as affecting very many citizens, dependent on the will or whim of a legislature.

We frequently hear it said that the State is to know no difference between one religious profession and another; that there must be no union between Church and State. In one sense both of these are true, but in another they are both false. Civil government is an institution of Divine Wisdom, and within the limitation of the higher law of the Almighty, its authority is supreme.

In conferring the delegated powers of civil governments, the almighty Arbiter of Nations, designed that they should be exercised in conformity with the principles of truth and righteousness, which characterize his own administration of the affairs of the world. No authority was conferred to go contrary to his manifested will. In all professedly christian countries, the religion of the New Testament, whether it is so recognized in stated terms or not, underlies the system of government built up to promote the welfare of the people; and the legislator or the magistrate occupies the position described by the Apostle as "the minister of God," who is bound not to be "a terror to good works, but to the evil."

It is specially stated that he is to be, "the minister of God to thee [to all] for good." The State is, therefore, not to ignore the difference between that which is true and good, and that which is untrue and evil; nor is it to be divorced from the church of Christ. It is bound so to act as not to interfere with, or violate his supreme commands, and to promote the extension of his government among its citizens. It cannot rightfully attempt to enforce any particular form of religious belief, nor undertake to regulate the government of the church; and it is equally prohibited from coming between the soul and its Divine Lawgiver, so as to interfere with its convictions of religious duty towards Him; so long as those convictions, or the effort to carry them into practice, do not injure another, or infringe on the peace and good order of the community.

The State, or its lawfully appointed Government, is but the representative of the people, the great body of whom in this country, profess to be christian believers; and in the enactment of laws, it has no more right to go counter to the principles of truth and justice laid down in the New Testament, than has any single professor. Still less—if possible—has it the authority to attempt to force a citizen or any number of citizens to disregard or act contrary to what he or they are sincerely convinced are those principles of right and justice. Hence it is that, referring to the article in the Constitution of this State, which affirms the right of liberty of conscience to be unalienable and indefeasible, this strong language is used in the Constitution, "We declare that every thing in this article is excepted out of the general powers of government, and shall forever remain inviolate."

We know that a majority of the members of the different religious denominations in the State, are not yet convinced that the servants of Christ cannot fight; but think they are justified, under certain circumstances, to engage in mortal combat. According to these provisions in the Constitution, no Legislature can have the power, to force the principles of peace and good will to men, upon them; nor yet to impose fines or other penalties, because they will not adopt those principles and always carry them out. But by the present Constitution, this good rule is not made to work both ways. By the introduction of the word *may*, it is made optional with those members of different religious denominations who approve of war, and who are a majority in the community, whether they will disregard the declaration respecting the inviolability of liberty of conscience, and force into the ranks of the army, or punish with fines and other penalties for not going voluntarily, those who conscientiously believe their Divine Master meant what He said, when He commanded his disciples to love their enemies, to forgive them their trespasses against them, to pray for them that despitefully used them, and not to avenge themselves; and who consequently cannot bear arms. If the first would be going beyond the power delegated by the Almighty to civil government, and a violation of Christ's law, "Do unto others what you would have others do unto you;" if it would be making a nullity of that part of the Constitution which so strongly guards the sacredness of the rights of conscience, as to elevate them above the meddling of the Legislature, it is impossible to show why the latter does not come in the same category, does not stand

on the same immutable basis, and that to perpetrate such an invasion of indefeasible rights would be an opprobrium to our christian profession. Yet it has been done again and again, and the present Constitution has left the door open to commit the same injustice and oppression hereafter, and time will determine whether it will not be repeated.

#### SUMMARY OF EVENTS.

**FOREIGN.**—It is stated that the contract for making the cable to be laid between the coasts of Ireland and New Hampshire, and of maintaining it for thirty days, is in the hands of Simmons Brothers, of London and Berlin, who are to receive for their work about \$6,000,000. The cable is about half completed.

Scarlet fever, in an unusually malignant form, prevails in parts of England. Many deaths of the disease have occurred in Liverpool.

The Dublin Chamber of Commerce has resolved to build a central railway station at an expense of £750,000.

Dispatches from the Gold Coast announce the arrival of the Highland troops at Cape Coast Castle.

The steamer Gypsey Queen, belonging to the River Tyne Improvement Commissioners, struck the wreck of a sunken lighter in that stream and went to the bottom in five minutes. There were between fifty and sixty men on the steamer at the time of the disaster, of whom eighteen were drowned.

London, 12th mo. 29th.—U. S. Bonds, 1865, 94½; new five per cents, 91¾. The rate of discount in the open market for three months bills is 4½ per cent., or ¼ per cent. below the bank rate.

Liverpool.—Uplands cotton 8½d.; Orleans, 8½d. a 8½d.

The hostile tone of recent pastorals issued by French Bishops has caused the German government to renew its complaints to France. A dispatch to the London Telegraph says France has given satisfactory assurances to Germany relative to the pastorals complained of. In the French Assembly several members have spoken of the imperfect postal arrangements between France and the United States, and urged the government to remove the difficulty which they say is injurious to French commerce, and inconvenient to the people at large. The Financial Secretary replied that it was the government's desire to harmonize the interests of the two countries, and a speedy understanding was expected.

Marshal Bazaine has left Versailles for the island of St. Marguerite, the place of his confinement.

The King of Portugal has prohibited the coolie trade at Macao, and the barracoons at that place have been closed.

The Emperor of Germany has been seriously unwell but was in better health on the 28th ult.

The Russian General Kaufmann is under the shadow of imperial displeasure for his manner of conducting the Khivan war, especially for his attack on the Turkomans, his premature publication of the treaty with Khiva, and his wasteful and corrupt administration in Turkistan.

A dispatch from Penang, dated 12th mo. 20th, announces that the Dutch troops have occupied both sides of the river running through Acheen. The Sultan, seeing defeat inevitable, has given in his submission to the Dutch commander.

It is stated that the Roman Catholics are making numerous converts in India. The propaganda has a staff in that country, with the Archbishop of Goa for its chief, under whom are nineteen bishops and between eight hundred and nine hundred priests. The returns made to the bishops show the number of believers to be a little over one million. The Goa diocese alone contains 230,000 Catholics.

The Archbishop of Canterbury lately preached a missionary sermon in which he said that though "the population in India, subject to the British Crown, or more or less connected with it, is about 180 millions of persons, and though great efforts have been made of late years to bring the influence of missionaries to bear upon those whom formerly they could not reach, still, with all efforts, not above 318,000 Protestant converts have as yet been made from these native populations."

The Lutheran Observer reports, as the effect of concessions granted by the Czar of Russia a year or two ago, to the Lutherans in his empire, that thirty thousand persons in that country rejoined the Lutheran church in 1872. These concessions were granted in response to the petition of a delegation from the Evangelical Alliance of the United States.

The Dutch Colonial Minister has sent a written state-

ment to the Second Chamber, declaring that the war in Acheen would render it necessary for the State to be placed under Dutch sovereignty as a guarantee for the future maintenance of peace. It would, however, preserve its autonomy, as the Dutch government in no way intended to place Acheen under its direct dominion.

The condition of Spanish affairs does not apparently improve, and the position of the contending parties has not materially changed. A Spanish republican force of 15,000, has entered Biscay. Fourteen thousand Republican troops, under General Moriones, has been transferred by sea from San Sebastian to San Antonia. It is said they were surrounded in San Sebastian by thirty thousand Carlists, and had no other means of escape from capture. The insurgents still hold Cartagena. Fort Julian, one of the strongest defences of the place had been breached.

The resignation of Daniel Sickles as United States Minister at Madrid, has been accepted, and Caleb Cushing appointed in his place. Havana dispatches say the appointment of Caleb Cushing is favorably received here, and much satisfaction is expressed at the resignation of Sickles.

The Madrid government has not only refused to accept the resignation of Captain General Jouvellar, which was recently tendered, but has granted him extended and extraordinary powers.

The debt of the island of Cuba amounts to \$87,000,000. The notes of the Spanish Bank in circulation amount to \$104,000,000.

The Chilean House of Representatives has passed an education bill, against the opposition of the Conservative party and the protests of the bishops.

**UNITED STATES.**—There were 250 interments in Philadelphia last week, and 474 in the city of New York.

One of the special results of the United States geological and geographical survey of the territories, in charge of Professor F. V. Hayden, during the past summer, has been the discovery that Colorado territory is the centre of the greatest elevation of the Rocky Mountain chain. So far as known, there are in the district explored during the past season by the survey seventy-two peaks, ranging from 14,000 to 14,200 feet in height.

Louisiana, which before the war was behind some of the other States in the production of cotton, now surpasses every other State. Its crop this year will be 1,200,000 bales of the 3,900,000 bales raised in all the South. To do this the State has largely abandoned the cultivation of sugar.

The Lake Superior Copper Mines yielded last year 14,000 tons of ingot copper.

The United States steamer Juniata from Santiago de Cuba with the 102 survivors of the *Virginus*, reached New York on the 28th ult. The prisoners will be placed on the receiving ship at the navy yard, and no communication with them will be allowed for the present.

The *Ville du Havre* was the fourteenth large Atlantic passenger steamer totally lost. The statement that with the exception of the *Great Eastern*, she was the largest vessel afloat is erroneous. There are several larger steamships.

The indications are that the pork market will be abundantly supplied this season. The National Crop Reporter, however, publishes returns from nine Western States, showing that the total number of hogs fattened in those States the current season, is about 8 per cent. less than for the season of 1872.

The report of the State Salt Inspector, of Michigan, shows that 824,346 barrels of salt were inspected last year. The salt producing territory has been materially enlarged during the year.

The total number of interments in Philadelphia for the year ending 12th mo. 27th, 1873, was 16,776, which is 3768 less than in 1872. It appears that 2290 persons died of consumption, 961 inflammation of the lungs, and 1105 from cholera infantum. There were 8677 deaths of males, and 8099 females.

A review of the produce trade of Chicago for the past year has been published. The receipts of grain during the year were 96,731,598 bushels; shipments, 91,035,703 bushels; receipts of hogs 4,360,000 head; cattle, 765,000 head; sheep, 300,000 head; lumber, 1,084,993 feet. Total value of all produce received during the year is, in round numbers, \$240,000,000.

**The Markets, &c.**—The following were the quotations on the 29th ult. *New York.*—American gold, 110. U. S. sixes, 1881, coupons, 120; reg. 116½; ditto, 1868, 119; ditto, five per cents, 111 a 112. Superfine flour, \$5.85 a \$6.10; State extra, \$6.60 a \$6.80; finer brands, \$7 a \$10.50. White Michigan wheat, \$1.92; No. 2 Chicago spring, \$1.58; No. 3 do., \$1.54; amber Illinois,

\$1.68. Oats, 50 a 60 cts. Rye, \$1.06. Western mixed corn, 83 a 84 cts.; yellow, 84 a 84½ cts.; white, 80 a 81 cts. *Philadelphia.*—Uplands and New Orleans cotton 16 a 17 cts. Superfine flour, \$5 a \$5.75; extras, \$6 a \$6.75; finer brands, \$7 a \$10. Penna. amber wheat \$1.67 a \$1.70. Rye, 93 a 95 cts. New corn, 70 a 71 cts.; old yellow and mixed, 83 cts. Oats, 53 a 58 cts. Smoked hams, 11 a 13 cts. Lard, 8½ a 9 cts. Clover seed, 8½ a 10 cts. Beef cattle were in demand. Sales of 1800 at 7½ a 8 cts. per lb. gross for extra, 6 a 7 cts. for fair to good, and 3½ a 5½ cts. for common. About 9000 sheep sold at 5 a 6½ cts. per lb. gross, and 7000 hogs at \$7.50 a \$7.75 per 100 lb. net. *Chicago.*—No. 1 spring wheat \$1.17; No. 2 do., \$1.15½; No. 3 do., \$1.10½. No. 2 mixed corn, 53½ cts. No. 2 oats, 38½ cts. Rye 77 a 83 cts. No. 2 fall barley, \$1.39. Lard, 8½ cts. *St. Louis.*—No. 2 winter red wheat, \$1.64; No. 3 fall \$1.39 a \$1.40; No. 2 spring, \$1.20. New mixed corn 53 cts. No. 2 oats, 40 cts. Lard, 7½ a 8 cts. *Cincinnati.*—Family flour, \$7 a \$7.25. Wheat, \$1.40 a \$1.50. Corn, 54 a 57 cts. Rye, 92 a 93 cts.

#### FRIENDS' LIBRARY.

For the convenience of those who attend Arch Street Meeting, the Library will be open hereafter on Fifth day mornings, from half past 9 to 10 o'clock.

#### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held in Philadelphia on Sixth-day, First month 9th, 1874, at 1 p. m.

The Committees on Instruction and Admissions meet the same day at 10 a. m.

SAMUEL MORRIS,

Philada., 12th mo. 27th, 1873.

Clerk.

#### THE INDIAN AID ASSOCIATION.

The Executive Committee of Philadelphia Friends having accepted charge of the schools for the Wyandotte, Wichita, Kiowa and Comanche Indians, request the contributions of Friends in order to supply some pressing needs.

It has been found necessary to collect the children in Boarding Schools, and various articles of clothing, furniture, &c., are wanted to insure their comfort and proper care. Some money can also be judiciously expended in school supplies, in addition to those provided by the Government.

This is a critical time in Indian affairs, and help now will be extremely valuable.

Contributions may be sent to JOHN S. STOKES, at this office.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends will may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cincinnati Post-office Building Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philad.

**DIED,** on the 4th of Eleventh mo. 1873, at her residence in Bristol township, RHODA S. ROBERTS, in the 77th year of her age, a beloved member of Bristol Particular and Fallsington Monthly Meeting. The removal of this dear Friend is keenly felt by her bereaved family and friends, but they sorrow not as those without hope, having the consoling belief that their loss is her eternal gain.

—, on Second-day, the 22d of Twelfth mo. 1873, at her residence in Newark, New Jersey, RACHEL, wife of William A. Riker, aged nearly seventy years, a member of New York Monthly Meeting of Friends. Many and varied were the trials of this dear Friend and at times for many months, her sufferings were severe, yet she endured all with christian patience. She was oftentimes brought very low in mind, under a sense of her own nothingness, and had many doubts and fears in relation to her final acceptance by her Heavenly Father; but she was enabled, after passing through many exercises and baptisms, to say near her close, "I feel willing, and ready, to depart and be at rest."

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

## Primitive Man and Revelation.

BY PRINCIPAL DAWSON, D. D., M'GILL COLLEGE, MONTREAL.

(Concluded from page 157.)

I have referred to European facts only, but it is remarkable that in America the oldest race known to us is that of the ancient Alleghans and Totheans and their allies, and that these, too, were men of large stature and great cranial development, and agricultural and semi-civilized, their actual position being not dissimilar from that attributed to the earliest cultivators of the soil in the times of Adam or Noah.

So far the facts bearing on the physical and mental condition of primitive man are not favorable to evolution, and are more in accordance with the theory of Divine Creation, and with the statements of the sacred record.

Recent facts with reference to primitive man show that his religious beliefs were similar to those referred to in Scripture. The whole of the long isolated tribes of America held to a primitive monotheism or belief in a great Spirit, who was not only the creator and ruler of the heavens and the earth, but had the control of countless inferior spirits—manitous or ministering angels. They also believed in an immortality and a judgment of all men beyond the grave. Hence arose in various forms the doctrine of guardian manitous, represented by tokens or teraphim, and watching over individuals, families, and places. Hence arose also the practice of burying with the dead the things he had valued in life, as likely in the vague imaginings of the untaught mind to be useful in the other world. Their traditions also embraced in various and crude forms the idea of a mediator or intercessor between God and man. No one who studies these beliefs of the American tribes, can fail to recognize in them the remnants of the same primitive theology which we have in the patriarchal age of the Bible, and more or less in the religions of all ancient peoples of whom we have historical records. I may say here in passing, that the tenacity with which the red man of America has clung to his barbaric and long isolation to remnants of primitive truth, is an additional reason why we should strive to give him a purer gospel.

With reference to these prehistoric men,

known to us only by their bones and implements, it may not be possible to discover their belief as to the unity of God; but we have distinct evidence on the other points. On the oldest bone implements—some of them made of the ivory of the now extinct mammoth—we find engraved the tokens or manitou marks of their owners, and in some cases scratches or punctures indicating the offerings made or successes and deliverances experienced under their auspices. With regard to the belief in immortality, perhaps also in a resurrection, the Mentone man—whose burial is perhaps the oldest known to us—was interred with his fur robes and his hair dressed as in life, with his ornaments of shell wampum on his head and limbs, and with a little deposit of oxide of iron, wherewith to paint and decorate himself with his appropriate emblems. Nor is he alone in this matter. Similar provision for the dead appears at Cro-Magnon and the Cave of Bruniquel. Thus the earliest so-called palæolithic men entertained beliefs in God and in immortality, perhaps the dim remains of primitive theism, perhaps the result of their perception of the invisible things of God in the works that He had made.

The antiquity of man as revealed by his prehistoric remains has probably been greatly exaggerated. A careful study of the latest edition of "The Antiquity of Man," by Sir C. Lyell, in which that great geologist has summed up all the scattered evidence on this point, must leave this impression. The particular facts adduced are individually doubtful and susceptible of different interpretations, though collectively they present an imposing appearance, and many of them have been weakened by recent observations and discoveries. American analogies teach us, as I propose to show in papers soon to be published, that undue importance has been attached to the distinctions of neolithic and palæolithic ages. The physical changes which have taken place since the advent of man have been measured by standards inapplicable to them, and the actual quadrupeds of the later post-pliocene period may have lived nearer to our time than has been supposed. No human remains have been found in beds older than the close of the so-called glacial period, and the earlier indications succeeding this period are not actual bones of men, but only rude implements, some of which are possibly naturally shaped stones, and others have had their antiquity exaggerated by misapprehension as to the mode of their occurrence.

It is, however, probable that the investigations now in progress will establish the fact that in the earlier part of man's residence in the Old Continent he was cotemporary with many great quadrupeds now extinct, and that some of them, as well as some races of men, may have perished in a great continental subsidence which occurred early in the modern or human period. Both of these conclusions will, I think, bring themselves finally into

harmony with the Biblical account of the antediluvian world, notwithstanding the strenuous opposition of the large party opposed to any correlation of natural and spiritual truth.

Science may soon enable us to account for the divergence of mankind into permanent races in a way more satisfactory than heretofore. It has heretofore been a stumbling-block with many in the doctrine of the unity of man that we find evidence of distinctness of race as great as at present in early Egyptian monuments. Modern ideas of derivation have swept away this as an infidel objection, but they have not failed to demand an enormous lapse of time for the early development of these races. A new law is, however, coming into view, which may render this unnecessary. It is that species, when first introduced, have an innate power of expansion, which enables them rapidly to extend themselves to the limits of their geographical range, and also to reach the limits of their divergence into races. These limits once reached, the races run on in parallel lines until they one by one run out and disappear. According to this law, the most aberrant races of men might be developed in a few centuries, after which divergence would cease and the several lines of variation would remain permanent, at least so long as the conditions under which they originated remained. This new law, which was hinted at long ago by Hall the Palæontologist of New York, is coming more distinctly into view, and will probably altogether remove one of the imagined necessities of a great antiquity of man. It may prove also to be applicable to language as well as to physical characters.

I have given above only a few samples out of many which may be adduced that the results of natural science, as applied to man, however they may at first seem to conflict with the truth of God, will ultimately come into harmony with it.

One object in referring to these subjects here has been to invite the attention of Christians to certain errors in the treatment of such subjects which I observe to be prevalent, and which I think every Christian man of science must sincerely deprecate.

The first is the hasty reception of broad popular statements of leading scientists as if they were received and proved conclusions. Nearly every new scientific fact and principle is at first only imperfectly understood and partially misapplied, and statements much too unguarded are often made by enthusiastic votaries of particular specialities.

The second is the resting content with the shallow assertion that the Bible need not be in harmony with Nature. The Bible is not a text-book of science, nor are spiritual truths always directly reconcilable at first with natural truths. But the Bible as a Book of God cannot outrage Nature, and there are necessary harmonies between the natural and the spiritual. Weak admissions that the Bible

accommodates itself to errors as to Nature may save the theologian the trouble of inquiry, and may be welcomed by men of science as setting them free from dogmatic trammels; but the earnest votary of science who is not a Christian despises those who make them and regards their doctrine as worthless.

A third is the connection of ancient superstitions or modern ecclesiastical expediences with God's word. Science is in its nature hostile to superstition, to ritualism, and to hypocritical expediency; while merely external and aesthetical modes of dealing with mental and moral interests it must always reject as vulgar folly. It is a fearful crime against the souls of men so to connect such things with the truth of God that men of high culture are repelled from what might otherwise awe them by its moral elevation, or attract them by its spiritual beauty. I believe that much of the antagonism of men of science is really excited by accessions which are not of God but the growth of human device in darker ages of the world. I would not ask the Christian to accommodate his creed to any requirements of the science or literature of our day. That would be an equally fatal error. What I ask is that the scriptural truth may be presented unmingled with extraneous matters, not of the Bible but of man.

Lastly, the Christian must not despise as unworthy of attention the current scientific doctrines on such subjects. If the missionary thinks it necessary to study the beliefs of the rudest tribes that he may better teach them the truth, surely we must not ignore the latest results of the intellectual work of the most cultivated men, which in any case is sure to influence the mind of the time, and which, properly treated, must yield positive results for the cause of God.

The scientific infidel is not always a wrongdoer to be put down. He is often a very darkened soul, struggling for light and sometimes driven back from it by the follies and inconsistencies of Christians. The lamentable and growing separation between those who study God's works and those who believe in His word is not all of it the fault of the scientist. The theologian will be held responsible for so much of it as may result from his adulterating the water of life with unwholesome earthly elements.

John Heald.

For "The Friend."

(Continued from page 158.)

"5th mo. 1818. We had a large, favored meeting at Pilesgrove or Woodstown. I sat some time under a weight of exercise, when a woman friend stood up and mentioned a desire that people would worship the Lord, saying the hour cometh and now is, when the true worshippers shall worship the Father in spirit and in truth, for the Father seeketh such to worship Him; and without any further comment sat down. The subject instantly spread in my view, and I immediately felt the way open to engage in it. I said, It seems to be a great thing for me to stand before so large an assembly, but how much more so to stand before Him, whose penetrating eye sees the heart, and the sincerity or insincerity attending! He seeth not as man seeth, man looks on the outward appearance, but He looks at the heart. When we present ourselves before Him, it is worth our while seriously to consider what kind of disposition we should appear in, and how we shall be prepared to give

an account of our doings. It may be trying to stand before a large assembly of our fellow-mortals, creatures composed of materials like ourselves, but what comparison does it bear to standing before our Judge, who knows our hearts, when every secret thing will be brought to open view, when thousands and tens of thousands of angels and glorified spirits are standing round, when the secrets of the heart shall be revealed; how awful the situation we are all hastening to, and which we have no way to escape from! Now, where is the excuse for those, who do not intend to be confined to the restraints of religion, and who are carrying in their own bosoms remorse, or condemnation? If our heart condemn us, God is greater and knows all things, but if our heart condemn us not, then we have hope towards God."

John Heald then appealed to those of middle age, or even further advanced in life, who had not been concerned to worship God, or to know how true worship should be performed, referring to the fact that even children have been prepared to worship the Lord, when their minds were humbled by the Divine Power, agreeably to the scripture declaration, "out of the mouth of babes and sucklings thou hast perfected praise." He remarks of this opportunity, "The power of Truth overshadowed the meeting marvellously."

"In the afternoon we had another large, favored meeting, eight miles distant, at Woolwich, at four o'clock. This may be thankfully remembered, and I hope will. These meetings seem to me to be times of eminent favor and condescension from on high. Ability was wonderfully furnished to labor; but let it be remembered the cause is his, and He furnisheth the ability to accomplish His own work. The praise is his, and may it be ascribed to Him, for He alone is worthy of it now and forever.

After we came to John Tatum, Jr.'s, we were informed that Haddonfield Monthly Meeting was to be the next day. We attended it the 11th. In a short testimony in the early part, I endeavored to set forth the goodness of the sons coming up in the room of the fathers, and the daughters instead of the mothers. Where virtuous fathers and mothers have sons and daughters, what consolation to them to see a fair prospect of succession in the church.

After this meeting we went home with Henry Warrington, who has taken us in his carriage thus far in Jersey, only once or twice we rode a few miles in some other carriage. His kindness has been great, as well as that of his family, for which I feel grateful, but do not expect ever to have it in my power to compensate the favor.

14th. Were at their meeting [at Burlington]. Soon after sitting down I felt my mind engaged to admonish them to be on their guard, when they took a seat in a religious meeting. The enemy is so busy to catch away the mind, and furnish objects for contemplation, that much depended upon being particular at first sitting down.

15th. An appointed meeting at Bordentown. I began in a way to draw their attention, without raising their expectation to have an idea of much, and was led to express a lengthy testimony in soft, engaging terms, that I even wondered myself at the manner of it, and it has left a pleasant savor on my mind.

16th. At Mansfield in the afternoon, after considerable silence I said, be watchful, be patient, be humble and resigned. This counsel, I have had a view of keeping to myself. It has been considered to be good for ministers, and if so, will it not be so for others? Should we not all be watchful, should we not all patiently wait and quietly hope, should we not all be humble? It is the humble He teaches of His ways, and should we not be resigned to His will? As I followed the opening, it seemed to embrace several subjects among these intemperance and dissipation that unfaithfulness, though little in its beginning, and the deviation small at first, might lead into a hardness of heart, so as to deny the being of a God."

After attending a few other meetings in New Jersey, our friend proceeded to New York in time to attend the Yearly Meeting held there. Of this he says: "23rd. Attended two sittings of the Meeting of Ministers and Elders, in the course of which Stephen Grell laid a concern before that meeting to make religious visit to Europe, especially to Russia; and the meeting united with the Monthly and Quarterly Meetings' certificates, and with him in his concern, which was certified by the meeting's written certificate.

28th. Two sittings on church affairs. Near the close of the last sitting, I observed, in remark I made, that some who are talented men, sometimes fall into the practice of speaking to business in Monthly, Quarterly and other meetings, with only the ability derived from nature; which will tend to hurt and impoverish those who are thus employed. Instead of helping along profitably, it will defeat its own purposes and produce poverty. I speak to passing business availing require at least a measure of the qualification that is requisite for the ministry. Without this will be poor indeed. Though it may have specious show, it tends to disadvantage to individuals and society at large."

After the close of the Yearly Meeting, John Heald went on to New England, visiting meetings as he passed along. In some of these was largely engaged in the exercise of the ministry. Of that at North Bridge, Massachusetts, held 6th mo. 9th, he says: "The silent part was long. I have waited to feel to putting forth of the Shepherd in this as well as others, and, as I carefully proceeded, I felt as I apprehended some opposition; but going on in the opening, the power of Truth came into dominion marvellously, and reigned triumphantly, the minds of the people were generally humbled, I believe, and mine was humbly thankful. It held more than three hours, and the people were still in body and in mind, and did not appear weary of sitting, nor quick to leave their seats. The powers the Lord's, and the praise belongs to Him."

10th. We went to attend Old House, where there has been a meeting a good while, but the members of our Society are few. I had some time before I began to speak, but having begun I continued to speak for a long time. It was after 2 o'clock when the meeting concluded. I was much spent, and a meeting appointed for me at 4 o'clock, a few miles off. We took some refreshment and went on to a meeting called Mendon; got there in season, but it was a dull meeting. After a time of silence I stood up and remarked to Friends the loss there was in taking a seat, and letting the mind at ease, when they had the co-

many of strangers. It would be more profitable to enter into an individual labor. I continued to speak for more than an hour, I suppose, before I could feel at liberty to sit down; and after that, I was drawn forth into supplication. The vocal exercise had enfeebled me, but I labored through, and the meeting concluded. I do not remember that I was ever so much spent with laboring in the way of the ministry.

11th. We went to Smithfield. My mind centred down into silence, and I felt a solemnity was over the meeting. When I felt the time had come, I stood up and said: Go thy way, eat thy bread with cheerfulness, and drink thy wine with a merry heart, for now God accepteth thee. This I thought to be about the substance of the text, and this is a very comfortable state to be in. The desire of most or all is to be happy, but is the desire to be obedient as great? or is the desire to be happy, all that is necessary? This seems to me to be like Balaam's desire, Oh that I may die the death of the righteous, and that my last end may be like his! But he loved the wages of unrighteousness, he appears to have indulged in obtaining unrighteous gain, though he desired to die the death of the righteous.

It was a good time, and will be remembered, I hope, to profit."

After attending New England Yearly Meeting, which he says, "I believe was a good one, and was conducted much to satisfaction," he came in the course of his visit to Smithfield. Of the meeting there, 6th mo. 21st, he has preserved this memorandum. "Notice had been spread that we expected to be there that day, and many of the people living round about were there. I could not minister to them, only to remark, that such as had witnessed compunction for speaking, or for not speaking, could make a suitable allowance; for I desire to be silent when speaking would occasion pain, and to speak when that would give relief.

In the course of the afternoon, I felt such a depth of trial on my mind, I was almost ready to wish myself at home; and though I had endeavored to avoid speaking anything in the time of meeting that was not required, and to speak whatever was required, yet O how tried my mind was. But I avoid trying to describe it. This morning [the 22d] my mind seems calm, patient and resigned. Thanks be to the Preserver of men for the blessing."

(To be continued.)

### Comets.

#### SHOOTING-STARS.—METEORS OF NOVEMBER 14.

(Continued from page 154.)

At the time of this wonderful meteoric display Captain Hammond, of the ship *Restitution*, had just arrived at Salem, Massachusetts, where he observed the phenomenon from midnight till daylight. He recollected with astonishment that precisely one year before, viz., on the 13th of November, 1832, he had observed a similar appearance (although the meteors were less numerous) at Mocha, in Arabia. It was found, moreover, as a further and most remarkable coincidence, that an extraordinary fall of meteors had been witnessed on the 12th of November, 1799. This was seen and described by Andrew Ellicott, who was then at sea near Cape Florida. It was also observed by Humboldt and Bonpland, in

Cumana, South America. Baron Humboldt's description of the shower is as follows:—"From half after two, the most extraordinary luminous meteors were seen toward the east. Thousands of bolides and falling stars succeeded each other during four hours. They filled a space in the sky extending from the true east 30° toward the north and south. In an amplitude of 60° the meteors were seen to rise above the horizon at E.N.E. and at E., describe arcs more or less extended, and fall toward the south, after having followed the direction of the meridian. Some of them attained a height of 40°, and all exceeded 25° or 30°. Mr. Bonpland relates, that from the beginning of the phenomenon there was not a space in the firmament equal in extent to three diameters of the moon, that was not filled at every instant with bolides and falling stars. The Guaiqueries in the Indian suburb came out and asserted that the firework had begun at one o'clock. The phenomenon ceased by degrees after four o'clock, and the bolides and falling stars became less frequent; but we still distinguished some toward the northeast a quarter of an hour after sunrise."

This wonderful correspondence of dates excited a very lively interest throughout the scientific world. It was inferred that a recurrence of the phenomenon might be expected, and accordingly arrangements were made for systematic observations on the 12th, 13th, and 14th of November. The periodicity of the shower was thus, in a very short time, placed wholly beyond question. The facts in regard to the phenomena of November 13, 1833, were collected and discussed by Olmsted, Twining, and other astronomers. The inquiry, however, very naturally arose whether any trace of the same meteoric group could be found in ancient times. To determine this question many old historical records were ransacked by the indefatigable scientist, Edward C. Herrick, in our own country, and by Arago, Quetelet, and others, in Europe. These examinations led to the discovery of ten undoubted returns of the November shower previous to that of 1799. The descriptions of these former meteoric falls are given by Professor H. A. Newton, in the *American Journal of Science*, for May, 1864. They occurred in the years 902, 931, 934, 1002, 1101, 1202, 1366, 1533, 1602, and 1698. Historians represent the meteors of A. D. 902 as innumerable, and as moving like rain in all directions. The exhibition of 1202 was scarcely less magnificent. "On the last day of Muharrem," says a writer of that period, "stars shot hither and thither in the heavens, eastward and westward, and flew against one another like a scattering swarm of locusts, to the right and left; this phenomenon lasted until daybreak; people were thrown into consternation, and cried to God the Most High with confused clamor." The shower of 1366 is thus described in a Portuguese chronicle, quoted by Humboldt: "In the year 1366, twenty-two days of the month of October being past, three months before the death of the king, Don Pedro (of Portugal), there was in the heavens a movement of stars such as men never before saw or heard of. At midnight, and for some time after, all the stars moved from the east to the west; and after being collected together, they began to move, some in one direction and others in another. And afterward they fell from the sky in such numbers, and so thickly together, that as they descended low

in the air they seemed large and fiery, and the sky and the air seemed to be in flames, and even the earth appeared as if ready to take fire. That portion of the sky where there were no stars seemed to be divided into many parts, and this lasted for a long time."

The fact that all great displays of the November meteors have taken place at intervals of 33 or 34 years, or some multiple of that period, had led to a general expectation of a brilliant shower in 1866. In this country, however, the public curiosity was much disappointed. The numbers seen were greater than on ordinary nights, but not such as would have attracted any special attention. The greatest number recorded at any one station was seen at New Haven by Professor Newton. On the night of the 12th 694 were counted in five hours and twenty minutes, and on the following night, 881 in five hours. A more brilliant display was, however, witnessed in Europe. Meteors began to appear in unusual frequency about 11 o'clock on the night of the 13th, and their numbers continued to increase with great rapidity for more than two hours; the maximum being reached a little after 1 o'clock. A writer in Edinburgh, Scotland, thus describes the phenomenon as observed at that city:—"Standing on the Calton Hill, and looking westward,—with the observatory shutting out the lights of Princes Street,—it was easy for the eye to delude the imagination into fancying some distant enemy bombarding Edinburgh Castle from long range; and the occasional cessation of the shower for a few seconds, only to break out again with more numerous and more brilliant drops of fire, served to countenance this fancy. Again, turning eastward, it was possible now and then to catch broken glimpses of the train of one of the meteors through the grim dark pillars of that ruin of most successful manufacture, the National Monument; and in fact from no point in or out of the city was it possible to watch the strange rain of stars, pervading as it did all points of the heavens, without pleased interest and a kindling of the imagination, and often a touch of deeper feeling that bordered on awe." At London about 1 o'clock a single observer counted 200 in two minutes. The whole number seen at Greenwich was 8485. The shower was also observed in different countries on the continent.

In 1867 the display was generally observed throughout the United States.

The shower of 1868 was in some respects quite remarkable, though the number of meteors was less than in 1866 or 1867. At New Haven the fall commenced about midnight, and from 2 o'clock till daybreak over 5000 meteors were counted. The time of maximum could not be accurately determined, as no decrease in the numbers was observable till dawn. The display was also witnessed in England and in Cape Colony, South Africa. The times of maxima in these countries differed so materially as to indicate a decided stratification of the meteoric stream. The entire depth, moreover, where crossed by the earth in 1868, was much greater than at the part traversed either in 1866 or 1867.

(To be continued.)

We are but a speck on earth in the view of our Almighty Creator, whom we ought ever to obey, and listen to the "still, small voice, which speaks as never man spake."

Selected.

A love for the attendance of meetings has been a characteristic of all true Quakers. Samuel Smith mentions his visiting Dorothy Owen, in North Wales, a young woman noted for her excellent gift in the ministry. He says: "She had been several times to the Yearly Meeting at London, more than two hundred miles on foot, and to Quarterly Meetings frequently from twenty to fifty miles." Our late dear friend, that honest minister of the gospel, Ellen McCarty, of Elkland, Lyeoming county, Pennsylvania, often walked to the next settlement to attend meeting, a distance of five miles, carrying a babe with her. On one occasion in winter, she remained all night in the neighborhood of the meeting-house, and in the morning found that snow had fallen to a considerable depth. She had two of her little boys with her, who assisted her in turns with the babe, until the infant became fretful, and would cry whenever either of the brothers took it, and the difficulty of walking through the snow with such a weight in her arms, made the journey very toilsome to her, and she had frequently to sit down, overcome with fatigue. Harassed in body and tried in mind, she declared aloud she would not go to the meeting again. She reached home safely, and things passed on during the week as usual, but on the next Seventh-day she found a weight of darkness, and an uncommon depression upon her spirits. On feeling this, she sat down in quiet, anxiously seeking the cause. Her mind was soon illuminated clearly to discern the truth, and she perceived a hand pointing to the meeting-house, whilst she remembered the hasty resolution she had formed in her own impatient will. She saw her error, took fresh courage to encounter the difficulties and trials of her situation, and the next day contentedly trudged with her usual load the five miles to attend her meeting and seek for spiritual strength to sustain her own soul. She was careful henceforward to be diligent in the performance of this, as well as her other duties, and in consequence thereof grew in the root of Life, became an able minister of the Gospel, and was made useful in the household of faith.

Be thou faithful unto death, and I will give thee a crown of life.

*Value of Sleep.*—It must be remembered that sleep repairs not the vital functions only, but simultaneously those functions which we distinctively describe as mental attributes, and of which the brain is, to our limited comprehension, the organic instrument. The intellectual part of our nature, taking the phrase in its largest sense, is exhausted by its continued exercise, in like manner as the bodily organs, and requires the intermittent periods of repose and repair. If other proof were needed of the great function which sleep fulfils in the economy of life, it may at once be found in the effects which follow the privation of this repair. A single sleepless night tells its tale, even to the most careless observer. A long series of such nights, resulting, as often happens, from an over-taxed and anxious brain, may often warrant serious apprehension, as an index of mischief already existing, or the cause of evil at hand. Instances of this kind, we believe, are familiar to the experience of every physician. But here, as in many other cases, the evil of deficiency has its counterpart in the evil of excess. Sleep

protracted beyond the need of repair, and encroaching habitually upon the hours of waking action, impairs more or less the functions of the brain, and with them all the vital powers. This observation is as old as the days of Hippocrates and Artæus, who severally and strongly comment upon it. The sleep of infancy, however, and that of old age, do not come under this category of excess. These are natural conditions appertaining to the respective periods of life, and to be dealt with as such. In illness, moreover, all ordinary rule and measure of sleep must be put aside. Distinguishing it from coma, there are very few cases in which it is not an unequivocal good, and, even in the comatose state, the brain we believe, gains more from repose than from any artificial attempts to rouse it into action.

#### BE IN EARNEST.

Selected.

Life is brief: its days are fleeting  
As the bird on swiftest wing,  
As the pearly dews of morning,  
Or the rill from mountain spring;  
Hastes the bird through skies of azure,  
Dew exhales in morning's sun,  
Down into the grand old ocean  
Mountain streams unceasing run.

Be in earnest: souls are dying,  
Souls for whom a Saviour died:  
Satan with his wiles is trying  
To increase the blinded tide  
Who by night and day are pressing  
Downward to the realms of death,  
Where the wail of woes distressing,  
Upward floats on every breath.

Be in earnest: hourly nearer  
Comes the solemn judgment day,  
When, with vision purer, clearer,  
We'll review life's winding way.  
Vain all effort then to borrow  
One excuse for sloth while here,  
Still more vain for grief or sorrow—  
Just our sentence will appear.

Be in earnest: it is glorious  
On life's battle-field to stand,  
With the Spirit's sword victorious  
In our waiting, willing hand,  
Soon the fierce and fiery struggle  
In the flesh with sin shall cease,  
Following close the din of battle  
Dawns the day of rest and peace.

#### WISDOM.

Selected.

Ah! when did wisdom covet length of days,  
Or seek its bliss in pleasure, wealth, or praise?  
No: Wisdom views with an indifferent eye  
All finite joys, all blessings born to die!  
The soul on earth is an immortal guest,  
Compelled to starve at an unreal feast;  
A spark which upward tends by nature's force;  
A stream diverted from its parent source;  
A drop dis severed from the boundless sea;  
A moment parted from eternity;  
A pilgrim panting for a rest to come;  
An exile anxious for his native home.

Hannah More.

Selected for "The Friend."

#### Extracts from an Epistle by William Penn.

My dear friends, there be several things, or the enemy in several appearances that will attend you in your holy march to the eternal land of rest, of which I would caution you, that you may none of you make shipwreck of any of those holy beginnings you have experienced by the Light and Spirit of the Lord. Beware of vain thoughts, for they oppress and extinguish the true sense.

These vain thoughts arise from the enemy's presentation of objects, and the mind's looking upon them till they have made their im-

pression upon the mind and influenced it into a love of them. This is a false liberty, a dangerous, yea destructive liberty, to the holy sense that God hath begotten in any.

For as that is not revived, but hindered by such thoughts, so it is not improved but destroyed by them. The Divine sense in the soul is begotten by the Lord: it is his life and Spirit, his holy breath and power that quickeneth the soul, and maketh it sensible of its own state and of God's will, and that raiseth fervent desires in it to be eternally blessed. Satan is the father of vain thoughts, he begetteth them on purpose to draw it off from that sense, and exercises it in a variety of conceptions in a self-liberty of thinking and imaginings concerning persons and things.

When this subtle enemy of man's salvation seeth that he cannot make you bow to the glory of this world, that all his snares which he layeth in the things that are seen, which are temporal, are discovered and broken, and that your eyes are directed to those things that are eternal; then will he turn accuser; he will aggravate your sins and plead the impossibility of their remission: he will seem to act the advocate for the justice of God, that he might cast you into despondency, that you may doubt of deliverance and salvation. Many are the thoughts with which he perplexeth the sons and daughters of men; but this know, that he was a liar from the beginning. For the Lord doth not visit the souls of any to destroy them, but to save them.

For this end hath he sent his Son, a light into the world; and they that bring their deeds to it are not of the devil, who hateth the light. Neither doth the Lord cause people to hunger and thirst after him and not fill them with his good things. Be assured, my friends, wherever the Lord hath begotten desires after him, and wherever sin is become exceeding sinful, yea, a burden to the soul, the devil's kingdom is shaken, the prince of this world is begun to be judged, and God is at work for the redemption of that soul. Harken not to the voice of the serpent, for that lost your first parents their blessed paradise; and with the same subtle and lying spirit, he would hinder you from returning into paradise. Keep then in the righteous life of Jesus, and walk in his holy light, and you shall be preserved through all exercises and difficulties unto the eternal Canaan, the land of rest. Neither wonder at these things, that temptations assail you, or that the Lord trieth and proveth you; it is the way of all that are gone to God. For even Jesus was tempted and tried, and is therefore become our Captain, because he overcame. Neither be ye cast down, because the Lord sometimes seemeth to hide his face from you, that you feel not always that joy and refreshment which you sometimes enjoy.

I know what work the enemy maketh of these withdrawals of the Lord. Perhaps he will insinuate that God hath deserted you in his displeasure, that you must never expect to see him, that he will never come again; and by these and the like stratagems he will endeavor to shake your faith and hope, and distract you with fear, and to beget great jealousies and doubts in you, and by impatience and infidelity frustrate your good beginnings.

But though David said, of old, in the distress of his soul, "One day shall I fall by the hand of Saul," yet he overcame him and had the crown. Yea, the Lord Jesus himself cried

nt in the agony of the cross, "My God, my God, why hast thou forsaken me!" nevertheless he gloriously triumphed over all, and led captivity captive for the joy that was set before him, which joy is set before you, it is the mark of the prize of your great and holy calling.

Wherefore, faint not, neither murmur if our spiritual Moses seem to withdraw awhile from you. Do not make images in his absence, either wax wanton; but possess your souls in holy fear and patience, waiting with holy reverence and diligence for his appearance, who is your victorious Leader. Bear the hand of the Lord; whom he loveth he chasteneth; his anger lasteth not forever, but his mercy endureth forever.

For "The Friend."

#### Scientific Notes.

The "Building News," gives a description of a building in course of erection in London, by a Safe Deposit Company, for the safe keeping of papers, moneys and other valuable articles of small bulk. Such companies have met with much favor in this country, especially for the safe storing of coupon bonds and similar securities, and are rapidly increasing in number. The building above referred to, is said to be the first one constructed so as to be almost absolutely secure. The exterior walls are of extraordinary thickness and strength; and in the interior, but completely detached from every part of the external building, there is constructed an impregnable vault, 69 feet long by 32 feet wide and 36 feet high, divided into four chambers of four floors. The great vault is built on arches, so that the whole of the top, bottom and sides, may be constantly, day and night, under the view and inspection of the Company's watchmen. The walls are of immense strength, from 10 to 11 feet thick; and it is further protected by an impenetrable, burglar-proof armor-plating of  $4\frac{1}{2}$  inches. The doors are equal in strength to the strongest part of the vault, being ponderous masses of metal and fire-and-drill-proof cement, weighing about four tons each. The weakest parts of most doors are their joints and locks, and, therefore, the company decided to have neither joints nor locks.

In the recent visitation of Cholera at Berlin, up to the 23d of Tenth month, there had been 609 cases recorded, of which only 268 recovered, and 64 remained under treatment, while 677 ended fatally.

The monthly bulletin of the Paris Acclimatization Society states, that in Algeria experiments have shown that silk-worms fed on cherry leaves, produce a bright chrome-yellow silk; those fed on pear-leaves, a darker shade of the same color, while those fed on apple-leaves, produce a nearly white silk, but coarser than that from worms fed on ordinary mulberry-leaves.

James Lick, of San Francisco, has offered to endow an observatory, to be established at some point on the Sierra Nevada Mountains, about 10,000 feet above the level of the sea.

The manufacturers of German silver, have presented a petition against the introduction of a Nickel coinage into the German empire, on account of the scarcity of the metal. The annual production is small, perhaps not more than 1200 or 1500 tons, and English industries use more than the half of this. German silver is simply brass, to which has been added from one-sixth to one-third of nickel, which gives

it a look like silver, and renders it less liable to be acted on by various chemical agents. Owing to the increasing demand for nickel the price has advanced to three or four times its former value, within a comparatively short time. Nickel was discovered in the middle of last century by Cronstedt, in the copper ore of Saxony, to which the miners gave the name of Kupper-nickel, or false copper, because though they found it in the copper veins, they could extract no copper from it. For many years it was looked upon as useless, and thrown on the waste heap.

Among the papers presented to the English Parliament relating to the South Sea Islanders, is a report by Capt. C. H. Simpson, of the ship *Blanche*, giving an account of his visit last year, to the Solomon and other groups of islands in the Pacific Ocean. While at Isabel Island, he went with a party of officers a short distance inland, to visit one of the remarkable tree villages, peculiar, he believes, to this island. He found a village built on the summit of a rocky mountain rising almost perpendicular to a height of 800 feet. The party ascended by a native path from the interior, and found the extreme summit a mass of enormous rocks standing up like a castle, among which grow the gigantic trees, in the branches of which the houses of the natives are built. The stems of these trees rise perfectly straight and smooth, without a branch, to a height varying from 50 to 150 feet. In the one Captain Simpson visited, the house was 80 feet from the ground; one close to it was about 120 feet. The only means of approach to these houses, is by a ladder, made of a creeper, suspended from a post within the house, and which, of course, can be hauled up at will. The houses are most ingeniously built, and are very firm and strong. Each house will contain from ten to twelve natives, and an ample store of stones is kept, which they throw both with slings and with the hand with great force and precision. At the foot of each of these trees, is another hut, in which the family usually reside, the tree-house being only resorted to at night, and during times of expected danger. In fact, however, they are never safe from surprise, notwithstanding all their precautions, as the great object in life among the people, is to get each other's heads. Captain Simpson, in returning, visited a chief's house on the beach, and found a row of twenty-five human heads, captured in a recent raid, fastened up across the front, like vermin at a barn door.

The attention of the health authorities in England, has been called to the relation between the price of coal, and the rate of mortality. Dr. Whitmore, the Medical Officer of Health for Marylebone, in a late monthly report says: "I think there can be no reasonable doubt, that if the coming winter should be a severe one, the death rate from bronchitis, inflammation of the lungs, &c., will be unusually high. I have lately made it my business, to visit the abodes of some of the poorest and most destitute classes in the parish; in many of the rooms, there was not a vestige of fire in the grate, whilst in others only a few cinders, which had been purchased at the wharves, and which it was hardly possible to keep in a state of ignition; as for any comforting amount of heat being obtained from such a fire, that was utterly impossible. There cannot be two opinions as to the effi-

ciacy of bodily warmth, in resisting a class of diseases which, unfortunately, are but little thought of, and which, as a rule, are ten times more destructive of life than the most fatal epidemics. I therefore venture to recommend, as constituting the most urgent sanitary requirements of the poor for the present time, coals, blankets and food."

For "The Friend."

#### "Come, Reader, Harken to Me Awhile."

The following, being the preface to William Penn's "No Cross, No Crown," has long impressed the mind of the writer as having peculiar force and unction for such "strangers and pilgrims" as we are or should be in a world that lieth in wickedness, having precious, immortal souls—and for which the Saviour bled and died—to be saved or lost. Oh! that we would be awakened to a sense of what is at stake, and of the price paid for us, that so with the proffered help of the Lord's Holy Spirit of life and power, we might make an unreserved, whole-hearted surrender to Him; bow to His yoke, who teaches meekness and lowliness; and, living in His fear, bring forth fruits meet for repentance. We cannot fail to see, that one by one our companions on this transient scene, whether prepared or unprepared, are called to their final account. So likewise soon the record must be of us, "The places that have known them, shall know them no more." A few years at the most, must terminate a life given to us for the greatest, noblest purpose; and then death, the king of terrors, judgment, awful and final, and an endless and untried eternity! May we be aroused,—may the Lord, the faithful and swift witness, arouse us from the lethargy, the lukewarmness, the supineness in which we may have sunk, and putting on for a helmet the hope of salvation, flee for refuge to the hope set before us, even to use all diligence to make our calling and election sure before we go hence to be seen of men no more. May we read, solemnly ponder, and then make straight steps for our feet unto that city where all tears shall be wiped from all faces; that city, where rest, and joy, and peace forever reign; that city which the glory of God doth lighten, and the Lamb is the light thereof.

"Reader,—The great business of man's life is to answer the end for which he lives; and that is to glorify God, and save his own soul. This is the decree of heaven, as old as the world. But so it is, that man mindeth nothing less, than what he should most mind; and despiseth to inquire into his own being, its original duty and end; choosing rather to dedicate his days, the steps he should make to blessedness, to gratify the pride, avarice and luxury of his heart; as if he had been born for himself, or rather given himself being, and so not subject to the reckoning and judgment of a superior power. To this lamentable pass hath poor man brought himself, by his disobedience to the law of God in his heart, by doing that which he knows he should not do, and leaving undone what he knows he should do. So long as this disease continueth upon man, he will make God his enemy, and himself incapable of the life and salvation, which he hath manifested by his Son, Jesus Christ, to the world.

If, reader, thou art such an one, my counsel to thee is, to retire into thyself, and take a view of the condition of thy soul; for Christ hath given thee light, with which to do it,

Search carefully and thoroughly; thy life hangs upon it; thy soul is at stake. 'Tis but once to be done; if thou abusest thyself in it, the loss is irreparable; the world is not price enough to ransom thee. Wilt thou then, for such a world, overstay the time of thy salvation, and lose thy soul? Thou hast to do, I grant thee, with great patience; but that also must have an end; therefore provoke not God to reject thee. Dost thou know what it is to be rejected? 'Tis Tophet, 'tis hell, the eternal anguish of the damned. Oh! reader, as one knowing the terrors of the Lord, I persuade thee to be serious, diligent and fervent about thy own salvation! As one knowing the comfort, peace, joy and pleasure of the ways of righteousness, I exhort and invite thee to embrace the reproofs and convictions of Christ's light and spirit in thine own conscience, and bear the judgment of thy sin. The fire burns but the stubble; the wind blows only the chaff. Yield thy body, soul and spirit to Him who maketh all things new; new heavens and new earth, new love, new joy, new peace, new works, a new life and conversation. Men are grown corrupt and drossy by sin, and they must be saved through fire, which purgeth it away; therefore, the word of God is compared to a fire, and the day of salvation to an oven; and Christ himself to a refiner of gold, and a purifier of silver.

Come, reader, hearken to me awhile; I seek thy salvation; that is my design. A refiner is come near thee, his grace hath appeared to thee. It shows thee the world's lusts, and teacheth thee to deny them. Receive his heaven, and it will change thee; his medicine and it will cure thee; he is as infallible as free; without money, and with certainty. A touch of his garment did it of old; and will do it still: his virtue is the same, it cannot be exhausted; for in him the fulness dwells; Blessed be God for his sufficiency. He laid help upon him, that he might be mighty to save all that come to God through him: do thou so, and he will change thee; yes, change thy vile body, like unto his glorious body. He is the great philosopher indeed, the wisdom of God, that turns lead into gold, vile things into things precious; for he maketh saints of sinners, and almost gods of men. What then must we do, to be witnesses of his power and love? This is the crown: but where is the cross? Where is the bitter cup and bloody baptism? Come, reader, be like him. For this transcendent joy, lift up thy head above the world; then thy salvation will draw nigh indeed.

Christ's cross is Christ's way to Christ's crown. This is the subject of the following discourse;\* first written during my confinement in the tower of London, in the year 1668, now reprinted with great enlargement of matter and testimonies; that thou mayest be won to Christ; or if won already, brought nearer to him. It is a path, which God in his everlasting kindness guided my feet into, in the flower of my youth, when about two and twenty years of age. He took me by the hand, and led me out of the pleasures, vanities and hopes of the world. I have tasted of Christ's judgments, and of his mercies, and of the world's frowns and reproaches: I rejoice in my experience, and dedicate it to thy service in Christ. It is a debt I have long owed,

\* Please read the whole of the treatise.

and has been long expected. I have now paid it and delivered my soul. To my country, and to the world of Christians I leave it. May God, if he please, make it effectual to them all, and turn their hearts from that envy, hatred and bitterness, they have one against another, about worldly things; sacrificing humanity and charity to ambition and covetousness, for which they fill the earth with trouble and oppression. That receiving the Spirit of Christ into their hearts, the fruits of which are love, peace, joy, temperance and patience, brotherly kindness and charity, they may in body, soul and spirit make a triple league against the world, the flesh and the devil, the only common enemies of mankind; and having conquered them through a life of self-denial, by the power of the cross of Jesus, they may at last attain to the eternal rest and kingdom of God.

So desireth, so prayeth,  
Thy fervent Christian friend,  
WILLIAM PENN."

*A Farmer's Ice House.*—"Who would not have an ice house?" says a correspondent of the *Country Gentleman*, "It has been fully proved in this locality that, with good drainage and protection from currents of air at the sides, with free ventilation at the top, ice may be kept throughout the year at little cost.

"My ice house is a circular hole in the ground eleven feet in diameter and twelve feet deep, dry walled with brick the same as a well; the bottom is sandy and has a foot in depth of fine charcoal for the ice to rest on; charcoal is a most desirable substance for this purpose, as it lets the water through easily, is indestructible, and a good non-conductor of heat. The ice is thrown in without packing and sawdust put on the top at once, and as the ice recedes from the brick the dust is pushed down at the sides till the ice is completely enveloped in it, and we have no difficulty in keeping it from one season to another, and two large families use it without stint. The house is almost roofless. This is a cheap, durable house, and has the merit of being easily filled, and requires no scaffolding or extra men to help unload, as those do that are built entirely above the ground.

"A neighbor constructed last fall an ice house which is a novelty of its kind and a remarkable success. It is a crib ten feet by ten and a half inside and eight feet high, and set directly on the surface of the ground; the posts are made of slabs and the sides are of the same, nailed on horizontally two or three inches apart. Cost of lumber \$4; nails, 50c.; labor done by a farm hand. Five three-horse loads of ice filled it. In filling, one foot of sawdust was put in, then a layer of ice one foot from the sides, the edges packed and the middle broken up a little, and as each layer was put in, sawdust was filled in between ice and boards, and so on till the crib was filled. The top was finished rounding, and covered with a foot of sawdust, and pine boughs on that, to keep the wind from blowing it away, and has had no roof of any kind. The first of this month there was still sixteen inches of ice left.

"In the middle of one end, about one foot from the boards, is a dumb waiter case fifteen inches square and ten feet high, inside of which is a dumb waiter two and a half feet long, fitted up with shelves for meat, butter, &c., and it has answered a good purpose."

It has long been my belief, that the present declension from the ancient principles and testimonies of the Society of Friends, in great measure originated from a defect in the primitive doctrine that all are enlightened by a measure of light, which would become the *Light of Life* in all, if fully believed in and adhered unto, agreeably to the testimony of the apostle John: "That was the true Light that lighteth every man that cometh into the world." Some years ago, the writer was questioned by one who stood in the station of elder on his belief on this point, saying at the same time, that Barclay was quite wrong in asserting that, "A measure of the Spirit was given to every man to profit withal," for that was addressed to "believers, and believers only." Thus the goodly root (as W. Penn says) from which all our principles are derived, is denied and consequently the first covenant remains with a necessity of all this teaching, and what is termed Christian work; therefore, so many run to outwardly ordained ministers, or nances,—nay, to Rome, where it is asserted they confer grace; although at the present the youth are more attracted by emotion and sensational preaching, which is conducive to excite the mind and rouse the imagination.

That eminent minister of Christ, W. E. Mundson, relates the following, which took place at Hartford, N. E. "A preacher among the Baptists, took up the argument against truth, charging Friends with holding a great error, which was, that every man had a measure of the Spirit; and would know if I held the same error. I told him that was no error for the Scriptures witnessed to it plentifully. He said, that he denied that the world had received a measure of the Spirit, but believed had received it. I told him that the apostle said, a manifestation of the Spirit is given to every one to profit withal. He said, that was meant to every one of the believers. I told him, Christ had enlightened every one that came into the world with the light of His Spirit. He said, that was every one of the believers that came into the world. And as he brought him Scriptures, he still applied them to the believers, saying, that was the ground of our error, in applying that to every man which properly belonged to believers. Then the Lord, by his good Spirit, brought to my mind the promise of our Saviour, when I told his disciples of his going away, that I would send the Comforter, the Spirit of Truth, that should convince the world of sin, and should guide his disciples into all truth. Then the same Spirit of Truth, that leads the believers into all truth, convinces the world of sin. So thou must grant, that all have received it, or else show from the Scripture, a select number of believers; and besides that a world of believers who have the Spirit, and another world of unbelievers, that have no measure of the Spirit to convince them of sin. Here the Lord's testimony came over him, that he was stopped, and many sober professors who staid to see the end, acquiesced therewith, and said, indeed Mr. Rogers, that man is in the right; for you must find a select number of believers, besides a world that have no measure of the Spirit that convinces them of sin, and a world that hath not the Spirit, and not convinced of sin; this you must do, grant the argument. He was silent, and the people generally satisfied in that matter, the *understanding being opened*; so they took the

have of me very lovingly, it being late in the night." It is certainly very mournful to see the youth of the Society, so generally departing from the faith, and following the vain fashions which our predecessors were turned from, yet, I trust, there will still remain those who are willing to take up the cross and to despise the shame; for these are the only fruits of discipleship, and not allow the cares of the world, the deceitfulness of riches and the love of other things, to choke the seed sown in their hearts, but so minister thereto, that it may grow and bring forth good fruit, meet for Him who is the dispenser thereof.

S. C.

Millville, N. Y., 12th mo. 21st, 1873.

**Habits of Black Bass.**—A writer in the *German Town Telegraph*, communicates some interesting facts in regard to the breeding habits of the black bass, as observed by him in the Delaware river, and elsewhere. He remarks that as the time for spawning draws near the male and female fish come together in pairs, each pair having a separate spawning ground. A gravel bottom is usually selected, which is cleared from sticks and stones, which is cleared for a space of about two feet in diameter, readily recognized by its clear and regular appearance. When the eggs are deposited and impregnated by the male, both watch with great assiduity over the bed, driving off every intruder. When the eggs are hatched, the entire family moves away, the parents attending upon their young until able to take care of themselves, when they drop away one by one. The writer remarks that he has seen a bass an inch and a half long with a fish three-fourths of an inch long in its mouth. Their growth is very rapid, being as much as from two to four inches in a month. The author, having watched some in a stream recently stocked with them, was able to appreciate their increase in size from week to week. They reached the length of from five to six inches by autumn.—*Harper's Magazine*.

I humbly crave that we, parents and leading persons in families and meetings, faithful ministers and elders, may be inward with the Lord and join in deep supplication to Him, that He may be pleased, in his inexpressible loving kindness, to remember the youth of our time, grant them a gracious visitation, lay His hand upon them, as by the shepherd's crook, and his blessed truth and power, circumscribe their hearts to serve him; and also, that he would be pleased in his tender mercy, to reach to all poor wandering prodigals, wheresoever they are scattered, and bring again the lost sheep to the fold of rest.—*D. Hall*.

Although I lived four or five miles from our meeting, yet, whatever I neglected, I attended that, if at home, on Fourth-days as well as First-days. God knew what inclined me so to do, it was my love to Him and his Truth, which was more to me than anything in this world.—*John Croker*.

For "The Friend."

### Teach Your Children the Fear of the Lord.

In these days of much "outward work," which sometimes seems in danger of being substituted for the true and only effectual work of religion upon the heart, there may be an objection felt by some, to the use of texts which

we not unfrequently see hanging in the sitting and bed-rooms of our members, under the impression that by being constantly seen, they lose all effect, and come to be no more regarded than a common ornament or picture. But to the writer, it seems so important that the minds of children should be deeply impressed with the thought that they are *always* in the presence of the Lord, and as visible objects are often the means of awakening thought, this text, "The eyes of The Lord are in every place," placed in the room they most constantly occupy, in position where it will frequently be seen, may prove a most valuable aid; particularly if suitably commented on and referred to by the parents. And for those of us who are older, prone as we are to be unwatchful, might it not often operate as a useful check, to be thus by a glance reminded that at that very moment, the All-seeing eye is taking cognizance of our every action, word and inmost thought? Nothing can be hidden from Him, and shall we not then use every means, early to teach our children the necessity of watchfulness, as every "secret thing shall be brought into judgment, whether it be good or evil."

New York, 12th mo. 22d, 1873.

## THE FRIEND.

FIRST MONTH 10, 1874.

We have no doubt that the writer of the article, headed, "Teach your Children the Fear of the Lord," is sincerely desirous to promote the best interest of children, but we think the method proposed is not the right one. It is substituting and teaching to depend on outside means, instead of close attention to the still, small voice of Divine Grace in the secret of the heart. The reason given for having the particular text of Scripture designated, displayed in the manner mentioned, is similar to that used by the papist or high-churchman, for having an image, or a picture of Christ on the cross, viz., that he may be reminded, when looking at it, of the sufferings of his Saviour for his sake.

We have given the article a place in our columns to afford an opportunity for offering a few remarks on what we have observed for a few years past, to be a growing practice among some Friends; this, of having texts of Scripture hung upon the walls of some of the rooms in their houses; sometimes in gilt letters and highly ornamented frames, evidently intended as substitutes for pictures, and sometimes in plainer forms. Whether as ornaments or not, we think the practice decidedly objectionable; and that so far from their producing or continuing such impressions, as the texts usually chosen ought to, and perhaps would make, if presented to the minds of children or others, under proper circumstances, it is rather calculated to create indifference to the truths the texts contain, if not contempt, from the display made of them.

If we are really desirous to have the minds of the children, and other members of our families, imbued with a love for our Heavenly Father, with a right sense of accountability, and a proper estimate of the obligations and blessings of the religion which Christ instituted for his followers, let the children be early trained to listen for, and to

obey, the still, small voice of the Holy Spirit, speaking to their souls. As this comes to be experienced, the consciousness of being under the immediate notice of the Omniscient One will be ever present, and He will manifest himself to be not only a Reprover and good Remembrancer, but also a holy Teacher, that cannot be removed into a corner; in every circumstance of life, saying, this is the way, walk thou in it.

Above all things else should it be our concern, and it is indispensable for parents who are really desirous their children should be brought up in the nurture and admonition of the Lord,—to give unmistakable evidence in our own lives and conversation, that what we teach by precept, we know practically ourselves; that it is our daily and hourly endeavor to be found waiting on the unfoldings of the Spirit of Truth to our own souls, and to conform thereto by humbly taking up the cross, and denying the promptings of our own will and carnal inclinations, and thus to wage constant war against the god of this world, and his potent auxiliaries, the lust of the eye, the lust of the flesh and the pride of life.

As this living up to the profession which Friends make, comes to be more fully known, the Holy Scriptures will be more truly valued, and more carefully kept in their proper place, so as to make wise unto salvation, through faith in Jesus Christ; and we will see less and less resort to outside and unavailing substitutes.

As the Jews formerly, as they fell away from, or overlooked the Spirit that gave life and virtue to the Law and the Prophets, made broad their phylacteries, on which were written words of the law, and bound them on their foreheads, that they might appear to men to set great store by the letter, so it is among professing Christians in the present day. In proportion as they depart, or have departed, from the life and power of Christ's religion, they make more display of emblems, rites and outside appearances of reverence for the Holy Scriptures, and the truths they contain; and we fear, this display of texts on our walls must be classed with other evidences of the wide departure there is among Friends from conformity to the simplicity and spirituality of their profession.

### SUMMARY OF EVENTS.

**FOREIGN.**—The Spanish Cortes met in Madrid on the 2d inst., and President Castelar read his message, reviewing the course of events during the adjournment. He said: "The government had acted promptly and energetically against disturbances and conspiracies of all kinds, and order has been maintained every where except in the north, where the Carlists still maintained their attitude of rebellion, and at Cartagena, where, unfortunately, a criminal insurrection had possessed itself of one of the strongest places in Spain, and, with it, the best arsenals and most formidable iron clads and impregnable fortresses. Want of troops and resources delay their recapture, which, however, is certain in the end." He congratulated the Cortes that the condition of affairs is greatly improved, riotous outbreaks are ceasing; the municipal authorities no longer seek to exercise dictatorship, and popular risings, &c., have been annihilated by universal suffrage. He appealed to the Cortes to do their duty, and receive the verdict of history as the conservative founders of the Spanish Republic.

On the following day the members of the Cortes decided against Castelar by a vote of 120 to 100, and as soon as the result was announced, General Pavia sent an officer to the Chamber with a letter demanding the dissolution of that body. Some of the deputies urged Castelar to continue in power, but he declined doing so, whereupon a company of the Municipal Guard entered

and expelled the Deputies. General Pavia, with his staff, held a position outside, with cannon pointed at the building, and having at his command a force of 14,000 troops. Pavia then dissolved the Cortes and summoned the most eminent men of all parties, including members of the present government, only excepting Carlists and friends of the Insurgents, to form a new Ministry. A Madrid dispatch of the 4th states that a Ministry has been formed with Serrano at its head as President and commander-in-chief.

On the 5th a decree was promulgated suspending the constitutional guarantees, and putting in force throughout Spain the laws of 1870, for the maintenance of public order.

It was Serrano's wish that Castelar should be a member of the new Ministry, but the latter refused to again accept office. Castelar, in a letter addressed to the country, says he must protest with all his energy against the recent brutal *coup d'etat*. He concludes, "My conscience will not permit me to associate with demagogues, and conscience and honor refuse to accept the situation created by bayonets."

Disturbances have arisen in Saragossa and a few other places, but in general the revolution appears to be acquiesced in by the Spaniards.

The treaty between Russia and Bokhara is published. It gives the Khivan territory on the right bank of the Amor Daria to Bokhara, which in return agrees to abolish slavery and establish mutual trading facilities with Russia.

Famine prevails in five districts of the Russian province of Samana, on the left bank of the Volga.

A St. Petersburg dispatch says, the article in the treaty between Russia and Bokhara abolishing slavery, is directly due to the exertions of the members of the American legation at St. Petersburg.

A legal investigation in London of the causes of the collision between the Ville du Havre and the Loch Earn, resulted in the unanimous decision of the court, that Captain Robertson, of the Loch Earn, was blameless.

A Penang dispatch of 12th mo. 30th says: There has been another engagement in Acheen between the Dutch troops and a large force of the Acheenese, in which the latter were defeated, with heavy losses in killed and wounded.

Rumbling sounds from Mount Vesuvius have been heard in Naples within the past few days, and an eruption of the volcano is believed to be imminent.

Advices from Cape Coast Castle report that Sir Garnet Wolseley has advanced into the interior, and that the Ashantees fled before him. They were driven across the river Piah, re-entering their own country in great disorder. They left a large number of dead and wounded on the bank of the river, and many more were drowned in the crossing.

The steamship Elbe, on her passage from London to Hamburg, was lost at sea, and thirty-two of the persons on board perished.

London, 1st mo. 5th.—Consols 92. The rate of discount in the open market for three months bills is  $3\frac{3}{4}$  per cent., or  $\frac{3}{4}$  below the Bank of England rate.

Liverpool.—Uplands cotton *8d.*; Orleans, *8\frac{1}{2}d.*

Havana dispatches say: The home government has granted without restriction, the extraordinary powers demanded by the Captain General. The Conservative party here is highly delighted with the change of government at Madrid.

UNITED STATES.—The interments in Philadelphia last week numbered 310, including 44 deaths of consumption, and 30 inflammation of the lungs. The mean temperature of the 12th mo., by the Penna. Hospital record, was 38.37 degrees, the highest during the month 67.50, and the lowest 19.50 deg. The amount of rain 1.75 inches. The average of the mean temperature of the 12th mo. for the past 84 years, is stated to be 32.62 deg., the highest mean in that entire period was in 1848, 45 deg., and the lowest in 1832, 25 deg.

The total rain fall of 1873 was 58.22 inches, which is much above the average.

Interments in New York city last week 518.

The public debt statement of the 1st inst. shows an increase during the Twelfth month of \$8,453,272. The currency balance was \$4,277,851, and the coin balance \$91,479,109.

The steamer Virginus, which was surrendered by the Cuban authorities, left the Tortugas the 19th ult., in tow of the Ossipee. Rough weather was met with, and it was found the Virginus leaked badly. On the 26th she sunk in eight fathoms water on the shoals about ten miles south of Cape Fear light. No lives were lost, all on board being safely transferred to the Ossipee.

The agents of the French Steamship Company in New York have received a dispatch from Paris an-

nouncing that the French Admiralty Court has pronounced judgment exonerating the Ville du Havre, and holding that the Loch Earn was the cause of the disaster.

The total number of hogs packed at Chicago between 11th mo. 18th and 12th mo. 31st last, was 1,060,668, against 695,500 for the same time last year.

The Railway Monitor gives the total mileage of all the railroads in the United States, at the close of 1872, as 67,374. During the past year the mileage added was 4,190, making the present aggregate 71,564 miles. Illinois remains the leading railroad State, with a mileage of 6,479. Pennsylvania stands next with 5,845 miles of road. The total cost of railroads and equipments is stated to be \$3,728,416,958.

The trade of Charleston, S. C., is steadily on the increase. In 1865, the exports of cotton from that port were only 39,882 bales. In 1873 they had reached 208,671 bales.

A freight car containing over two million dollars worth of silk-worms eggs, on their way from Yokohama, Japan, to Milan, Italy, arrived recently at the Hudson River Depot, in New York. The eggs were in 329 cases, weighing altogether nearly nine tons.

Congress re-assembled in Washington on the 5th inst. The Senate entered upon a discussion regarding the amendment or repeal of the Bankrupt law, and the proposed repeal of the law increasing salaries. In the House the consideration of the supplemental civil rights bill was resumed. It was opposed by Stephens, of Georgia, Harris, of Virginia, and others, who contended that Congress had no power to enact such a law, and that all such legislation should be left for the States.

The Markets, &c.—The following were the quotations on the 5th inst. *New York*.—American gold, 111 $\frac{1}{2}$ . U. S. sixes, 1881, reg. 116 $\frac{1}{2}$ ; coupons, 117; ditto, 1868, 116; ditto, 10-40 5 per cents, 112 $\frac{1}{2}$ . Superfine flour, \$5.85 a \$6.30; State extra, \$6.70 a \$7; finer brands, \$7.50 a \$10.50. No. 1 Chicago spring wheat, \$1.62; No. 2 do., \$1.59; No. 3 do., \$1.57; red State, \$1.68. New western oats, 63 a 64 cts. Western mixed corn, 84 cts.; new, 78 a 85 cts. State barley, \$1.60. *Philadelphia*.—Middlings cotton, 16 $\frac{1}{2}$  a 17 $\frac{1}{2}$  cts. for uplands and New Orleans. Cuba sugar, 7 $\frac{3}{4}$  a 8 cts. Extra flour, \$6 a \$6.50; finer brands, \$7 a \$10. White wheat, \$1.75 a \$1.85; amber, \$1.72 a \$1.75. Rye, 90 a 93 cts. Old yellow corn, 84 a 85 cts.; new, 72 a 78 cts. Oats, 57 a 59 $\frac{1}{2}$  cts. About 3000 beef cattle arrived at the Avenue Drive-yard. Common sold at 3 $\frac{1}{2}$  a 5 cts. per lb. gross; fair to good, 5 $\frac{1}{2}$  a 7 cts.; extra, 7 $\frac{1}{2}$  a 8 cts. Sales of 11,000 sheep at 4 a 7 cts. per lb. gross, and 7000 hogs at \$8 a \$8.50 per 100 lb. net. *Chicago*.—Spring extra flour, \$5.75 a \$6. No. 1 spring wheat \$1.25; No. 2 do., \$1.22; No. 3 do., \$1.16. No. 2 mixed corn, 54 $\frac{1}{2}$  cts. No. 2 oats, 39 cts. No. 2 rye, 77 cts. No. 2 fall barley, \$1.42 a \$1.45. Lard, \$8.60 per 100 lbs. *St. Louis*.—No. 2 spring wheat, \$1.22; No. 3 fall, \$1.44. No. 2 mixed corn, 51 $\frac{1}{2}$  cts. Oats, 42 a 42 $\frac{1}{2}$  cts.

#### FRIENDS' LIBRARY.

For the convenience of those who attend Arch Street Meeting, the Library will be open hereafter on Fifth-day mornings, from half past 9 to 10 o'clock.

#### THE INDIAN AID ASSOCIATION.

The Executive Committee of Philadelphia Friends having accepted charge of the schools for the Wyandotte, Wichita, Kiowa and Comanche Indians, request the contributions of Friends in order to supply some pressing needs.

It has been found necessary to collect the children in Boarding Schools, and various articles (of clothing, furniture, &c., are wanted to insure their comfort and proper care. Some money can also be judiciously expended in school supplies, in addition to those provided by the Government.

This is a critical time in Indian affairs, and help now will be extremely valuable.

Contributions may be sent to JOHN S. STOKES, at this office.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to act as assistant matron.

Application may be made to  
Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philada.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philada.

#### ERRATUM.

In "Memoirs and Letters of Sarah Hillman," on page 154, 3rd col., and 6th line from top, for *Lord* read *lo*.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends will may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cincinnati Post-office

Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia  
Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, 6th mo. 2d, 1873, in the eightieth year of his age, ISAAC CARR, an esteemed member of Upp Springfield Monthly Meeting, Ohio. He bore a long and suffering illness with much patience, leaving his friends a hope that his end was peace.

—, at his residence, Chester Co., Pa., on the 6th 9th mo. 1873, JOSEPH CHAMBERS, a beloved member and elder of Newgarden Monthly and Particular Meeting, in the 91st year of his age. He retained his mental faculties until near the close of his earthly pilgrimage; and was a worthy example of integrity and uprightness through the course of a long life, and was diligent attender of all our religious meetings, unprevented by weakness and the infirmities of age. He evinced by the peacefulness of his spirit, and the calm serenity of his countenance, that his mind was stay in humble dependence upon Divine support; saying was waiting to be released. "The memory of the just is blessed."

—, on the 29th of the 12th month, 1873, at his residence in Germantown, Pa., I. WISTAR EVANS, son of the late Thomas Evans, of Philadelphia, in his thirty-eighth year of his age, a member of Germantown Particular and Frankford Monthly Meeting. This dear young Friend, who was greatly beloved by his family and relatives, had, by his sweet disposition, an engaging manners, strongly attached to himself a large circle of friends. With good intellectual abilities, a warm interest in the welfare of others, he had willingly and usefully devoted time and energy to promote several of the benevolent objects, that for a number of years past, have engaged the attention of members of our religious Society, and gave reason to hope he would become still more earnestly engaged to maintain its doctrines and testimonies. He was impressed, in an early stage of his disease, that it would prove to be his last sickness, and when, in reviewing his past life, the good Remembrancer set his sins in order before him, deep was the agony of spirit he endured, under the conviction that he had not kept in the strait and narrow path of self-denial, and that though he now saw how he had departed from it, he had not the power, of himself, to repent therefor. Strong were his convictions of the guilt of sin, and earnest his wrestlings and petitions for mercy and to be delivered therefrom. And, as he signed himself unreservedly into the Lord's hand, and bore the ministration of condemnation, the compassionate Saviour was pleased to awaken in his soul the godly sorrow which worketh repentance unto salvation, and, in his own time, to grant him an evidence, that his mercy's sake, He had washed away his sins in his own blood; so that, in humility he was enabled to say, "The end, whether life or death, will be peace;" "The Lord is my Shepherd, I shall not want."

—, on the 31st of the 12th month, 1873, aged eighty-four years, ELIZABETH HUTCHINSON, a beloved member and elder of the Monthly Meeting of Friends of Philadelphia. This dear Friend having early submitted to the transforming power of Divine Grace, came clothed with the ornament of a meek and quiet spirit; and by her consistent walk adorned the doctrine she professed, being a preacher of righteousness in life and conversation. Soon after her last sickness began, she told her sister there was nothing in her way. On one occasion, in the early morning, she said, "Let me go, the day breaketh," and not long before the peaceful close, she remarked, "I am nearing the port." "Precious in the sight of the Lord is the death of his saint"

## Theatrical Amusements and Horse-racing.

At a meeting of the Representatives of the Religious Society of Friends in Pennsylvania, New Jersey and Delaware, held in Philadelphia the 19th day of the Twelfth month, 1873: A Committee to whom was referred the consideration of the concern in reference to the corrupting influence of Theatrical Exhibitions, and the demoralizing effects produced by Horse-racing, both in regular Race Courses and at Agricultural Fairs, produced the following Address, which, being read and deliberately considered, was united with and adopted.

Extracted from the minutes.

JOSEPH SCATTERGOOD, *Clerk.*

ADDRESS.

Under an affecting sense of the responsibility attached to the members of a community that professes to be believers in the self-same religion of Jesus Christ, the Saviour of the world, and impressed with the grievous caricatures from the sobriety and pure morality which that religion enjoins, we feel ourselves grieved on, as those who must give account, to address our fellow citizens, and invoke their attention to the sad evidences of iniquity that abound in our midst, and to call them to a serious consideration of its consequences.

It is a declaration of Holy Scripture, that righteousness exalteth a nation, but sin is a reproach to any people."—Prov. xiv. chap. 34. And we feel that whatever tends to lower the Gospel standard of virtue, is detrimental to the best interests of the community. In this connection we have been led to consider the influence exerted by two of the most popular modes of public amusement—theatrical exhibitions and horse-racing.

While arguments have been advanced in behalf of the drama as a means of instruction as well as entertainment, we are painfully impressed with the belief that, whatever may be its supposed capabilities in this direction, the practical effect of theatrical exhibitions is no wise to improve the morals, or elevate the taste of those who witness them. It is needful to observe the character and tenor of many of the more popular plays, in order to be convinced that at best they give false views of life, and that, if they do not

commend, they at least palliate various forms of vice and immorality. Are mauliness and courage to be illustrated? how often is the hero but a daring highwayman or a notorious outlaw. Are more tender impulses to be depicted? how frequently is the libertine or the woman of loose morals personated upon the stage—not for reprobation, nor yet simply to add a higher coloring to the wild romance which is so fascinating—but because they pander, however covertly, to some of the grossest propensities of our nature. Should a serious character be occasionally introduced, is there not contempt at once thrown upon serious things, which often too successfully fixes the impression that religion at best is mere pretence, and that religious people as a rule are but hypocrites.

In evidence of the correctness of these impressions, the reports and comments of many of our daily prints give ample testimony; while we need but mark the placards at our street corners, with which all are familiar, in order to be satisfied as to the character of the entertainment to which in glowing colors they invite the public. That the spectacles thus advertised find a ready response among a class whose lives are given up to dissipation in its worst forms, we need but to state that there are probably few theatres to which abandoned women do not freely resort, and that many of the actors themselves are believed to be of licentious habits.

To introduce young persons of innocent life and fair reputation to such associations as these, cannot but be very injurious. Yet how often have we to witness with sorrow, the crowds of mere boys and girls who throng the doors of the play-house by night and by day, eager for admittance. Can they return from such a school without receiving some lesson which may prove their first step to ruin, or confirming tastes and habits that have already become vitiated?

The testimony of many a convict has been, that theatre-going made him first familiar with the doings of the thief or the murderer, and their shifts in evading justice. That the taste for such a life once contracted, he found his way readily to the drinking saloon with all its evil associations; and that thence his downward course was rapid and ruinous.

A number of writers, widely known for their abilities and varied knowledge, have given their emphatic testimony that the general tone of dramatic literature is demoralizing; that there is a strong tendency in the exhibitions on the stage to deaden the moral sensibilities; to create a disrelish for the solemn truths of religion; to minister to the low appetites of the depraved, and to betray the innocent into the paths of vice and misery.

In close connection with the evils attendant upon the theatre, opera and circus, are those growing out of the practice of horse-racing. So manifest have these been, that more than one legislative enactment has been passed

with a view to its prevention. But by boldly evading the spirit of the law, and upon various pretexts, it is to be feared, that this sport, if such it may be called, is again growing into favor. In its true character, it may be fairly designated as gambling on a large scale; the shuffling of cards and the throwing of dice, being exchanged for the uncertain and painful efforts of poor dumb animals, urged to their highest speed by whip and spur. Cruel and lebasing in itself, its usual attendants are intemperance and profanity. As in the theatre so on the race-course, the moral atmosphere is tainted; and under the contagious excitement, the comparatively innocent, lured on by gamblers and other profligate characters, often risk stake after stake until involved in harassing debt, and betrayed, it may be, into other violations of morality, they finally cover themselves with disgrace and ruin. To gratify the taste for this cruel pastime, agricultural societies have, of late, introduced trotting at their exhibitions, ostensibly for the purpose of improving the breed of horses; but even under their supervision, the temptation to wagering is too strong for prevention, and it may well be feared that, instead of promoting the original design of such fairs, they have thus become means of demoralizing a portion of our rural population.

In the early days of this Commonwealth, theatres and similar places of dissipation as well as horse-racing, were prohibited by law; but in process of time, at the solicitation of men of corrupt minds, and to secure an increase of revenue, the legislature was induced to grant the issuing of licenses for such exhibitions. As the natural consequence, a marked laxity in public morals followed this unwise measure. But it is declared in the Scriptures of Truth, "When the judgments of the Lord are in the earth, the inhabitants of the world will learn righteousness;" and during the awful scourge of our city by yellow fever in 1793, the people appeared to be greatly humbled under a sense of the necessity for reformation. Availing themselves of this favorable condition, a number of the leading ministers of various religious persuasions, put forth and signed a memorial to the legislature, asking for the passage of a law against vice and immorality; in which they represented, that in their apprehension, it was "peculiarly necessary to make some effectual provision \* \* \* for regulating and lessening the number of houses where intoxicating liquors are sold and used; for the suppression of all places of gaming and lewd resort, and for the enacting of a law to prevent theatrical exhibitions of every sort." To this memorial they appended "Some Considerations," to show the deleterious influence of theatrical exhibitions, in evidence of the necessity for their prohibition.

It is of the utmost importance to the well-being of civil society, that the minds of the young be imbued with the principles of piety and virtue; with the habit of listening to and

obeying the secret intimations of Divine Grace to their souls, and with a reverend regard for the sacred truths recorded in the Holy Scriptures, in order that they may enter upon the duties of life, prepared to resist the temptations to evil, and to act their part as becomes Christian men and women. Upon them and the course they take, must greatly depend the future weal or woe of our beloved country. How deplorable a calamity is it then, that such schools of licentiousness and folly as theatres, operas, race-courses, &c., are thrown open to them on all sides; that they are sanctioned and encouraged by not a few who claim to be reputable, and even by Christian professors; that they are countenanced and applauded by a large proportion of the public press, and stimulated to make use of every means in their power, by the brilliance of scenery, the charms of music, the address of performers, and the splendor of their whole establishments, to entice the young of both sexes within their contaminating precincts.

While, however, thus deploring the demoralizing effects of exhibitions which, under the plea of needful recreation, find place with many, we rejoice in the persuasion that there is a large, and we trust increasing number among our fellow-citizens, who need but to have their attention seriously turned towards the evils under consideration, in order to be convinced of their true character; and that by fostering them in our midst, the commendable efforts of devoted men and women, who are seeking to raise the general tone of society, by diffusing higher views of life and duty, are of necessity thwarted, or largely counteracted.

As a nation we have been singularly blessed and prospered, and it is to the benign influences of the Christian religion, in so far as they have been allowed to exert themselves, that much of this prosperity is to be justly attributed. Yet we would earnestly press the consideration, that it is not a mere profession of the name of Christ, that will promote his cause or the highest interest of mankind, but a conformity of the lives of men to His teachings. It is as His blessed government comes to be set up in their hearts, that they will be led to recognize the wide difference that ever has existed and ever must, between His kingdom and that of the god of this world; and that the Christian is clearly called to exemplify this important truth in his own daily walk.

For those who love our Lord Jesus Christ in sincerity, and long with us to see His kingdom and truth exalted in the earth, we tenderly desire that they, as well as ourselves, may be brought fully to appreciate the responsibility of giving even a silent or negative approval to any form of popular diversion, whereby that high standard which the religion of the New Testament has undoubtedly set up, shall appear to be in anywise lowered. We fear, that as professed Christians, too many of us are coming short of our duties; first—to the Lord, in not keeping our own souls pure, humble and faithful to Him, and secondly, in too easily persuading ourselves that we are free from responsibility for the actions of others. The true disciple rejoices to feel that, in the Divine sight, the souls of his fellow beings are precious as his own, and that the mercy of God in Christ Jesus reaches to all. Instead of being engrossed in his own gains and pleasures, his heart will go forth in good will to the whole family of man. He

dare not ask the question, "Am I my brother's keeper?" but a sense of duty will prompt him, under Divine direction, to raise the fallen, to gather the outcast, to shield the innocent and the unwary from temptation. Especially will he daily seek to live so near the blessed Master, that others may be thereby drawn to taste for themselves how good the Lord is, while he jealously watches lest any act of his shall put a "stumbling block or an occasion to fall in a brother's way." Sharing, as every true follower of Christ must do, in efforts and desires such as these, we feel that however else we may differ, we herein stand upon common ground; and that we need each others hearty support in endeavoring, by every right means, to stem a current which, it may well be feared, is steadily growing stronger, and is stealthily undermining what is pure and virtuous in the community.

For "The Friend."

#### Brotherly Kindness and Regard.

It is often a query in the mind of the writer, whether Friends of to-day are sufficiently open towards, and spiritually helpful one to another, in handing even a cup of cold water, if no more be given them, to comfort, to animate, and to strengthen a brother or a sister in the tribulated and conflicting journey of life! "Bear ye one another's burdens, and so fulfil the law of Christ," is as clear as well as a precious apostolic precept. And so is: "Look not every man on his own things, but every man also on the things of others." While from the same authority comes, "Be ye one another's helpers in the Lord." And dear John Barclay writes: "Ah! it is little we can do for one another; yet let us be willing to do that little which offers. I often think how short may be the season, wherein we may be permitted, or may have occasion for, the comfort, aid, and support, one of another. Many opportunities for giving a hand of help, or a cup of cold water, we do not embrace; but we suffer them to go by unimproved, or fritter them away in our intercourse one with another, even with those nearest and dearest to us in an outward or inward sense."

These reflections have been suggested from considerations not only of how the early Friends when imprisoned, persecuted, afflicted, tormented, endeavored in much regard and tenderness, to stir up the gift of God in each other unto the exercise of patience in the spoiling of their goods, and the varied endurance of "hardness" which they were called to; but likewise of some more recently passed away, who, not blind to, or ignorant—from being careless spectators—of the spiritual wounds and bruises and sorrows, and need of help, that some in this day have to endure, were engaged in the spirit of love and brotherly kindness to soothe the heart, and smooth the pathway of these by feelings of lively sympathy, no less than by the expression of affectionate interest and regard under the discouragements and varied trials of their day. The subjoined extracts from letters of our dear friend, Joseph Elkinton, who deceased 2d mo. 9th, 1868, very pleasantly exemplify this:—

"Earnestly, my dear friend, do I crave thy continued preservation in that path thy divine Master designs thou should walk in; and I may say also, that I believe thou wilt experience it; which is cause of rejoicing to me on thy account. Be faithful to all the manifes-

tations of the Divine Spirit made known thee as being required, and great will be thy peace. Reason not with flesh and blood who thou becomes satisfied a service is required of thee by thy Heavenly Father, but rather look to Him, who giveth power to the faint; and to those that have no might he increase strength; and I fully believe He will sustain thee in the accomplishment of all that I may be pleased to require at thy hands. Fully assuredly 'He is not an hard Master, reaping where he has not sown, and gathering where he has not strewn, as thou hast been enabled abundantly to testify at divers times in the course of thy pilgrimage. Go on then, my dear friend, in the path thou hast chosen; and that the God of Abraham, Isaac and Jacob continue to be pleased to go before thee, and also be thy rearward, is the sincere desire of thy friend affectionately,

JOSEPH ELKINTON."

"Thou mayest rest assured, my beloved friend, that aspirations for thy preservation are often felt by thy friend. That preservation will be experienced, I have no doubt, as thou continuest to desire above every other consideration that the will of thy Heavenly Father may be thoroughly and perfectly wrought out within thee. 'Fear none of those things which thou shalt suffer: behold, the devil shall cast some of you into prison, that ye may be tried; and ye shall have tribulation ten days: be thou faithful unto death, and I will give thee a crown of life.' This language is as true and reliable as it was the day it was uttered; may it be recurred to by thy friend, saith my spirit, when low and baptizing seasons may be thy portion. The Lord will have a tried people; but He will never forsake His people unless they first forsake Him. May it then be our primary concern to cleave close to Him in our closest trials and great besetments.

With feelings of affection, I remain thy friend,

JOSEPH ELKINTON."

"Thy consolatory communication of yesterday, came duly to hand this morning. As truly glad, I can assure thee, I have felt that thou took pen and paper to commune with one who often has thee in remembrance, and earnestly desires thy preservation in this time of treading down and trampling upon the testimonies that were given us as a society to maintain. While alluding to this subject, I feel disposed to rehearse the language made use of in a little pamphlet published to me the state of things in Ireland, a few copies of which have been received. It says in one place, 'Was there ever a period when it was more needful to recur to the good old way, the sound principles and christian practice of our fathers in the Truth. We cannot be so much awake to the devices of Satan, who are lulling men to rest, and leading them to think that a more relaxed support of our testimonies will now do. If these testimonies are of Divine origin, as they most assuredly are, it must be the Lord's will that they be firmly supported. Should lukewarmness over-spread the body, and they be allowed to fall, or the attempt be made to keep the form without Divine wisdom and strength, universal lifelessness must ensue, and the very existence of the Society be jeoparded.'

Ah! indeed, the days of mourning and anxiety for the preservation of our religious Society are not a few; and when I take

rospective view of the many that have been taken to their everlasting home, with whom I used to 'take sweet counsel, and talked unto the house of God in company,' you would not be surprised to be told that feelings of strippedness should at times be my experience. \* \* Truly can I say I love those at love the Lord; and do crave a continuance of thy sympathetic feeling.

From thy friend,

JOSEPH ELKINTON,

so often has thee in remembrance and desires thy preservation in 'that path which no eye knoweth, and which the vulture's eye hath not seen: the lion's whelp hath not addened it, nor the fierce lion passed by it.'

Farewell, my dear friend."

### Comets.

SHOOTING-STARS.—METEORS OF NOVEMBER 14.

(Continued from page 163.)

Since the memorable display of November 13, 1833, the phenomena of shooting stars have been observed and discussed with a very great interest. Among the first laborers in this department of research the names of Olmsted, Herriek, and Twining must ever hold a conspicuous place. The fact that the position of the radiant point did not change with the earth's rotation at once placed the true origin of the meteors wholly beyond question. The theory of a ring of nebulous matter revolving round the sun in an elliptic orbit—a theory somewhat different from that proposed by Olmsted—was found to afford a simple and satisfactory explanation of the phenomena. This hypothesis of an eccentric stream of meteors intersecting the earth's orbit was adopted by Humboldt, Arago, and Herschel, shortly after the occurrence of the meteoric shower of 1833.

A few years previous to the display of 1866 was shown by Professor Newton, of Yale College, that the distribution of meteoric matter around the ring or orbit is far from uniform; that the motion is retrograde; that the inclination of the orbit has an annual forward motion of  $102''.6$  with respect to the equinox, or  $52''.4$  with respect to the fixed stars; that the periodic time must be limited to five accurately determined periods, viz: 180.05 days, 151.54 days, 354.62 days, 376.5 days, or 33.25 years; and that the inclination of the orbit to the ecliptic is about  $17^\circ$ . Professor Newton, for reasons assigned, regarded the third period as the most probable. He remarked, however, that by computing the secular motion of the node for each periodic time, and comparing the result with the known precession, it was possible to determine which of the five periods is the correct one.

For the application of this crucial test,—a problem of more than ordinary interest,—we are indebted to Professor J. C. Adams, of Cambridge, England. By an elegant analysis he has first shown that for either of the first two periods designated by Professor Newton, the annual motion of the node, resulting from planetary perturbation, would be considerably less than one half of the observed motion. It only remained, therefore, to examine whether the period of  $33\frac{1}{4}$  years would give a motion of the node corresponding with observation. Professor Adams found that in this time the longitude of the node is increased  $20'$  by the action of Jupiter,  $7'$  by the action of Saturn, and  $1'$  by that of Uranus. The effect of the other planets is scarcely perceptible. The cal-

culated motion in  $33\frac{1}{4}$  years is therefore  $28'$ . The observed motion in the same time, according to Professor Newton, as previously stated, is  $29'$ . This remarkable accordance was at once accepted by astronomers as satisfactory evidence that the period is about 33.25 years.

Having determined the periodic time, the mean distance, or semi-axis major, is found by Kepler's third law to be 10.34. The aphelion is consequently situated at a comparatively short distance beyond the orbit of Uranus.

It was stated that shooting-stars are the dissevered fragments of cometic matter, which, penetrating our atmosphere, are rendered luminous by the resistance so encountered. The discovery that comets and meteors are actually moving in the same orbits was first announced by Signor Schiaparelli in 1867. The coincidence of the orbits of Tempel's comet as computed by Dr. Oppolzer, and the meteors of November 14th, as determined by Schiaparelli, is too close to be regarded as merely accidental.

The fact is obvious that the meteors of November 14th are the products of the comet's gradual dissolution. It has been stated that the comets of 1366 and 1866 are probably identical. The interval indicates a period of 33.283 years—greater by 39 days than that found by Oppolzer. With this value of the periodic time and the known secular variation of the node it is found that the comet and Uranus were in close proximity about the beginning of the year 547 B.C. It is therefore not improbable that the former was then thrown into its present orbit by the attraction of the latter. The celebrated Leverrier designated the year 126 of our era as the probable epoch of the comet's entrance into our system. This date, however, is incompatible with the period here adopted. It is worthy of remark, moreover, as bearing on this question, that the extension of the cluster in the tenth century, as indicated by the showers of 902, 931, and 934, was too great to have been effected in so short a period as 800 years.

With the period of 33.283 years it is easy to find that the comet will make a near approach to the earth about the 16th or 17th of November, 1965, and to Uranus in 1983. At one of these epochs the cometary orbit will probably undergo considerable transformation.

We have seen that the comet of 1866, and also the meteoroids following in its path, have their perihelion at the orbit of the earth, and their aphelion at the orbit of Uranus. Both planets, therefore, at each encounter with the current not only appropriate a portion of the meteoric matter, but entirely change the orbits of many meteoroids. In regard to the devastation produced by the earth in passing through the cluster, it is sufficient to state that, according to Weiss, the meteor orbits resulting from the disturbance will have all possible periods from 21 months to 390 years. It may be regarded, therefore, as evidence of the recent introduction of this meteor-stream into the solar system that the comet of 1866, which constitutes a part of the cluster, has not been deflected from the meteoric orbit by either the earth or Uranus.

### OTHER METEORIC STREAMS.

*The Meteors of August 7-11.*—Muschchenbroek, in his "Introduction to Natural Philosophy," published in 1762, stated as the result of his own observations that shooting-stars are more

abundant in August than in any other part of the year. The fact, however, that a maximum occurs on the 9th or 10th of the month was first shown by Quetelet in 1835. Since that time the shower has been regularly observed both in Europe and America; the number of meteors at the maximum sometimes amounting to 160 per hour. Their tracks when produced backward intersect each other at a particular point in the constellation Perseus.

As the earth is about five days in crossing the ring, its breadth is some parts cannot be less than 8,000,000 miles.

In 1866 Professor Schiaparelli, on computing the orbit of this meteoric stream, noticed the remarkable agreement of its elements with those of Swift's or Tuttle's comet (1862, III.), as computed by Dr. Oppolzer.

It appears probable, therefore, that the third comet of 1862 is a part of the meteoric stream whose orbit is crossed by the earth on the 10th of August.

The characteristics of different meteoric zones afford interesting indications in regard to their relative age, the magnitude and composition of their corpuscles, &c. Thus, if we compare the streams of August 10 and November 14, we shall find that the former probably entered our system at a comparatively remote epoch. We have seen that at each return to perihelion the meteoric cluster is extended over a greater arc of its orbit. Now, Tuttle's comet and the August meteors undoubtedly constituted a single group previous to their entering the solar domain. It is evident, however, from the annual return of the shower during the last 90 years, that the ring is at present nearly if not quite continuous. That the meteoric mass had completed many revolutions before the ninth century of our era is manifest from the frequent showers observed between the years 811 and 841. At the same time, the long interval of 83 years between the last observed display in the ninth century, and the first in the tenth, seems to indicate the existence of a wide chasm in the ring no more than a thousand years since.

Neither the period of the meteors nor that of the comet can yet be regarded as accurately ascertained. The latter, however, in all probability, exceeds the former by several years. Now, at each passage of the earth through the elliptic stream, those meteoroids nearest the disturbing body must be thrown into orbits differing more or less from that of the primitive group. In like manner the near approach of the comet to the earth at an ancient epoch may account for the lengthening of its periodic time.

Selected.

"Oh! the depths through which the Lord's ministers have to pass! Surely, life itself, the natural life, would give way in the conflicts which are at times permitted to attend them, only that the everlasting arms of God's salvation are underneath. But the deeper their trials and sufferings—the more they are plunged as into the very depths of death—yea, if they feel at seasons as though they were left in the hands of their soul's enemies—it is even through the bitterness and pangs of these fiery trials that they are prepared to go forth in the demonstration of the Spirit and power. Their experience is, that none could ever deliver them from those soul-searching

baptisms, but the great God of Heaven and earth, through and by the power of the Lord Jesus Christ, who is with them alway, even unto the end. Oh, that my soul may be strengthened and enabled to partake, as oft as my Lord pleaseth, of His own most glorious but bitter cup. O, Lord Jesus Christ, increase my faith in thy marvellous power: Thou showest thy wonders in the deep, when we go down to the sea of conflict—in our frail vessels—when in them we are doing business in great waters, *then* we cry unto Thee, we feelingly know that we are nothing, thou art our Saviour and Deliverer. When Thou bringest our souls up out of our distresses, *then* we praise Thee for thy goodness and for thy wonderful works towards us. Strengthen me, thy unprofitable servant, to do Thy will, oh my God; and let not thy hand spare, nor thine eye pity, till all within me is brought into perfect obedience and resignation, for Christ's sake.—Amen!—*Edward Alexander.*

#### The Conibos.

A writer in *Chambers' Journal*, in a review of Paul Marcoy's book of travels in South America, gives an account of an Indian tribe called the Conibos, "who have never suffered the isolation of their savage life to be interrupted by communications from without, who have adhered steadily to their own ways, and whose aspect of to-day is, in all probability, precisely the same as that of their forefathers countless generations before the armed heel of Pizarro rang upon the soil of Peru." The writer continues:

"They are singularly short of stature, never exceeding, rarely ever reaching five feet three, lumpish of figure, with high cheekbones, small yellow eyes (the pupils tobacco colored), oblique in shape and set wide apart. Their thick lips disclosed yellow teeth, well set, and gums dyed black by the use of an Indian plant called yanammen. Their faces are almost spherical, and P. Marcoy says this shape 'gives them a look of *bonhomme* and simplicity which corrects the disagreeable impression they make at first sight.' Their skin is very dark, and has a peculiarity which reveals at once the chief drawback to the otherwise exquisite pleasure of travelling in their beautiful country; 'it is rough to the touch, like shagreen,' says P. Marcoy, 'from being incessantly punctured by mosquitoes.'

"Both men and women cut their hair like a brush to the level of the eyebrows, and leave the rest to flow over their shoulders. It is a peculiarity of this tribe that ornament, indeed almost clothing, is reserved for the men only. In the typical portraits furnished by Marcoy, the women wear only a strip of brown cloth, though the mosquitoes are quite impartial in their attacks, while the men wear a loose garment, like a wagoner's smock without sleeves, of brown cotton, ornamented with a border of Greek pattern, lozenges and zigzags, traced in black with pencil to imitate embroidery. Whence came this vague sense of art? They all paint their faces, but the men use more coloring than the women, laying on the red very freely, in thick, broad stripes. Black paint is used for (literally), body-color. A Conibo in full dress will have sandals painted on his feet as far as the ankles, or buskins as high as the knees, like riding-boots; a jacket or coat painted on his body, open at the breast and festooned round the hips; on his hands gloves or mittens.

"But besides these ordinary designs, they have arabesques of the most complicated kind for gala days, which they apply to their faces by a process of stencilling, just as the Etruscans applied their patterns to their vases, and they adorn themselves with necklaces and earrings of black and white beads which they buy at Tierra Blanca. A few of the men who occasionally visit the missions to exchange turtles, or the prepared fat of those creatures, or wax, for axes, knives and beads, have learned the use of straw hats, which they make for themselves from the young palm reeds. The toilet of the men is a serious operation, in which a Conibo usually spends half his time; the women never think of any personal adornment, and are mere slaves, toilers and beasts of burden. Their intelligence is, however, very remarkable, and it is with no small surprise we learn that they possess an extraordinary talent for the manufacture of pottery, and for painting and varnishing it afterward.

"The arms of the Conibos are the bow and arrow, the club and the shooting tube. Through the last they send sharp poisoned darts, but, unlike any other tribes of the Amazon, whose war lances are almost always poisoned, they use them solely for the destruction of animals. The tribe live almost entirely on the turtle. In vain do the forests and the waters offer them a luxurious variety of food; nothing but the turtle, its flesh, its grease, its eggs, its oil, has any charm for them. They eat certain kinds of worms as *hors-d'œuvre*, and delight in fat, blood-gorged mosquitoes, which they permit to attain full condition upon their own skin undisturbed as a *bonne bouche!*

"A Conibo will offer to the friend or traveller who visits his mud and leaf hut, the last banana, the last morsel of turtle, the last leg of monkey, with the utmost cheerfulness. Bigamy is tolerated among these peaceful savages; and indeed they would not object to polygamy, only that they have made a law among themselves that a man shall not have more wives than he can support, and as they are extraordinarily idle, even for savages, this enactment practically limits the number to two. Their funeral ceremonies are very curious, resembling the ancient Scandinavian death-rites. They have an idea of an omnipotent being, the creator of heaven and earth, whom they address indifferently as 'Papa,' father, and 'Huchi,' grandfather. Opposed to this good spirit there is an evil spirit, called Yunima, dwelling in the earth's centre. Whatever evils affect the nation are attributed to him, and the Conibos fear him so much that they avoid, as far as possible, uttering his name."

Selected.

What shall we do if we suffer ourselves to be drawn from the blessed Spirit of the Saviour of men, or from the measure thereof which is given to all for our profit. Where, but within our own hearts, shall we find the Comforter and the safe Guide? Surely, the Holy Scriptures direct us to Christ! The Scriptures came by inspiration of God; yet in my view, the same inspiration must be with us to comprehend their spiritual meaning and application. The natural man, even though he may compare Scriptures with Scripture, and acknowledge to their harmony, is nevertheless, the natural or unregenerate man still,

without the operation of the Spirit in his soul even that grace, which is the Divine gift to all men, and which I conceive brings all, who adhere to it, into a converted state, whether they be favored with the inspired writings which tell of the blessed and holy Redeemer, or whether they be ignorant of them. Must it not be our experience, in order to partake of the benefit of the sufferings and death of Christ, to be brought into obedience unto righteousness? and what can do this for us but the power of God immediately made known to us by the inward revelation thereof?—*Sarah Grubb.*

*Intelligence of the Shepherd Dog.*—Many instances of the almost human sagacity of the animal are related. A narrative of this kind which is given by William Chambers, of Edinburgh, in the reminiscences of his brother Robert and himself, will probably be new to some of our readers. Their grandmother was the wife of William Gibson, a farmer, who rented a large tract of pasturage in Peebleshire. This farm, called Newby, was not less than seven miles long: it commenced near Haystown, about two miles from Peebles, and at the other extremity bordered on Blaeford house, in Selkirkshire, where the Ettrick shepherd spent his youthful days. The author says "It was on this farm of Newby, while in the possession of Mr. Gibson, in the year 1777, that there occurred a case of the sagacity of the shepherd's dog, which has often been adverted to in books, but seldom with correctness as to the details. A store-farmer in another part of the country, had commenced a system of sheep-stealing, which he was believed to have practised without detection for several years. At length, a sheep which had been taken amongst others from Newby, reappeared on the farm, bearing a brand on her face in addition to that of her true owner. The animal was believed to have been attracted to her former home by the instinct of affection towards the lamb from which she had been separated, and her return was the most remarkable as it involved the necessity of crossing the river Tweed. The shepherd James Hislop, did not fail to report the re-appearance of the sheep to his master, and was not long before they ascertained whose brand it was which had been impressed on William Gibsons. As many sheep had been for some time missed out of the stock, it was thought proper that James Hislop should pay a visit to Murdison's farm, where he quickly discovered a considerable number of sheep bearing Mr. Gibson's brand O, all having Mr. Murdison's, the letter T, superimposed. I shot Murdison and his shepherd Miller were apprehended, tried, convicted and hanged in the Grassmarket—a startling exhibition considering the position of the sufferers in life and made the more so by the humbler man choosing to come upon the scaffold in his "dead clothes."

The long continued success of the crime of these wretched men was found to have depended upon the wonderful human-like sense of Miller's dog *Yarrow*. Accompanied by *Yarrow*, the man would take an opportunity of visiting a neighboring farm, and looking through the flocks. He had there only to point out certain sheep to his sagacious companion, who would come that night, select each animal so pointed out, bring them together, and drive them across country, and

Moreover, across the Tweed, to his master's arm, never once undergoing detection. The story ran that the dog was hanged soon after its master, as being thought a dangerous creature in a country full of flocks; but I would hope that this was a false rumor, and my grandmother, who might have known all the circumstances connected with the case, never affirmed its truth."

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 155.)

To her Mother.

"Evesham, 6th mo. 17th, 1825.

After attending a favored Quarterly Meeting, whither I was taken by my cousins J. Stokes and wife, I went to cousin J. G.'s to dine and tea. At the three places I have visited, there have been one or two in each household. So that Philadelphia at the present, seems more favored than the surrounding country.

My mind bends strongly towards my beloved mother and tender sisters. Ah! methinks our situation in P., although deeply trying, is even preferable to the deadness and indifference which prevails here. May it please Him, who hath all power in his hand, to arouse us to a more diligent occupation of our talents, the precious talents committed into us, that so we may be enabled to speak all of his excellent name; which is indeed worthy to be magnified and adored, in that he has been pleased to reveal himself, through his beloved Son, in our hearts; and caused us to believe in him, in that glorious plan of redemption which the Lord Jesus Christ has laid through the offering of his precious blood ransom for sin,—for the sins of the whole world. My mind is so much occupied in the contemplation of things of this nature, and of the awful responsibility which rests upon us Christian believers, that meditation suits me better than conversation; and meeting with few who seem to understand my state, I feel very like a pelican in the wilderness; but desire to keep hidden so long as the blessed Jesus may permit.

Circumstanced as I am, visiting does not seem desirable, except to those who have been brought under baptisms, and have in like manner known what it was to be stripped of themselves, and to be, as it were, bundled up with the dry rods; yea, destitute of all form and comeliness. Ah! dear mother, it has been newly sealed upon my mind that there is much for me to do! And oh! that in holy confidence I could adopt the language of Job: 'When thou hast tried me, I shall come forth as gold.' Thus should I be strengthened to endure 'as seeing him that is invisible;' and preserved from an undue degree of discouragement even in the most proving seasons. Or having through adorable mercy, been favored to find Him of whom Moses in the law and the prophets did write, how are we strengthened to persevere in our tribulated path, and to believe in the precious promise of the gospel. Even 'that to those that fear my name will the Sun of righteousness arise,' and knowing that a book of remembrance is written, our hope is steadfast; and we are enabled to run through a troop, and leap over the opposition that may arise against us. May the great Shepherd preserve you from evil, and show himself to you as a shield on the right hand and on the left, and that he

may bless you with the choicest gifts is my earnest desire; that thus we may be a family unitedly engaged in promoting his glorious cause, and carrying forward his glorious work in the earth. That hereby we may in the awful hour of separation realize, through the power of Redeeming love, an admission into that city, where the anthem of Praise is forever attuned unto Him that hath washed us from our sins in his own blood. Farewell.

Yours, affectionately,

SARAH."

10th mo. 8th, 1826. After attending two poor meetings this day, wherein the life and virtue seemed very low, and as formerly all the wells were stopped; I sat down this evening in and under an humbling sense of great unworthiness and emptiness, though in some degree sensible of earnest desires still to be found struggling for an increase of that faith which gives the victory.

My heart has been affected renewedly this day, in believing that my Heavenly Father has a work for us to do. And oh! my secret petitions have been for ability to perform the same, even though it may subject me to the scoffs and frowns of men.

To her Sister.

"Philadelphia, 7th mo. 13th, 1827.

My dear Sister:—While we feel the blank made in our little family circle, by the absence of one of its members, we also are thankful (I trust at seasons) that we are so situated as to be able to make way for thee to retire from the hurry of business, to the sober scenes of nature, where thou canst partake of the salubrity of the air amid woods and hills. And dost thou find thyself benefitted by the change? \* \* \* \* \*

Oh! when shall we be able to settle as a society, in the calm sunshine of Gospel brightness? Walking together in the faith of the Gospel, and believing, not in word and in tongue only, but in deed and in truth in Him who died for us, and who is the life of men? We are assured, there is a coming day, wherein every man's work shall be tried; and that which will not endure the fire, will be consumed. Then where will all man's boasted works be; or, what will they stand him in stead before Him who, though they have despised, mocked and reviled, they will have to acknowledge their Judge? 'For the Father hath committed all judgment unto the Son, that all men should honor the Son even as they honor the Father;' and who is the awful Judge of quick and dead. Some of us feel that we have no works or worth to plead, nor anything to trust to or in, save the mercies of God, through our Lord and Saviour Jesus Christ. Ah! were it not for this hope, should we not sink, especially when days of sore tribulation overtake us; when we feel destitute and forsaken; when there seems nothing but death and darkness around us! Then how this blessed hope, 'The Lord knoweth them that are His,' which the believer is sometimes given to realize as his own glorious privilege, is calculated to cheer and sustain the mind! What an anchor to the soul both sure and steadfast, and by which he entereth in within the vail, and reposes on his God, is the living experience sometimes granted, that his Redeemer liveth! May we more and more press after this attainment; for truly in the world we have much tribulation: while

peace can be found nowhere else than in seeking to know and do the Divine will.

That thou mayst be favored not only with the blessing of health, but every other that is consistent with the will of our Heavenly Father, is the desire of thy affectionate sister. SARAH."

(To be continued.)

*The Lost Arts.*—The monuments, the paintings, and even the woven fabrics of Egypt, all attest the enduring nature of their workmanship, and their capability of resisting the corroding and wasting effects of time. The pyramids appear but little worse for the storms of ages, and the traveller regards them with the awe and reverence inspired by the mystery of their erection, and the almost equal mystery of their continued existence unharmed after the lapse of four thousand years.

Mementoes of our own Republic, not yet one hundred years old, may be seen in the patent office at Washington, in a condition of hopeless decay, while the mummy cloths of Egypt, although woven over three thousand years ago, seem as firm of texture as when fresh from the ancient looms. The far famed purple dye of Carthage, supposed to have been obtained from a small shell-fish of the Mediterranean, has never been equalled by modern chemists, who have thus far failed to find anything possessing its peculiar brilliancy and permanency of color.

The frescoes of Michael Angelo are the wonder and admiration of every appreciative person who has looked at them on the lofty ceilings of the Sistine chapel at Rome; but, compared with the mural paintings of Egypt, traced centuries before, they look dim and almost lustreless. The mural paintings are as bright as the Nile itself, and still appear likely to claim the admiration of visitors for thousands of years to come. The colors of the ancients, when exposed for years to moisture, do not lose their brightness, while their woven fabrics, long buried in the ground, resist decay; and even timber, preserved by some unknown process defies the action of the elements and remains nearly as sound as in the time of the Pharaohs. It is said that numerous experiments have been tried, of subjecting the ancient paintings to the flame of a gas jet, but the heat thus imparted failed to destroy them. Egyptian cement, as is well known, is almost imperishable, uniting wood, glass, stone, iron, and other articles together so firmly as to resist all efforts to sever them at the point of union. Fire nor water will destroy this cement, and it is practically indestructible. This substance is supposed to have been used in embalming their dead, preserving their works of art, and making their fountains durable.

Even in our own country have been found implements evidently made by an ancient but now extinct race, the manufacture of which may be properly classed among the lost arts. In the copper mines of Lake Superior, in old pits long since abandoned, are found copper tools of a temper and hardness not exceeded, if equalled, by the best steel tools of the present day. Chisels and hammers of copper, huge hammers of granite, specimens of wood, indestructible pipes, and other articles are found here and elsewhere, denoting the superiority of this ancient people in many of the arts, and also affording abundant evidence that they were highly proficient in the working of metals.—*Late Paper.*

Review of the Weather for Eleventh and Twelfth months, 1873.

The rainfall during the past two months has been rather below the usual average, the total amount being 6.65 inches; 1.28 inches of which fell during the Twelfth month. The average temperature for Eleventh month was 35.68°, and for the Twelfth 36.55°.

For Eleventh month the mean height of the barometer was 29.53 inches. And 29.69 inches for the Twelfth month.

Westtown Boarding School, First mo. 10th, 1874.

TABULAR STATEMENT, ELEVENTH MONTH, 1873.

Table with columns: DAY OF MONTH, THERMOMETER (7 A. M., 2 P. M., 7 P. M., MEAN.), BAROMETER (7 A. M., 2 P. M., 7 P. M., MEAN.), WIND, CIRCUMSTANCES OF WEATHER, and Depth of rain.

Table with columns: DATE, THERMOMETER (7 A. M., 2 P. M., 7 P. M., MEAN.), BAROMETER (7 A. M., 2 P. M., 7 P. M., MEAN.), WIND, CIRCUMSTANCES OF WEATHER, and DEPTH OF RAIN.

Taken from the "Christian."

Women's Apparel.

How should a woman professing godliness dress? How adorn herself?

In "modest apparel."—1 Tim. ii. 9. With "shamefacedness," i. e. with no intent to draw the eye.—1 Tim. ii. 9. With "sobriety," i. e. with nothing conspicuous.—1 Tim. ii. 9. Not "with braided hair," or with "plaiting of the hair."—1 Tim. ii. 9; 1 Pet. iii. 3. Nor with "gold."—1 Tim. ii. 9; 1 Pet. iii. 3. Nor with "pearls."—1 Tim. ii. 9. Nor with "expensive clothing."—1 Tim. ii. 9. Nor with "clothing as

an adornment."—1 Pet. iii. 3. Observe, there are three points as to the clothing of the body. Let it be modest; let it be inexpensive; let it be unobtrusive. There are two points as to the sort of decoration to be avoided: no jewelry; no fanciful dressing of the hair. And there are two points to be observed as to adorning: "a meek and quiet spirit;" "good works." Surely a woman professing godliness, should be careful in this matter which the Holy Ghost has not considered unimportant. Surely she should clothe herself in all "modesty," "shamefacedness," and "sobriety," while she adorns herself with a "meek and quiet spirit,"

and with "good works." Now if she be thus adorned, she will not be anxious to attract the gaze of admiration by heaping jewelry upon her person, or decorating it with costly clothing, nor will she be much busied in the way she arranges her hair. If given to good works she will have neither time nor money for the decoration of the body.

The above is merely a summing up of Paul and Peter's thoughts in the matter, as found in 1 Tim. ii. 9, and 1 Peter iii. 3; and as it has made these thoughts very clear to my own mind, I now write it for others who may be exercised on the subject, and are honestly anxious to walk in simple obedience to the word of God.

Simple Food and Drink.—Next in importance to air and exercise comes the selection of diet and drink. And in this matter the practical adoption of one common-sense maxim would do almost all that needs to be done. The maxim is this: In cases where one of two courses involves danger and risk, and another is perfectly safe, always choose the path of safety.

We have seen that the great mass of the nation is hastening to disease, and that individual misery and domestic unhappiness are widely increasing as the result. We have seen that owing to needless varieties, to stimulating food and drinks, and to the use of condiments, excess in loading the digestive organ is one great cause of this extensive suffering.

Now there is a rich variety and abundance of simple, healthful food and drinks that are fitted for the perfect development and nutrition of the body, and involve little liability to perversion and excess. And when all stimulating food, drinks, and condiments are relinquished, and a simple diet maintained, healthful appetite returns, which is a safe guide to the proper amount to be taken, provided always that enough pure air and exercise are secured.

Moreover, I have found by my own experience, and have learned from others, that after living for several months on simple food, there is an increased susceptibility of taste and a keener relish for the delicate flavors that simple food offers. Does any one remember the delicious relish of childhood for a bit of good bread? This same relish will again return when solicited aright. Let a person for several weeks try the experiment of drinking only water, eating nothing but bread and butter, potatoes, baked fruit and milk, and at the same time exercise abundantly in the fresh air, and if their experience corresponds with that of most I have known who have tried the experiment, they will say, "Never did food of the richest variety and composition furnish such an exquisite relish!"

The more a person will limit a meal to a few articles, and these of the simplest kind, the more will they regain the appetite and relish of early life.

Now the course here suggested is perfectly safe, is equally productive of enjoyment, and is in obedience to the laws of health, which are the laws of God. The common course pursued in this land of abundance and gourmandizing is certainly one of risk and danger to the delicate and deteriorated constitution of the adult and rising generation. Is not here the place to practice the Christian "daily" duty of "self-denial?" And if the strong and healthy feel no need of it for themselves, is there not a duty set forth for them in this

pired command, "We that are strong ought to bear the infirmities of the weak, and not to please ourselves?"—*Catherine Beecher's Letters on Health.*

John Heald.

For "The Friend"

(Continued from page 163.)

In the course of his visit in New England, John Heald attended the Monthly Meeting of Uxbridge, 6th mo. 26th. He says: "In the time of business I remarked something in regard to young people getting unsettled, and going unnecessarily out of meeting to amuse or recreate themselves; that it had a bad effect. They could hardly return without the mind being more disqualified for attending to the concerns of society; that if they attended to their feelings, and the state of their minds, they might, I thought, discover it."

In preparing the journal of John Heald or the columns of "The Friend," it has often seemed to the compiler, that those Friends who have been led into exercises and services similar to those which he passed through, could be reminded, by his simple and unadorned record of his feelings, of their own experiences; even as face answereth to face in a glass. This consideration has sometimes led to the introduction of extracts which might not seem to the general reader of especial interest. The notices our Friend has reserved of the meetings he attended in New England are generally brief; from among them the following are selected.

6th mo. 28th. At Leicester, it was agreed to me to sit in silent meditation, the sensation seemed so much like being at home. But after awhile I began to speak concerning the use of time, that a consideration of it had been a profitable employ to many, and before I sat down I treated on several subjects.

7th mo. 4th. We met with Friends near place called Turkey Hill. For this opportunity I was thankful. It proved a time of encouragement to me, and I believe to them. There was considerable tenderness and love felt among us. I had to remember that I had thought of [passing by] this place, but could not reconcile my mind to it, and having given up to what I believe would be making for peace, I rejoiced in the engagement, and praised the Giver of the precious gift.

7th mo. 5th. Amesbury Meeting was largely crowded. I had expected only a small congregation, as but few Friends belong to this place. Friends left us to sit alone, they sitting away as much as they could out of view, while we sat on the raised seat. But at length so many coming in, they had to come and sit with us. I felt weak and tried, but endeavoring as well as I could to be resigned, I found a remark to spring up, which I felt free to express, and when I had done that was presented, and so I proceeded until much was said. The people were still and quiet, and appeared to be satisfied.

7th mo. 7th. At Epping, a considerable number collected. My mind had undergone yesterday and this morning much secret trial and distressing feeling. I dreaded the meeting, but it came on, and I sat under a weight of exercise for some time, and then engaged in vocal labor, and was favored to deliver a lively testimony of considerable length, which I believe was received in good will, and I felt comforted.

7th mo. 8th. Dover. The meeting was to me a time of encouragement, and I think

it was a refreshing time to some sincere minds. Thanksgiving and praise were ascribed to the Giver of every good gift. We dined at Isaac Wendell's, and went to Menbel Osborn's, and to William Brown's to lodge. At each of these places we had precious opportunities, wherein the sweet and precious effusions of good flowed freely.

7th mo. 10th. This morning how is my mind involved in distress! How has the enemy gained his point so far as to bring in trials like a flood! How much he may gain to my hurt, I know not. May I endure the trial, and again be delivered from thralldom, and again enjoy the incomes of Divine love. We went to the meeting at Merdenborough, which was considerably large and mostly not members, but my way not opening to communicate, I remained silent. In the afternoon on the way to New Durham, I was released from the painful sensations of mind I had endured for some time. I felt like another person.

7th mo. 11th. Had a meeting with some Friends, and others who had wild kind of doings among them, falling down, and howling, or screaming as loud as they could. They were called free-will Baptists. It was a comfortable meeting. I labored vocally to a considerable length, the testimony was impressive, and the countenances of the people appeared solemn. I felt thankful for the favor.

7th mo. 13th. Attended Kittery meeting. My concern was to engage the people's attention to prepare for their last account; saying, Be ye also ready, for ye know neither the day nor the hour in which the Son of man cometh. We know not the situation we may be in, in the course of another day. The meeting concluded with supplication. We returned to our friend David Nichols, and had an opportunity of encouraging the young people in several families. It was done in an engaging manner, way opening so to do, to the tendering of their minds.

7th mo. 15th. At North Berwick there was in the silent part, a lively exercise. I sat under it for a considerable time. At length I entered into vocal exercise. It was heavy labor, but I found no liberty to sit down until I had said much, and had to show that faith without works is dead, and that works without faith are dead also. Faith and works ought to go together. Abraham was produced as an example. He was required to offer his only son Isaac, so he went forth to do it. Here he showed his faith by his works. Without faith it is impossible to please God. Faith without works being dead, will a dead faith please Him? The devils believe there is a God, and not only believe but tremble.

7th mo. 19th. We rode a dozen miles to Falmouth, J. Winslow and wife conducting us. My mind soon became wrapped up in contemplating the movements of Elijah and Elisha, and the desire of the latter for a double portion of the spirit of Elijah. This opened to the application of Solomon for wisdom, and that these requests were very similar. My meditation in silence was pleasant, and the vocal labor long.

7th mo. 24th. At Litchfield many people came, and it proved to be trying exercise. At length way opened, and I delivered a testimony which appeared to be broken and in detached sentences, more so than common, but it had a considerable reach on several.

7th mo. 28th. We lodged at Caroline Tobey's and had a meeting with the few Friends, and a considerable number of their neighbors. In the fore part the meeting was dull and trying, but waiting quietly, I felt a renewal of strength, and sat for some time in a comfortable enjoyment of favor, and finding way to open I spoke reminding of the necessity of preparing for a final change, and that some had sorely repented of their neglect, and that the unprofitable servant had a capacity to improve his talent, for there was given to each one according to his several ability. If there had been no ability there would have been nothing required; those that were faithful were accepted. It was the dilatory or slothful servant only that was rejected. It became a sober time, and the people were sober, and passed away quietly, and I admired how way had opened to reach their minds.

7th mo. 31st. At an appointed meeting in a school house, I treated on the doctrine of baptism, and showed that water baptism was John's. It was nowhere said in all the New Testament that our Saviour commanded water baptism to be used. John was sent to baptise with water, but he himself said, "He that cometh after me, the latchet of whose shoes I am not worthy to unloose, he shall baptise you with the Holy Ghost and with fire." Here he distinguishes Christ's baptism from his own; his being a type or shadow of Christ's, and belonged rather to the legal dispensation than to the dispensation of the Gospel. John declared, I must decrease, but He must increase. Our Saviour, after He had suffered and before his ascension, commanded his disciples to go teach all nations, baptising them into the name of the Father and of the Son, and of the Holy Ghost. Here water is not mentioned. When Peter was instructed to go to the house of Cornelius, he had thought that salvation was only to the Jews; and so it appears it was with the rest, notwithstanding they had been commanded to teach all nations. Afterwards we find he said, "It is not the putting away the filth of the flesh," which water effecteth, "but the answer of a good conscience toward God;" and Paul said, "one Lord, one faith, and one baptism." This is that which will stand us in stead, to have a conscience void of offence, to have served Him not with eye-service, but with singleness of heart.

It was a good meeting. I felt it best before I left them to recommend them to God, and the word of His grace, that is able to build up and to give an inheritance among all them that are sanctified.

(To be continued.)

## THE FRIEND.

FIRST MONTH 17, 1874.

The attention of our readers is called to the Address issued by the Meeting for Sufferings on Theatrical Amusements and Horse-racing; which will be found in the columns of the present number. Members in the country may find opportunity to circulate it in their respective neighborhoods; care being taken by those distributing them that more than one person shall not go over the same ground. They can be had at Friend's Book Store, 304 Arch street.

## SUMMARY OF EVENTS.

**FOREIGN.**—Dispatches from Madrid report that Serrano will not convoke the Cortes for a twelve month. He will give all his energies to the suppression of the insurrection and tranquilization of the country, and not until these objects are accomplished will he summon the Legislature.

A Madrid dispatch of the 10th says, a column of the forces besieging Cartagena made an attack on Fort San Julian yesterday, but were repulsed with considerable loss.

An insurrection has broken out in Barcelona, and barricades have been erected in the suburbs by the insurgents. Fort Montjoí, on the south, has opened fire on the city.

A Bayonne dispatch of the 9th says, Don Carlos and General Elio, with 25,000 men and eight pieces of artillery, have entered Santona. A battle is expected soon, the Carlists making an attack; they completely surround Bilbao.

The government has issued a decree dissolving the Cortes, and announcing elections for a new body. The election will be held when order is re-established and freedom and universal suffrage are unobstructed.

A decree has been issued calling out the entire reserve of 1874 for active service.

The French National Assembly resumed its sittings on the 8th inst. A motion to postpone the bill concerning the nomination of mayors, after a violent debate, was carried against the government by a large majority. In consequence of this vote the members of the Cabinet tendered their resignation, but President MacMahon requested them not to retire but to await the vote of confidence which he thinks will be passed by the Assembly.

The health of the Emperor of Germany continues to improve. The furniture of Archbishop Ledochowski has all been distrained, and he still refuses to pay the fines imposed by the Court. His imprisonment is now threatened.

The Catholics of Switzerland have sent a protest to the government against the expulsion from the country of the Papal Nuncio.

The cholera and other diseases prevail to a fearful extent in the Dutch camp in Acheen. The native allies are the greatest sufferers.

A royal ordinance has been promulgated, abrogating the clause of the Norwegian constitution which gave the king the right to appoint as lieutenant of that kingdom, at his pleasure, either a native or a Swede. Henceforth a Norwegian only can be appointed.

The new law in Austria by which criminal trials will be by jury, went into operation on the first inst.

Mirza Yussuf Khan, an able and popular Persian statesman, has been executed at Tiflis on the charge of having misappropriated moneys entrusted to him for relieving famine. The deceased was educated in Paris at the expense of the Shah.

A considerable number of persons belonging to Dundee and neighborhood, who had emigrated to the U. States, have returned home. They are mechanics, masons and other skilled workmen, who in consequence of the financial difficulties have been deprived of employment.

A Calcutta dispatch of the 11th says: The famine is already causing great distress in Behar and Benares.

The rate of discount at the Bank of England has been reduced to 4 per cent. The Bullion in the bank had been largely increased.

The Emperor of Austria has granted an amnesty to all persons under sentence for offences against his person, and has ordered a report to be made to him respecting other condemned persons whose conduct warrant clemency being shown them.

The returns of the recent elections for the German Reichstag are largely in favor of the National Liberal party, especially in Bavaria, Wurtemberg, and Baden. The candidates of the clerical party were chosen in a few places.

A Paris dispatch of the 12th says: In the Assembly this afternoon, after a violent debate in which the Ministry was attacked for its monarchical tendencies, a vote of confidence in the government was adopted. The ministers have in consequence withdrawn their resignations.

Special advices to the Standard, from Cape Coast Castle, report that the king of Dahomey has sent heavy reinforcements to the Ashantees.

Eight of the provinces of Spain have been declared in a state of siege, and a decree has been issued dissolving all the political associations charged with conspiring against the interests of the country or the integrity of its territory. The Carlists have captured three companies of Republican troops without bloodshed.

The Cartagena insurgents, on the 11th inst., made

overtures for a surrender with conditions. The proposals were rejected, and unconditional submission was demanded by the commander of the government forces. London, 1st mo. 12th.—Consols 92½. U. S. bonds of 1867, 107½.

Liverpool.—Uplands cotton 8 1-16d.; Orleans, 8½d. UNITED STATES.—The interments in Philadelphia last week numbered 310, and in New York 488.

The National Crop Reporter publishes a final summary of the corn crop of 1873, in Illinois, Indiana, Iowa, Kansas, Wisconsin, Minnesota, Missouri, Ohio, and Tennessee, compared with the crop of 1872. The aggregate yield for 1873, in the States named, is 514,000,000 bushels, against 756,000,000 in 1872, a loss of about 242,000,000 bushels.

At the request of Attorney General Williams, the President has withdrawn his nomination for the office of Chief Justice, and on the 9th he nominated Caleb Cushing, of Massachusetts, for the position.

The proceedings in Congress last week were of no great importance. The Senate further debated the bill for reducing salaries, and in the House the Civil Rights bill was recommitted for amendments. Its passage was eloquently and ably advocated by Elliott, a colored representative from South Carolina.

The revenue of the United States government has fluctuated greatly of late years. In 1861, the total revenues amounted to only \$41,276,299, in 1862, \$51,919,261. After this the vast expenses of the war caused a great increase; thus in 1863 they were \$12,094,965, in 1864, \$24,412,971, in 1865, \$32,031,158, and \$519,949,564 in 1866. Since that year there has been an annual reduction in the amount. The internal taxation, between 1866 and 1873, was reduced \$195,497,499.

The culture of sugar-cane, which has to a great extent been abandoned on the low lands of Louisiana, will in the future be largely prosecuted on the pine lands of Mississippi and Alabama.

The receipts of the Pennsylvania State Treasury for the fiscal year ending 11th mo. 30th last, were \$5,559,179, and the expenses \$6,734,027, balance in the Treasury \$1,825,152; public debt redeemed during the year \$1,504,672.

On the 7th inst. the Governor of Pennsylvania issued his proclamation announcing that the new Constitution had been adopted by the qualified voters of the State, and is now the Constitution of the Commonwealth. It was adopted by a majority of 145,150 votes.

On the 12th inst. the U. S. Senate, by a vote of 50 to 8, passed a substitute for the House bill in relation to salaries. The bill provides that hereafter all salaries, with the exception of those of the President of the United States, and Judges of the Supreme Court, shall be the same that they were prior to the act of last session making an increase, and also that all back pay not drawn or returned to the Treasury be carried into the Treasury and declared the property of the United States. The House of Representatives, by a nearly unanimous vote, has declared that in its judgment there is no necessity to increase taxation, or to increase the public debt by a further loan, if there shall be economy in the public expenditures, and that these must be reduced to the lowest point consistent with the proper administration of public affairs.

*The Markets, &c.*—The following were the quotations on the 12th inst. *New York.*—American gold, 112. U. S. sixes, 188½, 117½; ditto, 1868, 116½; ditto, 10-40 5 per cents, 113½. Superfine flour, \$6.20 a \$6.55; State extra, \$7.05 a \$7.25; finer brands, \$7.50 a \$10.50. White Michigan wheat, \$1.93; red western, \$1.68; No. 1 Chicago spring, \$1.67; No. 2 do., \$1.63 a \$1.64. Canada barley, \$1.82. Oats, 64 a 68 cts. Western mixed corn, 91 a 91½ cts.; new yellow, 87 cts. *Philadelphia.*—Cotton, 17 a 17½ cts. for uplands and New Orleans. Superfine flour, \$5 a \$5.75; extras, \$6 a \$6.75; finer brands, \$7 a \$10.50. White wheat, \$1.85 a \$1.90; amber, \$1.70 a \$1.80; red, \$1.65 a \$1.68. Rye, 90 a 93 cts. New yellow corn, 80 a 82 cts.; old do., 85 cts. Oats, 56 a 62 cts. Smoked hams, 12 a 14 cts. Lard, 8½ a 9 cts. Clover seed, 8½ a 10 cts. Sales of about 2500 beef cattle at 7½ a 7½ cts. per lb. gross for extra; 6 a 7 cts. for fair to good, and 3½ a 5½ cts. for common, a few choice sold at 8 cts. per lb. gross. Sheep, 5 a 7 cts. per lb. gross, and corn fed hogs at \$8 a \$8.37½ per 100 lb. net. *Baltimore.*—Western wheat, \$1.70 a \$1.80; Penna. \$1.80 a \$1.82; common to fair southern, \$1.65 a \$1.75; spring, \$1.60 a \$1.70. Yellow corn, 82 a 85 cts. Western oats, 58 a 60 cts. *St. Louis.*—No. 3 winter red wheat, \$1.41 a \$1.45; No. 2 spring, \$1.25 a \$1.27. No. 2 mixed corn, 57 cts. Oats, 44 a 45 cts. *Cincinnati.*—Family flour, \$7.25 a \$7.50. Wheat, \$1.45 a \$1.55. Corn, 58 a 63 cts. Lard, 8½ a 9 cts. *Detroit.*—Extra wheat, \$1.64 a \$1.65; amber Michigan, \$1.50. New corn, 66 cts.; old, 69 cts. Oats, 46½ cts.

## FRIENDS' LIBRARY.

For the convenience of those who attend Arch Street Meeting, the Library will be open hereafter on Fifth day mornings, from half past 9 to 10 o'clock.

## THE INDIAN AID ASSOCIATION.

The Executive Committee of Philadelphia Friends having accepted charge of the schools for the Wyandotte, Wichita, Kiowa and Comanche Indians, request the contributions of Friends in order to supply some pressing needs.

It has been found necessary to collect the children in Boarding Schools, and various articles of clothing, furniture, &c., are wanted to insure their comfort and proper care. Some money can also be judiciously expended in school supplies, in addition to those provided by the Government.

This is a critical time in Indian affairs, and help will be extremely valuable.

Contributions may be sent to JOHN S. STOKES, at this office.

## FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to act as assistant matron.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philada.  
Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

## WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office, Burlington Co., N. J.  
Charles Evans, No. 702 Race St., Philadelphia.  
Deborah Rhoads, Haddonfield, N. J.  
Rebecca S. Allen, No. 335 S. Fifth St., Philada.

## FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, on 5th day, the 20th of 11th mo. 1874 at Friends' Meeting-house, Middleton, Columbiana Co. Ohio, JOB HUESTIS to RACHAEL W. COPE, both of this place.

DIED, at Hopkinton, R. I., on the 1st of 12th month 1873, AMOS C. WILBUR, aged 77 years, a member South Kingston Monthly Meeting. He endured a protracted and painful illness with much patience and resignation; at times expressing a comfortable hope of acceptance when the summons should come to leave the earthly tenement. He imparted much pertinent counsel to his children, exhorting them to keep to plainness in dress and language. He was strongly attached to the principles of Friends, being concerned to adhere to them through evil report and good report; expressing deep regret at the falling away from them of many, and of the intermingling and amalgamating our members with other professors; and said in great brokenness, that he believed Truth would again prevail. At one time after a restless night, when his sufferings were exceeding great, he said, "I should be glad to be released, and to depart to my everlasting home. I have fallen short of what I should have been but the Lord is very merciful." He was frequently engaged in vocal prayer, saying at times, "Lord Jesus receive my spirit." "We know not how long we shall be here, hence it is all important that we be prepared for the final change." Near the last, after repeating the injunction and promise, "ask and ye shall receive," he said, "I have asked abundantly, and the change that awaits me will be glorious." He passed quietly away without a struggle, leaving the consoling assurance that his end was peace.

—, at his residence in Bordentown, N. J., on the morning of the 29th ult., SAMUEL C. TAYLOR, aged eighty-five years, a member of Chesterfield Monthly Meeting of Friends. "Mark the perfect man, and hold the upright, for the end of that man is peace."

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Comets.

### THE METEORS OF NOVEMBER 27.

(Concluded from page 171.)

Professor Schiaparelli's brilliant discovery of the relation between comets and meteors may now be ranked with the established truths of astronomy. His hypothesis, however, in regard to the *origin* of meteoric streams has not been generally accepted. Comets and meteors, according to his theory, are derived from cosmical clouds existing in great numbers in stellar space. These nebulae, in consequence of their own motion or that of the sun, are drawn towards the centre of our system. By the unequal influence of the sun's attraction on different parts, such clouds are transformed into currents of great length before reaching the limits of the planetary system. Shooting-stars, fire-balls, aerolites, and meteors being all of the same nature, differing merely in size, sometimes fall towards the sun from parts of the same current.

The views of Dr. Weiss, of Vienna, differ from those of Schiaparelli, in that he regards comets as the original bodies by whose disintegration meteor streams are gradually formed. "Cosmical clouds," he remarks, "unoubtedly appear in the universe, but only of such density that in most cases they possess sufficient coherence to withstand the destructive operation of the sun's attraction, not only to the boundaries of our solar system, but even within it. Such cosmical clouds will always appear to us as comets when they pass near enough to the earth to become visible. Approaching the sun, the comet undergoes great physical changes, which finally affect the stability of its structure: it can no longer hold together: parts of it take independent orbits around the sun, having great resemblance to the orbit of the parent comet. With periodical comets, this process is repeated at each successive approach to the sun. Gradually the products of disintegration are distributed along the comet's orbit, and if the earth's orbit cuts this, the phenomenon of shooting-stars is produced."

These views of the distinguished astronomer of Vienna are confirmed by the star-shower of November 27, 1872. That the orbits of the earth and Biela's comet intersect at the point passed by the former about the last of

November, and that in 1845 the comet separated into two visible parts, has been stated in a previous number. The comet's non-appearance in December, 1865, and in September, 1872, was regarded by astronomers as presumptive evidence of its progressive dissolution. A meteoric shower, resulting from the earth's collision with the cometary *débris*, was accordingly expected about the 27th of November.

The first indication of the approaching display appeared on the evening of November 24th, when meteors in unusual numbers were observed by Professor Newton, at New Haven, Connecticut. On Wednesday evening, the 27th, from the close of twilight till 8 o'clock, a decided shower of shooting-stars was noticed in various parts of the United States. At Greencastle, Indiana, Professor Joseph Tingley counted 110 meteors in 40 minutes, and at Princeton, in the same State, D. Eckley Hunter counted 70 in 30 minutes. The numbers seen at New Haven were considerably greater. The fact that the display commenced before daylight had entirely closed seemed to indicate that only the termination of the shower had been observed in this country. Accordingly the display was soon found to have been witnessed from 60° E. to 90° W. of Greenwich, or through 150° of longitude. In England the first bolide of the swarm was seen by M. M. Brinkley, at 3 o'clock, p. m., in full daylight. The meteors were most numerous in the southern part of the continent, particularly in Italy. At the Observatory of Breslau, according to M. Faye, 3000 were seen from 6h. 30m. to 7h. 50m. Dr. Heis reported that at Münster 2500 per hour were counted by two observers. At Naples, Signor Gaspari observed two meteors per second. At Turin, M. Denza, Director of the Observatory, reported 33,400 in 6h. 30m.; many of various and delicate colors, and followed by long and brilliant trains. At some points the numbers were so great that an accurate enumeration was wholly impossible. In short, the display was decidedly the most brilliant that has occurred since that of November 13, 1833.

But some of the most interesting circumstances in connection with the phenomena of November 27, 1872, remain to be detailed. Astronomers without exception regarded the display as due to the earth's passage through the *débris* following in the path of Biela's comet. In accordance with this view Dr. Klinkerfues, of Gottingen, concluded that the comet itself, or rather its largest portion, ought to be found in the region of the heavens nearly opposite to that from which the meteoroids appeared to radiate. As this point in the southern hemisphere could not be observed in Europe, he conceived the happy idea of detecting the fugitive *by means of the electric telegraph*. The following was accordingly dispatched to Mr. Pogson, Director of the Government Observatory at Madras, in Southern India: "*Biela touched earth on 27th: search*

*near Theta Centauri.*" The first two mornings after the receipt of this dispatch were cloudy at Madras. On the third, however, the cometary fragment was found, and its motion accurately measured. The observer described it as circular and rather bright, with no traces of a tail. But one fragment could be detected. On the next morning, December 3d, the comet was again observed. Its diameter had sensibly increased; it had a bright nucleus, and still presented a circular aspect. A faint tail was also noticed, equal in length to one-fourth of the moon's apparent diameter. The following mornings being again cloudy, no further observations could be obtained. This cometary mass will be in close proximity to the earth about the last of November, 1892. Another brilliant meteoric shower may therefore be expected at that epoch.

### THE ORIGIN OF COMETS AND METEORS.

The fact that comets and meteors, or at least a large proportion of such bodies, have entered the solar system from stellar space, is now admitted by all astronomers. The question, however, in regard to the origin and nature of these cosmical clouds still remains undecided. The theory that they consist of matter expelled with great velocity from the fixed stars appears to harmonize the greatest number of facts, and is accordingly entitled to respectful consideration. The evidence by which it is sustained may be briefly stated as follows:

1. The observations of Zollner, Respighi, and others, have indicated the operation of stupendous eruptive forces beneath the solar surface. The rose-colored prominences, which Janssen and Lockyer have shown to be masses of incandescent hydrogen, are regarded by Professor Respighi as phenomena of eruption. "They are the seat of movements of which no terrestrial phenomenon can afford any idea; masses of matter, the volume of which is many hundred times greater than that of the earth, completely changing their position and form in the space of a few minutes." The nature of this eruptive force is not understood. We may assume, however, that it was in active operation long before the sun had contracted to its present dimensions.

2. With an initial velocity of projection equal to 380 miles per second, the matter thrown off from the sun would be carried beyond the limits of the solar system, never to return. With velocities somewhat less, it would be transported to distances corresponding to those of the aphelia of the periodic comets.

3. On the 7th of September, 1871, Professor Young, of Dartmouth College, witnessed an extraordinary explosion on the sun's surface. The observer, with his telescope, followed the expelled matter to an elevation of over 200,000 miles. The mean velocity between the altitudes of 100,000 and 200,000 miles was 166

miles per second. This rate of motion *in vacuo* would indicate an initial velocity of about 260 miles per second. But the sun is surrounded by an extensive atmosphere, whose resistance must have greatly retarded the velocity of the outrush before reaching the height of 100,000 miles. The original velocity of these hydrogen clouds was therefore sufficient, in all probability, to have carried them, if unresisted, beyond the solar domain. Solid or dense matter propelled with equal force would doubtless have been driven off never to return.

4. This eruptive force, whatever be its nature, is probably common to the sun and the so-called fixed stars. If so, the dispersed fragments of ejected matter ought to be found in the spaces intervening between sidereal systems. Accordingly, the phenomena of comets and meteors have demonstrated the existence of such matter, widely diffused, in the portions of space through which the solar system is moving.

5. According to Mr. Sorby the microscopic structure of the aerolites he has examined points evidently to the fact that they have been at one time in a state of fusion from intense heat,—a fact in striking harmony with this theory of their origin.

6. The velocity with which some meteoric bodies have entered the atmosphere has been greater than that which would have been acquired by simply falling toward the sun from any distance, however great. On the theory of their sidereal origin, this excess of velocity has been dependent on the primitive force of expulsion. The shower of aerolites which fell at Pultusk, Poland, on the 30th of January, 1868, is not only a remarkable illustration of the fact here stated, but also of another which may be accounted for by the same theory, viz: that meteoric bodies sometimes enter the solar system in groups or clusters.

7. A striking argument in favor of this theory may be derived from the researches of the late Professor Graham, considered in connection with those of Dr. Huggins and other eminent spectroscopists. Professor Graham found large quantities of hydrogen confined in the pores or cavities of certain meteoric masses. Now, the spectroscope has shown that the sun's rose-colored prominences consist of immense volumes of incandescient hydrogen; that the same element exists in great abundance in many of the fixed stars, and even in certain nebulae; and that the star in the Northern Crown, whose sudden outburst in 1866 so astonished the scientific world, afforded decided indications of its presence.

#### A Memoir of Richard Samble,

A minister of the Gospel in the Society of Friends, who was taken sick at Poole, in Dorsetshire, about the First month, 1680, where he wrote an epistle to Friends in Cornwall, to comfort them in relation to his departure, being likely, as he said, to see their faces no more.

#### To Friends in Cornwall.

Dear Friends,—I send this salutation as though it were my last unto you; wherein I take my leave of you in the Lord Jesus Christ, desiring you all may obey the Truth, and live and die in it. And the many sweet and heavenly opportunities which my soul hath had with you, are fresh in my remembrance. And now, dear hearts, my body grows very

weak; but my soul is strong in the Lord, who hath greatly renewed the lasting seal of his love unto my soul this morning. Oh! how could I sleep when my heart was so awakened unto the blessed sense of my acquaintance with the Lord, which sounded through my soul, that my name should not be blotted out of the book of life, and of the holy city, the heavenly Jerusalem, whose foundation is full of precious stones, and the river of the water of life flows; where the gates are not shut all day, neither is any night there: which, when my soul heard, my heart was dissolved and broken within me, and my head was as it were turned into water, and mine eyes gushed out with tears, in the consideration of the endless love of God, to such a poor creature as me.

Now, dear Friends, who are truly near me in the Lord, you know the time of our first knowledge and acquaintance, which was a time of love, and to this day my heart is filled with the same towards you; though I am like, as to the outward, to see your faces no more. Oh Friends! be not ensnared nor entangled with the things of this world, nor let your minds go out of Truth, and so lose the everlasting stay and support of your souls in the last day; but rather let all go, and hold fast the Truth, and keep your hearts from being overrun with the world's spirit; and so will the Spirit of Truth spring up in you, as a well to refresh your souls. And all you whose hearts are truly tendered to the Lord, whose trials and exercises are not a few, be not daunted nor discouraged, although the enemy may seek to frighten you with many temptations, and would seek to lead you out of the fellowship with, or sweet remembrance of, your dying day, which exercise my soul has sometimes passed under. But blessed be the Lord forever, the enemy is found a liar; for the Lord has been pleased to make this sick bed to me better than a king's palace; and I have great fellowship with my last day; and do rejoice in the Lord, who doth so sweetly visit me with the glorious light of his countenance. It is with me, as it is with one who has travelled many weary journeys, and at last is come to the sight of his desired end; which, when he sees, greatly rejoices, in a sense of a further satisfaction which he shall after enjoy; even so it is with me, who have passed no opportunity, where-I saw the way of life clear and open before me, but have been ready night and day to do the will, and answer the requirings of the Lord; and so running, as in a race, knowing my time, that it is but short. And blessed be the Lord, I have great peace and satisfaction in this my weak and low condition; and satisfied, seeing my lot was not at this time among you, that it is here in this place; and I hope it will be well, whether I live or die. And so my dear and well beloved friends, dwell in love one with another, walking in the unspotted life, so shall you grow up as pleasant plants in the garden of the Lord, and the dew of life will more and more descend upon you, and this you will feel from day to day; and when you shall come to your latter end, your reward will be sure with the Lord. I have much in my heart towards you, but my strength fails me; only this I desire of you, seeing I am like to leave my wife and tender babes with you, whom I know not whether I shall see more, great is my love and tender respect to them, for we have lived from the beginning as two joined together by the Lord, who gave us victory

over the world; believing that when I am gone, the care of my God will be over them, and I have been a tender father to them, and they have been to me tender children, and my wife hath been to me, as bone of my bone and flesh of my flesh, yet I must leave her and them unto the Lord.

And this I would leave with you, my dear brethren and sisters, who have known me from the beginning, that you esteem of him when I am gone, as one who was wife to her that was made willing in his day, to spend and be spent for God's truth, and his church's sake; and I desire you in the Lord Jesus Christ that my dear wife may meet with no discouragements from you; she is a tender woman; and that you will be encouragers of her. I know when this comes to your hands, there will be no want of sorrow; but I trust in my God that both my dear wife and you will be endowed with the power and presence of the Lord, that if you should hear of my going hence, that you will conclude, as becomes true Christians, that you must come to me, although that I cannot come to you. And so my dear friends, in the opening free love of God, which this morning my soul is visited withal, I do dearly salute you, desiring the Lord may send you a husband to my dear wife, and a father to my children, and you friends to both.

And whereas I have never been wanting in my labor and service for the glory of the Lord, and your good, when with you; and if the Lord yet lengthen my days, I trust I shall be as ready and as willing as ever I have been.

So conclude in a sweet and living sense of that love, which will never die. Your friend and brother in the immortal seed of life,

RICHARD SAMBLE

Poole, the 1st of the First month, 1680.

#### Scientific Notes.

*On the bursting of trees and objects struck by lightning.*—At a recent meeting of the Manchester (England) Literary and Philosophical Society, a paper on this subject was read by Professor Osborne Reynolds. To test the correctness of the suggestion, that the explosive effects of lightning were due to the conversion of moisture into steam, he passed the electric spark through thin slips of wood, previously moistened, so as to bring them into nearly the same condition as the wood in living trees. These experiments sometimes succeeded, and at others not. He then substituted open glass tubes, introducing a wire into each end, and bringing the wires so near each other as to leave about half an inch between the points. The bore of the tube was about one-eighth of an inch in diameter, and its strength was sufficiently great to bear a pressure of from ten to five tons per square inch. When the tube was dry, no effect was produced by passing the electric discharge through it; but when water was introduced, the first discharge shattered the glass. The part opposite the opening in the wire and for some distance beyond was completely broken into fragments which presented the appearance of having been crushed by a hammer. Some of the fragments showed that the inner surface had been reduced to powder. When we consider the great strength of this pipe (which might have been used as a gun without bursting) and when we see that it was not only burst, but that the interior of the glass was internally crushed by the pressure, and all this by the discharge of one's

er, we must cease to wonder at the bursting power of a discharge from the clouds.

Among the curiosities exhibited at a recent exhibition of watchworks, were a thin silver spence with a hole drilled through from edge to edge, and a seconds-hand, as thin as paper, and as fine as lace.

**Leeches.**—The extensive trade in leeches is given rise to a considerable industry, which, however, in many cases, has been associated with certain cruel practices that are to be condemned. Thus, with the view of fattening the leeches it has not been uncommon to turn some old and useless horses into the marshes; where the unhappy animals frequently fall dead from the loss of blood they are thus subjected to. If the victim escapes, he is ill-persuaded to a second experience, and the trader will then tie him to a post, and cover his limbs with cloths in which he puts 100 to 500 leeches; these, once satisfied, return to the marshes. Various methods have been proposed for attaining the same end by different means. The following mode of treating leeches, lately described by Dr. Snavé in the *Moniteur Universel*, may not be uninteresting. A considerable number of leeches are taken from the marsh; the marketable ones are picked out; the others, requiring to be gorged, are placed in woollen or cotton bags (the small and large in separate bags;) and these bags are put in cans containing blood fresh from the slaughterhouse. The temperature of the blood is preserved by means of hot water in the double bottoms of the cans. This warm blood, non-defibrinated, is much superior to that which has lost its heat and its brin. The leeches are left thus for half an hour: then the bags are removed, and the animals, after being washed, are returned to the marsh. It is important that, in their gorged state, they should be placed at the borders of pools, on islets, &c., in order that they may penetrate into the ground if they wish (which is generally the case.) They are thus spared the fatigue which is always great when they are gorged, of swimming to solid parts. Care should also be taken not to put too many leeches in one bag; otherwise some may not be able to reach the circumference, and then they make use of their more fortunate companions, biting and gorging themselves upon these. When the large and the small are put in the same bag, this also occurs.

In a communication recently presented to the Paris Academy, on the diamond-bearing fields of S. Africa, it is said that the diamond is liable to burst on contact with the air, and this will happen even after three months of exposure. The best way of preventing it, is to cover the stone with grease immediately after the discovery.

**Gas-flame.**—In ordinary gas-burners, the light giving power of the gas is more or less lost because the inner part of the flame is not hot enough to burn all the carbon. A recent Belgian patent seeks to remedy this by placing a small piece of platinum between the two poles of an ordinary fish-tail burner. The platinum is heated in the flame, and causes a more complete combustion of the gas. It is said to double the amount of light.

**Tobacco.**—In the pages of the "English Leechian," from which most of the material of these "Scientific Notes" is derived, there has been going on for some time an animated discussion on the use of tobacco. A single number will sometimes contain several com-

munications from different correspondents; and the weight of testimony is decidedly opposed to the practice. A recent writer describes the case of a man, who, in getting off an omnibus, struck his knee against a piece of iron and was disabled. Under medical advice, the stiffness left the joint, but he was unable to use the limb. Everything was right, nothing was out of place, nothing was wanting but strength in the muscles of the limb. These refused to keep the bones to their proper places with sufficient tension. "It will be the work of time," said one of the most skilful who had examined the knee, but, alas, time did not seem to make any sensible change. What could be wrong with these refractory tendons? We looked at the back of the man's hand. The veins were larger than they ought to be. "Do you use tobacco?" "Yes, sir, a little." "Ah, sir, he's a heavy smoker," said his wife, who was sitting, looking on. "Oh, well, I don't take a very great deal." "You know," said she, "you smoke when you're not sleeping." How could any one cure that man? He was using a drug whose result is to relax muscle, and he was using that drug sufficiently to defy all other medicines to counteract its relaxing power.

For "The Friend."

#### Memoirs and Letters of Sarah Hillman.

(Continued from page 173.)

"1827, 9th mo. 9th. This is my 33rd birthday. Ah! how far short I am of having attained the ground which faithfulness from early visitation until this, would have insured, that of confidence and strong faith in my adorable, invincible Redeemer. Where am I now? Struggling with many weaknesses and fears; trembling and doubting whether the day of deliverance will ever come. May He, who called out of darkness, and, in my first setting out, granted mercy to be faithful in small things, grant holy certainty in whatsoever step I may yet take; that so preservation may be realized, holy confidence felt to bear up and support under the trials attendant on all those who move in this awfully dark and cloudy day. Oh! the Lord knoweth them that are His. The foundation remaineth sure, though thousands forsake it. He, who blessed the house of Obededom so long as the ark tarried there, will bless all who continue steadfast unto Him, even though they may have to endure great sufferings and many tribulations, and have, as it were, to go down into the valley and shadow of death. Yes, I believe he will bring them up again with songs of joy, as in days of old, and in former years."

The following are extracts from a letter, without address, dated Philadelphia, 10th mo. 30th, 1827: "Al! my dear friend, though the path of the servant in this day of rebuke is, as it were, through the fire and through the deeps, yet inasmuch as the Lord remains to be the strength of the poor, let us not faint, nor grow weary of the burdens which He may lay upon us. Has He not this day granted a little renewal of evidence, that the glory is not wholly departed, &c.? And will he not take care of his own? Yea, verily: then let us cast all our care upon Him, who careth for us; who, though our transgressions have been multiplied, still watcheth over us, and still reneweth his visitations to our souls; causing us to partake of the banquet which he spread for his chosen people."

"Thou speakest of going upon the walls

and beholding the ruins! And hast thou not also beheld in the chambers of imagery, the many idols which have been framed? Ah! the day calls for all who are skilful in lamentation to mourning, because the virgin daughter of the Lord's people hath committed a very grievous sin."

\* \* \* "It has seemed to me this day that the Lord would have some separated for himself. As respects poor me, while the unity of the brethren is felt to be a precious cement, without which I pray to be preserved from acting in the Lord's work, nevertheless that my attention must be steadily directed unto Him for counsel and strength is legibly written on the tablet of my heart."

"I desire for thee as for myself, that we may be kept in the hollow of His holy hand who hath purposed a purpose concerning us, until His time is clearly manifested to go forth. For though it is with me as I admitted to thee, I dare not now speak in His name, except His word again be given, 'Go in this thy might: and then, that no consideration may prevent obedience, is the tearful prayer of thy tribulated sister. I unite with thee in desiring that the dross and tin may be removed, that so thou may come forth a vessel for the Finer. And also crave that the Lord may bless thee, and have thee always in his keeping. That living daily under the influence of his blessed, holy Spirit, thou mayest be qualified to feel with, and enter into the states of others; and also truthfully to communicate to thy feeble friend such tidings as may be given thee respecting her."

"In looking at our meeting, it seems to me as though there was no one to whom I dare look as to a mother willing to bend to the wants of an infant. But my heart this day rejoices in believing that our blessed Lord and Saviour, and Advocate with the Father, is grieved in all our afflictions, and compassionates our case: and that He will cover our heads in the day of battle; for precious are our souls in his sight. He will arise for our help, for He is the saving strength of his children; and they that trust in him shall never be confounded."

The diary resumed. Without date: "Years of sore tribulation have been passed since the above remarks were penned. Many and deep baptisms have been witnessed under the awful work of preparation for the ministerial office. Which prospect has of late ripened so far, that I dare no longer forbear.

3rd mo. 9th, 1830. Set out in company with our beloved friends, George and Ann Jones, to attend Haddonfield Quarterly Meeting, and some meetings in Burlington Quarter. A season of humbling baptism! But in which, through adorable mercy, I was enabled to yield to an apprehension of duty to open my mouth, in the name of the I Am, in a meeting held at Westfield on First-day, the 28th, in these words: 'The Lord is good; a strong hold in the day of trouble; and He knoweth them that trust in Him.' Oh! I believe some of my beloved friends in this little company have been brought to this acknowledgment, that He is a strong hold in the day of trouble; and that unless the Lord had been your help, you could not have been supported in this time of trial. Went home awfully bowed in humility; but, in unutterable mercy, favored with peace; which is more desirable than all on earth beside.

At the next meeting, Moorestown, bowed

again: and at the next, Evesham, also. Since being at home, while fearing at every step, I have several times dared to do no other, both for my own soul's sake, and for the sake of my dear Redeemer, who laid down his precious life for me, than resign myself to this work, and in simplicity utter a few broken expressions in our meetings. O! I craved to be found faithful: being humbly convinced from season to season, that my great Lord and Master does design to make use of me as an instrument in His holy hand for the promotion of His glorious cause; in whose service I desire to spend the few remaining days of my pilgrimage. While much do I lament the years that have passed, wherein had I yielded in unquestioning obedience, I might have been pursuing the things which make for peace and, working in the ability He furnishes, have been more prepared for an admission into his kingdom of undefiled rest."

"'Mine hour,' said the Saviour to his mother, 'is not yet come.' And we may remember that He also testified to His disciples just before his ascension, 'Behold I send the promise of my Father upon you: but tarry ye at the city of Jerusalem, until ye be endued with power from on high.' This His 'hour,' and this His 'power from on high,' are to be waited for, and watched unto in all our religious steps, 'as the eyes of servants look unto the hand of their masters, and as the eyes of a maiden unto the hand of her mistress,' that the extremes of dilatoriness on the one hand, and precipitancy on the other, may not be laid in the scale against us; and that we may in all things be the obedient followers of Him, who died for us, and is calling to glory and virtue."

Sarah Hillman could no doubt at this time truly say, "I delight in the law of God after the inward man." And in a letter to her mother, published in the preceding number of "The Friend," she has given expression to the "desire to keep hidden so long as the blessed Jesus may permit." This hidden, and at the same time, humble, watchful state, is doubtless favorable to preservation, especially in the early years of religious experience; a period when perhaps, more than any other, the enemy of our soul's welfare strategically labors to root out the precious life—the substance and reality of religion—the good seed of the kingdom within us. Her course herein seems also to be after the example of Moses before he was called to be a leader of the children of Israel out of their captivity, who, it is written, "led the flocks (he kept) to the back side of the desert, and came to the mountain of God, even to Horeb." And it was here that "the angel of the Lord appeared unto him in a flame of fire out of the midst of a bush," &c. It was in the wilderness, likewise, while keeping his father's sheep, that David "slew both the lion and the bear;" and here, learning to repose confidence and strength in the God of Israel—the alone unfailing source—he knew where to look and trust for the same sufficiency of help and power when girding on the simple equipments with which the defiant Goliath of Gath, was forever laid low, and the carcasses of the host of the Philistines given unto the fowls of the air, and to the wild beasts of the earth.

After a long, hidden and humbling exercise, with the feeling, as she represents, like to a pelican of the wilderness, and with tearful prayers that obedience might keep pace with

knowledge, our Diarist's hands were now loosed; her captive spirit more set free; and she anointed to enter upon what seems the calling in life assigned,—the responsible and solemn, yet dignified and God-serving work of the ministry. So that the acknowledgment of David, at a later period of his course than the one already referred to, might be hers: "O Lord, I am thy servant, the (child) of thy handmaid; thou hast loosed my bonds."

(To be continued.)

### THE PRAYER OF AGASSIZ.

BY JOHN G. WHITTIER.

On the isle of Penikese,  
Ringed about by sapphire seas,  
Fanned by breezes salt and cool,  
Stood the Master with his school.  
Over sails that not in vain  
Woody the west wind's steady strain,  
Line of coast that low and far  
Stretched its undulating bar,  
Wings aslant along the rim  
Of the waves they stooped to skim,  
Rock and isle and glistening bay,  
Fell the beautiful white day.

Said the Master to the youth:  
"We have come in search of truth,  
Trying with uncertain key  
Door by door of mystery;  
We are reaching, through His laws,  
To the garment-hem of Cause,  
Him, the endless, unbegun,  
The Unnameable, the One,  
Light of all our light the Source,  
Life of life, and Force of force.  
As with fingers of the blind  
We are groping here to find  
What the hieroglyphics mean  
Of the Unseen in the seen,  
What the Thought which underlies  
Nature's masking and disguise,  
What it is that hides beneath  
Blight and bloom and birth and death,  
By past efforts unavailing,  
Doubt and error, loss and failing,  
Of our weakness made aware,  
On the threshold of our task  
Let us light and guidance ask,  
Let us pause in silent prayer!"

Then the Master in his place  
Bowed his head a little space,  
And the leaves by soft airs stirred,  
Lapse of wave and cry of bird  
Left the solemn hush unbroken,  
Of that wordless prayer unspoken,  
While its wish, on earth unsaid,  
Rose to heaven interpreted.  
As, in life's best hours, we hear  
By the spirit's finer ear  
His low voice within us, thus  
The All-Father heareth us;  
And His holy ear we pain  
With our noisy words and vain.  
Not for Him our violence  
Storming at the gates of sense,  
His the primal language, His,  
The eternal silences!

Even the careless heart was moved,  
And the doubting gave assent,  
With a gesture reverent,  
To the Master well-beloved.  
As thin mists are glorified  
By the light they cannot hide,  
All who gazed upon him saw,  
Through its veil of tender awe,  
How his face was still uplift  
By the old sweet look of it,  
Hopeful, trustful, full of cheer,  
And the love that casts out fear.  
Who the secret may declare  
Of that brief, unuttered prayer?  
Did the shade before him come,  
Of th' inevitable doom,  
Of the end of earth so near,  
And Eternity's new year?

In the lap of sheltering seas  
Rests the isle of Penikese;  
But the lord of the domain  
Comes not to his own again;  
Where the eyes that follow fail,  
On a vaster sea his sail  
Drifts beyond our beck and hail!  
Other lips within its bound  
Shall the laws of life expound;  
Other eyes from rock and shell  
Read the world's old riddles well;  
But when breezes light and bland  
Blow from Summer's blossomed land,  
When the air is glad with wings  
And the blithe song-sparrow sings,  
Many an eye with his still face  
Shall the living ones displace,  
Many an ear the word shall seek  
He alone could fitly speak.  
And one name forevermore  
Shall be uttered o'er and o'er  
By the waves that kiss the shore,  
By the curlew's whistle sent  
Down the cool, sea-scented air;  
In all voices known to her  
Nature own her worshipper,  
Half in triumph, half lament.  
Thither Love shall fearful turn,  
Friendship pause uncoiled there,  
And the wisest reverence learn  
From the Master's silent prayer.

—The Christian Union.

### Sir David Brewster.

This distinguished philosopher spent a long life in the pursuit of science, making many original discoveries; especially in optics, his favorite study. He died at the advanced age of 86, retaining to the last his interest in philosophical researches, and manifesting in his closing days the supporting power of Christian faith—thus illustrating the language of the poet:—

"Piety hath found,  
Friends in the friends of science, and true prayer  
Has flowed from lips, wet with Castalian dews."

In an account of his home life, published by one of his daughters, a year or two after his decease, there is given an interesting description of the calm composure with which he noted the gradual weakening of his physical powers, and the approach of death. His life has been one of much intellectual exertion. In addition to the enormous amount of labor involved in editing and writing many of the articles for the Edinburgh Encyclopedia; and a faithful attention to the duties of different official appointments, his scientific and literary contributions to philosophic and other periodicals were very numerous. His daughter has appended a list of 315 of these, besides another list of 75 articles sent to the "North British Review."

The last chapter of the work alluded to thus commences:

"And now we come to the last days of the long working life. My father's own expression a little later was, that he 'was an inch nearer the end every day since Dundee,' but when we were with him in October the change was scarcely perceptible. He drove every day, and occupied himself in showing the near beauties of the neighborhood to our little son and his tutor, and arranging the more distant excursions. When we left him it was not with more than the natural fear of what might happen during the winter. To those who knew his old fearfulness and timidity—which grace had not up to this time fully taken away—and who saw the great vitality and joy of work which still remained, it seemed impossible to look forward to the inevitably near approach of the King of Ter-

ors without some uneasiness as to how he as to be encountered. But to those who us feared, it might have been said, 'Why re ye troubled? O ye of little faith!' The thoroughness of the change that had passed pon him was yet to be triumphantly shown, nd all the fears entertained for him were to anish away as the mists of the morning. We do not know much of what during the ext few weeks was passing in his mind, but is prayers were still for the increase of faith nd love, and both were marvellously answered."

"He still continued able to work and to love about, and was not under medical attendance—for his own doctor being absent, e refused till even nearer the end to see any ne, and then only consented to have a medical man from a country town at some distance. But the consciousness of the last weakness being close at hand increased upon im, and the week before he was finally laid p was spent in a literal setting of his house a order, which was most characteristic of his hole past life. Lady Brewster tells me that ach day of that long week was spent as if i the most active preparation for a journey. etters were written—or dictated to his faithful companion, and signed by himself; papers rrranged; books put by, and after each piece f business he would say, 'There THAT's one; then something else was begun and nished—not a moment wasted—no pause required—not a word of what was at hand, lest ither worker should break down—a strange week of patient, unwearied, accomplished work!

One of these letters was to an old and attached friend, of whose unwearied kindness nd affectionate attentions he ever expressed e most grateful recognition. It was as ollows:—

"Allerly, Feb. 2, 1868.

'My Dear Lady Coxe:—I have for several ays been proposing to write to you, but hav- ing nothing agreeable to myself to say, and othing agreeable to you to hear, I have been lent.

'I am hardly able to walk from my library o my bed room, and want of breath, sleep, nd appetite make me a genuine invalid, quite nable to do the duties in the University were in Edinburgh. I regret this bitterly, as here is so much valuable work now being one in promoting the prosperity of the Uni- versity. My complaint has been advancing o rapidly as to indicate a no very distant ermination, and after such a long and happy fe as I have enjoyed, I do not repine that a igher will than mine should be done. But ill, though faith be strong, and the pros- ects of the future bright, it is difficult with- out emotion to part with those kind and valued iends who have performed with us the jour- ey of life, and shared with us its joys and s sorrows.

'I need not say, my dear Lady Coxe, how uch of my happiness has arisen from your ind and affectionate attention, and how sin- erely I wish that your life may be as long nd as full of blessings as mine has been. With our united kind regards to Sir James nd Dr. Cumming, I am, my dear Lady Coxe, ver most truly yours,

D. BREWSTER.'

One little piece of business was the arrang- ing that a copy of each of his works should

be set apart for an "author's table" at a bazaar, the proceeds of which were to help in establishing a Medical Mission in Aberdeen. On Friday, his loving, careful wife implored him to remain in bed; but no!—"Let me rise once more," he said; "I have still a little work to do." On that day he dictated a farewell letter to Professor Balfour, and to the members of the Royal Society of Edinburgh. It was as follows:—

"Allerly, Feb. 8th.

'My dear Professor Balfour:—I have tried in vain to finish the most important of my papers on Liquid Films, but the most beautiful drawings of all the phenomena, which its purpose was to describe, have been finished, I think therefore that my friend Mr. Deas will, by means of these drawings, produce an interesting paper. The drawings are numerous, but many of them may be reduced by cutting off the long tails of the glass vessels, or otherwise. . . . I beg you will offer to the Council my best thanks, and accept of them to yourself, for all the kindness that I have received from you since I became President of the Society.

'I had expected to do the work of this session, but my indisposition advanced so rapidly that I found myself unfit for the smallest exertion, mental or physical. At my great age, and with a strong faith the change is not unwelcome. I am, ever most truly yours,

D. BREWSTER.'

In the course of that afternoon he saw the Rev. Mr. Cousin, his own pastor, who has recorded the visit as follows:—

'The last day he was able to be in his study—three days before he died—it was my privilege to see and converse with him. He knew that he was dying. 'My race is run,' he said; and there was something almost of the old scientific habit of thought in what he added—'From the palpable failure of strength from one day to another, I feel as if I could count the very day when all must close.' Usually he was very reserved in speaking of himself, but on this occasion his mouth was opened and his heart enlarged. He spoke with deep feeling and tenderness of the happiness he had enjoyed in life. 'Never man,' he said, 'had more cause for thankfulness than I, but with all that,' he added, 'now that I can be of no use to myself or any one else, I have no wish to linger here.' He expressed the most perfect acquiescence in the Divine will, and the most perfect peace in reliance upon Jesus in the prospect of standing very soon in the Divine presence; 'and yet,' he added, with something like a falter in his voice, 'it is not without a wrench that one parts with all he has most loved on earth.'

That night the work was all over, but the usual evening occupations still remained, which I cannot forbear describing as it was given to me by the third of the little group:—

'On Friday the 7th February, dearest papa's last night in his library, Connie read to him as usual after his dinner, before going to bed, the 27th Psalm and 6th Hebrews, singing a hymn to him, as she always did, 'There is a happy land.' Previous to the reading they had two games of dominoes together. This allowance of reading, singing, and games never varied, but seeing him look tired, and knowing how poorly he was feeling, I first advised only *one* game, and then only *one* chapter, but his reply each time was, 'No,

we must do all just as usual; it may be the last time.'

The fond quiet kiss and good night over, nothing else remained, and as he left his study he said quietly, 'Now you may turn the key, for I shall never be in that room again.' When he undressed, he said, 'Take away my clothes, this is the last time I shall wear them;' and when he lay down—"I shall never again rise from this bed."

(To be concluded.)

For "The Friend."

### The Late Conference of Friends in London.

The subjects which claimed the attention of this body must deeply interest the members of the Society everywhere. The relative decline in our numbers as compared with other religious Societies, and in view of the great natural increase of the population of the civilized world; the small attendance at our subordinate meetings for discipline, and the still fewer numbers who are qualified to take part actively in their business; the instruction in our religious principles, and the Christian care afforded to the young and inexperienced, and the admonition and encouragement bestowed in the families of the indifferent or afflicted, come home to us in Philadelphia Yearly Meeting with as much force as they affect the members in England. No one who values the doctrines and distinguishing views of Fox, Barclay, Penn, and Penington, can be indifferent to the fact, so patent both in Great Britain and most parts of the United States, that those who faithfully uphold them before the world are few in number, and growing less every decade. By an examination of the census statistics of the United States for the years 1850, 1860 and 1870, we find that the number of members of the Society of Friends in the whole country is given at 286,323, 269,084 and 224,664 for those years respectively; thus indicating a loss of nearly 62,000 members in twenty years, whilst every other religious denomination in the United States has increased in the same period, excepting only the Moravians and Universalists. If we believe that the principles of the Society are profitable for us, and are really the doctrines of Christ and the primitive Christians, we cannot but feel that they would be equally valuable to the world at large if cordially embraced and practised; and in proportion as we are brought under the benign influences of Him who gave his life for the redemption of mankind, we shall be incited to desire the like precious faith for others. The distinction between other protestant sects is so slight, that it may well be but an indifferent matter to them whether a brother adheres to the Presbyterian or Episcopal form; worships in a Methodist chapel, or a Baptist Meeting House. They all think a man may pray or preach whenever he finds an opportunity, so that he has human ordination to start with. They all use elementary baptism, and partake of outward bread and wine as essential means to the spiritual enjoyment of inward purification and communion. None of them suppose worship can be duly performed without the agency of an officiating minister or sensible sounds; and all uphold war and oaths as justifiable for Christians.

But Friends, rejecting all these as errors engrafted by human tradition or weakness on the true faith and practice enunciated by the author of Christianity himself, must, if they

are loyal to their own principles, seek earnestly to lead other Christian professors to the purer and more spiritual plane they stand upon. And just here it seems important to allude to an error that we think many honest advocates of our distinctive views fall into. Feeling the desirability of drawing all into so good a way, they unconsciously almost, lower the standard of Truth in order to render it more popular; they would widen the gate of admission to accommodate the weaknesses of the multitude, and thus go counter to the Captain and Leader of his people, who is himself the *only* way to life, and who solemnly declared that this way was narrow and the entrance into His fold strait.

If numbers are admitted at all as a test of the value of a religious profession, we should be obliged to defer to the disciples of Confucius and Buddha, seeing they far outnumber all the Christians in the world, whilst the professors of the Mahomedan faith and the pure pagans are counted by millions. The Roman Catholics estimate their members at 160 millions throughout the world. The Methodists of the United States numbered over six millions in 1870. How important is it then, in any view of the status of our religious Society, that we form a just estimate of the value of its principles, and not be led away from that fundamental element by the more superficial, but very natural contemplation of its unpopularity.

We apprehend this uneasiness as to the increase or paucity of numbers has greatly contributed to the defection in principle and practice which has become so obvious among Friends in England and elsewhere. It has been leading them on step by step away from true Quakerism, to accommodate themselves to others, until blindness has happened in part to many, whose anxiety to see an extension of the limits of the Society has outrun their better judgment, and earlier convictions of duty. This error is manifest in the remarks of several delegates to the conference. What are we to infer from the expressions of Jona. Grubb, (a minister), but that he considered Friends' disuse of the bread and wine as a loss, when he says, "they (Friends) had withdrawn from what were termed the sacraments; and in so doing they had in some degree *lost* opportunities of edification for their younger Friends. In laying aside the outward emblems, they had also laid aside the opportunities for commemorating the dying love of the Redeemer. Some of their younger Friends had in other places partaken of the elements, and notwithstanding the outward means, *they had obtained help*, and perhaps been so led away from meeting."—"Robert Bevan thought it would be right to read the Scriptures in meetings for worship, though he thought their high standard of the spirituality of worship ought to be maintained. The way of bringing children up to that spirituality was to let them hear the Scriptures read at the beginning of the meetings for worship. He should not feel easy as a father of a family if his children had to attend a meeting wholly held in silence."

It seems evident that both the speakers last quoted lack faith in two of the cardinal doctrines of the Society of Friends. One of them being the spiritual nature of the communion of the body and blood of Christ, without reference to any outward form, and the latter to the actual headship and teach-

ing of Christ in His church. Of what benefit would it be to draw multitudes into an outward bond of association with the Society, if we must let slip the very articles of faith that first drew its members together?

This end can be more readily attained by allying ourselves at once to some such well organized and popular sect as the Methodists or Baptists. They doubtless have their place in the church universal, and are instrumental in much that is good. But the Society of Friends has a peculiar charge to keep, in pointing upward and onward to higher degrees of spiritual truth and practice than any other Christian denomination has yet been willing to adopt; and they will be recreant to that sacred trust, they must fail to realize the grandeur of their mission, if they turn back to the weak and beggarly elements in order to court popularity, or gain numbers.

This truth is well stated by Samuel Fox, (a Friend who could not attend the Conference, but wrote a letter on its objects, which was read there), where he says; "Wholly opposed to the natural inclinations of man are the requirements of the Divine law; and any community of Christians insisting on the duty of these being uncompromisingly carried out into practice, must necessarily go directly counter to the current of popular sentiment and action."

(To be concluded.)

For "The Friend."

#### Let Every One Look to his Foundation.

How often the early members of the Society of Friends pointed to, and pleaded for the necessity of becoming Jews inwardly; and for that baptism and circumcision which is "of the heart, in the spirit and not in the letter; whose praise is not of men but of God." While this tends to put out the outward, carnal eye, it at the same time re-anoints the inward and spiritual unto seeing the things that belong to our peace; and whereby, as saith the apostle, "Though our outward man perish, yet the inward man is renewed day by day." If, as written again, "The natural man *cannot* understand the things of the Spirit of God for they are foolishness unto him," &c., how indispensable that we should, before every thing else, be engaged, through obedience to Christ's reproving, saving light, to put on the new man which after God is created in righteousness and true holiness." That not with "the wisdom of this world," which "is foolishness with God," but with the wisdom which is from above, the hidden wisdom, the heavenly wisdom, the wisdom given by the Spirit, the wisdom profitable to direct unto every good word and work, we may, as I. Pennington says, "know the appearance of the Lord" within us, and becoming children, fools, and blind in the eyes of a misjudging world, "sell all apace—if we have not—that we may have wherewith to buy the pearl of unspeakable and eternal value. The following from Isaac Pennington, on "The Way of Life and Death made Manifest, and set before Men," is commended to the careful perusal and consideration of the readers of "The Friend:"

"Now this I have to say to all; *Let every one look to his foundation.* For the Lord can arise again; yea, and will arise again, and shake once more; and then the heavens and the earth, which have not a true foundation, cannot but fall. If the earth be not founded upon and settled in righteousness, its present establishment will not stand. If the heavens

be not founded upon and settled in Truth they will melt and pass away before the fire of the Lord. There is a spirit that mourneth deeply to the Lord, groaning inwardly, and *his ears are open to it, and He will plead the cause* of his seed; and the churches and religions wherein the seed of the serpent can live and flourish, shall wither and come to an end. Dust is already become the serpent's food. The spirit of man in *all his exercises of religion* knoweth not the bread of life; but the dead feed upon the dead, and the dead spirit of man loves to have it so. But this cannot continue; for the Lord hath been at work all this while; and when he brings forth the people which he hath been forming, and their religion, the religion of men will appear what it is; and shame and sorrow will be the portion of all who have pleased themselves therein, and trifled away the day of their visitation.

Be wise now, therefore, O ye wise-ones! be religious, O ye religious-ones! open the eye and ear that have been shut; shut the eye and ear that have been open: stumble no longer, lest ye fall and rise no more. I know ye cannot see; for the wrong eye is open, and the Lord hath designed to hide his wisdom from that eye. If it be possible for you, become poor in spirit; lest ye at last prove to be the rich, whom the Lord will send empty away. Sell all apace, that ye may have, to buy the pearl. Ye have not known the appearance of the Lord; but in your wisdom have disdained it, and he hath disdained to make use of you in this great work; but it hath been pleasant to him to lay the stumbling blocks before you, that ye might fall [on the stone, Christ—Luke xx. 18] and be broken. The children, the fools, the blind can see the way, and enter into life; but ye that are men that are wise, that have both your eyes, that can judge in religion, and determine what is orthodox, and what erroneous, ye cannot.

O hear, that your souls may live! Ye know not how short your time is; the day of your visitation passeth away faster than you are aware. The cry hath long gone forth, Behold, the Bridegroom cometh, and his spouse hath been preparing for him. Ye must of with your old garments, and have the new on. Ye must have the true oil in your lamps or the door of the kingdom will be shut upon you, and there will be no entrance for you. In plain terms, you must part with *all your religion which you have gathered in your own wisdom*, which hath grown up in the apostacy, and which only can make a *fair show in the dark*; but cannot endure the searching light of the day of the Lord; and ye must purchase the true religion, the true righteousness, the true innocency and purity of Christ. The old must be done away, truly done away, and the new come in the place. So that self and flesh may be quite destroyed, and nothing but Christ found in you, and you found nowhere but in Christ, if you enter into his kingdom for no unclean thing can enter. Therefore put away pride, and passion, and enmity, and *fleshy reasonings*, and seek out that which is pure, and enter into it, and take up the cross against all that is contrary, that so you may be wrought into it, and found in it. And turn from all imaginings and concerning about the meanings of scriptures in the uncertain and erring mind, and come to *that* which is infallible. And know the silencing of the fleshly part, that the spiritual part may grow

in the wisdom, that so ye may learn in the Spirit, and know the word of God, and be able to speak to it."

For "The Friend."

I was much interested in the short but lively obituary notice of our dear young friend, J. Wistar Evans, and comforted in the belief, that through mercy and redeeming love he was permitted to enter the mansions of eternal rest. I was intimately acquainted with him for a number of years, first as a school boy, then in his adolescence, and afterwards, in his early manhood, was associated with him in some of those labors for the welfare of others, spoken of in his obituary—and cheerfully bear witness to those good qualities of mind and heart which endeared him to those around him, and made him useful in the world. We have no reason to doubt that he was preserved from all the "grosser evils;" that he maintained the strictest morality and integrity, was useful and in many respects exemplary in religious society, and I believe desirous to know a preparation for an entrance into a state of purity in the realms beyond the grave. When, however, he came to lie on a dying bed, and to look back over the eaves of his past life, he saw that all these were not enough to secure him an admission there. The work of sanctification and full redemption had not been accomplished. Through mercy, salvation was experienced; but let none presume on this to defer entering on the needful work, with fear and trembling.

I often mourn over the easy going religion, now being introduced among professing Christians, and not only into other societies, which do not profess to be so self-denying in their principles as ours, but which is promulgated by some who are sent abroad as regularly accredited ministers of the Society of Friends. How flippantly we hear the solemn words sometimes spoken, "Come to Jesus." Religion is made a very easy thing. The apostle Paul says, "The word of God is quick, and powerful, and sharper than any two-edged sword, piercing even to the dividing asunder of the soul and spirit, and the joints and marrow," &c. But these modern teachers have endeavored to soften down the great work of regeneration and to make it easy to flesh and blood. Paul says, "All have sinned and come short of the glory of God." If therefore all have sinned, all need to be washed and cleansed from the pollution of sin, for nothing impure or unholy can ever enter the kingdom of Heaven. The apostle says to some, "But ye are washed, but ye are sanctified, and ye are justified in the name of the Lord Jesus, and by the spirit of our God." Here is laid down the plan by which sanctification and justification are to be experienced. "By grace are ye saved," says the same apostle, "through faith, and that not of yourselves, it is the gift of God, not by works lest any man should boast."

From these and many other passages of Holy Scriptures of similar import, it plainly appears, that not by a mere intellectual belief (or 'faith') in what the Saviour has done for us, in that he died for us on Mount Calvary; not by reading and studying the Holy Scriptures; not even "by works of righteousness which we have done, but according to his mercy he saveth us, by the washing of regeneration and renewing of the Holy Ghost."

Our blessed Saviour said, "Many will say unto me in that day, 'Lord, Lord, have we not prophesied in thy name, and in thy name cast out devils, and in thy name done many wonderful works?' and then will I profess unto them I never knew you; depart from me, ye that work iniquity."

May none, either old or young, be deceived in so all-important a matter,—but by submitting to the unalterable terms of salvation, may many sons be gathered from far, and daughters as from the ends of the earth. Then would Zion rejoice, shake herself from the dust, and put on her beautiful garments, and once more come up out of the wilderness, leaning on the arm of her beloved.

## THE FRIEND.

FIRST MONTH 24, 1874.

In the very interesting journal left by Thomas Shillitoe of his life, and of the tribulated path which he was called to pursue, as a devoted disciple of Christ, he narrates a remarkable and instructive dream that he had, while under much trial of his faith. He felt that it was required of him to part with a certain portion of the small estate he possessed, in order that he might be more entirely freed from the entangling and hindering things of the world, and thus more completely fitted to engage, whenever called, in the service of his Lord and Master. He had already, under a sense of duty, relinquished a lucrative business, feeling that it "engrossed more of [his] attention than was profitable for [him], in the situation in which [he] stood in religious Society;" and as he had a wife and children dependent on him, the sacrifice required was a costly one.

We trust our readers will be willing to ponder the dream and its interpretation, for their own benefit.

"I saw before me, a straight but very narrow path gradually rising, at the foot of which stood a man very simply attired, who offered to take the charge of safely guiding me up. I followed him: when we had reached about two-thirds of the way up, my guide halted, and turning himself round, requested me to do the same, which I accordingly did. He then bid me take a view both on the right hand and on the left of the road I had been ascending: on my right hand, the ground in the bottom appeared rocky and uncultivated, covered with rubbish, grass, and trees that had been stunted in their growth: these I was told were fit for nothing but the fire, and that they were comparable to those whose hearts continued to be like the stony and thorny ground. I then turned to take a view on my left hand, and shuddered in myself, when my guide pointed out to me the dangerous precipice, close to the edge of which I had travelled. The foundation of the path appeared as steep as a house side; which led me to conclude, the road on which my guide had thus far conducted me must be founded on a rock, otherwise the path being so very narrow, from the weight of my body I must have been precipitated into the vast barren space I beheld. In this I observed a number of persons huddled together, at times grubbing with their hands in the earth, and at other times employing themselves in tossing the earth from one hand to the other, every

now and then looking one at the other, with a sort of consciousness that they were employing their time in vain, and saying one to another, 'I am countenanced in spending my time in this manner by thee,' and another, 'I am countenanced by thee.' On which I queried with my guide, 'What does this all mean? these men do not look like common laborers, neither have they such tools as common day-laborers use; Besides this, they are all clad in very nice and costly apparel, like men of the first rank in the world with respect to property.' My guide assured me, that although they were thus apparelled, and were rich in worldly substance, wanting nothing this world could bestow to make them as happy as it was capable of, yet, having made riches their chief hope for happiness, they had become so estranged in love and affection from that Divine Power which only can make truly happy, that they were completely miserable. My guide, turning round, bid me follow him; and as we began again to ascend, instructed me to keep very near to him, continually reminding me, that although I had mercifully escaped the danger, which those I had observed in the barren space had fallen into, yet I was not out of the way of danger; and that my safety depended on my keeping continually near to him, eyeing him in every step I took from day to day, without which I should yet be precipitated into the barren space with those miserable persons I had beheld, and become their doleful companion."

It is not merely in relation to the acquisition and enjoyment of wealth, that we may draw instruction from this vision; but also in relation to the compliance with the manners and spirit of the world, which has made such sad inroads upon us as a people; as evinced by the present more fashionable and expensive style of dressing and living, than has characterized consistent Friends from the beginning of the Society. As Friends profess to be a self-denying people, having a testimony to bear against the self-indulgent and ostentatious ways of the world, it is necessarily more or less of a cross to manifest that testimony in dress, address and style of living; including mansion, furniture and adornments. There are, therefore, few things in which we are more easily and powerfully affected by the influence of example, than in the support or disregard of this righteous testimony.

One member persuades himself or herself, that he or she can be just as good a christian arrayed in the common garb of the worldling, and therefore, though not wishing to embark fully on the tide of fashion, decides not to wear a dress that will indicate to every one that he or she is a Friend. Or a parent will conclude that though he or she may dress plain, yet it is not worth while to clothe their children like Friends. The consequence following is not confined to this person or family, but another and another and another—the circle ever widening—are induced or encouraged by the example thus set, to follow in the same path, and probably each goes some steps further in the indulgence of pride and folly.

A Friend with ample pecuniary means purchases, builds or rents, a spacious, modish built house, and introduces furniture into its rooms which is supposed to correspond with the outside appearance: he hangs photographs on the walls, has his mantels covered with costly ornaments, and the habits of his family

correspond with the somewhat luxurious equipments. Another, though perhaps not as well able to bear the expense, is stimulated by the pattern thus held up, not to lag behind in imitation of his or her self-indulgent friend or neighbor; and so the departure from simplicity, plainness and neatness, that once distinguished the home and family of a Friend, has become in many places very frequent and very wide. Thus deviating, step by step, from the narrow way, luxury and show have crept in among many, until we now see mirrors reaching from floor to ceiling, the walls are decorated with pictures, the floors covered with gorgeous carpets, furniture elaborately carved, &c., &c., so that often, taken with the attire of the inmates, one would be at a loss to distinguish the residence from that of the godless man of the world.

In thus gratifying the lust of the eye, and in thus indulging in the pride of life, how many may truly say, as they look one on another, "I am countenanced in spending my time in this manner by thee;" and another, "I am countenanced by thee." And is there not danger that while some are taking their delight in the costliness or fashionableness of their apparel, and the sumptuousness of their dwellings, the words of our Saviour may be applicable to their spiritual condition, "The foxes have holes, and the birds of the air have nests, but the Son of Man has not where to lay his head."

#### SUMMARY OF EVENTS.

**FOREIGN.**—On the 13th inst. Cartagena surrendered to the government troops under General Dominguez. The Spanish iron-clad Numancia escaped to Algeria with 2500 of the insurgent refugees from Cartagena on board. The French authorities promptly took possession of the vessel, and after sending three of the insurgent chiefs to the capital of Algeria, ordered the remaining refugees interned in the forts and barracks of Oran and Mers-el-keber. The Numancia was then delivered up to a Spanish frigate. The Spanish government has thanked that of France for the course pursued by it. Gen. Dominguez has been assigned to the command of the army in the north of Spain, and that army will be increased by the addition of most of the force employed in the reduction of Cartagena.

The Barcelona insurrection has been suppressed and order restored.

A meeting of deputies constituting a majority in the late Cortes, has adopted a vote of confidence in Castelar, and requested him to prepare a manifesto to the nation.

The French Ministers have informed the Committee of the Assembly on the electoral bill, that the government accepts twenty-five years of age and three years residence as qualifications for voters, and is in favor of the appointment of Senators by the government as council general, in the event of the creation of an upper house.

The general debate on the bill providing for the nomination of mayors by the government, ended in a resolution to proceed to the discussion of the bill by a vote of 378 to 312. An amendment providing that mayors shall be chosen from among the members of municipal councils, was voted down by a majority of five. The same amendment was again offered and rejected by a small majority.

Persons passing between France and Italy are no longer required to be provided with passports.

A London dispatch of the 17th says: The extensive flour mills at Leith were almost totally destroyed by fire last night. The loss is estimated at £250,000, and 400 hands are thrown out of employment.

The ship Minnelaha, from Callao for Dublin, has been lost on the Scilly Islands, and ten of the seamen were drowned.

A large fire occurred in the Portsmouth dock-yard on the 15th inst., destroying a quantity of stores which had been collected there for the Ashantee expedition.

Sir Garnet Wolseley and staff started for the river Prah on the 27th of 12th mo. His scouts had penetrated several miles beyond the river without encountering any of the Ashantees.

The argument for the defence in the celebrated Tich-

borne case has been concluded. As Hawkins, counsel for the prosecution, was leaving the court, he was mobbed by the friends of the Tichborne claimant, and the interference of the police was necessary to save him from violence.

A difference has arisen between Gladstone and Lowe which may probably result in the retirement of the latter from the government.

The North German Gazette says, if the policy of France is made subservient to the temporal aims of the Papacy, the peace of Europe will be compromised.

There was an exciting scene in the Landstag on the 16th. An Ultramontane deputy quoted a passage from a recent work of General La Marmora, alleging that Bismarck, in 1866, discussed the cession to France of a portion of the Rhenish territory. Prince Bismarck rose and pronounced the statement an audacious and malicious falsehood.

A St. Petersburg dispatch announces the arrival of the Prince and Princess of Wales. The marriage of the Duke of Edinburgh was to take place on the 19th inst.

Advices from Rio Janeiro report that the termination of the war in Entre Rios had been officially declared. General Jordan, the leader of the rebellion, had been totally defeated, and was a fugitive. His adherents had given in their submission to the government.

Mexican advices say that a strong opposition to President Lerdo de Tejada is forming. He has summoned all the State governors to the capital to discuss affairs of State.

London, 1st mo. 19th.—Consols 92½. U. S. bonds of 1867, 108.

Liverpool.—Uplands cotton 8d. Breadstuffs quiet.

**UNITED STATES.**—Mortality in Philadelphia last week 295, in the city of New York 509.

Soon after Caleb Cushing was nominated for the position of Chief Justice of the United States Supreme Court, the President found the appointment was considered objectionable by many Senators, and he therefore withdrew it. On the 19th President Grant nominated Morrison R. Waite, of Ohio, to be Chief Justice. Subsequently the Senate, in executive session, referred the nomination to the Committee on the Judiciary. Waite has no national reputation, but is respected in Ohio for his abilities and acquirements.

Congress in both Houses has been engaged in the consideration of financial measures and the question of the currency. The views of the speakers are widely divergent, some urging a contraction of the currency, curtailment of expenses and return to specie payments, while others insist that such measures would be most disastrous to the interests of the country, and that so far from there being any redundancy of the circulating medium, there is really a great deficiency, and the currency ought to be materially increased.

The House of Representatives agreed to the Senate substitute for the salary bill, by a vote of 226 to 25.

The message of the mayor of New York shows the city debt to be \$105,371,933, an increase since 1871 of \$9,084,428. The expenditures for maintaining the city government for the year 1873, were about \$32,000,000; in 1871 they amounted to \$36,262,580.

During the year 1873 the number of vessels belonging to or trading to ports in the United States, which suffered shipwreck, was 459, with an estimated loss to the amount of \$11,783,000.

The statements published in California show that the total value of the gold and silver produced west of the Mississippi last year, was about \$72,250,000. Nevada produced \$35,254,507, and California \$18,025,722.

**The Markets, &c.**—The following were the quotations on the 19th inst. *New York.*—American gold, 111½. U. S. sixes, 1881, reg. 116½; coupons 117½; ditto, 1867, 117; ditto, 10-49 5 per cents, 112½ a 113. Superfine flour, \$5.88 a \$6.15; State extra, \$6.75 a \$7; finer brands, \$7.50 a \$11. White Indiana wheat, \$1.74; red western, \$1.68; No. 1 Chicago spring, \$1.62; No. 2 do., \$1.58 a \$1.60. West Canada barley, \$1.87. Rye, \$1.05. Oats, 62½ a 64½ cts. Western mixed corn, 91 cts.; new corn, 82 a 86 cts. *Philadelphia.*—Midlings cotton, 17 a 17½ cts. Superfine flour, \$4.75 a \$5.75; extras, \$6 a \$6.50; finer brands, \$7 a \$10.50. Red wheat, \$1.60 a \$1.65; amber, \$1.70 a \$1.81; white, \$1.85 a \$1.90; No. 1 spring, \$1.63. Rye, 93 a 95 cts. Yellow corn, 80 a 84 cts. Oats, 58 a 64 cts. Smoked hams, 12 a 14 cts. Lard, 9½ a 9½ cts. Clover seed, 8½ a 10 cts. Timothy, \$3.50 per bushel. About 2300 beef cattle sold at 7½ a 7¾ cts. per lb. gross for extra; 6 a 7 cts. for fair to good, and 4 a 5 cts. per lb. gross for common. Prime sheep, sold at 6 a 8 cts. per lb. gross, and common 5 a 5½ cts. Hogs \$8.25 a \$8.50 per 100 lb. net. *Baltimore.*—Choice white wheat, \$1.90 a \$1.92; fair to prime, \$1.75 a \$1.85;

red wheat, \$1.65 a \$1.88; choice amber, \$1.90 a \$1.95. Yellow corn, 83 a 87 cts.; white, 90 a 93 cts. Oats, a 63 cts. *Chicago.*—No. 1 spring wheat \$1.24; No. do., \$1.22½; No. 3 do., \$1.16. No. 2 mixed corn, 50 cts. Oats, 41 cts. Rye, 79 cts. No. 2 barley, \$1.4 Lard, \$8.90 a \$9 per 100 lbs. *Cincinnati.*—Wheat \$1.48 a \$1.50. Corn, 61 a 63 cts. Rye, 93 a 95 cts. Lard, 8½ a 9½ cts.

#### THE INDIAN AID ASSOCIATION.

The Executive Committee of Philadelphia Friends having accepted charge of the schools for the Wyandotte, Wichita, Kiowa and Comanche Indians, request the contributions of Friends in order to supply some pressing needs.

It has been found necessary to collect the children in Boarding Schools, and various articles of clothing furniture, &c., are wanted to insure their comfort and proper care. Some money can also be judiciously expended in school supplies, in addition to those provided by the Government.

This is a critical time in Indian affairs, and help now will be extremely valuable.

Contributions may be sent to JOHN S. STOKES, this office.

#### FRIENDS' BOARDING SCHOOL FOR INDIAN CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to assist a matron.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office

Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia.

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

**DIED,** on the 1st of 5th mo. 1873, JOHN PEEBLE aged 74 years. He was firmly attached to the doctrine and testimonies of the Society, of which he had always been a consistent member, mourning over those that departed therefrom. During his long and severe illness, he was preserved in patience and resignation, and with intellect unclouded, he passed away, leaving no conviction that he died in full possession of faith; saying near the close, among other precious words, "It worth the living to die."

MICHAEL PEEBLES, widow of the above named Friend, died in full assurance of faith, 6th mo. 5th 1873, aged 68 years. She was in all the relations of life an exemplary woman, modest and retiring in her disposition, watchful in attending to duties she believed to be required of her, esteeming herself one of the least in the house of her Lord and Master. She was sick but six days, and during that time could converse but little; all she said, however, in reference to her future prospects was satisfactory, and if she had said nothing her life was a sufficient evidence that her death, though a great loss to family and friends, was to her "great gain." These dear Friends were members of the Monthly Meeting, Clinton Co., Ohio.

—, at Muncy, Lycoming Co., Pa., on the 16th 11th mo. 1873, CATHARINE W. ECROYD, wife of Henry Ecroyd, in the 74th year of her age. "And I heard voice from heaven saying unto me, Write, blessed are the dead which die in the Lord from henceforth; ye saith the Spirit, that they may rest from their labor and their works do follow them."

WILLIAM H. PILE, PRINTER.

## The Late Conference of Friends in London.

(Concluded from page 182.)

Whilst the reader of the remarks made at the Conference may well be struck with the wide views several of the speakers seem to hold of the constitution and doctrines of the Society of Friends, there were many valuable and instructive observations elicited, which we may all do well to ponder. John Hodgson alluded to family visits—"He knew no church which had a better mode than that, which had been a benefit to him from childhood to old age." \* \* "Did Friends as a church; did their overseers and elders, do their duty to all the members?" "There is a time when pastoral care was needed for those who had left childhood, and had not fully reached manhood. At that time he thought there was a deficiency." "Isaac Robson believed that there was great need at the present day of more parental instruction to their young members. A good deal had been said as to the meetings for worship not being adapted to children; but if children were instructed by their parents as to why they came together, he thought they would be more likely to appreciate them. All religious teaching should, in the language of George Fox, be such as would bring the people to their free teacher—Christ Jesus." J. Bevan Faithwaite in the course of his remarks, said; "Surely in these days of ritualism, and tendency to increased formality, it was not the time to depart from their dependance on Him alone who was their propitiation—through whom alone without other intervention they had access to the Father. It had been well said that theirs was a testimony, not to silence, but to spirituality,—to worship not made by human arrangements, not dependant on any one man, or the performance of any pre-arranged ceremony, but dependant on the presence of Christ alone." It is evident that a more pious care is much needed among many parents within our borders to instruct their children in the truths of the Holy Scriptures. This duty is strictly enjoined in the excellent Discipline of Philadelphia Yearly Meeting, adopted as far back as 1822, in the following language: "We tenderly and earnestly advise and exhort all

parents and heads of families, that they endeavor to instruct their children and families in the doctrines and precepts of the Christian religion as contained in the Holy Scriptures; and that they excite them to the diligent reading of those excellent writings, which plainly set forth the miraculous conception, birth, holy life, wonderful works, blessed example, meritorious death, and glorious resurrection, ascension, and mediation of our Lord and Saviour Jesus Christ; and to educate their children in the belief of those important truths, as well as the belief of the inward manifestation and operation of the Holy Spirit on their own minds; that they may reap the benefit and advantage thereof for their own peace and everlasting happiness; which is infinitely preferable to all other considerations." We may here observe not only the injunction contained in our annual query with respect to frequent reading the Holy Scriptures in our families, but also the obligation to "instruct and educate them in the belief of their doctrines and precepts."

The subject of family visits is made a distinct section in the Discipline of Philadelphia Yearly Meeting; from which the following paragraph is abstracted: "As the visiting of Friends in their families in the openings of heavenly wisdom, is a service which hath often been blessed to the minds of the visitors and visited; this meeting hath, from time to time, recommended it to the solid attention of Quarterly and Monthly Meetings; and it is desired, that concerns of this nature may be tenderly cherished, and those who are rightly exercised therein, encouraged to move forward in due season, and in a humble dependance on the Shepherd of Israel, who not only puts his own forth, but goes before and rewards all who are faithful to his appointments, with the enriching reward of sweet comfort and solid peace."

By reference to the minutes of Philadelphia Yearly Meeting in the earlier part of the present century, it appears to have been expected that Quarterly Meetings should send up some account annually of the care bestowed on their members by family visits; and where but little effort was made in this direction, it was common to notice it in the reports.

It does not seem that the present lapsed condition of the Society grows out of any want of adaptation in its disciplinary means to the objects in view. The liberty of action and modes of operation pointed out under our organic rules are ample. We must look deeper than this for the causes of the decline. They doubtless lie in the same disposition of the human heart which induced many of the disciples of Christ in the age of His personal appearance among men, to go back and walk no more with Him, when He told them that "except ye eat the flesh of the Son of Man, and drink his blood, ye have no life in you." The same that made the world hate Him because He testified of it that the works thereof are evil. The apostle John testifies: "If any

man love the world, the love of the Father is not in him. For all that is in the world, the lust of the flesh and the lust of the eyes, and the pride of life, is not of the Father, but of the world." The early members of the Society of Friends believed in and lived up to these doctrines. They were well settled in them in fact before they organized a religious association, and it only required the agitation of a few well chosen instruments among these elements to crystalize them into form. Prepared in the mountain as the stones of the temple, they came together in beautiful harmony, almost without the sound of axe or hammer. This was the first process; but the work of adding to and perpetuating such an organization in succeeding generations involved further and distinct processes as well as influences. The zeal and energy that animate the inauguration of any new enterprise, we all know, is subject to cool off with the advance of time. The blasts of persecution fanned the fervor of the early Friends, and served to unite them in one compact front against a common enemy. The contrast between their cross-bearing lives and the licentiousness of the English National Church under Charles II., placed a broad line of demarcation between them and the prevailing form of professed christianity, which served to fill their ranks with the earnest seekers after the Truth from that source. But when the more tolerant reign of William and Mary released them from the pressure of fines and imprisonment on account of their religion, and the increasing power of the other dissenting sects had in measure cleared the moral atmosphere of the corruptions of prelacy; when the first generation of Friends had been mostly gathered to their eternal reward, and their children had fallen into their places, not always so much by reason of a heart-changing reception of the Truth which had united their parents, as through the force of education and habit; then we find a reaction from primitive life and power had set in; and about the middle of the 18th century John Griffith records a lifeless condition of the meetings in England, which was perhaps more conspicuous than the present. From this low state a revival afterwards was realized, and similar ebbs and flowings of the tide have been experienced from time to time since.

It is elementary truth that no stream can rise higher than its source, and therefore we shall vainly look for a genuine revival in our Society through any means short of our holy Head and Leader, and submission to His grace in the hearts of the members. "To as many as receive Him, to them gave He power to become the sons of God." These were born not of the will of the flesh, nor of man, but of God. All efforts, then, which originate in the will of the fleshly or carnal nature in man, to build up a church with a fair outside, and to add members who are unwilling to receive Christ in his office as a baptizer with fire to

separate the chaffy, worldly nature of the soul from the heavenly grain, will result in a counterfeit structure that must be consumed as wood, hay, and stubble, in the day when every man's work shall be tried of what sort it is. "Let every man, then, take heed how he buildeth," even on the one only foundation, in the words of the apostle, 1 Cor. iii. 10, &c.

But is there not room for the humble, obedient follower of the High Priest of our profession, to hope for a blessing on his aspirations for the extension of spiritual religion among his fellow men? There was an ancient congregation of Christians to whom this language was addressed. "I know thy works: behold I have set before thee an open door, and no man can shut it." \* \* "Because thou hast kept the word of my patience, I also will keep thee from the hour of temptation which shall come upon all the world to try them that dwell upon the earth." "He that hath an ear, let him hear what the spirit saith unto the churches." Oh, then, may the longing souls that are engaged to plead with the compassionate Father of spirits, that there shall come forth out of Zion a Deliverer, who shall turn away ungodliness from Jacob, that so all Israel may be saved, and the kingdoms of this world become those of our Lord and his Christ, be willing to possess their souls in patience. May they look only to Him to lead us up out of this wilderness state, and not make other gods to themselves, through impatience at the stay of their spiritual Moses in the mount.

Great are the promises to the believers through the efficacy of true prayer, in the name (or power) of Christ. "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you." \* \* "Verily, verily I say unto you, whatsoever ye shall ask the Father in my name he will give it you." \* \* "Ask, and ye shall receive, that your joy may be full." "Beloved, if our heart condemn us not, then we have confidence toward God; and whatsoever we ask we receive of him, because we keep his commandments, and do those things that are pleasing in his sight." The prayers of those who dwell in the frame of mind indicated by these words of Christ and his apostle, we are told will avail much. May they ascend in secret and openly as begotten by the Father of lights, for a true revival among the people called Quakers; and let each one be willing to put away from his own heart and household, every idol that may defile or separate between him and a God whose name is jealous; and then we may trust that the promise recorded for a repentant people in ancient time, may be measureably realized in the lines of our experience. "In that day it shall be said to Jerusalem, fear thou not; and to Zion, Let not thine hands be slack. The Lord thy God in the midst of thee is mighty; he will save, he will rejoice over thee with joy; he will rest in his love, he will joy over thee with singing. I will gather them that are sorrowful for the solemn assembly who are of thee, to whom the reproach of it was a burden."

*Power of Application.*—Why have so many brilliant young men come to naught in this active and busy world of ours? What is the cause of their failure? It was not from dissipation, for they were temperate. It was not from indulging in games of chance, for they did not gamble. It was not because of indo-

lence, for they were industrious. It was not from wastefulness, for they were saving, and not spendthrifts. What, then, is the reason for their want of success? We reply: They lacked application. It was "a little while here" and "a little while there." "Many things commenced, nothing finished." Such persons become "jacks at all trades, and good for nothing at any."

Admit the facts; but who is to blame? When a child is left to seek its own pleasure or pursuit, it is not likely to practice self-denial to any great extent. Later, when sent to school, it is plied with—how many different studies? Formerly, a lad of ten or twelve years of age found it enough to do in one school season to master reading, writing, and common arithmetic, with grammar and geography added. How is it in fashionable schools to-day? How many different studies is the juvenile expected to master? All the foregoing, and as many more. Is it surprising that such a mind lacks application?

Let parents begin early with a child, and teach it to think and act consecutively; to apply itself to a given object, be it work or be it play, till an end be attained. If building a cob or a block house be the thing in hand, let it be completed; then, having attained the end sought, let the thing be taken down, packed up, and carefully put away for use on another occasion. But while about the work, let nothing eall the mind away or divert it until completely finished.

By pursuing such a course, you cultivate both application and method; so, also, constructiveness and imitation. The boy would make a kite, a boat, or a sled. The girl would dress a doll, knit a stocking, or make a cake. All right, only so that it be the one thing at a time, and that thing be finished before another be taken up.

### John Heald.

(Continued from page 175.)

"8th mo. 2d, 1818. At a meeting called Unity, held in a school-house, I sat under considerable exercise. The vocal labor was very heavy and trying, occasioned as I thought by the dark, inconsistent opinion of Universalism. I labored long and got but little entrance, but having acquitted myself in love, I felt clear, but pitied the condition that refused to be gathered.

In the afternoon we had a meeting at Fairfax, but I could find no way for a release of mind, and requested another meeting next morning. We lodged at Oliver Winslow's. 3rd was a wet morning. This perhaps will set some of the people at liberty to go to meeting, who are engaged in getting hay, and who would not leave it to go to meeting if it was fair—so little do many esteem a preparation for eternity, and so much are they attached to the things of time, that religious concerns must give way to worldly concerns! A considerable number collected, and some time after one stood up and spoke for some time; and before long, again; and in a short time, a third communication; and it tended, I thought, very much to unsettle the minds of the people. After awhile I stood up and said, I see not how I shall feel excused without observing that I have travelled in twelve or thirteen of the United States, and had many meetings in each of them, and never was so much interrupted before. I think I never felt a greater

necessity for people to be on their guard, lest they should be deceived with fair pretension or fallacious appearances. At first I felt some embarrassment, but I soon felt emboldened and, [after discouraging formal prayers and other religious performances], showed that true religion consisted in obeying the Divine commands. Without obeying the Divine requirements, no acceptance is to be expected; Ye are my friends if ye do whatsoever I command you; and, If ye love me, keep my commandments. I showed that Saul, the first anointed king of Israel, was commanded to go and do a certain thing, and because of disobedience was rejected, and was told that obedience is better than sacrifice. Jonah was disobedient and fled to Tarshish, &c.

This evening, I understood that the person who disturbed the meeting had said in the morning before he came, that if no other person said anything in the meeting, he would.

4th. I feel comfortably easy, having endeavored to do what I found to do, and am easy to return to the west of the Kennebec river.

5th. At Samuel Taylor's, several Friends and some others collected. I said, How shall I come before the Lord and present myself before the high God. This or something like this has been the secret, solemn enquiry of many a sincere mind. We find that the prophet said, Wherewith shall I come before the Lord, and bow myself before the high God. Even his mind appears to be solemnly impressed with the greatness of the performance. I believe in the saying of our Lord, that Without me, ye can do nothing. Our Redeemer informed His disciples, that, It is expedient for you that I go away, for if I go not away, the Comforter will not come, but I will pray the Father, and He will send you another Comforter, even the Spirit of Truth, whom the world cannot receive, and He shall guide you into all truth; and afterward, Lo, I am with you always to the end of the world. So we are to expect Divine help to do the Divine will. Again, The branch cannot bear fruit of itself, no more can ye, except ye abide in me. I am the vine, ye are the branches, &c.

I felt engaged to impress the necessity of heart-felt religion, and not to trust to imputative righteousness without faithful obedience to manifested duty. How difficult it is to persuade people out of a belief that is so calculated to lull them into security, supposing that they may and must continue in sin daily, and that the righteousness of Christ will be imparted to them, and make them fit for Heaven and they going on daily doing that which they know to be wrong, and then think it have it patched up with imputative righteousness.

6th. We lodged last night at Stephen Wing at Sidney, and attended the meeting. I walked into close labor for a considerable time and afterwards to treat of giving way to or delight and inclination, and then another, such as are known to be wrong and desirable to gratify the mind; warning them that the enemy was near watching to beguile, deceive, entice and draw away, after the delights of sense and sensual things, and to deprive of a enjoyment of good, and engage the attention to some earthly delight or thing more naturally calculated to amuse and keep the mind drawn after the visible delights of time.

The work of the enemy of all good to lead into pride or highmindedness was also refe-

ed to. This spirit must be brought down sooner or later, for every thing that is lifted up must be laid low, that the Lord alone may be exalted. Even those who have been humbled and engaged in the cause of religion may be led into this snare, but it will be to their hurt, whether it is shown, 'in the little tipings and equippings of the body, or in religious matters.'

In the afternoon we travelled to Fairfield. Daniel Purington conducted us to Benjamin Lowerman's. 7th. Attended a meeting here. It was large. I arose and said, I beseech you, brethren, suffer the Gospel to have free course among you. The Gospel of Christ is the power of God unto salvation to all them that believe. Among the subjects treated on was that of singing in meetings for worship, all the congregation joining in the hymn at the same time. Suppose they sing, 'My soul rejoiceth in God my Saviour;' some may not know such an attainment, and different states may unite in the same language without feeling a being brought into such a similarity of condition as to utter it with truth. The art of singing may be learned and practised by various persons who may join in ritual performances, but what is this good for? It is true that our Saviour and His disciples sang an hymn, and Paul and Silas sang in the prison, and Paul recommends singing, making melody in the heart. This, when the heart is prepared, will be done, but the common practice appears calculated to please the ear, and gratify the mind, rather than to please the Lord or to be a part of acceptable worship to Him." John Heald thus concludes his remarks on this subject: "We may see immoral persons join in singing these hymns in meetings. I fear formality will get too much got in, not only in the society I am a member of, but among many brethren in other religious societies."

The fears of our worthy friend on this subject, have been abundantly verified of latter time. As a proof of the increase of formality, and the substitution of mere ceremonial performances for that spiritual adoration which alone is acceptable to God, we need only refer to the introduction in an increasing degree into places of public worship of hired musicians. These are sometimes persons of loose morals, or at least make little if any profession of religion; and, on such occasions, sing hymns on the most solemn subjects, with the same motive that induces them to lend their abilities to the immoral or questionable performances of the theatre or opera; i. e., to obtain a livelihood. Who can suppose that religion is promoted or the Divine Being honored by such lip-service?

It is much to be regretted that any members of the Society of Friends should so far lose sight of the nature of that Divine worship, which our Saviour declared to be "in spirit and in truth," as to substitute in our public meetings any ritualistic performance, whether reading the scriptures, singing hymns, or formal prayers, for that inward silence and prostration of soul before our Heavenly Father, in which He is often pleased to spread over the mind a sense of His presence, and to strengthen its desires after purity and holiness; and, as seems good to Him, to qualify His dependent children for more public services in His cause. Such practices are evidences of a departure from our principles, which may gradually lead those who practise them entirely away from our fold, though it

is very possible for persons to advocate or enter into them without clearly seeing either the cause or the result.

9th. Attended a small meeting at Athens, and nearly silent. I stated my belief that no mere natural man could preach the gospel without Divine assistance. We got dinner, took leave and set off, but I soon found I was not clear. I apprehended one of our conductors had sat in my way, i. e., he had an exercise of mind to discharge in the meeting which he withheld. When I spake with him about it, he owned it. We however concluded to go to Daniel Bradbury's, three or four miles from where we were at meeting to-day, and here we concluded to have a meeting at the 10th hour in the morning. When the meeting collected it was larger than the day before, and I had opportunity to clear myself, and several were tendered."

(To be continued.)

For "The Friend."

### Education for Friends.

Very soon after Wm. Penn and the Friends who accompanied him, established themselves in Philadelphia, the education of the youth claimed their attention; and ever since his time it has been a very prominent subject. The objects of the education have always been twofold: 1st, that young people might receive such intellectual knowledge and discipline as would fit them to be useful and influential members of society; and 2dly, that they might be so placed as to be guarded from immoral influences, and strengthened to pursue the path of duty. The latter has always been held by Friends to be the more important. The evils of mixed schools, the lack of religious feeling, the temptations to immorality and infidelity, the exclusive devotion to intellectual pursuits, have been so painfully evident in so many corrupted men, that the protection given to Friends' children in these respects, has been rightly judged to be of primary importance. But intellectual training has not been neglected, and within the limits of Philadelphia Yearly Meeting, the schools of Friends were for a long time the most liberal and comprehensive, as well as thorough schools of the district. And the Society enjoyed the reputation of being comparatively a well educated class.

In this 19th century, education, as well as other sciences, has felt the moulding and progressive spirit of the age. The good schools of fifty years ago, could not command the confidence and patronage of this generation. Moral means, rather than physical, are resorted to, to maintain discipline; a greater amount of education and training and better immediate preparation, are required of the teacher, and, to allow for this, the hours which he devotes to hearing recitations are much diminished; new subjects, as the thought and work of investigators bring them into prominence, have been introduced in the courses of study; the methods of imparting knowledge, and the whole system of instruction, have undergone radical changes; improved school furniture and means of illustration have been invented and applied; order and quiet have been established in the necessary movements of the pupils about the house; and every thing is so arranged that the undivided attention of pupil and teacher can be kept upon the subject of receiving and imparting instruc-

tion. The result of this is, that boys and girls are enabled to make the best of the often limited time allotted them at school, and that they leave with an amount of mental development and knowledge which often surprises the parent.

Have the schools of this Yearly Meeting kept pace with these improvements? Are they productive of all the good of which they are capable? Do we ask our members, for the sake of their religious and moral tone, to forego some of the advantages in a literary and scientific point of view, which other institutions hold out? If we do, surely we are offering a premium on our young people's placing themselves beyond the good influences of our schools.

There are those among us whose talents, inclinations and pecuniary resources lead them to seek a first-class education, and with the strong confidence of youth in their ability to resist temptation, they seek for the glittering prize where they know it may be found. The moral and religious influences of the seminary whither they go, will impress their stamp upon them, and the whole of their future lives will be moulded for better or for worse. We cannot estimate how many departures from our discipline, are the result of the seed sown in unfriendly schools, nor can we tell how many valuable Friends, our own schools have been instrumental in saving to the Society.

But a great number of our members do not seek beyond the Yearly Meeting schools for instruction. Many have not the means to devote more than a very few years to study, before the necessities of life call them to labor for their daily bread. Have we not this duty to perform to these, that we permit them to gain every possible advantage from their limited stay? That their energies be rightly directed, their instructors more abundantly competent, all the instruments of instruction and mental improvement be placed within their reach, while at the same time we watch over their daily lives for good?

Many reforms have been introduced into our schools. Any member can obtain at the present time, in the only Institution over which the Yearly Meeting has charge, a thorough and comprehensive education. Changes are being continually made, to adapt it to the altering requirements of the age. Yet it may be doubted whether it holds the relative rank among educational institutions it did fifty years ago.

The experience of other schools, of the same grade and character as Westtown, with regard to the changes which agitate the educational world, ought to be listened to. Many of these changes have been pronounced, more or less decidedly, to be reforms. Among these may be mentioned the grading of the school, so as to apportion to each stage of advancement, regular and suitable studies, with increasing liberties as the student shows himself worthy of them; the restricted mingling of the pupils of both sexes, at meal times and during recitations; the shortening of the time required of teachers to hear recitations, so as to admit of a more thorough preparation, and a better opportunity of keeping versed in the advancing knowledge of the age; the requirement, on the part of the teachers, of thorough knowledge, that they may teach subjects rather than text books; and the establishment over the schools of an educated progressive Friend as Principal, to secure unanimity of action, to

see that teachers perform their full duties, and to inaugurate and carry through reform. H.

### Sir David Brewster.

(Concluded from page 181.)

"On Saturday morning those of his family who were within call were telegraphed for, and Colonel and Mrs. Brewster Macpherson arrived in the evening. Owing to the telegram being just too late for us to take the first train from Clifton, and the scarcity of trains on Sunday, my husband and I did not arrive till Sunday evening, some hours later than we were expected. It was touching to find the craving of his heart for us, which he had been expressing through the day, fearing that we should be too late. 'Oh, how I have wearied for you!' were his simple words, and then he seemed perfectly satisfied. His kind and much appreciated friend, Sir James Simpson, arrived with us; he found him pulseless, but the excitement of the arrivals seemed to give him new energy, and a perceptible pulse returned. It was, indeed, something remarkable, and never to be forgotten, to hear the conversation between those two eminent men. Something was said of a hope that he might yet rally. 'Why, Sir James, should you hope that?' he said, with much animation. 'The machine has worked for above eighty years, and it is worn out. Life has been very bright to me, and now there is the brightness beyond!' Sir James Simpson then asked if he wished any one in particular to take charge of his scientific papers; he answered, 'No; I have done what every scientific man should do, viz., published almost all my observations of any value, just as they have occurred.' And then came a fluent stream of well chosen words from the dying philosopher, describing a scientific phenomenon connected with one of his favorite researches, which made one breathless with astonishment to listen to. Not a mistake, not a confused word was there, except once, when Sir James gently substituted the word 'white' for 'black.' Although already before the public, the following account is so much better than mine could be that I quote it:—

"He then explained that he had left one paper on Film forms for the Society, and went on to express an earnest regret that he had not had time to write for the Society another, descriptive of the optical phenomena which he had latterly observed in his own field of vision, where there was a partial degree of increasing amaurosis, which, he thought, might be yet found a common form of failure in the eyes of men, ageing and aged like himself. He described the appearance of this partial amaurosis minutely and energetically, telling me, for your information, that the print of the *Times* newspaper had begun for a year or two past to look at one part in his field of vision as if the white interstices between the letters "were lightly peppered over with minute dark powder;" and this amaurotic point was, he observed, latterly extending like the faint extending circle around a recent ink spot on blotting-paper."

"Hearing all this, and watching the play of the expressive countenance, it was almost impossible to believe that death was or could be at hand; and that night more than one heart hoped against hope. The disappointment, though felt to be unreasonable, was proportionally great when, the next morning,

before leaving Allerly, Sir James Simpson pronounced that my father could not live over the day. Monday the 10th of February was a day of suffering from weakness, breathlessness, and that constant desire of change of position, the varied discomforts of which so often form the principal suffering of a death-bed. Pain there was little of, except occasional spasms through the chest, significant, I suppose, of the heart disease, which, although not that of which he died, was complicated with the pneumonia and bronchitis, which proved the actual messengers of death; once faintly complaining of one of these shoots of pain, we did not catch his words, and it was with the energy of old that he raised his head with a glance of amusement, spelling distinctly, 'p-a-i-n.' Upon another occasion a play upon the word he used, and a bright cheerful smile reminded us of the old social jest and laughter. All fear had passed for ever. Throughout the day he longed for the moment of dismissal. 'When will it come?'—'Oh, how long it is of coming,' he said several times; and once he said, 'What hard work it is to "put off" this mortal coil!' For a few hours he was very languid, but listened with intentness to every passage of Scripture repeated to him, and if he did not catch every word he asked for it again."

"He was very thoughtful of his loving watchers, fearing over-fatigue for them, and saying once, with such touching sweetness, referring to this fear, and the trouble he thought he gave, 'Oh, how sorry I am for you all!' and when assured that it was the greatest happiness to be near him, his uneasiness ceased, and there was but the tender pressure of the hand,—the long earnest gaze,—the meekness with which, to please those who loved him, he continued the difficult task of taking nourishment. He was always peculiarly reverential and guarded in his way of speaking of Deity, habitually using the words 'God,' 'the Lord Jesus Christ,' 'Our Saviour;' but on his deathbed, the sense of the nearness, and the love of the Lord Jesus, at once his God, his Saviour, and his Righteousness, overcame the habits of reserve of a lifetime. Once when a sense of difficulty seemed to cross his spirit, he said, 'Jesus will take me safe through,' with restored confidence. Another time, the seldom-spoken words came to my lips, and I said, 'You will see *Charlie!*' and then gathering himself up after a pause, he answered, as if in gentle rebuke, 'I shall see Jesus, who created all things; Jesus, who made the worlds; I shall see Him as He is;' and he repeated, with that pathetic return to his native Scotch, which was not uncommon with him when greatly interested, 'I shall see Jesus, and that will be "grand,"' with an ineffably happy, cheerful look. 'You will understand everything then,' it was said. 'Oh yes,' was the answer, which seemed to come from a very fulness of content. 'I wish all learned men had your simple faith,' it was said at another time; and again there was the pause and the gathering up, and the words dropped out, each with its own weight of feeling and of meaning, 'Yes; I have had the Light for many years, and oh! how bright it is! I feel so safe, so satisfied.'

"There came a few moments when his pulse was more perceptible, there seemed a shade less of exhaustion, and it almost seemed as if he might partially rally; but even as this whisper passed between two of the watchers

the sudden change came—the fixed gaze—the rigidity of the once mobile face—the glaze over the soft blue eyes—the silver cord was loosed, the golden bowl was broken, and the spirit fled back rejoicing to Him who gave instructed, and redeemed it."

### A Forgotten Emperor.

Ferdinand, eldest son of Francis First, emperor of Austria, ruled over that empire from 1834 to 1848, when he abdicated in favor of his nephew, Francis Joseph, the present emperor. Ferdinand Second the ex-emperor was born at Vienna in 1793, and since his abdication has lived in great obscurity. We find the following notice of him in one of our city papers.

"He who passes through the upper street of Prague, the beautiful capital of Bohemia about noon on fine days, will be certain to meet in the neighborhood of the Hradsehn an old, slender man, dressed in a very ordinary suit of black, and walking in a painful shuffling manner, and leaning every now and then on his cane to take breath. Many of those whom he meets stand still and look after the old man with a curious air. The beggars run toward him as soon as they catch sight of him, to whom he gives a few pieces of silver.

No one who looks at this singular figure who resembles more a subordinate government functionary on half pay than one who has moved in the upper spheres of society will suspect for a moment that the old man once played a conspicuous part in the history of the old world. And yet he is not only prince "born in the purple," but for many years wore one of the proudest crowns in the old world.

This aged habitue of the promenade, near the Hradsehn of Prague, is no other than the ex-Emperor Ferdinand of Austria, who occupied the throne of the Hapsburgs during that eventful period (1834–1848) when their power was at the highest and the lowest ebb. When he ascended the throne, after the death of Francis II., the influence of Austria, under the guidance of the cunning Metternich, was paramount in Europe. The policy of Austria at that time toward its foreign provinces was pitiless. The Italians, especially, were treated with remorseless cruelty. Poor Ferdinand, whose mental faculties never were the brightest, was kept by his designing and imperious chancellor in entire ignorance of the atrocities which were committed in his name. Metternich troubled the poor man a little as possible with State affairs. He allowed him to enjoy himself in his workshop as a cabinet-maker, where he probably passed the happiest hours of his life. He was also averse to appearing in public, and his participation, in uniform, in military reviews was painful to behold. Yet he was an amiable kind hearted man. Whenever a woman in distress, praying for some favor, succeeded in penetrating to him, he not only immediately granted her petition, but was moved to tears by her fervent gratitude. Whatever his expenses left him of his civil list he spent in charities. When he drove out in the Prater his carriage was constantly surrounded by clamorous beggars, and he would not allow his attendants to drive them away.

Had he been a sterner man he would have certainly forfeited his life at the breaking out of the revolution of March, 1848; but the in

riated populace of Vienna treated the poor Emperor with respect, and laid all the iniquities committed during his reign upon the shoulders of Metternich.

After the expulsion of the latter, poor Ferdinand II found a worse oppressor in his invidious sister-in-law, the Archduchess Sophia, who constantly urged him to sanction her despotic measures. The Emperor steadily refused, but often said he would only be too glad to get rid of the cares of government.

At length when his strength was exhausted, he threw down his crown and retired to Prague, where he has since lived in obscurity. He never goes to public entertainments, and rarely leaves the Hradschin, except to take a quiet walk. His family pays no attention to him whatever. His only companions, are two old servants, who have been with him from his youth. All the pleasure he has consists in making ingenious toys in his cabinet-making shop. He has an undoubted talent in that direction.

He never reads newspapers, and hardly ever opens a book. Few visitors call upon him except some priests, who converse with him upon religious matters. He dislikes to have his reign alluded to, and, whenever it is mentioned, immediately changes the subject.

His taste is simpler than that of his servants. He never drinks wine, and has never used tobacco in his life. His bedroom looks like a chapel. There are four large crucifixes in it. Such is the evening of the life of this modern Diocletian.—*Exchange.*

For "The Friend."

#### William Sewel and the Old Paths.

A more valuable contribution to the historical literature of our religious Society, has seldom if ever appeared, than is to be found in the writings of this interesting author; who was a birth-right member, and attached by conviction to the principles and testimonies of Friends. A contemporaneous and close observer of most of the important events which transpired during the first fifty years of our existence; and being personally acquainted with George Fox and many of his co-laborers; residing somewhat apart from the active scene of doctrinal controversy, Holland being his home and native place, he was fitted above many others to prepare an impartial record of those memorable times, in which the Gospel Light, which had burned feebly for many generations, was fanned into a warm, vigorous life, by the preaching and example of many, who were among the first and early laborers in gathering Friends into an associated, religious body. His history of "The rise, increase, and progress" of the people called Quakers, covers a very important period—our early life as a people, and their struggle in support of religious toleration, and liberty of conscience. The remarkable outpouring of the Spirit upon the hearts of many in that day, who first embraced the truth, and revived in the midst of a corrupt church and nation the spirituality of the gospel of Christ, and its power to change and purify the hearts of men, should deeply interest us, who are their successors, and repeating the out-growth of their suffering and labor. I would that a copy of this excellent work were in the possession of each member among us, old though it may be, but rich in the inward experiences, and wonderful dealings of the Lord to a highly favored branch

of His church, that a people might be raised up, and qualified to exhibit in their lives a large measure of the beauty and brightness that attended the Christian church in its infancy. A library, such as a Friend would be likely to gather around him, would indeed be incomplete without it, and yet it is to be feared there are many among us who permit such works, if they possess them at all, to lie unused upon their shelves. How often do we see these valuable records of the personal experience and public labor of the Lord's dedicated children neglected, and in their place, the current journals and periodicals of the day, and works of doubtful religious authority substituted. If all classes, and especially the younger of our members, could be brought to feel a more lively interest, in the early growth of our own Society, and thus come to exalt the spirit of self sacrifice, and unswerving dedication to the Truth, as the Most High by his power revealed it in the hearts of many, who in that period of darkness, and superstition, and church bigotry were called and strengthened through suffering to hold fast their profession, the future of our beloved Society would look more hopeful. Their inward conflicts and deep baptisms, added to the cruel persecutions they often underwent, were frequently blessed by the incomes of the Father's love, and the fresh extension of His grace and qualifying presence; which are abundantly set forth in the various biographies that have been prepared and published from time to time; and it has often been a matter of surprise, and certainly it is cause of deep mourning, that a more widespread appreciation of the many valuable lessons contained therein, of instruction and warning, is not more known in our midst.

The plain, self-denying path, without ostentation, and without hypocrisy, and in which our predecessors were so largely blessed, wherein there was no room for self-righteousness, is hard to be borne by the unsubjected will of the creature; and is equally aversive to the spirit of *broad toleration*, which has obtained such a hold in many parts of our Society, that not a few, it is to be feared, of the present generation, are being carried back into a religion, though it may be more specious, and liberal, is as formal and superficial as that out of which our predecessors were led.

"Pare religion, and undefiled before God and the Father, is this, to visit the fatherless and widows in their affliction, and to keep himself unspotted from the world." There are few comparatively who attain in their daily experience, to this lofty standard of purity of heart as expressed by one of the apostles, exemplifying the practical and spiritual nature of all true religion; that which enlightens the conscience, reaches the heart, and convicts of sin; and as it is submitted to takes the government of our lives into its own keeping. Under its peaceable rule and authority the world is kept subordinate; new desires and new motives are awakened; and our highest concern will be, to be found among His willing and obedient children, and filling up our allotment of suffering and labor, whatsoever it may be.

We should then be equally careful not to exceed the limits of duty, nor to fall behind; lest the former should lead into confusion and spiritual darkness, while in the latter state, so long as the eye is kept toward the

Fountain of Life, springing as it would from a condition of mind opposite to forwardness, there is safety.

A very limited acquaintance with the domestic and religious life of the early Friends, will show them to have been very tender and careful in this respect. How earnestly did they seek to know the pointings of Truth, and when its discoveries were clearly known, to walk therein, through heights and through depths, through scolding and cruel beatings, through scorn and cursing from priests and those in authority; and finally they proclaimed to all succeeding generations their invincible love toward the King of kings and Lord of lords, and willingly suffered imprisonment, and the loss of their estates; some being delivered to the hangman; and many more from disease and torture in dungeons and filthy cells, were added to that illustrious line of men and women who have given up their lives rather than deny the Lord who bought them. How they entered into each other's trials, and how active in sympathy were they toward all who were seeking after a more spiritual way! They taught the apostolic doctrine "Christ within the hope of glory," teaching His church and individual followers immediately, through the gift of the Holy Spirit. How careful were they not to transcend the bounds of the precious liberty thus unfolded. They were truly among the world's best reformers, and yet they were a people hated and despised, because they brought the axe to the root of the corrupt tree, knowing that the world was dead in trespasses and sins. Instrumentally they were the means of correcting many abuses, so that we have in this day a more tolerant public spirit; the superstition and bigotry of those times have greatly lessened, and there is with us no church establishment receiving special privileges; and in England it is marked by greater moderation. But while we have grown in our knowledge of human life, and the best means of securing social order, and under a more widely diffused system of education greater liberality prevails, have the people grown in that knowledge which is saving? The religious toleration and liberality, as applied to religious worship obtained through suffering, purchased for us a precious liberty indeed, and the professing Christian church; and we especially who are members of the Society of Friends, cannot value it too highly; and yet with all our privileges, and the abundant blessings poured out upon us, do we not realize that outward prosperity is not the soil to nourish best the seed of the Kingdom; and the very liberality which is so commendable as applied to liberty of conscience, is perverted and misapplied in the use of the manifold privileges and blessings we enjoy. We partake largely of the free bounty of Heaven, but how few are stewards of the abundant grace and means thus dispensed. We find all, with few exceptions, running out into many abuses, from which our own Society cannot plead separation. The love of the world has become paramount in very many, as shown in the gratification of the "lusts of the flesh, the lusts of the eye, and the pride of life." Luxurious living, extending into wanton waste, and an extravagance that reaches to licentiousness, not only in private living, but in the more public uses of the means with which a kind Providence hath blessed

us. In dress, a vanity is often displayed that knows no bounds. In the building, furnishing, and adornment of very many of the churches so called, of the present day, may be seen a representative type of the folly and pride, and the ostentatious display of a ceremonial and formal age; whereto the people are exhorted to come as to a "consecrated Temple" to commune with God; whereas "He doth not dwell in temples made with hands; His is the temple of the heart;" and it is there He doth instruct all his obedient children. It is not only becoming, but highly important that we should be faithful in assembling ourselves for worship "as the manner of some is;" but if in order to gather the people, it is necessary that their offerings of worship should be accompanied with pomp, and the glitter and gold of elaborately wrought buildings and furniture, is it not clear such will be likely to come far short of the object for which they assemble, substituting for the solemn reverential worship of the Father of spirits, a superstitious awe for the building, thus richly adorned, and pronounced a "holy place" by the ceremony of "consecration." Would it not be more in accordance with the inward, spiritual nature of Divine worship, and the meek and lowly character of the Redeemer; who wore a seamless garment, and presented in His whole life the highest type of simplicity, that a building erected for a purpose such as this should be as plain as may be consistent with comfort. The way which He set up is a narrow way, the way of the cross; but in conduct this is practically denied by the vast body of professing Christians, and found too contracted for the liberality now demanded. Is not the human heart by nature the same as in former ages; in a state of alienation; and though He doth employ various instrumentalities to produce conviction and amendment of life, do these not all lead to the same thing, into watchfulness and great circumspection, into the paths of self denial; which is a way wherein the gratification of the carnal appetites, the lusts of the eye, and the pride, and love of sensual things, cannot enter.

"If a man love me, he will keep my words, and my Father will love him, and we will come unto him and make our abode with him;" is no less a truth now than when spoken by the Friend of sinners; and I think every thoughtful mind, in glancing over the existing condition of the progressing church, must be solemnly impressed with the great want of conformity thereto in life and practice. Then would it not be wise if all our members would cling to the "old paths." Whence comes the flood of temptation which is sweeping over our beloved Society, carrying many of all ages and conditions into the current of popular usage in dress, in manners, in language, and into a wide and willing conformity to the world; and, as one inroad makes way for another, as one temptation yielded to, opens the door wider for the next, into a general laxity, if not renunciation of much that distinguishes the Christian warfare as a spiritual work, should not the cry be raised, "to your tents, O Israel." May we, as a people, never lose sight of that Divine Spirit, that illuminated so remarkably the early days of our Society; and by keeping, according to our measures, under its authority, be permitted to feel its invigorating life and virtue. Then do I believe we should be drawn together

into a closer bond of unity, we should be more one another's helpers; the young would be drawn nearer to the old and middle aged, and these in turn would be brought into greater nearness and sympathy with the younger members; and all would be strengthened to hold fast our profession, keeping our *stature* full and entire, in the face of the world, as in a former day. And if this were the case we should possess a growing interest, in the biography of our own Society, social and religious; its literature, and works of a kindred kind would be more often sought; our private libraries would contain them, and in our families they would be more often read. Hence a love would be strengthened and cherished for such compositions; and as the mind of the parent might be clothed with ability to apply them to every day life, or in turning the attention of the children to the excellency of that grace, the good fruits whereof are abundantly set forth in the lives treated of, an enlarged vitality and growth in best things would be realized. May that day hasten also when it may be said "the leaders no longer cause the people to err;" having remembered their early espousals, have turned their faces from the world.

Then should we come forth in renewed brightness; not being ashamed to acknowledge and defend all our testimonies and doctrines; and the young men and the young women who ere long must succeed their elder Friends, and take their places in the church, would be animated and strengthened, and in due season would be clothed and qualified therefor. P. B.

Philadelphia, 1st mo. 1874.

(Continued from page 180.)

##### To her Mother and Sisters.

"Old Springfield, N. Jersey, 3d mo. 25th, 1830.

My dear Mother and Sisters,—I sit down to inform that we are creeping along through Jersey in a *winter's season*; in which no singing of birds is heard, neither the voice of the turtle, although at a few times, through adorable mercy, the blessed Head of the church has been pleased to cause the gospel trumpet to be sounded by our beloved Friends, to whom my spirit is united in the covenant of life; though I oft have to lament that, through my unfaithfulness, my ability to enter into feeling with dear Ann Jones is so small. Yet, I consider it a privilege to have been permitted for a little season to be made as an armor-bearer for her in the cause of my dear Redeemer, whom I have been endeavoring to serve, and whom I believe I love above all. Ah! my dear mother, thou knowest that deep have been the conflicts of my poor mind for many years; and often have I thought that this visit would tend to strengthen my faith, and be a means of helping to bring forth that birth, which has caused so much pain to my spirit.\* It may not be out of place here to tell thee, that attending little meetings held in school-houses with the little remnants, whose love to their Lord and Saviour who died for us, induced them to obey the injunction of the apostle, 'Come out from among them and be ye separate,' because light can

\* This, as we have seen, proved to be the case. She first opening her mouth in the ministry, as before stated, at Westfield, N. J., while out on this visit.

have no fellowship with darkness; and because such dare not join hands with those who have denied the Lord Jesus, has caused feelings of gratitude to arise that we have been preserved from this snare."

During this visit they attended meetings, as stated in the current letter, at Burlington Mount Holly, Rancocas, Upper Mansfield Old Springfield, Springfield, Westfield, and Moorestown. And visited their friends at John Cox's, Stephen Grellett's, Susan Smith's, Samuel Emlen's, W. Allison's, R. Pike's, Ann King's, and P. Ellis's; where, she writes, "I met with some dear young people." At Old Springfield, S. H. records, that Ann Jones was silent; adding, "The streams dried up as it were; and the language of the Spirit, 'They have taken away my Lord, and I know not where they have laid him.' They went home from here with H. Newbold; and next day were at a small meeting at Springfield, held in a school-house; "where dear Ann Jones spoke very sweetly; and my heart was tenderly attracted towards those present. Where upon A. J. said, 'Sarah, I think thou oughtest to have told them so.'" From here, soon after they went to Henry Warrington's; which is the last place mentioned in this letter.

Some may be ready to question the utility of such minute, though abridged records, of meetings and Friends! But it is not so to the mind of the compiler. How many reminiscences of thought and feeling, and of kindness too received, are stirred up at the name and recollections of those Friends—and filling, as they did more or less conspicuous station in the church—who have now all or nearly all passed from the homes of earth! Dear reader, are we—art thou—in the Lord's hour of grace and mercy to thee, faithful in the occupancy of the gifts, and parts, and opportunities committed in serving thy generation, as some of them did, according to the will and to the honor of the great Head of the Church? Have the worthy mantles of those been taken up by their successors; and, with the authority they had in the Truth, have these with power proclaimed as Elisha did "Where is the Lord God of Elijah?" Or have we, through submission and obedience to the Lord Jesus, and His still small voice in the secret of the heart, so been faithful in the day of small things, as through His increase, to have become rulers over more? May we each one see to it, that our talents have not been neither are, buried in the earth, nor laid up in a napkin; that our light of living, practical godliness—the opportunity of glorifying Him on earth, whose praises we hope to sing forever and ever in heaven—be not hid under the bed of worldly ease, nor neath the bushes of earthly gain, but, through daily watchfulness unto prayer, be so set upon the candlestick that all may see the light. This, however high seems the standard, is what we are called to, after the precept of the Saviour "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven."

"Fourth mo. 9th, 1830. The commencement of our Annual Assembly! which was favored at the opening with the covering of Divine goodness and mercy; under the feeling of which dear Ann Jones bent in supplication in which offering my poor spirit sincerely joined. From sitting to sitting, thus far, we have been made sensible of the extendings of Heavenly Love, and the outstretched arm of

mercy unto us; notwithstanding from the days of our fathers we have gone away from the Lord's ordinances, and have not kept them. So that His language to us is, 'Return unto me, and I will return unto you, saith the Lord of hosts.' Oh! I believe He designs to bless us, and to make the place of His feet glorious. Praises be unto His holy name, through His well-beloved and truly begotten Son the Lord Jesus Christ, forever and forevermore. Oh! may we ever remember to trust in Him in whom our fathers trusted, and He did deliver them. Even so will He make way for His own seed in the present day, not only through the wilderness and sea, but through all perils, as we cleave close unto Him, and simply depend on His putting forth, graciously to His own blessed testimony, 'My sheep hear my voice, and I know them, and they follow me: and I give unto them eternal life; and they shall never perish, neither shall any man pluck them out of my hand.'

(To be continued.)

## THE FRIEND.

FIRST MONTH 31, 1874.

The Discipline of Philadelphia Yearly Meeting, contains the following Christian counsel to its members; which, we think, commends itself to the careful attention of every one who is truly concerned for their own spiritual welfare, and that of their offspring.

"We tenderly and earnestly advise and exhort all parents and heads of families, that they endeavor to instruct their children and families, in the doctrines and precepts of the Christian religion, as contained in the Scriptures; and that they incite them to the diligent reading of those excellent writings; which plainly set forth the miraculous conception, birth, holy life, wonderful works, blessed example, meritorious death, and glorious resurrection, ascension and mediation of our Lord and Saviour Jesus Christ; and to inculcate their children in the belief of those important truths; as well as in the belief of the inward manifestation and operation of the Holy Spirit on their minds; that they may reap the benefit and advantage thereof, for their own peace and everlasting happiness; which is infinitely preferable to all other considerations."

Every Christian parent or head of a family must feel anxiously concerned, that in the responsible position of a delegated Shepherd of the lambs, he or she may be enabled to make right use of all the helps at their command to promote the introduction and furtherance of those entrusted to their care in the way of life and salvation. It is therefore of great importance that parents be rightly engaged to train their children in a knowledge of the sacred truths contained in the Scriptures, in the habit of regarding them with due reverence, and in giving careful heed to the precepts, commands and doctrines they inculcate. It is one of the daily duties which parents and guardians should delight to perform, in a spirit and manner calculated to impress the serious character of the work in which they are engaged, and not as a mere game, or a service that requires no self-recollection or religious qualification; otherwise they can hardly look for a blessing from Him

who inspired holy men of old to write what has thus been handed down to us.

Commentaries or explanations of the doctrines involved in the text, unless by one who holds conscious communion with spiritual realities, and with their invisible Author, and called for at the time by Him who indited them, are more likely to dissipate the serious feeling that may have been made on the mind, than to enlighten the understanding.

It should never be forgotten that the Scriptures testify of Christ, and that that testimony is not only of Him as He was manifested in the flesh, suffered and died for lost man; but also as He, by his Spirit, makes himself known to the souls of his rational creation; reproving for sin, indicating the truth and the right way, and if obeyed, by his supernatural influence, proving the resurrection and the life of the dormant spiritual faculties; and that it is only by the aid of this Holy Spirit any can savingly know Him as their Redeemer and Saviour. The young ought therefore to be early imbued with the essential truth that as the Scriptures were written under Divine inspiration, the true interpretation and application of the sacred truths they contain can be attained only under the revelation of the same Spirit, and that it is by obedience to the manifestations of this Spirit, or Light of Christ, that their doctrines and testimonies will come to be measureably fulfilled in themselves.

It is thus that the Scriptures are able to make wise unto salvation, through faith that is in Jesus Christ. But when they are attempted to be explored, expounded and applied by the wit and wisdom of man, unconnected with "the inspiration of the Almighty," and unequalled for by Him who alone can bestow that "inspiration," they are degraded from the exalted character of a supernatural revelation, to the same rank as a work of science or philosophy; to be unravelled and their hidden mysteries explained by the rules of literary criticism and the subtlety of logical reasoning. "The natural man receiveth not the things of the Spirit of God, for they are foolishness unto him; neither can he know them, because they are spiritually discerned," and hence where such attempt to enlighten others by exegesis of Scripture, it is like the blind leading the blind, and both fall into the ditch. After all, there is nothing more availingly commends the lessons taught in the Scriptures to the acceptance of children, than where they see that their parents or care takers, who are concerned to have them familiar with their teachings, rightly prize them themselves, and that their lives and conversation are consistent with the doctrines they inculcate. Where this is the case, there will be not only religious training, but religious parental restraint, and such may have a well grounded hope of the declaration being fulfilled, "Train up a child in the way he should go, and when he is old he will not depart therefrom." But precept without corresponding example will avail little.

Looking upon them in another point of view, it may truly be said there is no other reading so fitted to purify the taste and store the mind with a knowledge of the most important facts in the history of mankind, as the Scriptures. Independent of their incalculable value as a secondary rule of faith and manners, they are enriched with the noblest

themes the mind of man can contemplate; themes connected with the mutations, the afflictions, the enjoyments and the sacrifices incident to humanity; which though belonging to this terrestrial and temporary scene, are yet mysteriously linked with thoughts of man's eternal destiny, and his connection with Him who is invisible. They impart ideas of that wonderful entity which we call life, that no other work can supply, and compel every rational believer in their truths to conclude, that as man was formed in the image of God, he is something more than a mere resident of this earthly home; that the three-score years and ten allotted him, are not the limit of his existence, but that becoming a living soul by the breath of his Creator, he is an heir of immortality.

Whether the spiritual truths are practically accepted or not, the diligent reader of the Holy Scriptures can hardly fail to have the conviction pressed upon him, that men in all ages, whether marked with genius, learning or rank, or unnoted in the humble walks of life, have approached the type of purity set before them, just in proportion as they have maintained a successful struggle against their corrupt appetites and propensities; that this overcoming has been through the aid of Him who required it; and that it has pleased Him to train his servants for the duties of life, in scenes of labor and often through provings of severe trial; that so the hopes held out, and the promises made, might be realized through grace alone, and the humbled and contrite spirit learn that its fittest ornaments are obtained through the habitual discipline of Divine Grace. Yet it is shown with equal clearness, that time has always demonstrated the afflictions, whether physical or spiritual, which have marked the good man's course, have proved to be dispensations of Love, meted out that he might learn to endure, as seeing Him who is invisible.

We hope our readers may individually prove for themselves the excellency, in every respect, of becoming familiar with the Holy Scriptures.

### SUMMARY OF EVENTS.

FOREIGN.—The marriage of the Duke of Edinburg and the daughter of the Emperor of Russia, took place in St. Petersburg on the 23d inst., with imposing ceremonies. The city was illuminated in the evening.

A London dispatch of the 24th says: Parliament is dissolved by royal decree. Premier Gladstone had issued an address to his constituents at Greenwich, asking for re-election, and announcing that the Queen had been pleased to accept advice of her Ministers to dissolve the present Parliament immediately, and summon a new one to meet on the 5th of March, 1874.

In his address Gladstone gives as the reason for this measure that since the defeat of the government upon the Irish higher education question by the efforts of the leader of the opposition and the Catholic prelatry in Ireland, the government has not been possessed of sufficient authority to carry out great legislative measures. Its experience during the recess of Parliament has not indicated that any improvement in disposition was probable, the chief of the opposition having refused to accept office on the defeat of the government; and the Cabinet feeling that they have not supports which every Ministry ought to have, an appeal to the people is the proper remedy for such a state of things. The advantage of a dissolution at the present moment is that the estimates are so far advanced that the government is able to promise a surplus of five millions sterling, with which it intends to abolish the income tax and to relieve local taxation. Among the matters likely to come before Parliament are the readjustment of the educational act, improvement of local government, and of the land, game and liquor laws.

The address promises large measures of relief from

duties on articles entering into general consumption, and expresses a hope for the speedy assimilation of county with borough franchise.

A large cotton factory in Glasgow was burned on the 23d inst., and 4000 operatives thrown out of employment.

A deputation of working men, headed by Joseph Arch, waited upon A. Gladstone and urged the propriety of extending the elective franchise to agricultural laborers. Gladstone expressed himself in favor of their object, but advised them to be patient, pointing out to them the magnitude and weightiness of the measure, and the brief duration of Parliament.

Private letters from the Gold Coast report that great sickness prevails among the troops of Sir Garnet Woolesey, proving fatal, in many cases, a few hours after the attack.

About seventy thousand tons of grain have been stored by the government in Bengal, in order to avert the threatened famine. Even though the famine be checked, there will be distress in many districts of India on account of the high prices of food. The Bank of England rate of discount has been reduced to 3½ per cent.

The English Mining Record Office has just issued its annual statement of the mineral produce of the United Kingdom for the year 1872, showing a total of 123,497,316 tons of coal, 6,741,929 tons of iron, 5,703 tons of copper, 9,560 of tin, 60,455 of lead, 5,191 tons of zinc, 628,920 ounces of silver, and 1,309,497 tons of salt, together with considerable quantities of arsenic, manganese, barytes, &c. The total value of coal and minerals amounting to £70,193,000.

The entire amount of capital invested in British railways, at the close of 1872, was £569,000,000, and the dividends on the shares varied from 12½ per cent. down to one per cent. and less, no dividends being paid on £33,000,000. The average of the dividends was 4.51 per cent. The number of miles of road 15,814.

Writs of election for the new House of Commons were promulgated on the 26th inst., and orders were also sent to Edinburgh for the election of sixteen peers representing Scotland in the upper House.

A German geographer, Dr. Guzzfeldt, under the patronage of the German Emperor, has begun the work of exploring almost the only portion of the African coast region unpenetrated by modern explorers, the portion extending southward from the Cameroons to Cape Colony. It is the region of the Congo river, of which little is known, excepting in the vicinity of its mouth.

Dispatches from Penang report that the Atchinese continue a desperate resistance to the occupation of their country by the Dutch. They recently attacked the principal position held by the invaders, but met with a repulse. The Dutch army has been reinforced.

In the French Assembly the bill conferring on the government the powers of appointing mayors was finally passed by a majority of 43.

The Duke Des Cazes, urging the postponement of an interpellation on foreign affairs, submitted by an Ultramontane, declared that the apprehensions that peace might be disturbed which had recently manifested themselves were unfounded. The government was solicitous for the welfare and spiritual independence of the Pope, but at the same time sincerely desired relations of harmony and friendship with Italy. The government would labor incessantly to prevent misunderstandings with any Power, for peace was necessary for the prosperity of France. The Duke said he made the above statement with the full concurrence of President MacMahon. A motion to postpone the interpellation was carried.

Madrid dispatches say that General Dominguez has opened the campaign against the Carlists in Valencia. Santander is threatened by the Carlists, and reinforcements for the Republican troops are being sent.

A Bayonne dispatch of the 25th says: The Carlists report that Santander and Portugaleti surrendered to their forces on the 22d inst., and that the entire Segovia battalion, with 1600 rifles and two cannon, fell into their hands.

Benjamin Disraeli has issued an address to his constituents in Buckinghamshire, asking for re-election to Parliament. In this address the one issued by Premier Gladstone is severely criticized. He thinks it would have been better for the country if, during the last five years, the foreign policy of the government had been a little more energetic, and its domestic policy a little less so. Disraeli denounces the proposed extension of household suffrage to counties, and says such a measure will involve the disfranchisement of the smaller boroughs. "The impending elections," he says, "are most important for the future of the kingdom. Though there is reason to hope that the Premier is not at pre-

sent opposed to national institutions, yet his adherents include assailants of the monarchy; those opposed to the independence of the House of Lords and the partisans of home rule. Some even urge the disestablishment of the English Church. His most trusted colleagues openly concur in a desire to thrust religion from national education."

Intelligence has been received in London of the death of Dr. Livingstone, in the interior of Africa. It is stated that he died in the 6th mo. last, while travelling from Lake Bembe to Unganembe. He had been travelling over a partially submerged country, and after wading four days through the waters, was seized by the illness of which he died.

At a meeting of the Royal Geographical Society doubts were expressed by some of the members as to the authenticity of the account of Livingstone's death.

UNITED STATES.—In New York, last week, there were 509 deaths. In Philadelphia the interments numbered 319, including 129 children under two years. There were 41 deaths of consumption, 38 inflammation of the lungs, and 18 debility. The foreign import trade of Philadelphia is steadily increasing. In 1871 the direct imports amounted to \$20,820,374, in 1872 to \$26,304,051, and in 1873 to \$29,186,925.

The amount of gold and silver operated upon at the Philadelphia and San Francisco mints and New York Assay Office, during the six months ending 12th mo. 31st, 1873, was \$60,881,667.

The national House of Representatives has passed a resolution requesting the President to extend, in the name of the United States, a respectful and cordial invitation to the governments of other nations to be represented and take part in the International Exposition to be held at Philadelphia under the auspices of the government of the United States, in the year 1876. In the discussion of the subject, it was admitted that Congress would probably be called upon to bear part of the expenses of the Exposition, which are variously estimated from seven to ten or more millions of dollars. The bill passed by a vote of 206 to 42.

The power under the law for the Secretary of the Treasury to issue the forty-four millions of reserve has been discussed in the Committee of Ways and Means, and a resolution has been reported to the House of Representatives for legalizing the issue, and making the amount of circulation four hundred millions instead of three hundred and fifty-six millions.

The Senate, in executive session, has confirmed the nomination of Morrison R. Waite for the Chief Justiceship, without a dissenting voice. The public press throughout the country speak favorably of the selection.

The Siamese twins, Chang and Eng, died on the 18th inst, at their home in Mount Airy, Surry Co., N. C. Chang died first and Eng survived him but two hours. They were about 63 years of age, and had resided in the United States since 1829.

The population of Nebraska, which was 28,000 in 1860, is now estimated at 300,000. The increase has been very rapid in the last three years.

I. G. Wilson and J. H. Millard, government directors of the Union Pacific Railroad, have made a report to the Secretary of the Interior, in which they say that with proper management they do not doubt the gross earnings may in a short time be increased to \$12,000,000 per annum. When that point is reached the road would be competent to protect, to the full extent, the interest which the government has therein. The road is not an expensive one to operate, and in this respect can be kept below the average of the roads of the United States.

*The Markets, &c.*—The following were the quotations on the 26th inst. *New York.*—American gold, 111½. U.
